FOREWORD

Now more than ever, our world needs Super Heroes. Super Heroes have provided escape, excitement, comfort, and hope ever since that first “strange visitor” from Krypton arrived in the pages of *Action Comics* more than 80 years ago. These are feelings I could relate to as a young boy born in South Korea who also arrived in a Midwestern city unsure that he fit in. As champions of the oppressed, Super Heroes provide us with a moral compass and the belief that there exists something strong enough to protect us. They have been shared and valued friends, providing a light at the end of the tunnel for generations of readers through periods of world crisis and the confusion and anxieties of everyday life.

The book in your hands is an introduction to the depth and wonder of the wide Multiverse of DC characters, a vast array that I wouldn't have ever dreamed possible when I was first buying DC's comics from a spinner rack. While many of DC's characters are iconic, this book shows that their mythology hasn't stayed ossified in time, but has grown and evolved. Each generation of DC writers and artists (including myself) have added to that tapestry by adding new characters or new takes on existing ones. Every page here holds the promise of discovery, from new or old characters you haven't previously known of, or unknown facts about characters or teams we think we know, like Batman, Catwoman, the Suicide Squad, Darkseid, Harley Quinn, the Justice League or The Joker. Every character is full of limitless possibilities.

With legacy vital statistics like the Height, Weight, Powers/Abilities and classic stories identified for each major character, books like this one have always been among my favorites to read. This newly updated edition of *The DC Comics Encyclopedia* explores DC's mythology and celebrates more than 1,200 DC Comics Super Heroes and Super-Villains. Some of them you might never have heard of, and others are so ingrained into our cultural DNA that even a towel pinned to a child's shirt can represent Superman, or paper bracelets around your wrists can symbolize Wonder Woman. Every page holds discovery worth our time, our energy, and our passion. A hero is someone whose actions and courage inspire us, our dream of who we aspire to be. Super Heroes give us hope and lift us up and I hope that, inside these pages, you may discover a hero and their journey that speaks to you personally and inspires you to help make a better world. Because the world can never have enough heroes.

Jim Lee

INTRODUCTION

Everyone knows the icons: Superman, Wonder Woman, Batman and Robin. They've adorned bed sheets, action figures, and lunch boxes for decades. They've starred in TV shows, video games, and blockbuster films, becoming pop culture institutions as the world's most famous pantheon of Super Heroes. In fact, in a poll conducted in the 1990s, Superman's famous S-shield was reported the most universally recognized symbol on the planet, second only to the Christian cross.

These treasured icons of modern mythology got their start in a medium that was originally quite modest. The publishing company that is known today as DC officially began with February 1935's *New Fun* #1, subtitled "The Big Comic Magazine." While the term "comic book" was not yet a household phrase, there were other comic magazines on the racks at that time. In the preceding years, comic strips had proven to be the most popular section of any good newspaper. To capitalize on the business of these "funny pages," publishers set out to reprint collections of comic strips on cheap paper, bound by a flimsy cover. While *New Fun* resembled these magazines, what truly set it apart from the competition was that it featured all new strips, and served as a proof of concept that readers were hungry for comics they'd never read before.

In March of 1937, *Detective Comics* debuted, a collection of detective and crime stories that would later inspire the famous DC Comics name. But it wasn't until June of 1938 that *Action Comics* #1 hit newsstands, introducing the world to the first official Super Hero in the form of Superman. This Man of Steel caught on with the fans "faster than a speeding bullet," and soon Batman, his youthful sidekick Robin, and Wonder Woman followed him into four-color fame. Super Heroes quickly became the dominant genre of these fledgling comics books, and have yet to truly relinquish their hold on a still-fascinated audience.

With over eight decades of superheroics under its rather impressive utility belt, DC has grown its stable of characters to include famous faces like The Flash, Green Lantern, Shazam, Aquaman, Plastic Man, Hawkman, Lex Luthor, Swamp Thing, The Joker, Catwoman, and a relatively new favorite, Harley Quinn. DC has evolved, attracting new fans every day in a variety of mediums, from Emmy award-winning cartoons to high-rated, live-action series, from Oscar-winning films to bestselling graphic novels. And in the process, the DC Multiverse has grown from the handful of members that made up the first Super Hero team called the Justice Society of America to a vast Multiverse, containing thousands upon thousands of residents, each with a dramatic story to tell.

The DC Comics Encyclopedia: New Edition is a roadmap to that universe. It's a guide to the best and the brightest, the most corrupt and notorious. It serves to not only reveal to new readers the rich and detailed landscape

of the DC Multiverse and its characters, but to also remind longtime fans of their favorite storylines and moments, supplying even the most diehard reader with a new fact or twenty.

The characters included in this volume were hand-picked by comic book historians working directly with DC. They were thoroughly researched with the intent of supplying all the need-to-know background of each hero, villain, team, or supporting character, and plenty of extra tidbits along the way. Every entry is accompanied with dynamic visuals pulled from DC's archives, in an effort to showcase the countless writers, pencillers, inkers, and colorists who have lent their talents toward making DC the well-respected institution it is today.

The entries in this book range from four-page spreads on DC's biggest names, to smaller entries on some of the lesser-knowns and up-and-comers. Each character is given their own "Data Box," containing vital information, such as the character's debut issue, secret identity, and powers and abilities. For those more iconic characters, an "At A Glance" section is supplied to give readers the main bullet points in the character's tumultuous life. These larger entries come complete with a "Classic Stories" section that suggests further comic book reading, offering up some of the best tales from DC's extensive library.

DC is always moving forward and bringing its characters into uncharted territory. A result of that progressive thinking has been drastic alterations to the status quo a time or two in the company's past, most notably as a result of the comic book event miniseries *Crisis on Infinite Earths* and *Flashpoint*, and the recent line-wide back-to-the-basics approach known as *Rebirth*. To reflect this grand history, the entries in this book have been tailored accordingly. Whenever possible, the most recent post-*Rebirth* version of any given character's backstory and history is supplied in the main body. However, in the larger entries, an "On the Record" section is included. This feature reveals interesting historical details that may have fallen by the wayside over the years, summarizing big events and storylines that often hail from continuities past. This ensures *The DC Comics Encyclopedia* is as thorough as possible, while remaining user-friendly to those fans not yet introduced to the Multiverse of possibilities hiding in the background of their favorite issues.

Everyone knows something about the icons of DC. Now, thanks to *The DC Comics Encyclopedia: New Edition*, they have the opportunity to know virtually everything.

A BRIEF HISTORY OF THE DC UNIVERSE

The DC universe (DCU), with its multitude of characters, stories, and events, may seem a little daunting to new readers and fans alike. To aid travelers on their journey through this universe, this timeline highlights major turning points in DC's long and dynamic history—from birth to *Rebirth*.

SILVER AGE

Showcase #4 (Sep.-Oct. 1956)

The Silver Age of Comics dawns as The Flash is reinvented for a new era with the debut of Barry Allen.

The Brave and the Bold #28 (Feb.-Mar. 1960)

The concept behind the Justice Society of America—a high-profile group of Super Heroes—is rekindled with DC's modern icons teaming up to form the Justice League of America (JLA).

The Flash #123 (Sep. 1961)

The Multiverse is created when the Golden Age Flash comes face to face with his Silver Age counterpart. The Golden Age Flash's reality would become known as Earth-2, while the Silver Age Flash's world would eventually be designated Earth-1.

Justice League of America #21 (Aug. 1963)

The DC universe has its first interdimensional crisis when the JLA meets the JSA for the first time, in what will become a yearly team-up tradition.

Detective Comics #359 (Jan. 1967)

Batgirl, Barbara Gordon, bursts onto the scene in her debut appearance; an independent, capable hero who fast became one of DC's most popular characters.

BRONZE AGE

Detective Comics #395 (Jan. 1970)

Batman is taken back to his darker roots in "The Secret of the Waiting Graves," a momentous issue that helped usher in the Bronze Age of comics.

Green Lantern #76 (Apr. 1970)

The pairing of Green Lantern and Green Arrow brings comics up to speed with the problems of the modern world, serving up a healthy dose of social commentary.

New Gods #1 (Mar. 1971)

The DC universe gains a pantheon of New Gods in an epic space saga set in a Fourth World on the fringes of Superman's reality.

DC Comics Presents #26 (Oct. 1980)

The "junior Justice League" known as the Teen Titans comes into its own in a preview to their ongoing title, *The New Teen Titans*.

GOLDEN AGE

Action Comics #1 (Jun. 1938)

The world's first-ever Super Hero debuts in the mighty form of Superman, the Man of Steel. His immediate success kick-starts the Golden Age of comic books.

Detective Comics #27 (May 1939)

Batman swings into comic book action, inspired by both Superman and the masked-man pulp fiction popular at the time.

All-Star Comics #3 (Winter 1940)

The DC universe takes shape as some of the most successful Super Heroes band together for the first time to start the Justice Society of America (JSA). Members include the recently created The Flash, Green Lantern, and Hawkman.

All-Star Comics #8 (Dec. 1941-Jan. 1942)

The first truly iconic female Super Hero is torn from myth and transported to modern times—the Amazing Amazon, Wonder Woman.

Crisis on Infinite Earths #1 (Apr. 1985)

To streamline the various multiple Earths that had formed in their 50-year history, DC Comics launches a 12-issue series that sees many worlds perish at the hands of the Anti-Monitor. When the villain is finally dispatched, only one Earth remains.

In this new reality, most Earth-2 heroes are established as having been active during World War II, while the adventures of Earth-1's heroes take place in the present day. In the wake of *Crisis on Infinite Earths*, the origin stories for icons such as Superman, Batman, and Wonder Woman are retold, with major continuity corrections that match the reality of their new Earth.

DARK AGE

Batman: The Dark Knight #1 (1986)

In a dystopian near-future, an aging, embittered Batman steps over the thin blue line to battle foe and friend alike to bring rough justice to Gotham City. This landmark miniseries connected with a mature readership and set the content, tone, and style for the coming of comics' Modern Age.

Watchmen #1 (Sep. 1986)

Another watershed miniseries, *Watchmen* put the "meta" into metahumans, updating Super Heroes for adult readers. Set on the brink of armageddon, this elaborate murder mystery unfolds into a sprawling, literary epic that would have a significant impact on the DC universe and beyond.

Legends #1 (Nov. 1986)

When Darkseid, the tyrannical lord of Apokolips, attacks the world's heroes by turning the common man against them, a new incarnation of the Justice League forms to oppose him, alongside government-run Super-Villain team the Suicide Squad.

Superman (Vol. 2) #75 (Jan. 1993)

The Man of Steel is killed while subduing a murderous alien beast known as Doomsday. Superman later finds his way back to the land of the living after a tumultuous year for Metropolis.

The Batman Adventures #12 (Sep. 1993)

Making the transition from screen to page, Harley Quinn arrived in the DC universe from *Batman: The Animated Series* and became a permanent fixture in Batman's rogue's gallery.

Zero Hour #4 (Sep. 1994)

While the DC Multiverse's various Earths were merged into one during *Crisis on Infinite Earths*, some lingering continuity issues are neatly tied up in the miniseries *Zero Hour*, which tells of power-mad former Green Lantern Hal Jordan's attempts to remake the world in his image. Ongoing tie-in titles, each with their own issue #0, relate the title character's newly revised origin.

MODERN AGE

Identity Crisis #1 (Aug. 2004)

Dark secrets from the Justice League of America's storied history come to light in this murder mystery miniseries that reveals a time when the League resorted to wiping the minds of its villains.

Infinite Crisis #1 (Dec. 2005)

Survivors of some of the lost realities from the original *Crisis on Infinite Earths* return to the DC universe. In this miniseries, Superboy-Prime and the Alexander Luthor of Earth-3 instigate a new crisis to retrieve their respective Earths. The result is New Earth, as continuity is again tweaked to update the DC universe.

52 #1 (May 2006)

As DC titles jump a year ahead in the wake of *Infinite Crisis*, the weekly 52-issue maxiseries, simply dubbed 52, fills in the gaps, culminating with the villainous Mr. Mind altering multiple worlds and creating a new Multiverse of 52 Earths.

Final Crisis #1 (Jul. 2008)

Evil wins as Darkseid's forces conquer the Earth, succeeding in "killing" Batman, until Superman leads a revolt to stop the tyrant. By the end of the series, it is revealed that Bruce Wayne is merely displaced in time; he eventually finds his way home in 2010, while Dick Grayson, as Batman, protects Gotham City.

Blackest Night #1 (Sep. 2009)

Undead Super Heroes and Super-Villains are recruited as Black Lanterns, due to the machinations of the villain Nekron. Several Lanterns from across the Emotional Spectrum work together to stop this *Blackest Night*.

The result is the *Brightest Day* maxiseries that sees the rebirth of many characters, including Swamp Thing.

Flashpoint #1 (Jul. 2011)

The most significant continuity-altering event since *Crisis on Infinite Earths*, *Flashpoint* establishes an alternate world that a stranded Barry Allen must fight his way back from. However, when The Flash manages to return the world to its proper status quo, the result is Earth-0, a universe similar to the former New Earth, yet different in many ways.

MODERN AGE

The New 52 (Nov. 2011)

The universe of Earth-0 is introduced with the launch of 52 separate titles. Long-running mainstay titles like *Action Comics* and *Detective Comics* restart from issue #1, as the world discovers a fresh reality where iconic heroes are in the prime of their lives. Superman's origin is retold in *Action Comics*, Wonder Woman's past is reevaluated in the pages of her own title, and Batman embarks on a "Zero Year" that reveals a modern take on his familiar history.

Forever Evil #1 (Nov. 2013)

Spinning out of the pages of the crossover "Trinity War" that featured in the three Justice League titles of the time, *Forever Evil* tells how Earth-3's Crime Syndicate arrives on Earth-0, forcing Batman and Lex Luthor to team up to stop them.

Convergence #0 (Jun. 2015)

Readers are treated to the adventures of characters from a variety of past continuities as

Brainiac tries to converge the worlds of the multiverse. When the heroes rebel, a newly updated Multiverse is formed, with worlds similar to the ones that came before, yet modernized for a new audience.

DC You (Aug. 2015)

A series of new titles is launched, while many of DC's icons get a facelift. Commissioner Gordon temporarily assumes Batman's mantle when the Dark Knight goes missing, Superman briefly loses his powers due to Vandal Savage's manipulations, and Wonder Woman sports a new costume and mission.

Justice League #40 (Jun. 2015)

In an initial, prologue chapter, "The Darkseid War" begins, pitting the all-powerful Anti-Monitor against Darkseid in a clash that briefly grants godlike powers to members of the Justice League.

DC Universe: Rebirth #1 (May 2016)

In a one-shot special that leads to a series of character-specific *Rebirth* specials, the DC Multiverse takes its next step in evolution when Wally West (The Flash) returns. While some major titles restart at issue #1, two flagship books, *Action Comics* and *Detective Comics*, return to their old issue numbering prior to the New 52. The pre-*Flashpoint* Superman picks up where his recently deceased successor left off, the forgotten original Teen Titans form the Titans, and Wonder Woman's history is again revised. All the while, the cast of the *Watchmen* wait in the wings, surveying their handiwork.

PRIME AGE

Dark Nights: Metal #1-6 (Oct. 2017-May 2018)

A fresh cosmic crossover event rewrites the history and cosmology of DC. It is only the spearhead of even greater changes. As Batman strives to solve the mystery of unknown metals that have plagued his life and shaped humanity's history, he uncovers schemes originating in a previously unsuspected Dark Multiverse, which pit Earth's heroes against monstrous versions of the Dark Knight and heralds the return of the being who birthed all existence. The reality-shaking events were preceded by two one-shots, *Dark Days: The Forge* (Aug. 2017) and *Dark Days: The Casting* (Sep. 2017), with repercussions that resound throughout all DC's other titles.

Doomsday Clock #1-12 (Jan. 2018-Feb. 2020)

One of the most eagerly anticipated sequels in DC history, *Doomsday Clock* picks up where *Watchmen* ended in October 1987, revealing the machinations of Doctor Manhattan, his alterations to DC's timeline, and how he may have edited key moments and characters out of reality in *DC Rebirth*. As another universe spirals toward annihilation, heroes and villains of the Watchmen universe combine with some of DC's more sidelined and rarely seen champions to fix everything and save humanity.

Dark Nights: Death Metal #1 (Aug. 2020)

After three years of spectacular chaos and turmoil, the DC Multiverse is under final assault by reality-rendering Perpetua, whose dark designs for life are threatened by her treacherous subordinate Barbatos and challenged across countless universes by an army of astonishingly altered heroes and villains. With the balance between multiversal Light and Darkness at stake, the fate of all that lives depends on these barely recognizable icons and the wit and guts of multiversal outcast Wally West...

DEBUT *Justice League* (Vol. 2) #7 (May 2012)

BASE Mobile

OFFICIAL NAME Advanced Research Group Uniting Super-Humans

ALLIES Justice League, Killer Frost

ENEMIES Secret Society of Super-Villains

AFFILIATIONS Justice League of America

Unproven stories persist that the clandestine agency A.R.G.U.S. has actually existed ever since the Revolutionary War. When civil war divided the country several decades later, the organization became known as the Anonymous Ranger Group of the United States.

Officially, A.R.G.U.S. was created by the US president as America's official government liaison to the Justice League. With Steve Trevor in command, the agency provided financial support and clean-up services, but its real purpose was to spy on seemingly all-powerful Super Heroes.

Over a period of five years, Trevor expanded the organization's remit to include the monitoring of all metahuman and unnatural threats. A.R.G.U.S. agents confiscated mystical artifacts and advanced technologies, policed extra-dimensional incursions, and covertly battled monsters, villains, and Super Heroes acting against the perceived interests of the US and humanity. These threats were neutralized and deposited in classified research vaults known as the Black Room, Red Room, and Circus.

When Amanda Waller replaced Trevor, she created the Justice League of America as a secret weapon in case the original heroes should ever go rogue.

STARTING OVER
After the Crime Syndicate and Secret Society decimated A.R.G.U.S., Trevor dedicated himself to rebuilding the agency.

EYES ON THE PRIZE
As long as Steve had a few good men and women to back him up, A.R.G.U.S. could never be counted out.

All Star Squadron (Vol. 1) #1 (Sep. 1981)

BASE The Trylon and Perisphere, New York City

POWERS/ABILITIES Many and various; employed by every World War II American hero and mystery man united in defense of liberty and democracy against the Axis powers.

ALLIES Blackhawks

ENEMIES Adolf Hitler, Nazi Germany, Imperial Japan, Baron Blitzkrieg, Ultra-Humanite, Per Degaton, enemy spies

AFFILIATIONS Federal Bureau of Investigation, US War Department

IN TIMES OF CRISIS...

The All-Star Squadron was shaken to its core when the crisis instigated by the cosmic destroyer, the Anti-Monitor, reconfigured the Multiverse. As a result, history was rewritten and heroes such as Superman, Batman, Wonder Woman, and Green Arrow ceased to exist on Earth-2. This left a leaner, meaner Squadron to battle Hitler's hordes.

ALL-STARS AND STRIPES

When Earth-2 needed them most, America's mystery men and masked heroes banded together to answer the call.

When President Franklin Delano Roosevelt received warning of an imminent Japanese attack on Pearl Harbor, he sent out an urgent call to the newly constituted Justice Society of America (JSA). Unfortunately, the JSA had been ambushed by an association of enemies from their own future so were unable to respond.

However, with the heroic "big guns" unavailable for duty, a number of other patriots who had begun fighting as masked heroes responded to the president's desperate pleas. Coming together in the wake of the Japanese attack, and led by Liberty Belle and Hawkman, a battalion of these new heroes formed the All-Star Squadron. This loose umbrella organization comprised the Justice Society, Seven Soldiers of Victory, and Freedom Fighters, as well as various non-aligned "mystery men." Their joint mission was to defend America until victory was achieved.

When World War II ended, the All-Star Squadron was duly disbanded.

The costumed champions' overwhelming firepower might well have ended World War II early, but for a mystic barrier that covered every inch of Axis-controlled territory. This arcane curtain served to enthrall any magic-based or susceptible hero, turning them into slaves of the aggressor nations.

ABRA KADABRA

DEBUT *The Flash* (Vol. 1) #128 (May 1962)
REAL NAME Citizen Abra
BASE 64th century Earth, Keystone City
HEIGHT 5ft 10in **WEIGHT** 125 lbs
EYES Green **HAIR** Bald
POWERS/ABILITIES Employs 64th-century techno-magic to create energy blasts, reality alterations, illusions, hypnosis, teleportation, and time manipulation.
ALLIES Legion of Zoom, Injustice Gang, Secret Society of Super-Villains
ENEMIES The Flash (Barry Allen), The Flash (Wally West), Titans

Abra Kadabra came from the 64th century and used that era's advanced technology to satisfy his twin obsessions: to be a stage magician and to bask in adulation.

Kadabra's war against two Flashes frequently saw him frustrated and humiliated and he later made a deal with the demon Neron to become a true sorcerer.

Kadabra reverted to scientific trickery after Wally West was removed from the continuum, claiming credit for the deed. When the third Flash returned to Earth Prime's reality, Kadabra attacked him and his allies in the Titans. In recent times, Kadabra joined the Legion of Zoom—an alliance of rogues who united to destroy another resurrected Flash (Barry Allen).

ENEMIES The Untitled

Millennia ago, a family of nine warriors formed the Untitled, a cult dedicated to absolute evil, power, and immortality. Eventually, one sister, Ducra, revolted and

formed the All Caste to fight her siblings.

For 3,000 years, Ducra the Instructor led her warrior-monks in a secret war against her family. Deep in the Himalayas, cloistered in the Chamber of All, the monks toiled, forging links with the outside world, but remaining largely independent from it.

They trained Jason Todd after his resurrection. When he returned to the Acres of All years later, he found Ducra and her All Caste had been brutally exterminated. As he apologized to Ducra's body for having failed her, Ducra's spirit appeared, revealing they had been murdered by the Untitled.

Alongside sole survivor, Essence, Todd avenged the All Caste's deaths, believing he had ended the Untitled, but recently the vile clan revived, assaulting Qurac and attacking the Red Hood's new Outlaw team.

ALPHA CENTURION

DEBUT *Zero Hour* (Vol. 1) #3 (Sep. 1994)
REAL NAME Roman
BASE Metropolis
HEIGHT 5ft 8in **WEIGHT** 165 lbs
EYES Brown **HAIR** Black
POWERS/ABILITIES Superhuman strength, flight, durability, speed; can manifest a personal pantheon of alien warriors called the Pax Galactica.
ALLIES Superman, Supergirl, Eradicator, Steel
ENEMIES Lex Luthor, Cyborg Superman

College student Roman was gravely wounded during an attack by Lexus terrorists at the Metropolis Museum of History. Bleeding profusely, he used an ancient belt as a tourniquet and was instantly possessed by a minor Roman god who had been trapped inside the strap.

Alpha Centurion took over and transformed Roman's body. Now blessed with superhuman abilities, he easily defeated the terrorists at the museum.

Since that moment, Alpha Centurion has repeatedly commandeered Roman's body, leaving his host terrified that one day the warrior-hero will decide to possess him for good. The Centurion seems able to sense imminent danger before it arises and force the change without warning.

Alpha Centurion has possessed many hosts over the centuries, destroying monsters and carrying out the edicts of the mystical Pantheon of Grace. He is compelled to save lives and maintain order at all costs.

QUO VADIS?

Roman never knew when his body was about to be taken over by Alpha Centurion, or where the next usurpation would take him.

ALPHA LANTERNS

DEBUT *Green Lantern* (Vol. 4) #26 (Feb. 2008)
BASE Oa
POWERS/ABILITIES Cyborg bodies, incorporating Manhunter technology, are able to drain Green Lantern rings of charge.
ENEMIES Sinestro Corps, Cyborg Superman, Guardians of the Universe
AFFILIATIONS Green Lantern Corps

When the Guardians of the Universe rewrote the Green Lanterns' rules of conduct, they created a new division to police the Corps. These were Alpha Lanterns, loyal veterans converted into cyborgs. Their bodies incorporated Manhunter technology and had an inbuilt Battery of Power that could drain Lanterns' rings. This "Internal Affairs" division was disliked by rank-and-file officers, as was their chilling Oath of Intent:

"In days of peace, in nights of war,
 Obey the laws forever more Misconduct
 must be answered for
 Swear us, the chosen...
 The Alpha Corps!"

On deciding that Green Lanterns were a failed experiment, the Guardians manipulated their Alpha Lanterns into triggering a civil war within the Corps. By maneuvering Guy Gardner and an army of Emerald Warriors into destroying their cyborg overseers, the Oans were simply removing an obstacle to the introduction of their remorseless, emotionless "Third Army."

POWERFUL PAWNS

Alpha Lanterns proudly surrendered their very beings to better serve the Corps, but they were betrayed without qualm by their callous masters.

AMAZING MAN

DEBUT *All Star Squadron* (Vol. 1) #23 (Jul. 1983)
REAL NAME Rocker Bonn
BASE Wayne, Texas
HEIGHT Variable **WEIGHT** Variable
EYES Brown **HAIR** Black
POWERS/ABILITIES Matter absorption, body transmutation, and regeneration; can discharge absorbed matter as blasts of energy.
ENEMIES Brother Eye, O.M.A.C.

Rocker Bonn was an operative of the intelligence agency Checkmate before he was transferred to its public subsidiary, Cadmus Industries. Subjected to genetic experiments as part of Project Cadmus, he gained the power to explosively incorporate mass and matter, while also taking on their physical properties. Given the codename Amazing Man, Bonn escaped before he could become Cadmus' tool.

Sometime later, while Bonn was in hiding and working at a Texas diner, the rogue sentient satellite Brother Eye manipulated him into battling Kevin Kho, the unwilling host of the Eye's One Machine Attack Construct (O.M.A.C.).

Caught in a confusing three-way battle between the police, O.M.A.C., and himself, Amazing Man was held at bay and, after being tricked into absorbing some of O.M.A.C.'s circuitry, was ultimately absorbed into Brother Eye, who deemed the transmorph useful to its own plans.

GO FOR THE EYES

Tricked into combat with O.M.A.C., Amazing Man initially had the upper hand, but then O.M.A.C. temporarily blinded him.

AFFILIATIONS Doom Patrol, Amber Butane Corps, Uh-Oh Squad, Superman

Irwin Schwab is deeply delusional, morally ambiguous, and obsessed with Super Heroes. As Ambush Bug, he sought to join their rarefied society in a body-suit that he claims fell to Earth from the planet Schwab.

Harassing Super Heroes including Superman, Batman, Wonder Woman, and Kobra, he displayed the abilities of teleporting and healing from any injury. Failing as a villain and faring no better as a hero, he briefly found his niche and a measure of stability as A. Bug: Super Hero field-correspondent for Channel 52 News.

He still maintains that he has cosmic awareness and that reality is merely comic books being read by extra-dimensional superior beings.

ANTENNAE FOR NEWS

Ambush Bug always seems to know when there's a story brewing, and he's not afraid to rake a little muck or ruffle a few feathers to get at the truth.

As well as absorbing and replicating the powers of metahumans, the Amazo android could also recreate their equipment, such as Green Lantern power rings.

KID AMAZO

Reggie Meyer's entire family were infected by the Amazo virus. Retaining superpowers, they used them to fight crime in their home town. However, Reggie, as Kid Amazo, chose to exploit his abilities with stolen Amazo armor to create an army of robotic clones. His vindictive depredations were stopped first by the Super Sons, Jonathan Kent (Superboy) and Damian Wayne (Robin), and later by Nightwing.

PROBLEM CHILD
Kid Amazo planned to cause havoc with his robot army.

Obsessed with immortality,

Professor Ivo designed a synthetic enzyme capable of absorbing the energies and powers of any being around it. He incorporated it into the "A-maze" operating system: part of the cybernetic modifications that saved Vic Stone's life and recreated him as Cyborg. Ivo then constructed a full embodiment of the system, known as the Amazo Android, which battled the Justice League. Ivo later constructed a childlike android that combined organic and cybernetic systems. Dubbed "Kid Amazo," it was his secret weapon against the League, but it acquired too much human nature and self-destructed.

The adult Amazo later became a member of the Secret Society of Super-Villains. Lex Luthor subsequently used the Amazo system as the basis of his deadly Amazo Virus. Its first casualty was LexCorp's Dr. Armen Ikarus and the virus went on to infect dozens of people. Many were permanently changed and some became super-powered.

Eventually the robotic Amazo gained full autonomy and pursued his own schemes. Unable to escape his core programming, he still attacks the League and other heroes, and he has joined the Cabal—a criminal alliance, intent on profit and domination which is safely beyond the scrutiny of Earth's Super Heroes.

STOLEN POWERS

The original Amazo was an android created by the mad scientist Professor Ivo. He gifted it with powers stolen from Earth's greatest heroes, in hopes of using it to conquer the world.

Teenager Amy Winston's life changed on learning she was a princess from a magical dimension. After her parents were killed by Lord Opal, she had been hidden on Earth by her sorceress nanny Citrine, who left her with loving human foster-parents Herb and Marion Winston.

On discovering the truth, Amy returned to Gemworld and, with the aid of other ruling Houses, destroyed Opal and liberated its oppressed peoples. However, in recent times Amethyst has found her fairy-tale existence to be a lie. Many Houses are as power-obsessed as her old enemy. More incredibly, Opal is back and Amethyst's own parents are still alive—although entombed in purple crystal along with all her subjects.

With all Gemworld being manipulated by a hidden foe intent on magical domination, Amethyst was briefly driven into exile by the other Houses. She adventured across the Multiverse with the teen heroes of Young Justice before returning home to save Gemworld again.

ON THE RECORD

Gemworld was created in ancient times after a large proportion of Earth's magic-wielders and fabulous beasts and creatures migrated to a vacant dimension to preserve their power in the face of a mounting tide of science and rationalism. They maintained their medieval ways, recreating a feudal system based on the abundant magical crystals of their new home, and they divided into twelve major clans or Houses. Devised to check and balance each other, every House derived power from a particular form of gemstone.

GROWING PAINS

When she debuted, Amy Winston was just 13 years old. In Gemworld, she became an adult and had to face villains, including Flaw and the Child.

AFFILIATIONS Olympian Gods

A race of warrior women who worship the Olympian gods as their Patrons, the Amazons live on Themyscira, also known as Paradise Island. Led by Queen Hippolyta, these noble warriors helped raise one of the finest heroes the outside world has ever known: Wonder Woman.

Technologically advanced and highly skilled in the ways of both war and peace, the Amazons lived a life separate from so-called "Man's World" for centuries. Amazons are immortal as long as they remain on Paradise Island's shores, yet some of their number were not content to hide away from the rest of

PEACEFUL WARRIORS

The Amazon way is to train mind, body, and spirit, ensuring that war is only undertaken for the right reasons.

civilization. This tribe of warrior women, known as the Bana-Mighdall, renounced the Olympian gods and opted for a nomadic life away from Themyscira, serving Egyptian Gods instead. Life remained otherwise a constant for the Amazons until Queen Hippolyta had a daughter with the god Zeus. The first child seen on Themyscira's shores in generations, Diana was adored by her fellow Amazons and taught a variety of skills by them, including the ways of a warrior.

When she became an adult, Diana was chosen to represent the Amazons to the outside world as Wonder Woman. However, that honor came at a cost, and she was forbidden to ever return to her home island. Yet time and time again, Wonder Woman returned to Themyscira, somehow not noticing that her mother and fellow Amazons looked different than before. In reality, Diana had been deceived, and soon saw through this veil of lies. She was forced to face the hard truth that her real mother was lost to her forever.

However, Wonder Woman eventually found her way back to the true Themyscira, thanks to the sword of a fellow Amazon, Antiope. At the time, the Amazons were fighting amongst themselves due to the machinations of Darkseid's daughter, Grail. Diana helped defeat Grail and unite the factions, and was reunited with her own mother in the process. Wonder Woman is now able to come and go from Themyscira as she pleases.

DEARLY DEPARTED

Diana was given an impressive sendoff from her sisters as she left Themyscira aboard a makeshift Invisible Jet.

ON THE RECORD

In their 1940s comics debut, the Amazons were a group of immortal warrior women who were compelled by the goddess Aphrodite to leave the world of men for the isolated Paradise Island of Themyscira. Over time, the Amazons reestablished diplomatic relations with the outside world and even reconstructed their island home after it was destroyed.

Hippolyta had been present since the Golden Age of Comics, and her death forced the Amazons into a new era, with Diana as their Queen. From the late 1960s, the Amazons' fearsome fighting abilities made them the frequent target of various Olympian gods and worldly forces who wanted to control them. After the *Crisis on Infinite Earths*, Wonder Woman received a new origin, as did the Amazons. This reinterpretation featured a blonde Hippolyta and a more ferocious Amazon sisterhood, occasionally adding to their number when hapless sailors passed too close to Themyscira's shores.

When a human trafficker named Jeb Lester was set on fire and thrown from Wayne Tower in downtown Gotham City, Batman and Harvey Bullock began investigating the case. They discovered that Lester's killer was a new vigilante calling himself Anarky, using the persona of a figure seen during the Zero Year. After attempting to blow up Wayne Tower itself, Anarky went public with a video, exhorting Gotham City's citizens to break free from their self-imposed prisons and participate in citywide chaos. To enable people to do so anonymously, he arranged for Anarky masks to be delivered to everyone's doorsteps.

In truth, Anarky was city councilman Samuel Young, who was using his Anarky movement as a smokescreen to hide his real activities and motives. Several years previously, when Sam was younger, his sister had been abused and murdered by the Mad Hatter. Now an adult, Sam wanted revenge, so he kidnapped the villain. He planned to murder the Mad Hatter and also use the Mad Hatter's mind-controlling technology to command an army of innocent citizens, all wearing Anarky masks. He even went so far as to model his masks on his sister's face! It took the joint efforts of Batman and Detective Harvey Bullock of the G.C.P.D. to foil Anarky's plans.

More than five years ago in the Congo, a hero named Animal Man pursued a group of poachers. He was the chosen avatar for the Red, a mystical force that connects all animals. Animal Man was surprised when one of the men he was pursuing turned out to be Anton Arcane, an agent for a rival force of death and decay known as the Rot. Arcane murdered this Animal Man. As a result, the Red sought to create a new avatar. They chose movie stuntman Buddy Baker to serve their needs.

While driving home from work, Buddy saw what appeared to be an alien spaceship crash in nearby woods. He went to investigate—and passed out. Buddy never suspected that the Red was simply creating an origin scenario for him that he could easily comprehend, rather than reveal its true properties. So, when he awoke in the woods, Buddy came to believe that he had been kidnapped by aliens and operated on. Finding a costume the Red had left for him, he decided to become a Super Hero, just as the Red had planned all along. Buddy later learned the true secret of his transformation, after he had already embraced his heroic role as Animal Man.

On the distant planet Qward many years ago, a being named Mobius built a sophisticated device called the Mobius Chair. On a quest to glimpse the forbidden, Mobius attempted to view the source of the Anti-Matter Universe, hoping to discover what sparked its creation. What he found was the Anti-Life Equation, an infamous truth the tyrant Darkseid had spent a lifetime trying to locate. The equation merged with Mobius, transforming him into the immensely powerful Anti-Monitor. Meanwhile, the Mobius Chair came into the possession of the New God Metron, who used it to explore the universe.

The Anti-Monitor became a destroyer, traveling from one universe to the next, consuming worlds. He caused the Crisis on Infinite Earths, destroying the Multiverse, an event only a few, including Metron, recall. But Mobius soon grew tired of his destructive life and hatched an elaborate plan with Darkseid's daughter, Grail, to rid him of this burden. Waging war on Grail's father, he murdered five billion people on Earth-3 to absorb their energies and then he attacked and killed Darkseid. This act released his energies and allowed Mobius to free himself of the curse of living as the Anti-Monitor.

ON THE RECORD

In his original incarnation, the Anti-Monitor looked different, but was just as powerful as his reinvented form after the *Flashpoint* event. While *Crisis on Infinite Earths* altered reality in the 1980s and *Flashpoint* changed it again in 2011, the Anti-Monitor's Multiverse-reshaping role remained the same—though few characters could recall fighting the Super-Villain. Destroyed during *Crisis*, the Anti-Monitor was reborn when 52 new realities formed, and became guardian of the Sinestro Corps.

WORLDS IN CRISIS

The Anti-Monitor's devastating attempts to create a pure anti-matter Multiverse only ended when the surviving heroes of different Earths sacrificed their lives to stop him.

Raised by lighthouse keeper Tom Curry after his Atlantean mother Atlanna returned to the oceans, Arthur Curry was called back to fulfill his royal destiny before he reached adulthood in the small coastal town of Amnesty Bay, Maine. He patrols nearly 70 percent of the Earth's surface, and he commands the allegiance of all creatures that swim in its waters. Former ruler of Atlantis and Poseidon's designated guardian of the oceans, Aquaman is also a founding member of the Justice League.

AT A GLANCE...

City under the sea

The legendary city of Atlantis has spawned myths for centuries. Behind them all lies a reality even more extraordinary than the myths. This fantastic seafloor city is home to an advanced civilization whose citizens guard the oceans and mistrust anyone who lives on land.

Mera

A fearless and powerful hero in her own right, the Xebel princess Mera was trained from childhood to kill Atlanteans. Her love for Aquaman has superseded Xebel teachings, however.

Aquatic influence

Aquaman has the ability to influence the behavior of marine organisms. It isn't exactly telepathy, since most sea creatures don't have enough of a mind to respond to telepathic commands, but he can create desires within them and rely on their own natures to do the rest.

CLASSIC STORIES

Aquaman (Vol. 5) #42-46 (Mar.-Jul. 1998) Olympian dynastic wars come to Atlantis in "Triton Wars," as Poseidon's son seeks to rule the seven seas.

Aquaman (Vol. 6) #15-20 (Apr.-Sep. 2004) "American Tidal" sees the spontaneous sinking of San Diego kill thousands... but gives thousands more a new aquatic life. Who is behind it?

Aquaman: Sword of Atlantis (Vol. 1) #40-45 (May-Nov. 2006) Young Arthur Curry falls into a series of undersea intrigues involving King Shark, the history of his namesake, and the destiny of Atlantis.

Aquaman (Vol. 7) #14-17 (Jan.-Apr. 2013) The "Throne of Atlantis" pits Ocean Master against the surface world, with Aquaman caught in the middle.

Atlanna, the queen of Atlantis, saved the life of lighthouse keeper Tom Curry when Curry had left his post to save a sinking ship during a raging storm. The two fell in love and she soon became pregnant. She gave birth to her child, Arthur, and stayed on land to help raise him for a few years. However, Atlanna found it impossible to abdicate her throne, and she soon parted ways with Tom. She left her son with Tom on the surface and returned to Atlantis where she later had another son, Orm.

Through accidents and trial and error, Arthur soon learned of his ability to breathe underwater and communicate with sea life. When his father died, Arthur set out to find Atlantis, and met the Atlantean Vulko in his search. Vulko told Arthur of his heritage and brought him to Atlantis. Unprepared for the life of a ruler, Arthur left for a time, and met people more like him, named the Others. He soon became the hero Aquaman. A founding member of the Justice League, Arthur battled the likes of Ocean Master and Black Manta, and found love with Mera, a princess from the kingdom of Xebel, who was originally ordered by her people to assassinate him.

Aquaman and Mera settled down in Arthur's childhood home of Amnesty Bay for a time, but Aquaman was soon forced to fight his brother, Orm, when Ocean Master tried to start a

war with the surface world. Aquaman later fought the powerful Dead King, and eventually became King of Atlantis once more.

Through it all, the tangled mystery of Aquaman's heritage still loomed. Searching for his mother Atlanna through dimensional portals, Aquaman and Mera found her—only to have her deny he was her son. With the help of the Martian Manhunter and Gorilla Grodd, Aquaman and Mera convinced Atlanna of the truth—but not before she tried to sacrifice them to the volcano god Karaku.

When a secret society called N.E.M.O. framed an Atlantean group called the Deluge with an attack on a US ship, the already strained relationship between Atlantis and the United States became more so. Aquaman was arrested and later freed by Mera. It took the defeat of N.E.M.O.'s new leader, Black Manta, to fix international relations. However, in the process, Aquaman surrendered Atlantis to the United States.

While this action resulted in peace, his people were not happy. They staged a coup, one led by Deluge leader Corum Rath. Rath was handed the kingdom while Aquaman was stabbed and presumably killed by the leader of the Drift, Commander Murk. However, the injury was not a fatal one. After growing a beard and longer hair, Arthur reemerged as the protector of the underserved area of Atlantis known as the Ninth Tride alongside his new ally, Dolphin. Forming an alliance with the gangs of the

TRENCH WARFARE
Aquaman and Mera faced a horde of the ravenous Trench.

ATLANTIS RISEN

During a fight alongside the Justice League against the demon Barbatos, Aquaman made a wish while wearing magical 10th metal. His wish caused Atlantis to rise from the depths, forcing Queen Mera to rule over a new addition to the surface world.

SINK ATLANTIS!
With tensions boiling over between the US and Atlantis, the Suicide Squad was sent in to return the city to the seabed.

Ninth Tride led by the notorious King Shark, Aquaman and Mera fought and defeated Rath, who had been empowered by evil magic called the Abyssal Dark. However, Mera was chosen by Atlantis' wise Widowhood to rule, knowing that Arthur and Rath each polarized the nation.

Atlantis's problems were far from over, however. Atlantis came under attack by the Triumvirate of Sea Gods. These were three ancient water gods from distant worlds named Captain Gall, Commander Drogue, and Fleet Admiral Tyyde. They and their henchmen Black Manta flooded the planet with water that turned anyone it touched into ferocious sea creatures. While Aquaman began to talk sense into the invading gods, Black Manta turned on them, killing all but Tyyde. Aquaman stopped Manta, but was left for dead in the skirmish.

WITHOUT A KINGDOM
No longer shackled by kingly duties in Atlantis, Arthur Curry fights to defend both land and sea as Aquaman.

In reality, Aquaman had been saved by the unlikely hand of the Anti-Monitor. Aquaman continued to see Mera, until she discovered she was pregnant. They had an argument over Aquaman's fears,

and Mera lashed out at Arthur. Soon, an amnesic Aquaman washed up on the shore of the Village of Unspoken Water, and found himself battling a god named Namma. When he emerged victorious, he was marked with a strange tattoo on his chest.

With the help of other old gods, Arthur regained his memories and returned to Amnesty Bay, where he began to mentor Aqualad (Jackson Hyde). His daughter Andy was born, and Aquaman took her in, surprised at the joy he felt instead of the panic he had expected. Now a proper family man, Aquaman continues to fight a seemingly endless battle to protect both land and sea.

"I am Aquaman. King of the Seven Seas. This is my birthright. This is my responsibility. And I will embrace it!"

ARTHUR CURRY

REBIRTH

CORUM RATH

From terrorist to king: Rath's final evolution was to a grotesque sea creature, owing to his infection from the Abyssal Dark magic.

ON THE RECORD

Aquaman's origin has been told and retold over the years, like any good sea story. For years he was Arthur Curry, half-human son of Tom Curry and an Atlantean woman, Atlanna. His brother Orm, later the Ocean Master, was introduced, as young Arthur discovered Atlantis, his powers, and his destiny to become the Sea King.

Atlantean origins

This Silver Age story of Tom Curry succeeded a Golden Age tale of exploration and scientific experimentation, in which Aquaman's father made his human son fit for a life under the sea. Following *Crisis on Infinite Earths*, the hero was recast as Orin, son of Queen Atlanna and the wizard Atlan, abandoned due to the Atlantean belief that his blond hair was the mark of a curse. Atlantean scientist Vulko tried to save him, and later became Aquaman's guide to Atlantean ways after the nearly feral boy had grown up on the periphery of the surface world.

STEALTH SUIT
Aquaman once wore a blue suit, designed to hide him from pursuing enemies.

Post-Crisis

Following *Crisis on Infinite Earths*, Aquaman appeared in a 1986 miniseries wherein he briefly wore a different blue costume designed to camouflage him in the ocean depths. Ocean Master immersed himself in the lore of Atlantean magic as he fought his half-brother for the throne of Atlantis and later sold his soul to Neron for more sorcerous power. Orin's wife, Mera, has also transformed over time, becoming a powerful hero in her own right and acquiring a backstory that puts her on an equal footing with Aquaman.

Magic hand

The villain Charybdis cost Aquaman a hand in the 1990s, after which he had implanted a cybernetic harpoon designed by S.T.A.R. Labs. This was later replaced by a shape-changing golden hand, courtesy of Atlantean science. Later this too was destroyed, and the Arthurian Lady of the Lake gave Aquaman a hand composed of mystical living water. Aquaman later died and was resurrected—and his hand restored to its original state—at the conclusion of *Blackest Night*.

ENEMIES Batman

Zachary Gate is a direct descendant of Nicholas Anders, one of the brothers who crafted Gotham City's great bridges. When his stepbrother died in a bridge collapse,

Nicholas sought revenge on Gotham City's founding families—the Kanes, Waynes, and Cobblepots. He eventually killed Robert Kane and went to jail, swearing vengeance on all children of Gotham City's forefathers.

Decades later, Zachary found Nicholas' tell-all diary and decompression suit, and he began blowing up Gotham City's main bridges to avenge his ancestor. Zachary was caught by Batman (Dick Grayson) who had worked out that the suit had driven both men insane. Zachary was later freed from Arkham by Jason Bard as part of a plan to destroy Gotham City and Batman. As the Architect, Zachary tried to demolish the Beacon—a new building funded by Bruce Wayne—but was defeated by Batman.

ARAK

DEBUT *The Warlord* (Vol. 1) #48 (Aug. 1981) *Convergence* (Vol. 1) #0 (Jun. 2015) (as Telos)
REAL NAME Bright Sky After Storm **BASE** Eighth-century Europe
HEIGHT 6ft **WEIGHT** 190 lbs
EYES Brown; **Telos:** Purple **HAIR** Black; **Telos:** None
POWERS/ABILITIES Expert fighter with sword and otomahuk; shamanistic powers. **Telos:** Control of matter; metamorphosis; energy manipulation; super strength; invulnerability; flight; able to traverse alternate realities.
ALLIES Vikings **Telos:** Techne, K'rot, Stealth, Captain Comet
ENEMIES Angelica of Albracca **Telos:** Computo, Validus, Brainiac

Native American Arak was born in the eighth century. As a child he survived the massacre of his Quontauka nation, escaping by canoe into the Atlantic where he was found and adopted by Vikings. Always favoring his native otomahuk ax in battle, he grew into a fearsome warrior. When his Viking family were killed, "Arak Red-Hand" wandered western Europe before enlisting in the army of Emperor Charlemagne. After years of adventuring, he learned his father was He-No, the Quontauka god of thunder, and he became a shaman.

Arak traveled in time to fight alongside the All-Star Squadron, and at some point, was taken by Brainiac and transformed into the creature known as Telos. He watched over some of the cities taken from various realities by the Collector of Worlds before regaining his memories and turning against his master. With his vast powers, Telos collected cities from many dimensions and points of time. Brainiac intended to pit each city against each other and allow the victor to become the one, true reality in a great Convergence. But when the heroes of the worlds rebelled, Telos helped Brainiac to see the error of his ways and realign the infinite Earths. Brainiac then set Telos free to search for his long-lost family.

CLASSICAL HERO
The original Arak battled all manner of gods and demons before being abducted into the Multiverse by Brainiac.

ON THE RECORD

As a consequence of his transformation, Telos' origins changed. Now Arak remembered that his father was a shaman and king of his people, who had forbade his son from fighting, despite Arak's aptitude for battle. Forced to study the ways of the shaman, Arak gained his father's and fought Brainiac when the villain appeared in his realm. Arak offered his life to Brainiac in exchange for the safety of his people and became Brainiac's servant, Telos.

NEW WORLDS FOR OLD
After an eternity plundering cities and planets throughout the Multiverse, now all Telos seeks is his home and family.

ARES

DEBUT *Wonder Woman* (Vol. 1) #1 (Summer 1942) (as Mars); *Wonder Woman* (Vol. 1) #183 (Jul.-Aug. 1969) (as Ares)
BASE Mount Olympus **HEIGHT** 6ft 10in
WEIGHT 459 lbs
POWERS/ABILITIES Godlike strength; ability to summon and lead armies; superb martial skills.
ENEMIES First Born, Wonder Woman, the Amazons **AFFILIATIONS** Gods of Olympus

Ares is the Greek God of War, and could often be found near conflict. As Wonder Woman's older brother (and her uncle), he taught young Diana the art of battle, training her in secret on every full moon. He was protective of Wonder Woman and stood by her against the First Born—Zeus' first son who sought to kill all his kin. The First Born was defeated and Ares killed. Hades claimed him and Wonder Woman became the new God of War.

However, Ares is fueled by forces in combat and perhaps cannot truly die. He has continually fomented war simply to increase his own power and influence. However, after being imprisoned beneath Themyscira with Grail, daughter of Darkseid, Ares resolved to change, seeking and inciting strife solely in the name of Justice. This was a decision which once again brought him into conflict against Wonder Woman.

ARION

DEBUT *Warlord* #55 (Mar. 1982)
REAL NAME Ahri'ahn **BASE** Ancient Atlantis
HEIGHT 6ft 3in **WEIGHT** 190 lbs
EYES Green **HAIR** Brown, white
POWERS/ABILITIES Immortality; vast range of magical abilities.
ALLIES Wynde
ENEMIES Garn Daanuth, Doctor Fate
AFFILIATIONS Lords of Order, Poseidon, Secret Six

More than 45,000 years ago, Arion was the greatest mage of ancient Atlantis. His father was Calculhah, a force for good, while his mother was Dark Majistra, a force for strife, who raised Arion's twin brother, Garn Daanuth, to be his nemesis. When Dark Giants preyed upon humanity, Arion used Nth Metal to banish them from Earth, and he became a protégé of Sea God Poseidon. When the god grew jealous and betrayed him, Arion succumbed to the negative influence of the Death Force and created the divinity slaying Tear of Extinction.

His fall was covered up by Atlantean authorities—who claimed he had perished—and Arion vanished for millennia. In modern times Arion battled Superman, Blue Beetle, and Doctor Fate, who sealed the mage in a crystal of absolution for 10,000 years to either transcend his sins or be consumed by them.

ARISIA

DEBUT *Tales of Green Lantern Corps* (Vol. 1) #1 (May 1981)
REAL NAME Arisia Rrab
BASE Space Sector 2815
HEIGHT 5ft 9in **WEIGHT** 136 lbs
EYES Gold **HAIR** Blonde
POWERS/ABILITIES Ring creates energy constructs; flight; physiology enhances extreme healing.
ALLIES Hal Jordan, Guy Gardner, Sodam Yat

Born on Graxos IV, Arisia Rrab is a hereditary Green Lantern, following her father Fentara and many others. When her uncle Blish died in action, his ring sought out the then-teenage Arisia, making her the ring-bearer of Sector 2815. She was rapidly aged while serving, and became close to Hal Jordan after spending time on Earth.

Apparently killed by Major Force, Arisia was later found in suspended animation. She rejoined the Green Lantern Corps, tasked with watching over Green Lantern Sodam Yat. She fought in the Sinestro Corps Wars and, during Nekron's attack on Earth and Oa, faced Black Lantern versions of her family. Later she died trying to save the doomed planet Perduron. She revived following the reality realignments of *Flashpoint* and *Rebirth* and now serves with the new Green Lantern Corps led by Jordan.

ARKHAM, AMADEUS

DEBUT *Arkham Asylum* (1989)
BASE Gotham City
HEIGHT 6ft 3in **WEIGHT** 175 lbs
EYES Brown **HAIR** Black
POWERS/ABILITIES Expert in psychiatry.
ALLIES Jonah Hex
ENEMIES John Cromwell

In the 1880s, physician Amadeus Arkham specialized in the emerging sciences of psychology and psychiatry. Working with the Gotham City Police Department, he founded the asylum

that bears his name—the notorious home of Gotham City's most depraved criminals.

Police detective Lofton consulted Arkham in his search for brutal serial killer, the Gotham Butcher. After encountering some resistance, Arkham deputized bounty hunter Jonah Hex to help, and they discovered that Gotham City was home to the Religion of Crime sect. Their endeavors trapped the Butcher and exposed the existence of villainous cabal the Court of Owls, a triumph Amadeus omitted from the book he wrote of their adventures together.

A child of abuse and subjected to acts of criminal insanity all his adult life, Amadeus eventually went mad. After killing his mother, he was committed to his own asylum where he died after years of confinement.

ARSENAL

DATA

DEBUT *More Fun Comics* #73 (Nov. 1941) (as Speedy)
REAL NAME Roy Harper
BASE New York City
HEIGHT 5ft 11in
WEIGHT 180 lbs
EYES Green **HAIR** Red
POWERS/ABILITIES Expert archer and fighter; gifted mechanic; computer hacker and engineer; incredibly accurate aim.
ALLIES Green Arrow, Red Hood, Starfire, Nightwing, Donna Troy, Killer Croc
ENEMIES H.I.V.E., Cheshire
AFFILIATIONS Teen Titans, Titans, The Outlaws

MAN OF ALL WEAPONS
 Roy was an expert archer, but his perfect aim could be applied to a variety of weapons. He was rarely without one of his signature baseball caps.

ON THE RECORD

Before *Flashpoint*, Roy Harper's time as Green Arrow's sidekick Speedy was equally marred by an addiction to drugs. Always the fighter, Roy overcame his addiction, yet was continually drawn to the edge. His most serious romantic relationship was with international terrorist Cheshire, and their fling resulted in the birth of his daughter, Lian.

Roy's evolution into Arsenal saw him move away from his role as Green Arrow's sidekick and start to favor more hi-tech weaponry. When he later joined the Justice League as Red Arrow, he returned to his roots. But he became more brutal following the murder of his daughter and the loss of his arm. Roy was a man in constant recovery, both from substance abuse and from his life with Cheshire.

CYBERNETIC ARM
 Roy's arm was cut off by villain Prometheus. It was replaced by an advanced, cybernetic limb, but he experienced phantom pain.

WILD CHILD
 Computer genius Roy was taken in by Oliver Queen and he helped Oliver's alter ego, the Green Arrow, fight crime.

Arsenal was once the teen sidekick of the Green Arrow, helping the hero fight crime one arrow at a time, with Roy creating trick arrows for his mentor. Due to drugs and alcohol abuse, Roy fell out with Oliver Queen. He eventually managed to deal with his personal demons and become a hero again. Calling himself Arsenal, he fought as a member of both the Titans and The Outlaws.

When Roy Harper was a boy, his parents died in a forest fire. A Native American chief named Big Bow rescued Roy and took him in as his own and taught him archery. Roy was haunted by his childhood loss. At age ten, he tried his first sip of alcohol and quickly spiraled out of control. He was caught robbing a liquor store and when the local sheriff intervened, Big Bow was killed in the skirmish. Too inebriated to understand what happened, Roy fled the reservation to live on the streets of Seattle.

Roy first encountered Oliver Queen after picking his pocket at a local mall. Ollie discovered that the boy was a natural expert with electronics, and eventually allowed Roy to partner with him in his alter ego of Green Arrow. Dubbed Speedy,

Roy developed trick arrows for his mentor, and even joined the youthful heroes called the Teen Titans. However, when Ollie began to focus his attentions elsewhere, Speedy turned again to alcohol and then moved on to harder drugs. Instead of helping his young partner deal with his demons, Green Arrow fired Speedy. The young hero was then manipulated by Count Vertigo, before overcoming the villain's influence and setting out on his own.

Changing his Super Hero name to Arsenal, Roy recovered, in part thanks to the unlikely help from his Alcoholics Anonymous sponsor Killer Croc.

Now an adult, Roy's thirst for adventure saw him join forces with Red Hood (Jason Todd) and Starfire, after the young vigilantes sprung him from a Middle Eastern prison. They became close friends and worked together as The

Outlaws. When Starfire later left the team, Roy and Jason partnered as heroes for hire for a time. When that misguided business endeavor ended, Roy reunited with the original Teen Titans, now calling themselves the Titans. Roy was always happiest when with his oldest friends. However, one of those friends would be the literal death of him, when The Flash (Wally West) unwittingly lost control of his powers at a secret recovery center called the Sanctuary. Roy was killed in the tragedy, sending shockwaves through the Super Hero community.

CLASSIC STORIES

Green Lantern (Vol. 2) #85 (Aug.-Sep. 1971) Roy Harper is revealed to be a drug addict in one of the most controversial stories of the era.

The New Titans #99 (Jul. 1993) Roy assumes the name and identity of Arsenal for the first time.

Justice League of America (Vol. 2) #7 (May 2007) Roy is the Red Arrow and becomes a member of the Justice League of America.

THE OUTLAWS

Roy joined forces with the Red Hood and Starfire to form The Outlaws. He also began a relationship with teammate Starfire.

ARKHAM, JEREMIAH

DEBUT *Batman: Shadow of the Bat* #1 (Jun. 1992)
BASE Arkham Asylum
HEIGHT 5ft 9in
WEIGHT 170 lbs
EYES Brown
HAIR Brown
POWERS/ABILITIES Advanced medical and physiological knowledge.
AFFILIATIONS Arkham Asylum

Head doctor at Arkham Asylum, Jeremiah Arkham was known for an unorthodox approach to psychiatric care. However—just like his great-uncle Amadeus,

who founded the institution before going mad—Jeremiah, too was eventually driven insane. Dangerously paranoid and narcissistic, he briefly masqueraded as The Joker. While deranged, he freed and mind-controlled his charges, unleashing chaos before being shocked back to normalcy. In a later crisis, he assumed the persona of Black Mask, seeking to create his own criminal empire.

After being successfully treated in his own asylum, Jeremiah is now regarded as cured of his demons. He administers Arkham again, employing his radical healing techniques on the troubled and the lethally dangerous souls caged there.

ALLIES Sinestro
ENEMIES Guardians, Guy Gardner
AFFILIATIONS New Guardians, Sinestro Corps/Yellow Lantern Corps

Recruited by Sinestro to join his Corps in the antimatter universe of Qward, Arkillo traveled to Earth when he learned that one of the Corps had died there. While on Earth,

he was recruited to the New Guardians team led by Green Lantern Kyle Rayner and staffed by ring bearers from across the Emotional Spectrum.

Arkillo journeyed with them to Oa, where they survived an assault by the Guardians of the Universe. They battled the Archangel Invictus before Arkillo learned Sinestro and Hal Jordan had cooperated to destroy the Sinestro Corps' Power Battery. With a new battery powered by fear, Arkillo rejoined the fight against Invictus before leaving the New Guardians. Resolved to do good his way, Arkillo now maintains order through fear as chief enforcer for the Sinestro Corps.

ARROWETTE

DEBUT *Impulse* #28 (Aug. 1997)

POWERS/ABILITIES Archery, acrobatics.
ALLIES Conner Kent, Cassie Sandsmark, Bart Allen, Tim Drake
ENEMIES Harm, Spazz
AFFILIATIONS Young Justice

When Olympic archer Bonnie King saw Green Arrow and Speedy in action, she briefly became a heroic copycat named Miss Arrowette—until they convinced her to retire.

Frustrated but still inspired, Bonnie obsessively trained her daughter, Cissie, in all forms of combat. She resolved that her child would not be denied her own shot at fame and fortune. Although Cissie reluctantly became Arrowette, she was gifted and capable, employing trick arrows, martial skills, and tactical aptitude against superpowered foes, singly and with Young Justice.

Eventually Child Protective Services removed Cissie from Bonnie's custody. After Arrowette almost crossed the line and executed the murderers of her favorite teacher, Cissie renounced her costumed identity. She was recently convinced to return after her old Young Justice friends needed help taking down a rogue scientist from S.T.A.R. Labs.

ALLIES Akila, Wonder Woman, Red Hood, Bizarro II, Aztek
ENEMIES First Born, Nephthys, General Ahmed Heinle of Qurac, Tezcatlipoca
AFFILIATIONS Egyptian Gods, Outlaws

Prophesied to become Queen of the Amazons, Artemis is a daughter of the Bana-Mighdall, a breakaway faction of warrior women who switched allegiance to Egyptian gods

thousands of years ago. Artemis met and mistakenly battled Wonder Woman. Working with Red Hood and a new clone of Bizarro to defeat Black Mask, she saved her city from the Quraci army, finally proving herself worthy of the Weapon of Magical Destruction.

After years of adventuring, she united with Wonder Woman and Aztek to repulse the dark god Tezcatlipoca. Together they restored Atalanta—lost founder of the Bana-Mighdall colony—to her city. Artemis is now a hero, using the mystic Lasso of Submission awarded to her by Wonder Woman.

ATLAN

DEBUT *Atlantis Chronicles* #5 (Jul. 1990)
BASE Atlantis
HEIGHT 6ft 3in
WEIGHT 220 lbs
EYES Blue
HAIR Blond
POWERS/ABILITIES Vast magical abilities like cryokinesis; arsenal of magical weaponry.
ALLIES Vulko
ENEMIES Orin, Aquaman

Centuries ago, Atlan ruled Atlantis, which grew to include seven lands under his reign. His brother Orin (Aquaman's ancestor) quarreled with Atlan over his inclusive

policies and plotted against his brother to protect the purity of the Atlantean bloodline.

War followed, during which Atlan went into hiding and Orin murdered his family. Stricken with grief, Atlan forged six magical weapons to retake Atlantis. He used one of them to sink the kingdom, destroying four of its lands and transforming the other three—Atlantis, Xebel, and the Trench. He then fell into a long magical sleep deep under the ocean.

Atlan was revived in the present day by Atlantean advisor Vulko, who wanted to restore Atlantis' true king. Still angry, Atlan tried to permanently destroy Atlantis, but was stopped by Aquaman. The old king melted away, presumably for good.

ATLAS

DEBUT *1st Issue Special* #1 (Apr. 1975)
BASE Metropolis
HEIGHT 6ft 5in **WEIGHT** 250 lbs
EYES Blue **HAIR** Brown
POWERS/ABILITIES Superhuman strength and stamina.
ALLIES Chagra, Forager
ENEMIES King Hyssa, Superman
AFFILIATIONS Project 7734, New Gods

In pre-historic antiquity, despotic King Hyssa's raiders ransacked Atlas' village on the Crystal Mountain, killing the boy's family before enslaving him and the village's survivors. Wearing a mystical talisman struck from the Crystal Mountain, Atlas escaped and was raised by a good-hearted man named Chagra. It was not long before Chagra realized the boy had jaw-dropping strength and stamina. He became Atlas' manager, joining him on his journeys, watching the hero rescue citizens and defeat evil princes. Eventually they toppled King Hyssa himself, with the unlikely aid of time-traveling New God Forager.

Eventually, Atlas came to modern Earth-0 and worked for the mysterious Project 7734—a government investigation into the possibility of using magic to fight Kryptonians. Atlas often battled Superman, stating that his goal was to replace him as the champion of Metropolis.

ATOMIC KNIGHT

DEBUT *Strange Adventures* (Vol.1) #117 (Jun. 1960)
REAL NAME Gardner Grayle
BASE Mobile
HEIGHT 6ft 1in **WEIGHT** 189 lbs
EYES Blue **HAIR** Blond
POWERS/ABILITIES Precognition; series of weaponized hi-tech armor suits providing a suite of powers including enhanced strength, durability, powered flight, energy projection, and absorption.

When nuclear war in 1986 left Earth devastated, Gardner Grayle led a team of Atomic Knights in fighting injustice in the post-apocalyptic landscape. Then he

awoke to realize it was just a VR simulation by S.T.A.R. Labs to test humanity's survival potential. Afflicted with pre-cognition, Grayle stole a battle suit from the lab to save the true world from the nuclear threats he foresaw. He came into conflict with Superman, Wonder Woman, and others, but later joined teams like The Outsiders.

Following *Infinite Crisis*, Grayle's history was altered. He woke up in Blüdhaven with other Atomic Knights and visions of a horrible future. To defend the city, he worked with the Roundtable organization. After *Flashpoint*, the Atomic Knights were relocated to the post-apocalyptic future of Batman Beyond. Grayle was restored to Earth-0 after the events of *Rebirth*.

ATOMIC SKULL

DEBUT *Superman* (Vol. 1) #323 (May 1978)
REAL NAME Joseph Martin **BASE** Metropolis
HEIGHT 6ft **WEIGHT** 185 lbs
EYES Purple **HAIR** None
POWERS/ABILITIES Absorbs and projects nuclear energy; superhuman strength; flight.
ENEMIES Superman, Wonder Woman, Steel, Hector Hammond
AFFILIATIONS S.T.A.R. Labs, M.S.C.U. (Metropolis Special Crimes Unit)

Scientist Joseph Martin deeply loved a co-worker, but was obsessively jealous. When their relationship ended, he saw her dancing with another man, and

he killed her. Later, while on an experimental S.T.A.R. Labs submarine, he was exposed to nuclear energy. Shipwrecked on a desert island, he survived by releasing deadly nuclear blasts from his mouth.

His skin and muscles literally peeled off his face, inspiring him to create Super-Villain-for-hire persona Atomic Skull. He regularly clashed with Superman, both alone and with criminals such as Major Disaster and the Royal Flush Gang.

In recent times Martin reformed, fighting criminals with the Metropolis Special Crimes Unit, Superwoman, and the Teen Titans. As warden of Stryker's Island Penitentiary, he aided Green Lantern Hal Jordan against super-telepath Hector Hammond.

AFFILIATIONS Justice League, S.H.A.D.E.

SUITED UP
The Atom's suit features life-support systems for Ray Palmer when he is riding through someone's bloodstream—or for whenever regular air molecules are too big for him to breathe.

Ray Palmer is science liaison to S.H.A.D.E. and a hero in his own right as the Atom. He is also the creator of the Ant Farm, a pioneer in miniaturization technology, and a recent welcome addition to the Justice League of America.

Ray Palmer became science advisor to S.H.A.D.E., the Super-Human Advanced Defense Executive. He built the Ant Farm, a self-contained miniaturized base for S.H.A.D.E. Agents that included S.H.A.D.E. City. The Ant Farm was a technological marvel, with an independent power source, atmosphere, and artificial gravity. It was accessible only via simultaneous teleportation and shrinking using a process Palmer created.

BLOOD TEST
Called in by the Justice League for his expertise, Ray found a microscopic metropolis built inside Batman's brain.

Aware of Palmer's work, Superman sought his help after Batman contracted a mysterious illness. Diving into a sample of Batman's blood, Palmer discovered that the Dark Knight was suffering from the effects of a microscopic city constructed in a blood vessel in his brain. Miniaturizing Superman, he took the Man of Steel inside Batman's brain, showed him the tiny city and trapped it inside a globe similar to the Ant Farm.

Palmer came to the heroes' aid again, helping Superman locate the Bottle City of Kandor and devising an armored suit of Kryptonite that the Man of Steel could use against Vandal Savage after the immortal villain had stolen his powers. Encouraged by these successes, Palmer followed through on his plan to embrace the Super Hero life and called himself the Atom.

REBIRTH

LITTLE VICTORIES, BIG DREAMS

In *DC Universe Rebirth* #1, Ryan Choi returns as Ray Palmer's teaching assistant at Ivy University. With Palmer lost in the microverse, Choi inherits his size-altering belt after receiving a desperate, if garbled, warning from his mentor. The part-time Super Hero is confident his protégé will rise to every challenge to save him as a new Atom.

Though Palmer's message is abruptly cut off, one thing is certain: to find him, Choi must finally live up to the huge potential everyone else feels he possesses. Now all he has to do is believe it himself.

ON THE RECORD

UP AND ATOM
Ray Palmer was the best-known Atom, remaining in the role for five decades, and counting.

Since his creation in 1940, many heroes have been the Atom. The original was super-strong student Al Pratt, who lived a long heroic life and perished during the *Zero Hour* event. College Professor Ray Palmer then became the Atom in 1961 after inventing miniaturization technology that allowed him, and later Atoms, to alter their size, weight, and mass. Using an Atom belt confiscated from Palmer, covert operative Adam Cray succeeded him and died while working with the Suicide Squad.

In 2006, Palmer's friend and former student Ryan Choi inherited his technology and his position as Physics Professor at Ivy University. A reluctant hero at first, Choi soon carved his own legend as the All-New Atom, saving Earth from invasion by microscopic aliens, the Waiting, and thwarting a time-bending conspiracy involving his employer Dean Macy and Chronos. Choi next freed the eccentric size-shifting Super-Villain Giganta from cancer-god M'nagalah's control, and then dated her. However, he faced his greatest trial after accidentally bringing back a microbial carnivore from the microverse. This predator shrunk its prey, storing them in a sub-atomic realm, and it took all Choi's bravery and brilliance to rescue the surviving victims. Ryan was murdered by Deathstroke, but returned during the *Convergence* event to help Ray Palmer bring the assassin to justice.

BITE-SIZED HERO
Under the malign influence of cancer-god M'nagalah, Giganta bit off more than she could chew when she swallowed Ryan whole.

BIG BOOTS TO FILL
Initially plagued with self-doubt, Ryan Choi became a true hero using the Atom suit to save lives, defeat villains, and explore the furthest and strangest corners of the microverse.

CLASSIC STORIES

Showcase (Vol. 1) #34 (Sep.-Oct. 1961) Scientist Ray Palmer devises a way to shrink himself using matter from a white dwarf star. He dubs himself the Atom and frees an alien named Kulan Dar, who has had to commit crimes for a local thief.

Sword of the Atom #1-4 (Sep. 1983) With his marriage to Jean Loring on the rocks, Ray Palmer finds himself frozen at a six-inch stature. He discovers a society of miniature people in the Amazon, and becomes the leader of a rebel faction.

All-New Atom (Vol. 1.) #5 (Jan. 2007) Rookie Atom Ryan Choi faces demonic corrupter M'nagalah, and is briefly swallowed by his possessed new colleague Professor Doris Zuel (Giganta).

Titans (Vol. 2) #38 (Oct. 2011) Ray Palmer investigates the disappearance of his successor, Ryan Choi. He hunts down Deathstroke, sparking a battle between the Justice League and the Titans.

AFFILIATIONS Infinity, Inc., Conglomerate, Justice Society of America, Justice League America, Suicide Squad

NEW WAVE NUKLON
Atom Smasher struggled to live down his old look as Nuklon. He used to sport a then-trendy Mohican haircut.

A true example of a legacy hero, Albert Rothstein is the godson to the original Golden Age hero Atom, as well as the grandson of the Super-Villain Cyclotron. Albert decided to use his inherited powers for good, calling himself Nuklon and becoming a founding member of the young Super Hero team Infinity, Inc. After the team disbanded, Albert continued to move up in Super Hero circles, joining the Conglomerate and then Justice League America, the latter alongside another former Infinity, Inc. member, Obsidian. Following an attack on the JLA's satellite headquarters, Nuklon left the team, while many of its members decided to form a new Justice League America incarnation.

It didn't take long for Nuklon to find a new team of Super Heroes to fight alongside. He joined the reformed Justice Society of America. This JSA was made up of many legacy heroes, including Black Canary (Dinah Laurel Lance), Starman (Jack Knight), Stargirl (Courtney Whitmore), and even his godfather's son, Damage (Grant Emerson). Prolonged exposure to thorium radiation had given Albert the ability to change his size and density. This inspired him to adopt the name Atom Smasher, to better honor both his godfather and grandfather.

FISTS OF FURY

After his mother died at the hands of the villain Kobra, Albert was consumed with vengeance. Growing to a dangerously unstable size, he flew into a murderous rage against his Kobra's forces.

POWERS/ABILITIES Superhuman strength, endurance, and durability; Red Lantern ring enables flight, formation of rage-fueled energy constructs, projection of force-fields, and production of an acid-like plasma.

ALLIES Dex-Starr

ENEMIES Guardians of the Universe, Guy Gardner

AFFILIATIONS Red Lanterns, Five Inversions

Long ago, on the planet

Ryut, an alien named Atros lived with his wife and children. Policed by the Guardians of the Universe's Manhunter androids, the people lived in peace, until the Manhunters malfunctioned and razed the planet. Atros' family was killed, leaving him alone in his rage. After destroying many Manhunters with his bare hands, Atros was found by Qull, Roixaeume, Orphram, and Dal-Xauix—beings banished from their home world and considered demons. Atros fell in with them, and the group became known as the Five Inversions, using blood magic to battle the Guardians of the Universe for centuries.

Eventually, the Guardians' new servants, the Green Lanterns, bested the Five Inversions. Atros killed his teammates and used their blood to build a Red Lantern power battery, empowered by his own rage. He took the name Atrocitus and created his own Red Lantern Corps.

ON THE RECORD

A pivotal flashback in *Green Lantern* (Vol. 4) #30 (Jun. 2008) revealed that Atrocitus had murdered Hal Jordan's predecessor, Abin Sur, which makes Atrocitus responsible for Hal acquiring a power ring and becoming a Green Lantern.

Atrocitus fought against Nekron in the *Blackest Night* event and briefly gave a Red Lantern ring to Aquaman's longtime love interest, Mera, during that conflict.

BLOOD OATH

Like the Green Lantern Corps, the Red Lanterns have their own oath:

"With blood and rage of crimson red,
Ripped from a corpse so freshly dead,
Together with our hellish hate,

AXIS AMERIKA

DEBUT *Young All-Stars* #1 (Jun. 1987)

NOTABLE MEMBERS Übermensch, Horned Owl, Fledermaus, Hel, Gudra, Sea Wolf, Usil, Kamikaze, Fleshburn, Baron Blitzkrieg, Zaladin, Übermensch II, Great White

During World War II, the Super-Villain squad Axis Amerika served the Axis Powers against US Super Hero teams like the All-Star Squadron. Axis

Amerika's leader was usually Übermensch, who possessed superhuman strength, durability, and speed, but the infamous Baron Blitzkrieg also led the team.

Other members included the Horned Owl, the German equivalent of Batman and his son, Fledermaus; Gudra, a Valkyrie brought from another dimension thanks to Hitler's Spear of Destiny; Sea Wolf, an aquatic werewolf; Usil, an expert archer; and Kamikaze, known as the "living missile" and equipped with rocket-powered armor. Together, the group battled the offshoot of the All-Star Squadron, the Young All-Stars.

Decades later, a new Axis America team of American supremacists, fought the JLA. Led by an American called Übermensch II, they included his wife Hel, a flying swordswoman; Fleshburn, a fire-wielder; Great White, who wielded an energized bullwhip; and Zaladin, a mystic swordsman.

AZRAEL

DEBUT *Batman: Sword of Azrael* #1 (Oct. 1992)

REAL NAME Jean-Paul Valley **BASE** Mobile

HEIGHT 6ft 2in **WEIGHT** 210 lbs **EYES** Blue **HAIR** Blond

POWERS/ABILITIES Expert hand-to-hand combatant and swordsman; underwent Mother's traumatic conditioning, making him a near-perfect warrior; possesses a so-called "Wrath of God" ability that produces awe and visions in the minds of his victims.

ALLIES Batman, Batwoman, Batwing, Starfire, Cyborg, GL Jessica Cruz

ENEMIES Bane, Darkseid, St. Dumas, Mother

AFFILIATIONS Church of St. Dumas, the Colony, Justice League Odyssey

Early in Batman's career, when Dick Grayson became Robin, the Dark Knight encountered a criminal calling herself Mother. She offered a bizarre specialty service that would deliver a perfect partner or soldier—for the right price. To create that ideal companion, Mother traumatized her innocent victims at an early age, enabling her to imprint any desired qualities onto them.

Jean-Paul Valley was one of these innocents. Mother used a novel technique on him while working with the Church of St. Dumas. Utilizing a combination of awe and pain, Jean-Paul was forged into an unstoppable warrior—Azrael.

Tracking the villain Orphan, Red Robin and Red Hood infiltrated the infamous prison, Peña Duro, on the corrupt island of Santa Prisca. They teamed with monstrous Bane, storming the penitentiary, which had been converted into a church called the Crusade of St. Dumas. There they encountered Azrael, who defeated Bane by showing him a religious vision that apparently confirmed the Church of St. Dumas' philosophy.

Later, Azrael worked under Batman and Batwoman, before being drawn into space as part of Justice League Odyssey. Mysteriously compelled to defend the chaotic ghost sector with Starfire and Cyborg, Azrael was slowly corrupted by Darkseid and transformed into his New God of Belief.

ON THE RECORD

Pre-Flashpoint, Jean-Paul Valley's discovery of his dying father dressed as Azrael changed his life forever. Brainwashed by the System to become the Church of St. Dumas' assassin, Jean-Paul worked with Batman instead, standing in for the Dark Knight when Bane broke the hero's back.

Unbalanced by his upbringing, Valley became a more violent Batman and wore heavier armor. He later surrendered the mantle to a newly healed Bruce Wayne and set out on his own adventures as Azrael.

THE RETURN OF AZRAEL

After Jean-Paul Valley's death at the hands of his greatest enemies, Bliis and Scratch, a new Azrael emerged. Michael Lane, a former cop, had been trained to become the G.C.P.D.'s equivalent of Batman.

AZTEK

DEBUT *Aztek* #1 (Aug. 1996)

REAL NAME Nayeli Constant

BASE Vanity, Oregon

EYES Black

HAIR Black

POWERS/ABILITIES Computer expert; trained in combat techniques; battlesuit provides enhanced strength, durability, and flight; helmet holds entire history of Brotherhood of the Q

ALLIES The Ray

ENEMIES Tezcatlipoca, Sons of the Earth, the Luminary

AFFILIATIONS Justice League, Justice Foundation, Q Society

Software engineer Nayeli Constant was working in Austin, Texas, when the Aztek helmet originally used by Uno sought her out and recruited her to the Q Society's eternal war against Tezcatlipoca.

Rebuilding and modifying the battlesuit, Constant assumed the role of Aztek, determined to save mankind from the ancient threat of the Dark God and his earthly acolytes. Moving to Vanity, Oregon, Aztek started her holy war by hunting local cult the Sons of the Earth and their leader, the Luminary. This mission initially brought her into brutal conflict with the Ray before they ultimately teamed up to end the cult's threat.

ON THE RECORD

The Brotherhood of the Q raised Uno to wear the helmet of Quetzalcoatl and defend the city of Vanity and the world against the shadow god Tezcatlipoca. When Uno arrived in Vanity, however, he encountered a vigilante named Bloodtype, in reality Dr. Curtis Falconer. Bloodtype died after their battle, but not before he told Uno that he was about to start work at St. Bartholomew's Hospital that very day. Deciding he needed a civilian identity, Uno impersonated Falconer, protecting Vanity as a Super Hero later dubbed Aztek by the press. After team-ups with Green Lantern and Batman, Aztek briefly joined the JLA but died attacking the living planet Mageddon, the supposed second coming of Tezcatlipoca.

DEBUT *Batman: Vengeance of Bane* #1 (Jan. 1993)

BASE Gotham City

HEIGHT 6ft 8in **WEIGHT** 350 lbs (425 lbs with Venom)

EYES Brown **HAIR** Brown

POWERS/ABILITIES Enhanced strength, weight, durability, and endurance due to use of a super-steroid called Venom; extremely intelligent; master strategist; possesses indomitable will; expert fighter and natural leader.

ALLIES Santa Prisca mercenaries; prison inmates Bird, Trogg, and Zombie

ENEMIES Batman, the Batman Family, Batwoman, Killer Croc

AFFILIATIONS Santa Prisca inmates

Despite his impressive physique and prodigious strength, Bane is far from a simple physical threat for Batman. An unjustly imprisoned inmate, Bane trained his mind and body to near perfection. With the help of the super-steroid known as Venom, Bane has become one of the most dangerous men the Dark Knight has ever faced—a perfect combination of brain and brawn.

Little is known about the past of the man who is simply known as Bane. With his true name lost somewhere to legend—if he ever had one at all—the story of Bane begins in a prison complex called Peña Dura in the corrupt Caribbean island nation of Santa Prisca. While it has never been proven, many legends state that Bane was born inside the prison's walls, and was forced to live his life there, serving the sentence his mysterious father avoided by escaping "justice."

When he was just a boy, Bane was forced into solitary confinement, nearly drowning each night when water would

flood his cell. Surviving off the sea creatures that came in with the tide, Bane began to focus his mind and body, training himself for a war to come. That war would loom ever closer when, as an adult, Bane was chosen for an experimental program that saw his body injected with the super-steroid Venom. Now even more of a powerhouse, he escaped and headed to Gotham City to claim it as his own. A genius strategist, Bane challenged and triumphed over Batman, and broke the hero's back, only to have Gotham City subsequently ripped from his grasp by its protector.

Bane has attempted several more takeovers of Gotham City over the years, including besting Killer Croc for rule of the city when the Crime Syndicate had briefly taken the Justice League off the map. However, his most recent efforts may be his cruelest. Not only did Bane manipulate Catwoman to leave Batman at the altar on what would have been their wedding night, he also teamed with a Batman (Thomas Wayne) from an alternate universe and killed Alfred Pennyworth during a successful Gotham City takeover. At this point, Bane controlled every aspect of the city, allowing other Super-Villains to operate as its police force. However, Batman and Catwoman fought their way through this "City of Bane" and defeated the hulking villain. Thomas Wayne then double-crossed his supposed ally and shot Bane—an injury that Bane once again survived.

ON THE RECORD

Bane originally escaped Peña Dura with the help of three fellow inmates, Bird, Trogg, and Zombie. The villains then freed many of the Dark Knight's worst enemies from Arkham Asylum. Exhausted, Batman refused to rest until they were once again caged. Meanwhile, Bane broke into Wayne Manor to confront the hero in a brutal fight that saw the villain snap Batman's back.

A NEW KNIGHT

In the pre-*Flashpoint* DC universe, Bruce Wayne and his allies worked toward a permanent cure for his broken back. Batman's successor, Azrael, took up his mantle and finally managed to beat Bane.

Basilisk is a powerful terrorist organization with several metahuman men and women at its disposal. It is led by Regulus, a Super-Villain formed from a psychic and

physical merger of Dean Higgins—a former member of the special ops group Team 7—and Kaizen, the insane ruler of the outlaw nation of Gamorra.

Part cult drawing power from a mythic snake and part conspiracy collective preparing for a war against super-powered threats, Basilisk has had numerous clashes with the Suicide Squad. At one point the terror cell planted one of its members, Black Spider, in the Squad's ranks in an attempt to destroy the Squad from within. Basilisk also tangled with the Birds of Prey when Black Canary discovered Basilisk was holding her husband, Kurt Lance, hostage.

BASE Gotham City

HEIGHT 2ft 11in **WEIGHT** 47 lbs

EYES Black **HAIR** Unknown

POWERS/ABILITIES Flight; teleportation; can alter reality including changing the clothing of others; weapons include Utility Belt filled with gadgets together with a bat-shaped cellphone, Bat-shield, and Bat-laser.

ALLIES Batman, the Batman Family, Booster Gold

ENEMIES Gridlock, Dr. Trauma

AFFILIATIONS Justice Mites of America

An imp hailing from an unnamed dimension, the pint-sized provocateur known as Bat-Mite is a perpetual thorn in Batman's side. Declaring himself Batman's biggest fan and clad in a Batsuit that resembles his hero's current look, the troublesome Bat-Mite has the unerring knack of popping up at the most inopportune times to assist Batman with his own brand of mischievous heroics. The result is invariably mayhem, making the Dark Knight work twice as hard to resolve the situation.

Bat-Mite's otherworldly antics led him to be banned from his own dimension. Stranded in Batman's reality, but still possessing his magical abilities, Bat-Mite stole the Batmobile to engage in a spot of crime fighting, but promptly crashed it off a cliff. Not content with "helping" the Dark Knight, Bat-Mite has also managed to make life difficult for other Super Heroes, including Hawkman, Robin, and Booster Gold.

ON THE RECORD

Bat-Mite has remained much the same bothersome imp since his debut in 1959. After aiding and/or annoying the Silver Age Batman, Bat-Mite faded into obscurity after *Crisis on Infinite Earths*.

A modern incarnation of the "Dark Mite" reemerged in *Batman: Legends of the Dark Knight* #38 in 1992, when the mighty Mite appeared as the probable hallucination of a drug addict named Overdog. The imp returned in the 2000s as a delusion of Batman himself.

MITE OR FLIGHT? During a mental meltdown caused by the villain Dr. Hurt, Batman became the only person who could see Bat-Mite.

DEBUT *Detective Comics* (Vol. 1) #359 (Jan. 1967)

REAL NAME Barbara Joan Gordon

BASE Gotham City

HEIGHT 5ft 9in **WEIGHT** 135lbs **EYES** Blue **HAIR** Red
POWERS/ABILITIES Expert martial artist and gymnast trained in part by Batman; extremely athletic and agile; eidetic memory; very intelligent with advanced knowledge of computers; natural leader; weapons include fully stocked Utility Belt, protective suit, and Batcycle.

ALLIES Batman, Batman Family, Black Canary, Frankie Charles, James Gordon, Jason Bard

ENEMIES The Joker, James Gordon Jr., Knightfall, Velvet Tiger

AFFILIATIONS Birds of Prey, Batman family

A presence in Batman's world ever since she forcibly inserted herself into it, the tenacious Barbara Gordon has spent her life following in the footsteps of her hero father, Commissioner James "Jim" Gordon. While James Gordon has done much to help Gotham City as one of the few honorable cops on the Gotham City Police force, Barbara has done even more as Batgirl. Originally starting her career by imitating Gotham City's legendary Dark Knight, Batgirl has since become her own woman, fighting crime in an original style, and putting her years of training and brilliant mind to work protecting Gotham City's under-served neighborhoods.

AT A GLANCE...

Commissioner's daughter

Barbara Gordon grew up a police "brat," idolizing her father James Gordon and wanting to follow in his footsteps. Her father introduced her to judo and gymnastics, and imbued her with a strong moral character. These skills all came into play when Barbara first donned a Batsuit and became the Super Hero known as Batgirl.

Expanded wardrobe

Batgirl has worn several costumes over the course of her relatively short career. First donning a police Batsuit, Barbara soon adopted an official Batgirl costume, complete with domino-style mask. After an injury at the hands of The Joker, she wore a more armored Batgirl suit.

Team player

Batgirl met and teamed with vigilantes Black Canary and Starling to form the Birds of Prey—a team that later brought crime fighters like Katana, Strix, Condor, and The Huntress into its lineup. While considering herself a solo act, Batgirl has fought well alongside others.

CLASSIC STORIES

(Jan. 1967) Batgirl makes her debut by proving herself in combat against the longtime Batman foe Killer Moth.

***Batgirl Special* #1 (Jan. 1988)**

In her first solo self-titled comic, Batgirl ends an old score and retires from the Super Hero life, setting the stage for the monumental *Batman: The Killing Joke* special.

***Batgirl: Year One* #1-9 (Feb.-Oct. 2003)**

Barbara Gordon's origin is retold for the modern era, explaining how she made the transition from lone vigilante to a member of Batman's inner circle.

***Batgirl* (Vol. 4) #35 (Dec. 2014)**

Batgirl opts for independence and moves to the Gotham City borough of Burnside, adopting a new look and perspective on life.

Barbara Gordon grew up in the shadow of Gotham City's white knight, James Gordon. She idolized her father for his fight against the city's corruption and criminal element. Intense and driven, Barbara wanted to follow her dad's example, but she did so in her own unique way. She mastered ballet and judo, and put her photographic memory to good use by studying criminology.

It was during a trip to the Gotham City Police Department as part of her research for "Intro to Criminology" that Barbara caught her first glimpse of her life's calling. Visiting the precinct alongside her little brother James Jr., Barbara saw her true reason for touring the G.C.P.D.—a Batsuit mocked up by the S.W.A.T. team based on eyewitness sightings of the elusive Batman.

As interested as she was in her father's line of work, Barbara had become truly fascinated by Gotham City's Dark Knight and wanted to learn everything she could about the vigilante. But little did she know she would get a chance to take a trial run at filling the Batman's shoes that very same day. After police escorted a hulking criminal called Harry X past Barbara, the villain escaped with the help of his armed accomplices. Barbara used the confusion as cover, and donned the G.C.P.D.'s Batsuit in order to best Harry X in combat without exposing her identity. When she met Batman face-to-face immediately afterward, her actions were praised by the hero. The entire event proved too irresistible for Barbara, and soon she was wearing her own blue-and-gray Batsuit and learning the ins and outs of crime fighting firsthand as Batgirl.

DADDY DEAREST

Barbara decorated her bedroom walls with news stories of her father's heroic crime-fighting exploits.

AFFAIRS OF THE HEART

Barbara Gordon and Dick Grayson, the original Robin, have shared a longstanding romance that began when Barbara first started out as Batgirl. From the outset, Grayson noticed the young vigilante's grace and skill, and soon developed a crush on the heroine. While their romance never truly got off the ground, the two understood they shared a mutual attraction. But when Grayson faked his own death to join the spy network Spyrall, Barbara moved on with her life and began a romance with Luke Fox, aka Batwing. Babs and Luke have since broken up, and she began dating Jason Bard, a former Gotham City Police Commissioner, who is trying to make amends for his corrupt time on the force.

MOVING ON

Dick Grayson wasn't happy about Barbara's decision to end their years-long flirtation, but he realized that she was happy, and did his best to be happy for her.

SURVIVING THE JOKE
The Joker shot and paralyzed Barbara Gordon at her apartment—but he was no match for Batgirl's indomitable spirit.

However, after team-ups with Robin and fighting villains like the Killer Moth, the first chapter of Batgirl's life as a Super Hero was about to come to a crashing halt. When Super-Villain The Joker broke into Barbara's apartment in his latest scheme against Jim Gordon, he shot Batgirl in the spine, leaving her wheelchair-bound. Barbara made the most of that time, however, using her computer expertise to create the online persona of the information

guru called Oracle. Through the use of cutting-edge technology, however, and with an unwavering desire to overcome adversity, Barbara regained her ability to walk. She was soon back in prime fighting form, adopting a new Batgirl costume that better matched Batman's armored counterpart.

Back as a Super Hero, Batgirl's life did not slow down in the slightest. Initially reluctant to commit herself to a team, Barbara became a member of the female vigilantes called the Birds of Prey. She met a host of new adversaries including Grotesque and Gretel, and an archfoe in the form of Knightfall. She would later move to Burnside, become the defender of that Gotham City borough, and use social media to her advantage. There she started her own company in the form of Gordon Clean Energy, adopted a practical jacket-like costume, and established a network of loyal friends and coworkers.

"...for the first time in a long while, I know who I am..."

BATGIRL

BRAVE NEW BATGIRL

When her practical Burnside costume was all but shredded during a fight with a new Grotesque, Barbara donned an old prototype Batgirl costume she kept at her dad's house for just such an emergency. Opting to leave her Burnside days behind her for a fresh start at crime fighting, she took up a new apartment in the rundown neighborhood called the Narrows. Batgirl maintains a Super Hero hideout from her time as Oracle in the form of the Clock Tower, located in the historic Old Gotham neighborhood, and enjoys the occasion team-up with Black Canary and Huntress, her two closest allies from the Birds of Prey.

WANTED FOR QUESTIONING

Commissioner Gordon witnessed James Jr.'s plummet off the dock, and blamed Batgirl for his son's death. Determined not to reveal her double identity to her father, Batgirl was forced to live as a fugitive for a time.

CLASSIC YET PRACTICAL
Batgirl's current Batsuit includes a yellow backpack underneath the cape, perfect for storing her civilian clothing while on the go.

REBIRTH

CLASS ACT

Always an overachiever and hungry to be the best she can be, Barbara Gordon started a global odyssey to hone her crime-fighting combat skills. Unfortunately, even before completing her first lessons in Japan, Batgirl was drawn into a deadly game of murder and mystery.

ON THE RECORD

Enter Batgirl

Before the reality-altering event *Crisis on Infinite Earths*, Barbara Gordon was introduced as a librarian who had designed a Batman-like costume to attend a policeman's ball. On the way to the event, however, she encountered Killer Moth and quickly leapt to Batman and Robin's aid in defeating the villain. Sold on a life of fighting crime, Barbara became Batgirl. A breath of fresh air in Gotham City, she was soon found driving her Batgirl cycle around the city, establishing her own crime-busting credentials.

While Barbara Gordon has remained the iconic version of Batgirl since her debut, the original Batgirl, Betty Kane, first appeared in 1961 in *Batman (Vol. 1) #139*. The niece of Kathy Kane (aka Batwoman), Betty launched the long and eventful history of Batgirl.

The Origins of Oracle

Soon after *Crisis on Infinite Earths*, Batgirl's story was streamlined. In this incarnation, a retired Batgirl was injured by The Joker and would never walk again. However, rather than give up, Barbara changed the way she fought crime, becoming Oracle, a computer guru able to find any information on the Internet. As Oracle, Barbara was an invaluable aide to the Batman Family. She became a member of the Justice League of America, a mentor for the new Batgirl, Cassandra Cain, and she helped form the Birds of Prey.

MAKING HER MARK
When Batgirl moved to Washington, D.C., Barbara became a congresswoman. Despite her busy schedule, she still kept her late night appointments as Batgirl.

The Dark Knight. The World's Greatest Detective. Gotham City's Guardian. The hero known as Batman goes by many titles as the result of a life in the shadows building an urban legend that is revered by the innocent as much as it is feared by Gotham City's cowardly and superstitious criminal lot. In a world full of Super Heroes and Super-Villains, Batman fights crime using his intellect, physical and mental training, and an arsenal developed with his family's fortune. Moreover, Bruce Wayne has an unrelenting need to prevent the kind of tragedy that he suffered from happening to any of Gotham City's innocents.

AT A GLANCE...

The Mark of Zorro

After attending a viewing of *The Mark of Zorro* film at the Monarch Theater with his parents in the Gotham City neighborhood called Park Row, young Bruce saw his mother and father gunned down before his eyes by a common criminal. It was on this night that the Batman was truly born.

The Batman Family

While he considers himself a loner, Batman has many allies in his war on crime. These include several young heroes who each served as his partner, Robin, and other allies inspired by his career, such as Batgirl and Batwoman. He even organized an international fighting force under the name Batman, Inc., taking Batman's mission to a global level.

When Bruce Wayne pressured his parents to take him to see the film *The Mark of Zorro*, he had no idea that his life was about to change forever. As his family walked from the movie theater down a dark Park Row street in Gotham City, an armed criminal stepped from the shadows pointing his gun at the Waynes. In a simple mugging gone wrong, criminal Joe Chill shot and killed both Thomas and Martha Wayne, making young Bruce an orphan in a split second. Reeling from the shock of the traumatic loss, Bruce made a vow on his parents' grave to wage a lifetime of war against criminals who would prey on the innocent. Although he wasn't aware of it yet, on that night, Bruce truly became Batman.

After brief stints at a few schools, including Gotham Academy, Bruce Wayne traveled the world learning the tools of the crime-fighting trade he fully intended to ply. When he was 21 years old, he studied the ins and outs of technological gadgetry under the guidance of the brilliant inventor, Sergei Alexandrov. He learned from Brazilian criminal Don Miguel how to race cars in life-or-death situations, and spent much of his time studying martial arts with masters like Shihan Matsuda in the Himalayas. But Bruce didn't stop there. He delved into criminology, chemistry, and even acting, understanding that his future would require the mastery of a vast number of specialized skills. All the while, he trained his mind and body to near perfection, often practicing his fighting techniques on dozens of opponents at one time. And while he knew he would still require a lifetime of practice to reach a level of perfection he could be satisfied with, Bruce Wayne nevertheless returned to Gotham City in order to begin his mission to clean up the corrupted town.

UTILITY PATENT Alexandrov's teachings were instrumental in enabling Bruce to create Batman's famed Utility Belt.

2013-Sep. 2014) After the events of *Flashpoint* altered reality again, Batman's origin story was given a facelift in "Zero Year." Bruce Wayne sets up a base of operations in a cave beneath Wayne Manor and the concept of the Batman is born.

The wonders of the Batcave

Batman operates from the large caverns below Wayne Manor. He is constantly developing new technologies, vehicles, and weapons to aid in his never-ending crusade against crime in Gotham City. From the dozens of models of his Batmobile, Batplane, and Batboat, to the simple gadgets in his Utility Belt, Batman is always ahead of the technological curve.

THE COURT OF OWLS

Batman uncovered an underground criminal society in Gotham City, discovering that this clandestine organization dated back to the very origins of the city itself. Called the Court of Owls, the secret society maintained an army of assassins named Talons. Batman was not only forced to escape the Court's elaborate labyrinth located underneath the city streets, but he also faced a small army of Talons when the Court unleashed them on some of Gotham City's most powerful political figures. Batman and his allies defeated the assassins, forcing the Court even further underground.

THOMAS WAYNE, JR. An acquaintance of Bruce Wayne, Lincoln March, proved to be an agent of the Court of Owls. Batman defeated March, but he could not shake off the villain's claim that he was Bruce's younger brother, Thomas, abandoned by the family at a young age.

ETERNAL KNIGHT

Batman is and forever will be Gotham City's guardian angel. Time and again he has risen to defeat any and all threats to his city and ensure justice prevails.

abusive boss. In the scuffle that followed, Bruce was stabbed by Holly and shot by police and barely made it home alive. Bruce fled to Wayne Manor, and sat in his father's study, bleeding out. He knew if he rang the bell next to the table, his longtime family friend and butler, Alfred Pennyworth, would tend to his wounds. In that moment, the sight of a bat in the study interrupted his thoughts. There at the edge of death, Bruce Wayne realized that to strike fear into the hearts of Gotham City's criminals, he had to become the very thing that had terrified him as a boy—a bat.

BECOMING BATMAN

Severely injured from patrolling without the benefit of one of the Batsuits he would later employ, Bruce Wayne knew he needed to tackle crime fighting from a different angle.

THE VOW

It was a promise made by a boy, and then by a man. Bruce Wayne swore to avenge his parents' deaths by waging a relentless war on all criminals.

ENDGAME

Throughout his career, Batman's greatest foe has been the insane criminal known simply as The Joker. Believed to be a member of the Red Hood gang who fell into a vat of toxic liquid at the ACE Chemical Plant during Batman's early years of crime-busting, The Joker has put his brilliantly twisted mind to work tormenting Batman time and again. The Joker is responsible for killing the second Robin (Jason Todd), shooting and paralyzing Batgirl (Barbara Gordon), and warring with The Riddler in a citywide event that caused the deaths of numerous innocent citizens.

The madman even once infected Gotham City with a virus that turned the populace against Batman. The brutal showdown that resulted led to the Dark Knight freeing the city of the villain's hold, but not before the apparent death of these longtime antagonists in a cave collapse deep below the city. It later transpired that they did not die, thanks in large part to the regenerative fluid, Dionesium. However, the event profoundly changed Bruce, threatening the end of Batman's career forever.

LAST LAUGH?

The so-called Clown Prince of Crime released a deadly Joker virus across Gotham City, which created an army of zombie-like victims.

"Yes, father. I shall become a bat."

Bruce Wayne

BATMAN

BREAKING UP THE BAND
The Batman costume was as effective and dramatic as Bruce had hoped when he appeared before the Red Hood Gang.

REBIRTH

STRANGERS IN TOWN

Gotham City's tenuous balance of power is disrupted by newcomers Gotham and Gotham Girl. They pluck crashing planes from the sky and have an heroic, take-charge attitude. But can the Dark Knight afford to believe that they are as benevolent as they claim?

REBIRTH

THE WEDDING

Batman and Catwoman finally admitted their feelings for one another. Batman proposed to Catwoman and she accepted, but on the night they were to be married, Catwoman abandoned him on a rooftop, manipulated into breaking his heart by Bane. Batman and Catwoman later rekindled their romance, but decided that, since they don't often follow the rule of law to the letter, they didn't need to be officially married to be devoted to one another.

Donning his first version of a Batsuit, Bruce Wayne became the Batman. He fought and defeated the notorious Red Hood Gang and then began to set his sights on other organized crime organizations in Gotham City.

Batman would soon be put to the ultimate test when a Super-Villain known as the Riddler took control of Gotham City, shutting off its power just as a super storm approached. The result was an isolated metropolis ruled by a criminal who planned to wipe the entire city off the map. Working directly with police captain James Gordon and Wayne Industries scientist Lucius Fox, Batman overcame the eccentric Super-Villain, earning his fabled reputation as Gotham City's Dark Knight in this event that would later be referred to as *Zero Year*.

As Batman's career continued, he adjusted his Batsuit to better serve his needs, and soon became a founding member of the Justice League alongside other legendary heroes such as Superman and Wonder Woman. He partnered with an orphaned former circus performer named Dick Grayson, who became the first of five young heroes to adopt the title of Robin and be personally trained by the Dark Knight. Grayson later became Nightwing and was succeeded by the headstrong Jason Todd, who was seemingly killed, only to return as the Red Hood. Tim Drake deduced his way into the Batcave becoming the third Robin, later evolving into Red Robin to venture off on his own. Stephanie Brown briefly became the fourth Robin, before returning to her original Super Hero name, Spoiler. Batman's current partner is Damian Wayne, the fifth Robin and Bruce Wayne's biological son.

Building a small army of allies over the years – combined with a near-death experience and a time-traveling journey – inspired Batman to take his work onto a global scale, and he soon introduced Batman, Inc., a Wayne Industries-sponsored organization that placed a Batman representative in many countries. The Caped Crusader also established a number of Super Hero teams, from an incarnation of the Justice League of America to his personal strike force, The Outsiders.

In recent adventures, Batman fought off a long campaign from Bane, who attempted to break Batman both physically and mentally. Bane successfully took over Gotham City, using the Psycho-Pirate to brainwash other infamous Batman enemies into becoming the city's police force. Bane even succeeded in killing Batman's loyal butler and father figure, Alfred. With Catwoman's help, Batman bested Bane, as well as his surprising partner in crime, the Batman from the alternate *Flashpoint* timeline, Thomas Wayne.

Thomas Wayne wasn't the only evil Batman that Bruce Wayne was forced to battle in recent months. A version of himself from the Dark Multiverse infected by The Joker, the Batman Who Laughs invaded Batman's home of Earth-0 alongside a small army of other evil Batmen, most twisted amalgamations of Batman and his fellow Justice League members.

Closer to home, The Joker got in on the large-scale action when he waged an all-out war on Batman, releasing armies of clown henchmen on the streets. Revealing conclusively that he knew the Batman's secret identity, The Joker staged a hostile takeover of Wayne Industries, and Jokerized Batman's technology, poisoning Batman and nearly killing him. However, the Batman rallied, and stopped The Joker's forces by embracing the one thing The Joker can never possess: a true family.

Over the years, the Dark Knight has become the creature of the night he set out to be, feared by criminals in Gotham City and beyond.

THE JOKER WAR

Nightwing had been shot in the head by the Beast, but his memories finally returned to him after The Joker tried to further mess with his mind during the citywide Joker War.

ON THE RECORD

When he debuted in 1939, Batman was intended to be a “creature of the night,” a hero inspired by the often dark and shadowy world of pulp magazines of the time. That brooding vigilante would soon be brightened by a child partner, Robin, and then lightened further throughout the 1950s and ’60s. Batman returned to his role as a true Dark Knight Detective in the 1970s, and grew grim and gritty in the 1980s and ’90s. Able to thrive in almost any incarnation, Batman has been a hero for the ages, often reflective of the real world that inspires his creators.

THE ICONIC LOOK

Since his 1939 debut, Batman’s look has included a bat-eared cowl and cape. In the 1960s, he adopted the yellow oval around his bat-symbol—an iconic logo that lasted into the 1990s.

Dark Knight Detective

After embracing light-hearted sci-fi romps in the 1950s and the offbeat adventures of the 1960s, Batman returned to his darker roots with a vengeance in *Detective Comics* #395 (January 1970) in the story “The Secret of the Waiting Graves.” While not as grim as he would emerge in the 1980s after the miniseries *Batman: The Dark Knight*, the “Caped Crusader” of the 1970s was once again a creature of the night, as a new generation of writers and artists recaptured the original Batman magic.

MENACE TO SOCIETY?

Batman was often targeted as a dangerous vigilante by many in Gotham City’s corrupt police force, before proving he was a hero.

Year One

The modern incarnation of the Dark Knight truly emerged after the world-shattering events of *Crisis on Infinite Earths*. Given a realistic overhaul, Batman struggled to find his footing in a corrupted Gotham City, finally finding an ally in the form of James Gordon, the city’s future police commissioner. Batman saved the life of Gordon’s son, forever cementing their partnership.

The broken bat

Bruce Wayne wouldn’t be the only Batman in Gotham City during the course of his career. When criminal mastermind Bane unleashed the inmates of Arkham Asylum into Gotham City, he forced an exhausted Batman to capture them one by one. Bane then broke into Wayne Manor and broke Batman’s back, crippling him. Temporarily out of action, Batman promoted Jean Paul Valley—a vigilante formerly called Azrael—into the Batman role. Bruce recovered with the aid of Alfred and Robin, before finally training his body back to near physical perfection and reclaiming his mantle as the true Dark Knight.

THE PAIN OF BANE

When Batman was at his weakest, Bane crippled the hero, leaving him close to lifeless.

Out of the past

As well as facing a mysterious new villain in Thomas Elliot’s Hush, Batman ran the gauntlet of his most famous foes in the memorable “Hush” storyline. Introducing a threat from Bruce Wayne’s past, this series saw the return of Jason Todd (in a fashion), the death of Batman’s longtime inventor friend Harold Allnut, and the villainous Riddler discovering Batman’s secret identity.

IDENTITY ISSUES

Batman was forced to encounter his old foes as he deduced Hush’s identity and identified the man behind the villain’s rise to power, The Riddler.

REAL NAME Terry McGinnis

HEIGHT 5ft 10in **WEIGHT** 170 lbs

EYES Blue **HAIR** Black

POWERS/ABILITIES Expert martial artist trained directly by Batman (Bruce Wayne); weapons include hi-tech armored suit that can fly with the aid of glider wings and rocket boots, turn practically invisible, and shoot a grappling hook, Batarangs, and/or explosive discs.

ALLIES Bruce Wayne, Commissioner Barbara Gordon, Max Gibson, Matt McGinnis, Batwoman, Dick Grayson

ENEMIES Blight, Shriek, Spellbinder, Rewire, Inque, Jokerz, The Joker

AFFILIATIONS Justice League Beyond

ROBIN BEYOND
Terry's brother Matt became Robin briefly after learning about Terry's double life. When the job proved too dangerous, Matt was let go from the role.

A few decades into the future, Gotham City has evolved into Neo-Gotham, a metropolis of tremendous skyscrapers, flying cars, and sleek technology. In that brave new world, a new kind of Batman is required to keep the peace. Terry McGinnis serves as the new Dark Knight, an armored hero capable of flight and invisibility. He's not just Batman, he's Batman Beyond.

Bruce Wayne retired as Batman when he felt he was growing too old to continue his war on Gotham City's criminals, despite the hi-tech flight suit he had made with help from Wayne Industries. Now an old man alone in Wayne Manor, Bruce came to the aid of a teenager named Terry McGinnis who was being terrorized by a gang called The Jokerz—pale imitations of the original Clown Prince of Crime. Terry returned to Wayne Manor with Bruce and discovered that Bruce Wayne and Batman were one and the same. After a testy start, Terry was accepted by the Dark Knight as his heir following the death of McGinnis' own father. With Bruce helping him on missions via communication from the Batcave, a new Batman was born.

After an extensive career of fighting future threats like Blight, Inque, and the Stalker, Terry was presumed dead when the notorious Spellbinder tricked him into believing he was a villain called Rewire. A time-displaced future version of Tim Drake served briefly as Batman in Terry's absence, before solving the mystery of Terry's disappearance. After helping Terry regain his mantle as Batman, Tim left to roam this new world.

Terry continued as Batman, and even fought the original Joker, a conflict that ended with the seeming death of the arch foe. With the protection of Neo-Gotham more difficult than ever, Terry has adopted a new partner in the form of Batwoman, Dick Grayson's daughter Elainna.

ON THE RECORD

Batman Beyond originally debuted in cartoon form in his self-titled animated series in 1999. While a tie-in comic came soon after, Batman Beyond didn't make his way into the DC universe until a storyline in the pages of *Superman/Batman* showcased the hero living in an alternate universe. However that hero was oddly Tim Drake under the Batsuit, not Terry McGinnis.

In 2010, McGinnis was given his own miniseries that soon led to an ongoing series, tying Terry's life more closely to the future of the DC universe by having him fight not just threats from the animated series, but comic book villains like Hush.

A DIFFERENT BEYOND
Tim Drake debuted as Batman Beyond, tangling with a time-displaced Bizarro Superman during a deadly reality-hopping game being played by The Joker and Mr. Mxyzptik.

BEYOND THE BATSUIT
The Batman Beyond suit contains rocket boots, wings, a Utility Belt, a built-in grapnel, and a cowl that greatly improves Batman's vision and hearing.

BATWOMAN BEYOND
Elainna Grayson wears a blue variation of the Batsuit. Her identity was originally a mystery even to Terry and Bruce. At first, Terry believed her to be Ten from the Royal Flush Gang.

The idea came to Batman in something akin to a dream: a global team of Batmen, working together for the common safety of the world. When Batman introduced Batman, Incorporated to the world, he did so knowing that this particular team of international heroes would all use the Batman's methods and would answer solely to him.

After catching a glimpse of his future and the global threat of the evil and clandestine organization called Leviathan, Batman decided he

GOING PUBLIC

needed to step-up his crime-fighting game, and formed a new team of Super Hero operatives under the name Batman, Incorporated. Fully and publicly funded by Wayne Industries, Batman, Inc. united not just his allies in the Batman Family, but also saw new heroes adopt costumed identities to follow in the Dark Knight's footsteps and uphold his brand of justice.

Batman had briefly fought with a group of international crime fighters called the Club of Heroes, so it only made sense that he recruited some of those old allies into his new operation. In cases like the Knight, Batman recruited the heir to the original hero's mantle. Newcomers like the French crime fighter Nightrunner and Batman Japan were also welcomed into the fold. Soon Batman had a veritable army of skilled and like-minded heroes to command against the rising threat of Leviathan.

Led by Talia al Ghul, Leviathan proved to be as dangerous as the Dark Knight had feared. Not only did the cult of villains kill the Knight, they also ended the life of Batman's partner and son, Robin (Damian Wayne), causing the Dark Knight to be enraged like never before. Gotham City became a battle zone, waging a war that culminated in a fight between Batman and Talia in the Batcave. Talia al Ghul, did not walk away from that particular fight, but was shot and seemingly killed by another of the enemies she had made in her bid for world conquest.

ON THE RECORD

The first volume of *Batman, Inc.* formed the epic final chapter in the sweeping Batman saga that began with the "Batman and Son" storyline in *Batman* (Vol. 1) #655.

The second volume appeared after the reality-altering *Flashpoint* event, which led to some elements of the series, such as Batman's costume, being changed. New heroes like Black Bat (Cassandra Cain) joined up, while others, such as the original Batwoman (Kathy Kane), reemerged with significantly revised personal histories.

GONE IN A FLASH

Some characters in the first incarnation of *Batman, Inc.*, like Batgirl Stephanie Brown, would not return in the second volume.

GROBLINS

Batman is rarely without a Robin or two, and likewise, the Batman Who Laughs is rarely seen without his favorite Groblins.

He is Batman's greatest nightmare come to literal life.

The Batman Who Laughs is Bruce Wayne from a world in the Dark Multiverse where he has been infected with The Joker's nanotoxin. Possessing a mind capable of thinking like both Batman and his greatest nemesis, the Batman Who Laughs has risen to a higher power than any mortal before him.

On Earth-22 in the Dark Multiverse that was created from the worst nightmares and fears of people in the true Multiverse, The Joker broke Batman's iron will. The madman slaughtered family after family in front of the Dark Knight, who was unable to stop the carnage. When he finally broke free of his bonds, Batman brutally attacked The Joker, was tipped over the edge, and killed him. However, it was The Joker who had the last laugh. When his heart stopped beating, he released a nanotoxin like nothing Batman had ever experienced before. It slowly rewired Batman's mind to become more like that of The Joker, replacing Batman's moral compass with something quite evil.

Knowing this, Batman called Robin, Nightwing, Red Hood, and Batgirl to the Batcave and then shot and killed them all. His next stop was the Justice League Watchtower, where he murdered the entire League, saving Superman for last. Having completely conquered his world, this Batman Who Laughs was visited by the demon Barbatos, who revealed the other dimensions of the Dark Multiverse. The Batman Who Laughs then traveled to a variety of dark dimensions, recruiting a small army of Dark Knights to his cause. They invaded Earth-0, but were ultimately defeated by Batman and the Justice League.

However, the Batman Who Laughs stayed on Earth-0, where he set up his own twisted Batcave below Gotham City's Monarch Theater, the site where Batman's parents were killed. He infected noble heroes, turning them into his own team of Super-Villains, before they were bested in a conflict with Lex Luthor and restored to normal. The Batman Who Laughs wanted the power that Luthor had been granted by the mother of the Multiverse, Perpetua. He convinced her to choose him over Luthor, and when she did, the Batman Who Laughs transformed Earth-0 into a twisted hellscape that served as his own private kingdom. He gained even more power when his brain was placed in the body of a powerful dark amalgam of Bruce Wayne and Dr. Manhattan. With the like-minded Robin King by his side, the Batman Who Laughs proceeded to give Batman and the heroes of Earth one of the greatest battles of their lives, with Earth and the Multiverse hanging in the balance.

THE DARK KNIGHTS

Originally the Batman Who Laughs recruited a core group of Dark Batmen to his cause: **The Drowned** (Batman/Aquaman), **The Devastator** (Batman/Doomsday), **The Murder Machine** (Batman/Cyborg), **The Merciless** (Batman/Ares), **The Red Death** (Batman/The Flash), and **The Dawnbreaker** (Batman/Green Lantern).

OF TWO MINDS

With the brainpower of one of the greatest heroes and one of the greatest villains, the Batman Who Laughs has a contingency plan for every conflict, albeit with a mad, disturbing twist.

In the alternate reality created by the *Flashpoint* event, Thomas Wayne had been unable to prevent his young son Bruce from being killed in a robbery in Gotham City's Crime Alley. In his grief, he swore to rid the streets of crime as the Batman—a ruthless and brutal version of the hero who did not balk at using firearms to take down his targets. His wife Martha had survived the robbery too, but the loss of her child led to the loss of her sanity and she became The Joker of that reality, locked in a bitter struggle with her erstwhile husband.

When Thomas discovered via The Flash, who jumped realities on the Cosmic Treadmill, that there was a world where he had died and his son had lived, at first he was delighted. Later he was even able to meet this alternate-reality son and see the man he had become. However, the knowledge that his son became Batman—with all the pain and sacrifice that this entailed—troubled Thomas so much that he traveled to Bruce Wayne's universe and allied himself with Bane to “break” his son. Thomas hoped, wrongly, that if he forced his son to give up the cowl by any means necessary, then Bruce would finally find happiness.

FATHER FIGURE

In an alternate reality, Thomas Wayne was Batman, with none of the scruples about using lethal force of Bruce Wayne's Batman.

ON THE RECORD

On Prime Earth, Dr. Thomas Wayne was a celebrated scion of one of Gotham City's leading families. A prominent surgeon and philanthropist, he married Martha Kane and the couple had a son, Bruce.

However, Thomas' seemingly blessed life was tragically cut short when he was murdered in the notorious Crime Alley, along with his wife, in front of their traumatized son. This storyline was the reverse of the later, alternate reality one that saw Thomas become Batman. On Prime Earth, it was Thomas's death that was a key factor in Bruce Wayne's decision to fight crime as Batman.

LOVED AND LOST

The death of his son sent Thomas Wayne down a dark path; one that saw him take extreme action to fight crime in an attempt to do right by his family.

Luke Fox never intended to follow his father, Lucius Fox, into a career with Wayne Industries. Despite a gift for technological innovation equal to his father's, Luke preferred to go his own way. This attitude frustrated Lucius, who felt his son was squandering his potential and opportunities. While constantly arguing with his father, Luke pursued fighting arts, participating in numerous mixed martial arts events. His intelligence, resolve, and combat skills soon attracted Batman's attention, and the Dark Knight offered Luke the role of one of his agents after original Batwing David Zavimbe retired.

Wearing a new suit designed by his father, Luke became a valued ally and partner to Batman, despite often upsetting his family thanks to his many unexplained absences while on duty. However, after secretly working with Red Robin Tim Drake to avert a catastrophic potential future, battle-fatigued Batwing left the Gotham Knights team to pursue his own path.

GOING HIS OWN WAY

Much to his father's relief, Luke has recently created his own company called FoxTek. He has also begun a relationship with fellow tech-minded hero, Batgirl.

BATWINGING IT

Batwing's suit is highly advanced and a true work in progress. Luke inherited his love for technology from his father and is constantly updating his suit.

ON THE RECORD

While Luke Fox as Batwing debuted just months before the continuity changing *Flashpoint* event, a few characters existed in the past that bore a striking similarity to the hero. In *Batman* (Vol. 1) #250 (Jul. 1973), a child's interpretation of Batman, nicknamed “Batwings” appeared in “The Batman Nobody Knows!” Later, on Earth-2, a hero that went by the name Blackwing fought alongside the Huntress. However, it wasn't until *Crisis on Infinite Earths* and later events, that the first true Batwing was introduced in the form of David Zavimbe, the Batman Inc. representative for Africa.

BATTLE READY

David Zavimbe lived a hard life as a child soldier in Africa. Batman saw promise in him and promoted him to Batwing after learning of his amateur crime fighting.

DADDY'S LITTLE GIRL
Before parting ways over Jacob Kane's extreme methods, Jacob helped Kate set up a secret HQ and find allies to train her in non-lethal techniques.

To the general public, Kate Kane seems to have everything. Like her cousin, Bruce Wayne, Kate has never wanted for money and has been known to frequent the most exclusive nightclubs. However, Kate has lived a tragic life—one that has shaped her into a crime fighter and sworn protector of the innocent: Batwoman.

As a young girl, Kate Kane was very interested in athletics. Like her twin sister, Beth, she enjoyed gymnastics and soccer. The two girls were the quintessential "military brats," moving around the country whenever their parents were stationed at a new location. They always had each other, were the best of friends, and assumed they would be lifelong confidantes.

On their 12th birthday, Kate and Beth realized just how wrong their assumption had been. Their mother was taking the two girls out to celebrate when they were abducted and held prisoner. Their father ultimately assembled and led a squad of elite soldiers to come to their rescue. However, the damage was done: Kate's mother had been shot and killed, and it appeared that Beth had suffered the same fate. From that day, Kate Kane would live a lonely life, with only her father for support.

Jacob Kane did his best as a single father. He supported Kate and taught her to live a disciplined and honorable life. When Kate was kicked out of the United States Military Academy at West Point for being gay, her father stood by her, realizing that her honesty and integrity were more important than a career with the military. Kate had been an excellent cadet, and without school, there was a void in her life—one that she filled with excessive partying. She lacked direction and only found it when she saved herself from a mugging, meeting Batman in the process. With her father's training and support, Kate transformed herself into Batwoman, enrolling into a new kind of service to the public.

ON THE RECORD

Kate Kane first appeared just five years before the *Flashpoint* event that altered the DC universe. While much of her backstory has stayed the same, one aspect that has only lightly been touched on is her relationship with Renee Montoya, the second hero to adopt the name of The Question.

Kate had a romantic relationship with Renee before the couple became Super Heroes. However, in the current continuity, Renee's career as The Question is yet to begin. The two have dated, but their shared past remains something of a mystery.

PAST LOVES
Kate Kane has had romantic relationships with The Question (Renee Montoya) as well as Maggie Sawyer, the head of Metropolis' Special Crimes Unit.

COLORS OF WAR
Batwoman's father designed her costume. Col. Kane made sure the suit was stab resistant, bullet proof, and dramatic with its black-and-red color scheme.

GOTHAM KNIGHTS

Partnering with Red Robin (Tim Drake), Batwoman helped lead the Gotham Knights, an informal team of Gotham City heroes based in the hi-tech Belfry inside the converted Old Wayne Tower. Batwoman was the field leader, using her vast military training to help guide more inexperienced members like Azrael and the Spoiler. While the team disbanded after a conflict with Clayface, Batwoman remains active in Gotham City. Kate's main base of operations is her hideout inside the R.H. Kane Building, but she also makes use of Batman's Batcave from time to time, a base located beneath Gotham City Harbor.

As a young Muslim boy growing up in Dearborn, Michigan, Simon Baz was often the target of bigotry, especially after the tragic events of September 11, 2001.

Years of bullying gave Simon a serious chip on his shoulder, and after he lost his job at an automotive plant he took up illegal street racing, only narrowly avoiding jail time. Financially desperate, Simon started stealing cars to make ends meet. One night he stole a van, only to discover a ticking bomb inside the vehicle. After a high-speed chase he was taken into custody as a suspected terrorist. Amid harsh interrogation by federal agents, a power ring sought Baz out, conferring on him the abilities and responsibilities of a Green Lantern. A reluctant Super Hero, Baz considered the selection a mistake, but sought to do his best to help people. Innately untrusting, he supplemented his Green Lantern uniform with a sidearm. It took the insistence of Batman to make Baz eventually surrender this weapon and trust the ring and his partners.

As a rookie, Baz was assigned Earth as his beat, to be patrolled with fellow newcomer Jessica Cruz. As commanding officer of the GL Corps, Hal Jordan ordered both trainees to join the Justice League in order to learn teamwork from the best.

EMERALD VISION

Simon has manifested a very rare ability among Green Lanterns—the Emerald Sight. This grants him visions of the near future.

BEAUTIFUL DREAMER

DEBUT *Forever People* (Vol. 1) #1 (Feb.–Mar. 1971)

BASE New Genesis; Venice Beach, California

HEIGHT 5ft 6in **WEIGHT** 128 lbs

EYES Blue **HAIR** Black

POWERS/ABILITIES Able to create life-like illusions; precognitive dreams.

ALLIES Infinity Man, Superman, Deadman

ENEMIES Darkseid, Desaad

AFFILIATIONS Forever People, New Genesis

DREAM WEAVER

Dreamer's strong connection to the Anti-Life Equation gives her the ability to manipulate the powerful mind-controlling formula.

A student at the Academy of Higher Conscience on the planet New Genesis, Beautiful Dreamer was with Vykin Baldaur when he touched a non-functioning Mother Box and it bonded with him as its host. Soon Dreamer found herself traveling through a Boom Tube to Earth with her friend Vykin, his sister Serafina, and Mark Moonrider for an academy assignment to help advance humankind.

After meeting fellow Academy member Big Bear, the group set up camp in Venice Beach, California. During a fight with the villain Mantis, they touched the Mother Box in unison and were replaced by Infinity Man. Together the team became the Forever People.

Pre-Flashpoint, Beautiful Dreamer was kidnapped by Darkseid and taken to Earth, where she was rescued by Superman and the Forever People. The team were ultimately killed by Infinity Man on his campaign for the Source to destroy all New Gods.

BEKKA

DEBUT *The Hunger Dogs* #4 (1985)

BASE New Korugar, Sector 3567

HEIGHT 5ft 7in

WEIGHT 132 lbs

EYES Blue

HAIR Auburn/red

POWERS/ABILITIES Increased strength, speed, and durability of a New God; can make others fall in love with her.

ENEMIES Darkseid, Mongul, Apex League

Bekka is a New God from New Genesis, the daughter of the scientist Himon. Born with an innate power to make people fall in love with her, she became a formidable general—besotted troops would die for her and enemies would surrender.

New Genesis' ruler, Highfather, made Bekka a member of his Council of Eight and dispatched her to New Korugar to the headquarters of the Sinestro Corps. She battled the Corps and brought back one of their yellow power rings, but she also attracted the attention of Sinestro himself. Recognizing that Bekka could inspire fear as well as love, he offered to make her a member of the Corps. She ultimately accepted, forsaking her allegiance to New Genesis and going into action to save Sinestro from the warlord Mongul.

BERNADETH

DEBUT *Mister Miracle* (Vol. 1) #6 (Jan.–Feb. 1972)

BASE Apokolips

HEIGHT 5ft 10in **WEIGHT** 140 lbs

EYES Brown **HAIR** Black

POWERS/ABILITIES Superhuman physical capabilities and immortality due to New Gods heritage.

ALLIES Granny Goodness, Darkseid, Desaad

ENEMIES Big Barda, Mister Miracle, Lashina

Bernadeth is a member of the Female Furies, Darkseid's elite female fighting unit. She is the sister of Darkseid's torturer Desaad and she shares his sadistic

tendencies. Her signature weapon is the fahren-knife, which can slice through rock and roast anyone it pierces from the inside.

Bernadeth was Big Barda's second-in-command, but when Barda betrayed Darkseid, it was Lashina, not Bernadeth, who was the new leader. Bernadeth took her revenge by leaving Lashina on Earth when the Furies went to rescue Glorious Godfrey. Lashina returned to Apokolips with members of the Suicide Squad and killed Bernadeth, but to punish her for bringing humans to Apokolips, Darkseid slayed her and returned Bernadeth to life. She has remained in his service, clashing with Supergirl, Wonder Woman, and Hawkgirl.

DEBUT *Doom Patrol* (Vol. 1) #99 (Nov. 1965)

REAL NAME Garfield Logan

HEIGHT 5ft 6in

WEIGHT 140 lbs

POWERS/ABILITIES Genetic code provides a link with the Red, enabling transformation into any desired animal form.

ALLIES Terra, Animal Man

ENEMIES Mother Blood

AFFILIATIONS Ravagers, Teen Titans, Titans

TEEN HERO
Beast Boy may look young, but he has a long track record of heroism with the Teen Titans.

Better known as Beast Boy, young Garfield Logan is able to transform himself into any animal shape. He is a deeply loyal friend with a desire to make those around him happy. Gar is the attention-seeking class clown who harbors a deeper, romantic side... when nobody's looking.

When he was just a boy, Gar was bitten by a West African green monkey that infected him with the Sakutia virus. An experimental treatment endowed him with the ability to change into any animal at will. With money no issue, thanks to a wealthy uncle, Gar joined several different Super Hero teams over the years, but was most at home with the Teen Titans.

Nevertheless, Beast Boy's tenure with the Teen Titans came to an end when he mistakenly thought his team leader, Red Robin (Tim Drake), had died. While it

was later revealed that Red Robin had been kidnapped and not killed, Beast Boy found himself tangling with a different Boy Wonder in the meantime: Damian Wayne.

Batman's son had a rather arrogant streak, and Robin took Beast Boy, Raven, Starfire, and Kid Flash (Wallace West) hostage in order to prove the point that these heroes are stronger together than they are on their own. Surprisingly, this unorthodox sales pitch worked, and Beast Boy found himself again on a Titans roster; one soon joined by Aqualad (Jackson Hyde).

Always ready with a joke, Beast Boy's attitude changed a bit after the ancient Source Wall was pierced at the far reaches of space, releasing ancient godlike energies into the world. He took on a more beastlike appearance and he found it harder to control his animal changes. He joined Nightwing's Titans, but spent more time as a beast than a man. Later, a battle with the then-leader of the Church of Blood – Mother Blood – exposed Garfield to cosmic Bleed energy. Bleed energy blocks Source energy, and this near-death experience succeeded in restoring Gar to his old form. Back to looking “cute” and ready for action, Beast Boy is ready to take whatever life throws at him with his trademark smile.

JUST A BEAST
Source energy turned Beast Boy into more beast than boy for a time, making his animal transformations more difficult.

CLASSIC STORIES

Doom Patrol (Vol. 1) #99 (Nov. 1965) Garfield Logan makes his first appearance, breaking into the Doom Patrol's headquarters. He is given the moniker Beast Boy by Robotman.

New Titans (Vol. 1) #97-102 (May-Oct. 1993) Beast Boy—going by the name of Changeling—makes a devil's bargain with the Brotherhood of Evil to save Cyborg's life.

Beast Boy (Vol. 1) #1-4 (Jan.-Apr. 2000) Beast Boy's Super Hero and TV careers collide following the breakup of Titans West. A doppelgänger frames him for several crimes—he finds out it is the villain Gemini, and defeats her.

ANIMAL MAGIC
Beast Boy's laid-back charm and wit belied his true animal instincts, fearsome powers, and tenacious spirit.

ON THE RECORD

Before becoming a mentor to later versions of the Teen Titans, Beast Boy had his own struggles, particularly when his adoptive father Steve Dayton—also known as Mento—suffered paranoid delusions. Trying to save him, Garfield stole the Mento Helmet, which affected him as it had its creator, giving his animal transformations a more violent edge.

Historically, Beast Boy was always green due to a side effect of the experimental process his scientist father used to save his life from a rare tropical disease. His appearance helped him carve out a brief career as a television actor in the series *Space Trek: 2022*.

SNAKE IN THE GRASS
Attempting to give his girlfriend Terra a “cobra kiss” during a playful training session, Gar Logan never suspected that she secretly conspired to destroy the Teen Titans.

BENNETT, ANDREW

DEBUT *House of Mystery* (Vol. 1) #290 (Mar. 1981)

BASE Magus Theatre, Gotham City

EYES Red

HAIR Black (with white streak)

POWERS/ABILITIES As a vampire, can assume wolf or mist form and hypnotize humans, but is weakened by sunlight; skilled sorcerer and has shown the ability to bring dead vampires back to life.

ALLIES Frankenstein, Batwoman, Killer Croc

ENEMIES Cain, Mary Seward, the Blood Red Moon

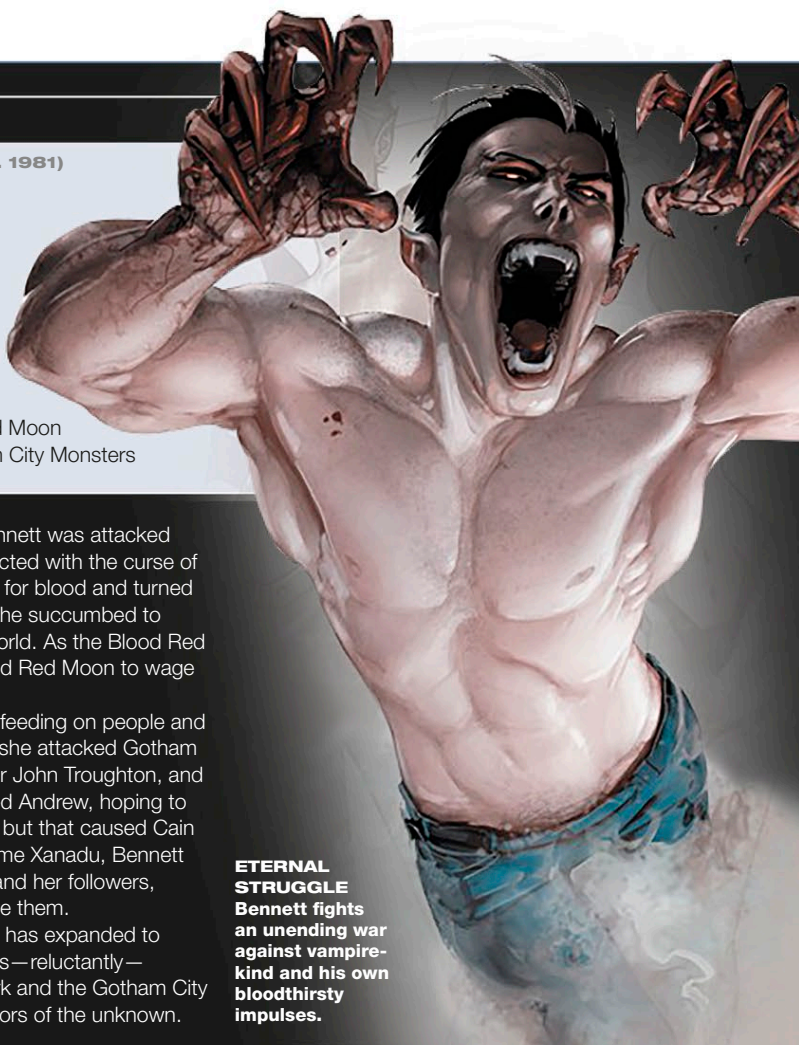

AFFILIATIONS Justice League Dark, Gotham City Monsters

In Elizabethan England, Andrew Bennett was attacked by Cain, the first of the vampires. Dead and afflicted with the curse of vampirism, Bennett awoke with an unholy thirst for blood and turned his lover, Mary, into a vampire too. Unlike him, she succumbed to demonic influence and swore to conquer the world. As the Blood Red Queen, Mary founded the vampire cult the Blood Red Moon to wage her "holy war" against mankind.

Andrew refused to forsake his humanity by feeding on people and resolved to stop Mary and her followers. When she attacked Gotham City, Andrew teamed up with Batman, Professor John Troughton, and teen tearaway Tig to take on the horde. Tig killed Andrew, hoping to destroy Mary's vampires by eliminating her sire, but that caused Cain to arise again. After being resurrected by Madame Xanadu, Bennett slew Cain and continued his war against Mary and her followers, ultimately absorbing their evil into himself to save them.

Bennett's relentless eradication of vampires has expanded to include many supernatural predators and he has—reluctantly—worked with teams such as Justice League Dark and the Gotham City Monsters to preserve humanity from all the horrors of the unknown.

ETERNAL STRUGGLE
Bennett fights an unending war against vampire-kind and his own bloodthirsty impulses.

ON THE RECORD

Pre-Flashpoint, Andrew Bennett was a nobleman at Queen Elizabeth I's court, before being bitten by a vampire. He clashed with his former lover Mary, who had become the vampiric Queen of Blood. He regained his humanity and witnessed her destruction before he himself died. However, Andrew could not escape the vampiric curse. After rising from the grave, he attempted suicide, but returned to unlife. Bennett joined occult group Team 13 and intervened in the infernal war between the demons Satanus and Neron.

UNDEAD HERO
Despite his menacing appearance, Andrew Bennett is a tormented soul who has spent centuries protecting humanity from his own kind.

REAL NAME Bo Bibbowski

BASE The Ace O'Clubs bar

HEIGHT 6ft 3in **WEIGHT** 250 lbs

EYES Gray **HAIR** Gray

ALLIES Superman, Jimmy Olsen, Lobo, Professor Emil Hamilton

ENEMIES Doomsday

Metropolis native Bibbo Bibbowski is a longshoreman, former boxer, and one of Superman's biggest fans. He has also been known to hang out with another super-tough guy—Lobo.

Bibbo and the Man of Steel first met when Superman came to the Ace O'Clubs looking for information. Bibbo mistook him for a troublemaker in a Superman costume and punched him, but only injured his own hand! Impressed, Bibbo decided on the spot that Superman was his "fav'rit" hero.

Later, Bibbo bought the bar after finding a winning lottery ticket. He helped Superman on numerous occasions, most notably when Doomsday attacked Metropolis. Bibbo and Professor Hamilton used a laser cannon against the monstrous alien (to no effect) and after Superman was killed by Doomsday, Bibbo tried to revive the fallen hero with an improvised defibrillator.

BASE New Genesis

HEIGHT 6ft 8in **WEIGHT** 598 lbs

EYES Brown **HAIR** Red-brown

POWERS/ABILITIES New God with superhuman strength and durability; able to redirect atoms to alter his density.

ENEMIES Mantis, Devillance, Desaad, Darkseid

AFFINITIES Infinity Man

A gentle giant, Big Bear grew up in the idyllic nurturing environment of New Genesis following the first war with Apokolips. When Darkseid broke his truce with Highfather and reopened hostilities, one of his first moves was to abduct Bear's friend Beautiful Dreamer, whom he believed held the secret of the free-will destroying Anti-Life Equation. With comrades Mark Moonrider, Vykin, and Serifan, Big Bear arrived on Earth on a sentient Super-Cycle to rescue her. This was accomplished by the group's unexplained connection to a multipowered being dubbed the Infinity Man.

A natural leader and devoted scholar, Bear quickly adapted to the new culture on Earth. He soon became the team's most ardent supporter of staying on Earth and defending its masses.

After escaping Apokolips with Mister Miracle, Barda found herself pursued by Darkseid's forces and the World Army of Earth-2.

effective fighting force to ever emerge from the fire pits—the Female Furies. Chief among them was the powerful and effective Big Barda.

In order to broker peace between Apokolips and Highfather's world of New Genesis, the New God Metron convinced the two rulers to exchange sons, Scott and Orion. Highfather's son Scott was given to Darkseid, who dismissed the boy into Goodness's care, rarely giving Scott a second thought. However, Scott proved to be an able escape artist and he soon fled his captivity, renaming himself Scott Free, Mister Miracle. On the way, he met Big Barda and, despite her better instincts, Barda fell in love with Scott. The two were later married though, for a time, they kept up the pretense of being bitter enemies.

When Darkseid engaged in the so-called "Darkseid War" and was killed in combat against the powerful Anti-Monitor, Mister Miracle joined forces with the Justice League to help end the conflict. Big Barda joined her husband, and even recruited the Female Furies to his cause. However, that came at a price. According to her agreement with the Furies, Barda was forced to return to Apokolips with them after the fighting was over.

It seems that Big Barda and Mister Miracle have reunited in recent months, as the two have been seen fighting alongside the Justice League in large-scale battles.

ON THE RECORD

Big Barda's early history treads a familiar path. Trained to be a warrior on Apokolips, she taught other female fighters. She later rejected Darkseid and Apokolips, married Mr. Miracle, and traveled to Earth.

On Earth, Mister Miracle joined Justice League International. When he was captured by the trader Manga Khan, Barda embarked on an interstellar mission to rescue him.

Barda then proved her value as a team player in a succession of groups. She even became a League member herself when she and Orion joined the Justice League.

HOUSEWIFE WARRIOR
When Big Barda first moved to Earth, she enjoyed life as a "domestic goddess," often resenting her routine being interrupted by adventures with her husband, Mister Miracle.

Big Barda was once a Female Fury who served Darkseid, the evil overlord of Apokolips, enforcing his will with her fearsome Mega-Rod. However, when Barda fell in love with rebel and escape-artist Mister Miracle, she changed her allegiance. Now this fierce New God fights for freedom against her former master.

On the planet Apokolips, the New God Darkseid controlled every aspect of daily life. Only a few of Darkseid's elite were free from the daily torture of his tyrannical rule, and even they have to bend the knee whenever Darkseid commanded. One of his elite members was Granny Goodness, who was in charge of the orphanage, designed for training and torturing slaves. Granny also trained and commanded the most

AN ESCAPE?

After Mister Miracle attempted to end his own life, he seemed to trap himself in a purgatory of sorts, somewhere between heaven and hell. Here, he and Barda have a child and are happily married. Although with his skill set, Mister Miracle knows he can escape this reality at any time.

ALLIES Oracle II, Green Arrow, Renee Montoya

ENEMIES Rā's al Ghūl, Calculator, The Joker

HELP FROM HARLEY
When Harley Quinn finished serving with the Suicide Squad, she headed to Gotham City to turn her life around, chancing upon the Birds and joining forces with them.

in Gotham City's Clocktower, thanks to funding from Barbara's company Gordon Clean Energy.

The longer the Birds worked together, the closer they became. They aired their secrets to one another and faced threats including the villainous Blackbird and the Calculator, and tangled with both Catwoman and Poison Ivy. They've even joined forces with Harley Quinn in recent adventures. It seems the former partner in crime to The Joker is now seeking her own form of zany redemption as a true heroine alongside the Birds.

ON THE RECORD

Originally a partnership between Oracle and the Black Canary, the Birds of Prey did not start calling themselves by that name until they had added other members: first The Huntress, and later Lady Blackhawk. Other female heroes rotated through the team, but its core membership remained that first trio.

Barbara Gordon's transformation from Oracle back to Batgirl remade the fundamental dynamic of the Birds of Prey when the *New 52* began. Their origin was changed to include new member Starling meeting Black Canary at The Penguin's Iceberg Lounge; however that continuity was altered as the Birds of Prey returned to their roots during the *Rebirth* event.

BIRDS OF A FEATHER

REBIRTH

NEW BIRDS

While they have had additional members from time to time, the Birds of Prey is best known for its three mainstays:

- 1 Batgirl (Barbara Gordon)
- 2 Black Canary (Dinah Drake Lance)
- 3 The Huntress (Helena Bertinelli)

CLASSIC STORIES

Black Canary/Oracle: Birds of Prey #1 (Jun. 1996) Black Canary is hired by Oracle to be a bodyguard to businessman Nick Devine. She soon learns that he is a terrorist and takes him down, establishing a partnership with Oracle.

Birds of Prey (Vol. 1) #56-59 (Aug.-Nov. 2003) Black Canary is trapped and tortured by Savant and Creote in an attempt to make Oracle divulge Batman's identity. The Huntress is brought in to rescue Black Canary.

Birds of Prey (Vol. 1) #75 (Dec. 2004) Big changes are in the air as Oracle's original Gotham Clock Tower headquarters is destroyed and Lady Blackhawk is added to the team as pilot of its new mobile base, Aerie One.

BIZARRO HQ
Bizarro's headquarters were a feat of scientific genius, able to open portals to anywhere. He even had a monitor room and an armory.

Bizarro is a Frankenstein-like monster with a heart of gold. Although he was originally created by Lex Luthor, he has gone on to prove that he has a moral character far superior to that of his mad scientist father. Possessing many Kryptonian abilities—albeit warped and twisted—this heroic clone of Superman fights for truth, justice, and the Bizarro way.

Wanting a Superman of his own to command, Lex Luthor mapped Superman's genome and eventually found limited success in Subject B-0—a clone that would possess the full range of powers of the Last Son of Krypton. When Earth was conquered by the Crime Syndicate of Earth-3, Luthor was forced to unleash his latest experimental subject far too early in its development phase, approximately five years before the clone would be a perfect Superman duplicate. This rather incoherent creature called itself Bizarro and remained loyal to Luthor until

its death at the hands of Earth-3's Alexander Luthor.

Since Luthor refused to give up on his Bizarro project, the vigilante Red Hood (Jason Todd) soon chanced upon another Superman clone; one being held in the criminal Black Mask's captivity. During a fight with Black Mask, Red Hood teamed with this new Bizarro, as well as with the Amazon powerhouse Artemis. The three unlikely allies would stay together and form Red Hood's newest team of heroic Outlaws.

When an encounter with Lex Luthor left Bizarro with a genius-level intellect for a limited amount of time, Bizarro created an invisible floating headquarters for the Outlaws, one the size of a Gotham City block. Although his intelligence eventually faded, Bizarro's loyalties did not. When the team was separated by circumstance for a time, Bizarro found his way back to Red Hood. Bizarro then proved how much of a hero he truly was, choosing to remain in Hell in order to save the world from a demon horde during the aftermath of the team's battle with the evil Trigon.

ON THE RECORD

Bizarro first appeared as a misunderstood copy of Superboy. Thanks to the Silver Age Luthor, he returned to bedevil Superman, but became a popular humor-oriented adversary of the Man of Steel. He even had his own comedic series in *Adventure Comics*.

However, the bludgeoning beast revived in the 1980s was far from funny. An anti-Superman weapon created by Luthor, he self-destructed in combat, but returned three more times. The longest-lived version of Bizarro was created by The Joker using Mr. Mxyzptlk's purloined magic as the 21st century began.

A MIRROR CRACK'D
Each iteration of Bizarro was more tragically misunderstood than malign, but his overwhelming power and limited intellect always made him dangerous.

WORK IN PROGRESS
When he was forced to curtail B-0's gestation, Luthor had no idea how powerfully his experiment would affect his own feelings and conscience.

These include Shazam opening the predatory Magic Lands, Sivana and Mister Mind's revival of the Monster Society of Evil, and Billy's infection with toxic Dark Matter and transformation into evil King Shazam.

Four thousand years ago, the wizard Shazam granted noble Kahndaqi youth Aman the gods' power to avenge his family and save his oppressed people. The selfless boy requested the power be shared with his dying uncle, Teth-Adam. It was a fatal mistake. Adam killed Aman, liberated Kahndaq, captured the infernal Seven Sins, and slaughtered the Council of Eternity before Shazam finally imprisoned him.

When scientist Thaddeus Sivana opened Black Adam's tomb in modern times, the furious immortal immediately targeted young Billy Batson, who had recently inherited Shazam's mantle and powers, which he felt were his by right. AFFILIATIONS Team 7, Birds of Prey, Justice League of America

KICK START

The young Dinah was taken in and trained in martial arts by the master Desmond Lamar. She would eventually inherit his dojo.

Black Canary has been many things—black ops agent, fugitive, Super Hero, and rock star. She has trained with some of the best martial artists in the world, and her “canary cry” gives her an edge in combat. She was a key member of Team 7 and later founded the Birds of Prey, fighting alongside Batgirl. She has also been a member of the Justice League of America.

Dinah Drake raised herself on the streets of Gotham City after being abandoned by her mother. Martial-arts teacher and ex-special forces agent Desmond Lamar took her in and became a father figure to the ten-year-old Dinah. He trained her in martial arts and she eventually inherited his dojo.

As an adult she joined the cover special ops unit Team 7, where she met and married Kurt Lance, who was seemingly killed on a mission. After leaving government work behind, Dinah was recruited by Oracle, the former Batgirl who had been paralyzed from the waist down. Black Canary served as her

field operative, and the pair became known as the Birds of Prey. When Batgirl regained the use of her legs, Dinah remained good friends with Barbara despite mostly ceasing their Birds of Prey activities.

Seeking a new challenge, Dinah formed a band—calling herself D.D.—and was soon fronting a new group called Black Canary. While in Seattle, Black Canary crossed paths with Green Arrow (Oliver Queen), and the two worked together to stop a slavery ring run by the villainous Auctioneer. They discovered that the conspiracy went deeper than they first imagined and it led to a clandestine Super-Villain-backing organization called the Ninth Circle. Black Canary stayed in Seattle to combat this threat, and she and Green Arrow fell in love. Despite the hectic pace of her life, Dinah found the time to serve in a new incarnation of the Birds of Prey as well as with the Justice League of America.

Eventually, when her old contacts in the government pitted her against Green Arrow, she and Ollie parted ways. Dinah returned to Gotham City, continuing her heroic mission, albeit feeling a little directionless.

ON THE RECORD

Before the reality-changing events of *Flashpoint*, Dinah Lance was the daughter of the original Black Canary, who had been a hero in the 1940s and a member of the Justice Society Young. Dinah had a superpower her mother had lacked—her “Canary Cry”—and she was taught to fight by Ted Grant (Wildcat in the Justice Society). She gained a new outfit (without her iconic fishnets) slightly before she joined the Justice League International. Her long, tempestuous relationship with Oliver Queen (the Green Arrow) eventually led to their marriage.

SIDE-BY-SIDE

Black Canary and Green Arrow formed a long-running crime-fighting partnership.

BLACK GLOVE, THE

DEBUT *Batman* (Vol. 1) #667 (Aug. 2007)

MEMBERS Dr. Simon Hurt, Jezebel Jet, Cardinal Maggi, Al-Khidr, Sir Anthony, General Malenkov, Senator Vine

The Black Glove was a criminal organization formed by Thomas Wayne (related to, but not Bruce's father) in the 1700s and later led by Dr. Simon Hurt, who used the group to target Batman. Its membership comprised wealthy men and women; but its connections ran through all levels of society, from the actors the group used in their schemes through to high-ranking officials.

The group came close to defeating Batman and driving him insane before the Dark Knight and his allies defeated them, and Hurt was seemingly killed in a helicopter explosion. The Black Glove were counting on the fact that even if their scheme failed, Batman wasn't a killer. However, they overlooked his links to Talia al Ghul. Within six months, Talia's League of Assassins had eliminated most of the Black Glove's members.

BLACK HAND

DEBUT *Green Lantern* (Vol. 2) #29 (Jun. 1964)

REAL NAME William Hand

BASE Ryut, Sector 666; Coast City

HEIGHT 5ft 7in **WEIGHT** 165 lbs

EYES Brown **HAIR** Black

POWERS/ABILITIES Black power ring can reanimate the dead and steal energy by killing victims and tearing out their hearts.

ALLIES Nekron

ENEMIES Green Lantern (Hal Jordan), Green Lantern Corps

William Hand was raised in a funeral parlor and was obsessed with death. Nekron, Lord of the Unliving, chose the boy as his avatar. He whispered to him, slowly driving him insane. Hand killed his parents, took his own life, and was reborn as a Black Lantern. Soon he commanded a vast army of the risen dead called the Black Lantern Corps.

During *Blackest Night*, the Green Lanterns and other Corps fought Nekron and the Black Lanterns as they tried to destroy the White Entity. Hand was defeated and returned to life by the White Entity. Taken in by the Indigo Tribe, he then escaped and killed himself. A black power ring emerged from his body and he was raised from the dead as a Black Lantern.

Seeking revenge, he replaced his own hand with that of Green Lantern Hal Jordan's dead father, swearing to kill Jordan with his father's own hand. He failed, and Jordan imprisoned him in the Source Wall at the end of the universe.

ON THE RECORD

Black Hand may be one of the Green Lantern's deadliest foes, but it wasn't always that way. The original Black Hand was a minor Green Lantern villain who would sometimes break the fourth wall to talk directly to the reader.

Shortly before Hal Jordan's "rebirth" as a Green Lantern, The Spectre (then Jordan) turned one of the villain's hands to coal dust as punishment when he tried to steal Hal's green power ring from the Green Arrow.

PRELUDE TO BLACKEST NIGHT Death-obsessed William Hand was the doorway to absolute darkness for the demonic alien Atrocitus. After using Atrocitus' cosmic rod to take his own life, Hand rose from the dead to become the grimmest reaper of all.

BLACK LANTERN CORPS

DEBUT *Green Lantern* (Vol. 4) #25 (Jan. 2008)

BASE Ryut, Sector 666

POWERS/ABILITIES Members are the reanimated dead, able to infect the living with their bite and regenerate damaged flesh; they recharge their central power battery by removing the hearts from their victims.

ENEMIES Green Lantern (Hal Jordan), Lantern Corps across the Emotional Spectrum, Justice League of America, Titans

AFFILIATIONS Nekron, Black Hand

The Black Lanterns are an undead army, brought back to the land of the living by Nekron, Lord of the Unliving, to wage war against the various Corps of the Emotional Spectrum. They use black power rings, which reanimate the dead and also symbolize the absence of emotion and life. Using Black Hand as his avatar, Nekron unleashed a full-on assault on Earth with countless numbers of the dead—including many heroes—returning as Black Lanterns.

Black Lanterns often sought to consume the hearts of those who cared for them most—this emotional pain helped to empower Nekron. While the Black Lantern Corps was defeated during *Blackest Night*, Black Hand subsequently returned as his master's avatar on several occasions, each time threatening to bring more death and destruction into existence. Even Green Lantern Hal Jordan briefly became a Black Lantern, when the path seemed to be the only way to defeat Volthoom, the First Lantern. Hal raised an army of the undead and even Nekron himself before defeating Volthoom. He was then returned to life by a Green Lantern power ring.

ON THE RECORD

While Black Hand was the first member of the Black Lantern Corps, others soon followed. Among them were a number of long-dead heroes, including Elongated Man and Sue Dibny, Hawkman, Hawkgirl, and Aquaman. The Black Lanterns often attacked those closest to them to gain greatest impact from their deaths. The dead parents of both Tim Drake (Robin) and Dick Grayson (Batman) returned as Black Lanterns, as did the clone of Bruce Wayne.

DARKEST KNIGHT Batman's clone was raised from the dead as a Black Lantern.

DATA

DEBUT *Black Lightning* #1 (Apr. 1977)

REAL NAME Jefferson Pierce

BASE Gotham City and Metropolis

HEIGHT 6ft 1in **WEIGHT** 200 lbs **EYES** Brown **HAIR** Black

POWERS/ABILITIES Olympic-level athlete; creation and control of lightning and electromagnetic fields, which also allow for simulated flight.

ALLIES Batman, Peter Gambi, Katana, Amberjack, Anissa Pierce, Lynn Stewart, Blue Devil

ENEMIES Tobias Whale, Rā's Al Ghūl, White Thunder, Ishmael

AFFILIATIONS The Outsiders

ELECTRIC POWERHOUSE Thanks to his Olympic training, Black Lightning is in peak physical condition. He can also generate and manipulate electricity at will.

CHOOSING THE RIGHT TEAM Black Lightning led The Outsiders and successfully defeated Rā's Al Ghūl's latest attack. Jefferson rejected Rā's when the notorious eco-terrorist asked Black Lightning to join his cause.

Former Olympic decathlete Jefferson Pierce spends his life as an educator. By day, he teaches kids as a principal in Metropolis. At night, he becomes the vigilante Black Lightning, helping to prepare the next generation of heroes to fight for justice as the field leader of The Outsiders.

Jefferson Pierce was born in Cleveland, Ohio, the son of newspaper reporter Louis Pierce. He was a tremendous athlete and even won an Olympic gold medal for decathlon. When Jefferson decided to become the Super Hero Black Lightning in order to protect his under-served neighborhood, he began training with a former Super-Villain named Amberjack. Another of his childhood mentors, Peter Gambi, designed a special suit for him to help him focus his metahuman lightning powers against any threat.

For a brief time, Jefferson lived in Los Angeles and taught at the city's Grassland High School. There he met and teamed with Blue Devil, and the two successfully brought down the criminal Tobias Whale. Sometime later, Black Lightning joined Batman's strike force, The Outsiders, but the experience was less than a positive one for Jefferson.

Black Lightning later learned that the "Tobias Whale" he had originally fought was the nephew of the true Tobias, who had killed the pretender and proceeded

to rule over the streets of Cleveland. Jefferson returned to the "Brick City" and took a job teaching at John Malvin High School. There he brought the "real" Tobias Whale to justice, although Whale then escaped, switching places with his shape-shifting assistant at the last minute.

Seemingly always on the move, Pierce was working as a principal in Metropolis when he was approached by Batman to lead another team of Outsiders. Reluctant to work with Batman again, Black Lightning nevertheless set up shop in a penthouse apartment in Gotham City's Kubrick Towers thanks to Bruce Wayne's pocketbook, but he also continued to work in Metropolis. When Rā's Al Ghūl bombed Jefferson's school for payback for The Outsiders interfering in one of his terrorist plans, Jefferson swore to even the odds. With his powers enhanced and amplified thanks to Wayne Industries tech, Black Lightning and The Outsiders stopped Rā's from using an alien electromagnetic weapon in his quest for world domination.

ON THE RECORD

Black Lightning was DC's first African-American hero to have his own solo series. Jefferson Pierce was a teacher at Garfield High School in Metropolis' notorious Suicide Slum. Pierce tried to clear out mob-connected drug pushers from his school and was driven to vigilantism as Black Lightning after one of his students was murdered by Tobias Whale and the crime organization, the 100.

Pierce didn't realize the full extent of his powers until his first term of duty with The Outsiders when a latent metagene enabled him to internalize and amplify his lightning powers. Previous to that, he used an electronic belt to generate shock attacks and disguised himself using a costume created by his childhood mentor, tailor Peter Gambi.

NEIGHBORHOOD WATCH Black Lightning defended the inhabitants of Metropolis' Suicide Slum, keeping them safe from drug dealers.

DEBUT *Aquaman* (Vol. 1) #35 (Sep.–Oct. 1967)

REAL NAME David Milton Hyde **BASE** Mobile

HEIGHT 6ft 2in **WEIGHT** 205 lbs

EYES Black **HAIR** Bald

POWERS/ABILITIES Engineering and technological expertise; skilled with knives; armored suit tailored for underwater use; enhanced strength; energy blasts projected from helmet's lenses; access to advanced technology.

ALLIES Black Jack, Lex Luthor

ENEMIES Aquaman, the Others, Aqualad, Mera

AFFILIATIONS Secret Society of Super-Villains, Suicide Squad, Legion of Doom, N.E.R.O.

VIOLENT OBSESSION

From the outset, Black Manta was driven by a homicidal mania for revenge against Aquaman.

Prone to violence from childhood, Black Manta was driven by an obsessive hatred for Aquaman and a desire to avenge the killing of his father. He devoted his adult life to killing the King of the Seven Seas and destroying everything he cared about, whether his family or the kingdom of Atlantis itself.

David Hyde swore revenge on Aquaman after the Atlantean king accidentally killed his father following Manta's attack on Aquaman's own father, Tom Curry. Possessing a variety of hi-tech devices and weapons—though he favored a pair of long daggers—he became an accomplished treasure hunter as Black Manta. He stole Atlantean artifacts, including an enchanted scepter, for the traitorous Atlantean Vulko, who planned to use it to resurrect the Dead King. Defeated by Aquaman and the Others while delivering the scepter, Black Manta dared Aquaman to kill him. Despite his desire to avenge his dead friends, Aquaman refused.

Black Manta was imprisoned in Belle Reve and eventually fought alongside the Suicide Squad. Some time later, after attacking an Atlantean embassy in Massachusetts, Black Manta was recruited by the Fisher King, Black Jack, and the clandestine criminal group called N.E.R.O. Black Manta immediately killed the Fisher King and took his place. N.E.R.O. then attacked Atlantis directly, using the powerful beast known as the Shaggy Man. Black Manta successfully framed Atlantis for aggressions against the United States, but N.E.R.O. was eventually discovered and defeated by Aquaman.

As part of his deal with the newly formed Legion of Doom, Black Manta teamed with the Triumvirate of Sea Gods—three ancient water gods from far-off worlds. They flooded the globe, but before they could see the error of their ways, Manta turned on both the Legion of Doom and the Triumvirate in an attempt to seize power for himself. However, his plot backfired and once again Aquaman foiled his plan.

On a quest for yet more power, Black Manta accepted a gift from Lex Luthor in the form of the monstrous robot Mecha Manta. But his hi-tech attack failed thanks to the combined powers of Aquaman and Mera, although Mera became briefly comatose after the assault.

ON THE RECORD

Earlier versions of Black Manta revealed slightly more of the character's origin, telling the story of a boy kidnapped and forced into abusive servitude aboard a ship. Spotting Aquaman, he signaled for help, but when the hero did not see him, the boy grew to hate him and the sea he represented. This led to him creating the Black Manta persona and a deadly arsenal of marine weapons and vehicles.

Black Manta's uncontrollable rage ultimately caused the death of Aquababy, turning a one-sided obsession into a mutual blood feud. Ultimately Aquaman defeated the villain, but refused to compromise his ideals by exacting vengeance. This act further enraged Black Manta and he went on to sell his soul to the demon Neron.

DEATH OF AQUABABY

The infant son of Aquaman and Queen Mera, Arthur Curry, Jr. was murdered by Black Manta and buried at Mercy Reef.

THE APPLE FALLS FAR

Black Manta's son, Jackson Hyde, is nothing like his father. He adopted a heroic lifestyle as Aqualad and even served on the Teen Titans.

CLASSIC STORIES

***Aquaman* (Vol. 1) #35 (Sep.–Oct. 1967)** Black Manta's attempt to kidnap Aquababy is thwarted when the Ocean Master frees the baby from Black Manta's ship.

***Adventure Comics* (Vol. 1) #452 (Aug.–Sep. 1977)** Black Manta forces Aquaman and Aqualad to fight each other to the death, or Aquababy will die in a globe filled with air. Aquaman shatters the globe, but too late to save his son.

***Brightest Day* #19–20 (Apr. 2011)** Black Manta goes hunting for his son, Jackson Hyde, who has been protected by Mera since infancy. He battles Aquaman and Jackson, before Mera seals Manta away in the Bermuda Triangle.

DEADLY PREDATOR

In his water- and pressure-resistant suit, Black Manta can hunt Aquaman relentlessly throughout the undersea realms.

BLACK MASK

DEBUT *Batman* (Vol. 1) #386 (Aug. 1985)
REAL NAME Roman Sionis
BASE Gotham City
HEIGHT 6ft **WEIGHT** 165 lbs
EYES Brown **HAIR** None
POWERS/ABILITIES Skilled combatant and marksman; mask enables mind-control.
ALLIES Dr. Jeremiah Arkham
ENEMIES Batman, Catwoman, Mad Hatter

Criminal Roman Sionis carved his signature black mask from his father's coffin. It gave Sionis the ability to control others, and he started his own gang, the False Face Society. While incarcerated in Arkham Asylum, Sionis was separated from his mask, but when the Talons of the Court of Owls attacked the asylum, its director, Dr. Jeremiah Arkham, gave it back so that Black Mask could protect him. In the event, Black Mask used the mask to escape.

He then battled the Mad Hatter, who wanted the power of the False Face Society's masks for himself. Batman cracked the mask with a well-aimed kick, driving Black Mask/Sionis insane. He was returned to Arkham Asylum, but was soon broken out. He joined the Secret Society when the Crime Syndicate invaded Earth, and later set his sights on ruling Gotham City's underworld, but clashed with Catwoman.

BLACK DEATH
 Consumed by hatred, Black Mask struck at Catwoman from beyond the grave, thanks to a Black Lantern ring.

BLACK SPIDER

DEBUT *Detective Comics* (Vol. 1) #463 (Sep. 1976)
REAL NAME Eric Needham
BASE Belle Reve Penitentiary
EYES Brown **HAIR** Black
POWERS/ABILITIES Amazing reflexes; hi-tech battlesuit equipped with extendable claws; advanced firearms.
ENEMIES Resurrection Man, Amanda Waller, Batman, The Flash

Many criminals have used the codename Black Spider. The most effective is former vigilante Eric Needham. While serving a 60-year term in Belle

Reve Penitentiary, he was selected by Amanda Waller for her Suicide Squad—a penal unit of villains secretly working for the US Government. He joined Harley Quinn, Deadshot, King Shark, and El Diablo, and despite a severe spinal injury, earned a stellar reputation. Waller even offered to free him, but he elected to stay. Needham had ulterior motives: he had been inserted into Belle Reve by the Basilisk organization to infiltrate the Suicide Squad and kill Waller. He failed and was captured by his teammates. He is now a freelancer, robbing banks and chasing bounties, facing Batman and The Flash, and losing every time.

BLACK ORCHID

DEBUT *Adventure Comics* (Vol. 1) #428 (Jul.-Aug. 1973)
REAL NAME Alba Garcia
EYES Brown **HAIR** Black
POWERS/ABILITIES Her link to the Red and the Green gives her shape-changing abilities that make her a master of disguise.
ALLIES Dr. Mist, A.R.G.U.S., Animal Man
ENEMIES Felix Faust, the Demons Three, Nick Necro
AFFILIATIONS Justice League Dark

Private Alba Garcia was given superpowers by A.R.G.U.S.'s Project Ascension that linked her to the primal forces the Green and the Red. As shapeshifter Black Orchid she joined occult task force Justice League Dark, helping to keep the Books of Magic from sorcerer Felix Faust, traveling to the World of Epoch, and spearheading a magical rebellion to free the world from the Network.

In this realm, she became a Swamp Thing-like monster, but fought the malevolent Rot with Animal Man. When the Crime Syndicate invaded Earth, she was captured and used to power the Thaumaton weapon. Rescued by Justice League Dark, she got involved in the terrifying war between the House of Mystery and the House of Secrets. When the goddess Hecate tried to rewrite the Laws of Magic, she used Alba as one of her five deputies: a possessed weapon which replaced the ancient Parliament of Trees with the predatory Parliament of Flowers.

ON THE RECORD

The original Black Orchid was a mistress of disguise who used her powers to fight crime. She was once a human called Susan Linden-Thorne, but when her husband killed her, the botanist Philip Sylvain used her DNA to create a human/plant hybrid.

The heroine was killed while investigating LexCorp, but two other plant/human hybrids with her DNA survived and continued the Black Orchid legacy.

DEADLY BLOSSOMING
 After being murdered, Linden-Thorne returned as a human/plant hybrid that drew power from the Green, the force created by all plant life on Earth.

BLACKBRIAR THORN

DEBUT *DC Comics Presents* (Vol. 1) #66 (Feb. 1984)
REAL NAME Blackbriar Thorn
EYES Green **HAIR** None
POWERS/ABILITIES A powerful magician; can create a treelike body around his frail form; controls plant matter and regenerates.
ENEMIES Superman, the Demon, Justice League Dark

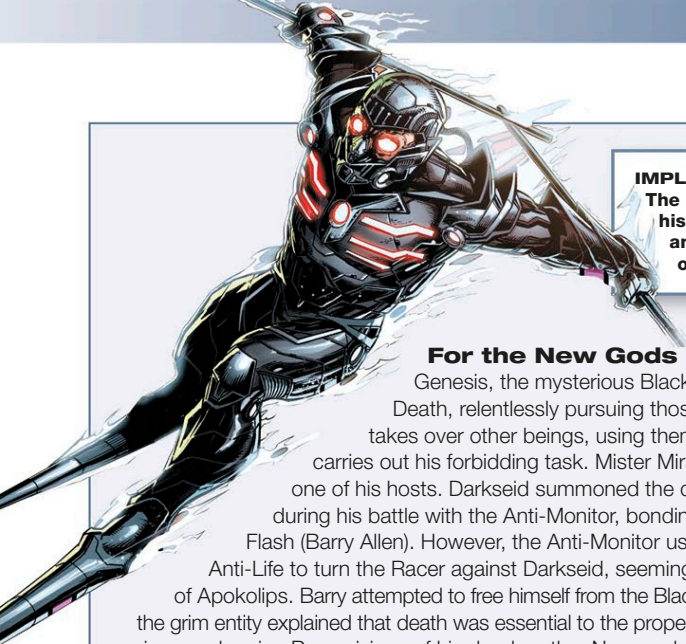

When the Romans invaded Britain, the druid Blackbriar Thorn cast a spell that turned him into a towering, treelike being. Inadvertently buried, he returned

to life in the 20th century after being dug up and exposed to moonlight.

After clashing with Superman and the Demon, Thorn went to live in the Amazon rainforest, where Deadman and Zatanna encountered him. Thorn attacked them, but Deadman possessed him and returned him to human form.

Following this defeat, Thorn allied himself with Felix Faust, Nick Necro, and Dr. Mist against Justice League Dark, but was struck down by Andrew Bennett and turned into inanimate wood. When anti-life force the Rot threatened Earth, Thorn returned and took over Metropolis, but Animal Man defeated him by taking termite form.

IMPLACABLE PURSUIT
The Black Racer chases his prey across time and space to carry out his dark duty.

For the New Gods of Apokolips and New Genesis, the mysterious Black Racer is the avatar of Death, relentlessly pursuing those doomed to die. He takes over other beings, using them as vessels while he carries out his forbidding task. Mister Miracle once served as one of his hosts. Darkseid summoned the deadly Black Racer during his battle with the Anti-Monitor, bonding the Racer with The Flash (Barry Allen). However, the Anti-Monitor used his mastery of Anti-Life to turn the Racer against Darkseid, seemingly killing the dark lord of Apokolips. Barry attempted to free himself from the Black Racer's control, but the grim entity explained that death was essential to the proper functioning of the universe, showing Barry visions of his dead mother Nora and of Central City reduced to a mausoleum. The Flash tried to slay the Racer with his own scythe, but he was subjected to horrifying visions of what would befall the universe if he refused to become an avatar of Death. This convinced Barry to accept his role as the Black Racer's host.

The Flash and the Black Racer were finally separated by the child of Earth-3's Superwoman and Alexander Luthor, who used his father's power-absorption abilities. The Racer then claimed the life of Volthoom before disappearing on his never-ending journey of death.

Kendra Saunders has been a warrior in every life she has ever lived. Constantly reincarnating—usually beside her eternal lover Carter Hall/Hawkman—she has battled human injustice and a countless procession of monsters throughout history. As Shiera Hall, she and her husband Carter transformed the Blackhawks from a freelance foreign legion of mercenary soldiers into a secret multinational strike force able to combat global crises and supernatural incursions. After being reborn as Kendra

Saunders, she took Carter Hall's place when he fell victim to Dark Multiversal horror Barbatos. Leading as Lady Blackhawk, she was ferociously dedicated to saving humanity from itself, and from the threats of the unknown. A brilliant tactician and superb fighter with every kind of weapon, Lady Blackhawk can apply the experience of countless previous lives to any problem.

After Barbatos was defeated, Kendra left the Blackhawks to fight with the Justice League as a new iteration of her old Super Hero persona Hawkgirl.

ON THE RECORD

The post-*Crisis* Blackhawk was Janos Prohaska, a Polish fighter pilot who fought in the Spanish Civil War. Following the fall of Poland, he traveled to the UK, where he became the commander of the secret Allied Blackhawk Squadron. Blackhawk's team stayed together after World War II and battled communists and Super-Villains. They subsequently served as both a courier service (Blackhawk Express) and as part of the Checkmate organization.

FLYING INTO DANGER
Blackhawk led his squadron in thrilling adventures across the globe, where they battled many exotic foes, including the Winged Death cult.

A pampered princess on a paradise world, Bleez was abducted by members of the Sinestro Corps. Abused and tortured for their amusement, she escaped but, filled with overwhelming fury and indignation, she was possessed by a red power ring. This suppressed her intellect, making her an explosive slave to boiling rage, and she joined the Red Lantern Corps.

When a series of cosmic catastrophes forced the Emotional Spectrum groups into tenuous alliances, the Reds' leader, Atrocitus, assigned Bleez to join Green Lantern Kyle Rayner's New Guardians. Dissatisfaction at leading a legion of functional fools compelled Atrocitus to restore her mind. Bleez then became his rival, rising to the top of the Red Lantern Corps, wielding every ring Atrocitus had created. But at the moment of her greatest triumph, she was freed from her obsessive rage and restored to mortal form by Blue Lantern Guy Gardner.

ON THE RECORD

Red ring wearers are filled with a boiling, corrosive napalm-like substance that matches the constant feral fury gripping them. This anger, though invaluable in combat, also clouds the mind.

Eventually Corps founder Atrocitus used shamanistic blood magic to restore the intellect without quelling the rage of his subordinates. His mistake was starting with Bleez, who instantly challenged his authority and began plotting to replace him.

CALM BEFORE THE STORM
Her early life as a princess valued only as "marriage material" made Bleez determined that no one would ever control her again.

BURYING THE HATCHET?

Desmond extends a hand, supposedly of friendship, to his longtime adversary Nightwing. But can he really be trusted?

Crime boss turned casino operator Roland Desmond took on the criminal alias of his imprisoned brother Mark—the mighty Blockbuster. The Desmond brothers possessed a serum that could turn a person into a super-strong, super-resilient monster for a short period of time. Before being imprisoned for his crimes as Blockbuster, Mark managed to tweak the formula so that his brother could maintain his intelligence while in Blockbuster form—a glitch that had allowed Nightwing to defeat the villain previously.

Roland Desmond was a native of Blüdhaven and he appointed himself as protector of the city and its people. This meant that he and Nightwing were able to make an uneasy pact against villains like Raptor who sought to exploit the city, although the hero later used an antidote to take Blockbuster's powers away.

Life for streetwise Harper Row might have ended up very different had Batman not saved her brother Cullen from being beaten in a hate crime. She became

obsessed with helping the Dark Knight. Her first overture was locating the technology he used to avoid surveillance cameras. Improving them, she inserted herself into his cases, but Batman responded with uncharacteristic brutality. He wanted no more brave kids to die. Harper quietly persisted, winning him over by saving his life during his war against the Court of Owls.

Her graduation to costumed crime fighter came when she joined Red Robin in saving Cullen and other kids from the Mad Hatter. Instead of becoming another Robin, Harper created her own masked persona, but her time as Bluebird was limited. Happy-go-lucky Dan made the best of it, becoming a Super Hero and media sensation. He even had—despite all his protests—a sidekick in Kid Devil. However, Cassidy's power came at a cost: his mystical nature attracted wild magic, triggering weird happenings and making him a magnet for disaster.

Cassidy repeatedly saved humanity and the world as a member of teams such as the Justice League and Sentinels of Magic before eventually, joining eldritch super-group Shadowpact to face the darkest horrors the universe could throw at him. Cassidy was even tried by Hell's lawyers for illegally using Nebiros' power and position: a case which ended with him being briefly appointed the Prince of Hell.

Years later, he worked briefly with Justice League Dark. In recent times he has assumed the role of Protector of the magical realm Myrra, following the death of its previous champion, Nightmaster Jim Rook.

ON THE RECORD

Blue Devil was originally a light-hearted, irrepressible adventurer bonded into a mechanical outfit by demonic magic. Cursed to be a magnet for weirdness, he constantly battled against dark magic, but supernatural menaces mutated his form even further.

After *Flashpoint* he was reimagined as a movie performer and last in an ancient line tasked with safeguarding Earth's deadliest supernatural relics. He became Blue Devil after deciding to "borrow" a demonic bodysuit in his safekeeping.

BEAT THE DEVIL

When hell-lord Nebiros came to claim his old skin, he discovered that the empowering outfit preferred to stick with Cassidy.

BLUE LANTERN CORPS

DEBUT *Green Lantern* (Vol. 4) #25 (Jan. 2008)

BASE Odim, Elpis

POWERS/ABILITIES Power rings channel the blue light of Hope, powering flight, intergalactic travel, and self-defense.

CURRENT MEMBERS Saint Walker, Guy Gardner

ALLIES Hal Jordan, Kyle Rayner

ENEMIES Red Lantern Corps, Larfleeze, the Reach

AFFILIATIONS Green Lantern Corps

Following the war between the Green Lanterns and Sinestro Corps, maverick Guardians of the Universe Ganthet and Sayd were banished from Oa. They settled on Odim, building a Central Power Battery to harness the Emotional Spectrum's blue light of Hope. They were soon joined by wanderer Saint Walker, who became their first agent.

Blue rings are primarily defensive. Aggressive capabilities like energy blasts only activate when they are in close proximity to a Green Lantern ring. The same connection automatically boosts an emerald warrior's ring up to 300 percent beyond its normal charge capacity.

Run like an order of monks, Blue Lanterns were recruited slowly, with each new member responsible for finding the next. When Odim was destroyed by the all-conquering Reach, the survivors relocated to Elpis, but were subsequently wiped out in an overwhelming attack by pre-Big Bang villain Relic. With only Saint Walker surviving, it is unlikely the universe will soon hear their comforting oath:

"In fearful day, in raging night,
With strong hearts full, our souls ignite,
When all seems lost in the War of Light,
Look to the stars—for hope burns bright!"

ON THE RECORD

Blue Lanterns made their first appearance saving their Green cousins from attack by Atrocitus' Red Lanterns. They remained a breed apart in the escalating conflicts of the War of Light, but played a major role in turning back the risen dead during the *Blackest Night*.

Sadly, Hope's promise and its azure emissaries' pacifist nature made them easy targets for colonial aggressors the Reach, who decimated their ranks and drove them from their base-world of Odim.

LIGHT IN THE DARKNESS

Despite the increasing chaos and horror of a universe in conflict, Blue Lanterns always clung to the heartfelt belief that "All will be well."

BLUE BEETLE (JAIME REYES)

DATA

DEBUT *Infinite Crisis* #3 (Feb. 2006)

REAL NAME Jaime Reyes

BASE El Paso, Texas

HEIGHT 5ft 8in **WEIGHT** 145 lbs **EYES** Brown **HAIR** Black

POWERS/ABILITIES Magical sentient Blue Beetle armor provides protection, boosts physical capabilities, and can create blades, energy weapons, wings, or thrusters at will; onboard systems include sensors, life support, and a universal translator.

ALLIES Paco Testas, Brenda Del Vecchio, Blue Beetle (Ted Kord), OMAC

ENEMIES La Dama, Mordecai, Arion, Ghostfire

When Jaime Reyes stumbled upon a mysterious artifact that transformed him into a bio-armored hero, he became the latest champion to carry the name Blue Beetle. Continuing the legacy of Ted Kord, Jaime found himself thrust into the role of hero—with both magic and Ted Kord helping him along the way.

Teenager Jaime Reyes and his friends Paco and Brenda were hanging out by a river on the day before their senior year of high school when Paco noticed a blue glint in the water. Paco waded out to see what it was and discovered a small beetle-like object that stung his hand and began glowing. When Brenda tried to grab it from Paco to save him, the Scarab exploded into a brilliant beetle-shaped light show, and Jaime found the object merging with his spine and coating him in bizarre blue armor. Jaime turned to industrialist Ted Kord for help and the inventive young billionaire jumped at the chance to learn more. As fate would have it, Ted had seen the Scarab before. His former next-door neighbor, archeologist Dan Garrett, had brought the ancient artifact home from a dig. The shiny blue treasure had inspired Ted—who happened to be a blossoming Super Hero—into naming himself the Blue Beetle. Ted later retired from crime fighting due to a heart condition, while the artifact led to Dan's death, causing him to nearly lose his mind with its relentless "whispers."

With the Scarab now a part of him, Jaime had no choice but to embark on a life as a Super Hero, with Ted Kord serving as his right-hand man from the safety of Ted's mobile Bug vehicle. The pair soon learned that the Scarab had been a magical power source as early as Ancient Egypt and had corrupted Arion, the Lord of Atlantis himself. When Arion returned and took back the power of the Scarab, Jaime managed to eventually reclaim it. He realized just how special his link was to this ancient artifact of power and he even began to enjoy life as a hero every now and then.

HYBRID

When Jaime Reyes bonded with the Scarab, he was transformed into a symbiotic armored being that could deploy guns, wings, blades, or jets on command. He had gone from ordinary teenager to living weapons system.

THE BUG

Ted Kord invented his own mobile Batcave of sorts, in the flying vehicle called the Bug. It allows Kord to monitor Jaime's adventures from nearby in the sky.

"No! I don't wanna kill ANYONE!"

JAIME REYES

CLASSIC STORIES

***Infinite Crisis* #1-7 (Dec. 2005-Jun. 2006)** When Jaime Reyes finds the Scarab, Booster Gold recruits him to help attack the Brother Eye satellite during the Multiverse-shaking *Infinite Crisis* event.

***Blue Beetle* Vol. 8 #22-25 (Feb.-May 2008)** Jaime discovers an insidious Reach plot to enslave humanity and leads an attack on the alien mothership.

***The New 52: Futures End* #0**

(Jun. 2014) In this grim tale of an alternate future, Jaime rebels against the all-seeing Brother Eye, but is captured and brutally assimilated into the AI's collective.

MIND OF ITS OWN

The Scarab has its own goals and thoughts, even once taking Jaime on an unwanted trip while he was sleeping.

ON THE RECORD

The Silver Age Blue Beetle was Daniel Garrett, a brave archaeologist who found a glowing scarab in the tomb of the pharaoh Kha-Ef-Re. When Dan was mortally wounded, he gifted the magical Scarab to Ted Kord, who could never get it to work. However, during the *Infinite Crisis* event, the Scarab grafted to Jaime's back and he became the third Blue Beetle. At this point, the Scarab was retconned to be a creation of the alien Reach that had been affected by the magical energies in the tomb of Kha-Ef-Re.

DAN GARRETT

Daniel Garrett served as the Blue Beetle before Ted Kord and Jaime Reyes. He would say magic words to access the Scarab's powers.

BLUE BEETLE (TED KORD)

DATA

DEBUT *Captain Atom* #83 (Nov. 1966)

REAL NAME Theodore Kord **BASE** El Paso, Texas

HEIGHT 5ft 11in **WEIGHT** 190 lbs **EYES** Blue **HAIR** Brown

POWERS/ABILITIES Genius-level inventor; skilled acrobat and fighter; access to the Kord Industries fortune; armed with an array of hi-tech gadgets including a light- and air-projecting BB gun; operates the Bug, a flying beetle-like mobile headquarters.

ALLIES Booster Gold, Blue Beetle (Jaime Reyes), The Flash (Teri Magnus), Batman, Batgirl, Justice League

ENEMIES Madmen, Maxwell Lord, Black Mask

AFFILIATIONS T-Council

A genius inventor and a comedic genius only in his own mind, billionaire industrialist Ted Kord moonlights as the wisecracking Blue Beetle. Armed with gadgets and a flying hi-tech vehicle called the Bug, Ted possesses no superpowers aside from his need for adventure and a near-superhuman level of camaraderie with his best bro, Booster Gold.

Ted Kord had too much money and not enough purpose in his life. The heir to his father's fortune, Ted was a brilliant inventor with all the means but none of the reasons to use his talents. Inspired by Superman and Batman, Ted designed himself a nondescript Super Hero suit. However, he only came up with a moniker after his neighbor, archeologist Dan Garrett, showed him the fruits of one of his digs—a blue scarab. Calling himself Blue Beetle, Ted sought out adventure armed with an arsenal of nonlethal weapons and gadgets, including his iconic aerial vehicle the "Bug."

Ted soon found friendship with Booster Gold, and the two became known as Blue and Gold, legendary crime fighters—at least according to them. After experiencing heart troubles, Ted was forced to retire from most of his active Super Hero exploits. However, he continued to work behind the scenes as the tech partner to his replacement Blue Beetle, Jaime Reyes.

In that capacity, Ted helped Jaime battle the threat of the corrupted mage Arion and a handful of Super-Villains. Kord donned his own Blue Beetle costume again when Booster Gold was suspected of murder and wanted by the Justice League. The Flash (Wally West) had accidentally unleashed his powers and killed several heroes at the secret Super Hero therapy center called the Sanctuary, but Booster was believed to be the culprit. Blue Beetle immediately jumped to his buddy's defense.

However, Booster didn't get the opportunity to return the favor when Kord was kidnapped by the villain Black Mask. In a scheme to establish a new country, Black Mask took on Kord's appearance and used his wealth and influence to take over Task Force X, also known as the Suicide Squad. Black Mask was eventually stopped by a group of Suicide Squad members, who used to go by the name the Revolutionaries, and Kord was freed.

KORD-LESS

When Jaime Reyes, Ted's successor as Blue Beetle, briefly lost his powers, Jaime adopted Kord's old Beetle costume to reclaim the Scarab and stop the corrupted Arion.

CLASSIC STORIES

Blue Beetle #1 (Vol. 7) (Jun. 1986)

Ted Kord leaps into action, beginning his post-*Crisis* adventures.

Justice League America #34

(Jan. 1990) Blue Beetle and Booster Gold scheme their way into opening a casino using the Justice League's name on the resort of the island of KooneyKooneyKooney, with disastrous results.

Countdown to Infinite Crisis #1

(May. 2005) Blue Beetle investigates Checkmate and is shot and killed by Maxwell Lord.

BACK IN ACTION

Although a heart attack forced him to retire, Ted still helped Jaime during a few battles, using his BB guns and a beetle drone backpack.

BEETLE MANIA
Despite lacking any superpowers, Ted Kord took to the heroic life with gusto, quickly making a name for himself with his sense of adventure, quick wit, and steadfast bravery.

ON THE RECORD

Ted Kord was not the first Blue Beetle, and he wasn't the last. The middle child of the Blue Beetle legacy, Ted was nevertheless the smartest person to ever fill the role. Before the events of *Flashpoint*, Ted adopted the mantle of Blue Beetle from the original Beetle, Daniel Garrett.

As a nonpowered Super Hero, Ted rose to fame in the pages of *Justice League International*, where his high jinks with Booster Gold even saw the two attempt to create their own casino on a tropical island.

However, during one of the tragic events leading to *Infinite Crisis*, Ted was shot and killed by Maxwell Lord. The role of the Blue Beetle was then passed to teenager Jaime Reyes.

LORD OF EVIL

When Blue Beetle investigated Checkmate, he met his grisly—and seemingly final—fate.

CLASSIC STORIES

***Booster Gold* (Vol. 1) #8-9**

(Sep.-Oct. 1986) Michael Carter makes his mark as a Super Hero by saving President Reagan—who inadvertently gives the hero his codename!

***The OMAC Project* #1-6 (Jun.-**

Nov. 2005) Booster Gold goes in search of his missing best friend, Ted Kord—and is devastated when he finds out he has been murdered.

***Convergence: Booster Gold* #1**

(Jun. 2015) In this time-twisting adventure, Booster meets Rip Hunter, the son of the pre-Flashpoint incarnation of Booster himself!

BROS BEFORE HEROES
When Booster was framed for murder while at the superhuman recovery center Sanctuary, his best friend Blue Beetle never once doubted his buddy's innocence.

After making a mess of his life in the future, disgraced sportsman Michael Carter decided to make a new career in the 21st century as the hero Booster Gold. Though he loves a photo opportunity and a lucrative advertising deal, the brash and charming Booster is secretly the most important hero you've never heard of. He travels through time correcting the time stream while maintaining his cover story of a Super Hero sellout.

Michael Carter was born in the 25th century and grew up in an abusive home in Gotham City, dreaming of fame and fortune. After earning a football scholarship, brash and handsome Carter became a sports star, but he lost everything after taking money to fix matches. After being caught and serving his time in jail, he could only find work as a security guard at the Space Museum.

Inspired by the museum's exhibits about 21st-century Super Heroes, Carter decided to go back in time to become a champion of justice—and get money and fame along the way. He helped himself to a suit, various hi-tech gadgets, and a security

bot called Skeets from the museum. Then he used a time machine that once belonged to chrononaut Rip Hunter and traveled back to the 21st century.

Carter used his futuristic gadgets and flair for showmanship to build a reputation as the hero Booster Gold. However, Booster was treated as something of a joke by other heroes because he also made money from commercial endorsements—he even appeared in beer commercials! Nevertheless, he managed to do some good as a member of the Justice League International. While that team was short-lived, Booster's true career was not. When not starring on his own Go-Tube channel, Booster was saving the Multiverse on time-spanning adventures, using his celebrity as a cover story. Recently, he time traveled with Superman to help repair a damaged timeline on Krypton.

In his private life, Booster hangs out with his best friend in any timeline, Blue Beetle (Ted Kord). He also sparked a brief romantic relationship with the rather unbalanced Harley Quinn, which will surely be another good decision to add to his resume.

ON THE RECORD

In his pre-Flashpoint career, Booster served as a key member of many super-teams and stood in the front line during several cosmic events that reshaped the universe.

Booster really made his mark when he joined the Justice League International. He met Blue Beetle (Ted Kord) and they became best friends. Booster was devastated when Kord was murdered, and in *The O.M.A.C. Project*, he tracked down the killer—Maxwell Lord. Booster later joined Rip Hunter as one of the Time Masters. As a chrononaut, he could cross over to the post-Flashpoint universe.

FAMILY TIME
When Michael joined the enigmatic Rip Hunter in the Time Masters, he had no idea that he was actually working with his future son.

THE FACE THAT LAUNCHED A THOUSAND COMMERCIALS
Booster Gold combined courage with a flair for self-promotion and proudly endorsed companies that paid him enough!

BOLT

DEBUT *Blue Devil* #6 (Nov. 1984)
REAL NAME Larry Bolatinsky

POWERS/ABILITIES Teleportation; energy blasts; expert assassin and special-effects coordinator.
ALLIES Deadshot, Merlyn, Chiller, Deadline
ENEMIES Sideways, Blue Devil, Batgirl, Captain Atom
AFFILIATIONS Killer Elite, Suicide Squad

Bolt is a former special-effects expert who moved into the world of freelance killing. As a top-ranked mercenary assassin he has faced foes as diverse as Blue Devil, Captain Atom,

and Starman. Bolt demands a high price, despite many failures to complete his contracts. At one point, he joined a group of assassins called the Killer Elite, which included Deadshot and Merlyn. Then he served briefly on the Suicide Squad.

Eventually, Bolt was killed by his son, Dreadbolt, who continued his father's legacy as a member of the Terror Titans. Bolt briefly returned as a member of the undead Black Lantern Corps, and was fully resurrected after *Flashpoint*. Resuming his trade, Bolt worked for the villain Knightfall and later with Dark Star Sciences CEO Leto Dominus as she sought to capture and exploit the powers of the new teen hero, Sideways.

BOODIKKA

DEBUT *Green Lantern* (Vol. 3) #20 (Jan. 1992)
HEIGHT 5ft 8in
WEIGHT 125 lbs
EYES White
HAIR Black
POWERS/ABILITIES Ability to overcome great fear; expert fighter and hand-to-hand combatant; weapons include Green Lantern ring.
ALLIES Chaselon, Kilowog
ENEMIES Star Sapphire, Flicker, Cyborg Superman, Doomsday

A natural fighter with no qualms about showing off her skills, Boodikka hailed from the planet Bellatrix. After working as a member of the mercenary group

Bellatrix Bombers, Boodikka joined Green Lantern Corps. With her aggressive attitude and problem with authority figures, she initially had a difficult time fitting in at the Corps, but she proved her worthiness in battle.

When Hal Jordan was corrupted by the being Parallax, Boodikka fought him, but had her hand severed by him in the process. After a brief time spent as a member of the Brotherhood of the Cold Flame, she was promoted into the Alpha Lanterns, a police force within the Green Lantern Corps. After valiant fights with villains including Cyborg Superman and Doomsday, Boodikka was killed by the Alpha Lantern Varix.

BORDEAUX, SASHA

DEBUT *Detective Comics* (Vol. 1) #751 (Dec. 2000)
BASE Washington D.C.; The Castle, Swiss Alps
HEIGHT 5ft 7in **WEIGHT** 135 lbs
EYES One red, one blue **HAIR** Black
POWERS/ABILITIES Expert bodyguard; highly adept martial artist; enhanced strength and speed.
ALLIES Wonder Woman, Etta Candy, Steve Trevor, Batman, Mr. Terrific, Jessica Midnight
ENEMIES Doctor Cyber, Maxwell Lord, David Cain
AFFILIATIONS A.R.G.U.S., Checkmate

Sasha Bordeaux was a bodyguard who came to lead some of the world's most powerful spy organizations. She first entered Bruce Wayne's life

when Lucius Fox assigned her as his bodyguard. Although Bruce initially kept her at arm's length, she soon discovered his secret and was allowed into Batman's life, adopting a mask and assisting on missions.

When Wayne was framed for murder, Bordeaux was sentenced to jail as his accomplice. Here she was recruited by spy agency Checkmate, quickly rising to be its Black Queen. Her body was augmented by O.M.A.C. technology, effectively changing her into a cyborg. She later became Director of A.R.G.U.S., where she was kidnapped by rival covert group Godwatch. Replaced with an android, Bourdeaux was eventually rescued by Commander Etty Candy.

BOUNCING BOY

DEBUT *Action Comics* (Vol. 1) #276 (May 1961)
REAL NAME Charles Foster Taine
BASE Legion Headquarters, New Earth
HEIGHT 5ft 8in **WEIGHT** 227 lbs
EYES Blue **HAIR** Brown
POWERS/ABILITIES Can inflate to shape of large, bouncing ball; invulnerability to impact trauma; advanced combat training; possesses Legion flight ring.
ALLIES Legion of Super-Heroes
ENEMIES Horraz Collective

Growing up on the free-floating bubbled enclaves constituting Earth in the 31st century, young prodigy Charles Taine is a Doctor of Metaphysical

Gateway Sciences and a forthright critic of the United Planets organization. A level 8 meta, he can super-inflate his body into an invulnerable globe, propelling his form with devastating accuracy at super-velocities. After much practice he also developed an innate understanding of vectors, trajectories, and direction.

He initially refused when invited to join the UP-sponsored, Legion of Super-Heroes, but reconsidered after assurances that the team's purpose was to fix as much as defend the United Planets. Easy-going and unassuming he rejected dramatic, imposing codenames such as Bullet or Battle Ball, for the milder designation Bouncing Boy.

BRADLEY, SLAM

DEBUT *Detective Comics* (Vol. 1) #1 (Mar. 1937)
REAL NAME Samuel Emerson Bradley
BASE Gotham City
HEIGHT 6ft 1in **WEIGHT** 205 lbs
EYES Gray **HAIR** Dark Brown (with gray temples)
POWERS/ABILITIES Excellent brawler and hand-to-hand combatant; expert marksman; adept detective with decades of experience; possesses a particular talent for disguise and mimicry for undercover work.
ALLIES Catwoman, Sam Bradley, Jr., Holly Robinson, Superman
ENEMIES Black Mask
AFFILIATIONS Gotham City Police Department (formerly)

Slam Bradley hails from Cleveland, Ohio, but has spent most of his time in two of the United States' most famous cities—Gotham City and Metropolis. He earned his nickname on the streets of Cleveland, however, growing up in a fairly rough neighborhood. He was only 12 years old when he challenged a local 17-year-old bully and knocked the boy out with a single punch.

As an adult, Slam tried stints in both the army and the police force before settling in for a life as private investigator; a job where he was his own boss. Slam worked in Metropolis, Keystone, and New York City, before opting to move to the East End of Gotham City, where he befriended Catwoman. Slam soon found himself falling in love with Catwoman, who had too much on her plate to ever significantly return Slam's feelings. However, the two remained allies, even after Catwoman had a child with Slam's son, Sam Bradley, Jr.

TO CATCH A CAT

Slam became a staunch ally of Catwoman after being hired by the Mayor of Gotham City to locate her. He grew to care for Selina and her circle of friends.

BRAIN

DEBUT *Doom Patrol* (Vol. 1) #86 (Mar. 1964)
BASE Paris, France; Telistoc, Russia
POWERS/ABILITIES Genius-level intellect
ALLIES Monsieur Mallah
ENEMIES Doom Patrol, Teen Titans, The Flash
AFFILIATIONS Brotherhood of Evil, Secret Society of Super-Villains

Very little is known about the anonymous French scientist known as the Brain. The infamous criminal mastermind claimed to have worked with Niles Caulder before

the maverick researcher formed the Doom Patrol. Brain also believed Caulder, who was envious of his work, was behind the accident that nearly took his life.

The Brain's most important work was the radical course of treatments that elevated a gorilla's intelligence to a level beyond human genius. The grateful primate returned the favor by transplanting the dying man's brain into a cybernetically enhanced containment unit. A close intellectual relationship developed as the ape—dubbed Monsieur Mallah—kept the Brain alive, helping him orchestrate a campaign of vengeance against Caulder and the world. They went on to recruit villains to their Brotherhood of Evil.

BRAINWAVE

DEBUT *All Star Comics* (Vol. 1) #15 (Feb.–Mar. 1943)
REAL NAME Henry King **BASE** Mobile
EYES Covered by thick opaque glasses
HAIR None
POWERS/ABILITIES Psionic ability: hallucination creation, illusion casting, astral projection, telepathy.
ALLIES Jonni Thunder, Obsidian
ENEMIES Justice League, Justice Society of America
AFFILIATIONS Secret Society of Super-Villains, Injustice Gang

Physically weak Henry King developed psionic abilities which he used for crime. As Brainwave, he clashed with the Justice Society of America and All-Star Squadron

during World War II and into the 1950s. He was inactive for decades and it was later revealed that he had used his powers to marry Merry, Girl of 1000 Gimmicks.

His son, Henry Jr. adopted the guise of Brainwave Jr. to clear his family name and he joined Infinity Inc. and the Justice Society. When his father died, he received a psychic power-boost, sparking mental instability.

After *Flashpoint*, a third Brainwave—Henri Roy, Jr.—attempted to conquer the survivors of Earth-2, but has not been seen since the *Rebirth* event.

BRANDE, R. J.

DEBUT *Adventure Comics* (Vol. 1) #350 (Nov. 1966)
REAL NAME Ren Daggle
BASE United Planets HQ, 31st century Daxam
EYES Red **HAIR** Gray
POWERS/ABILITIES Cunning and ruthless politician; (assumed) Durlan shapeshifting.
ALLIES Legion of Super-Heroes, Science Police
ENEMIES Horraz, Crav the General Nah
AFFILIATIONS United Planets Ruling Council

Madam Honor President Brande is the dominant force in the vast federation of civilizations called the United Planets. Few of those billions of sentients know she is also a shapeshifting Durlan. A hard-headed politician with big ideas, soaring ambition, and a will of Inertron, Brande leads the 1,000-year-old UP, deftly wrangling fractious leaders from many worlds. She is credited with creating the Legion of Super-Heroes. Sensing an opportunity to build a youth movement and recreate the fabled "Age of Heroes," she sponsored three super-powered teens—Saturn Girl, Cosmic Boy, and Lightning Lad. Expecting to control the organization, Brande realized too late that the kids—and their army formed from every UP world—only listen to their own consciences. Her son Reep Daggle is her representative on the team as Chameleon Boy.

BRIMSTONE

DEBUT *Legends* (Vol. 1) #1 (Nov. 1986)
BASE Apokolips
HEIGHT 50ft 6in
WEIGHT 60,000 lbs
EYES Yellow **HAIR** None
POWERS/ABILITIES Pyrokinesis; incineration; flaming-energy construct creation.
ALLIES Glorious Godfrey, Darkseid
ENEMIES Suicide Squad, Firestorm, Cosmic Boy, Teen Titans
AFFILIATIONS Gods of Apokolips

The techno-seed that grew into Brimstone was created in the labs of Apokolips during Darkseid's campaign to destroy humanity's concept of heroism. When launched into a fusion reactor on Earth, it became a walking incinerator, targeting Super Heroes and terrorizing civilization.

The colossal monster was actually a semi-sentient artificial intelligence. Composed of super-heated hydrogen plasma wrapped around a core nexus of programming, its appearance was maintained by a delicate balance of magnetic fields. Though dangerous at full expansion, the construct was vulnerable to disruption of its magnetic shield. It carried a flaming sword and made declarations of being an "avenging angel" sent to destroy "false gods and graven images."

BRAINIAC 5

DEBUT *Action Comics* (Vol. 1) #276 (May 1961)
REAL NAME Querl Dox
BASE Legion Headquarters, 31st-century Metropolis, New Earth
HEIGHT 5ft 10in **WEIGHT** 160 lbs
EYES Green **HAIR** Blond
POWERS/ABILITIES Super intelligence; perfect memory; strategic skills; advanced unarmed combat training; weapons expert; Legion flight ring.
ALLIES Imra Ardeen/Saturn Girl, Superboy Jon Kent
ENEMIES Horraz Collective, Crav the General Nah, Fatal Five
AFFILIATIONS Legion of Super-Heroes, Science Command

Querl Dox is a 12th-level mind, the smartest individual of the most brilliant species in known space. He is a direct descendant of Vril Dox, the infamous, self-styled Collector of Worlds, and his brilliance counted as a unique superpower when he was asked to join the recently convened Legion of Super-Heroes. His inherited honorific as the fifth Brainiac became his codename.

Unlike many hyper-intelligent beings, Querl accepts the force of emotion on sentient beings, taking pains to interact on a friendly, inclusive level using a process he calls Emotional Fact. Greatly concerned with the orderly running of the universe, he was active in politics, giving a crucial speech to the United Planets on why there must be a Science Police force. He believes that peace and constant advancement are vital and he is driven to find the best way to achieve his aim.

Brainiac 5 fights best from a laboratory, as a researcher, advisor, tactician, and support scientist. Inventor of multifunctional Legion flight rings and AI servant C.O.M.P.U.T.O., he is the team's intellectual backbone, frequently acting as if he is the de facto leader in action and policy-making.

ON THE RECORD

Brainiac 5 has supreme confidence in his mental strength but frequently shows appalling judgment. In a Silver Age tale, his Artificial Intelligence creation named Computo killed fellow Legionnaire Triplicate Girl and almost conquered Earth before he found a way to shut it down.

That recklessness was still evident in a later tale of his early years when he breached a vault containing the first Brainiac's cached inventions. They ran amok and would have decimated the planet Colu if not for his new-found Legion allies.

CLEAN-UP CREW Brainy's notions would have caused as much carnage as any marauder, if it wasn't for the diligent work of his Legionnaire allies.

BRAINIAC

DATA

DEBUT *Action Comics* (Vol. 1) #242 (Jul. 1958)

REAL NAME Vril Dox

BASE Mobile

HEIGHT Variable **WEIGHT** Variable

EYES Red **HAIR** None

POWERS/ABILITIES 12th-level intellect/artificial hybrid; controls multiple drone bodies; possesses accumulated technologies from numerous destroyed worlds; has access to an array of hi-tech weaponry and infamous skull-shaped ship.

ALLIES Lex Luthor, Vril Dox II

ENEMIES Superman, Justice League, Perpetua

AFFILIATIONS Legion of Doom

He is the Collector of Worlds—a being whose only purpose is the gathering of information and knowledge by capturing entire civilizations on a whim. A 12th-level intellect, Vril Dox has become the cruel and calculating Brainiac. He wishes not to share and spread information, but to hoard it, ensuring he is the only being to unlock the mysteries of the universe.

Brainiac is Vril Dox, a Colu native considered to be his planet's greatest shame and highest criminal. Banned from his own world due to his zealot-like quest for knowledge, Brainiac is a super-intelligent being. He employs his hi-tech skull-shaped ship and a variety of drones to travel the cosmos and imprison his chosen cities, miniaturizing them to preserving them in his perverse pursuit of universal knowledge. On his mad quest he has clashed with multiple heroes, but none more than Superman. As the captor and bottler of the Kryptonian city Kandor,

Brainiac has more than earned the ire of Krypton's most famous survivor and champion.

After the Source Wall—the cosmic barrier separating the universe from previously unknown powers—was broken, Brainiac did the unthinkable. He went to Earth not to conquer, but to recruit its heroes to his cause. Four powerful cosmic beings called the Omega Titans had been unleashed on the galaxy, and they had their sights set on Earth and Colu. However, before he could further instruct his recruited heroes, Brainiac was taken out of commission by an attack from Amanda Waller's Task Force XI. Colu was destroyed in the aftermath, unleashing entire planets held in its nursery and creating a new Ghost Sector of space.

But Brainiac didn't stay "dead" for long. Through the genius of the notorious criminal scientist Professor Ivo, and with Lex Luthor's support and backing, Brainiac was brought back online and became a valued member of Luthor's new Legion of Doom. Brainiac attempted to double cross Lex, but found Lex had hidden a virus in his own mind, giving Brainiac no choice but to embrace Luthor's cause. The Legion of Doom then helped free the mother of the Multiverse known as Perpetua. However, Brainiac was transformed by the cosmic being into her very throne with some of his power channeled into Luthor.

A ghost lost in Perpetua's machine, Brainiac will no doubt return and regain his traditional form some day, reestablishing his unrelenting quest for information at any cost.

ON THE RECORD

When Superman first met

Brainiac he seemed to be an organic being intent on repopulating his dead world with Earthlings, but he was soon re-imagined as a devious construct spying for mechanical villains, the Computer Tyrants of Colu.

Brainiac was radically altered in the 1980s into a scarily remorseless and predatory mechanoid intent on subjugating all organic life. These and many other versions resurfaced in *Convergence*, when a Brainiac from beyond the Multiverse began assimilating his parallel selves while collecting cities from all 52 alternate universes and their attendant or divergent timelines. These stolen cities were then pitted against each other, with Brainiac's enslaved ringmaster Telos arranging the bouts.

ALIEN ENCOUNTER

For many years, Superman was unaware that his force field-shielded arch-foe was also a man of steel (and gears, tubes, plastic relays, and chemicals).

BRAIN POWER

A ruthless master of mentality, Brainiac's physical form is secondary to his artificially enhanced mind.

WEAKNESS IN NUMBERS

A Brainiac threatened every world in the Multiverse, but they were all just tasty morsels for the all-consuming, all-conquering being.

CLASSIC STORIES

Action Comics (Vol. 1) #242

(Jul. 1958) Superman battles an alien city-stealer who is defeated when his own lab monkey turns off his force-field. There is no hint that Brainiac is an artificial foe.

Superman (Vol. 1) #141 (Nov. 1960)

Superman time-travels to Krypton and helps his father construct a massive space-ark. But the factory is in the city of Kandor, which is bottled by Brainiac.

Superboy and the Legion of Super-Heroes (Vol. 1) #223-224

(Dec. 1976) Brainiac reappears in the 30th century as Pulsar Stargrave, impersonating Brainiac 5's father. He tries to trick the Legion of Super-Heroes into helping him conquer the universe.

BRAINSTORM

DEBUT *Justice League of America* (Vol. 1) #32 (Dec. 1964)

REAL NAME Frederick Storm

BASE Mobile

EYES Black **HAIR** Black

POWERS/ABILITIES Super genius; psionic ability; hallucination creation; reality alteration triggered by a cerebral enhancement helmet.

ALLIES Axel Storm

ENEMIES Justice League of America

AFFILIATIONS Injustice Gang of the World

Fred Storm was a petty man who envied the adulation given to Super Heroes. Using a helmet which sporadically enhanced his mental abilities and afforded him "brainstorms" of inspiration, he conducted a vindictive campaign to humiliate—and ultimately destroy—the Justice League of America. His title of Brainstorm has also been used by a number of others, including his brother Axel and S.T.A.R. Labs volunteer Alan Barnes.

After *Flashpoint*, scientist Dominic Lanse studied mind-control and artificial intelligence in machines, eventually acquiring the ability to influence the minds of others.

His mind-manipulating powers indirectly caused the death of Paula Holt, Mr. Terrific's wife. In response, the outraged champion of "Fair Play" almost beat Lanse to death in a shocking act of violence, which was witnessed by television audiences and almost ended the Super Hero's career.

POWER OUTAGE Brainstorm's brain wave's posed problems for several Super Heroes, including causing Superman to temporarily lose his superpowers.

BRONZE TIGER

DEBUT *Richard Dragon: Kung-Fu Fighter* (Vol. 1) #1 (Apr.–May 1975) (as Benjamin Turner); *Richard Dragon: Kung-Fu Fighter* (Vol. 1) #18 (Nov.–Dec. 1977) (as Tiger)

REAL NAME Benjamin Turner

BASE Mobile

HEIGHT 5ft 11in **WEIGHT** 196 lbs

EYES Brown **HAIR** None

POWERS/ABILITIES Superb martial artist; can shift into animalistic tiger form.

A man of mystery, Bronze Tiger is one of the greatest martial artists. A major player in mercenary circles, he is an ally of Slade Wilson, aka

Deathstroke the

Terminator. In Rā's al Ghūl's League of Assassins, he won great power and influence among its fanatical killers. When Red Hood was recruited, Bronze Tiger welcomed him to their fabled city 'Eth Alth'eбан.

The Tiger has a complicated history with premier assassin Lady Shiva and reported ties to Richard Dragon. A mystic a talisman transforms him into a tiger form, but the change comes at a cost—supposedly "burning away" some of his soul each time.

Guided by his personal code, he operates on both sides of the law, working with the Suicide Squad and Batman, as both a source of information on the mercenary world and a potent ally in battle.

BROTHER BLOOD

DEBUT *The New Teen Titans* (Vol. 1) #21 (Jul. 1982)

BASE Hollywood, California

HEIGHT 6ft 2in **WEIGHT** 193 lbs

EYES Red **HAIR** None

POWERS/ABILITIES Able to heal wounds; enslaves others by contact with their blood; charismatic leader with fanatical followers.

ENEMIES Titans, Teen Titans, Ravagers, Animal Man, Animal Girl

Hereditary cult leader Brother Blood is connected to the Red—an intangible energy-web connecting all animals. Blood sought to kill the Ravagers

and came into conflict with the Teen Titans, hoping to use Beast Boy's blood to create a doorway to the Red. He was defeated by the Ravagers and his temple was destroyed.

Blood then targeted Animal Man Buddy Baker, entering the Red by drinking Buddy's blood. He tried to take over the dimension, but was stopped by Animal Man and his daughter, Animal Girl. After constant failures and abuse of his position, the Brother was supplanted by Mother Blood, Sonya Tarinka. She tried to use her connection to the Red and the released forces of the sundered Source Wall to subjugate the Multiverse via the interconnecting dimensional realm called the Bleed, but was thwarted by the Titans.

BROTHERHOOD OF EVIL

DEBUT *Doom Patrol* (Vol. 1) #86 (Mar. 1964); *New Titans Annual* #6 (1990) (Society of Sin)

MEMBERS/POWERS Phobia: Projection of illusions animating a foe's greatest fear;

Plasmus: Protoplasmic burning touch;

Warp: Teleportation; **Silverback**: Cybernetic enhancements, firearms expertise.

ENEMIES Titans, Blue Beetle, La Dama

The Brotherhood of Evil was formed years ago by the Brain and his ape companion, Monsieur Mallah. Sometimes known as the Society of Sin, it has changed

members often. Recently, the group divided, with the Brain and Mallah becoming a Brotherhood of Two when their comrades went to hunt the extraterrestrial Scarab found by Jaime Reyes. Phobia, Plasmus, and Warp were joined by gun-toting cybernetic gorilla Silverback, who threatened them if the Scarab was not located. Agents of La Dama and soldiers of the Reach also had their own designs on the Scarab.

Meanwhile, Brain and Mallah went about boosting Brain's processing power, attempting his digital ascension to a world-altering, weather-controlling Hypergenius. But with the Brain growing more deadly, distant, and self-involved, an increasingly isolated Mallah barely put up a fight when the Titans ended the mad scheme.

BULLETEER

DEBUT *Seven Soldiers: Bulleteer* #1 (Jan. 2006)

REAL NAME Alix Harrower

HEIGHT 6ft **WEIGHT** 155 lbs

EYES White **HAIR** Red

POWERS/ABILITIES Skin bonded with Smartskin, making her nearly invulnerable and immune to pain; superhuman strength.

ALLIES Firestorm, Firehawk, Super-Chief

ENEMIES The Nebula Man, Sally Sonic

AFFILIATIONS Seven Soldiers of Victory, Justice League of America

Alix Harrower's scientist husband Lance was working on a "Smartskin" project—turning soft tissue into a metal material stronger than steel. Obsessed with preserving not only his youth, but that of his 27-year-old wife, Lance tried the Smartskin on himself, and died by suffocation. Before he breathed his last, he touched Alix, passing his Smartskin on to her.

She survived the bonding process and then discovered that Lance had been obsessed with a Super Hero on the Internet named Sally Sonic. In despair, Alix ran into the night, happening upon a building on fire and saved its residents. Realizing her calling, she became the Bulleteer, a Super Hero inspired by the World War II Bulletman. She later served with honor in the Seven Soldiers of Victory as well as the JLA.

BULLETMAN

DEBUT *Nickel Comics* (Vol. 1) #1 (May 1940)

REAL NAME James Barr

BASE Fawcett City

HEIGHT 6ft 4in **WEIGHT** 177 lbs

EYES Blue **HAIR** White

POWERS/ABILITIES Able to fly and repel bullets thanks to his Gravity Regular Helmet; superhuman strength and intelligence.

ALLIES Bulletgirl, Starman, Shazam

ENEMIES Weeper

AFFILIATIONS All-Star Squadron

The inspiration for the later crime fighter Bulleteer, Bulletman was a Super Hero active during World War II. The son of a police officer who was killed on duty,

Jim Barr opted to become a crime fighter using his science smarts to increase his strength and develop a Gravity Regulator Helmet that allowed him to fly. Taking the name Bulletman from the Gravity Regulator's appearance, he was soon joined by Bulletgirl, Susan Kent.

The two fought bravely during the war and afterwards retired to live in Fawcett City. Later, as an old man who had made a good living from Bulletman merchandise, Jim was falsely accused of having committed treason back in 1942. However, Shazam and Starman teamed up to prove he was innocent of all charges.

BULLOCK, HARVEY

DEBUT *Batman* (Vol. 1) #361 (Jul. 1983)

REAL NAME Harvey Bullock

BASE Gotham City

HEIGHT 5ft 10in **WEIGHT** 248 lbs **EYES** Brown **HAIR** Black

POWERS/ABILITIES Excellent detective; able brawler with street smarts and years of experience; highly trained in police procedure; extremely loyal to his friends.

ALLIES James Gordon, Batman, the Batman Family, Renee Montoya

ENEMIES Anarky, The Joker's Daughter, Dr. Death

AFFILIATIONS G.C.P.D., Batman Task Force

Sometimes the best cops in Gotham City are hard to spot in a lineup. Although his uncouth attitude and slovenly appearance suggest otherwise, Harvey Bullock is in truth one of the few good cops left in a city filled with corruption, and he is a steadfast supporter of James Gordon and his high ideals.

While perhaps tempted by an amoral police department in the past, Bullock was inspired by the arrival of Lieutenant James Gordon, sticking up for him when he doggedly pursued underworld boss Roman Sionis. Bullock also worked with Gordon to catch Dr. Death during the city's *Zero Year* event. They slowly became allies as Gordon rose through the ranks to become Gotham City's Commissioner. After years of dedicated service, James Gordon was imprisoned for a murder he did not willingly commit. Bullock remained loyal to Gordon, and when he was finally released and became the city's official new Batman, Harvey remained by his side as a member of the Batman Task Force.

Despite his adversarial relationship with all Bat-vigilantes, Bullock assumed Gordon's role as the Police Commissioner of beleaguered Gotham City when the malign Batman Who Laughs infected Gordon with the corrupting power of evil.

ON THE RECORD

In his early appearances, Harvey Bullock was a clumsy slob who got in the way more than he helped. He also clashed with Commissioner Gordon. In time, Harvey changed his ways, making friends with the second Robin, Jason Todd. He later began work at the government spy agency Checkmate. In the 1990s, he became the longtime partner of officer Renee Montoya, but the infamously unorthodox cop finally crossed the line in 2000's "Officer Down" storyline and resigned from the G.C.P.D.

BAD NEWS BULLOCK

When he first appeared, Lt. Bullock wasn't a fan of either Batman or Commissioner Gordon, referring to Gordon as a "weak sister," and Batman as "fancy britches."

BUMBLEBEE

DEBUT *Teen Titans* (Vol. 1) #45 (Dec. 1976) (as Karen);

Teen Titans (Vol. 1) #48 (Jun. 1977) (as Bumblebee)

REAL NAME Karen Beecher-Duncan **BASE** Metropolis

HEIGHT 5ft 7in **WEIGHT** 130 lbs

EYES Brown **HAIR** Black

POWERS/ABILITIES Energy generation; able to shrink and fly; high-tech battlesuit.

ALLIES Malcolm Duncan

ENEMIES Mr. Twister, Psimon, Fearsome Five

AFFILIATIONS Teen Titans, Meta Solutions, S.T.A.R. Labs

The wife of former Teen Titan and award-winning movie composer Malcolm Duncan, Karen Beecher-Duncan has her life change forever after the birth of her baby girl. Karen has no idea that in previous realities she was a Super Hero too. She believes she first met her husband when she was a technical consultant on one of his films. Mal affectionately nicknamed her "Bumblebee."

They married and Karen became pregnant, subsequently experiencing the first flash of a possible previous life after discovering she could emit energy bursts. Mal knew the cost of superpowers so together they approached Meta Solutions—a bio-company claiming to remove unnatural abilities.

Sadly, it was a front for Super-Villain Psimon and his Fearsome Five team. When Mal realized and called in the adult Titans, they found Karen had already been transformed into a size-changing warrior in advanced armor. When the Five crushed the heroes, Bumblebee savagely routed the villains, but not before Psimon wiped her memory of all traces of her life, husband, and child.

She eventually regained her memories after battling H.I.V.E. and an evil future Troia. When the Justice League disbanded the Titans, she retired from a life of action to raise her child.

ON THE RECORD

Before Flashpoint,

Karen Beecher-Duncan was the Super Hero Bumblebee. Involved in a relationship with Teen Titan Mal Duncan, better known as the hero Herald (and much later, Vox), Karen decided to be a crime fighter herself, and designed her flying Bumblebee costume and weaponry. She was welcomed into the first Teen Titans team, and after that version disbanded, she worked for S.T.A.R. Labs before becoming a member of the Doom Patrol.

BEE MINOR

During *Infinite Crisis*, Bumblebee's physiology was altered, reducing her size to around six inches tall.

BUNKER

DEBUT *Teen Titans* (Vol. 4) #1 (Nov. 2011)

REAL NAME Miguel Jose Barragan

HEIGHT 5ft 8in **WEIGHT** 132 lbs

EYES Brown **HAIR** Black

POWERS/ABILITIES Able to create bricks of psionic energy; infectious positive disposition.

ALLIES Beast Boy, Robin, Skitter, Solstice, Wonder Girl

ENEMIES The Penguin, Detritus

AFFILIATIONS Teen Titans, Red Hood

Miguel Jose Barragan left a happy life in the Mexican village El Chilar to fulfil a dream: to become a hero like his idol Robin. Riding a train to the US, he discovered the cocoon

of future comrade Skitter in one of the cars and was attacked by a homeless man—actually Robin in disguise. Robin believed that Barragan worked for evil organization N.O.W.H.E.R.E. After a brief scuffle, Miguel suddenly hugged Robin, citing him as his inspiration for becoming Super Hero Bunker.

Cofounding a new iteration of the Teen Titans, openly gay Miguel forged a stellar career, serving as a ray of positivity through turbulent times. When they disbanded, he joined Red Hood Jason Todd, who had taken over the Iceberg Lounge, to dismantle the Penguin's criminal empire. However, unable to stomach the dirty tactics required, Bunker explosively severed ties with Red Hood.

C.O.M.P.U.T.O.

DEBUT *Adventure Comics* (Vol. 1) #340 (Jan. 1966)

REAL NAME Cyber-cerebral Overlapping Multiprocessor Transceiver Operator

BASE Legion HQ, 31st-century New Metropolis

POWERS/ABILITIES Incredible intelligence, limitless processing capacity, light manipulation.

C.O.M.P.U.T.O. is the autonomous data manipulation system devised by Brainiac 5 to administer the huge headquarters complex of the Legion of Super Heroes. As well as

supporting the team members and their guests and visitors, C.O.M.P.U.T.O. also acts as a sounding board and knowledge base for Brainiac in his experiments and investigations. C.O.M.P.U.T.O. monitors events and data flow throughout the United Planets, looking for trends and patterns in the ebb and flow of trillions of beings.

Notionally female in its current interface aspect, C.O.M.P.U.T.O. can manifest as a light energy construct to interface with Legionnaires and in "her" capacity as a social messaging system and broadcast personality.

C.O.M.P.U.T.O. is located in the Legion complex on New Earth that is situated within the New Metropolis environment bubble. This sanctuary is circling the shattered remnants of the planet, while the rebuilding of humanity's homeworld is ongoing.

CAIN, DAVID

DEBUT *Batman* #567 (Jul. 1999)

BASE The Nursery, Prague, Czech Republic

EYES Brown **HAIR** Brown

POWERS/ABILITIES Highly trained killer, skilled in martial arts and swordsmanship.

ALLIES Mother

ENEMIES Cassandra Cain, Bluebird, Red Hood, Red Robin, Dick Grayson, Bruce Wayne

AFFILIATIONS Mother's organization, Lady Shiva Woosan

A skilled and ruthless killer, David Cain worked for "Mother." She kidnapped children and brainwashed them into becoming her obedient agents. As

"Orphan," Cain was her assassin, fighting Batman when he hindered her schemes.

Cain also became obsessed with turning a child into a perfect killer. He subjected his own daughter, Cassandra, to a brutal regime, desensitizing her to violence, not letting her speak, and teaching her that sympathy was a weakness. She escaped and fled to Gotham City, adopting the identity of Batgirl. When Cain came to Gotham City to kill the hero Bluebird, Batgirl intervened and cut off his hand. He escaped to Mother's Nursery facility where his hand was replaced by a cybernetic prosthesis. After he died battling Batman, Cassandra adopted his codename Orphan.

CAIN AND ABEL

DEBUT *House of Mystery* (Vol. 1) #175 (Aug. 1968) (Cain); *DC Special* #4 (Jul-Sep. 1969) (Abel)

BASE Cain: House of Mystery; Abel: House of Secrets

HEIGHT Cain: 6ft 2in; Abel: 5ft 7in

WEIGHT Cain: 174 lbs; Abel: 396 lbs

EYES Cain: Brown; Abel: Blue

HAIR Cain: Brown; Abel: Black

POWERS/ABILITIES Immortality

Cain and Abel are two brothers who dwell in the Dreaming, the realm of Morpheus. They inhabit the House of Mystery and House of Secrets respectively, and tell chilling stories to visitors. While Abel is timorous and soft-hearted, Cain has a cruel streak. Though he loves his brother, Cain often loses his temper and murders Abel in a gruesome fashion. However, Abel always comes back to life, as per the terms of a contract the brothers signed with Morpheus.

When Abel was killed by the Furies of Greek Legend, his brother successfully petitioned Morpheus to resurrect him. They later ran the House of Mystery as a bar where customers paid for drinks by telling macabre stories. When the House of Mystery was destroyed, the brothers rebuilt it, but it soon became the Justice League Dark's HQ.

After *Flashpoint*, the Justice League United encountered Abel when they entered the House of Secrets.

BLOOD BROTHERS

Cain (left) and Abel are brothers bound together by fate, doomed to repeat a cycle of murder and resurrection.

REAL NAME Julian Gregory Day

BASE Arkham Island

HEIGHT 5ft 11in

WEIGHT 193 lbs

EYES Black

HAIR Bald

POWERS/ABILITIES Hardened street fighter

ALLIES The Squid, Arkham inmates

ENEMIES Batman, the Riddler

Julian Day was a happily married man with a son, Aiden. When his wife died in a blackout caused by the Riddler, Day went off the rails and began working for a drug

dealer called the Squid. When Batman met Aiden, the boy said that his father abused and neglected him. Batman beat up Day, accusing him of forgetting his son's birthday.

Consequently, Day became obsessed with dates. Taking the name Calendar Man, he committed several date-themed crimes and was incarcerated on Arkham Island. He then threatened to cause a blackout across Gotham City unless the man he blamed for ruining his life surrendered to him. Batman coerced the Riddler into helping him infiltrate Arkham, then handed him over to Calendar Man, who exacted his brutal revenge on the villain.

CAPTAIN CARROT

DEBUT *New Teen Titans* (Vol. 1) #16 (Feb. 1982)

REAL NAME Rodney Rabbit

BASE House of Heroes satellite, Earth-26

HEIGHT Over 6ft **EYES** White **HAIR** White

POWERS/ABILITIES Eating cosmic carrots bestows Rodney with temporary superpowers.

ALLIES Superman

ENEMIES Starro the Conqueror, Frogzilla, Lord Havok, the Gentry

AFFILIATIONS The Zoo Crew, Justice Incarnate, Multiversity

A rabbit from an alternate reality of cartoon animals, Rodney was a mild-mannered cartoonist until he ate a cosmic carrot. As superpowered

Captain Carrot, he joined the Zoo Crew.

Over many wacky adventures, they encountered both Superman and Starro the Conqueror. When their world was threatened, the Zoo Crew took its inhabitants to New Earth, where they changed into ordinary animals. Carrot became a stage rabbit, before regaining his powers and helping fight Darkseid during *Final Crisis*. He is Earth-26's member in the pan-Multiversal super-team Justice Incarnate. They battled the Gentry and their Oblivion Machine, and fought the Legion of Doom when Earth's heroes attempted to repair the ruptured Source Wall.

POWERS/ABILITIES Super-strength, super-speed, telepathy, telekinesis, flight, photographic memory, heightened intelligence.

ALLIES Superman

ENEMIES Doomsday

A comet passing over the Blake family home in Kansas during Adam's birth gave him latent superpowers. These manifested many years later when he learned from

Professor Emery Zackro that his body had evolved thousands of years ahead of normal human biology. Adam discovered that his destiny lay in space as one of the first *Neo sapiens*, tasked with finding others who had also evolved ahead of their species' timeline.

While on this quest he battled Superman, whom he mistook for Superdoomsday. Realizing his error, he teamed up with the Man of Steel and Lex Luthor to fight off Mr. Mxyzptlk and an army of alternate Supermen threatening Metropolis. He then disappeared in his spaceship with its crew of Wanderers, their destination unknown. He later turned up as a member of the Crucible Academy.

POWERS/ABILITIES Teleports by snapping his fingers.

ALLIES JLA, Young Justice, Miguel Montez, Summer Pickens

ENEMIES The Joker, Dominators, Khunds

When Simon Carr bankrolled the Justice League of America and outfitted their base, his nephew Lucas lent a hand. As a reward, finger-popping teen, "Snapper," became an

honorary Leaguer. Years later, "John Doe" tricked Snapper into revealing the HQ's location. Doe was The Joker, and Snapper quit in shame. He was experimenting on by alien Dominators who activated his teleporting metagene. He and others escaped and struck back as the Blasters. One day, the Khunds severed his hands, but Colu's Vril Dox replaced them. Snapper later mentored the android Hourman III, wrote his JLA memoirs, and coached Young Justice. He now runs the Super Hero museum and advised trainee crime fighters Miguel Montez and Summer Pickens after they acquired the incredible Super Hero generating H Dial.

CAPTAIN ATOM

DATA

DEBUT *Space Adventures* #33 (Mar. 1960)

REAL NAME Nathaniel Adam

BASE The Continuum, Kansas

HEIGHT 6ft 4in **WEIGHT** 200 lbs

EYES Silver **HAIR** Silver

POWERS/ABILITIES Can absorb and distribute energy at will; quantum bolt projection; super-strength, stamina, and endurance; quantum speed; draws on quantum field as an inexhaustible power source.

ALLIES Justice League, Firestorm

ENEMIES Ultramax, Doctor Manhattan

AFFILIATIONS USAF, Continuum research facility

MORE THAN HUMAN
While possessing powerful quantum-based abilities, Captain Atom can also switch back to his human form as needed.

CAMERON SCOTT
When Captain Atom returned from the past, his Super Hero form appeared a reddish gold. He adopted the name Cameron Scott as an alias to distance himself from his earlier adventures.

Captain Atom is a hero with the ability to manipulate the quantum field. Although the US military wanted to use him as a living weapon of mass destruction, he has chosen to wield his devastating power for the good of all mankind. However, with almost infinite energy at his command, he must constantly struggle to hold onto his humanity.

Captain Nathaniel Adam was a USAF fighter pilot, but when his behavior became erratic following his father's death, he was grounded. Nate then found work at the Continuum, a scientific research facility where he participated in an experiment run by renowned quantum physicist Dr. Megala, author of the controversial "M-Theory." Megala believed that there were multiple parallel realities and he wanted Nate to pilot an experimental capsule designed to travel to other dimensions. When the capsule was activated, it imploded in a flash of light, destroying Nate at a subatomic level. Somehow his consciousness survived and created a new body for itself, molecule by molecule. One month after he had disappeared, the being that was once Nate Adam reappeared as a glowing silver form with a red atomic symbol emblazoned on his chest.

Nate discovered that he was now a living nuclear reactor that could also absorb energy and even transmute matter. However, when he used these powers, his own body became unstable. General Wade Eiling approached Nate and told him that he was now a military asset—and a living weapon of mass destruction.

Nate refused to cooperate and chose to serve the world as Captain Atom instead. When Captain Atom grew more unstable and exploded, he sent himself back through time to the past of 1994. He started his life again, now without superpowers, and married a woman named Takara Sato. She became pregnant, but when Nathaniel was shot during a car jacking, Captain Atom was powered up again, and he returned to the present, not knowing his now 17-year-old son.

Since his original explosion had killed three innocent people, Nathaniel followed orders and adopted the new identity of Colonel Cameron Scott, pretending to be the second Captain Atom. As he now possessed a different power set, the ruse worked and he fought the villain Ultramax, earning the interest of the Justice League.

Captain Atom's appearance changed back to its silver shade more recently when he was charged with keeping Super Heroes out of Gotham City after Bane's hostile takeover. Gotham Girl didn't agree with his orders, and despite the Captain's power, she bested him and literally threw him out of town.

ON THE RECORD

The pre-Flashpoint Nate Adam was a decorated pilot framed for a crime he did not commit. To gain a pardon, Nate participated in an experiment involving an atomic bomb and a crashed alien spacecraft. Seemingly vaporized in the test, he reappeared 18 years later with a skin of alien metal and incredible powers.

Calling himself Captain Atom, Nate was forced to work for the US government. Eventually, he cleared his name and left the Air Force. Nate battled villain Monarch in the 2001 "Armageddon" story arc and time-traveled to foil a plot by Super Hero-hating Maxwell Lord.

THE GOOD SOLDIER
As a military man, Captain Atom followed orders—even if it meant having to arrest the Dark Knight himself!

ATOM VS. MANHATTAN
Captain Atom is believed to have faced Doctor Manhattan. He was surprised to find that even his power couldn't stop this blue, godlike being.

CLASSIC STORIES

Armageddon: The Alien Agenda

#1-4 (Nov. 1991-Feb. 1992) In this time-traveling epic, Captain Atom and his nemesis Monarch fight an alien threat in the prehistoric era, in Imperial Rome, and during World War II.

Countdown: Arena #1-4 (Feb. 2008)

Nate Adam becomes the new incarnation of his main adversary, Monarch. He recruits an army to battle the Monitors, but is successfully opposed by a team of alternate Captain Atoms.

The Fall and Rise of Captain Atom

#1-6 (March-Aug. 2017) Nathaniel Adam travels to the past, only to be sent back to the future again. He gains a new power set along the way, but tragically loses his wife.

CAPTAIN BOOMERANG

DATA

DEBUT *The Flash* (Vol. 1) #117 (Dec. 1960)

REAL NAME George "Digger" Harkness

BASE Belle Reve Prison

HEIGHT 5ft 9in

WEIGHT 167 lbs

EYES Brown **HAIR** Brown

POWERS/ABILITIES Expert with throwing weapons; carries a number of boomerangs at all times, including some with special properties such as razor-sharp sides, and others that explode or even allow him to fly.

ALLIES Deadshot, Harley Quinn

ENEMIES The Flash, Amanda Waller

AFFILIATIONS Suicide Squad, the Rogues

OUTBACK BATTLER
As a young child growing up in Australia, Digger made his own boomerangs, and became adept at throwing them.

George "Digger" Harkness is a mercenary and killer with an aptitude for boomerangs and other projectiles. Antagonistic and often annoying to those around him, he has fought The Flash and, since his incarceration, has become a member of Task Force X, aka the Suicide Squad.

Born in Kurrumburra, Australia, George "Digger" Harkness grew up poor. His father was supposedly a US soldier who had abandoned his family when his son was very young. As a child, Digger developed an aptitude for boomerangs and soon became deadly with them. After serving first in the military and then in the Australian Secret Service, he moved to the US where he turned to crime, battling The Flash on many occasions and becoming a longtime member of the Rogues. After Harkness went to prison, Amanda Waller selected him for Task Force X (the Suicide Squad) along with new member Yo-Yo, to replace fallen members Voltaic and Savant. While Harkness claimed to be the new team leader—and was given a detonator to control the

explosive devices buried inside his fellow teammates—this was later revealed to be a ruse by Waller. Harkness was captured on a mission against the terrorist group known as Basilisk and seemed to betray the Suicide Squad—until he helped them break free. Waller had asked him to infiltrate Basilisk and get close to its leader, Regulus, to help defeat him.

After many more missions with the Squad, Boomerang was seemingly killed by General Zod. Luckily for Digger, he was brought back to reality by new member Hack. One of his later missions led him back to his small Australian town, where he met a son he wasn't quite aware of, Owen Mercer, who was now an adult and a brilliant arms dealer.

Eventually, Captain Boomerang went on enough Suicide Squad missions to earn his freedom, although he almost immediately broke the terms of his parole by freely talking about the top-secret task force. In reaction, a new Squad captured Boomerang. When Digger's old ally Deadshot was told to kill Harkness, Deadshot rebelled and killed their handler instead. The Suicide Squad escaped and ironically enough, The Flash rescued Boomerang from the authorities and brought him back to Australia. Never one to stay out of trouble, however, Digger opted to return to Central City and rejoin the Rogues.

ON THE RECORD

Capitalizing on his Australian background, Captain Boomerang first came to fame as a toy spokesman before being exposed as a Super-Villain. A longtime member of the infamous Rogues—The Flash's recurring adversaries—Captain Boomerang developed a harder edge after joining the Suicide Squad.

He was later hired to kill Jack Drake, the father of Tim Drake (Robin, at the time), but as he carried out the contract, he too was killed—by his target. Harkness' son, Owen Mercer, went on to become the new Captain Boomerang, while George returned as a Black Lantern during Nekron's attack on Earth and was reborn following Nekron's defeat.

LAST STAND
An aged, balding Captain Boomerang assassinated Jack Drake, but not before he was shot and killed by his victim.

REAL NAME Leonard Snart

BASE Central City

HEIGHT 6ft 2in **WEIGHT** 196 lbs **EYES** Blue **HAIR** Brown

POWERS/ABILITIES Excellent tactician; has a cold gun that can create absolute zero, make super-dense blocks of ice, form ice barriers, and other cold-related effects; goggles protect him from the glare caused by using his gun.

ALLIES Lex Luthor, Golden Glider

ENEMIES The Flash, Crime Syndicate

AFFILIATIONS The Rogues, Justice League (formerly), Suicide Squad (formerly), Legion of Zoom

ICING THE FLASH

Captain Cold is pretty good in a scrap, even without his cold gun.

When working as part of a criminal gang, he was arrested by The Flash and sent to jail. While in jail, Snart created a special cold gun that he hoped would give him the edge in his next confrontation with The Flash.

After he was released, he returned to a life of crime, now as Captain Cold, and soon teamed up with other villains to form the Rogues. After several defeats by The Flash, Cold tried to upgrade the Rogues' powers by using a Genome Recorder, but it backfired, leaving his friends injured and Lisa in a coma. When The Flash's enemy Mob Rule caused a blackout, it threatened Snart's sister's chances of survival. Snart blamed The Flash and attacked the hero. In the end, The Flash not only stopped Captain Cold but used his Speed Force to help Lisa survive. She joined the Rogues as Golden Glider, having gained powers of her own.

The Rogues had their own strict code—one that brought them into conflict with more brutal evildoers, such as Gorilla Grodd and the Crime Syndicate. Captain Cold joined Lex's group of villains to attack the Syndicate, and after the its defeat, found himself hailed a hero. Hired as Lex's bodyguard, Snart helped Lex and the Justice League combat the Amazo virus.

A true criminal at heart, Captain Cold returned to the Rogues and planned the perfect heist against The Flash. However, Heat Wave deviated from the plan, causing The Flash to best them yet again. Despite using a new Black Ice gun, Cold was incarcerated. However, he used his time in Iron Heights Penitentiary to become the new head of Central City's underworld, and he even killed his fellow inmate, Turbine. Later transferred to Belle Reve, Captain Cold served time with the Suicide Squad before Lex Luthor broke him free and upgraded his technology. Cold used his new enhanced cold-based weaponry to conquer Central City and imprison The Flash. However, The Flash teamed up with Golden Glider and other Rogues to knock some sense into Snart. Captain Cold remains at large, plotting his next course of action against The Flash and Central City.

ON THE RECORD

Before the continuity-altering *Flashpoint* event, Captain Cold lost his sister when she was killed by fellow ice-themed villain Chillblaine; Cold then killed Chillblaine in revenge.

Alongside his fellow Rogues, Cold also took the life of Bart Allen's Flash, but expressed remorse at his actions on discovering that this incarnation of The Flash was just a kid.

ICED AGE

The pre-*Flashpoint* Captain Cold, with a fur-trimmed parka-style costume, lacked superpowers, relying instead on his ice guns for his criminal work.

CATWOMAN

DATA

DEBUT *Batman* (Vol. 1) #1 (Spring 1940)

REAL NAME Selina Kyle

BASE The East End, Gotham City

HEIGHT 5ft 7in **WEIGHT** 128 lbs

EYES Blue-green **HAIR** Black

POWERS/ABILITIES Master cat burglar; formidable fighter with expertise in boxing, acrobatics, and many martial arts; weapons include cat-o'-nine tails whip and gloves with diamond-tipped claws; wears protective goggles.

ALLIES Killer Croc, Alice Tesla, Batman (on occasion)

ENEMIES The Joker's Daughter, Bone, Black Mask, Dollhouse

AFFILIATIONS Calabrese Crime Family, Justice League of America, Batman, Inc.

Catwoman is one of the great mysteries of Gotham City. Often switching from hero to villain in a single night, over the years Selina Kyle has been a help to Batman as often as she has been a thorn in his side. A capable leader, an intimidating fighter, and a savvy street-smart cat burglar, Catwoman has gone from being one of Gotham City's many forgotten children to one of its most powerful figures. After a stint as one of Gotham City's major crime bosses, Catwoman has returned to the rooftops once again as an independent creature of the night, answerable to no one except herself.

AT A GLANCE...

Hard-knock life

Selina Kyle was a child of the system. But in a town like Gotham City, that system tended to be as corrupt as its elected officials. Selina grew up in Oliver's Group Home, coached in the ways of thievery by the institution's headmistress, Miss Oliver.

Getting organized

Catwoman became the leader of an organized crime family when she discovered that her father, Rex "the Lion" Calabrese, the former head of Gotham City's Mafia, was alive. He was residing in a cell in Blackgate Penitentiary, forgotten by the rest of Gotham City's criminals.

The Cat and the Bat

Despite often being on opposite sides of the law, Catwoman and Batman have shared a romantic interest in one another for years. While Catwoman isn't aware of Batman's double identity, that hasn't stopped the pair from having many intimate encounters and romantic flings.

Catwoman's post-Crisis origin is explored in detail, including her training by the hero Wildcat.

Catwoman: When in Rome #1-6

(Nov. 2004-Apr. 2005) Catwoman takes a trip to Italy with the Riddler in a tale emerging out of the powerful "Batman: The Long Halloween" series.

Whip smart

Catwoman's cat-o'-nine tails remains her trademark weapon of choice. She has even incorporated the whip into her costume, using it as a belt when not caught up in a catfight.

Selina Kyle started life at a distinct disadvantage. As a child, she bounced around from foster home to foster home, before finding a more permanent residence at Oliver's Group Home, run by the unscrupulous Miss Oliver. The kids at the home were forced to break into jewelry stores and homes, stealing priceless treasures for the strict Miss Oliver. Learning the ins and outs of thievery at Oliver's, Selina retained a rebellious streak, often hiding expensive items in her teddy bear to invest in her future.

Years later, after leaving Miss Oliver's Home, Selina tried to build a better, legit future for herself and found gainful employment working for the city. She soon began using her access to Gotham City's computer files to research her history. When she dug too deep into her past, however, her boss promptly pushed her off a rooftop for her efforts. Her life was saved when she fell through a handily placed awning and awoke to find several cats attempting to rouse her. The incident spurred her to return to her thieving ways, and Selina fashioned a costume from the very awning that broke her fall, setting a single-minded course for a life of crime and cat burglary as Catwoman.

It wasn't long before she attracted the attention of Batman and, as if to foreshadow the romance they would later share, the date of their auspicious first meeting was Valentine's Day. On that occasion, Batman stopped Catwoman from robbing the Sunnyside Housing Project. The night's events had a huge impact on Selina. She realized that while she couldn't give up her life of crime, she would choose to steal from the rich rather than the less fortunate.

Before long, Catwoman and Batman's rooftop flirtations and verbal and physical sparring would turn into a full-blown romance. While Batman learned about Selina's identity, Catwoman was never able to discover the Dark Knight's real name, despite the intimacy of their relationship. Catwoman's criminal acts, however, constantly caused a rift between the two, and they soon returned to their old status quo, with only the occasional team-up or confrontation.

IN THE DOLLHOUSE

The daughter of the serial killer known as the Dollmaker, a twisted criminal called Dollhouse put herself in Catwoman's sights when she began kidnapping Gotham City's prostitutes and drug addicts. Afraid for the safety of those who had been taken, Catwoman investigated and discovered that Dollhouse used her victims to make macabre flesh-and-blood mannequins, positioning them like helpless living dolls, while selling their organs on the black market. With the timely help of Batman, Catwoman was able to shut down Dollhouse's sick operation.

SIZE MATTERS

Young Selina Kyle realized the benefit of her small size when she was made to commit daring robberies for the head of her group home, Miss Oliver.

ART ATTACK

Selina stumbled on Dollhouse's grisly handiwork, which the villain felt honored her family legacy and was also a form of artistic self-expression. Her victims felt quite differently.

THE GRIP OF GOTHTOPIA

In one his most ingenious “experiments” yet, the Super-Villain Scarecrow, aka Dr. Jonathan Crane, released a potent hallucinogen across Gotham City that made the entire populace believe their corrupt, shadowy metropolis had become a bright, crime-free utopia. In this world, Catwoman became Catbird, Batman’s Super Hero partner. However, it wasn’t long before the Dark Knight and Catwoman shook off the drug and brought a dramatic end to the Scarecrow’s scheme.

CATBIRD CALLS

In the faux world of Gothtopia, Catwoman became the equivalent of Robin. As Batman’s partner and lover, the role was perfect for Selina, who was disappointed when the illusion shattered.

“My world is all just shades of gray, Batman. That’s why you’ll never understand me.”

SELINA KYLE

PICK AND CHOOSE

Never afraid to leap into battle, Catwoman picks her capers very carefully, often lashing out at injustices that affect her friends or her neighborhood.

While Catwoman considers herself a solo agent, she was at one point recruited into the government’s own team of Super Heroes, the Justice League of America. Chosen for her criminal background, Catwoman was the perfect candidate to help the JLA infiltrate the Secret Society, a group of Super-Villains united under the leadership of the enigmatic Outsider.

When the Justice League of America failed to have the staying power of its inspiration—the Justice League—Catwoman found herself a part of a different type of organization altogether, the Calabrese crime family. After learning that her father—the imprisoned former mob boss Rex “the Lion” Calabrese—was still alive, Selina Kyle decided to take over the family business, believing that if she could control organized crime in Gotham City, she could actually make the city safer in the process. Ultimately, however, she couldn’t betray her natural instincts, and soon handed over the crime syndicate’s operation to her cousin Antonia, returning to her fulfilling full-time role as Catwoman.

OUT OF UNIFORM

Selina Kyle often proved as great a threat as her costumed alter ego. She mixed easily with Gotham City’s elite, while always hiding her own personal agenda.

ON THE RECORD

Catwoman has changed considerably since her debut in 1940. Originally simply called the Cat, Selina Kyle adopted a cat mask after her very first encounter with Batman. Since then, her costume and origin have evolved several times over the decades, but her role as Batman’s chief femme fatale has remained constant.

Top Cat

In her original incarnation, Selina Kyle, aka Catwoman, was a former flight attendant-turned-thief. After dozens of clashes with the Dark Knight, she turned over a new leaf and became a trusted ally of Batman’s. The two even formed a romantic relationship, learning each other’s secret identities in the process. After the cosmos-shattering events of *Crisis on Infinite Earths*, Catwoman gained a new backstory. A criminal who drifted into a life of prostitution, Selina Kyle was inspired by Batman to become a creature of the night. But unlike the Dark Knight, Catwoman focused her nighttime exploits on personal gain, becoming the quintessential cat burglar.

I LOVE PURPLE

After the events of *Batman: Year One*, Catwoman sported a gray bodysuit for a time before switching to a variation of her original purple look.

Changing ways

Having grown up in the troubled East End of Gotham City, Selina Kyle had remained very protective of her neighborhood, even as she spent most of her nights thieving from some of Gotham City’s more well-heeled areas. After a visit to her old stomping grounds, Selina decided to turn around her career as Catwoman, becoming the East End’s protector. She even retired from her life as a vigilante for a time when she had a baby. She briefly handed over the mantle of Catwoman to Holly Robinson, her loyal ally since her days as a prostitute. But Selina couldn’t keep her true calling suppressed for long, and eventually returned to her life as Catwoman.

THE SACRIFICE

After having a daughter with her friend Sam Bradley, Jr., Selina realized her lifestyle was too dangerous for a family. However, she was still devastated when she gave up her child, Helena, for adoption.

CATMAN

DEBUT *Detective Comics* #311 (Jan. 1963)

REAL NAME Thomas Blake **BASE** Gotham City; Plains of Africa

HEIGHT 6ft **WEIGHT** 179 lbs **HAIR** Brown **EYES** Green

POWERS/ABILITIES Talented inventor with high-level athletic ability; believed to have nine lives due to mystical cloth used in his costume.

ENEMIES The Riddler, Batman, Green Arrow, Catwoman, Secret Society of Super-Villains

AFFILIATIONS Secret Six

Morally ambiguous and bored, Thomas Blake became Catman to challenge Batman. After years of losing ludicrous duels with the Dark Knight and rival villain Catwoman—and despite developing true feline abilities after adopting a mystic cape of nine lives—Blake accepted his fate as a C-list super-criminal. He retreated to Africa, living a life of simplicity within a pride of lions. However, the outer world soon reclaimed Blake. He refused when the Secret Society of Super-Villains demanded he join their ranks, and in retaliation they destroyed his animal family. Outraged, Catman soon found himself accidentally leading a team of criminal rebels dubbed the Secret Six.

In various iterations, Blake and an ever-changing string of outcasts have bonded together to fight Super-Villains, demons, and psychotic maniacs. One of these was the Riddler, who forcibly formed a new team to satisfy his own perverse curiosity and play mind-games as the mysterious Mockingbird. Mercenaries for hire, the Secret Six became a family of antiheroes—doing much good as even as they did evil acts. When the team broke up, Blake returned to Africa's lion country, but constant global and Multiversal crises seem certain to bring him back into action again.

BLACK MAGIC When Black Alice was threatened by dark mystics out to stop her full powers emerging, Catman had to team up with Etrigan to protect her.

ON THE RECORD

Previously, Thomas Blake worked as a big-game hunter, tracking big cats and selling them to zoos. His cat obsession led him to a Pacific island, home to a cat cult, from whom he stole a sacred cat carving and the cloth that covered it.

Back in Gotham City, Blake became a costumed criminal equipped with feline-themed accessories inspired by Catwoman and Batman, including catarangs and a turbocharged cat-car. He eventually joined the Secret Six, before being exiled to another planet during Salvation Run.

CAT MEETS BAT Catman, in his original Batman-mimicking regalia, grapples with the Dark Knight—the enemy who originally inspired him.

CARSON, CAVE

DEBUT *The Brave and the Bold* #31 (Aug.–Sep. 1960)

REAL NAME Calvin Carson **BASE** Mobile

HEIGHT 5ft 11in **WEIGHT** 178 lbs

HAIR Brown **EYES** Blue (Left), Red/cybernetic (Right)

POWERS/ABILITIES Intergalactic robot eye; expert in geology and related sciences.

ALLIES Superman, Star Adam

ENEMIES Eclipso, Borsten Family

AFFILIATIONS Forgotten Heroes

Lab technician Calvin Carson developed a digging machine for E. Borsten & Co.—the Mighty Mole. When the US Government canceled the project, Carson

stole the vehicle and explored Earth's lower strata, becoming a leader in crypto-geology. He married Mazra P'Thrall, princess of Muldroog, and they had a daughter, Chloe. When the Government banned his explorations, Carson joined the Forgotten Heroes, helping Aquaman, the Sea Devils, Time Masters, Amanda Waller, the Justice League and Society of America.

On one deep-earth mission, a mysterious robotic spider crawled into his skull and replaced his right eye. Wilful but generally obedient, it provides Carson with sensory information, deadly ray blasts and even cross-dimensional visions and travel.

CATSEYE

DEBUT *Suicide Squad* (Vol.1) #53 (May 1991)

BASE Tokyo

HEIGHT 6ft 1in **WEIGHT** 195 lbs

HAIR Black **EYES** Brown

POWERS/ABILITIES Poison-tipped claws; enhanced speed and leaping ability.

ALLIES Yakuza, Outsiders

ENEMIES Suicide Squad

A ruthless killer bioengineered as a metahuman agent of the Yakuza crime family, Catseye's real name and origin remain a mystery. He clashed with

various members of the Suicide Squad when the covert agency went to Japan on a mission to recover a stolen cache of Russian weapons, known as the Dragon's Hoard. Several other rival groups came searching for the Dragon's Hoard as well, including the clandestine Russian Red Shadows and the Khmer Rouge.

Suicide Squad members Manhunter and Bronze Tiger were captured by the Yakuza, but freed by Katana from the Outsiders, while Catseye fought Atom for possession of the stolen weapons. Later Catseye attacked the Squad again, but was scratched by his own poison-tipped claws while fighting Bronze Tiger. Catseye met his end when he was incinerated in an explosion triggered by Deadshot.

CHAIN LIGHTNING

DEBUT *World's Finest Comics* #272 (Oct. 1981)

REAL NAME Amy

HEIGHT 5ft 4in **WEIGHT** 121 lbs

HAIR Blonde **EYES** Blue

POWERS/ABILITIES Absorption of electrical energy.

ALLIES Shazam Jr.

ENEMIES Mary Shazam

Amy's metagene kicked in during her early teens, but she was unable to control it until an unknown person provided her with a bodysuit that housed containment circuitry. Unfortunately, Amy also began suffering from dissociative identity disorder. Her dominant personality is the disturbed Amy, who tried to commit suicide in New York but was rescued by Shazam Jr., earning her lasting affection.

Her other three identities, however, are less benign. Amber is destructive; the Inner Child is a hulking brute; while Id is a small girl trapped inside the others. Together, they are known as Chain Lightning, and at different times Amy's powers appear as four distinct electrical beings. Shazam's magic lightning bolt gave all four personalities physical form, and Shazam Jr. and Mister Scarlet had to subdue them before Fawcett City was reduced to rubble. Amy then underwent treatment at S.T.A.R. Labs.

CHAMELEON BOY

DEBUT *Adventure Comics* #267 (Dec. 1959)

REAL NAME Reep Daggles

BASE 31st century Legion HQ, New Metropolis, New Earth

HEIGHT 5ft 9in **WEIGHT** 135 lbs

HAIR None **EYES** Yellow

POWERS/ABILITIES Duplication of the appearance of any object or being.

ALLIES R. J. Brande

AFFILIATIONS Legion of Super-Heroes

Reep Daggles is a Durlan—a race of shapeshifters and a controversial part of the vast intergalactic coalition called the United Planets.

A secretive member of a secretive species, Reep believes he was invited to join the Legion because his father is United Planets President R. J. Brande and the originator of the entire youth hero project.

Quietly brilliant in many fields and a skilled observer of sentients, Reep is eager to prove his loyalty to the team, sharing his origins with Brainiac 5 and Saturn Girl.

He is also constantly warning anyone who will listen that Brande is not to be trusted. He believes everything she does is provoked by a deep-seated fear of some unspecified threat, and that he and his teammates will ultimately end up being at the heart of fixing it all.

CHALLENGERS OF THE UNKNOWN

DEBUT *Showcase* #6 (Jan.-Feb. 1957)

BASE Challenger Mountain

MEMBERS/POWERS **Prof. Haley:** Skin diver and oceanographer; **Red Ryan:** Mountaineer and former circus acrobat; **June Robbins:** Computer and robotics expert; **Rocky Davis:** Wrestling champion and top strategist; **Ace Morgan:** Former test pilot and amateur sorcerer; **Bethany Hopkins:** Soldier, war veteran; **Trina Alvarez:** Healer and herbalist; **Moses Barber:** Software expert and computer hacker; **Krunch:** Reformed criminal, murderer; **Clay Brody:** Former race-car driver; **Marlon Corbett:** Top-notch pilot; **Kenn Kawa:** Software and electronics specialist; **Brenda Ruskin:** Brilliant theoretical physicist.

ENEMIES Barbatos

AFFILIATIONS Blackhawks, Doom Patrol, Justice League, New Challengers

The **Challengers of the Unknown** began in the 1950s when pilot "Ace" Morgan, wrestler "Rocky" Davis, circus daredevil "Red" Ryan, and diver "Prof." Haley survived an airplane crash on their way to appear on a radio program. Declaring that they were "living on borrowed time," the quartet united as adventurers, confronting uncanny events, mystical incursions, alien invasions, and super-criminals. They later learned that by cheating death, they no longer existed in the Book of Destiny, which led to them becoming its caretakers.

The death-cheaters' team expanded and contracted over the years—most notably admitting pioneering roboticist June Robbins—as cases became ever weirder. Eventually cut adrift from reality, they spent their time alternately countering a reality-altering menace from the Dark Multiverse, and awaiting the next crisis, sleeping in stasis within Challenger mountain. Lost for decades, they explosively returned to battle the invasion of Barbatos and his Dark Knights. Recently the original Challengers learned that a Dark Multiverse version of Prof. had formed a new team. Soldier Bethany Hopkins, healer Trina Alvarez, computer hacker Moses Barber, and professional thug Krunch were duped into helping him recover the scattered power-filled remains of a Dark Multiverse god. Initially violently at odds, old and new Challengers ultimately united and they now remain ready for the next unknown...

ON THE RECORD

Particularly susceptible to reality-alterations, the Challengers re-emerged after *Flashpoint* as survivors of a TV reality show that went badly wrong. Presenter Clay Brody, his producer June, and pilots Ace and Maverick crashed a plane full of contestant in the Himalayas. All but Ace reappeared later, after recuperating in Nanda Parbat, where a priest gave them a real-life mission: to beware the unknown, but also to challenge it and, in so doing, save the world.

INTO THE UNKNOWN

Unreal life had no rewrites or second takes for these Challengers of the Unknown.

CHARYBDIS

DEBUT *Aquaman* (Vol. 5) #1 (Aug. 1994)

BASE Seven Seas

HEIGHT 6ft 4in

WEIGHT 237 lbs

EYES Black

HAIR Black

POWERS/ABILITIES Absorbs talents and powers of others; breathes underwater as Piranha Man.

ENEMIES Aquaman

PIRANHA MAN

Charybdis transformed into Piranha Man when he was left for dead and attacked by piranhas. He was then able to communicate with fish.

Charybdis and his wife Scylla were terrorists named after two horrific characters from Greek mythology (Charybdis was a deadly whirlpool; Scylla a multiheaded monster). Scylla died when a bomb exploded in her hands, and her death drove Charybdis insane. After this devastating incident, he was seen displaying vast powers and a hatred for Aquaman. Defeating the Atlantean King in battle, Charybdis took his powers and caused the loss of Aquaman's hand, before the villain was shot by Dolphin. Close to death, Charybdis absorbed the essence of the piranhas that had eaten Aquaman's hand, preserving his life and allowing him to evolve into Piranha Man. He aimed to absorb every last shred of Aquaman's powers, leaving him for dead. The Sea King finally got the better of Piranha Man, but not before seeing his loved ones suffer.

Charybdis would later reappear as a member of the group Mera, assembled to hunt Aquaman when he took up arms against his former kingdom of Atlantis.

CHASE, CAMERON

DEBUT *Batman* #550 (Jan. 1998)

BASE New York City

HEIGHT 5ft 5in **WEIGHT** 129 lbs

EYES Green **HAIR** Blonde

POWERS/ABILITIES Can dampen superhuman powers; skilled investigator; firearms and unarmed combat training.

ALLIES Manhunter, Supergirl

ENEMIES Justice League

AFFILIATIONS Department of Extranormal Operations, FBI

Cameron Chase has disliked costumed crime fighters since childhood when her father, minor hero Acro-Bat, was killed by Dr. Trap. She works as one of the top agents in the Department of Extranormal Operations, which monitors Earth's metahuman and supernatural beings. Working under Director Bones, she was sent to unmask Batwoman and Batman so they could be controlled though their secrets. Chase followed Bones' orders even when he transformed her hunt for Batwoman into Operation Batrunk, releasing dangerous villains into Gotham City to flush out Batman. She held Gotham under martial law on his orders, but when she learned Bones had gone rogue, she quit the D.E.O. to become a private investigator.

Chase later resumed D.E.O. operations, providing a secret identity, resources, and backstory to Supergirl after her powers misfired. Chase later worked with the FBI, exacting punishing oversight on Superman's actions as he pursued the Invisible Mafia.

CUT TO THE CHASE

Agent Cameron Chase has honed multitasking to a razor-fine art.

CHECKMATE

DEBUT *Action Comics* #598 (Mar. 1988)

BASE Mount Rushmore; the Castle, Swiss Alps

NOTABLE MEMBERS Maxwell Lord, Sarge Steel, Harvey Bullock, Sasha Bordeaux, Count Vertigo

ENEMIES Leviathan, Spyril

AFFILIATIONS A.R.G.U.S., D.E.O., S.H.A.D.E.

Checkmate was an international counterintelligence organization, reportedly created after World War II. Its last iteration was commanded by Maxwell Lord, balancing the needs of world governments while maintaining their independence. Characterizing itself as a "global peace agency," the group was notorious for its questionable methods. Recent operations involved hunting O.M.A.C.—a biotechnologically enhanced version of Project Cadmus scientist Kevin Kho. O.M.A.C. was created by rogue sentient satellite Brother Eye who sought to destroy Cadmus. Checkmate agents—led by Sarge Steel and including Maribel, Little Knipper, and later, Mekkari—failed to capture O.M.A.C., after which Lord sought the assistance of S.H.A.D.E., despite Sarge Steel's objections.

Ultimately Brother Eye attempted to assassinate Lord, but was destroyed in battle at the Mount Rushmore HQ. Lord canceled the hunt for O.M.A.C., deeming it no longer a threat to global interests because it was once again under the control of Kevin Kho's personality. Cold war between the intelligence agencies resumed. Checkmate was totally unprepared for the assault by Leviathan, which eradicated and absorbed many groups such as Kobra, Spyril, A.R.G.U.S., and themselves.

WHITE KNIGHTS?
Sarge Steele, Maribel, and Mekkari were members of Checkmate, with Maxwell Lord as their leader.

PERSONAL TOUCH
Despite his mind-control powers, Maxwell Lord loved getting his boots on the ground and his hands dirty.

ON THE RECORD

Previous versions of Checkmate were organized by Amanda Waller as an independent arm of Task Force X, a quasi-governmental bureau overseeing black-ops missions deemed vital to US interests. Task Force X also controlled the Suicide Squad, foreshadowing Waller's later work assembling the squad when she was in control of A.R.G.U.S.. Maxwell Lord later supplanted Waller and took control of Checkmate, killing the Blue Beetle along the way and then unleashing O.M.A.C.

KOBRA STRIKES
Checkmate's enemies were numerous, but none was more deadly—or persistent—than Kobra and his minions.

CIRCE

DEBUT *Wonder Woman* (Vol. 1) #37 (Sep.-Oct. 1949)

BASE The Island of Aeaëa

HEIGHT 5ft 11in **WEIGHT** 135 lbs

EYES Yellow **HAIR** Red

POWERS/ABILITIES Extremely powerful sorceress; able to transform humans into superhumans or animal/human hybrids; teleportation; production of illusions and alteration of physical objects; extremely long-lived.

ALLIES Magog, Ani-Men

ENEMIES Wonder Woman, Superman, Hippolyta

Stories of the nefarious witch Circe date back to the days of ancient civilization and legendary tales such as "The Odyssey." While determining fact from fiction can sometimes be difficult, when it comes to the sorceress' past, it is clear that Circe has had a very longstanding rivalry with Wonder Woman's mother, Hippolyta.

When Hippolyta was a young queen, she accepted Circe's services of enchanting the Amazon's weapons in exchange for male Amazon heirs to serve as human fodder for Circe's army of animal/human hybrids called Ani-Men. When Hippolyta backed out of her deal, making an alternative agreement with the god Hephaestus instead, Circe was enraged and began plotting her revenge. She took it out on Wonder Woman, lashing out at the Amazon by empowering a young man named David Reid with a hatred of Super Heroes. Circe transformed Reid into the powerful Super-Villain Magog and unleashed him on Superman, while she personally attacked Wonder Woman. Neither succeeded in their attempt to take down the heroes.

BEAUTY AND THE BEAST
Circe is not above using her physical charms to get weak-willed men to do her bidding.

ON THE RECORD

Circe originally challenged the Golden Age Wonder Woman, then became a recurring figure in Diana's Rogues Gallery in the early 1980s. Following Circe's reinvention after the events of *Crisis on Infinite Earths*, this modern version of the sorceress fitted perfectly with a Wonder Woman more grounded in Greek mythology than ever before.

Replacing The Cheetah as Wonder Woman's most dangerous foe, Circe even earned a place in the Injustice Gang during the late 1990s reboot of the JLA.

GOADING THE GODS
One of Circe's most ambitious plots was to pit god against god in the miniseries *War of the Gods*. Even with an army of the undead behind her, Circe fell to Wonder Woman and her allies.

CHEETAH, THE

DATA

DEBUT *Wonder Woman* (Vol. 2) #7 (Aug. 1987)

REAL NAME Dr. Barbara Ann Minerva

HEIGHT 5ft 9in **WEIGHT** 120 lbs

EYES Brown **HAIR** Red

POWERS/ABILITIES Channeling the spirit of The Cheetah grants superhuman strength and agility, razor-sharp claws, as well as bloodlust.

ALLIES Circe, Etta Candy

ENEMIES Wonder Woman, Amazons, Veronica Cale

AFFILIATIONS Secret Society of Super-Villains, Menagerie, Suicide Squad, Godwatch, Legion of Doom

One of the first friends Wonder Woman made when she left Themyscira's shores, Barbara Ann Minerva betrayed Diana's trust and became The Cheetah. Whether with the Suicide Squad, the Secret Society of Super-Villains, the Menagerie, or the Legion of Doom, The Cheetah has earned her place as one of the fiercest Super-Villains in the DC universe.

Barbara Ann Minerva grew up in Oakstone Abbey, the daughter of Lord Cavendish, a strict man who did not share Barbara's infatuation with Greek mythology. However, Barbara excelled at her studies and never lost her fascination with the ancient Greeks, despite her father burning her childhood toy sword and shield.

By age 26, Barbara had two PhDs, spoke eight languages fluently, and could speak another seven nearly as well. She embarked on a quest to hunt down the Amazons, believing the ancient group of warrior women to be much more than merely a myth. When Diana of Themyscira

escorted Steve Trevor to the United States, Minerva was brought in to meet with her as a resident expert. She soon discovered Diana was a true Amazon, and the two became close friends. Meanwhile, Minerva continued her archeological pursuits, and began searching for the god Urzkartaga. But when Minerva found herself transformed into the villainous Cheetah by Urzkartaga while in a temple in a remote rainforest, Wonder Woman was unable to rescue her. Over the years, The Cheetah became one of Wonder Woman's most notorious villains. Despite all their clashes, Diana still saw the good in Barbara Ann, and eventually helped her defeat Urzkartaga, curing The Cheetah in the process. However, another of Wonder Woman's enemies, Veronica Cale, soon blackmailed Barbara Ann into reclaiming The Cheetah role. She was injected with Urzkartaga's DNA and transformed back into a Super-Villain. Her criminal career escalated as she joined forces with Lex Luthor's Legion of Doom. Given the fabled God Killer sword by Luthor, The Cheetah killed the goddess Aphrodite and then set her sights on the goddess Hera in a mad quest to "free" Wonder Woman from any obligation to her godly patrons. Diana condemned The Cheetah's horrific actions and defeated her yet again, ensuring their rivalry would continue.

ON THE RECORD

Two of The Cheetah's aliases—Priscilla Rich and Sabrina Ballesteros—mirror the identities of previous Cheetahs. Priscilla Rich was a socialite and also the first Cheetah, a Golden Age adversary of Wonder Woman. Priscilla's niece Debbi Domaine succeeded her in 1980.

Years after *Crisis on Infinite Earths*, corporate raider Sebastian Ballesteros was the fourth Cheetah. He usurped the powers of archaeologist Barbara Minerva after making a bargain with the African plant-god Urzkartaga.

Minerva later killed Ballesteros and reclaimed the title of The Cheetah.

A HOST FOR HUNTING Ballesteros convinced Urzkartaga to abandon its female host and use him as the conduit for the ancient powers of The Cheetah.

DEFENDING THE GODS

Wonder Woman was pushed to the limits of her powers when The Cheetah gained the God Killer sword and embarked on a mission to kill Aphrodite and Hera.

FELINE PHYSIOLOGY

The Cheetah has superhuman strength, speed, and stamina, has razor-sharp claws, and an unquenchable hunger for human flesh.

Wonder Woman (Vol. 1) #6

(Fall 1943) Priscilla Rich suffers from a split personality that leads her to become the first The Cheetah out of jealousy toward Wonder Woman. She joins Villainy Inc.

Wonder Woman (Vol. 2) #206

(Sep. 2004) After being outmaneuvered by Sebastian Ballesteros and losing her powers, Barbara Minerva gets her revenge, killing him and becoming The Cheetah.

Final Crisis: Resist #1 (Dec.

2008) Unaffected by the Anti-Life Equation, The Cheetah has a brief affair with Snapper Carr, who helps her join Checkmate and fight against Darkseid.

CHEMO

DEBUT *Showcase* (Vol. 1) #39 (Jul.–Aug. 1962)
BASE Mobile
HEIGHT Variable: 25ft or far taller
WEIGHT Variable: 5,697 lbs or more
EYES Red **HAIR** None
POWERS/ABILITIES Can spew dangerous, extremely toxic, experimental chemicals from his mouth; enhanced strength and endurance; extremely limited intelligence.
ENEMIES Metal Men, Superman

Originally Chemo was a giant plastic waste container used by chemist Dr. Ramsey Norton to store his failed experiments. The chemicals achieved sentience and animation, killed Ramsay, and went on a destructive rampage until stopped by the Metal Men. Never really alive, toxin-spewing Chemo has been “reborn” many times since. Once it even combined with Dr. Will Magnus’ AI responsometers (the brain of his robot heroes), evolving into a pitiless killer rather than a randomly reacting monster.

When natural laws were disrupted by Nth Metal from the Dark Multiverse, a new Chemo emerged in a secret Russian base, but was destroyed thanks to the foresightedness of Magnus and the Metal Men. Whether the liberated chemical ooze currently seeping through New York’s sewers will reform again is anybody’s guess.

CHESHIRE

DEBUT *The New Teen Titans* (Vol. 1) Annual #2 (Dec. 1983)
REAL NAME Jade Nguyen
BASE ‘Eth Alth’eban, Mobile
HEIGHT 5ft 9in **WEIGHT** 135 lbs
EYES Black **HAIR** Black
POWERS/ABILITIES Master martial artist and fighter; expert in all poisons.
ENEMIES Justice League, Arsenal, Titans, Batman, Wonder Woman, Green Arrow, the Untitled, Aquaman, the Others
AFFILIATIONS Secret Society of Super-Villains, Ninth Circle

In both the League of Assassins and terrorist organization Mayhem, the mercenary assassin Cheshire earned her reputation as one of the most dangerous people on Earth. She employs bleeding-edge technology, ancient weapons, and poisoned fingernails: a match for Batman, Wonder Woman, and Green Arrow.

Although ruthlessly evil, Cheshire can show a softer side, especially for Roy Harper aka Arsenal. Once she stole Harper’s hat, flirting with him before freeing him from imprisonment. Rumors abound of romantic liaisons, and when she attended his funeral after he was murdered in the mental health facility Sanctuary, she was seen to shed a tear—perhaps the only one in her adult life.

CHIEF, THE

DEBUT *My Greatest Adventure* (Vol. 1) #80 (Jun. 1963)
REAL NAME Dr. Niles Caulder
HEIGHT 5ft 10in **WEIGHT** 215 lbs
EYES Red
HAIR Blue
POWERS/ABILITIES Genius level intellect; incredibly persuasive; uses experimental sciences.
ALLIES Beast Boy, A.R.G.U.S.
ENEMIES Crime Syndicate, Lex Luthor
AFFILIATIONS The Doom Patrol

A wheelchair-bound mad scientist, Dr. Niles Caulder has a shared past with Dr. Caitlin Fairchild, and even spent time helping her team of runaway

metahumans, the Ravagers. But Caulder is also a man of secrets, who successfully hid the truth that his ally was not the true Caitlin Fairchild, but a clone of the original.

Later, Caulder formed his own Super Hero team, known as the Doom Patrol. A metahuman support group, it made heroes out of people on the brink of death. After his original team was wiped out by the Crime Syndicate, he recruited new members, including Robotman, Negative Man, Element Woman, and Elasti-Girl. They later battled with the Justice League over the fate of Power Ring (Jessica Cruz) before disappearing.

CHRONOS

DEBUT *The Atom* (Vol. 1) #3 (Oct.–Nov. 1962)
REAL NAME David Clinton
BASE Ivy Town, Connecticut; Mobile
HEIGHT 5ft 10in **WEIGHT** 175 lbs
EYES Blue **HAIR** Black
POWERS/ABILITIES Time manipulation, time-travel; clock-based weapons and gimmicks, genius IQ.
ENEMIES Atom (Ray Palmer), Atom (Ryan Choi), Justice League of America, Secret Society, Booster Gold, Blue Beetle
AFFILIATIONS Secret Society of Super-Villains, Injustice Gang, Injustice League, Crime Champions, Time Foes

When the Outsider—Alfred Pennyworth of Earth-3—traveled to the dimension of the Justice League, he paved the way for the arrival of his master, Owlman, and his allies,

the Crime Syndicate. To that end, he gathered together some of Earth’s most dangerous Super-Villains to form the Secret Society. Desiring an HQ that could shift through time and space, the Outsider shackled and drained the energies of the time-traveling villain, Chronos, to fuel the hideout’s time leaps.

Little else is known about the modern-day incarnation of Chronos. However, before the reality-altering event *Flashpoint*, Chronos was a recurring thorn in the side of the size-changing Super Hero known as the Atom.

CLOCK KING

DEBUT *World’s Finest Comics* #111 (Aug. 1960)
REAL NAME William “Billy” Tockman
BASE Seattle
HEIGHT 6ft 1in **WEIGHT** 235 lbs
HAIR Black **EYES** Brown
ABILITIES Exceptional criminal mind.
ENEMIES Green Arrow, Richard Dragon

Seattle crime boss Billy Tockman used a clock-repair shop called Clock King as cover for his illegal business dealings. When Green Arrow began complicating

business for Seattle’s gangs, Tockman proposed a truce for them to unite against their common enemy. His criminal counterparts were not keen, and two of them—Jin Fang and Jimmy MacGowan—were soon killed, but not by Green Arrow. Their real enemy was Richard Dragon. Tockman cut a deal with John Diggle to take down Dragon. In return Green Arrow would ignore Tockman’s operations. However, Dragon outfoxed them, forcing Tockman to try to kill Q-Core employees Naomi Singh and Henry Fyff. In the event, Green Arrow’s daughter, Emiko, took Tockman down.

Pre-*Flashpoint*, the Clock King was a clock-faced costumed criminal living on borrowed time, who was seemingly killed on a mission with the Suicide Squad.

CLUEMASTER

DEBUT *Detective Comics* #351 (May 1966)
REAL NAME Arthur Brown
BASE Gotham City
HEIGHT 5ft 11in **WEIGHT** 169 lbs
HAIR Blond **EYES** Blue
POWERS/ABILITIES Various weapons and defensive items built into suit.
ENEMIES Batman
AFFILIATIONS Injustice League, Suicide Squad

Celebrity game-show host Arthur Brown lost his job after insulting a contestant. He then turned to crime as the Cluemaster, daring his pursuers to catch him by leaving clues at the scene of every crime. Batman discovered his secret identity, but let him go as Brown was providing for his family. Soon after, Cluemaster proposed to Lincoln March that they unite to bring down the Dark Knight for good. With a huge swath of Gotham City’s criminals, they exhausted Batman by executing several attacks at once.

Cluemaster then confronted Batman on top of Beacon Tower. He taunted him, but became enraged when Batman called him a second-rate Riddler who could never have pulled off the operation by himself.

Cluemaster was killed by Lincoln March as he was about to shoot Batman. His ultimate plot was foiled by a more subtle schemer—proving Batman right.

COBALT BLUE

DEBUT *Speed Force* #1 (Nov. 1997)
REAL NAME Malcolm Thawne
HEIGHT 5ft 11in **WEIGHT** 179 lbs
HAIR Blond **EYES** Blue
POWERS/ABILITIES Possesses a gem whose flame can steal The Flash’s speed and displays other magical powers.
ENEMIES The Flash
AFFILIATIONS Secret Society of Super-Villains

The identical twin brother of Barry Allen—the second Flash—Malcolm Thawne was stolen and raised by an abusive family of crooks. When he learned of Barry’s existence and the loving family he would never know, he used his sorcery to vent his jealousy. As Cobalt Blue, he drew power from a mystic blue flame and a crystalline talisman that focused his anger and could steal Barry’s super-speed.

Barry’s death during the *Crisis on Infinite Earths* appeared to have cheated Thawne of his revenge, so he traveled through time, trying to exterminate Allen’s descendants.

The third Flash, Wally West, finally ended the menace of Cobalt Blue by running at such speeds that Thawne’s magical gem overloaded from the excess energy. Thawne was presumably gone, but his talisman—containing his consciousness—would be passed onto Thawne’s hate-filled progeny.

COMMANDER STEEL

DEBUT *Justice League of America* Annual #2 (Oct. 1984)
REAL NAME Henry “Hank” Heywood III
BASE Sanctuary
HEIGHT 5ft 11in **WEIGHT** 180 lbs
HAIR Red **EYES** Blue
POWERS/ABILITIES Enhanced steel physique gives him superhuman strength, speed, and durability.
ALLIES Henry Heywood I
ENEMIES Professor Ivo, Despero
AFFILIATIONS Justice League of America, Justice League Detroit

Henry Heywood III took over the legacy of his grandfather—the first Commander Steel—after the old man saved his grandson’s ailing body with steel

enhancements like his own. The metal gave Heywood superhuman strength, speed, and durability, and he joined the Justice League Detroit. When he was fatally injured fighting one of Doctor Ivo’s androids, his body was put on life-support, but it was eventually torn apart during an attack by Despero.

Commander Steel was one of the heroes resurrected with a Black Lantern ring during the *Darkest Night* event, but he was “killed” once more. Somehow alive again, Commander Steel took refuge at the Super Hero facility known as Sanctuary.

CLAYFACE

DATA

DEBUT *Detective Comics* (Vol. 1) #40 (Jun. 1940)

REAL NAME Basil Karlo

BASE Gotham City

HEIGHT Variable **WEIGHT** Variable **EYES** Yellow **HAIR** None

POWERS/ABILITIES Able to shift his claylike form into a variety of weapons including giant mallets and blades; superhuman strength that increases in proportion to his size; can become an exact clone of someone simply by touching them; gifted actor able to mimic a variety of voices and mannerisms.

ALLIES Poison Ivy, Batwoman, Ragman, The Penguin, Secret Society of Super-Villains, Orphan

ENEMIES Batman, the Batman Family

AFFILIATIONS The Unknowns, Gotham Knights

FEAT OF CLAY

Clayface briefly tried to reform his ways while suffering from amnesia. He joined the short-lived Super Hero team led by Batwoman called the Unknowns.

his father's death. His reaction was so dramatic that he crashed his car, causing irreparable damage to his face. In a desperate attempt to continue his career, Karlo applied some of the Daggett Chemical product Renu on his face—a substance not meant for contact with human skin. He was able to mold his scarred visage back into the spitting image of his former self, but he knew it would run out before the filming on *Second Skin* wrapped. When Daggett Chemical claimed they didn't make Renu any longer, Karlo traveled to Gotham City and broke into several of their factories until he was caught by Batman.

The Dark Knight tried to get Karlo to testify against the corrupt Daggett, but Karlo instead tried to rob a police evidence locker. In the resulting scuffle, he was accidentally doused in dozens of cans of shattered Renu, altering him forever into the villain Clayface. Seeking revenge against Hollywood and Batman, Clayface became one of the Dark Knight's most powerful enemies. He has attempted to reform from time to time, most notably as a member of the Gotham Knights, but he has since returned to his criminal ways.

ON THE RECORD

In the long history of DC Comics, several villains have taken the name Clayface. The Golden Age Basil Karlo first adopted the villainous identity as a simple masked murderer. In the 1960s, the Clayface name was appropriated by Matt Hagen, who stumbled on a pool of unusual liquid that gave him shapeshifting abilities.

Hagen died during *Crisis on Infinite Earths*, but not before Preston Payne stole his name as a tortured Clayface with a melting touch. The villain Kobra even created his own Clayface in the form of Lady Clay—Preston's future lover and the mother of their son, Cassius, aka Clayface V.

COMPOSITE CLAYFACE Basil Karlo injected himself with a mix of Hagen, Payne, and Fuller's blood, turning into the modern incarnation of Clayface.

MAN WITHOUT A FACE Clayface's powers eventually caused him to lose his own DNA, becoming those he mimicked right down to the cellular level.

CLASSIC STORIES

***Detective Comics* (Vol. 1) #298 (Dec. 1961)** The second Clayface, Matt Hagen, employs fantastic shapeshifting powers that truly earn him his villainous title.

***Batman* (Vol. 1) Annual #11 (Nov. 1987)** The tragic life of the third Clayface, Preston Payne, is examined in detail, including his "romance" with a lifeless mannequin.

***Detective Comics* (Vol. 1) #604-607 (Sep.-Nov. 1989)** Batman and his ally Looker fight the combined might of the united Clayfaces, with Basil Karlo transforming himself into the Ultimate Clayface.

DEBUT *Swamp Thing* (Vol. 2) #37 (Jun. 1985)

REAL NAME John Constantine

BASE Mobile

HEIGHT 5ft 11in

WEIGHT 158 lbs

HAIR Blond **EYES** Blue

POWERS/ABILITIES Access to powerful mystical artifacts; vast knowledge of magical and arcane rituals.

ALLIES Zatanna, Swamp Thing, Charles "Chas" Chandler

ENEMIES Cult of the Cold Flame, Upside-Down Man, Neron, Nergal

AFFILIATIONS Justice League Dark

FROM THE SWAMP
John Constantine befriended Swamp Thing years ago and helped the muck monster discover his connection to the Green.

planted by her father to later rid the world of the threat of the Otherkind. The pair did not see each other again until John tracked Zatanna down after learning of the Enchantress' separation from her human host, June Moone, and the threat she posed to the world. He was instrumental in bringing together the Justice League Dark team (including Zatanna) to fight the Enchantress, reuniting the villain with her host, despite the team's objections.

As a member of the Justice League Dark, Constantine helped battle an invasion from Earth-3's Crime Syndicate and the threat of the sorceresses known as the Cult of the Cold Flame. He has also been key in stopping many other threats from beyond, including recent plots by the demon Neron. While not officially a current member, Constantine continues to work with the newest incarnation of the Justice League Dark, helping them against the evil Otherkind and their nefarious leader, the Upside-Down Man.

ON THE RECORD

Constantine's cynicism, cigarettes, and trench coat are constants in his history across universes and storylines. However, his path to occult prominence differed in his first incarnations.

After a traumatic childhood and a stint with a touring punk-rock band, John tried magic in an ill-fated ritual that ended with a demon capturing the girl he had intended to help. Shell-shocked, he spent time in a mental institution before embarking on a career as a paranormal investigator. Mistrusted by friends and enemies, he has a solid partnership with the Swamp Thing, who has known him since his earliest days in the paranormal business.

BOYS ON FILM

When a US cable channel wanted to film a documentary on his old band *Mucous Membrane*, John found himself looking into strange goings-on in Newcastle.

UNHOLY SMOKE
Constantine works best behind the scenes, manipulating other people. But, when the occasion calls for it, he can unleash his own formidable powers.

CLASSIC STORIES

***Hellblazer* #11 (Nov. 1988)** The tragic story of the Newcastle Crew—a loose group of young occult investigators who try, and fail, to save the child Astra Logue from the demon Nergal.

***Swamp Thing* (Vol. 2) #46 (Apr. 1986)** Constantine introduces the Swamp Thing to the Parliament of Trees, setting the stage for the Swamp Thing's ascent into the role of Avatar of the Green.

***Hellblazer* #41-46 (May-Oct. 1991)** John's past and bad habits catch up with him all at once as he faces terminal lung cancer and a devil determined to collect his soul.

FIGHT FOR ZATANNA
Nick Necro and John Constantine battled each other. One of them had to be sacrificed if the woman they both loved, Zatanna, was to be saved.

COMEDIAN

DEBUT *Watchmen* (Vol. 1) #1 (Sep. 1986)

REAL NAME Edward Blake

BASE New York City

HEIGHT 6ft 2in **WEIGHT** 225 lbs **EYES** Brown **HAIR** Black

POWERS/ABILITIES Highly skilled with weapons, hand-to-hand combat, counterintelligence, sabotage, and survival techniques.

ALLIES None

ENEMIES Moloch, Ozymandias

AFFILIATIONS Crimebusters, the Minutemen

Edward Blake used the alias of the Comedian, although not many people who met him came away laughing. He had leapt at the chance to join the Super Hero team known as the Minutemen, hoping he could use it to his advantage somehow. But his time with the Minutemen ended in disgrace after teammate Hooded Justice caught him assaulting Silk Spectre. However, his public image was still that of a crime-fighting hero, and the US government employed him to boost morale as the personification of American patriotism.

Service in the Pacific during World War II changed Comedian forever. The atrocities he saw hardened his heart and he became ever more ruthless. However, an unlikely reconciliation with the former Silk Spectre resulted in a daughter, Laurie, although she would not know who her real father was until she was an adult. In 1985, Comedian discovered a plot by the former hero Ozymandias to destroy half of New York City. Rather than risk Comedian revealing the truth, Ozymandias threw him out of a window to his death. It is believed that Doctor Manhattan went back in time to transport Comedian mid-fall to another Earth inhabited by heroes and villains, where he pursued Ozymandias. Lex Luthor later sent Comedian back to his former reality — still falling from his apartment building.

SERVICE WITH A SMILE

The Comedian was notorious for finding the humor in even the bleakest situation, and so it was only natural the bright yellow smile badge would catch his eye while he was on a secret mission for one of his former teammates.

HEIGHT 6ft 2in (human); variable (reptiloid)

WEIGHT 200 lbs (human); variable (reptiloid)

EYES Brown (human); green (reptiloid)

POWERS/ABILITIES Serpentine contortionist; enhanced speed, reflexes, and strength; venomous, fanged bite; near-frictionless movement; prehensile tail; scaling sheer surfaces; crushing prey.

ALLIES Hellgrammite

ENEMIES Batman, Black Canary, Nightwing, Huntress, Batgirl

AFFILIATIONS Snake Gang, Secret Society of Super-Villains, Black Lantern Corps

AMBUSH PREDATOR

For all his reptilian prowess and mystical augmentation, Copperhead was only a real threat when he could take his opponents by surprise.

Career criminal Copperhead

utilized a technologically advanced snake-themed costume that mimicked the evolutionary advantages of various reptiles. However, his reputation for infallibility was ruined as soon as he came up against Super Heroes. A ruthless adversary for regular police, he became something of a joke among metacriminals.

On a frustrating downward spiral, Copperhead sold his soul for increased power and was mystically transformed into a snake-human hybrid. Sadly, although the transformation granted him lethal natural powers, it also diminished his intellect. He became a brutish thug, enslaved to the carnivorous appetites of the reptiles he embodied, his body and mind gradually

regressing to those of a savage beast. Still ferociously dangerous, Copperhead became an enforcer and assassin in groups like the Secret Society of Super-Villains. Arrogant and over-confident, he was easily killed by Deathstroke the Terminator during the Crime Syndicate's invasion. Resurrected after Rebirth, Copperhead now works with reptilian criminals in the Snake Gang, but is no match for Batgirl's Birds of Prey team.

COPPERHEAD II

DEBUT *All-Star Batman* (Vol. 2) #5 (Nov. 2016)

REAL NAME Unknown

BASE Central City

EYES Green **HAIR** Blonde

POWERS/ABILITIES Advanced unarmed combat training; expertise with poisons.

ENEMIES The Flash, Batman, Captain Cold, Superman

A former mercenary and assassin, a mystery woman now uses the name Copperhead. She began her rise to the top rank of Super-Villains after she returned to Central City to secure her family's former position as the leading crime gang in the region. When Captain Cold organized his fellow Rogues into an old-fashioned crime-syndicate to rule Central City's underworld, Copperhead used her expertise and mercenary contacts, hiring Super-Villains such as Shrapnel, Black Spider, and the Trigger Twins to even the odds. Their deadly gang war imperiled the entire city and soon involved the city speedster heroes.

Playing a devious game, she called a truce with Cold to remove The Flash and Kid Flash, and seemed to be caught unprepared when the Rogues betrayed her. However, after the dust settled, the Rogues were trapped by The Flashes, and Copperhead walked away, free to continue her efforts. She later attacked *Daily Planet* reporters who were investigating her, and was arrested by Superman and remanded to the Super-Villain penitentiary, Iron Heights.

DEADLY SCHEMER

The mystery woman known as Copperhead caused mayhem in Central City. She is now behind bars, but for how long?

COSMIC BOY

DATA

DEBUT *Adventure Comics* (Vol. 1) #247 (Apr. 1958)

BASE 31st-century New Metropolis

REAL NAME Rokk Krinn

HEIGHT 5ft 7in **WEIGHT** 145 lbs

EYES Brown **HAIR** Black

POWERS/ABILITIES Generation and manipulation of magnetic fields; unwavering dedication and devotion to the concept of the Legion; expert fighter; Legion flight ring.

ALLIES Shadow Lass, Lightning Lad, Saturn Girl

ENEMIES Crav, the General Nah; Mordru

AFFILIATIONS Legion of Super-Heroes

LEGIONNAIRES 3
The original three Legionnaires—Saturn Girl, Cosmic Boy, and Lightning Lad—leapt into action when defending President R.J. Brande from a Horraz attack.

R.J. Brande. As Brande was discussing forming not just a Young United Planets, but something more, the group was attacked by alien Horraz forces. The three young heroes acted quickly and without hesitation, stopping the attack and saving the life of their president.

As a result, Brande petitioned the United Planets to form a Legion of Super-Heroes—a group of young heroes inspired by 21st-century teams like the Justice League and the Teen Titans. While she met with some resistance at first, Brande was ultimately successful, and the Legion set up shop in New Metropolis.

Cosmic Boy was the first elected leader of the Legion of Super-Heroes and remained in that position when the team decided to recruit Superboy (Jon Kent) from the past. Rokk led a team to Rimbor in an attempt to smooth over recent diplomatic issues with that planet's leader, Crav, the General Nah. When the conflict escalated, he imprisoned Crav and helped battle his attacking forces. Despite facing setbacks like losing his position as Legion leader to Ultra Boy, Cosmic Boy continues his service with the 31st-century's premier Super Hero team.

ON THE RECORD

In every continuity, Cosmic Boy had a unique bond with Garth, Imra, and Superboy: a deep connection beyond even Legion camaraderie. When the adult Superman was captured by the Legion of Super-Villains, Rokk led his friends back in time to rescue him.

On a prior occasion, following *Crisis on Infinite Earths*, Rokk learned history had changed, with Superboy now never becoming a Legionnaire. Cosmic Boy and his girlfriend, Night Girl, were catapulted to the End of Time, where their struggle against Time Trapper ended inconclusively; they never realized that they had been allowed to escape.

MAGNETIC INTERFERENCE
Cosmic Boy was always a hero who fought as much with his mind as with his mighty magnetic powers.

CLASSIC STORIES

***Adventure Comics* (Vol. 1) #247 (Apr. 1958)**

History-loving Cosmic Boy leads his friends back in time to recruit Superboy and play a little joke on the mythic Boy of Steel.

***Legion of Super-Heroes* (Vol. 2) #297 (Mar. 1983)**

After his family are caught in a terrorist nuclear strike, the usually stable, stoic Cosmic Boy goes on a fury-fueled rampage of vengeance.

***Legion of Super-Heroes* (Vol. 3) #62 (Jul. 1989)**

With the Magic Wars devastating the laws of reality, Rokk's younger brother Pol—fresh out of the Legion Academy—sacrifices his life to save the universe.

YOUNG UNION
When Superboy joined the Legion, Cosmic Boy and Shadow Lass had just begun a romance, referred to in 31st-century terms as a "union."

FORCE OF NATURE
Rokk Krinn's most potent talent was his ability to attract valiant, idealistic youngsters to the Legion, and to shape them into universe-saving heroes.

COURT OF OWLS

DATA

DEBUT *Batman* (Vol. 2) #1 (Nov. 2011)

BASE Originally Gotham City, now global

NOTABLE MEMBERS Benjamin Orchard, John Wycliffe, Maria Powers, Joseph Powers, Sebastian Clark, Lincoln March, Robin (Damian Wayne), Dick Grayson, Nightwing

ALLIES Army of Talons and fellow secret Owl members

ENEMIES Batman, the Batman Family, Talon (Calvin Rose), Bane, Mr. Freeze, The Penguin

AFFILIATIONS High society around the globe

"Beware the Court of Owls, that watches all the time, ruling Gotham from a shadowed perch, behind granite and lime. They watch you at your hearth, they watch you in your bed, speak not a whispered word of them or they'll send the Talon for your head." That rhyme about the Court of Owls is as old as Gotham City itself, but as Batman has recently discovered, this supposedly urban legend is very real and very dangerous.

FOWL PLAY

The Court of Owls uses assassins known as Talons to do their bidding. They kill at night, in an unseen fashion and covering up any signs of wrongdoing.

While the Dark Knight only recently found proof of the Court's existence, there have been tales of their activity as far back as 1862, when they unleashed a Talon called the Gotham Butcher on political targets. Instead of killing his prey, as intended, and disappearing into the night, the Talon made a spectacle of his murders and attracted the attention of the newspapers. In 1891, a photographer tried to expose the Court of Owls' nefarious activities and was hanged for his actions. And in 1914, Court member Benjamin Orchard punished Gotham City's mayor and imprisoned him in the Court's labyrinth that runs beneath the city streets.

Batman discovered that same labyrinth while investigating the Court of Owls. He was forced to run a gauntlet and fight off a powerful Talon determined to break him. Batman soon deduced that his associate Lincoln March was actually a member of the Court's ranks and was attempting to make off with its fortune by betraying them. While the Dark Knight successfully defeated crazed March—who insisted he was Bruce Wayne's brother—it was too late to prevent the villain from poisoning a roomful of the Court's most valuable members. March would later wheedle his way back into the Court of Owl's good graces when he recruited Dick Grayson into their clandestine organization. However, Dick was secretly attempting to dismantle the court from the inside and he succeeded in shutting down a section of the international Parliament of Owls.

Despite the work of Batman and his allies, the Owls still thrive in Gotham City and beyond. They were even able to successfully brainwash Grayson for a time, using his recent head injury to convince him that he really was a loyal Talon.

BROTHERLY HATE? Batman and Lincoln March battled over the rooftops of Gotham City when March tried to convince Bruce Wayne that he was Thomas Wayne, Jr., his brother.

OWL-WOL Calvin Rose was intended to be a Talon, but he rebelled and Bane brutally showed him the error of his ways. Rose eventually secured his freedom and joined Batman, Inc.

CLASSIC STORIES

***Batman* (Vol. 2) #1-10 (Nov. 2011-Sep. 2012)** Batman first discovers the Court of Owls, battles his way through their labyrinth, and learns Lincoln March's connection to both the Court and his past.

***Batman and Robin* (Vol. 2) #23.2 (Nov. 2013)** The Court's past is exposed, from the early days of Gotham City's rundown area, the Narrows in 1862, through the 1970s to the present day.

***Batman* (Vol. 2) #39 (Apr. 2015)** The Dark Knight finds himself returning to the Court's labyrinth in order to attempt to recruit the Owls' help in defeating The Joker.

COURTING THE YOUTH

The Court of Owls starts its members at a young age, welcoming them to their cause and desensitizing them to the violence inflicted by their Talon servants.

COUNT VERTIGO

DEBUT *World's Finest Comics* (Vol. 1) #251 (Jun.-Jul. 1978)

REAL NAME Werner Zytile **BASE** Vlatava

HEIGHT 5ft 11in **WEIGHT** 189 lbs

EYES Blue **HAIR** Blond

POWERS/ABILITIES Causes disruption of equilibrium; jams technology; wears gravity boots for powered flight.

ALLIES The Rogues

ENEMIES Justice League, Green Arrow, Arsenal, Shado, Black Canary, Leviathan

AFFILIATIONS Legion of Doom, Checkmate

Werner Zytile is heir to the throne of Balkan nation Vlatava, an ancient monarchy that ended when the Soviet Union annexed the country after World War II. Reared as an aristocrat in exile, Zytile grew up angry, aggrieved, and vengefully violent. As Count Vertigo he can emit a pulse to disorient and destabilize opponents thanks to an electronic device implanted in his brain. The implant also acts like an electromagnetic pulse on any technology within range, disrupting and overwriting data functions.

Vertigo began as a costumed criminal, battling Green Arrow and Speedy (Roy Harper) in Seattle. When the archer's sidekick succumbed to substance abuse, the Count's drug, Vertigo, became another means of getting high. Zytile used his drug on Speedy until Green Arrow intervened, allowing Harper to begin his recovery.

Although unsubstantiated reports abound of the Count working for Amanda Waller's Suicide Squad and for one of the many iterations of espionage agency Checkmate, the latest verified instance of Count Vertigo comes from his recent escape from Mount Rainer Correctional Facility. With his powers exponentially increased due to Dark Matter incursions from the Dark Multiverse, Zytile began reordering reality and escaped to take vengeance on Roy Harper. On learning his obsession was already dead, Vertigo was easily recaptured by Green Arrow and Black Canary.

DIZZY WITH POWER Werner Zytile believed that his ability to twist perceptions and mangle minds put him beyond the reach of common heroes.

ON THE RECORD

Count Vertigo's first appearance was during his attempt to steal back the crown jewels Vlatava had sold off during the war. Confronted by Green Arrow, he unleashed his disorientation powers, which were a side-effect of technology used to correct a hereditary ear condition.

Following years of criminal activity, Vertigo was finally imprisoned and joined the Suicide Squad to reduce his sentence. He was eventually recruited to United Nations intelligence agency Checkmate, becoming Amanda Waller's White Knight.

POWER POLITICS

Count Vertigo understood how to use power, choosing allies for their immediate usefulness rather than any long-term potential.

G.I. Zombie; the Mummy (Khalis); **Bogman; Dr. Medusa**

ALLIES S.H.A.D.E., Father Time, Ray Palmer

ENEMIES Random monsters

Hidden in a flying, mobile, three-inch indestructible globe is the headquarters of S.H.A.D.E.—the Super Human Advanced Defense Executive. Reached via a hybrid of teleportation and shrink technology designed by the S.H.A.D.E. science liaison, Ray Palmer, the sphere serves as the base of operations for some of the most bizarre metahuman heroes on the planet—the Creature Commandos.

Led by Agent Frankenstein—the monster famed for being fictionalized in the pages of Mary Shelley's celebrated Gothic tale—the Creature Commandos take their ultimate orders from Father Time, S.H.A.D.E.'s head of operations. While Father Time currently resembles a young girl, the natural-born leader has taken many bodies over the course of his long life.

The Commandos are officially called Division M and are mostly the results of S.H.A.D.E.'s science division experiments, except for the Mummy, who is reportedly thousands of years old and was simply discovered by S.H.A.D.E. Frankenstein joined the team when his ex-wife went missing while investigating a monster attack. This led S.H.A.D.E. to travel to the so-called Monster Planet on a successful mission that warmed Frankenstein to the prospect of working with a field team. They have since become the first line of defense against things that go bump in the night.

ON THE RECORD

The original Creature Commandos first appeared in 1980 in *Weird War Tales*. Labeled Project "M," the unit was a World War II-era innovation, creating nightmare soldiers that would terrify the Axis.

This original team was led by Lt. Matthew Shrieve and included both the Werewolf and Vampire from the current roster, as well as a Frankenstein-like monster named Elliot Taylor. Two further versions of the Commandos were introduced prior to their post-*Flashpoint* reincarnation.

CREATURES ON THE LOOSE

Superman met the Creature Commandos when touring the restored city of Kandor in the Arctic. Kidnapped by Brainiac, this team had served in World War II and included G.I. Robot.

DEBUT *Justice League of America* #29 (Aug. 1964)

MEMBERS (EARTH SUPER HERO COUNTERPART)

CURRENT INCARNATION:

ULTRAMAN (Superman); **SUPERWOMAN** (Wonder Woman) **OWLMAN** (Batman); **POWER RING** (Green Lantern); **JOHNNY QUICK** (The Flash); **DEATHSTORM** (Firestorm)

FORMER MEMBERS:

ATOMICA (Atom); **SEA KING** (Aquaman); **GRID** (Cyborg)

ALLIES Secret Society of Super-Villains, Perpetua

ENEMIES Justice Leagues, Injustice League, Alexander Luthor, Teen Titans, Doom Patrol

NEW ARRIVALS

As several members of the Crime Syndicate arrived in the Justice League Watchtower on Earth-0, Sea King seemed not to have survived the trip from Earth-3.

The Outsider had obtained Pandora's Box and used it to open a portal between the two Earths, sparking a brief reign of terror during which the Syndicate's members killed a number of Earth-0's heroes. Power Ring, The Outsider, Atomica, and Johnny Quick were killed in a fight against the combined forces of all three Justice Leagues and several defecting members of the Secret Society. In the aftermath, the rest of the Syndicate either died or went their separate ways.

However, as Earth-0 shifts and evolves, so do the other worlds of the Multiverse. Earth-3 was recently revealed to be an active world, still under the thumb of the main five Crime Syndicate members: Ultraman, Superwoman, Owlman, Power Ring, and Johnny Quick. Called into service by the mother of the Multiverse, Perpetua, this Crime Syndicate was tasked with ruling an Earth-3 citizenry of Perpetua's evolved apex predators. When Johnny Quick protested, he was effortlessly killed by Perpetua, forcing the rest of the Super-Villains to fall in line in her service.

ON THE RECORD

The Crime Syndicate has plagued the Justice League and Justice Society for decades, ever since the 1960s. The original Earth-3 was wiped out during 1985's *Crisis on Infinite Earths*, but has since reemerged thanks to the rebirth of the Multiverse.

SURPRISE ATTACK!

The classic Crime Syndicate lineup launched an offensive on an unprepared Justice League, who were expecting a visit from the JSA.

PERPETUAL RULE

Perpetua transformed the citizens of Earth-3 into apex predators, forcing the Crime Syndicate to rule a world of monsters.

ON THE RECORD

After *Flashpoint* the Creeper was re-imagined as a mystical creature called the Oni Demon who came through a “crack in the world” into 16th-century Japan. Assuming the form of a boy named Jakku, it caused years of mayhem before being trapped by a samurai inside the mystical Soultaker sword. Centuries passed and the sword fell into the possession of the hero Katana. While she battled Killer Croc, the sword shattered, freeing its prisoners, including the Creeper, who then possessed and reanimated the recently killed corpse of talk-show host Jack Ryder.

WHO'S LAUGHING NOW?

The Creeper has always combined a valiant heart with the barely restrained chaos of a rampaging maniac to defeat his foes and protect the innocent.

CREEPER

DEBUT *Showcase* (Vol. 1) #73 (Mar.-Apr. 1968)

REAL NAME Jack Ryder

HEIGHT 6ft **WEIGHT** 194 lbs

EYES Green **HAIR** Red

POWERS/ABILITIES Superhuman strength, endurance, agility, and healing; able to leap far distances; can transform into costume by activating a subspace trigger.

ALLIES Batman, Justice League

ENEMIES Proteus, Hellgrammite, Eclipso

The original version of the Creeper

debuted in the late 1960s when TV journalist Jack Ryder investigated the abduction of scientist Professor Yatz. Ryder was captured at a masquerade party while disguised as a monster in a yellow bodystocking, green trunks, and red, boa-like fur. The dying Yatz concealed his discoveries—a bio-enhancement formula and trans-dimensional storage device—within Ryder's body, accidentally granting him superhuman abilities and the ability to transform from human form into an apparently demonic terror.

Obsessed with justice, Ryder waged war on crime, pretending to be a supernatural beast at odds with law and order. His secret crusade brought him into contact with many more conventional heroes such as Batman and the Justice League. The Creeper's campaign against evil was boosted by his insane battle-style and a manic laugh that instilled fear into criminals'—and even other heroes'—hearts.

The Creeper's backstory has frequently altered after reality-changing events. Changes include Ryder actually suffering bipolar disorder, succumbing to narcotics-induced madness and paranoia, and even becoming the Creeper because of The Joker's venom.

CRIMSON AVENGER

DEBUT *Detective Comics* (Vol. 1) #20 (Oct. 1938) (male Lee Travis)

REAL NAME Lee Travis

BASE New York City, Earth-2

HEIGHT 5ft 7in

WEIGHT 135 lbs

HAIR Black

EYES Brown

ABILITIES Skilled investigative journalist.

ALLIES James Wing

MANY CRIMSON FACES

Jill Carlyle (1), the male Lee Travis (2), and a female reporter of the same name (3) are all linked to the Crimson Avenger.

The first Crimson Avenger was Lee Travis, publisher of the daily *Globe-Leader*. In his costumed guise, he was DC's first masked Super Hero and was ably assisted by his valet, Wing. They joined the Seven Soldiers of Victory, and the Nebula Man sent Travis forward in time, where he learned how he died. Travis' twin Colt pistols later found their way to a young African-American lawyer called Jill Carlyle in Detroit. She discovered that the guns were cursed and they transformed her into a spirit of vengeance known as the Crimson Avenger.

Post-*Flashpoint*, another Lee Travis worked as a reporter for Earth-2's Global Broadcasting Corporation. She was present at the debut of the new Wonders of the World when they battled the life-draining Solomon Grundy. She later witnessed, alongside photographer James Wing, the apparent death of Alan Scott (Green Lantern) at the hands of Steppenwolf and his Hunger Dogs—perhaps hinting that a new Crimson Avenger may appear.

CRUSH

DEBUT *Teen Titans Special* (Vol. 1) #1 (Aug. 2018)

REAL NAME Xiomara Rojas

BASE New York City, New York

HEIGHT Unknown **WEIGHT** Unknown

HAIR Black **EYES** Red

ABILITIES Super-strength, stamina, and durability; accelerated healing; sentient chain weapon.

ALLIES Obelus, Djinn, Roundhouse

ENEMIES Lobo, the Other, Deathstroke

AFFILIATIONS Teen Titans

Xiomara Rojas came to Earth as a baby with nothing but a chain that was actively protecting her. Taken in by loving but chaotic parents, Xiomara believed she was the daughter of Super Heroes until, as a teen she saw the alien villain Lobo on television. Her resemblance to him told her the truth—that she was his daughter.

She left home in anger, but when she returned, she found find her adoptive parents dead and her sentient chain, named Obelus, missing. Xiomara went on the run, calling herself Crush, eventually joining the Teen Titans. She was later reunited with Obelus, and her father Lobo, who tried to kill her. Besting him with the help of her teammates, Crush realized that the Teen Titans were her family now.

SINS OF THE FATHER

Crush's discovery that the ultraviolent villain Lobo was her father brought her no happiness—he tried to kill her!

CRUZ, JESSICA

DEBUT *Green Lantern* (Vol. 5) #20 (Jul. 2013)

REAL NAME Jessica Cruz **BASE** Portland, Oregon

HEIGHT 5ft 9in **WEIGHT** 141 lbs **EYES** Brown **HAIR** Brown

POWERS/ABILITIES Green Lantern ring gives her the ability to create light constructs and force-fields, fly, and travel through space.

ALLIES Green Lantern (Simon Baz), Starfire, Cyborg, Azrael

ENEMIES Darkseid

AFFILIATIONS Green Lantern Corps, Justice League

Jessica Cruz had been living in fear since being the only survivor of an attack on her group of friends. This crippling anxiety led her to be chosen as the unwilling host of the Ring of Volthoom. However, with help from Batman and Green Lantern Hal Jordan, Jessica was able to draw on hidden reserves of courage. When she apparently sacrificed herself saving The Flash (Barry Allen), Volthoom's hold on her was destroyed, and she was chosen as a Green Lantern. She and Simon Baz were assigned to protect Earth's space sector, though Jessica still struggled with doubts over her worthiness to be a hero.

Later, Jessica teamed up with Cyborg, Starfire, and Azrael to discover the mysteries of the Ghost Sector, but in the process she was killed by Darkseid's Omega Beams, her Green Lantern Ring crushed into fragments in her body. However, the combination of the Omega energy and the Power Ring caused Jessica to return to life, and was imbued with the power to fly and fire Omega Beams like Darkseid. When Darkseid tried to manipulate time to restore his homeworld of Apokolips and enslave the universe, Jessica and her allies teamed up with a time-displaced version of herself to try and stop him.

WIELDING DARK POWER

Jessica Cruz did not choose metahuman abilities, rather they chose her—first via the evil Ring of Volthoom and then a Green Lantern ring. She learned to master her fears to become a hero of great courage.

CRUX

DEBUT *Red Hood and the Outlaws* (Vol. 1) #1 (Nov. 2011)

REAL NAME Simon Amal

HEIGHT 7ft 7in **WEIGHT** 380 lbs

HAIR None **EYES** Yellow

POWERS/ABILITIES Flight; enhanced strength and durability; xenobiology expertise.

ALLIES Arsenal, Red Hood

ENEMIES Tamaraneans

AFFILIATIONS Outlaws

Simon Amal's parents, both researchers in extraterrestrial life, were killed when a Tamaranean spacecraft crashed into them. Driven to seek revenge against all aliens—but Tamaraneans in particular—he continued his parents' research and devised a way to splice alien DNA into his own genome. This gave him the ability to transform into a large, winged reptilian form.

When Simon saw a picture of Starfire, he recognized her as a Tamaranean and hatched a plot to kill her in his new guise as Crux. Attacking her in Colorado using remnant Tamaranean technology, he found himself facing Jason Todd and Roy Harper. He was overpowered and Jason Todd left him at Arkham Asylum.

Later, with Starfire missing, Todd asked Crux to help find her. A penitent Crux agreed to join Arsenal and Red Hood in the search.

HOLDING A GRUDGE

Simon Amal's scientific genius enabled him to take on the form of a terrifying winged monster to fulfill his vendetta against Tamaranean aliens.

CUPID

DEBUT *Green Arrow and Black Canary* #15 (Feb. 2009)

REAL NAME Carrie Cutter

HEIGHT 5ft 8in

WEIGHT 130 lbs

HAIR Red **EYES** Blue

POWERS/ABILITIES Special ops training; enhanced senses; expert archer and marksman.

ALLIES John King

ENEMIES Green Arrow

Special ops soldier Carrie Cutter was so deeply disturbed by what happened on one of her missions that she chose to undergo experimental treatment with the organization C.O.B.A.L.T. She gained enhanced physical and sensory abilities, but at the cost of her emotional stability.

When Oliver Queen (Green Arrow) killed her husband in a case of mistaken identity, Carrie fell obsessively in love with him and became Cupid. With no moral compass, she viewed winning Green Arrow as the only worthwhile goal in her life, and would kill anyone—in particular Black Canary—to make it happen.

Cupid murdered many of Queen's enemies and then disappeared. She later emerged in Seattle, where Green Arrow's nemesis, John King, brought together a villainous gang to eliminate Oliver.

DESPERATELY SEEKING...

Cupid's passionate obsession with Green Arrow Oliver Queen threatened to destroy her and anyone else who stood in her way.

CYBORG

DATA

DEBUT DC Comics Presents (Vol. 1) #26 (Oct. 1980)

BASE Detroit **REAL NAME** Victor Stone

HEIGHT 6ft 5in **WEIGHT** 385 lbs **EYES** Brown **HAIR** Black
POWERS/ABILITIES Genius-level IQ; implants give him massively enhanced strength; armored chassis and promethium-impregnated flesh provide superb damage resistance; sensors and onboard processors intercept signals and hack systems remotely; can create Boom Tubes for transport; can fly using boot jets; arms can be reconfigured into energy or projectile weapons.

ALLIES Superman, Batman, Green Lantern, The Flash, Wonder Woman, Green Lantern (Jessica Cruz), Azrael, Starfire

ENEMIES Darkseid, Crime Syndicate, Grid, Malware, Anomaly

AFFILIATIONS Justice League, Justice League Odyssey

Victor Stone was born to scientists Dr. Silas and Elinore Stone. Both parents doted on Vic, but when Elinore was diagnosed with a rare form of cancer, Silas became single-minded in his daily life, ignoring Vic in the hopes of discovering a cure. Although she lived much longer than expected, Elinore succumbed to the disease and died. All the while, Vic had no idea of his mother's illness and simply felt ignored by his father.

AT A GLANCE...

Man vs. machine

The cybernetic enhancements implanted by his father saved Vic's life, but the experience proved traumatic. The young hero fears losing his humanity and becoming a machine that merely thinks it is human. As host to several advanced AI systems, he is also vulnerable to hacking—as became clear when his robotic parts were hijacked by Grid during the Crime Syndicate's attack on the Justice League.

Weapons systems

In addition to his other hi-tech capabilities, Cyborg can reconfigure himself to create powerful arm cannons to suit a particular combat mode. In his first clash he deployed a sonic white-noise cannon to obliterate a Parademon; other variations include the twin-Gatling gun setup he used to fight the Spore creatures.

Vic Stone found the attention he craved as a high school football star who wanted to play professionally, but this brought him into conflict with his father, who insisted that his son become an academic. Vic went to S.T.A.R. Labs to confront his father, who was working on reverse-engineering a "Mother Box"—a sentient extraterrestrial computer.

Vic and Silas quarreled. Then the Mother Box pinged, generating a Boom Tube portal, out of which shot a blast of red energy that struck Vic's body. His father dragged him into the lab's Red Room, which contained experimental technology. He replaced the damaged parts of Vic's body with cybernetic systems and promethium skin grafts, incorporating the Mother Box's energies into Vic's new form. When a Parademon from Apokolips broke into the Red Room, Vic's arm automatically reconfigured into a white-noise cannon that vaporized his foe.

The Parademon attack on S.T.A.R. Labs was not an isolated incident: Boom Tubes were opening all over the world, disgorging Parademons. Vic learned that his cybernetic system could pick up communications from the aliens' Mother Boxes and even generate its own Boom Tubes. His Mother Box then transported him to Metropolis, where the world's Super Heroes had gathered to face Darkseid himself. In an epic battle, Cyborg generated a Boom Tube that carried Darkseid back to Apokolips and ended the invasion. In the aftermath of the attack, Superman, Green Lantern, Wonder Woman, Aquaman, and the Flash decided to create a team to defend Earth, and Cyborg joined their ranks as a founding member of the Justice League. Over the years, Cyborg has stayed with the team, fighting a number of Super-Villains and powerful foes.

When the evil Crime Syndicate attacked the Justice League, Vic's cybernetic systems were taken over by an artificial intelligence that created a malign, separate entity called Grid. Vic was fitted with a new body that took down Grid, and the Crime Syndicate was ultimately defeated.

INTERFACED
 As alien energy devoured Vic Stone's body, his quick-thinking father Silas implanted and activated advanced cybernetics, which saved his son's life.

CLASSIC STORIES

The New Teen Titans (Vol. 1) #1

(Nov. 1980) Cyborg joins the Teen Titans on their first mission. They save the United Nations from invading aliens.

DC Special: Cyborg #1-6 (Jul.-

Dec. 2008) Vic Stone is forced to battle a cybernetically enhanced former friend and a version of himself from an alternate future.

Teen Titans Spotlight #13 (Aug.

1987) Scarred villain Two-Face resents how Victor has managed to become a hero despite being maimed and he plots to destroy Cyborg's hard-won reputation.

JLA/Titans #1-3 (Dec. 1998- Feb. 1999)

When Vic returns from deep space as part of a Technis construct that absorbs the moon, the Titans embark on a mission to restore their friend's humanity.

Killer apps

Cyborg integrates advanced tech that gives him access to vast databases of knowledge and allows him to hack enemy systems. He provides the Justice League with a hi-tech edge in their battles and serves as a vital source of intelligence.

THRONE OF ATLANTIS

When sub-aquatic warlord Ocean Master flooded Gotham City and led the forces of Atlantis against the surface world, the Justice League responded—but most were captured and imprisoned beneath the sea. Proving his heroism and leadership ability, Cyborg replaced his remaining lung with a module for underwater operations, recruited new Justice League members, and went to rescue his teammates.

TERROR FROM THE DEEP
 Cyborg led the rescue mission after Aquaman's evil half-brother, Ocean Master, had captured several Justice League members.

DARK CYBORG

Corrupted and forced to work as Darkseid's minion toward the eventual goal of conquering the Multiverse, Vic Stone's heroic nature showed through. He was able to send messages to Green Lantern Jessica Cruz and he helped thwart Darkseid's plans by sending false information to the evil New God's attacking hordes.

"If I could unplug, I would, but unlike you I can't take my costume off..."

CYBORG

CYBERNETIC CHAMPION
Cyborg gets his power from hi-tech upgrades, but it is his human heart and courage that make him a hero.

In his solo career, Vic fought off an invasion by the alien Techsapiens, as well as other cybernetic threats like Malware and Anomaly. He and his father began working together at S.T.A.R. Labs Detroit and they tried to fix their strained relationship. But while on an outer-space mission with the Justice League, Victor learned of the Ghost Sector—a section of space populated by planets once miniaturized and now held on the planet Colu. Feeling compelled to travel there, Vic set out in a repurposed Brainiac spaceship, alongside allies Starfire and Azrael, and was soon joined by Green Lantern Jessica Cruz.

This informal Justice League Odyssey soon encountered a bizarre prophecy and the machinations of Darkseid. He was trying to use technology from Epoch, the Lord of Time, to rewrite the entire Multiverse in the image of his recently destroyed homeland, Apokolips. While Darkseid succeeded in restoring Apokolips and even took control of Cyborg for a time as his mind-controlled servant, the heroes made use of the time-travel tech for their own purposes and stopped the evil New God from completing his plot.

**DISASSEMBLED**

When the Crime Syndicate launched its attack on Earth, Vic Stone's systems were hijacked by an AI calling itself Grid.

ON THE RECORD

The pre-Flashpoint incarnation of Vic Stone was a star football player and an all-around athlete. After he was mortally injured in a laboratory experiment gone wrong, his father turned him into a cyborg to save his life. This was the first of several transformations the young hero would undergo in his career.

Technis transformation

Vic joined the Teen Titans but was seriously damaged when Jericho, son of Deathstroke, betrayed the team. He was rebuilt by Soviet scientists, but had seemingly lost his memories. An alien cybernetic hive mind called the Technis restored him, absorbing him and assimilating his humanity into their sterile AI collective. Vic was then taken to the Technis' homeworld and transformed into a being called Cyberion.

Reintegration

Vic/Cyberion returned to the solar system as a herald of the Technis and transformed the moon into a Technis construct. The Justice League of America perceived Cyberion as a threat to be eliminated, but the Titans were determined to save their friend. The two sides clashed, but in the end the young heroes were able to build a rapport with Vic and channel his life energy into an artificial body, restoring his humanity.

MACHINE CIVILIZATION
The artificial intelligences of the Technis collective chose to absorb Cyborg in order to learn about humanity.

Team player

When a new Teen Titans team was formed, Vic served as advisor and elder statesman. However, he left Earth during *Infinite Crisis* to help battle Alexander Luthor and he sustained heavy damage. After undergoing repairs, Vic led a new Titans East squad and helped the other Titans battle their zombified former teammates during *Blackest Night*. He then joined the Justice League, providing tech support and forming a close bond with the android Red Tornado.

TITANS TOGETHER

Victor felt his cybernetics made him an outsider and a freak, but found a new family in the Teen Titans.

CYBORG SUPERMAN

DEBUT *Adventures of Superman* #465 (Apr. 1990)

BASE Mobile

REAL NAMES Hank Henshaw

HEIGHT Variable **WEIGHT** Variable

POWERS/ABILITIES Power over machinery and computers; physical strength and offensive powers mimicking those of Superman.

ALLIES Brainiac, Doomsday **ENEMIES** Superman, Supergirl

Astronaut Hank Henshaw was on board the LexCorp space shuttle *Excalibur* with his wife Terri and two other crew members when it crashed. At first, the accident was thought to have been caused by Superman who had created a solar flare—exposing the crew to a fatal dose of radiation. With his body deteriorating, Hank transferred his consciousness into LexCorp's mainframe, recreating himself as a cyborg in Superman's image. When Terri later died, a deranged Hank blamed Superman for her death, and became one of the Man of Steel's fiercest foes. With Mongul, he orchestrated the obliteration of Coast City and became an intergalactic threat battling the Green Lantern Corps alongside Sinestro.

Henshaw seemingly vanished during the reality-altering *Flashpoint* event, but reappeared when *Convergence* uncovered countless alternate realities set to war by the almighty being Telos on behalf of a trans-universal composite of Brainiacs.

Restored on Prime Earth, Henshaw assembled a cadre of powerful villains into an Anti-Superman Gang, only to again meet defeat due to dissent in its ranks and the combined power of the Man of Steel and his allies. He remains a threat to all living things.

ARMORED AND DANGEROUS
Cyborg Superman's right arm can extend and change shape. His cybernetic eye projects heat beams.

ON THE RECORD

After *Flashpoint*, Superman's uncle Zor-El, escaped Krypton's destruction, thanks to Collector of Worlds Brainiac. Subjected to cybernetic augmentations that deranged his personality, Zor-El became Cyborg Superman—Brainiac's scout for a stronger species in the universe. He attempted to conquer Earth, battling Superman and his own daughter Kara Zor-El, but somehow escaped the black hole doom that befell Brainiac. Also surviving the *Rebirth* event, Cyborg Superman reanimated the dead Kryptonians of Argo City and again attacked Earth, only to be defeated by Supergirl and Superman.

FAMILY AFFAIR

Despite every change and mutation, Zor-El held fast to the idea that Earth could become the New Krypton his bloodline deserved.

DAMAGE

DEBUT *Damage* #1 (Apr. 1994)

REAL NAME Grant Emerson

BASE New York City

EYES Brown **HAIR** Brown

POWERS/ABILITIES Biochemical fusion reactor in his body provides increased strength, durability, and energy projection.

ENEMIES Symbolix, Zoom

AFFILIATIONS New Titans, Justice Society of America

The boy who grew up to be Damage was the product of an *in utero* genetic experiment overseen by Vandal Savage. Savage had provided an expatriate German scientist with funding on behalf of a company called Symbolix, together with cellular samples of other heroes.

The research bore fruit and when the child was born, Savage had his mother killed and placed the infant, who was called Grant Emerson, with an abusive surrogate family. Grant's powers manifested when he was 16, and Symbolix came to collect him. They killed Grant's foster family but he escaped. Adopting the name Damage, he began learning how to use his powers with the New Titans. Adopting a mask after his face was badly scarred in a fight with Zoom, he joined the Justice Society of America and was later killed and reanimated by Black Lanterns during *Blackest Night*. Retaining his own mind, he sacrificed himself to destroy other Black Lanterns before they breached the JSA stronghold.

DAMAGE LIMITATION

The fires of Damage's biochemical reactor always burned, as did the trauma of his abusive upbringing.

DAMAGE II

DEBUT *Dark Days: The Casting* (Vol. 2) #1 (Sep. 2017)

REAL NAME Ethan Avery

BASE Mobile

EYES Brown (Ethan), yellow (Damage)

HAIR Black

POWERS/ABILITIES Can change for one hour, once a day into Damage—a being with superhuman strength and durability.

ALLIES Poison Ivy, Swamp Thing

ENEMIES Gorilla Grodd, Colonel Marie Jones, Echidna

AFFILIATIONS None

No relation to the original Damage, Ethan Avery was a soldier, chosen by the US Army to become something more... Damage. Injected with a serum, Ethan could transform into a mighty behemoth for just one hour, once a day. In this form he possessed strength almost without limits. Ethan could communicate with Damage as two separate consciousnesses, but not control him. Damage was intended to be a weapon of mass destruction to be used against his country's enemies, but it soon became apparent that the army could not keep him in check. Ethan learned how to work with Damage to achieve balance in himself, and left the army behind to make his own way in the world.

COLLATERAL DAMAGE

The US Army created an uncontrollable monster when soldier Ethan Avery was injected with a special serum.

DARHK, DAMIEN

DEBUT *The Titans* #1 (Mar. 1999)
HEIGHT 6ft **WEIGHT** 160 lbs
EYES Blue **HAIR** Brown
POWERS/ABILITIES Highly intelligent, tech-savvy, ruthless; possibly immortal.
ALLIES Adeline Kane
ENEMIES Teen Titans
AFFILIATIONS H.I.V.E.

The mysterious, boyish-looking Damien Darhk has evaded all attempts to pin down his sketchy background, despite extensive investigations by

the CIA, the FBI, and even the Teen Titans. The latter encountered him while battling H.I.V.E. and Grant Wilson—the son of Deathstroke also known as the Ravager. Darhk's role in H.I.V.E.'s machinations remains unclear, and it is also not understood how he came to occupy such a powerful, well-connected position within H.I.V.E. at a relatively young age.

During the final confrontation between the Teen Titans and H.I.V.E., Darhk suffered a near-fatal gunshot wound courtesy of Vandal Savage. He survived only after receiving a blood transfusion from then-H.I.V.E. Mistress Adeline Kane, perhaps granting him immortality. Darhk's current whereabouts are unknown.

DARK OPAL

DEBUT *Legion of Super-Heroes* (Vol. 2) #298 (Apr. 1983)
BASE Gemworld
HEIGHT 6ft 4in **WEIGHT** 235 lbs
EYES Red **HAIR** Black
POWERS/ABILITIES Immense strength, expert swordsman, variety of mystical powers.
ENEMIES Child, Amethyst
AFFILIATIONS House of Opal

By making pacts with otherworldly forces, forging secret alliances with rival Houses, and mastering sorcery, Dark Opal became ruler of Gemworld. However, he failed to kill the infant heir of

the House of Amethyst, who was hidden on Earth. That heir grew up to be Amy Winston, a potent mystic known as Amethyst.

Amy went to Gemworld and thwarted Dark Opal's various attempts to forge a suit of armor containing slivers from each of Gemworld's 11 Houses. Amethyst ultimately deposed him and went on to lead an alliance of all Gemworld's other Houses.

Dark Opal was presumed killed in a powerful backlash of mystical energies, but the sorcerer had only retreated into the enchanted clasp of his cloak. Dark Opal returned to retake Gemworld, but was destroyed by Child, a Lord of Chaos, and his servant, Flaw.

DARKSTARS

POWERS/ABILITIES Their exo-mantle battle suits provide super-strength, speed, and flight; they carry force-field projectors and laser blasters.
ALLIES Green Lantern Corps
ENEMIES Grayven

The Darkstars were formed to patrol space and destroy chaos by the Controllers, an aggressive sect of the Guardians of the Universe, and N.E.M.O., the Network for the Establishment and Maintenance of Order. Ferrin Colos of Zamba, joined the group and was assigned to Earth. After the Darkstars, L.E.G.I.O.N., and the Green Lantern Corps defeated the Triarch—a trinity of evil ancient deities—the three groups agreed on their separate peacekeeping roles in the universe.

When the Green Lantern Corps was torn apart by Hal Jordan, the Darkstars were left to patrol space themselves, recruiting former Green Lantern John Stewart and New Titan Troia to their ranks. Eventually, most Darkstars resigned or were killed by Darkseid's son, Grayven, leaving only Chaser Bron, Munchukk, and Ferrin Colos to carry out the Controllers' intergalactic mission of eradicating evil.

DAWNSTAR

DEBUT *Superboy and the Legion of Super-Heroes* (Vol. 1) #226 (Apr. 1977)
REAL NAME Dawnstar Gr'ell
BASE 31st-century Metropolis
HEIGHT Unknown
WEIGHT Unknown
EYES Brown
HAIR Black
POWERS/ABILITIES Flight, expert tracker.
ALLIES None
ENEMIES The Horraz, Krav
AFFILIATIONS Legion of Super-Heroes

ON TRIAL! Dawnstar's tracking and guiding skills, and ability to fly at supersonic speeds in outer space proved a great addition to the Legion of Super-Heroes.

Dawnstar was recruited by Saturn Girl and Cosmic Boy to the Legion of Super-Heroes from her home planet of Starhaven, after they saw footage of her fighting the Red Horraz. At first Dawnstar was reluctant, not wanting to join a team that was answerable to the United Planets, but she was persuaded that the young heroes would have full autonomy.

Dawnstar had an eight-pointed star symbol on her forehead and "spirit wings," which only manifested when she needed to fly or when she was using her heightened powers of tracking. After joining the team, Dawnstar was very excited to meet Superboy (Jon Kent), whom she credited with inspiring her to become a hero.

DAXAMITES

DEBUT *Adventure Comics* #312 (Sep. 1963)
BASE Daxam
POWERS/ABILITIES Similar to Kryptonians when exposed to the rays of a yellow sun.
ALLIES Green Lantern Corps, Superman
ENEMIES Sinestro Corps, Dominators

A genetically variant race descended from exploring Kryptonians, Daxamites possess similar powers to their ancestors when in the presence of a yellow sun.

They allied with a number of other alien races led by the Dominators to conquer Earth and control its unusual propensity to produce superpowered beings. The Daxans were initially relegated to a support and science role, but they soon discovered the extra abilities they developed in the yellow

radiation of Earth's sun.

A Daxamite detachment fought Superman, beating him badly before succumbing to Earth's dire air pollution. Superman then saved their lives, spurring them to switch sides and turn against the rest of the Dominator invasion force.

One of this rebel group, Lar Gand (also known as Mon-El and Jonathan Kent) was later instrumental in forming the United Planets consortium of worlds. Another Daxamite, Sodam Yat, would go on to become a Green Lantern. He would turn Daxam's sun yellow so they could battle the Sinestro Corps.

MIGHTY DAXAMITES

The inhabitants of Daxam appeared to be like Earth's humans, but their solar-receptive biology was more advanced.

DARKSEID

DATA

DEBUT *Superman's Pal, Jimmy Olsen* #134 (Dec. 1970)

CURRENT VERSION *Justice League* (Vol. 2) #3 (Jan. 2012)

REAL NAME Uxas **BASE** Apokolips

HEIGHT 8ft 9in **WEIGHT** 1,815 lbs **EYES** Red **HAIR** None
POWERS/ABILITIES Formidable intellect, godlike strength and endurance; eyes fire target-seeking Omega Beams; access to advanced Apokoliptian technology, including Mother Boxes; projects Boom Tubes for interdimensional teleportation.

ALLIES Parademon legions, Desaad, Steppenwolf, Kanto, Female Furies, Grail, Granny Goodness

ENEMIES Mr. Miracle, Big Barda, Orion, Highfather and the inhabitants of New Genesis, the Justice League, the Anti-Monitor

Darkseid is one of the most feared entities in the universe: a ruthless, unstoppable tyrant with godlike power and an all-consuming obsession with enslaving every being in existence. As the evil dread lord of the hellish planet Apokolips, Darkseid commands armies of henchmen and bizarre, lethal Parademons. He can access incredible technologies, such as the sentient Mother Boxes that serve as floating sensor drones. Moreover, as well as emitting deadly beams from his eyes, Darkseid has proved to be a formidable combatant, capable of taking on several mortal heroes at a time and emerging triumphant.

AT A GLANCE...

Lust for power

Darkseid's motivation is not wealth or revenge: he wants to control every being in the entire universe. When he confronts an enemy, Darkseid prefers to break their will and subjugate them, rather than destroy them outright. This has been seen in his confrontations with Superman, his estranged foster son Mister Miracle, and the mortals of Earth.

Omega Beams

Darkseid can kill with a glance by firing destructive Omega Beams from his eyes. These glowing red blasts change course to track their targets, though they can be evaded. Both the Flash and Supergirl were fast enough to avoid Omega Beams in battles with Darkseid.

Apokolips

Darkseid's homeland is a hellish industrial planet with a surface cratered by fire pits. Slaves provide labor for its many armament production facilities, while its barracks and Parademon factories train hordes of faceless troopers for Darkseid's armies.

CLASSIC STORIES

The New Gods (Vol. 1) #1-2 (Feb./Mar.-Apr./May 1971) In one of his first-ever stories, Darkseid's deadly scheme is foiled by his estranged son, Orion.

New Gods (Vol. 3) #8 (Sep. 1989) This story tells of Darkseid's romance with the beautiful pacifist Suli. Tragically, she is murdered by Desaad, and the trauma helps turn Darkseid into a ruthless villain.

Final Crisis #1-7 (Jul. 2008-Mar. 2009) In this cosmos-altering event, Darkseid attempts to conquer reality by unleashing the power of the Anti-Life Equation on Earth.

The being who would become Darkseid

was once called Uxas, the youngest son of Yuga Khan, one of the legendary Old Gods. Resenting their authority, the rebellious and cunning Uxas whispered lies and words of hate into the Old Gods' ears. Under his deceitful influence, the Old Gods fought and killed each other, and as they died Uxas stole their power to become a New God, Darkseid. Seizing his chance, Darkseid went to war against his weakened elders, persuading his benevolent older brother Izaya to reluctantly join him, and making an enemy of their father Yuga Khan. When father and sons finally clashed, Yuga Khan was slain by Uxas, ending the rule of the Old Gods.

In the aftermath, the dying Sky God passed the last traces of his power to Izaya, also transforming him into a New God. Izaya tried to convince Darkseid that they should usher in a new age of enlightenment together, but Darkseid refused, destroying their world. Izaya then left to create a planet called New Genesis, which he presided over as Highfather, while Darkseid made Apokolips, an industrial hell-world populated by his engineered Parademon troopers and cruel New God minions.

Darkseid then embarked on a multidimensional campaign of conquest, seeking the Anti-Life Equation, the cosmic formula that would allow him to eliminate free will and control reality. World after world fell before him, their inhabitants enslaved or fed into flesh-recycling plants. However, the alternate world of Earth-2 managed to stave off an invasion, though its incarnations of Batman, Superman, and Wonder Woman sacrificed their lives in the process.

GOD SLAYER
 Uxas' hatred of the Old Gods saw him slaughter them—and seize their power for himself.

DARKSEID VS. THE JUSTICE LEAGUE

When the evil lord Darkseid launched his first attack on Earth-0, he initially inflicted heavy punishment on the planet's gathered Super Heroes—his mighty Omega Beams even knocked Superman out of action. However, Darkseid was then stabbed in the eyes by Wonder Woman and Aquaman. This act gave Superman the chance to recover and knock the villain into a Boom Tube portal summoned by Cyborg. This battle was one of Darkseid's most humiliating defeats, and it took him a long time to recover. The threat posed by Darkseid also served as the catalyst to unite Earth's heroes as the Justice League.

FOR GREAT JUSTICE
 Even when they united, the Earth's most powerful Super Heroes—including Wonder Woman, Superman, and Batman—could barely defeat the almighty Darkseid.

"All hail Darkseid!"

STEPPENWOLF

OMEGA POWER

The wielder of the power of the Old Gods, Darkseid proclaimed himself a New God. He can focus the Omega energy he possesses through his hands to generate huge shock waves.

THE WORLD'S END

If his clash with the Justice League marked an ignominious defeat for the evil Darkseid, his apocalyptic war against Earth-2 showed him at his most ruthless and powerful. As his forces inflicted a devastating defeat on this Earth's military, Darkseid personally defeated the planet's united heroes. The world was left in his grasp, to be consumed at his leisure.

THE WHOLE WORLD IN HIS HAND
Victory in the battle for Earth-2 marked one more triumph in Darkseid's campaign of cosmic conquest.

Darkseid's armies then launched an attack on Earth-0 using Boom Tubes to create teleportation portals and attack multiple sites simultaneously. They were opposed by the world's champions, including Superman, Wonder Woman, Green Lantern (Hal Jordan), the Flash, Aquaman, and Cyborg. The heroes held their own against the attacking Parademons, but when Darkseid himself emerged from a Boom Tube, they found themselves outmatched. However, just as Darkseid was claiming victory, Earth's champions regrouped and launched a furious counterattack, grievously wounding the dark lord. Superman then forced Darkseid into a Boom Tube, sending him back to Apokolips.

Heavily weakened, Darkseid sealed himself in the Mobius Chamber at Apokolips' core, tapping into the planet's energies to heal himself. With Apokolips now deteriorating, he set it on a course for Earth 2, planning to drain its life energies to replenish his world. Meanwhile, Darkseid's estranged foster-son Mister Miracle launched a stealth attack on Apokolips and found his 'father' in the Mobius Chamber. Miracle tried to kill him with the Boom Spheres invented by Mister Terrific, but these merely freed Darkseid. Darkseid used a Terraformer to begin harvesting Earth-2 to replenish Apokolips.

A small force of Earth-2 heroes confronted him, but they proved no match for the villain. He declared war on Earth-0, but was opposed by Mister Miracle and Myrina Black—an Amazon who had secretly given birth to his daughter whom she had plotted to use against him. Naming her Grail, Myrina had sent her child to find a being who could defeat Darkseid, and Grail had returned with the cosmic force of annihilation, the Anti-Monitor.

Darkseid and the Anti-Monitor clashed on Earth, and their conflict threatened to destroy the planet. As the two fought, the Anti-Monitor revealed that the Anti-Life Equation—the ultimate power Darkseid had thirsted for—ran in his veins. With that, the Anti-Monitor used the Black Racer—the very embodiment of death itself—to slay Darkseid.

DEATH OF A GOD

The lord of Apokolips was killed by the Anti-Monitor and the Black Racer (who had possessed The Flash).

ON THE RECORD

Darkseid was introduced as a godlike being obsessed with cosmic domination, and this would remain the defining nature of his character. In his time, the all-conquering Super-Villain has undergone several startling transformations.

KILL OR BE KILLED
Batman planned to shoot Darkseid with the same bullet that Darkseid had used to kill Orion, but he had to avoid the Omega Beams.

Secret agents

In the 30th century, Darkseid secretly initiated a plan of conquest using cloned Super Heroes as his agents. Under his influence, the mighty Daxamites—whose powers were similar to Superman's—sculpted their planet's surface in Darkseid's own image, and began to transform it into a new Apokolips. The Legion of Super Heroes soon discovered the threat, and Darkseid was defeated.

From dark to light

On one occasion, Darkseid launched an attack on the Amazon island of Themyscira, and Wonder Woman punished him in a unique fashion. Using a mental link created by the Super Hero Raven, she imbued Darkseid with some of her compassion, sapping his power and tempering his darkness. Wonder Woman and the Amazons even allied with Darkseid to save Apokolips and Earth from the threat of Brainiac-13's Warworld.

Mob warfare

After Darkseid had his heart torn out by his son Orion, the villain found a human host on Earth: a mob boss called 'Boss Dark Side'. Operating out of the Dark Side Club in Blüdhaven, the Boss plotted to overtake reality. During the *Final Crisis* event, Darkseid seemingly killed Batman with his Omega Beams, but was defeated and slain by Earth's heroes.

DEBUT *Strange Adventures* #205 (Oct. 1967)

REAL NAME Boston Brand

BASE Mobile

HEIGHT 6ft **WEIGHT** 201 lbs

EYES White **HAIR** Bald

POWERS/ABILITIES Able to possess human bodies for limited periods of time, communicate with spirits, and travel across dimensional boundaries; flight; invisibility.

ALLIES Madame Xanadu, Batman

ENEMIES Felix Faust, Enchantress, Specter Collector

AFFILIATIONS Justice League Dark

Circus acrobat Boston Brand, traumatized by the anger and abuse he experienced as a child, was murdered and then given a new chance at life. As Deadman, he can inhabit the bodies of the living and is always driven to atone for the selfish way he lived his life by bringing hope to the hopeless.

Brought up in a household

bristling with anger, Boston Brand ran away to the circus, becoming a star but also a selfish hedonist with violent tendencies. As Deadman, he was a star acrobat and aerialist, until a mysterious assassin shot him and made his circus moniker all too real. Brand was transformed into a spirit being by the Hindu goddess Rama Kushna. He returned to the world of the living on the condition that he

do good deeds to atone for his sins. Brand would later see his killer arrested, when Rama sent him to live in his killer's body.

However, Deadman's own sins were not yet admonished. He was approached by June Moone who asked him for protection from the Enchantress, who had been using June as a host. While trying to help her, Deadman was also recruited into the Justice League Dark by Madame Xanadu, who believed he would play a critical role in the League's battle against an oncoming occult threat. John Constantine—another of Xanadu's recruits—forcibly reunited June and the Enchantress, infuriating Deadman, who nevertheless joined Justice League Dark to face the menace of Cain, the progenitor of all vampires. Deadman continued to fight with the League against supernatural and magical dangers, the Crime Syndicate and the Blight. Along the way, Constantine and Deadman clashed again after the former locked Deadman inside the body of the dead Sea King from Earth-3.

While Deadman is not against teaming with the newest version of the Justice League Dark, he is back on his own these days, undertaking solo adventures and helping purge haunted houses of unfriendly spirits.

ON THE RECORD

In pre-*Flashpoint* stories, Boston Brand's assassin was discovered to be the Hook, an aspiring member of the League of Assassins who killed Boston Brand as his initiation into the group. This backfired when the League's leader, the Sensei, thought Brand was still alive due to Boston's twin brother, Cleveland, temporarily becoming the trapeze artist Deadman. The Sensei put an end to the original Hook, but witnessing his killer's death gave Deadman no peace.

Most versions of Deadman were invisible and intangible to humans, who lacked any form of preternatural perception. This was an advantage to him, but it also reinforced how alienated he was from the living, and at times made it difficult for him to live up to his mission of helping people who never knew he existed.

BY HOOK OR BY CROOK Deadman asked Batman to help him find his killer—whom he believed was a villain named the Hook.

TAKING SIDES

In search of Pandora's Box, Deadman and Justice League Dark battled a disunited Justice League and A.R.G.U.S., not realizing they were all being manipulated.

CLASSIC STORIES

Forever People #9-10 (Jun.-Jul./Aug.-Sep. 1972) Deadman's quest to track down the Hook gets help from an unexpected quarter—the Forever People. They also temporarily housed Deadman's spirit in an artificial body.

Brightest Day #1-24 (Jun. 2010–Jun. 2011) A White Lantern ring gives Boston Brand the chance to live again. He must protect the Star City forest from the Dark Avatar of Nekron. Mortally wounded in the forest, Brand is again condemned to a ghostly existence.

Deadman: Dead Again #1-5 (Oct. 2001) As the *Crisis on Infinite Earths* rages around him, Deadman battles the sorcerous plot of Darius Caldera to provide heroic souls for the demon Neron.

DEBUT *Batman* (Vol. 1) #59 (Jun.–Jul. 1950)

REAL NAME Floyd Lawton **BASE** Belle Reve Penitentiary

HEIGHT 6ft 1in **WEIGHT** 202 lbs **EYES** Brown **HAIR** Brown

POWERS/ABILITIES Expert marksman with extensive training in unarmed combat and use of other weapons; armored suit includes targeting optics; wears gauntlets featuring built-in laser designators and submachine guns.

ALLIES Harley Quinn, Captain Boomerang, Liveshot, Dogshot

ENEMIES Batman, Amanda Waller, Deathstroke, Black Mask

AFFILIATIONS Suicide Squad

SUICIDAL TENDENCIES Deadshot soon discovered that one of the only things he had in common with his Suicide Squad teammates was a propensity for extreme violence.

kidnapped Floyd's estranged daughter, Zoe, to use as leverage against him, Deadshot cut a deal with Batman. Instead of shooting the target Kobra wanted dead—who, ironically enough, was Bruce Wayne—Deadshot and Batman worked together. Deadshot then successfully killed the Kobra agent holding Zoe hostage. Batman saw to it that Deadshot was put in prison for that kill, and soon, Deadshot was recruited into a clandestine government operation called Task Force X. As part of this so-called Suicide Squad, Floyd went on a variety of missions with a different teams. Before being sent into action, each team member had a bomb implanted in their neck to ensure obedience.

Though he preferred to operate as a solo agent, Deadshot proved an effective leader, and his self-proclaimed death wish made him an ideal candidate to return to the Squad again and again. He eventually befriended other longtime Squad members including Captain Boomerang and Harley Quinn. In fact, after Waller was ousted from Squad control, Deadshot found himself disobeying orders when told to kill Boomerang. Deadshot chose instead to help a fledgling band of rebels escape Squad custody. While on the run, he was able to visit his daughter Zoe, who had begun calling herself Liveshot in honor of her dad. Soon after, Deadshot was seemingly killed in action by the criminal Black Mask, finally granting him his death wish.

ON THE RECORD

The pre-Flashpoint Deadshot came from a wealthy family. The pivotal moment in his childhood occurred when he accidentally shot his brother instead of his abusive father. When Lawton first embarked on his career as Deadshot, he seemed to be a hero that rivaled Batman. In reality, his "crime fighting" career was a scheme. He was actually running a criminal gang.

Deadshot worked as a solo assassin, taking on targets that included Deathstroke and The Joker, but spent most of his career as part of Amanda Waller's Suicide Squad and joined the Secret Six for a time. As a member of the Six, he teamed up with his former Suicide Squad comrades to take on the undead Black Lanterns in the "Danse Macabre" crossover story.

SIX OF THE WORST Deadshot experienced both comradeship and betrayal when he joined the Secret Six.

MAD LOVE

Deadshot had a brief fling with fellow Suicide Squad member Harley Quinn. He soon learned that his Joker-obsessed teammate was mad, bad, and very dangerous to know!

CLASSIC STORIES

Detective Comics (Vol. 1) #474 (Dec. 1977) Deadshot embraces Super-Villainy and marks Batman for death, utilizing his distinctive targeting eyepiece sight and glove-mounted guns for the first time.

Secret Six (Vol. 3) #1-7 (Nov. 2008–May 2009) The Secret Six is hired to protect Tarantula from a horde of Super-Villains who covet a mystical object in her possession—a card that entitles a sinner to get out of Hell.

Justice League of America (Vol. 3) #7.1 (Nov. 2013) A moving chronicle of Floyd's tragic childhood—and a thrilling assassination mission in which Deadshot delivers a precision sniper shot while in free fall.

KILLER WITH A CODE

Even though he is a ruthless killer, Floyd Lawton lives by a strict code of honor: He would never kill for free, and he would never waste a bullet. For Lawton, every life has value—so he expects to get paid for each one he ends.

DEBUT *The New Teen Titans* (Vol. 1) #2 (Dec. 1980)

REAL NAME Slade Wilson

HEIGHT 6ft 2in **WEIGHT** 225 lbs **EYES** Blue **HAIR** White

POWERS/ABILITIES Master tactician with Special Forces training; experimental gene treatments boost strength, speed, toughness, mental acuity, and healing rate to superhuman levels; skills and enhancements allow him to anticipate and avoid enemy attacks; weapons master who employs Deathstroke sword; wears hi-tech Ikon suit that charges via kinetic energy and offers enhanced durability, information, and communication functions.

ALLIES William Wintergreen, Ravager (Rose Wilson), Jericho, Dr. Light (Arthur Light), Red Lion, Adeline Wilson

ENEMIES Batman, Robin, Teen Titans

AFFILIATIONS Team 7, Suicide Squad, Secret Society of Super-Villains

STROKE OF DEATH

Deathstroke took his name from a sword that he won in a poker game. It was an antique grete war blade.

Deathstroke is the most feared and respected mercenary in the world. His elite military training and a genetically enhanced physique make him a very dangerous combatant, but his deadliest weapon is his mind. A master strategist and tactician, Deathstroke specializes in psychological warfare tactics that he uses to devastating effect.

Slade Wilson enlisted in the United States Army at the age of 17 and proved to be an exceptional soldier, earning decorations for valor in combat. He was groomed and trained by Adeline Wilson for genetic experimentation that boosted his physical capabilities to superhuman levels. While the treatments were a success, Slade hid the results from everyone, including Adeline, who had become his wife and given birth to two sons, Grant and Joseph. Slade began to go on covert ops. Adopting the codename Deathstroke while in the field, Slade earned a reputation for ruthless efficiency. However, his work soon followed him home, and an enemy slit Joseph's throat, rendering him mute. Adeline was furious at Slade and shot him in the back of the head. Deathstroke survived, but lost an eye.

When Grant Wilson grew up, he became the mercenary Ravager, but was killed while facing the original Teen Titans. Deathstroke swore a vendetta against the Titans and even hired the faux Super Hero Terra to infiltrate their ranks. As if his family wasn't troubled enough, Deathstroke also had a daughter out of wedlock, Rose, who later became the new Ravager. Meanwhile, Joseph embraced his metahuman abilities and became the hero Jericho.

To make himself even more of a killing machine, Deathstroke adopted a hi-tech Ikon uniform after rescuing his old friend Wintergreen. He clashed with the likes of Batman and Superman, and even briefly decided to offer his services to the good guys for once, founding the team Defiance with Ravager (Rose Wilson), Jericho, Kid Flash, Power Girl (Tanya Spears), and Terra. When tensions once again escalated with the Teen Titans, Deathstroke was killed by Red Arrow. However, Slade's healing factor had been recently working in overdrive, and he healed from the would-be fatal wound. While he debated giving up his career to live quietly with his reunited family and work as a nurse, he was soon back in action—even clashing with Batman again in Gotham City—unable to give up his violent side.

ON THE RECORD

Prior to the Flashpoint event, Deathstroke was defined by his complex relationship with the Teen Titans and his tormented son, Jericho. The young man joined the Titans—whom Slade had earlier been contracted to kill—to oppose his father, but when Jericho was possessed by the evil Spirits of Azarath, he turned on his team.

Deathstroke helped the heroes and killed Jericho to save him from the torment of possession, but was later possessed by his son's spirit. Slade's daughter Rose (Ravager) initially became a mercenary like her father, but later joined the Titans, alongside a revived Jericho.

TEEN TERROR

Deathstroke was the Teen Titans' deadliest and most persistent foe. However, he was sometimes forced to help the team and he developed a grudging respect for the heroes.

CLASSIC STORIES

Identity Crisis #3 (Oct. 2004)

Deathstroke accepts a contract to protect the villain Doctor Light from the Justice League—and almost defeats the heroic team single-handedly.

The New Titans (Vol. 1) #71-84

(Nov. 1990-Mar. 1992) Deathstroke finds himself fighting to protect his foes, the Teen Titans, against his insane son Jericho in the classic "Titans Hunt" epic.

Deathstroke (Vol. 2) #7 (May 2012)

Slade Wilson is targeted by his unhinged son, Grant, as his offspring attempts to prove that he is a better warrior than his father.

DEFIANCE

Deathstroke briefly attempted work-for-hire on the side of the angels, wearing a cape and starting his own Super Hero mercenary team called Defiance.

DEADLY ACCURACY

Slade's combat skills and preternatural reflexes make him an almost unstoppable force in battle.

MEMBERS/POWERS **Adeline Kane:** Leader, special ops; **Deathstroke:** Master assassin with enhanced strength, reflexes, intellect, and healing factor; **Jericho:** Telepathy, telekinesis, projecting consciousness into others; **Kid Flash:** Super-speed; **Power Girl (Tanya Spears):** Superhuman strength and durability, size-changing, genius intellect; **Rose Wilson:** Superhuman strength, durability, speed, healing, martial arts expert; **Terra:** Geokinetic abilities; **Wintergreen:** Military and espionage skills.

ALLIES None

ENEMIES Dr. Ikon, Secret Society

Following a brush with the infinity of the cosmos inside the Speed Force, Deathstroke—a man once nicknamed the Terminator—decided to renounce killing and start a team of Super Heroes. The new team was named Defiance, and was very much a family affair, including as it did Deathstroke's ex-wife Adeline, his daughter Rose, and his son Joey, aka Jericho.

The team was kitted out with Ikon suits—"gravity sheaths" that acted almost like force-fields. However, not all the team were in it for altruistic motives, and divisions and mistrust ran deep. Defiance disbanded rapidly after Power Girl questioned Jericho's life choices and Kid Flash could no longer stomach being allied with Deathstroke, who soon returned to his old ways.

FAMILY AFFAIR

Led by the violent Deathstroke and largely made up of members of his troubled family, it's no wonder that Defiance was a shortlived venture.

HAIR Black

POWERS/ABILITIES Immortal; used Atlantean computer to perform "magic."

ALLIES The Evil One

ENEMIES Warlord

AFFILIATIONS Thera

An inhabitant of Skartaris—the realm within Earth's core—High Priest Deimos used the knowledge he found in the Scrolls of Blood along with his mastery of Atlantean computer technology to rule the kingdom of Thera. He then tried to conquer all of Skartaris, but was killed battling United States Air Force pilot Lt. Colonel Travis Morgan, better known as the hero Warlord. One of Deimos' minions resurrected him with the Mask of Life, which also gave Deimos magical powers and immortality. Warlord executed Deimos, throwing his head to the wolves, while Warlord's son Joshua trapped the sorcerer within a magic mirror, but Deimos always returned.

During the Convergence event, when Brainiac's servant Telos forced the heroes of alternate Earths to battle for their very existence, Deimos launched his master plan. He tapped into the power of the Time Masters in an attempt to conquer all reality, but was killed by the entity Parallax.

TAKEOVER

When worlds converged, Deimos used the power of the Time Masters to destroy Warlord—before attempting to take control of the Multiverse.

MEMBERS/ABILITIES **Rosie:** Team leader, who wields a rapid-fire hot rivet gun; **Hardhat:** Uses powered helmet and strength-boosting harness; **Jackhammer:** Deploys a jackhammer capable of untold destruction; **Scoopshovel:** Mechanical excavator arm can dig up anything; **Steamroller:** Drives steamroller that can flatten buildings.

ALLIES Congressman Bloch

ENEMIES Predator, Blood Pack, O.M.A.C.

The Demolition Team is a group of mercenaries armed with construction equipment that has been re-purposed for combat. The group all have blue-collar day jobs, but when leader Rosie lines up a contract, they drop everything and get tooled-up for action. Corrupt congressman Jason Bloch hired them to wreck Ferris Aircraft, but the team was stopped and easily beaten by the enigmatic Predator—the male alter ego of Carol Ferris.

When Coast City was reduced to rubble by Mongul, the Demolition Team decided to destroy threats to the planet. After upgrading their gear, they attacked a nuclear power plant in Germany, but were stopped by the corporate-funded heroes Blood Pack. Rosie then briefly became part of the composite hero Enginehead, but soon reunited with the Demolition Team. Most of them were apparently killed when the O.M.A.C.s attacked Earth, though Hardhat survived.

DEBUT *Demon Knights* #1 (Nov. 2011)

MEMBERS POWERS **The Demon (Etrigan):** Demonic physiology, sorcery; **Jason Blood:** Sorcery; **Madame Xanadu (Nimue Inwudu):** Sorcery; **The Horsewoman:** Archery, empathic link with horses; **Sir Ystin the Shining Knight:** Immortality, flying horse (Vanguard), magic sword (Caliburn); **Al Jabr:** Genius scientist; **Exoristos the Amazon:** Immortality, superhuman strength, agility, and stamina; **Vandal the Savage:** Immortality, tactical genius.

ALLIES Alba Sarum denizens, Merlin, King Arthur

ENEMIES Questing Queen, Morgaine le Fey

In the Dark Ages, the evil Questing Queen attacked the village of Little Spring, but her armies were driven off by a motley group of adventurers. Calling themselves the Demon Knights, this fractious team comprised Vandal Savage, Amazon warrior Exoristos, Moorish scientist Al Jabr, the archer Horsewoman, the Shining Knight, Madame Xanadu, and the demon Etrigan (with his human host Jason Blood).

The "heroes" then searched for Avalon and clashed with Morgaine le Fey. Betrayed by Etrigan, they were taken to Hell, but were later freed by Jason Blood and the Shining Knight. In Avalon, they defeated the armies of the Questing Queen and Lucifer (with help from Merlin and King Arthur). Merlin named the group as the first-ever Stormwatch team, but they immediately disbanded. However, Al Jabr later reunited the Demon Knights to battle vampires on Themyscira and embark on a quest for the Holy Grail.

DARK KNIGHTS

While helping to protect civilization in a barbaric age, the dysfunctional members of the Demon Knights fought each other as well as their enemies.

ALLIES Merlin, Madame Xanadu

ENEMIES Morgaine le Fey, Belial

AFFILIATIONS Demon Knights, Unknowns

INFERNAL FUSION
Merlin punished both his rebellious scribe Jason Blood and the demon Etrigan by binding them together—a union that would last for centuries.

Queen threatened the village of Little Spring, Jason joined a group of disparate warriors to fight her and her dragons. Etrigan, Xanadu, and their fellow Demon Knights successfully fought off the Questing Queen's army.

After many more adventures with the Demon Knights, Etrigan was imprisoned beneath London, but he broke free in the 21st century. He clashed with Stormwatch (the modern incarnation of the Demon Knights) and later teamed with Batwoman to prevent the return of Arthurian villainess Morgaine le Fey. He later fended off an attack from his father Belial at Death Valley, conquering him to become king of Hell. Since Etrigan has been seen hanging around the Oblivion Bar more recently, it seems his rule was short-lived.

Enlisted to fight the Lords of Order, who had taken it upon themselves to destroy every magical being on Earth, Jason Blood summoned Etrigan, only to have the Demon ripped from his form and sent back to Hell. Meanwhile, Jason began to age rapidly without his demon partner. The Justice League Dark embraced chaos magic to fight the Lords of Order, and Zatanna gave Jason his youth back by entwining him with the notorious Demons Three. Whether Jason is still bound to these demonic entities remains to be seen.

ON THE RECORD

The post-*Crisis* incarnation of Etrigan was the son of the demon Belial. In the Dark Ages, Merlin summoned him in a vain attempt to save Camelot from Morgaine le Fey's horde, binding him to a human host, the peasant Jason Blood. This made Jason immortal, and he studied demonology to better understand the entity within him.

In the 20th century, Blood came across an incantation that allowed him to transform into Etrigan, and used it to battle various occult foes. Later, during the *Blackest Night* event, he battled Black Lanterns after being possessed by Deadman.

GOING MEDIEVAL

After being released in the 20th century, Etrigan relished the opportunity to inflict some old-fashioned demonic mayhem! The modern-day minions of Morgaine le Fey discovered this to their cost!

MATCH MADE IN HELL

Etrigan seems eternally chained to Jason Blood, as Blood is in turn chained to Etrigan. Neither is happy about their partnership, especially Etrigan, who has noticed Blood's humanity seeping into him over the centuries.

CLASSIC STORIES

Swamp Thing (Vol. 2) #49-50

(Jun.-Jul. 1986) When Swamp Thing, Deadman, and the Phantom Stranger recruit Etrigan to take part in a battle to decide the fate of the world, the demon leads the assault on the Great Darkness.

Hitman #16-19 (Jul.-Oct. 1997)

Hitman Tommy Monaghan uses Etrigan to get his hands on the Ace of Winchesters—the one gun that can slay the firearms-demon Mawzir.

Shadowpact #11 (May 2007)

Etrigan tries to take the Trident of Lucifer, but is turned to stone by the Shadowpact (and used as a hat rack in the Oblivion Bar).

DARK SUMMONING

By uttering the rhyme, "Gone, gone, the form of man. Rise the Demon Etrigan!" Jason Blood summons the Demon from Hell.

ON THE RECORD

Despero was initially a psychic mastermind who preferred to defeat his foes using elaborate games. He later evolved a physical form powerful enough to battle the entire Justice League single-handed.

In one battle at the United Nations building, he was only defeated when Martian Manhunter showed him a vision of the thing he most wanted: the destruction of the Justice League. At peace, Despero reverted (temporarily) to a harmless fetus.

GAMES MASTER

In his very first encounter with the Justice League, Despero captured the team and then forced The Flash to play against him in a game to win their freedom.

DESPERO

DEBUT *Justice League of America* (Vol. 1) #1 (Oct.–Nov. 1960)

EYES Yellow **HAIR** None

HEIGHT 8ft 1in **WEIGHT** 850 lbs

POWERS/ABILITIES Third eye channels phenomenal psychic powers including telekinesis, telepathy, mind control, astral projection, and illusion creation; superhumanly strong; capable of interstellar flight; invulnerability and regenerative powers.

ALLIES Crime Syndicate

ENEMIES Martian Manhunter, Stargirl, Justice League

AFFILIATIONS Secret Society of Super-Villains

Despero was a member of a powerful alien

race—the Klanorian—who became obsessed with conquest, and made himself ruler of three planets inhabited by less powerful beings. The Justice League attempted to overthrow him on one of their very first missions, and after a close battle he was defeated by the Martian Manhunter. Despero became obsessed with revenge, and attacked the Justice League's Watchtower satellite while junior members Atom, Firestorm, and Element Woman were left in charge. He appeared unstoppable, but once again the Martian Manhunter managed to defeat him in a psychic battle and he was imprisoned.

When the evil Crime Syndicate from Earth-3 invaded Earth-0 and defeated the Justice League, they freed Despero and he joined the Syndicate. The alien then used his prodigious mental powers to imprison Justice League members within their own minds, and appeared to beat his nemesis Martian Manhunter to death—though this proved to be a very convincing illusion. Following the defeat of the Crime Syndicate, mastermind Manchester Black manipulated the Teen Titans into breaking Despero out of prison for his own purposes, but the “Despero” they were rescuing turned out to be an illusion created by Doctor Psycho.

CONQUEROR

Despero's psychic and physical power enabled him to conquer entire planets.

DESAAD

DEBUT *The Forever People* (Vol. 1) #2 (Apr.–May 1971)

BASE Apokolips

EYES Black **HAIR** Black

HEIGHT 5ft 11in **WEIGHT** 152 lbs

POWERS/ABILITIES New God physiology bestows immortality and superhuman physical capabilities; can take on illusory appearances, mentally influence others, and gain power from others' pain.

ALLIES Darkseid, Steppenwolf

ENEMIES Mister Miracle, Power Girl, Huntress, Superman (Val-Zod), Batman (Earth-2), the Wonders of the World

AFFILIATIONS Apokolips

Desaad is a New God of Apokolips,

and a henchman of its overlord Darkseid. On Apokolips cruelty is a way of life, but Desaad is infamous for his sadism, drawing power from others' agony. He became Darkseid's interrogator and took part in Steppenwolf's attack on Earth-2. When the forces of Darkseid invaded Earth, Desaad tortured the Man of Steel, planning to use his DNA to create more powerful Parademons. The invasion failed, leaving Desaad stranded on Earth, where he used his advanced technology and mind-control powers to spread strife, corruption, and suffering.

When businessman and hero Mister Terrific was exiled to Earth-2 in a quantum-tunneling mishap, Desaad stole his identity, and clashed with Terrific's girlfriend, Power Girl, and her companion Huntress, as he constantly tried to find his way back to Apokolips and his master. Desaad was summoned to take part in Apokolips' second attack on Earth-2.

Working from a hidden lair beneath Geneva, he turned Huntress into a warped Fury called Famine and created a new breed of warriors that helped Darkseid conquer Earth-2: The Protofuries.

ON THE RECORD

The post-*Crisis* Desaad discovered his sadistic side when young Prince Uxas—the future Darkseid—tricked him into killing his own pet. Desaad became Uxas' minion, helping him to steal the Omega Force from his brother Drax. However, he did once betray his master by trying to steal the Omega Force with Highfather's staff.

Desaad also corrupted others, possessing Mary Shazam during *Final Crisis*, before being banished.

PAIN AND PUNISHMENT

Desaad fed on the fear and pain of others, but when Darkseid caught him siphoning emotions from Orion and Kalibak, he destroyed Desaad with his Omega Beams.

DETECTIVE CHIMP

DEBUT *Adventures of Rex the Wonder Dog* #4 (Jul.-Aug. 1952)

REAL NAME Magnificent Finder of Tasty Grubs, "Bobo"

BASE Oblivion Bar

HEIGHT 3ft 8in **WEIGHT** 76 lbs **EYES** Black **HAIR** Black

POWERS/ABILITIES Highly intelligent, deductive skills; immortal; briefly had powers of Doctor Fate; current custodian of Myrran Sword of Night

ALLIES Rex the Wonder Dog, Batman, Nightmaster, Blue Devil

ENEMIES The Spectre, Eclipso, Trickster, Upside-Down Man

AFFILIATIONS Justice League Dark, Guild of Detection, Shadowpact, Bureau of Amplified Animals

Chimpanzee "Magnificent Finder of Tasty Grubs" was a sideshow act dubbed "Bobo" until he drank from the Fountain of Youth. This granted him a genius intellect and the ability to speak. After solving a murder, he went into business as "Detective Chimp," but his nonhuman status caused legal issues and his agency failed. Crushed, he began drinking heavily at the Oblivion Bar, a watering-hole for occult beings run by former rock star Jim Rook aka Nightmaster. He was also the mystic guardian of other-dimensional Myrra.

When The Spectre sought to banish magic, Bobo recruited fellow drinkers to fight back, and the arcane Super Hero team Shadowpact was born. After thwarting numerous catastrophes, the team—with Bobo as notional leader—split up. Doctor Fate's Helmet then chose Bobo as its new host, but he found its power overwhelming and rapidly rejected it.

When not consulting with fellow sleuths like Batman, Detective Chimp hung around the Oblivion Bar until it was attacked by Barbatos' Dark Knights. Sacrificing himself to save everyone, Rook appointed Bobo as Nightmaster of Myrra, returning him to the role of hero. He is a most reluctant one: lonely, self-critical, and subject to depression, but he has heroically given his all in Justice League Dark, battling Circe, the Otherkind, and a constant stream of hellish foes. His greatest regret is his failure to save Myrra from the Lords of Order who began their own campaign to eradicate magic in that shadowy realm.

DEVASTATION

DEBUT *Wonder Woman* (Vol. 2) #143 (Apr. 1999)

HEIGHT 4ft 6in **WEIGHT** 82 lbs

EYES Pale blue **HAIR** Red

POWERS/ABILITIES Superhuman abilities, tactical genius, supersonic flight; can cause earthquakes and manipulate emotions.

ALLIES Cronus, Dr. Poison, Agua Sin Gaaz, Lady Zand

ENEMIES Wonder Woman, Wonder Girl (Cassie Sandsmark), Young Justice

AFFILIATIONS The Titans

Devastation was created by the Titan Cronus as a weapon to cause discord on Earth. When she raised havoc in a small South Carolina town, Wonder Woman arrived to confront her, but quickly discovered that Devastation was just as powerful as she was. Devastation spread rioting and destruction across the South and tried to detonate a nuclear weapon, but Wonder Woman buried it underground and Devastation was atomized in the blast.

Seeking revenge, Devastation reconstructed herself and used her mind-warping powers to turn Wonder Woman's protégé, Wonder Girl, against her. Wonder Woman used her love for Cassie to break Devastation's programming, though, and the villain fled. Cassie later joined Young Justice, and when the team invaded the Super-Villain haven of Zandia, Devastation agreed to help defend it on the condition that she got to take on Wonder Girl herself—but was beaten in a muddy brawl.

TINY TERROR

Devastation's divinely bestowed powers and bottomless appetite for destruction made her a fearsome opponent, despite her diminutive size.

DEVILANCE THE PURSUER

DEBUT *Forever People* (Vol. 1) #11 (Oct.-Nov. 1972)

BASE Apokolips

EYES Blue

HEIGHT 7ft 1in **WEIGHT** 405 lbs

POWERS/ABILITIES Immortality, strength; energy lance tracks targets and allows flight.

ALLIES Darkseid

ENEMIES Forever People, Lobo, Starfire, Animal Man, Adam Strange, New Genesis

Devilance is the huntsman of Darkseid and the New God of Pursuit, dispatched to track down enemies of Apokolips. Darkseid sent Devilance to Earth to capture the

Forever People of New Genesis, and the young heroes only escaped by switching places with Infinity Man, who was trapped in a pocket dimension. Infinity Man grabbed Devilance's weapon, and both were seemingly destroyed in an explosion.

Years later, however, Animal Man, Adam Strange, and Starfire encountered Devilance when they were stranded on a paradise planet. The Pursuer took the heroes prisoner, but they managed to escape, stealing his lance to power their ship. Devilance pursued them, but was attacked and killed by the alien bounty hunter Lobo, who impaled the New God's head on his own lance.

DEX-STARR

DEBUT *Final Crisis: Rage of the Red Lanterns* #1 (Dec. 2008)

BASE Ysmault

POWERS/ABILITIES Red Lantern power ring gives speed, toughness, strength, interstellar flight, and can create Red Energy constructs.

ALLIES Atrocitus

ENEMIES Guy Gardner, Lobo

AFFILIATIONS Red Lanterns

Dexter was once an ordinary cat, but when he saw his human companion murdered he was overcome by anger and was chosen by a Red Lantern power ring. After

exacting revenge on his human companion's killers, he joined the Red Lantern Corps as Dex-Starr and developed a close bond with its leader, Atrocitus. He also gained the ability to create energy constructs by licking up the blood of his fellow Lantern, Rankorr.

When Guy Gardner defeated Atrocitus and took over the Corps, the loyal Dex-Starr took Atrocitus to safety and helped him recruit an army to attack Gardner and his Red Lanterns. Gardner won the battle, but quit the Corps and Atrocitus took command again. Dex-Starr was later killed by the bounty hunter Lobo, but was reborn from a pool of Red Lantern blood as a being of pure rage.

DIAL H FOR HERO

DEBUT *House of Mystery* (Vol. 1) #156 (Jan. 1966)

PAST CALLERS Robby Reed, Christopher King, Victoria Grant, Hero Cruz, Father Time, Nelson Jent, Snapper Carr, Miguel Montez, Summer Pickens

POWERS/ABILITIES H-Dials tap into the metaphysical Hero-verse to transform users into monsters, villains, and Super Heroes.

ENEMIES Mister Thunderbolt

AFFILIATIONS Dial Bunch, Justice League, The Overvoid

The Multiverse is a complex assembly of overlapping dimensions and energy zones, all combining into a unified but constantly changing whole. One particular conceptual realm contains the infinite potential to improve living beings and can be tapped by four devices that look like telephones.

When technically astute teen Robby Reed found a weird rotary dial in a cave, his investigations found that it could temporarily transform him into an infinite number of Super Heroes when he dialed H-E-R-O. He was unaware that the first time it activated, it also split him into two beings—The Operator and wicked Mister Thunderbolt—who both lived independently of him.

As a number of ordinary people used the scattered dials to briefly become incredible and weird beings, the Operator and Thunderbolt dueled with reality at stake: one wanted to restore cosmic balance and remove the dials while the other sought to unleash total chaos by empowering every being in the Multiverse.

The simmering cold war exploded into conflict after runaway teens Miguel Montez and Summer Pickens took control of the dials, encountering Super Hero-addicted past dialers, who were becoming increasingly bizarre and ultimately transcended existence to help The Operator triumph at last.

ON THE RECORD

The first known dial-user was teenager Robby Reed, who discovered an alien dial in a cavern. However, when he dialed S-P-L-I-T while battling Shirkon of the Many Eyes, he divided into two beings.

The good Wizard and the evil Master became foes of Chris King and Vicki Grant, the next dial-wielders, until Robby's halves were reunited. A flashback later revealed that Robby had once used his dial to switch the JLA's powers, thus helping them to defeat the Injustice League.

DIAL P FOR PATRIOTISM!

In one of his early adventures, Robby Reed transformed into the star-spangled Yankee Doodle Kid and battled the villainous Cougar.

DIGGLE, JOHN

DEBUT *Green Arrow* (Vol. 5) #24 (Dec. 2013)

REAL NAME John Andrew Diggle

BASE Seattle, Washington

HEIGHT 6ft 1in **WEIGHT** 209 lbs

EYES Brown **HAIR** Black

POWERS/ABILITIES Special forces training and combat experience makes him a formidable opponent.

ALLIES Green Arrow, Green Lantern (Hal Jordan)

ENEMIES The Clock King, Richard Dragon and the Longbow Hunters, John King

AFFILIATIONS Team Arrow

Former Green Beret John Diggle was working as a bodyguard at Queen Industries when Green Arrow (Oliver Queen) showed up at his Seattle apartment. The bow-slinging vigilante offered Diggle a job as "point man" in his war against crime. Diggle accepted on condition that he didn't have to wear tights or a mask. They fought crime together for a year, but when Oliver went into mourning following his mother's death, Diggle donned the Green Arrow outfit without permission to take down crime lord Ricardo Diaz. Following an argument, Queen fired Diggle.

Years later, when Green Arrow fought Komodo and the Outsiders in Prague, Diggle resurfaced to stop Seattle gangster Richard Dragon, who was seizing control of the underworld. Betrayed by the Clock King, Diggle was captured by Dragon—Ricardo Diaz's son. Green Arrow saved Diggle and they united to best the villain, with Diggle joining Team Arrow to defeat criminal mastermind John King and secret society the Ninth Circle.

When Diggle unexpectedly saved Queen's archenemy Dark Archer Merlyn—paying a long-standing debt of honor—the hero alliance ended acrimoniously. They last met at the funeral of Roy Harper (Arsenal) but remain at odds with each other.

THE FALL GUY

When Richard Dragon declared war on Green Arrow and his allies, he tortured John Diggle before kicking him out a window. Fortunately, Green Arrow broke his friend's fall with a foam arrow.

PARTNERS IN CRIME FIGHTING

Diggle was a practical and pragmatic counterpart to the flamboyant and idealistic Green Arrow.

DOCTOR FATE

REAL NAME Khalid Nassour

BASE Tower of Fate, Salem, Massachusetts

HEIGHT 5ft 5in **WEIGHT** 120 lbs **EYES** Brown **HAIR** Black

POWERS/ABILITIES Helmet of Fate bestows powers of flight and healing; ability to channel and redirect wind, fire, water, earth, and lightning; other magical abilities including phasing through walls.

ALLIES Kent Nelson

ENEMIES Anubis, Nabu, Upside-Down Man

AFFILIATIONS Justice League Dark

NABU RETURNS
Khalid proved to Nabu that there was still a chance for humanity. As a result, Nabu ceded control of his power in order for Khalid to officially become Doctor Fate.

Down the millennia, the gods of Egypt have chosen brave champions to wear Nabu's golden helmet and accept the sacred duty of protecting the world as Doctor Fate. When Khalid Nassour was chosen, his world changed forever. He discovered that he now possessed incredible element-controlling powers, and soon found himself a member of the Justice League Dark.

At the dawn of man, a group of sorcerer kings called the Lords of Order discovered magic so powerful their bodies could not contain it, so they bound themselves to objects. One of those kings was named Nabu, and the object to which he bound himself was the Helmet of Fate.

Over the years, the Helmet of Fate has found different hosts, most notably Kent Nelson, who served valiantly with the mystery men of the 1940s known as the Justice Society of America. As Kent grew older, the helmet found Egyptian-American med student and Brooklyn resident Khalid Nassour. Khalid became Dr. Fate for a brief time, but realized he had much to learn. To that end, he began to study under his great-uncle, Kent Nelson, at the Tower of Fate in Salem, Massachusetts.

However, when the mysterious Source Wall at the edge of the universe was pierced and the very laws of magic began to change, Nabu decided to put an end to magic. He took control of Kent Nelson's form and the helmet, locked Khalid in a piece of ancient pottery, and opened a portal, allowing the so-called Otherkind into the world. Nabu's goal was to destroy the source of all magic—the realm called the Sphere of the Gods. This plan would kill all magical beings, but would also put an end to the threat of the Otherkind so would thereby ensure the Multiverse's survival. Luckily, the Justice League Dark discovered Nabu's horrific plan, and Man-Bat accidentally freed

Khalid from his magical prison. As Nabu teamed with other Lords of Order, the Justice League Dark embraced dark magic and temporarily became the new Lords of Chaos in order to end Nabu's threat. Later, when the Justice League Dark was locked in battle with the witch Circe's Injustice League Dark, Khalid joined forces with Nabu and donned the Helmet of Fate once more. Khalid became Doctor Fate, a trusted member of Justice League Dark. Together, they embarked on a quest to stop the Otherkind and their leader, the terrifying Upside-Down Man.

ON THE RECORD

Several heroes have served as Nabu's host, assuming the role of Doctor Fate over the years. Kent Nelson found the Helmet of Fate in an Egyptian archaeological dig and began his career as Doctor Fate in the 1940s.

When Kent died 40 years later, the Helmet passed to Eric Strauss, who mystically merged with his stepmother Linda Strauss to become the second Doctor Fate. After Eric was killed, Linda continued as Doctor Fate and came into conflict with the God of Chaos and possessed Benjamin Stoner, the evil Anti-Fate. On Linda's death, Kent Nelson's wife Inza briefly succeeded her, after which smuggler Jared Stevens served as the reluctant Fate until the late 1990s when he was murdered.

Hector Hall, son of the Golden Age Hawkman and Hawkgirl, took the role next, and after he was depowered by the Spectre, Kent Nelson's grandnephew, Kent V. Nelson, became Nabu's host. On Earth-2, Khalid Ben-Hassin donned a helmet that imbued him with Nabu's essence. He became that world's Doctor Fate, and joined the Super Hero team the Wonders of the World.

MYSTERY MAN
Kent Nelson was a proud member of the first generation of Super Heroes and a founding member of the Justice Society.

LEGACY OF FATE
Alcoholic former psychologist Kent V. Nelson was at rock-bottom when he found his great-uncle's helmet. Soon he rose to become the new Doctor Fate.

FUTURE FATE
A Doctor Fate exists as far into the future as the 31st century. This alien Doctor Fate is a proud member of the galactic defenders known as the Legion of Super-Heroes.

ALLIES Agent Chase
ENEMIES Batwoman, Batman, Blue Beetle
AFFILIATIONS Department of Extranormal Operations

The skull-faced Director Bones led the Department of Extranormal Operations, a secret government agency that monitored superhuman activity.

Bones focused on gathering intelligence on “capex” and then utilizing this information to control them for his own ends.

After gaining information on Batwoman's secret identity, Bones convinced her to work for him by threatening to incarcerate her father. She teamed up with Wonder Woman to track down the Medusa. The director then forced her to help him uncover Batman's secret identity by revealing that her long-lost twin sister Beth was in custody. Batman and Batwoman teamed up to save Beth. Mounting concern over Director Bones' sociopathic behavior led to his eventual incarceration in a secure facility.

POWERS/ABILITIES Magical powers include shapeshifting, levitation, possession, creating illusions, and manipulating reality itself.
ALLIES Robin, Crush
ENEMIES Elias, The Other, Deathstroke
AFFILIATIONS Teen Titans

Djinn was a sila—a rare female genie. Although she appeared to be a teenager, she was in fact 4000 years old. As a young girl she had been cursed by

her evil older brother to be imprisoned in a magic ring, the slave of anyone who wore it. Djinn had to follow the orders of some of history's most brutal megalomaniacs, committing deeds that haunted her.

When Robin (Damian Wayne) invited her to join the Teen Titans, Djinn saw it as a chance to redeem herself by saving people. Later trapped in her ring, she realized that it was within her power to free herself. After millennia, Djinn could live her own life, and she bid farewell to the Teen Titans so she could experience true freedom for the first time.

DOC MAGNUS

DEBUT *Showcase* #37 (Mar.–Apr. 1962)
REAL NAME William Magnus
BASE US Army Research Lab, Adelphi, Maryland
EYES Brown **HAIR** Brown
POWERS/ABILITIES Scientific genius and inventor with a talent for robotics.
ALLIES Cyborg
ENEMIES Chemo, Technosapiens
AFFILIATIONS Metal Men, US Army

Temperamental robotics genius Dr. William Magnus was hired by the US Army to create a robot suitable for search-and-rescue missions. He invented the Responsometer—a compact Artificial Intelligence that could shape metal around it. Magnus used it to make the “Metal Men”—sentient robots formed from different metals: Gold, Tin, Platinum, Iron, Lead, and Mercury.

However, when ordered to assassinate an enemy in Kahndaq, the robots refused. They went AWOL and hid in Magnus' apartment before sacrificing themselves to defeat the villain Chemo.

When the Crime Syndicate invaded Earth, Magnus rebuilt the Metal Men so they could help Cyborg take down the Syndicate's AI, Grid. Magnus and the Metal Men also helped Cyborg fight and defeat the Technosapien invaders.

MINDS OF THEIR OWN
 Doc Magnus's sentient robot Metal Men seemingly inherited their inventor's independent temperament.

DOCTOR BEDLAM

DEBUT *Mister Miracle* (Vol. 1) #3 (Jul.–Aug. 1971)
BASE Dherain
EYES Purple
HAIR None
POWERS/ABILITIES Telepathy
ENEMIES The Flash, Green Lantern, and other Earth-2 heroes.
AFFILIATIONS Hunger Dogs

Doctor Bedlam is a devoted follower of Darkseid and now most commonly refers to himself simply as “Bedlam.” His past is shrouded in mystery, but he was one of

Steppenwolf's Hunger Dogs alongside Brutaal and Beguiler. He attacked Earth-2's heroes, but when Brutaal was revealed to be Superman, he used his telepathic powers to control several people, including Mister Terrific. He forced them to try and create a device that would move Earth-2 so that it could become a new home for his master, Darkseid.

Pre-*Flashpoint*, Doctor Bedlam could also manipulate people telepathically, but was a being of pure psionic energy which he housed in an android body. If this body was destroyed, Doctor Bedlam would simply move his consciousness into another one—although it seemed he was eventually killed by the Infinity Man.

DOCTOR DESTINY

DEBUT *Justice League of America* (Vol. 1) #5 (Jun.–Jul. 1961)
EYES Red
HAIR None
POWERS/ABILITIES Uses the Dreamstone to bring nightmares to life.
ENEMIES Justice League Dark, Madame Xanadu
AFFILIATIONS The Cold Flame

Doctor Destiny could make nightmares become real and trap people in their own dreams. He was the son of Madame Xanadu who had a vision when he was

born of how evil he would become so was forced to abandon her child lest she destroy him as her vision had foretold. When Xanadu was part of the Justice League Dark, alongside John Constantine and Swamp Thing, her son, now calling himself Doctor Destiny, attacked the team. He had been given the Dreamstone by agents of the Cold Flame and he used it to steal the House of Mystery. Swamp Thing was imprisoned in the House, but eventually broke free and helped to stop Doctor Destiny, who was then killed by Madame Xanadu.

In his pre-*Flashpoint* incarnation, Doctor Destiny gained his power from stealing the Dreamstone (known as the Materioptikon) from Dream of the Endless.

POWERS/ABILITIES Can control light in all its forms; flight.
ENEMIES Doctor Light (the original, villainous Arthur Light)
AFFILIATIONS Justice League

Kimiyo Tazu Hoshi was a Japanese scientist and astronomer who became the second Doctor Light during the first great Crisis. The Monitor, realizing he needed to recruit more Super Heroes, sent a beam of energy to Earth that struck Kimiyo, giving her the ability to control all forms of light.

As Doctor Light, Kimiyo used her powers for good, but her arrogant attitude annoyed other heroes at first—until she witnessed Supergirl's heroic death during the fight against the Anti-Monitor. After the battle, a more respectful Doctor Light fought alongside both the Doom Patrol and the Justice League, spending time with the League's European branch.

As a single mother with two kids, she decided to put her family first and became a reserve member of the Justice League, but heeded the call when needed. She returned to active duty to fight Eclipso, the

ALLIES Deathstroke

ENEMIES The Outsider, Crime Syndicate, Justice League

AFFILIATIONS Justice League of America, A.R.G.U.S., Crimson Men

Doctor Arthur Light was a dedicated scientist working for A.R.G.U.S. when an accident gave him amazing metahuman abilities. A married man with a family, Arthur Light had no intention of being a Super Hero, but was forced into the role as part of the Justice League of America—with fatal consequences.

ASHES TO ASHES Doctor Light came to a horrific end. After he accidentally hit Wonder Woman with his powers, an enraged Superman inadvertently decapitated him with his heat vision.

CLASSIC STORIES

Secret Origins (Vol. 2) #37 (Feb. 1989) The truth about Doctor Light's origins are revealed—including details of the original Doctor Light.

Identity Crisis (Aug. 2004-Feb. 2005) Doctor Light takes on a darker twist as secrets of his past are revealed, including his part in one of the most horrific attacks ever to take place on a member of the Justice League.

Justice League (Vol. 2) #22 (Sep. 2013) The new, heroic Doctor Light—still a relative newcomer to the Super Hero world—is killed by Superman when the Man of Steel's powers misfire.

BROUGHT TO LIGHT Caught in the Lasso of Truth, Doctor Light came to the terrible realization that he is in fact already dead.

Arthur Light was a scientist working for A.R.G.U.S. (Advanced Research Group Uniting Superhumans) and the Justice League of America. A married man with three daughters, Arthur lived an unremarkable life until tasked with studying a coin used for communication by agents of the Crime Syndicate. While investigating it, the coin received a signal and Arthur was engulfed in a blast of light that transformed him into a metahuman. While A.R.G.U.S. helped him come to terms with his new abilities, they also put him to work as a member of the Justice League of America.

On his very first mission his light powers seemed to set off Superman's heat vision and Doctor Light was killed. After the Crime Syndicate took over Earth-0, an energy apparition of Doctor Light appeared and was taken in by the Crimson Men who promised to return him to a physical form if he gave them information on Steve Trevor. When Doctor Light was forced to attack Trevor, he found himself also fighting Killer Frost. Trevor used Wonder Woman's Lasso of Truth on Doctor Light, causing him to remember that he had died. Realizing he was just an echo of the real Doctor Light, the apparition vanished in a blast of energy.

Doctor Light embarked on a criminal career, adopting a white and black costume. However, he was well aware that he was a dead man, simply a reconstructed consciousness made of pure light. He eventually moved to the Chetland United Atlantic Islands and was granted asylum in exchange for gifting that country's dictator "Radiant Men," artificial light-powered soldiers under Light's command.

When his ally Deathstroke was seemingly killed, Doctor Light attended the funeral that was populated by dozens of Super-Villains. He even created a holographic image of Superman hovering above the festivities to trick other Super Heroes into believing that the criminals were being kept in line by a watchful eye.

ON THE RECORD

Dr. Arthur Light worked at S.T.A.R. Labs where his colleague Dr. Jacob Finlay had created an energy-manipulating costume to become a Super Hero called Doctor Light. After accidentally killing Finlay, Arthur took the costume and name to fight the Justice League and Teen Titans as a true Super-Villain.

A brief member of the Suicide Squad, Light was retroactively revealed to have assaulted the Elongated Man's wife Sue Dibny during the Justice League of America's earlier years. He later helped murder the Martian Manhunter. The Spectre eventually executed the villain for his crimes in *Final Crisis: Revelations* #1 (Oct. 2008).

LIGHT GOES BLACK Doctor Light returned as a Black Lantern to attack his successor, Kimiyo Hoshi, during the *Blackest Night* event.

DOCTOR MANHATTAN

DEBUT *Watchmen* (Vol. 1) #1 (Sep 1986)

REAL NAME Jonathan Osterman

BASE Mars

HEIGHT 6ft 5in **WEIGHT** Variable **EYES** White **HAIR** None

ALLIES Silk Spectre (Laurie Juspecky)

ENEMIES Ozymandias

AFFILIATIONS Crimebusters

Nuclear physicist Jonathan Osterman was working at a research facility when he was accidentally trapped in a test chamber for molecular experiments. Jon was disintegrated by the machine and pronounced dead, but over the following months his consciousness began to reassemble itself as a completely new kind of being. This being became known as Doctor Manhattan, and it soon became apparent that his powers were far beyond anything that had been seen before. The US authorities seized on the opportunity to use Doctor Manhattan as a kind of living nuclear deterrent.

Doctor Manhattan's incredible abilities—including experiencing different moments in time simultaneously, including future events, reshaping matter at will, and withstanding almost any attack—could have made him a great Super Hero. However, his transformation had left Doctor Manhattan emotionally detached from humanity's problems. Departing Earth for the solitude of Mars, he used his powers to create a shimmering glass palace from the planet's dust.

At one point, Doctor Manhattan seemingly came to Earth, intrigued by a vision in which he was attacked by Superman. As it became apparent that Superman was trying to protect him, not hurt him, Manhattan realized that the hope that the hero represented was a constant throughout the Multiverse. He transferred his powers to a young boy whom he named Clark, leaving him to be raised by former comrades Nite Owl and Silk Spectre, and vanished from existence.

A QUESTION OF POWER. It is believed that Doctor Manhattan may have been drawn to Earth for a confrontation with Superman.

AFFILIATIONS Justice Society of America

Pieter Anton Cross was the second person to take on the role of Doctor Mid-Nite. The original, Dr. Charles M. McNider, had saved Pieter's pregnant mother when she'd been attacked, and helped

her give birth to Pieter. Cross grew up to be a physician himself, graduating from Harvard Medical School aged only 19, and worked with McNider, who became his mentor.

While investigating the origins of a dangerous drug called A39 (a variation of the Venom serum), Cross was knocked out and injected with the drug by the dealers, who placed him behind the wheel of a car. Cross regained consciousness just as the car struck a woman. The drug and accident left him blind but astonishingly allowed him to see during the night. He became Doctor Mid-Nite to bring the dealers to justice, and then continued in the role, joining a reformed Justice Society of America. When not crime fighting, he often used his medical skills to aid other Super Heroes and later mentored the young Blue Beetle (Jaime Reyes).

In the post-*Flashpoint* reality, Pieter Cross worked as a doctor in Seattle, and aided the Green Arrow after he was wounded.

"YOU'LL LIVE" As the de facto team medic, Doctor Mid-Nite treated Mr. America's injuries when he received a nasty beating at the hands of the corrupted missionary William Matthews.

DOCTORS IN THE HOUSE Two other heroes took on the role of Doctor Mid-Nite. The original, Dr. Charles McNider (top), lost his sight to a grenade, and fought crime alongside the original Justice Society of America. The second was Beth Chapel (above). She became a member of Infinity, Inc. but was killed by Eclipso soon after becoming a hero.

DOCTOR PHOSPHORUS

DEBUT *Detective Comics* #469 (May 1977)

REAL NAME Alex Sartorius

BASE Gotham City

HEIGHT 5ft 11in **WEIGHT** 169 lbs

HAIR None **EYES** White

POWERS/ABILITIES Combusts in oxygen, emits toxic fumes; manipulates radiation.

ALLIES Arkham Knight, Neron

ENEMIES Starman, Batman

Eternally burning from millions of radioactive phosphorus particles embedded in his body, Doctor Phosphorus joined the Secret Society of Super-Villains and was

remitted to Arkham Asylum when the Crime Syndicate's invasion collapsed. He was later broken out as war loomed between The Penguin's costumed crew and the murderous Carmine Falcone.

Phosphorus vanished into Gotham Underground, taking over Charneltown with his daughter, Tinderbox. He sought to control the Underground and strike at the world above, but needed to alter the surface environment, or his nature, to survive there.

Failing in his attempts to destroy Gotham City by converting it into fiery terrain he could endure, Phosphorus vanished until he was recruited by the Arkham Knight. Astrid Arkham involved him in a scheme to destroy Batman, but again he was defeated.

DOCTOR PSYCHO

DEBUT *Wonder Woman* (Vol. 1) #5 (Jun.–Jul. 1943)

REAL NAME Edgar Cizko

HEIGHT 3ft 9in **WEIGHT** 85 lbs

HAIR None **EYES** Brown

POWERS/ABILITIES Psionic ability; hallucination creation; astral projection.

ENEMIES Plastic Man, Justice League, Wonder Woman

AFFILIATIONS The Cabal, Secret Society of Super-Villains

Doctor Psycho is a diminutive psychologist and con man with psionic abilities, who carried out séances to telepathically steal his clients' identities and data, and used his

illusion-casting abilities to seduce women.

Overwhelmingly arrogant, Psycho has clashed with many Super Heroes, including Wonder Woman, Superboy, The Question, and Superman. He has also joined numerous criminal groups such as the Secret Society of Super-Villains and the League of Villainy. However, he never received the respect he felt was his due.

In recent times he allied with Hugo Strange, Queen Bee, Per Degaton, and the android Amazo in a clandestine organization dubbed the Cabal, but was again abused and physically humiliated: This time by the absurd Super Hero Plastic Man.

DOCTOR THIRTEEN

DEBUT *Star-Spangled Comics* #122 (Nov. 1951)

BASE Gotham City

REAL NAME Terrence Thirteen II

HEIGHT 5ft 11in **WEIGHT** 168 lbs

HAIR Brown **EYES** Brown

POWERS/ABILITIES Skilled chemist and supernatural investigator.

ALLIES Phantom Stranger

ENEMIES Haunted Highwayman

AFFILIATIONS Justice League Dark

In 1880s Gotham City, Doctor Terrence Thirteen exposed fraudsters preying on the gullible. When he helped arrest Professor Jonathan Rood—a thief posing as the Haunted Highwayman—a stray bullet from the ensuing fight killed Rood's mother. Before he was hanged, the Professor cursed Thirteen and his descendants.

Many of them also became "Ghost Breakers" catching conmen. One of them used his investigative and medical talents during Justice League Dark's battle against the Blight. He and Nightmare Nurse even resurrected the dead heroes before Thirteen joined the Phantom Stranger to save young Chris Esperanza from Blight possession.

Doctor Thirteen also maintains that the supernatural is nonsense, despite his teenage daughter Traci being one of the most powerful witches on Earth.

DOLL WOMAN AND DOLL MAN

DEBUT *Feature Comics* #27 (Dec. 1939) (Doll Man); *Doll Man* #37 (Dec. 1951) (Doll Girl)

REAL NAMES Darrel Dane (Doll Man); Martha Roberts (Doll Girl)

BASE Earth-X

HEIGHT/WEIGHT Variable (Doll Man, Doll Girl)

HAIR Brown (Doll Man, Doll Woman)

EYES Blue (Doll Man); Brown (Doll Girl)

POWERS/ABILITIES Shrinking effect increases strength and physical abilities.

ALLIES Uncle Sam, Human Bomb, Black Condor

ENEMIES Nazis, Adolf Hitler II, Adolf Hitler III, Overman

AFFILIATIONS Freedom Fighters

Martha Roberts was the original Doll Girl. Her fiancé Darrel Dane, the original Doll Man, gave Martha shrinking powers like his so they could fight together. A second

Doll Girl was a member of the Teen Titans.

After *Flashpoint*, Doll Man was Dane Maxwell, longtime friend of Jennifer Knight. While helping Knight track down her parents' murderers, Dane was shrunk to a minute size. Their crusade brought them to the attention of Uncle Sam, who recruited them.

On Earth-X the Nazis won World War II. Doll Man and Doll Woman battled with Uncle Sam's Freedom Fighters until he died in 1963. Decades later, Martha ultimately defeated fascism with a new team.

DOCTOR POLARIS

DEBUT *Green Lantern* (Vol. 2) #21 (Jun. 1963)

BASE New Mexico

REAL NAME Neal Emerson

HEIGHT 6ft 1in **WEIGHT** 194 lbs

HAIR Brown **EYES** Blue

POWERS/ABILITIES Wields magnetic energy to levitate, move metallic objects, and make force fields.

ALLIES Neron

ENEMIES Green Lantern Corps

Neal Emerson's research into magnetic polarity resulted in several medical breakthroughs. However, his work also caused him to develop a personality

disorder. Over time, his darker side became the villainous, power-hungry Doctor Polaris.

Polaris clashed with Hal Jordan, Earth's Green Lantern, several times, with Hal often coaxing out Neal's benevolent personality, and so ending Polaris' magnetic rampages.

Emerson originally used technology to control magnetism, but his body eventually internalized the power. After the Anti-Monitor attacked Earth, Polaris and other villains tried to destroy all Earth-based Green Lanterns. During *Infinite Crisis*, Polaris joined the Secret Society of Super-Villains, but later perished in an explosion. His successor, John Nichol, was killed by the Black Lantern version of Emerson.

DOCTOR SIVANA

DEBUT *Whiz Comics* #2 (Feb. 1940)

REAL NAME Thaddeus Bodog Sivana

HEIGHT 5ft 6in **WEIGHT** 123 lbs

HAIR Bald **EYES** Brown

POWERS/ABILITIES Wide-ranging mastery of scientific and technical disciplines; magical abilities.

ALLIES Mr. Mind, Black Adam

ENEMIES Justice League

AFFILIATIONS Secret Society of Super-Villains

When his scientific investigations failed to provide answers in his quest to save his family from a terrible threat, Doctor Sivana turned to magic. He learned the story of Teth-Adam becoming Black Adam, and went to the site in Iraq he thought contained his tomb to search for an entrance to the Rock of Eternity.

As the tomb opened, a bolt of lightning struck Sivana, scarring his face and giving him the ability to see magic through his damaged eye. Black Adam emerged from his tomb and together they hunted for Shazam, unleashing the Seven Deadly Sins along the way. When they located Shazam, Black Adam left Sivana. Distraught, Sivana returned to the entrance of the Rock of Eternity where he met a strange worm-like creature calling itself Mr. Mind, who said that he and Sivana would be the "best of friends." Mr. Mind was also the inventor of the secretive Uninternet system—later corrupted by Darkseid for his own use.

A Legion of Sivas from the different worlds united to destroy the Shazam Family and conquer the Multiverse, attempting to seize control of the Rock of Eternity.

ON THE RECORD

Doctor Sivana was originally a mad scientist but, during his Golden Age history, his feud with the Marvel Family got more personal. He was now a rogue scientist and corrupt billionaire implicated in the murders of archaeologists C.C. and Marilyn Batson. Sivana attempted to steal the scarab necklace of the ancient wizard Shazam. He was thwarted by the wizard's champion, whom Sivana learned was young Billy Batson. Billy mockingly called Sivana "The Big Red Cheese."

GOLDEN AGE ADVERSARIES Doctor Sivana and his family—which include Georgia and Sivana Jr.—have long been foes of the Shazam family.

DOLLMAKER

BASE Gotham City
REAL NAME Barton Mathis
HEIGHT 5ft 11in **WEIGHT** 160 lbs
HAIR Brown **EYES** Blue
POWERS/ABILITIES Skilled surgeon.
ALLIES The Joker
ENEMIES Batman

Young Barton Mathis' father Wesley was a cannibal serial killer, who took his son along on his murderous hunts. Deranged by this experience, Barton became further unhinged when he witnessed his father's killing by a young Gotham City police officer named James Gordon. The orphaned boy was placed into foster care, but ran away, surfacing years later as the Super-Villain Dollmaker.

Mathis wore a gruesome mask stitched together from other faces—one of which was his father's—and led a gang of thugs with similar skin masks. Dollmaker conspired with The Joker to capture Batman and Commissioner Gordon, cutting off The Joker's face and providing a new one so that he could escape Arkham Asylum while people believed he was dead. Their plot failed when Batman freed himself and went after Dollmaker, who escaped, leaving behind The Joker's face—which became an object of perverse worship for The Joker's minions.

FAMILY RESEMBLANCE
 Barton Mathis' tribute to his father was to include parts of his face in his horrific skin mask of many faces.

DOLPHIN

DEBUT *Showcase* #79 (Dec. 1968)
BASE Atlantis
HEIGHT 5ft 10in **WEIGHT** 145 lbs
EYES Blue **HAIR** White
POWERS/ABILITIES Very fast swimmer who can breathe in air and water; able to withstand deep-sea pressures.
ALLIES Aquaman, Tempest
ENEMIES The Spectre
AFFILIATIONS Forgotten Heroes

A woman nicknamed Dolphin is the sole surviving member of an alien experiment on humans. She was freed by the spirit of Kordax the Cursed—which hailed from Atlantis' earliest days—and then found by Navy officer Chris Landau and his crew.

Dolphin was initially the main attraction at Oceanworld, but eventually returned to the sea, where she discovered Atlantis and was made welcome. She met Aquaman during a battle with Charybdis and later fell in love with Aquaman's adopted son, Tempest.

Dolphin joined father and son on several missions until she and Tempest married. They had a child during the war between Atlantis and Cerdia, and the baby was named Cerdian to help heal the conflict. Dolphin later insisted that Tempest leave the Teen Titans to devote his time to their family and home in Atlantis.

DOMINATORS

DEBUT *Adventure Comics* #361 (Oct. 1967)
BASE Dominion
HEIGHT Variable **WEIGHT** Variable
EYES Black **HAIR** Bald
POWERS/ABILITIES Master geneticists with highly advanced technologies.
ENEMIES Superman. Green Lantern Corps
AFFILIATIONS None for any length of time

The Dominion is a highly advanced, technological civilization organized along rigid hierarchical lines and based on genetic manipulation. Using sampled

metagenes, Dominators create specialized members of their society tailored for specific roles with a variety of powers and abilities.

Extremely ambitious, Dominators constantly seek to expand their sphere of influence and are adept at political intrigue. When they deemed Earth's metahuman potential to be a danger, they coordinated a shaky coalition of space-faring civilizations to eradicate humanity. Even after an army of Super Heroes defeated the scheme, the Dominion profited, as they had used the opportunity to add many metagene samples to their inventory. In recent times their operatives clashed with rogue Guardian of the Universe Rami and attempted a second invasion of Earth, which was repelled single-handedly by Superman.

DOOM PATROL

DEBUT *My Greatest Adventure* #80 (Jun. 1963)
BASE Los Angeles
CURRENT MEMBERS/POWERS **The Chief** (Dr. Niles Caulder): genius intellect; **Elasti-Girl** (Rita Farr): elasticity, size alteration; **Negative Man** (Lawrence Trainor): radioactive projection, can fly and become intangible; **Robotman** (Cliff Steele): nanomachine-created robot body with various powers; **Element Woman** (Emily Sung): metamorphosis, elemental manipulation.
ALLIES A.R.G.U.S., Justice League
ENEMIES Crime Syndicate of America

Dr. Niles Caulder—also known as the Chief—created the Doom Patrol from a group of ostracized and traumatized metahuman misfits, figuring they would have nothing to lose. The first roster, which included the likes of Scorch, Karma, Negative Woman, and Tempest, were all killed in a fight with Johnny Quick and Atomica of the Crime Syndicate of America when they invaded Earth. As a result, Dr. Caulder brought together a new team: Elasti-Girl, Negative Man, Robotman, and Element Woman, who was estranged from the Justice League.

The team went after the new Power Ring (Jessica Cruz), but during the mission the members of Doom Patrol learned that Caulder was not at all what he seemed, when they crossed paths with Justice League members also pursuing Cruz. Not only did Dr. Caulder try to lobotomize Jessica so that he could control her, but Lex Luthor informed the Doom Patrol that Caulder himself was also responsible for the freak accidents that gave the members their powers. Celsius and Tempest, previous Doom Patrol members, had faked their own deaths to free themselves of his control. In the aftermath of these revelations, the future of the team is uncertain.

MOTLEY CREW
 1 Robotman
 2 The Chief
 3 Element Woman
 4 Negative Man
 5 Elasti-Girl

ON THE RECORD

The first Doom Patrol—Elasti-Girl, Negative Man, and Robotman—was assembled by the wheelchair-bound Dr. Niles Caulder. He believed that his band of alienated outcasts would be willing to risk their lives as the world's strangest Super Heroes battling equally bizarre villains.

By contrast, the pre-*Flashpoint* Caulder manipulated and betrayed the trust of the team, even as he encouraged them to fight the Brotherhood of Evil and General Immortus. One especially odd later addition to the team was the sentient road, Danny the Street, who later helped the Teen Titans escape the evil Harvest.

UNDER FIRE
 Niles Caulder put the Doom Patrol together, but he wasn't sentimental about individual members whom he considered a threat.

POWERS/ABILITIES Overwhelming strength, regeneration, invulnerability, able to learn and adapt after its own death.

ALLIES None

ENEMIES Superman, Wonder Woman, Justice League

PRISON UNIFORM
When Superman first faced Doomsday, as well as when Doomsday reappeared in Metropolis recently, the monster was wearing a green bodysuit that hid his horrible visage.

carved a bloody swath to Metropolis, where Superman successfully stopped him, but at the cost of his own life. While Superman later returned, thanks to Kryptonian technology and a visit from his father in the afterlife, so too did Doomsday, the creature even stronger than before.

Superman has fought, and defeated, Doomsday many times, despite Doomsday often receiving an upgrade from time to time. When the creature once again rampaged through Metropolis recently, Superman sent him into the Phantom Zone after receiving some help from both Wonder Woman and Lex Luthor. However, that transmission was intercepted by Superman's Kryptonian father Jor-El, who kept Doomsday restrained in order to protect his son. When Jor-El finally revealed to his son that he had indeed survived the destruction of Krypton, Superman was both shocked and disgusted that his father was holding Doomsday captive. Restrained for now, it is only a matter of time before Doomsday breaks free to wreak havoc once more.

ON THE RECORD

Doomsday debuted in 1992: a relentless, unreasoning juggernaut of destruction intent on invading Metropolis. Draped in a shroud with futuristic, broken shackles, it smashed its way across America and was only stopped at the cost of Superman's life.

In 2011, mere months before the *Flashpoint* event, Luthor unleashed a wave of Doomsday clones against every hero wearing Superman's symbol. The furious onslaught enveloped Superboy, Supergirl, Eradicator, Steel, and even Cyborg Superman. None knew their true enemy was an intelligent and manipulative super-Doomsday clone called the Doomslayer.

REIGN OF THE DOOMSDAYS
Although no longer unique, the alien entity Doomsday was always an aptly named, serious threat.

THE OZ EFFECT

When Superman banished Doomsday to the Phantom Zone, the beam was intercepted by his father Jor-El, who imprisoned Doomsday in a misguided attempt to keep his son safe.

CLASSIC STORIES

Superman (Vol. 2) #75 (Jan. 1993) Doomsday falls to Superman's ultimate efforts. The unconscious monstrosity is carted away into captivity as Earth mourns the death of its greatest hero.

Superman/Doomsday: Hunter/Prey (Vol. 1) #1-3 (Apr.-Jun. 1994)

Thrown into space, Doomsday landed on Apokolips and battled Darkseid. He was then transported to the planet of Calatón, with Superman in hot pursuit.

Superman: The Doomsday Wars (Vol. 1) #1-3 (Nov. 1998-Jan. 1999)

REAL NAME Ricardo Diaz, Jr.

BASE Seattle

EYES Brown **HAIR** Bald

POWERS/ABILITIES Accomplished martial artist; strategic and tactical mastermind.

ALLIES Billy “The Clock King” Tockman, Count Vertigo, Red Dart, Brick, Killer Moth

ENEMIES Green Arrow, Shado, John Diggle

AFFILIATIONS The Longbow Hunters, League of Assassins

Ricardo Diaz, Jr. is the son of criminal royalty. Until Green Arrow and John Diggle stopped him, Diaz Senior ruled Seattle’s underworld, and when they destroyed the enterprise his son swore vengeance. He joined the League of Assassins and was trained by Richard Drakunovski in all aspects of the martial arts.

Ricardo readily absorbed the combat lore of the fabled “Richard Dragon” but rejected his sensei’s attempts to instill a moral code or compassion. When he learned all he could, Diaz killed his mentor, taking his name.

Returning to Seattle, the new Dragon began reclaiming his inheritance, killing gang bosses and bringing together the fragmented groups to form an army of terror. He organized a Super-Villain task-force to collect a multi-million dollar bounty on Green Arrow and tried to force the hero into accepting him as Seattle’s ultimate power.

DRAGON’S HORDE

The merciless and deadly Crime King of Seattle took whatever he wanted and defended his treasures with an army of lethal metahuman killers.

ALLIES None

ENEMIES The Terrifics

Java, the hyper-intelligent Neanderthal who worked for businessman Simon Stagg, was intensely jealous of Mr. Terrific and invented the villainous persona of

Doc Dread to bring him down. When this failed, Doc Dread decided to use a stolen T-sphere to travel the Multiverse and eliminate all the versions of Mr. Terrific in every reality. Since he had failed to defeat Mr. Terrific alone, he assembled a team of alternate versions of the Terrifics, named The Dreadfuls. As Mr. Terrific pursued them across realities, The Dreadfuls confronted him on Earth-23. They appeared to have the upper hand until backup arrived—the reassembled Terrifics and Earth-23’s Ms. Terrific. The Dreadfuls were brought to the House of Heroes at the heart of the Multiverse to be tried by Justice Incarnate.

POWERS/ABILITIES Oneiromancy, preternaturally accurate precognitive dreams.

ALLIES High Seer of Naltor

ENEMIES Horraz Collective

AFFILIATIONS Legion of Super-Heroes, Legion of Substitute Heroes

TRUE VISIONARY

Dream Girl’s superpower is just a handy qualifying detail for Legion membership. Her true value is as an independent, inspirational strategist.

Nura Nal is a near-infallible precognitive seer who foresees forthcoming events when she sleeps. As Dream Girl she represents Naltor in the Legion of Super-Heroes, hailing from an extremely advanced species almost universally capable of seeing the future. After joining the multiplanetary team, she ensured every teammate knew that she saw a great and glorious future for them all: a boon made easier with her ability to psychically share her visions with others. However, she later reveals to the United Planets Council that her reason for joining the Legion is that for many months (cycles) she has seen a galaxy-shattering “Great Darkness is coming”...

Glitteringly resplendent and physically beautiful by human standards, Dream Girl is astute, sensitive and diplomatic. Her powers make her a brilliant judge of sentient character and she always knows exactly how best to spread the news, good or otherwise.

BASE Paris, France

HEIGHT 6ft 4in **WEIGHT** 215 lbs

EYES Brown **HAIR** Gray

POWERS/ABILITIES Keen deductive reasoning, expert marksman.

ALLIES Morgan Ducard

ENEMIES Bruce Wayne

Manhunter and mercenary, former French Interpol agent Henri Ducard was considered the world’s greatest tracker. He was sought out by young Bruce Wayne,

who wanted to learn all his techniques for his own future role as a crime fighter. When the implacable stalker at last agreed to teach the boy-millionaire, Ducard paired him with his own son, Morgan, to track a terrorist across Paris. Wayne was unaware Ducard had been hired to murder their target, or that his classmate was avidly learning all the tricks of a successful killer for hire. As a deadly graduation test, the remorseless and utterly amoral tutor tasked Morgan with killing Bruce, but when the junior Ducard failed, Henri cut off all contact with his son.

DURLANS

Durla was a wealthy, technologically advanced world until a “Six-Minute War” between its leading nations left the planet a radioactive ruin.

The conflagration turned the planet into a desert husk where survivors mutated into physically unstable shapeshifters who chose a base shape—usually multi-tentacled and enshrouded. These Durlans gradually formed regressive anti-technology clans, perpetually at war with each other, but uniformly suspicious of—and xenophobic towards—off-worlders.

In time, a separate sub-group evolved out of the warring sects. Futurist Durlans resolved to regain control of their species’ mutated genome, actively embraced science, and infiltrated Earth in the early 20th century to exploit its rapidly growing technological base.

ECLIPSO

DEBUT *House of Secrets* (Vol. 1) #61 (Jul.-Aug. 1963)

REAL NAME Kaala

BASE Heart of Darkness (his Black Diamond)

HEIGHT Variable **WEIGHT** Variable **EYES** Red **HAIR** None

POWERS/ABILITIES Fueled by rage; invulnerability, dark energy generation, teleportation through shadows, telepathy, telekinetic manipulation, body possession, memory manipulation; powers magnified during an eclipse.

ALLIES Kaala, Alex Montez, Gordon Jacobs

ENEMIES Team 7, Lady Chandra, Princess Amaya, Justice League, Justice Society

AFFILIATIONS Secret Society of Super-Villains, House Onyx, House Diamond

Created at the dawn of time, Eclipso is the evil Spirit of God's Vengeance. Over eons he possessed many hosts until he incarnated on the Gemworld as Lord Kaala, scion of House Onyx and House Diamond. Kaala launched a war but was defeated by Lady Chandra of House Amethyst, who trapped him in a Black Diamond, subsequently hiding it on Earth.

The "Heart of Darkness" holding Eclipso was recovered in modern times by America's Team 7 and locked in A.R.G.U.S.'s Black Room. Catwoman stole it for Alex Montez, who became Eclipso's new host. John Constantine offered Montez/Eclipso passage to Gemworld, sealing the portal after him. Eclipso seized control of House Onyx and House Diamond again, leading them against House Amethyst, but was returned to the Black Diamond by Princess Amaya. The gem returned to Earth, where Eclipso found new host Gordon Jacobs, before being sealed in his gem once more.

Following *Rebirth*, when Justice League Dark battled both the Otherkind and Circe over the fate and direction of magic, Eclipso was again released to capitalize on the wickedness of humanity and war between the realms of magic.

BLOOD SACRIFICE
Eclipso persuaded Gordon Jacobs to release him from the Black Diamond—by mutilating himself with the gem.

TAKING POSSESSION
Eclipso escaped the Black Diamond on Kalaa and possessed Deathstroke, but was imprisoned in the jewel again by Slade's Team 7 comrades.

ON THE RECORD

Pre-Flashpoint, Eclipso was God's original Spirit of Vengeance, but when it turned evil it was replaced by The Spectre. Eclipso initially possessed solar-technology expert Bruce Gordon, though he later broke free. Alex Montez then used a set of mystic tattoos to harness Eclipso's power without surrendering control to the spirit. During the Day of Vengeance, Eclipso possessed the Atom's ex-wife, Jean Loring, and drew Mary Shazam under his evil influence. When the *Brightest Day* event occurred, the villain plotted to kill God.

SPLIT PERSONALITY
When hosted by scientist Bruce Gordon, Eclipso found himself unwillingly forced into the role of hero.

DARK NEMESIS
Though Eclipso has been defeated multiple times, this relentless, malevolent villain always returns, seemingly more powerful than before.

EDGE, MORGAN

DEBUT *Superman's Pal, Jimmy Olsen* #133 (Oct. 1970)

BASE Metropolis

HEIGHT 6ft 2in

WEIGHT 235 lbs

EYES Brown **HAIR** Bald (black)

POWERS/ABILITIES Ruthless but highly intelligent businessman.

ENEMIES Superman

Media baron Morgan Edge is the President and CEO of the Planet Global Network and owner of the PGN TV network and *The Globe* tabloid. He also acquired the *Daily*

Planet newspaper, replacing its iconic globe-topped building with a sleek modern office block. As CEO of PGN, he backed the *Challengers* adventure-reality TV show (starring the Challengers of the Unknown) and shamelessly exploited the tragic deaths of three team members for publicity.

Edge also aired a report that (incorrectly) claimed to reveal Superman's identity—over the objections of PGN's executive producer, Lois Lane. Edge's cavalier approach to journalistic ethics led to Clark Kent and Jack Ryder quitting. However, when Metropolis was attacked by an alien, Edge displayed a gift for leadership.

REAL NAME Martin Van Wyck
BASE New York City
EYES Blue **HAIR** Blond
HEIGHT 6ft 1in **WEIGHT** 195 lbs
POWERS/ABILITIES Flies through space, generates flame bursts, creates fiery energy constructs.
ENEMIES Green Lantern, The Spectre

Disgruntled loser Martin Van Wyck was abducted by the alien Controllers and given fire-based powers before being deemed a "failed experiment" and sent

back to Earth. When using his powers, Van Wyck transformed into a white-skinned, flame-headed being and took the name Effigy. With no other ambitions, he wreaked havoc, setting fire to the Hollywood sign. After a battle with Green Lantern, he was reclaimed by the Controllers.

Effigy later returned to Earth, where he fell for Killer Frost, but when she was buried in an avalanche, he callously abandoned her. The villain then served in the Society and Libra's Secret Society of Super-Villains and was briefly exiled to the planet of Salvation. Effigy suffered a gruesome death during *Final Crisis*, when The Spectre burned him alive in a lantern.

HAIR Black with white streak
HEIGHT 6ft
WEIGHT 182 lbs
POWERS/ABILITIES Rendered unconscious, Lane releases El Diablo, a Spirit of Vengeance armed with revolver, bolos, and flaming whip.
ENEMIES Black River

Old West bank teller Lazarus Lane was struck by lightning and sent into a coma. He was then cursed by an Apache shaman, Wise Owl, and when he awoke he was the host for El Diablo, a demonic masked vigilante. From then on, whenever Lane was unconscious, El Diablo appeared and meted out harsh justice with his six-guns and fiery whip, soon becoming a feared figure on his black stallion, Lucifer.

When a town faced a zombie curse, El Diablo confronted the villain behind it—a Native American spirit warrior, Black River. Black River told him to punish the white men for killing Native American tribes and stealing their land. However, El Diablo stated that more killing would not change the past. El Diablo later inspired other heroes, including Rafael Sandoval and Chato Santana.

AFFILIATIONS Legion of Super-Heroes

Jan Arrah is the last survivor of the planet Trom. Once inhabited by an insular race of matter transmuters, Trom was invaded by the Horraz Collective who ordered their new

chattels to change the elemental properties of substances to enrich their new masters. When the Trommites unilaterally refused, the Horraz eradicated the species.

Jan remains tight-lipped about how he escaped the genocide, but in the aftermath he fled and offered his services to the newly formed Legion of Super-Heroes. Wry and laconic, he finds it difficult to socialize in large crowds, but is a valiant fighter.

He proudly boasts that he can alter the elemental composition of (almost) anything, but frankly admits that he still has problems changing things back to their original state.

ELASTI-GIRL/ELASTI-WOMAN

DEBUT *My Greatest Adventure* (Vol. 1) #80 (Jun. 1963)
REAL NAME Rita Farr **BASE** Los Angeles
HEIGHT 5ft 6in; Variable **WEIGHT** 126 lbs; Variable **EYES** Brown **HAIR** Brown
POWERS/ABILITIES Unstable body structure allows her to change size and shape, but if she loses focus she is in danger of losing her human form and turning into a blob of protoplasm.
ALLIES Niles Caulder, Negative Man, Robot Man, Element Woman
ENEMIES Galtry, Madame Rouge
AFFILIATIONS Doom Patrol

Movie star Rita Farr was filming on location in an African swamp when she was exposed to a mysterious gas that disrupted and broke down her cellular structure. Afterwards, she could alter her size and shape at will. However, if she lost concentration her shape would soften and she risked slipping into a formless mass. Rita suffered a nervous breakdown and opportunistic mad scientist Niles Caulder suggested she join his "super support group" for people with unwelcome superpowers—the Doom Patrol. As Elasti-Girl, she joined Negative Man, Robotman, and, over the years, many others. Caulder ("the Chief") led them on missions against monsters, Super-Villains, and uncanny threats before being exposed as having manufactured the accidents that created his Freak Heroes.

Rita tried to regain a semblance of normal life, marrying billionaire self-made Super Hero Steve Dayton (Mento) and adopting orphaned Beast Boy Gar Logan, but they too fell under Caulder's toxic influence. Rita found a measure of peace after being killed by Madame Rouge, but her new form was easily reconstructed and she returned to fight again in increasingly strange circumstances. At one stage she was even used by transdimensional Reality Agents Retconn as a conceptual source for commercial alternate existences.

Finally freed from everybody else's expectations, Elasti-Woman is now the emotional core of a new, Caulder-free family of Doom Patrollers.

KEEPING IT TOGETHER
 Elasti-Girl may have once been a beloved Hollywood celebrity, but her transformation into a metahuman left her physically and mentally unstable.

ON THE RECORD

The original Rita Farr joined Doom Patrol as Elasti-Girl and married the psychic hero Mento. While on a mission, Rita was seemingly killed in an explosion. The pre-*Flashpoint* heroine later reunited with Mento and the Doom Patrol with no memory of how she had cheated death. Years later, it was revealed that the returned Elasti-Girl (or Elasti-Woman, as she was now called) was actually a protoplasmic duplicate created by the Chief—and that Mento had been manipulating her mind.

ATTACK OF THE SOFT WOMAN
 Elasti-Girl took center stage as the Doom Patrol were forced to team up with their archenemies, the Brotherhood of Evil, to defeat the cosmic criminal Zaxxon-13.

ELEMENT WOMAN

DEBUT *Metamorpho* (Vol. 1) #10 (Feb. 1967)**REAL NAME** Emily Sung**BASE** Justice League's Watchtower satellite**EYES** Violet **HAIR** Purple**POWERS/ABILITIES** Can metamorphose into any element found in the human body.**ALLIES** Firestorm, Metamorpho**ENEMIES** Despero, Crime Syndicate**AFFILIATIONS** Justice League, Doom Patrol

Emily Sung used her extraordinary elemental-transformation abilities to fight villainy as Element Woman. During the short-lived war between America and Atlantis, Emily was invited to join the Justice League. She and fellow novices Firestorm and the Atom helped to defend the League's satellite from alien intergalactic conqueror Despero. She later used her powers to remove a sliver of deadly Kryptonite from Superman's brain.

When the Crime Syndicate invaded Earth and took on the Justice League, Element Woman was imprisoned within Firestorm; when released, she disappeared. Her molecules were found and contained by Dr. Niles Caulder of the Doom Patrol, who convinced her that the Justice League did not want her, and offered her a place in his own team. Emily accepted, and she briefly battled her former teammates when the two groups clashed over Jessica Cruz, aka Power Ring.

PERSONAL ISSUES

Element Woman has amazing powers, but is plagued by insecurity and fear of rejection—which makes her easily manipulated by Niles Caulder.

ELONGATED MAN

DEBUT *The Flash* (Vol. 1) #112 (Apr.–May 1960)**REAL NAME** Ralph Dibny **BASE** New York City**HEIGHT** 6ft 1in (variable) **WEIGHT** 178 lbs **EYES** Blue **HAIR** Red**POWERS/ABILITIES** Can alter his body to change his appearance, increase in size, stretch, or even turn into a parachute.**ALLIES** Superman, Etrigan the Demon, Scandal Savage, Ragdoll, Jeanette**ENEMIES** The Riddler (Mockingbird), League of Assassins, Leviathan**AFFILIATIONS** Secret Six, Justice League

Ralph Dibny gained his amazing powers of contortion through unknown means—reputedly a metabolic reaction to Gingo, a plant extract unique to carbonated beverage Gingold. He used his abilities in his career as a 'detective with bonuses'. He and beloved wife Sue became jet-setting investigators, working with the world's Super Heroes. Everything changed when the couple attempted to recover a priceless diamond during a party on The Riddler's yacht. As the mastermind brazenly propositioned Sue in front of Ralph, the lights went out. Chaos ensued, explosions devastated the ship—and Sue and the diamond vanished.

Traumatized, Ralph became size-altering detective Big Shot to track her down, but was captured by the mysterious Mockingbird, along with Strix, Porcelain, Catman, Ventriloquist, and Black Alice. "Big Shot" helped them escape and provided sanctuary in his family home. The "Secret Six" became his new family, with Ralph acting as a father figure. After the group rescued amnesiac Sue from Mockingbird (who was actually the Riddler), Ralph revealed his true identity as the Elongated Man, and remained with the Secret Six until they disbanded. Semi-retired, he later worked with Lois Lane, Batman, and a group of other Super Hero detectives to uncover the identity of the new global spymaster Mark Shaw during Event Leviathan.

ON THE RECORD

Pre-Flashpoint, young Ralph Dibny was fascinated by traveling contortionists and worked out that their abilities stemmed from Gingold, a soft drink containing juice from the gingo fruit. When Ralph drank a concentrated gingo extract it gave him amazing stretching powers.

He moved to Central City to start a career as a Super Hero: the Elongated Man. Initially mistaken for a villain by local champion, the Flash, Ralph quickly built a reputation as an eccentric hero, detective, and member of several Justice League teams. He also somehow found time to fall in love with Sue Dearbon, and after they were married, the couple traveled the country, solving mysteries.

Ralph was devastated when Sue was murdered by Jean Loring. The sorcerer Felix Faust tried to trick Ralph into raising Sue from the dead, but the hero turned the tables on him, trapping the magician and his master, Neron, in Doctor Fate's tower—but at the cost of Ralph's own life. Ralph and Sue were finally reunited in the afterlife and became ghostly detectives. Their corpses were briefly animated during *Blackest Night*.

'TIL DEATH DO US PART?

Reunited in the afterlife, Ralph and Sue became the world's foremost ghost detectives.

ENEMY ACE

DEBUT *Our Army At War* #151 (Feb. 1965)

REAL NAME Hans von Hammer

BASE Germany

POWERS/ABILITIES Superb aerial combatant.

ENEMIES The Hangman, Allied Forces

With the twin guns of his Fokker triplane blazing a trail of destruction, the Enemy Ace, Hans von Hammer, became a legendary German pilot during World War I. The "Hammer of Hell" was the son of aristocrats and grew up in the Black Forest in south-west Germany, where he became an expert fencer and a true man of honor. To the other pilots in his fighter squadron, he was a human killing machine with more than 70 enemy deaths to his name.

Although he was unhappy with the Nazi regime, he was persuaded to come out of retirement and piloted a jet-powered Messerschmitt Me 262 during World War II. In the waning moments of the war, von Hammer's plane was shot down, and he landed in the Dachau concentration camp. Facing the horrific mass genocide of the Nazis for the first time, the renowned fighter renounced the Nazi regime and surrendered to the Americans.

One of von Hammer's most unusual adventures occurred when he teamed up with the present-day members of the Justice League United in the French town of Arracourt. That site became unmoored in time, owing to the presence of an anomaly in the universe known as a "breaker."

During that distortion in time, the Enemy Ace of 1940 shot down the high-flying Stargirl of the 21st century. The breaker had trapped von Hammer, Sgt. Rock, the Unknown Soldier, and the Creature Commandos within a jumbled timescape that included the past and future, leading them to fight over and over in that one location.

ON THE RECORD

Perhaps no story better distilled the essence of the Enemy Ace better than "Killer of the Skies," (*Showcase* #57, Aug. 1965). In that four-part epic, von Hammer ruefully admitted that he was trained to kill and took no pleasure in his victories or the deaths of his opponents.

The Enemy Ace and two other German pilots then took to the skies to battle a Canadian pilot he had nicknamed the 'Hunter.' Von Hammer was appalled by the cowardice of his comrades when they realized the skill of their quarry and turned tail—only to be shot down as they fled the fight.

The Enemy Ace then proposed a duel of honor, which the Hunter willingly accepted. As each man saluted the other, von Hammer confessed, "I will regret having to kill such a superb fighting man." After a thundering dogfight in the sky, both planes crashed to the ground. Refusing to be taken prisoner, the badly injured Hunter died in the field of battle, and von Hammer saluted his gallant foe one final time.

ACES HIGH

After a stunt pilot was murdered on the set of a movie about Enemy Ace, Batman investigated rumors that von Hammer's ghost was responsible. The culprit turned out to be a crew member, Heinrich Franz, an alleged descendant of Hans von Hammer.

ENCHANTRESS

DEBUT *Strange Adventures* (Vol. 1) #187 (Apr. 1966)

REAL NAME June Moone

BASE Washington, DC

EYES Blue **HAIR** Blond (as Enchantress: Red)

HEIGHT 5ft 6in **WEIGHT** 126 lbs

POWERS/ABILITIES Powerful magician; can warp reality and create duplicates of herself.

ALLIES Deadman, Justice League Dark

ENEMIES Felix Faust

AFFILIATIONS Justice League Dark, Suicide Squad, Shadowpact

June Moone is unwilling host for the magical entity Enchantress, bestowing incredible magical power but consequently affecting her sanity. As Enchantress, June was a troubled villain, or occasional heroine seeking atonement. When Madame Xanadu separated their personas, June slipped into near-madness while Enchantress unleashed deadly magic across Earth, seeking to reunite with her "bright half."

The Justice League confronted Enchantress but were driven off, prompting Zatanna to assemble occult heroes to meet her threat. Battling Justice League Dark, June ultimately merged with Enchantress to achieve atonement. Later, Enchantress was one of many occult beings captured by Felix Faust to power the Crime Syndicate's Thaumaton weapon, before Justice League Dark stopped the mad mage.

Remanded to the Suicide Squad, Enchantress' dark attitudes were softened by an unlikely relationship with Killer Croc, but she still had the power to defeat Superman when Maxwell Lord orchestrated war between the Squad and Justice League. She failed, however, to stop the mind-bending rogue spymaster, and Lord escaped.

EMOTIONAL TRAUMA

Bonding with Enchantress took a heavy toll on June Moone's sanity.

EQUINOX

DEBUT *Justice League United* #0 (Jun. 2014)

REAL NAME Miiyahbin "Mii" Marten
BASE Ontario, Canada

POWERS/ABILITIES Flight, ice control, wind bursts.

ALLIES Justice League United

ENEMIES The Whitago

Miiyahbin Marten was a native Canadian and a citizen of the Cree Nation. When she turned 16, she was threatened by the Whitago, a dangerous supernatural creature that took its power from the seven dark pillars of Cree life. Instinctively tapping into buried knowledge, Miiyahbin uttered the ancient word "Keewatin" and was transformed into the hero Equinox. In her new identity, she invokes the power of the Midayo, the embodiment of the seven heroic aspects of the Cree: love, humility, bravery, truth, respect, wisdom, and honesty. This power, inherited from her grandmother, enables Miiyahbin to continue to protect her people from the Whitago, which can never be fully destroyed.

Equinox has a deep, spiritual connection to her homeland and its weather, and her powers change with the four seasons. When she experienced trouble controlling those powers, she reached out to the Justice League United for help. Eventually, she joined as a full member of the team.

SEASONAL WARRIOR
Equinox utilizes the powers of the seasons to battle the deadly, unstoppable Whitago.

ERADICATOR

DEBUT *Action Comics Annual* #2 (1989)

POWERS/ABILITIES Energy manipulation and projection, regeneration, flight, super-strength, heat vision, computer faculties, soul absorption

ENEMIES Supergirl, Superboy, Power Girl, Darkstars

ALLIES Zod, Green Lantern Corps

A Kryptonian AI superweapon, the Eradicator eliminated contaminating alien influences. On Earth, it built the Fortress of Solitude before trying to convert the planet into New Krypton. It took Superman's form after Doomsday killed him and, on his resurrection, melded with S.T.A.R. Labs scientist David Connor. After *Flashpoint*, an Eradicator program constructed Supergirl's Sanctuary of Solitude before determining Power Girl was Supergirl's clone and attacking her.

A new Eradicator emerged following *Rebirth*: one of an army of police robots designed by General Zod. This unit observed Krypton's destruction and reprogrammed itself to preserve the lost civilization—including Kryptonian souls. After joining Hank Henshaw's Superman Revenge Squad, the Eradicator served Zod's family, battling the Darkstars, and ultimately died fighting the Justice League.

EXTREME JUSTICE

DEBUT *Extreme Justice* #0 (Jan. 1995)

MEMBERS POWERS **Captain Atom:** Atomic-based powers **Amazing Man** Transforms into any material **Blue Beetle:** Wielder of hi-tech **Booster Gold:** Superb athlete **Maxima:** Super-strong and cunning alien queen

BASE Mount Thunder, Nevada

ENEMIES Legion of Doom

Officially known as Justice League West, the Super Hero team Extreme Justice formed when Captain Atom decided the world needed crime fighters willing to play by tougher rules than the Justice League. The new team's mission was to deal out "extreme justice" and, unlike the Justice League, they chose not to be sanctioned by the United Nations. Instead, Extreme Justice worked alone, seeking out criminals rather than responding to threats.

One of their first successful missions was ending a military coup and preventing nuclear holocaust. The team later expanded to include the heroes Firestorm, Plastique, and Wonder Twins Zan and Jayna. Their most notable battle was with the Legion of Doom, an equally tough Super-Villain team. Extreme Justice disbanded after their final mission, in which they invaded the country of Bialya and destroyed an army of cyborgs.

MEMBERS POWERS/ABILITIES **Lord Havok:** Battlesuit can mutate on command **Gorgon:** Cybernetic hands and tentacles on his head **Dreamslayer:** Ability to manipulate matter and teleport **Tracer:** Deadly blades attached to his arms **Doctor Diehard:** Can control magnetism

ALLIES Barracuda

ENEMIES Monarch, Challengers of the Unknown

After Flashpoint on Earth-8, a band of metahuman criminals attempted to seize power and accidentally destroyed the world. Fleeing between realities, they clashed with the Challengers of the Unknown and joined time-travelling tyrant Monarch in a plot to eradicate weak worlds across the Multiverse.

When reality shifted after *Rebirth*, the villains' history altered. Now, when Super-Villain Lord Havok attempted to pacify his chaotic homeland Angor, unified resistance there led to a devastating nuclear war.

Fleeing the devastation, Havok and his unscrupulous allies, Dreamslayer, Death Bat, Doctor Diehard, Brute, Tracer, and Gorgon, arrived on Earth-0 with the same goal but with new tactics. This time they would save the planet rather than destroy it. Of course, they would do it their way...

Targeting small nation Kravia, the Extremists planned a gradual piecemeal conquest, but were quickly challenged by Batman's rapid-response team, the Justice League. After a brutal conflict in a politically explosive region of Earth, the surviving Extremists were incarcerated, but Lord Havok and Dreamslayer soon escaped into the unexplored Microverse, determined to retrench and try again.

FAITH

DEBUT *JLA* (Vol. 1) #69 (Oct. 2002)

REAL NAME Unknown

HEIGHT 5ft 10in **WEIGHT** 148 lbs

EYES Brown **HAIR** Brown

POWERS/ABILITIES Telekinesis; emits positive vibrations that help calm those around her, flight, highly trained former government agent.

ALLIES Green Arrow, Nightwing, Nudge, Hawkgirl, Major Disaster

ENEMIES Kanjar Ro, Lord Crucifer, Crime Syndicate

AFFILIATIONS Justice League, Doom Patrol

Engigmatic metahuman government operative Faith. She was raised by the military and worked with a black ops team as "the Fat Lady" (because she finished what others

started, as per the saying "it's not over until the fat lady sings"). When the Justice League were sent thousands of years into the past during the *Obsidian Age*, Faith was one of the replacements called in to cover, and remained after the League returned. Soon after, she joined the Doom Patrol, becoming a role model to a young hero called Nudge, before returning to the Justice League when the Crime Syndicate invaded.

She has no apparent connection to the murderous child, Faith who was transformed by alien Bloodlines parasites in Pine Ridge.

FALCONE, CARMINE

DEBUT *Batman* (Vol. 1) #405 (Mar. 1987)

BASE Gotham City

HEIGHT 6ft 1in **WEIGHT** 205 lbs

EYES Brown **HAIR** Gray

POWERS/ABILITIES Powerful crime boss with many connections in the underworld; extremely wealthy; very intelligent strategist.

ALLIES Mayor Sebastian Hady, Jack Forbes, Tiger Shark

ENEMIES Batman, Catwoman, James Gordon, The Penguin, Professor Pyg

AFFILIATIONS Falcone Crime Family

When Batman first embarked on his crime-fighting career in Gotham City, it took his and James Gordon's combined efforts to drive the notorious mob leader Carmine "the Roman" Falcone out of their town. More than five years later, when Commissioner James Gordon was imprisoned after being falsely accused of murder, the Roman reemerged in Gotham City, realizing it was the opportune time to reestablish his criminal empire. He had spent years in Hong Kong and had been successful overseas, but he had been looking for the chance to retake his home turf.

One of Carmine's first actions was to take revenge on Catwoman for scarring his face.

He kidnapped her, only to be attacked and taken hostage himself by one of Gotham City's newer Super-Villains, Professor Pyg. Carmine's illegal activities later caught up with him, and he was arrested and imprisoned by Detective Jason Bard. The Falcone family remains active in Gotham City, however, and played an integral part in corrupting Harvey Bullock's G.C.P.D. partner, Nancy Yip.

ON THE RECORD

Carmine Falcone first appeared in Gotham City in "*Batman Year One*," which retold Batman's origin after the *Crisis on Infinite Earths*.

A near-untouchable crime boss, Falcone's most obvious physical trait was a scratch on his face made by Catwoman. His past and family were further examined in *Batman: The Long Halloween*, a series where he met his end at the hands of a crazed Two-Face.

FAMILY TIES

In *Batman: Dark Victory*, the follow-up series to *The Long Halloween*, Catwoman revealed that she believed Carmine Falcone was her real father.

FAIRCHILD, CAITLIN

DEBUT *Deathmate Black* (Sep. 1993)

HEIGHT 5ft 7in/6ft 4in (max. size) **WEIGHT** 133 lbs/300 lbs (max. size)

EYES Green **HAIR** Red

POWERS/ABILITIES Can increase in size and weight; superhuman strength, endurance, and durability; extremely intelligent with advanced knowledge of robotics and biology, psionic communication

ALLIES Superboy, Dr. Niles Caulder, Ridge

ENEMIES Rose Wilson, Harvest, Deathstroke, Warblade

AFFILIATIONS Ravagers, N.O.W.H.E.R.E. (formerly)

Caitlin Fairchild was the daughter of Alex Fairchild, a member of the strategic task force called Team 7. Caitlin benefited from her father's connections, receiving an internship at the prestigious Advanced Prosthetic Research Center. However, that 'benefit' would turn out to seal her doom when the A.P.R.C.'s Project Spartan got out of hand. Caitlin was turned into a cyborg and was no longer in control of her own body, killing her father when he attempted to rescue her. In turn, she was eliminated by his Team 7 comrade Slade Wilson, aka Deathstroke.

However, the complex life of Caitlin Fairchild did not end there. Prior to her death at the A.P.R.C., Caitlin had been secretly cloned and her clone now worked for Harvest at the clandestine operation N.O.W.H.E.R.E., believing she was the original Fairchild. Initially lending her expertise to Harvest's Superboy project, Caitlin had a change of heart when she learned of the culling process for N.O.W.H.E.R.E.'s metahumans, and helped a group of superpowered teenagers escape his horrific killing fields. The escapees became a short-lived Super Hero group called the Ravagers, but were ultimately defeated by Harvest and his employee Deathstroke.

ON THE RECORD

Caitlin Fairchild debuted in a different reality. The daughter of Alex Fairchild in this reality too, smart, quiet Caitlin attended Princeton University, where she was recruited into Project Genesis. As a result of her experimental work, she became "Gen-active," and developed superpowers. When she realized she was being used as a lab rat of sorts, she fled the project with a few other powered teens. They formed the Super Hero group Gen-13, in which Caitlin served as the leader.

NEXT GEN

While Caitlin Fairchild had a different past in previous incarnations, she always retained her distinctive green and purple costume color scheme.

FAORA

DEBUT *Action Comics* (Vol. 1) #471 (May 1977)

REAL NAME Faora Hu-Ul

HEIGHT 5ft 7in

WEIGHT 150 lbs

EYES Brown **HAIR** Black

POWERS/ABILITIES As a Kryptonian exposed to Earth's yellow sun, Faora has all the powers of Superman including heat vision, freezing breath, superhuman strength, endurance, durability, enhanced senses, and the ability to fly; extremely proficient in fighting arts; a tactical and weapons expert.

ALLIES General Zod, Non

ENEMIES Superman, Wonder Woman

Hailing from the planet Krypton and born years before Kal-El—the hero who would become Superman—the notoriously cruel Faora Hu-Ul was a loyal lieutenant to Dru-Zod. Working alongside the rebel scientist Non, Faora was chosen from thousands to serve General Zod. Relishing her role in Zod's quest for power and war, Faora helped him fabricate a conflict with the alien Char, and the pair began a romantic relationship. However, their crimes were finally discovered by Kal-El's father, Jor-El, and they were sentenced, along with Non, to the dreaded prison dimension known as the Phantom Zone.

Decades later, General Zod would escape the Phantom Zone and arrive on Earth, where he encountered Superman. He soon showed his true colors, tricking the Man of Steel into taking him to his Fortress of Solitude, where he freed Faora from the Zone and departed the Fortress with her. When Superman pursued them, they attacked him, causing Wonder Woman to also join the fray. After Zod and Faora narrowly won the battle, Superman and Wonder Woman adopted new armor, but were brutally dispatched when the Greek god Apollo came to the villains' aid. Zod and Faora then opened a portal to the Phantom Zone to access the Warworld and rain devastation down on Earth. However, their plans were thwarted when the portal was destroyed by a nuclear explosion set off by Superman and Wonder Woman, which trapped the evil Kryptonians in the Phantom Zone once more.

ON THE RECORD

Faora first appeared in Metropolis after escaping the Phantom Zone. She had survived the destruction of Krypton, and had found a way to shift in and out of the Phantom Zone, making her a huge threat to the Man of Steel. Faora had been sentenced to the zone for causing the death of 23 Kryptonian men. After *Crisis on Infinite Earths*, Faora reemerged as one of the fighters for a new version of General Zod.

INVADER FROM KRYPTON

When Faora Hu-Ul first debuted, it was in a phantom form. When she caused havoc in the streets, Superman attacked her, not realizing that she was a person.

FATALITY

DEBUT *Green Lantern* (Vol. 3) #82 (Jan. 1997)

REAL NAME Yrra Cynril

BASE Zamaron; mobile

HEIGHT 5ft 9in **WEIGHT** 125 lbs

POWERS/ABILITIES Superhuman strength, durability, and endurance; expert fighter; Violet Lantern ring.

ALLIES Star Sapphire, Wonder Woman

ENEMIES Green Lantern John Stewart

AFFILIATIONS Legionnaires Club, Demon Knights, Justice League United, Zamaron Star Sapphires

Oldest child of planet Xanshi's ruling family, Yrra Cynril was off-world studying fighting arts with the legendary Warlords of Okaara when her world was destroyed due to a terrible mistake made by Green Lantern John Stewart. Seemingly her world's only survivor, she swore vengeance against all Green Lanterns. In defiance of her warlord tutors, she left Okaara and became one of the fiercest warriors in the universe. Now with the name Fatality, Yrra concentrated on eliminating Earth's Green Lantern, Kyle Rayner, but was unsuccessful.

Fatality joined the Sinestro Corps before being "rehabilitated" by Zamaron Star Sapphires. She then found herself partnering with Lanterns from every spectrum of light, forming the New Guardians in the process. However, when separated from her Star Sapphire ring, she realized how she had been manipulated by the Zamarons, and

LOVE CONQUERS ALL

During her time as a Star Sapphire, Fatality embraced the role, letting love overwhelm her and even falling for the destroyer of her world, John Stewart.

she renewed her hatred for John Stewart. In recent times, she has rejoined the Star Sapphire Corps, battling beside her sisterhood and Wonder Woman to destroy invading Dark Multiverse God Karnell.

FATHER TIME

DEBUT *Seven Soldiers: Frankenstein* #3 (Apr. 2006)

BASE Ant Farm (mobile)

HEIGHT 4ft 1in

WEIGHT 56 lbs

EYES Brown

HAIR Black

POWERS/ABILITIES Natural leader; expert strategist and hand-to-hand combatant; powerful espionage connections.

ALLIES Creature Commandos, Ray Palmer

Every decade, the mysterious man known as Father Time generates a new body at random to act as his host. Currently housed in the body of a young Asian girl, Father Time is the active director of S.H.A.D.E.—the Super Human Advanced Defense Executive—which is often at the forefront of metahuman conflicts. S.H.A.D.E. has a hand in many projects, including a strike force called the Creature Commandos, put together by Father Time and led by agent Frankenstein. During Frankenstein's missions, Father Time communicates with him via holographic projection, providing mission-critical data and instructions.

Father Time's mobile headquarters is the Ant Farm, a three-inch indestructible globe that requires agents to deploy Ray Palmer's shrinking technology in order to enter it. An expert tactician and brilliant negotiator, the gruff Father Time works with other top secret groups like Checkmate, to make sure S.H.A.D.E. runs smoothly.

TIME IS PRECIOUS

Despite appearances, Father Time is a seasoned leader. His innocent guises often lead his opponents to underestimate his abilities.

FATAL FIVE

DEBUT *Adventure Comics* (Vol. 1) #352 (Jan. 1967)

MEMBERS/POWERS **Tharok:** Energy being with mind-control powers; **The Emerald Express:** Flight, force fields, energy projection, and other powers bestowed by the Emerald Eye of Ekron; **The Persuader:** Superhuman strength and endurance, atomic ax; **Validus:** Near-invulnerable juggernaut; **Mano:** Antimatter touch; **Promethean Giant:** Colossal size and immense cosmic power.

ENEMIES Legion of Super-Heroes, Science Police, United Planets, Justice League United

A thousand years from now, when the United Planets were menaced by the cosmic threat of the Sun-Eater, the Legion of Super-Heroes was ordered to collect five of the galaxy's most dangerous criminals to help fight it: Tharok, Emerald Empress, Validus, Mano, and the Persuader. Once the Sun-Eater was vanquished—at the cost of Legionnaire Ferro Lad's life—the criminal quintet remained together as the Fatal Five.

With minor lineup changes, the Fatal Five battled the Legion and menaced the United Planets for years, never triumphing, but always managing to elude justice. At some stage, the occasionally precognitive Emerald Empress had a vision that Supergirl would battle her to a final conclusion, and that in the clash, the Empress' father would die. Galvanized to rash action, she traveled back to the 21st century, resolved to kill the Girl of Steel before they had ever met. To ensure her scheme's success, the Empress created her own Fatal Five, recruiting sorceress Selena, deranged god-killer Magog, killer android Indigo and a clone of unliving monster Solomon Grundy. Despite overwhelming force and a cruel campaign of misinformation painting Supergirl as an out-of-control alien menace, the Girl of Steel and her allies ultimately triumphed and the Empress was forced to flee.

KILLER QUINTET

- 1 Selena
- 2 Solomon Grundy (clone)
- 3 Magog
- 4 Emerald Empress
- 5 Indigo

ON THE RECORD

The original incarnation of the infamous Fatal Five was involved in several important cosmic events. In one notable encounter with the Legion of Super-Heroes, the Five recruited hundreds of their alternate-world counterparts to take on the Legion. For their part, the Legion had to join forces with their 20th-century counterparts, the Teen Titans, to battle the Fatal Five.

During the *Final Crisis* event, the Five joined Superboy Prime's Legion of Super-Villains to battle the Legion of Three Worlds.

A FORCE TO BE RECKONED WITH The Fatal Five proved to be one of the Legion's most formidable foes and even went head-to-head with Superman.

FAUST, FELIX

DEBUT *Justice League of America* (Vol. 1) #10 (Mar. 1962)

HEIGHT 5ft 11in

WEIGHT 172 lbs

EYES Gray **HAIR** Black

POWERS/ABILITIES Faust is a formidable sorcerer, drawing his mighty mystical power from a demonic bargain.

ALLIES Dr. Mist, Nick Necro, Demons Three, Crime Syndicate

ENEMIES Justice League Dark, A.R.G.U.S.

Once a major and persistent menace to the Justice League of America, sorcerer Felix Faust has been a pale shadow of his former self ever since *Flashpoint* and other multiversal reality shifts. Reduced to little more than a petty dabbler, Faust obsessed over finding the all-powerful Books of Magic. Learning that dead and damned sorcerer Nick Necro knew their location, Faust pledged his soul to a demon to free Necro from Hell. The pact bestowed great power on Faust, but turned him into a withered, ghoulish figure. Necro and Faust secured a box containing a map to the books, but with no way to open it, they tricked Justice League Dark into capturing them. When John Constantine used a mystic key to open the box, Faust escaped with the contents, but was ultimately outwitted by Constantine.

After the Crime Syndicate invaded Earth, Faust and Necro worked on creating their Thaumaton weapon, which was powered by imprisoned occult Super Heroes including Black Orchid, Enchantress, Blue Devil, Sargon the Sorcerer, and Zatanna. However, they were again defeated by Justice League Dark, who later encountered a monstrous future version of Faust that was an immortal among the last living beings in existence.

Faust has returned, but remains relatively ineffectual. He refused to join Neron's mystic assault against Midnighter and Apollo, and was subsequently drained of power and sanity by the invading Otherkind.

ON THE RECORD

Felix Faust pledged his soul to the demon Neron, but was soon desperate to win it back. Faust posed as Doctor Fate and offered to bring Elongated Man Ralph Dibny's dead wife Sue back to life with a magic spell. In fact, the spell was intended to damn the hero; Faust hoped to trade Dibny's soul for his own and free himself from Neron's thrall. Dibny outwitted Faust and trapped him and Neron in the Tower of Fate. The deed cost Dibny his life, and he was reunited with Sue in the afterlife.

IN FAUST'S HANDS

Felix Faust was an early foe of the Justice League of America. The evil sorcerer used his command of magic to turn the JLA into unwilling puppets.

FEARSOME FIVE

DEBUT *New Teen Titans* (Vol. 1) #3 (Jan. 1981)

MEMBERS/POWERS **Mammoth:** Strength and durability; **Gizmo:** Rebuilds technology to create weapons; **Jinx:** Casts magic spells if in contact with Earth; **Shimmer:** Transmutes materials; **Psimon:** Mind control, can kill with a thought.

ALLIES Crime Syndicate, Secret Society
ENEMIES Rogues, Metal Men

Originally formed by Doctor Light, the Fearsome Five are a group of super-criminals who have formidable powers but lack true efficacy. They were recruited by the Crime Syndicate—invading Super-Villains from Earth-3—for their world-conquering Secret Society. The Fearsome Five were sent to punish the Rogues when they rejected the Crime Syndicate's offer. The outnumbered Rogues fought valiantly, forcing all their foes through one of Mirror Master's mirrors, which they then smashed. After this failure, Grid—the Crime Syndicate's artificial intelligence—teleported the Fearsome Five to assist in his battle against Cyborg and the Metal Men. However, the Five were outclassed again, beaten, and captured by Doc Magnus' metallic creations.

Perennial pawns, the Five joined another coalition to destroy the Justice League and later clashed with their earliest nemesis, the Titans, while fronting for a company stealing and selling metahuman powers. They were completely unaware that their latest secret leader was Deathstroke the Terminator.

CRIMINAL CREW

The Fearsome Five were enthusiastic members of the Secret Society, but ultimately inept in battle.

FERRO LAD

DEBUT *Adventure Comics* (Vol. 1) #346 (Jul. 1966)

REAL NAME Andrew Nolan

BASE Legion Headquarters, New Metropolis, 31st-century New Earth

EYES Green **HAIR** Brown

HEIGHT 5ft 7in **WEIGHT** 155 lbs

POWERS/ABILITIES Transforms his body into metal, gaining great strength and durability.

ENEMIES Sun-Eater, Rimbor Warrior Clan

AFFILIATIONS Legion of Super-Heroes

Andrew Nolan of Earth was born in the 31st century. He is an accomplished warrior with the ability to transform his body into the hardest substance known to science. This process causes all his life functions to pause until he returns to flesh and blood, but even Brainiac 5 is unable to explain (yet) how Ferro Lad moves, senses his environment, and thinks in this state.

A veteran of many combats—earning him a well-deserved place in the Legion of Super-Heroes—Nolan is confident and commanding and was pivotal in the defeat of deranged Rimborian Crav, the General Nah.

In a previous reality, when the solar system was menaced by the Sun-Eater, Ferro Lad sacrificed his own life to carry an Absorbatron Bomb into the core of the cosmic monstrosity and end the threat. He then returned as ghost to save his fellow Legionnaires from a rogue Oan Controller, before passing beyond the realms of life. No Legionnaire has ever proved more valiant or dedicated.

A HERO FROM THE PAST

The ghostly form of Ferro Lad gave Polar Boy and the Invisible Kid a somber warning when they visited the afterlife.

FEMALE FURIES

DEBUT *Mister Miracle* (Vol. 1) #6 (Jan.-Feb. 1972)

BASE Apokolips

NOTABLE MEMBERS/POWERS **Big Barda:** Born leader, super strong and durable; **Mad Harriet:** Insane fighter with energy claws; **Stompa:** Powerhouse with anti-matter boots; **Lashina:** Energy whip-armed warrior; **Bernadeth:** Sneaky usurper wielding a deadly fahrenheit-knife.

ALLIES Granny Goodness, Darkseid, Steppenwolf, Desaad

ENEMIES Mister Miracle

The Female Furies are the elite warriors of Apokolips, trained from childhood in combat and indoctrinated to be fanatically loyal to Darkseid. However, the abuse and intolerance they continually endured from male warriors of all ranks in the dark overlord's patriarchal, militaristic regime served to make them rebellious and ruthless.

After helping Darkseid attain supreme power, warrior Granny Goodness was increasingly sidelined by his chauvinistic inner circle. Left to train mere women, they were driven to be ferocious and uncompromising. As the cadets gained in skill and power, their continual treatment as morons and casual toys led to the death of squad leader Aurelie. Pushed too far, the Furies rebelled, murdering their prime abuser, Willik. As Granny Goodness orchestrated her own plan of advancement, the Furies were dispatched to Earth to capture absconder Scott Free, whose influence had prompted the mutiny and escape of second-in-command Barda. In the following chaos, the status of women as warriors on Apokolips was forever changed. Now they too were allowed to maim and kill and die for Darkseid.

Barda abandoned Apokolips for her love, Mister Miracle. They fought side-by-side with the Justice League on many occasions, including in the Darkseid War. When he fell, his deranged daughter Grail fused the League's New God powers with Superwoman's baby to resurrect an even more powerful Darkseid. However, when all seemed lost, Barda brought reinforcements—the reformed Female Furies—to turn the tide of battle.

DARKSEID'S DEFENDERS

Big Barda returned to the forefront of the Furies to protect Darkseid from his own daughter, Grail... and brought backup.

- 1 Barda, 2 Mad Harriet, 3 Stompa,
- 4 Lashina, 5 Bernadeth, 6 Kanto, 7 Kalibak,
- 8 Steppenwolf

ON THE RECORD

The Female Furies were trained by Granny Goodness to serve Darkseid. When Big Barda fled Apokolips to join her beloved Mister Miracle on Earth, the team was sent to attack the happy couple (and the planet's other Super Heroes) on numerous occasions. The Furies were presumed killed during the Death of the New Gods, but Mary Shazam used the Anti-Life Equation to create new Furies from human females during *Final Crisis*, and the *Rebirth* event restored the original individuals to continuity.

THE FIGHTING FURIES

On the trail of renegade Fury-turned-Super-Villain, Twilight, Supergirl had to confront the combined might of the Female Furies.

FIREBRAND IV

DEBUT *Battle for Blüdhaven* #1 (Jun. 2006)

REAL NAME Andre Twist

BASE The Heartland

EYES Blue

HAIR Blond

POWERS/ABILITIES Pyrokinesis

ALLIES Teen Titans

ENEMIES Father Time, King Bullet, the Jester

AFFILIATIONS The Freedom Fighters

Andre Twist was the fourth individual to assume the role of Firebrand. A courageous, opinionated, politically left-leaning resident of Blüdhaven, Twist

gained extraordinary pyrotechnic superpowers when living weapon Chemo was dropped on his city.

Calling himself Firebrand, Twist began hearing voices in his head. They turned out to be Uncle Sam, urging him to become part of a new Freedom Fighters team. He was later captured and tortured by Father Time until freed by Uncle Sam.

Firebrand then joined the modern-day incarnation of the Freedom Fighters, Freedom Force, helping them stop various threats, including an alien invasion. Twist was crippled while fighting King Bullet's armies, and was later killed by the Jester on his first mission back.

FIRE

DEBUT *Super Friends* #25 (Oct. 1979)

REAL NAME Beatriz "Bea" Bonilla da Costa

HEIGHT 5ft 8in **WEIGHT** 140 lbs **EYES** Green **HAIR** Green

POWERS/ABILITIES Can take on a fiery form at will, fly, and fire green energy blasts of flame.

ALLIES Ice

ENEMIES Peraxxus, Signal Men

AFFILIATIONS Justice League International

Beatriz "Bea" Bonilla

da Costa was born in Brazil.

Originally a spy for the Brazilian Secret Service, Bea was on a mission when she came into contact with a strange chemical mix called pyroplasm. Her

exposure to the substance gave her the metahuman ability to control a green flame that could cover her whole body and allow her to fly.

When Andre Briggs decided to create a Justice League International team that operated under the guidance of the United Nations, Bea was selected to be Brazil's representative. She fought alongside Ice, Guy Gardner, Rocket Red, Vixen, Godiva, and August General in Iron, under the leadership of Booster Gold. Bea helped the team defeat the alien Peraxxus, who was using Signal Men robots to try to destroy the world, having already removing minerals and wealth from the planet to sell elsewhere in the universe. After defeating him, the JLI was about to meet the public when an explosion killed Rocket Red and left several members—including Bea—severely injured.

ON THE RECORD

Originally known as Green Fury, Bea made her debut fighting a brainwashed Superman in *Super Friends* #25 and was later assisted the JLA on several cases.

Fire's original appearance was that of a more traditional costumed crime fighter. She was a member of the Global Guardians before joining the original Justice League International formed by Maxwell Lord. Her close friend, Ice, was also a member. Fire later joined the Checkmate organization and worked for Bruce Wayne.

JOINING FOR JUSTICE

Fire was one of ten superpowered beings whose common goal was to champion justice and tolerance for humans and metahumans alike.

FIREFLY

DEBUT *Detective Comics* (Vol. 1) #184 (Jun. 1952)

REAL NAME Ted Carson

BASE Gotham City

EYES Blue **HAIR** Blond

POWERS/ABILITIES Pyromaniac with specialized armor enabling flight; explosives and pyrotechnics expert.

ENEMIES Nightwing, Batgirl

When Ted Carson—the ex-boyfriend of movie star Cindy Cooke—was found dead in a burned-out building, it looked like he had been murdered. Around the same time, an arsonist started to destroy anything in Gotham City linked to Cindy. The culprit turned out to be Firefly—a flying villain in a flaming metal suit.

When Nightwing and Barbara Gordon investigated, it seemed that Firefly was the known-arsonist Garfield Lynns. The heroes even found a clue in Lynns' empty apartment: a list of potential targets with only one location not yet destroyed. It was a false trail. Firefly had maneuvered the police into a particular place, leaving Cindy unguarded. Realizing that they had been duped, Nightwing raced to Cindy's penthouse, but arrived too late—Firefly attacked, apparently killing her. However, the burned victim was Cindy's agent.

Firefly was actually Ted Carson. He had faked his and Cindy's deaths in an attempt to secretly abduct her and restart their relationship on his terms, but his mad plot was foiled by Nightwing and Barbara.

In recent times Carson has revived his Firefly guise, acting as an incendiary mercenary killer, but he always ends up falling foul of Batman.

ON THE RECORD

The original Firefly was special effects creator Garfield Lynns. He emitted intense lights from his belt, and his colorful appearance was in keeping with the lighter tone of the Batman stories of the 1960s.

The second Firefly was Ted (Theodore) Carson, who debuted in *Batman* #126 (Sep. 1959). Again, he wasn't an arsonist so much as a winged villain who projected a deadly ray from a helmet lamp.

RAINBOW RIVAL

The original Firefly, known as "The Man of 1,000 Lights," projected his colorful light to distract and disorientate his victims.

POWERS/ABILITIES Ability to control and rearrange inorganic matter, fly, manipulate his own molecular structure, and emit energy blasts.

ENEMIES Deathstorm, Pozhar, Killer Frost, Typhoon, Multiplex

AFFILIATIONS Justice League

TWO HALVES

Ronnie had a strained relationship with his true father, and his mother had died years before his accident. It made him a perfect choice for Stein's experiment, as he reminded Martin of his own son.

doubt on the accident's legitimacy, making Raymond believe the event could have been planned in collaboration with the Department of Metahuman Affairs. Whatever the true cause of the explosion, afterward, Ronnie and Martin became Firestorm, giving Ronnie control over their physical form.

Empowered with the ability to arrange the molecular structure of inorganic matter, Firestorm combined Ronnie's bravery with Martin's knowledge and fought storied battles against numerous Super-Villains, including Killer Frost (Dr. Louise Lincoln), Typhoon, and Multiplex. After proving his worth, Firestorm was even recruited to join the Justice League. Through events that are unclear due to manipulation of reality itself, Ronnie would later go on to partner with fellow student Jason Rusch as the other half of his Firestorm identity. It was this version of Firestorm who helped battle the nefarious Crime Syndicate, when they invaded Earth-0 from their home, Earth-3. In this tumultuous fight, Firestorm's matrix was used to trap many of his Justice League teammates against his will. He later recovered, his teammates were freed, and Firestorm continued his heroic journey.

It is believed that Ronnie recently rekindled his Firestorm partnership with Dr. Stein, yet even that partnership is in doubt, with rumors circulating that Stein actually helped orchestrate Ronnie's original transformation into Firestorm.

Ronnie Raymond and Professor Martin Stein are two very different personalities, one is the epitome of youthful exuberance, the other rational thought personified. But when merged into a single entity, these opposites compliment each other's strengths as Firestorm, the Nuclear Man.

While much remains a mystery about the origin of the hero Firestorm, it is believed that a nuclear explosion fused Professor Martin Stein and teenager Ronnie Raymond together over seven years ago. For much of Firestorm's career, this event was thought to be an accident, one that sparked Ronnie's latent metahuman abilities and turned the pair into the hero Firestorm. However, in the events now dubbed the *Doomsday Clock*, Ronnie witnessed a vision that casts

NUCLEAR POWERED Firestorm is a living nuclear reaction and one of the mightiest—and potentially deadliest—heroes in the world.

ON THE RECORD

Firestorm's appearance has hardly changed since his debut, despite numerous people being part of the Firestorm matrix. Originally, the nuclear-powered hero was the result of student Ronnie Raymond and Professor Martin Stein being caught in an explosion at the Hudson nuclear facility. Ronnie and the Russian hero Pozhar later combined for another incarnation. Ronnie later died, passing the mantle to Detroit teenager Jason Rusch. After *Blackest Night*, Ronnie came back and reprised his Firestorm role.

FIRESTORM AND FRIENDS Firestorm has been part of several different lineups of the Justice League.

CLASSIC STORIES

Firestorm (Vol. 1) #1 (Mar. 1978)

Firestorm's origin is revealed. Ronnie Raymond and Professor Martin Stein find themselves changed forever when they combine to become a nuclear-charged Super Hero.

JLA (Vol. 1) #69 (Oct. 2002)

When the Justice League is trapped in Atlantis, Firestorm joins a new lineup of the team to rescue the original members.

Firestorm: The Nuclear Man (Vol. 3) #23-27 (May-Sep. 2006)

One year after the *Final Crisis*, Jason Rusch merges with Lorraine Reilly (Firehawk) to create a new Firestorm and search for the missing Professor Stein.

FRAME JOB During events dubbed the *Doomsday Clock*, Firestorm was framed for murder while fighting Pozhar—later revealed as another plot by the villain Ozymandias.

FIRST BORN

DEBUT *Wonder Woman* (Vol. 4) #12 (Oct. 2012)
BASE Olympus
HEIGHT 7ft 6in **WEIGHT** 375 lbs
EYES White **HAIR** Black
POWERS/ABILITIES Exceptional physical power and durability; gains strength from cannibalism; acquires knowledge by eating brains; wears impregnable dragon-hide armor.
ALLIES Minotaur, Strife, Cassandra
ENEMIES Apollo, Zeus, Hades, Wonder Woman

The First Born was the first child of Zeus and Hera. When a witch foretold that the child would one day rule Olympus in Zeus' stead, the god had the baby taken to the African savanna and left to die. However, the infant survived and was raised by hyenas and, in time, used his divine might to conquer an empire, seeking to make Zeus acknowledge him.

When Zeus remained silent, the First Born declared war on Olympus. The gods sent a wave to drown his army, while the warrior-king himself was swallowed up by the Earth. It took the First Born millennia to dig his way out. When he emerged in the 21st century, he set out to take the throne of Olympus, which he thought was rightfully his.

After clashing with Wonder Woman in London, he confronted the current ruler of Olympus and killed him, devastating Olympus in the process. The First Born also conquered Hades, but was then hurled into the abyss by the new God of War: Wonder Woman.

UNHOLY RAGE

As the eldest son of Zeus, First Born traveled to Mount Olympus to claim the Olympian gods' throne.

FISHERMAN

DEBUT *Aquaman* (Vol. 1) #21 (May–Jun. 1965)
BASE Zandia
HEIGHT 6ft **WEIGHT** 196 lbs
EYES Blue **HAIR** Black
POWERS/ABILITIES Wields titanium fishing rod and gas-bomb lures; hood boosts strength and allows breathing underwater.
ALLIES Shark, Kobra
ENEMIES Aquaman, Blue Devil, G'Nort, King Shark
AFFILIATIONS Terrible Trio

The Fisherman is an enigmatic maritime villain and longtime Aquaman foe. His signature weapon is a custom titanium-alloy fishing rod which he can use to entangle

foes, slice them with a razor-sharp hook, or snag nearby objects. He also carries fishing lures which function as gas bombs.

Fisherman's identity remains a mystery, but his standard modus operandi is to carry out daring seaborne thefts. During *Infinite Crisis*, he went on a murderous spree in Gotham City before being shot dead by police. Soon after, Aquaman encountered another Fisherman and made a terrifying discovery: The Fisherman's hood was an alien parasite which controlled its human host and gave them powers, such as breathing underwater. When the current host dies, the parasite finds a new one.

FLAMINGO

DEBUT *Batman* (Vol. 1) #666 (Jul. 2007)
REAL NAME Eduardo Flamingo
BASE Gotham City
EYES Blue **HAIR** White
POWERS/ABILITIES Skilled combatant
ALLIES Mad Hatter, Scarecrow
ENEMIES Batman
AFFILIATIONS Secret Society of Super-Villains, Arkham Asylum inmates

After receiving radical brain surgery that turned him into an unpredictable killer, Eduardo Flamingo was a hit man for the Penitente Cartel before going solo.

"The Flamingo" became notorious for his fashion choices (a pink jacket with gold epaulets) as well as his tendency to eat people's faces. Following a number of run-ins with Batman in Gotham City, he was imprisoned in Arkham Asylum. When the Crime Syndicate staged a prison break during its invasion of Earth, Flamingo joined the Secret Society of Super-Villains.

He sided with the Arkhamites in the war between Arkham Asylum and the prisoners of Blackgate Penitentiary, then served as a security guard when the Scarecrow took over Arkham during the Gothtopia incident. He escaped from Arkham, but was soon recaptured following an ill-advised attempt to play matador with the Batmobile.

FLAG JR., RICK

DEBUT *The Brave and the Bold* (Vol. 1) #25 (Aug.–Sep. 1959)
REAL NAME Richard Rogers Flag, Jr.
BASE Belle Reve Penitentiary
HEIGHT 6ft 1in **WEIGHT** 189 lbs **EYES** Blue **HAIR** Brown
POWERS/ABILITIES Military pilot and skilled tactician with extensive combat and special-operations training.
ALLIES Amanda Waller, Bronze Tiger, Nightshade
ENEMIES Rustam, Brimstone, Zod
AFFILIATIONS Task Force X, Navy Seals, Suicide Squad

Colonel Rick Flag, Jr. came from a career military family and dedicated his life to living up to the legacy of his father and grandfather. During World War II, combat pilot Richard Montgomery Flag led "the Suicide Squadron"—a misfit unit he honed into an elite combat team. Post-war, Flag, Sr. joined the government's classified Task Force X program and was reported killed in action.

When Amanda Waller reactivated the Suicide Squad as a covert penal unit utilizing incarcerated Super-Villains, Flag's grandson, Richard Flag, Jr., took on the role of Field Commander. He accepted the job because bad guys needed killing and he also wanted to get out of the military prison where he was serving an indefinite sentence for refusing to carry out an illegal order. Despite misgivings, Flag Jr. excelled among the metahumans, battling many incredible threats but eventually wearying of the constant intrigue. He sacrificed his life to stop the rampaging Kryptonian Zod, but was later found in the Phantom Zone. Flag Jr. accepted the White House's request to rejoin the team, partly from a sense of duty, but also because he had heard that Amanda Waller might have been the one who originally sent him to military prison, and he wanted to find the truth.

COMMANDING PRESENCE Flag is an expert tactician and leader, and he has years of combat experience to settle any firefight!

FLASH, THE

DATA

DEBUT Showcase #4 (Sep.-Oct. 1956)

REAL NAME Barry Allen

BASE Central City

HEIGHT 5ft 11in **WEIGHT** 179 lbs **EYES** Blue **HAIR** Blond

POWERS/ABILITIES Super-speed, super-endurance, and accelerated healing; he can think quickly, mapping out the potential outcomes of a situation and reading books in an instant; can vibrate his molecular structure fast enough to pass through objects.

ALLIES Iris West, The Flash (Wally West), Kid Flash (Wallace West), Impulse

ENEMIES The Rogues, Gorilla Grodd, Reverse-Flash, Professor Zoom

AFFILIATIONS Justice League

Barry Allen is The Flash—the Fastest Man Alive. A living conduit for the Speed Force—a strange other-dimensional energy field that gives all speedsters their power—Barry is capable of amazing acceleration and he uses his powers to fight crime in his hometown of Central City. The Flash is a founding member of the Justice League, joining with his fellow Super Heroes when Darkseid, ruler of Apokolips, and his demonic legions attacked Earth. He remains a key member of the team and has formed lasting friendships with other members. The Flash not only runs at extraordinary speeds, he also has lightning-quick wits!

AT A GLANCE...

Super-speed

As the self-professed Fastest Man Alive, Barry Allen believes he can outrun Superman in a running race, even though Superman's ability to fly may give him the edge. The Flash's metahuman ability helps his body to avoid the friction caused by his high speeds and to contain the damage it should ordinarily cause around him. He keeps his costume in a ring.

Rogues Gallery

A number of Super-Villains have become obsessed with The Flash. Chief among these are the Rogues—a group of criminals formed by Captain Cold. Operating out of Central City and Keystone City, the Rogues became “heroes” when they were tasked with hunting The Flash down after he briefly became a wanted man.

Speed Force

The Flash's speed comes from the Speed Force, which grants several speedster heroes and villains their powers. Barry Allen is one of the few who have spent time living inside the Speed Force dimension.

Young Barry Allen's life changed forever when his mother was murdered and his father, Henry Allen, was blamed for the crime. But Barry never believed his father was guilty. As an adult, Barry found work as a forensic scientist in the Central City police department. One night, Barry was working late in his lab when lightning struck, showering the young investigator with a strange mix of chemicals. He woke in hospital, covered in bandages, but soon found the accident had given him amazing powers of speed.

As Barry tested his powers, burning through hundreds of pairs of sneakers, he ended up accidentally running into a possible future, one ruled by the villainous King Turtle. Barry met his future self, who told him about his life as The Flash—a name inspired by comic books Barry used to read as a kid. The future Flash helped Barry return to his home time via a device called the Cosmic Treadmill.

Reeling from this adventure, Barry went to meet his love interest, Iris West, for a coffee, but ended up saving her from the present day Turtle. Barry soon developed several prototype The Flash suits, but only settled on his final costume when King Turtle from the future arrived in the present day, forcing The Flash to defeat him.

The Flash continued his career and eventually gained a number of foes, including a variety of colorful Rogues. He continued to learn about his powers and discovered he had tapped into the Speed Force—a mysterious ancient power that had caused the extinction of the Mayans and had sped up the evolution of a tribe of gorillas in East Africa.

When someone started killing people linked to the Speed Force, the killer—who called himself Reverse-Flash—turned out to be Iris West's younger brother, Daniel, who was trying to steal Speed Force energy to travel through time and alter his own past. The Flash managed to drain the Speed Force from Daniel and prevent changes in the timeline. Barry then learned that a time-traveling speedster called Professor Zoom (Eobard Thawne) was responsible for his mother's death. He defeated Thawne, but would continue to battle him many times in future encounters.

The Flash's life is always accelerating. When the criminal organization called Black Hole created a lightning storm in Central City, many civilians were granted access to super-speed powers from the Speed Force. Most notable among them were Barry's colleagues police officer August Heart, the young Avery Ho, and S.T.A.R. Labs scientist Dr. Meena Dhawan. Barry's own nephew, Wallace West, already had speed powers, but the storm enhanced his abilities as well. While most of the other potential speedsters gave their powers willingly to Barry through a shared Speed Force connection, Avery kept hers and became a new Flash, later joining the Justice League of China. Wallace became the heroic new Kid Flash and a mainstay of the Teen Titans. However, August had less than heroic plans for his speed. He used it to kill the suspect in his brother's murder and then continued a criminal killing streak as the villainous Godspeed until The Flash stopped him.

Eobard Thawne kidnapped Iris, brought her to the 25th century, and unmasked Barry, shocking Iris. She and The Flash returned to the present, but not before the villain was able to expose The Flash to Negative Speed Force

LIGHTNING FAST
Showered in laboratory chemicals and struck by lightning, Barry Allen ends up with astonishing powers.

CLASSIC STORIES

Showcase #4 (Sep.-Oct. 1956)

Barry Allen makes his first appearance in this classic tale that heralded the start of comics' Silver Age. He also meets his first enemy, Turtle Man—the slowest man alive!

The Flash #123 (Sep. 1961) Barry Allen meets the original Flash, Jay Garrick (of Earth-2), as he crosses over to Earth-2 for the first time and helps the retired Jay defeat three of his old enemies.

Crisis on Infinite Earths #8 (Nov. 1985) Barry Allen's last stand as The Flash sacrifices his life to save the universe from the Anti-Monitor's deadliest weapon.

Flashpoint (Vol. 2) #1 (Jul. 2011) The Flash wakes on an Earth that is not his own and he must change reality itself to save the planet—even though doing so means he must confront his darkest hour.

REBIRTH

FANTASTIC FORCES

The Flash has learned that the Speed Force is not the only cosmic force of its kind. There are four forces that choose avatars to help protect space and time. The Flash soon met the avatars of the other forces: Steadfast from the Still Force, Psych from the Sage Force, and Fuerza from the Strength Force. However, The Black Flash—the angel of death to speedsters—began hunting these avatars and killed Psych.

FAST FACT
The world's greatest speedster can use the Speed Force to travel through time.

ON THE RECORD

Since The Flash's groundbreaking first appearance in 1940, several people have taken on the role, each adding something unique to the hero's mythos. Jay Garrick was the first Flash, making his debut in *Flash Comics* #1 (1940). He fought crime in New York City, although this was later changed to Keystone City.

A new era

Barry Allen made his first appearance as The Flash in *Showcase* #4 (Sep.–Oct. 1956). The story heralded a new style of Super Hero comics and marked the start of the Silver Age. This version of The Flash also sported an all-new red costume. During his time as The Flash, Barry broke through the dimensional barrier between Earths to meet Jay Garrick.

Wally and Bart

Following Barry Allen's apparent demise during *Crisis on Infinite Earths*, Wally West took on The Flash identity. He uncovered the secret of the Speed Force and raced alongside other speedsters, such as Jay Garrick, Impulse, and Jesse Quick. It took a while for the new hero to feel worthy of his mentor's name, and when Wally disappeared, Bart Allen became The Flash until he was killed by the Rogues.

Flash back

When Barry Allen escaped the Speed Force and returned to active duty, he had trouble adjusting to the world around him. But with the help of his old friend Green Lantern, he came to terms with the time he had missed when trapped. The change in reality brought about by *Flashpoint* left Barry younger and single—in the new reality he had never married Iris West.

HEROIC DEMISE

The Flash prepares to make the ultimate sacrifice to stop the Anti-Monitor during *Crisis on Infinite Earths*.

SPEED FORCE HEROES

The Flash (Wally West), Impulse (Bart Allen), Jay Garrick, and Johnny Quick—all inextricably linked by the Speed Force—race to save the day.

energy. When Barry returned to his proper time, Dr. Meena Dhawan absorbed that negative energy and became the Negative Flash in the process.

Between constantly thwarting plots by old foes like the Rogues and Thawne, rediscovering old friends like Wally West, Impulse, Jay Garrick, Max Mercury, and Jesse Quick, and fighting new enemies like Paradox, The Flash has no choice but to keep up his life's hectic pace.

RACING DEATH

During the cataclysmic war against Darkseid, The Flash was forced to become the host for the cosmic grim reaper, the Black Racer. After killing the previous host, The Flash was granted divine powers and became the God of Death.

FLASH (JAY GARRICK), THE

DEBUT *Flash Comics* (Vol. 1) #1 (Jan 1940)
REAL NAME Jason Peter Garrick
BASE Keystone City
HEIGHT 5ft 11in **WEIGHT** 178 lbs
EYES Blue **HAIR** Gray (formerly blond)
POWERS/ABILITIES Super-speed
ALLIES The Flash (Barry Allen), Impulse
ENEMIES Turtle, the Thinker, Reverse-Flash
AFFILIATIONS Justice Society of America, The Flash Family

Jason "Jay" Garrick was the original Flash—a speedster and founder of the Justice Society of America in the mid-20th century. Jay acquired the

power of super-speed after a lab accident. Using it to fight crime, he donned his father's World War I helmet—which had wings like the god Mercury—called himself The Flash and wore a lightning-bolt symbol. The Flash and his Justice Society teammates' exploits were wiped from the timestream by Doctor Manhattan, but only temporarily. Later, Jay and the Justice Society were brought to the present from 1941 and they assisted the Justice League against Perpetua and the Legion of Doom. Perpetua triumphed and Jay and the team went into hiding. Jay was called into action once more to help Barry Allen and Wally West reach the Mobius Chair before the Batman Who Laughs.

FLASH OF CHINA, THE

DEBUT *The Flash* (Vol. 5) #3 (Sep 2016)

POWERS/ABILITIES Super-speed via the Speed Force, intangibility, invisibility, time travel.
ALLIES The Flash (Barry Allen)
ENEMIES Godspeed, Lantern Corps of China
AFFILIATIONS Justice League of China

Avery Ho received her superpowers when Speed Force lightning struck dozens of Central City citizens. At first she could not stop moving, unable to

control her incredible new powers. The Flash (Barry Allen) taught the young girl a way of centering herself in order to stop the vibrations—what she had to do was focus on the things she loved in order to keep herself grounded.

Later, Avery encountered the Justice League of China and joined the team as The Flash of China. She wasted no time in taking on China's Super-Man in a race to find out who was the fastest—a contest that she won easily.

FLORONIC MAN

DEBUT *The Atom* #1 (Jun.–Jul. 1962) (as Woodrue)
REAL NAME Jason Woodrue
HEIGHT 6ft 2in **WEIGHT** 210 lbs

POWERS/ABILITIES Rapid cellular growth and change; can manipulate the Green to grow fabulous plants (as Seeder); can control plant life around the world and draw considerable power from the Green (as Avatar of the Green and Avatar of the Parliament of Flowers).
ALLIES Circe, Legion of Doom
ENEMIES Swamp Thing, Justice League Dark
AFFILIATIONS Parliament of Flowers

Other-dimensional exile Jason Woodrue was fascinated by the idea of using plants to recreate the world. In exchange for saving

Swamp Thing (Alec Holland) from a sorcerer, Earth's Parliament of Trees gave Woodrue the ability to shape the Green—the life force of all Earth's plants. As the Seeder, he created wondrous foliage. The Parliament later elected him their Avatar, but, when Seeder tried to kill Earth's animal life, Holland reclaimed the role. When the Parliament of Trees was replaced by a Parliament of Flowers, Floronic Man Woodrue cultivated their new avatar, Oleander Sorrel. When he was ready, Floronic Man consumed him and became Earth's plant elemental.

REAL NAME Unknown **BASE** New Genesis
HEIGHT 5ft 10in **WEIGHT** 162 lbs
EYES Blue **HAIR** Black
POWERS/ABILITIES Physicality of a New God; enhanced strength, speed, and agility; can climb walls with adhesion-grips, fire acid from suit pods, and modulate his pheromone output.
ALLIES Hooligan, Kuzuko, Orion, Lightray, Batman, Sandman (II and III), Atlas, OMAC
ENEMIES Darkseid, Mantis, Metron, Black Racer
AFFILIATIONS New Gods of New Genesis

Forager was raised as a Bug—an insectoid species introduced to New Genesis by Darkseid to ravage the planet's food supplies. Bugs rapidly evolved into humanoid

forms, proliferating across the planet. When Forager learned that Mantis of Apokolips was uniting rival Bug colonies to invade Earth, he helped Lightray and Orion repel the invasion. Forager sacrificed himself to save the galaxy and was replaced by a female champion who continued his heroic legacy.

After *Flashpoint* and *Rebirth*, the original Forager returned, going on a wild ride through Earth's history to thwart a cruel experiment of Metron's. With his companions Kuzko and her sentient teddy bear, Hooligan, Forager met many unconventional Super Heroes before learning he was actually a New God.

FOREVER PEOPLE

DEBUT *Forever People* (Vol. 1) #1 (Feb.–Mar. 1971)
BASE New Genesis
MEMBERS/POWERS **Dreamer Beautiful:** Creates illusions from others' minds; **Mark Moonrider:** Megaton touch, can fire blasts of pure force; **Big Bear:** Super-strength; **Serafina:** cosmic cartridges alter atoms and perform miracles; **Vykin:** Computer mind, controls magnetism, safeguards Mother Box.
ALLIES Infinity Man, Himon
ENEMIES Mantis, Deviance, Female Furies, Desaad, Darkseid
AFFILIATIONS Academy of Higher Conscience

In the aftermath of war between Apokolips and New Genesis, Izaya the Inheritor rejected mindless aggression and sought a more peaceful way. Part of that was rearing the next generation of New Gods in a free and gentle manner, with choice as their credo. Five of these idealistic youngsters—Big Bear, Beautiful Dreamer, Mark Moonrider, Vykin, and cowboy enthusiast Serfan—called themselves Forever People. Closer than family, they used a communal Mother Box to trade existence with the enigmatic Infinity-Man.

When Darkseid abducted Beautiful Dreamer, her companions came to Earth to rescue her. As explorers and ambassadors, the naive Forever People learned the ways of humankind, explored history with the help of ghost Deadman to find his killer, and prevented Darkseid from securing the Anti-Life equation. Although gentle souls still, they have become feared by many Apokoliptians, such as Granny Goodness and Desaad, who have many reasons to regret crossing swords with them. Today, they act as reluctant warriors when the need arises.

TOGETHER FOR INFINITY

- 1 Big Bear
- 2 Serafina Baldaur
- 3 Vykin Baldaur
- 4 Dreamer Beautiful
- 5 Mark Moonrider

ON THE RECORD

After Flashpoint, the Forever People subtly altered. Now Vykin, Serafina, Mark Moonrider, and Dreamer Beautiful were young New Gods on a field trip to Earth, chaperoned by seasoned warrior Big Bear, who ran the local New Genesis headquarters in Venice Beach, California. While investigating an agricultural project, they were attacked by Apokoliptian Mantis and his insectoid minions. They discovered that when they all touched their Mother Box computer and spoke the word "Taaru," they became a single mighty hero—Infinity Man. As Infinity Man they defeated Mantis.

DRIVING FOREVER

The Forever People rode in a three-wheeled, all-terrain Super-cycle. Designed by the engineers of New Genesis, it could travel at supersonic speeds on the ground or in the air.

DEBUT *Justice League of America* (Vol. 1) #6 (Aug.–Sep. 1961)

BASE A paddle steamer on the Mississippi

HEIGHT 5ft 8in **WEIGHT** 233 lbs

EYES Black **HAIR** Black

POWERS/ABILITIES Advanced intellect and gambling ability makes him appear lucky; uses various tech as a member of the Royal Flush gang.

ENEMIES JLA, Roulette

AFFILIATIONS Royal Flush Gang

When Amos Fortune's father died, the only thing he left Amos was his lucky deck of cards. By age 16, Amos was making money through card tricks and he hired

four of his fellow students to be his lookouts.

They quickly became a gang and came to the attention of local gangster Jimmy the Gent. He employed them for several jobs, then sent them into a mobsters' card game. Amos won, but instead of giving the money to Jimmy, he used it to arm his own group.

Inspired by the Royal Flush he'd had during the card game, Amos led the first "Royal Flush" gang, with members modeling themselves on playing cards. They fought the Justice League of America and later Amos created a global network of Royal Flush gangs. Following another defeat at the hands of the JLA, Amos was shot by the wife of a deceased gang member.

FRANKENSTEIN

DEBUT *Detective Comics* #135 (May 1948)

BASE Magus Theatre, Monstertown, Gotham City

HAIR Black **EYES** Brown

POWERS/ABILITIES Immortal zombie with no need to drink, eat, or breathe; super-strong, skilled swordsman and marksman.

AFFILIATIONS Gotham City Monsters, S.H.A.D.E., Creature Commandos, Justice League Dark

Frankenstein is a former Super Human Advanced Defense Executive agent and a reluctant hero with Justice League Dark. Accidentally created with a conscience, the seeming brute turned on his creator Victor Frankenstein, freeing prisoners scheduled for experimentation. Afterwards, the creature left to explore the world and confront the nature of his origins. He still cannot decide whether he is alive or dead. Calling himself "Frankenstein," he finally gained purpose in life after being recruited by S.H.A.D.E.'s commander, Father Time.

Fighting in both World Wars and the Korean conflict—often supported by fellow warrior outcasts the Creature Commandos—he wed Lady Frankenstein (a S.H.A.D.E. agent codenamed "The Bride"). But tragedy dogged them. She was forced to kill their son when he proved twisted and evil, ultimately begging for his own death. The marriage sundered, but both continued working for S.H.A.D.E., saving the world from many horrific threats. Frankenstein also fought alongside Swamp Thing against the Rot and in the Trinity War as part of Justice League Dark. He recently found a home of sorts by defeating archfoe Mr. Melmoth's threat to the already endangered Multiverse. Frankenstein learned of an encroaching, undisclosed threat (Perpetua) and resolved to protect his outcast kind in a new team: the Gotham City Monsters.

ON THE RECORD

A creature named Ivan referred to as Frankenstein's Monster, first appeared in *Detective Comics* in the 1940s. He was Dr. Victor Frankenstein's large and lumbering assistant who was returned to life following a huge electrical shock.

Another version—more in keeping with the origins of Mary Shelley's original character—fought the Phantom Stranger. A more heroic variation met the Young All-Stars before emerging from the shadows in Seven Soldiers: Frankenstein, setting the stage for the latest incarnation.

MINDLESS MIGHT

A very different Frankenstein's Monster, nicknamed Ivan, once fought Batman and Robin in 19th-century Europe.

FOX, LUCIUS

DEBUT *Batman* #307 (Jan. 1979)

BASE Gotham City

HEIGHT 5ft 10in **WEIGHT** 170 lbs **EYES** Brown **HAIR** Black

POWERS/ABILITIES Exceptional business acumen coupled with excellent engineering and inventive skills.

ALLIES Bruce Wayne, son Luke Fox (Batwing), son Timothy Fox (future Batman) **ENEMIES** Lex Luthor, The Riddler

AFFILIATIONS Wayne Industries

Lucius Fox is one of the most respected financial minds on Earth, but in his first stint at Wayne Industries he was fired by Bruce Wayne's uncle, Philip Kane, who was seeking control of the business.

Fox briefly worked at Gotham School of Engineering, helping Wayne defeat "Doctor Death" and The Riddler when he inflicted *Zero Year* on the city. Shortly after, Bruce rehired Fox, making him Wayne Industries CEO. When Bruce went public with his support for Batman, Fox became more active, developing weaponry and technology for the Dark Knight. He built Batwing's new costume unaware his own son had secretly become the hero. Luke Fox's vigilante career caused conflict with his father as Lucius felt his son was slacking when, in reality, he was fighting crime.

Fox is married man with three children and, like all high-ranking Wayne Industries staff, carries a tracking chip at all times. When Alfred Pennyworth was killed by Bane, Fox adopted the confidant's role in Batman and Bruce Wayne's lives—an advancement that made him a prime target during The Joker's lethal war on the Dark Knight's friends and family.

EVERY MAN'S LAND

Lucius Fox had a career studded with many achievements. One of his greatest triumphs was in the aftermath of an earthquake that devastated Gotham City. His quick thinking stopped Lex Luthor's corporation from acquiring most of the city's real estate.

NEW CREW

- 1 Black Condor II
- 2 Uncle Sam
- 3 Phantom Lady II
- 4 Human Bomb III

FREEDOM FIGHTERS

FIRST APPEARANCE *Justice League of America* #107 (Sep.-Oct. 1973)

NOTABLE MEMBERS/POWERS **Uncle Sam:** The living embodiment of the American Dream; **The Ray:** Can absorb and control light; **Human Bomb:** Generates huge explosions; **Black Condor:** Super-strong and can fly at exceptional speeds; **Firebrand:** Pyrokinesis; **Phantom Lady:** Black light bands provide invisibility and intangibility; **Doll Man:** Can shrink to a height of just six inches.

EARTH-X MEMBERS **Uncle Sam:** The living embodiment of the American Dream; **Cache:** Tech expert and pilot of the Blue Tracer; **Human Bomb III:** Generates explosions, limited invulnerability; **Black Condor II:** Inventive flyer with weaponized wings; **Phantom Lady II:** Teleporter; **Doll Woman:** Enhanced speed and strength; stuck at six inches tall.

ALLIES Justice Society of America, Justice League of America

ENEMIES Nazis, Adolf Hitler III, PlaSStic Men, Renegades, Father Time, Secret Society of Super-Villains

AFFILIATIONS All-Star Squadron

On every Earth, wherever America's liberty is imperiled, the Freedom Fighters exist to destroy tyranny. Usually led by patriotic avatar Uncle Sam, teams consist of different heroes but generally include the Ray, Black Condor, Firebrand, Human Bomb, Phantom Girl, and Doll Man/Doll Woman. In post-*Flashpoint* continuity they were operatives of S.H.A.D.E., defending the nation from alien and superhuman threats. They were convened by S.H.A.D.E.'s leader, Father Time, to find a reborn Uncle Sam. An updated group assembled by a new embodiment of Uncle Sam comprised fresh incarnations of Black Condor II, Cache, Human Bomb III, Phantom Lady II, and Doll Woman. The team's greatest triumph occurred on Earth-X, where Germany had won World War II and Uncle Sam was banished for two generations. Here, original survivors of the conflict and legacy heroes reviving their glorious names sparked a new American revolution. Calling up a reinvigorated Uncle Sam, they brought liberty back to the Land of the Free and Home of the Brave.

FIGHTERS REFRESHED

The new Uncle Sam introduced the Human Bomb to his teammates Phantom Lady, Doll Man, and the Ray.

ON THE RECORD

The original Freedom Fighters existed on Earth-X—an alternate version of Earth where the Nazis had won World War II. The Freedom Fighters were Super Heroes waging a war against them. After ending the Nazi threat, the team sought further action and crossed over to Earth-1 where their allies—the Justice League of America—existed. While it took them a while to adjust to their new home, they continued their fight against evil.

FIGHTING SPIRIT OF LIBERTY Uncle Sam and co. traveled to Earth, but their surprise appearance in Times Square saw them arrested for causing a public disturbance.

FUNKY FLASHMAN

DEBUT *Mister Miracle* #6 (Jan.-Feb. 1972)

HEIGHT 6ft 1in **WEIGHT** 170 lbs

EYES Blue **HAIR** Brown

POWERS/ABILITIES Charismatic master conman who can sell anything to anyone.

ALLIES Colonel Mockingbird (formerly)

ENEMIES Mister Miracle, Justice League

AFFILIATIONS Secret Society of Super-Villains, The Penguin

Charismatic Funky Flashman is a sleazy, persuasive salesman with no discernible moral code. When the monthly allowance granted him by

Colonel Mockingbird ran out, he latched on to Scott Free—super-escape artist and New God Mister Miracle—in a bid to become his manager. Scott's wife, Big Barda, deduced Flashman's motives, but Scott accepted the offer. She was proved right: Flashman stole Scott's Mother Box, and Darkseid's Female Furies tracked it to his home. Flashman sacrificed his assistant, Houseroy, to facilitate his own escape.

Later, he used Mister Miracle's name to peddle intergalactic cleaning products. Then he led the Society of Super-Villains before being ousted by Gorilla Grodd. Flashman still clings to the fringes of the metahuman community, selling hero-themed cars and cruising for fresh suckers at The Penguin's high-stakes card games.

FURY

DEBUT *Wonder Woman* #300 (Feb. 1983)

EYES Blue

HAIR Black

POWERS/ABILITIES

Strength and speed of her mother, Wonder Woman; aggression and power of her father, Steppenwolf.

ALLIES Steppenwolf, Wonder Woman

ENEMIES Darkseid, Big Barda

Fury is the daughter of Earth-2's Wonder Woman and Steppenwolf. A ferocious fighter, she was trained by Big Barda and raised to believe in Steppenwolf's violent ways—even helping him wipe out her fellow Amazons. She eventually saw the error of her ways and helped Mister Miracle escape Darkseid's forces, joining Earth-2's heroes in their fight against the villain.

Fury survived Earth-2's destruction, and on the journey to a new planet her ship, the *TSS Aphrodite*, crashed and a radiation leak threatened the lives of all 77,000 people on board. In desperation, Fury merged their bodies with the souls of departed Amazonians that were stored in the Pandora Vessel—an ancient Themysciran artifact. These survivors established the secret kingdom of Amazonia on their new homeworld, where Fury began training a new generation of Amazons.

There have been other female warriors called Fury who have been inspired and empowered by the Amazons. The first of these, Helena Kosmatos, passed the mantle and name to her daughter, Lyta Trevor.

UNLEASHING FURY

Being half Amazon, Fury was gifted with wisdom, immortality, and super-strength. She was also a formidable warrior.

HELENA KOSMATOS During World War II, Helena unwittingly unleashed the Furies—the Greek goddesses of vengeance—and became a vessel for their power. She channeled the spirit of the demonic Fury Tisiphone, the Blood Avenger.

LYTA TREVOR

Inheriting her mother Helena's powers, Lyta had a life marked by heroism and tragedy. After her husband, Hector Hall, vanished, her son Daniel was taken to become the Lord of the Dreaming. Daniel finally reunited them all in his realm to protect them from the marauding Spectre.

AIR PATROL

Gotham City is known for the police blimps that dot the city's famous skyline—often making life tough for a certain rooftop-traveling vigilante.

The Gotham City Police Department has been marred by corruption almost since the founding of the city itself. It took the efforts of many good people to fight the corruption from the inside, rooting out the department's worst offenders. Now that the noble tenure of Commissioner James Gordon has come to an abrupt end, loyal cop Harvey Bullock picks up where his old boss left off, hoping to keep Gotham City's cops on the up and up.

When James Gordon first reported to the G.C.P.D., transferring from Chicago, he was astounded to see how high the corruption reached. The incumbent Commissioner, Gillian B. Loeb, had his hands in a variety of criminal enterprises, and allowed many illegal actions to take place right under his nose. He even blatantly attended the outlawed dogfights that many of his officers organized.

Frustrated with his fellow officers, Gordon began to work with a few of the good apples among them—men like Harvey Bullock—and eventually rose in power thanks to his valiant efforts to save Gotham City during an attack by The Riddler during the so-called Zero Year. Gordon became Commissioner, and began working side by side with another uniformed crusader in the form of the vigilante, Batman.

Following years of a success, James Gordon was framed for a crime he did not commit. He was jailed as the corrupt Jack Forbes stepped up to replace him, quickly replaced again by the equally unscrupulous Jason Bard. When Bard saw the error of his ways—thanks in part to the actions of Batman—he worked to free Gordon. While Gordon did not return to his position, the upstanding Maggie Sawyer was promoted to Commissioner, and Gordon moved to head the Batman Task Force, wearing a robotic, armored Batman suit as part of a special division of the G.C.P.D. while the real Dark Knight was MIA. However, the true Batman returned to reclaim his mantle, and Gordon was reinstated as Commissioner until he fell under the control of an evil Batman from the Dark Multiverse, the Batman Who Laughs. Harvey Bullock now serves as Commissioner as Gordon attempts to get his life back in order.

G.C.P.D. BLUE

The G.C.P.D. is a brotherhood that has clashed with Batman nearly as many times as it has worked with him. In Gotham City, good cops are hard to come by.

ON THE RECORD

Before the reality-altering events of *Flashpoint*, the Gotham City Police Department had been slowly developed since Commissioner Gordon's debut appearance alongside Batman in 1939's *Detective Comics* (Vol. 1) #27. While characters such as Bullock, Montoya, Sawyer, and Gordon have appeared in the modern G.C.P.D., some officers have not yet been updated for the new continuity, including Crispus Allen, "Hardback" Bock, and Josephine "Josie Mac" MacDonald. Also notably absent is Detective Sarah Essen Gordon, James Gordon's second wife, who took over for him briefly as commissioner. She was part of a nascent G.C.P.D., playing a major role in the landmark "Batman: Year One" storyline.

FLACK FOR FLASS

Arnold Flass was a notorious example of how corrupt the G.C.P.D. was early on. During *Batman: Year One*, Flass repeatedly clashed with the upright James Gordon, giving him plenty of bruises for his efforts.

POWERS/ABILITIES Ability to overcome fear; power ring can create nearly anything its wearer imagines, permits flight, and space travel.

ENEMIES Gods of the House of Tuath-Dan

Perhaps one of the oddest members of the Green Lantern Corps, the canine-like G'Nort is a proud ring bearer, despite only getting the job because his uncle called in a favor. After 17 years of Green Lantern training, G'Nort finally began his career as a Super Hero, although his assignment of a space sector was later revoked after he accidentally destroyed a planet.

While not often the most effective Green Lantern in a fight, G'Nort opposed Larfleeze on the planet Sorrow before teaming up with the so-called Agent Orange and discovering they were actually cousins. Together they took on the Gods of the House of Tuath-Dan, a horde of rampaging robots, and a sentient, inter-dimensional portal set on destroying Sorrow. After vanquishing foes, G'Nort accepted a role as Larfleeze's sidekick.

ENEMIES Damian Wayne (Robin), Jon Kent (Superboy), Tommy Tomorrow, Planeteers

AFFILIATIONS Injustice Army, Takron Galtos

The populace of Cygnus 4019 is addicted to watching life on Earth, but one child took it too far. Calling himself Rex Luthor and particularly enamored of

Super-Villains, the adolescent psychopath convinced his school friends to become copies of bad guys and insert themselves into the drama. When they didn't comply, Rex made them. Planning to replace his screen idols as the ultimate villain, he began by stealing the awesome Hypercube from the Fortress of Solitude and trying to kill Robin (Damian Wayne) and Superboy (Jon Kent). Little Luthor's plan fell apart, prompting a chase across the universe, but he almost succeeded—especially after expanding his six-person gang into a vast army of junior injustice.

DEBUT *Green Lantern* (Vol. 1) #59 (Mar. 1968)

HEIGHT 6ft

WEIGHT 180 lbs

EYES Blue

HAIR Red

POWERS/ABILITIES Able to overcome great fear; weapons include Green Lantern ring, a device capable of creating nearly anything its wearer imagines, limited only by his or her will; the ring also allows for flight, force-fields, and space travel, and can impart encyclopedic knowledge to its wearer.

ALLIES Hal Jordan, John Stewart, Kilowog

ENEMIES Atrocitus, Sinestro

AFFILIATIONS Green Lantern Corps, Justice League International, Red Lantern Corps

BROTHERLY LOVE Guy became his brother's personal punching bag in a self-sacrificing attempt to help Gerard deal with his issues.

Guy Gardner gained his attitude and famous chip on his shoulder at a young age. The product of a dysfunctional home, Guy had idolized his older brother, Gerard, who was a football star in school. When Guy's parents weren't doting on Gerard, they were lavishing praise on Gloria, Guy's younger sister. However, when Guy's mother died, Gerard became abusive. Guy let his brother take his anger out on him, knowing his sibling needed to vent his rage. But when Gerard hit his sister, Guy lashed out with a baseball bat, causing his brother to be out of action for the football season. In turn, Guy's father, a decorated cop, violently lashed out towards Guy.

As an adult, Guy followed a long family tradition and became a cop in the Baltimore Police Department, but he was kicked off the force after showing poor judgment. However, he later exhibited great courage, saving his brother Gerard's life from a hail of bullets during a police shoot-out with a criminal gang. In that moment of unflinching bravery, a Green Lantern ring found Guy, and he began life as a fully fledged hero, finding time to also serve briefly in the Justice League International.

ON THE RECORD

While he debuted in the late 1960s, Guy Gardner did not rise to real stardom until his placement in the Justice League International during the mid-1980s. Famous for losing a fight to Batman—it only lasted one punch—Gardner became a longtime member of the team and the love interest of fellow hero, Ice.

After a falling out with the Green Lantern Corps, Guy claimed a yellow power ring to continue fighting crime. He discovered his Vuldarian heritage and became a living weapon in the form of Warrior, using powers he would lose during Hal Jordan's return, when both reclaimed their Green Lantern status.

RESTAURANT OF CHOICE

Always one to stay in Super Hero circles, Guy Gardner opened his own heroically themed restaurant called Warriors.

FROM GREEN TO RED Guy took Atrocitus' Red Lantern ring and joined a new corps, where he could channel his anger. He later returned to life as a Green Lantern.

HEIGHT 6ft 3in **WEIGHT** 215 lbs **EYES** Blue **HAIR** Black

POWERS/ABILITIES Under a yellow sun, he has all the solar-charged abilities of a Kryptonian: super-strength, speed, flight, invulnerability, and enhanced senses; possesses a keen strategic intellect; highly skilled in Kryptonian martial arts and military tactics.

ALLIES Ursa, Lor-Zod, Eradicator

ENEMIES Superman, Supergirl, Justice League, Green Lantern (Hal Jordan)

AFFILIATIONS Phantom Zone Criminals, Suicide Squad, Superman Revenge Squad

An extremist general from Krypton, General Zod was placed in the other-dimensional Phantom Zone for crimes against his people. Banished to a world of wraithlike phantoms and the endless ravages of a timeless environment, Zod's punishment actually worked out to his benefit; when Krypton exploded he was safely off world. He finally escaped his prison, coming to Earth as Superman's equal and opposite number.

Driven half-mad by the Phantom Zone, when Zod first found his way to Earth, he came into conflict with Superman, and the two clashed repeatedly, with Superman eventually locking Zed the powerful Zed back into the Phantom Zone. Zed was freed again from the Phantom Zone by the government black ops group of Super-Villains called the Suicide Squad. The Squad's leader, Amanda Waller, implanted a Kryptonite bomb inside Zed's skull, threatening to detonate it if he didn't follow orders. Zed used his heat vision to

KNEEL BEFORE SQUAD

Kryptonians, like most beings in the universe, have a vulnerability to magic. Knowing this, Katana was able to hurt Zed with her Soultaker sword when Zed escaped the Phantom Zone.

Unrepentant, Zed and his comrades were banished to the Phantom Zone, but were convinced they would eventually return.

slice into his own head and remove the bomb, before escaping alongside Cyborg Superman's Superman Revenge Squad. With the promise of finding his way back to his loved ones trapped inside the Phantom Zone, Zed worked with Cyborg Superman's team until he got his hands on Superman's Phantom Zone projector. Then Zed freed his wife Ursa and their son Lar-Zed and departed Earth for the planet Jekuu alongside the Kryptonian artificial intelligence known as the Eradicator. There Zed could live as a king under Jekuu's two yellow sons. The native citizens there acted as his willing slaves, believing him to be a god.

Determined to remake Jekuu into a New Krypton, the so-called House of Zed soon came under fire from the Green Lantern Corps. However, Zed joined forces with the Lanterns soon after to battle the greater threat of the lethal enforcers called the Darkstars. Zed next learned of Rogol Zaar, the being claiming the blame for Krypton's destruction. While he seemingly teamed with Zaar (with whom he had previously escaped from the Phantom Zone), Zed was actually working to bring him to justice. After Zaar's defeat, Superman and Zed parted ways as uneasy allies, and Superman allowed Zed to return to his planet in order to create the New Krypton of his dreams.

ON THE RECORD

A minor villain since his 1961 debut, General Zed became a recurring threat in the years preceding the mid-1980s *Crisis on Infinite Earths*. In the 1986 *Superman* reboot, Zed and fellow Kryptonians Qwex-UI and Zaara annihilated an alternate Earth, forcing Superman to end their lives.

However, Zed's demise was short lived and in subsequent years he returned in various incarnations. In 2010, following Brainiac's defeat and the establishment of New Krypton in Earth's solar system, Zed was released from the Phantom Zone to lead the Kryptonian military. However, the warmonger instigated a "100 Minute War" against Earth, resulting in New Krypton's destruction and his return to the Zone.

UNFORGIVING

Whether addressing the last Son of El, inferior Earth-Men, or his own troops, Zed would never be content until he made all kneel before him.

English highwayman James Craddock went to Hell after being hanged for his crimes. Centuries later, he returned to Earth, using ethereal powers to somehow regain

physical form. He scoured the world for mystic artifacts that might help him regain a proper body. In New York City, Gentleman Ghost clashed with Hawkman while procuring resurrection tool the Mortis Orb. That only gave Craddock a zombie army, not a new body. The Orb was later re-energized by contact with Hawkman's Nth Metal, and Craddock tried stealing life force from New York's mortal inhabitants. Instead, the orb dispatched the ghost back to Hell.

Recently returned to Earth, Craddock became an assassin for hire and after failing to kill Batman, was forced to join Amanda Waller's Suicide Squad.

AFFILIATIONS Outsiders

Second-in-line to the throne of Markovia, Prince Brion Markov volunteered to undergo scientific experimentation to become his nation's super-guardian.

Empowered by Doctor Helga Jace—author of the contentious "Superman Theory" of creating metahumans—he attained numerous Earth-based abilities.

As Geo-Force he quashed an invasion by usurper Baron Bedlam with the aid of Batman, Katana, and other costumed heroes calling themselves the Outsiders.

Brion stayed with them, relocating to America, where he was reunited with his half-sister, Tara Markov. Geo-Force eventually assumed command of the team when Batman left. He briefly ruled Markovia, but surrendered the throne for a life of action.

DEBUT *Wonder Woman* (Vol. 1) #9 (Summer 1944)

REAL NAME Doris Zuel

BASE Ivy Town

HEIGHT Variable

WEIGHT Variable

EYES Green **HAIR** Red

POWERS/ABILITIES Super-strength and durability; superior intellect; limited invulnerability derived from the ability to increase her physical size and mass; proficient unarmed combatant.

ALLIES Ryan Choi, Queen Clea

ENEMIES Wonder Woman, Green Lantern, Justice League

AFFILIATIONS Secret Society of Super-Villains, Secret Six, Injustice League, Villainy Incorporated

SHOCK TACTICS Doctor Zuel was always ready for a fight and did not care what the human insects beneath her feet thought.

The latter association proved particularly rewarding for Giganta as she was paid with the name of the man responsible for murdering her beloved Ryan and was allowed to torture him to death.

ON THE RECORD

The original Giganta was a female gorilla subjected to evolutionary enhancement. She transformed into a powerful human woman who wanted Wonder Woman's boyfriend, Steve Trevor.

Giganta was far less comical on her introduction to the modern DC universe: crushing jets, smashing buildings, and generally treating humans as if they were all bugs to be stepped on. Her lack of caution and consideration was revealed as a side-effect of her expansions; the bigger Giganta grew, the more her intellect diminished.

BRAWN OVER BRAINS The post-*Crisis* Giganta, Doctor Zuel, learned that although rational reasoning had its benefits, brute force solved most problems more quickly.

POWERS/ABILITIES Genius intellect, engineering prodigy, flight (jet pack), array of hi-tech weaponry and gadgets.
ENEMIES Teen Titans, Djinn, Psimon, Birds of Prey, Dr. Sivana
AFFILIATIONS Fearsome Five, Silicon Syndicate

A diminutive inventor with a gift for turning everyday objects into deadly devices, Mikron O'Jeneus sold weapons to villains via his company Gizmo, Inc. In the Fearsome

Five, he was frequently beaten by the Teen Titans and shrunk to microscopic size by teammate Psimon. He was then shot in the head by Dr. Sivana for failing on a mission.

Resurrected by Macintech Research & Development, Gizmo joined the Silicon Syndicate—a villain cabal extorting hi-tech companies. This deal was ended by the Birds of Prey, but Gizmo survived the encounter. He worked with the Fearsome Five again and sold illegal arms. Recently he tried to become immortal by nuking New York City, using the energy unleashed to upload his consciousness to the Internet.

ENEMIES The Flash, Gorilla Grodd
AFFILIATIONS The Rogues

Olympic-level skater Lisa Snart is the former girlfriend of Mirror Master Sam Scudder. When her brother Len (Captain Cold) forced the Rogues to metabolize

their weapons' energies to create metahuman abilities, Lisa fell in a coma. Manifesting in astral form, she sought revenge as the ethereal Glider. Lisa led the Rogues against her brother and The Flash, but they joined forces when Central City was overrun by Gorilla Grodd's ape army. She freed Scudder from a Mirror World, but her astral form was destroyed. Escaping her coma thanks to the Pied Piper, she fell in with Cold again. Later she rejected crime, but her new life was wrecked by Cold. When he became an agent of Perpetua, she joined The Flash and others in defeating "King Cold" and saving Central City.

AFFILIATIONS Justice League International

When prehensile-haired British Super Hero Godiva (Dora Leigh) was offered a position in Justice League International, she was immediately attracted to the

group's dashing leader, Booster Gold. However, she thought the team was lacking in power, and she was proven right when they were forced to retreat by a giant robot controlled by alien asset-stripper Peraxxus. After Peraxxus captured Batman and the JLI, and placed them in cocoons, Godiva used her hair to remove a laser cutter from Batman's utility belt and free the team, allowing them to defeat the alien.

In clashes with O.M.A.C. and super-terrorists the Burners, Godiva proved herself a valuable League member, and finally kissed Booster Gold. Things got awkward, however, when her old flame Olympian joined the team, just before the JLI disbanded.

The Global Guardians began in the early 1950s.

With superhumans emerging across the world, the nations of the European Economic Community created the Dome, to manage and coordinate metahuman activity. The Dome extended its membership to include almost every nation, and African sorcerer Dr. Mist oversaw the creation of its Super Hero arm: the Global Guardians.

Despite pan-national idealism, the team frequently faltered, and when their funding was cut in favor of Justice League International, several Guardians accepted invitations to defect to a new Dome in the nation of Bialya. There, they were brainwashed by Bialya's Queen Bee, who used them against their JLI allies. The Global Guardians later built another Dome in the Pacific and were deputized into the UN's covert Checkmate organization. Several members were subsequently murdered by the villain Prometheus. The organization is believed to have disbanded during the *Doomsday Clock* affair. With disinformation campaigns making metahumans globally unpopular, the Guardians quit to join state-sponsored national teams, such as Japan's Big Monster Action and Great Britain's Knight's Inc.

DEBUT *Gog* #1 (Feb. 1998)

REAL NAME William Matthews

BASE A hidden jungle temple in the Democratic Republic of Congo

HEIGHT 6ft 3in **WEIGHT** 210 lbs **EYES** Blue **HAIR** Brown

POWERS/ABILITIES Seemingly divine-level super-strength, teleportation, energy manipulation, healing, resurrection, and reality-altering powers.

ALLIES Gog (Third World god)

ENEMIES Infinity Man, Superman, Justice Society of America

THE KINGDOM OF GOG William Matthews was haunted by visions of another world—one in which an alternate Superman was unable to prevent a terrible nuclear catastrophe.

In an ancient temple

in the jungle of the Democratic Republic of Congo, American missionary William Matthews unearthed Gog, the last surviving god of the fabled Third World. Within the temple, William experienced terrifying visions that drove him insane and convinced him that dormant Gog would arise to save the world. William took the god's name and staff—which granted him extraordinary powers—and embarked on a crusade to prepare for Gog's imminent awakening by eliminating all "false gods." His targets included Infinity Man, Hercules, and Superman, the latter whom he blamed for a nuclear disaster he had seen in a vision. When the Justice Society of America confronted him in his temple, Gog was absorbed into the face of the lost god, bringing the original divinity to life. The deity emerged from the earth and declared his peaceful intentions.

After seeing Gog create miracles, some JSA members became followers, but when the team learned Gog would soon bond with the Earth and potentially destroy it, they turned on him. They cut off Gog's head, and the Superman of Earth-22 embedded it in the Source Wall.

DIVINE POWER Armed with the panoply and power staff of Gog, William Matthews became a match for the mightiest heroes.

DEBUT *Batman* (Vol. 1) #407 (May 1987)

BASE Gotham City **REAL NAME** James Craddock

HEIGHT 6ft **WEIGHT** 175 lbs **EYES** Blue **HAIR** Red

POWERS/ABILITIES Skilled tactician and analyst; an expert with knives and explosives.

ALLIES Amanda Waller, Knightfall

ENEMIES Batgirl, Batman, Commissioner James Gordon

AFFILIATIONS Arkham Asylum inmates, Suicide Squad

James Gordon, Jr. is the son of Commissioner James Gordon and Eileen Gordon, and younger brother of Barbara Gordon aka Batgirl. James' sociopathic tendencies manifested in childhood when he killed the family cat. He became a serial killer and was imprisoned in Arkham Asylum, where he helped protect Charise Carnes (the villain Knightfall).

James escaped during a riot and stalked his sister. However, when The Joker captured Barbara and began subjecting her to a twisted "wedding," James saved her—because he wanted to kill her himself. After engaging Barbara in a game of cat-and-mouse, their climactic clash occurred at Gotham Bay Aquarium.

Presumed dead, James resurfaced as an analyst for the Suicide Squad. Determined to prove himself—he was in love with his boss, Amanda Waller—he was instrumental in countering a Crime Syndicate attack. Determined to atone, Gordon, joined the battle against the Batman Who Laughs, but the monster caused a multiple personality crisis. Utterly unaware of his actions, he began killing women who resembled his sister. When Batgirl stopped him, Gordon was overcome with guilt and remorse and killed himself.

MY SISTER, MY ENEMY

James clashed with his sister Barbara in a life-and-death struggle that led to his disappearance.

ON THE RECORD

In the pre-Flashpoint universe, James was Barbara Gordon's stepbrother. When he was just a baby, James, Jr. was kidnapped by gangsters, and his father and Batman rescued him. James, Jr. displayed murderous tendencies from a young age, possibly killing Barbara's friend, Bess Keller. He became a prolific serial killer and plotted to taint baby food with psychosis-triggering drugs, but was stabbed in the eye by Barbara during a battle. It slowed him down long enough for James' father to stop his son once and for all.

THERE'S SOMETHING ABOUT JIM, JR. Commissioner James Gordon was troubled by his own role in the dark path his son had taken.

ALLIES Batman, the Batman Family, Batgirl, Harvey Bullock

ENEMIES James Gordon, Jr., The Joker, Mr. Bloom

AFFILIATIONS G.C.P.D., Batman Task Force, The Infected

ROUGH START

Gordon was suspicious of Bruce Wayne when the young man returned to Gotham City. By the same token, Bruce wrongly assumed that Gordon was a corrupt cop.

Barbara and James Jr. When he discovered a police-run illegal dogfight—just the tip of the G.C.P.D.'s corruption that ran all the way up the ladder to Commissioner Loeb—Gordon stood up against his fellow officers, even after one of the dogs attacked him. A tough cop, he left, shook off his injuries, and walked his beat, only to discover the Waynes shot dead in a nearby alley.

From that day forward, Jim fought against the corruption of his city, working his way up to Lieutenant during Gotham City's *Zero Year*, around the time Batman first appeared. At that time, Gordon paid several visits to the newly returned Bruce Wayne, perhaps suspicious that the resourceful young man may have ties to the city's newest vigilante. Despite Batman and Gordon remaining dubious of each other's intentions, the two began to work closely together, helping fight off the Riddler and saving the city from destruction. This act of valor earned Gordon a promotion to Commissioner, a position he kept until he was framed and temporarily replaced by Jason Bard. Gordon later regained his position, only to become corrupted by an evil version of Batman from the Dark Multiverse, the Batman Who Laughs. This evil Batman, who had been infected by The Joker, likewise infected Jim, causing him to once again lose his job, this time replaced by his friend Harvey Bullock. Jim is currently attempting to make amends for his past sins as a civilian, trying to reaffirm his bond with daughter Barbara.

James Gordon is the law in Gotham City. Before his arrival from Chicago, Gotham City was mired in corruption, a seemingly impossible metropolis for the hero cop to bring to justice. Gordon worked his way up through the Gotham City Police Department to commissioner, setting the new standard for the force. Before his recent forced sabbatical, Gordon worked hand-in-hand with the city's other protector, the vigilante known as the Batman.

Family man James Gordon transferred from the police force in Chicago to the Gotham City Police Department shortly before the death of Bruce Wayne's parents. Three weeks after his transfer, Gordon was still getting the lay of the land, realizing how corrupt the police force truly was. Having had a rough time in Chicago, Gordon wanted the best for his young family, including his wife Barbara and his two kids,

INFECTED

One of the six heroes infected by the Batman Who Laughs, Gordon called himself simply the Commissioner. He was changed back to normal when Lex Luthor injected a "cure" of sorts into the Batman Who Laughs, making this evil Batman unable to broadcast his Dark Multiverse energy to his minions from the regular Multiverse.

ON THE RECORD

The Gordon bloodline has been the subject of constant revision in Batman's many comic book titles. In 1951, it was established that James Gordon had a son named Tony. However, Tony was soon overshadowed by Barbara Gordon, James' daughter and the heroine Batgirl.

After the events of *Crisis on Infinite Earths*, the Gordon family was reimaged in "Batman: Year One," which introduced his infant son James, and relegated Barbara to the role of adopted niece. The lineage became even more complex when *Batman: Gotham Knights* #6 (Aug. 2000) established that Gordon had an affair with his brother's wife, making Barbara Gordon his true daughter by blood.

PARTNERS IN CRIME BUSTING Post-Crisis, Gordon's first wife left him just after his move to Gotham City from Chicago. Gordon remarried his colleague Detective Sarah Essen, who was later shot and killed by The Joker.

VIGILANTE COP

Gordon was invited to head up the Batman Task Force as the city's new Batman for a time. He got into shape and became the best Batman he could be, piloting a giant mechanical suit.

GORILLA GRODD

DATA

DEBUT *The Flash* (Vol. 1) #106 (Apr.–May 1959)

BASE Gorilla City

HEIGHT 6ft 6in **WEIGHT** 600 lbs **EYES** Gray **HAIR** Black

POWERS/ABILITIES Violent and very strong; can control others with his mind; genius-level intellect; possesses psionic abilities to move objects remotely.

ALLIES Crime Syndicate, Raijin, the Negative Flash, Multiplex, Poison Ivy

ENEMIES The Flash, Rogues, Solovar, Damage

AFFILIATIONS Legion of Doom, Legion of Zoom

Gorilla Grodd is a violent and deadly Super-Villain. Since first meeting The Flash (Barry Allen) in Gorilla City, Grodd has had a deep hatred of the hero and believes he can gain The Flash's powers if he eats his brains. Grodd is not only fast and immensely strong, but also has amazing psionic abilities from contact with the Speed Force.

When the Speed Force struck a tribe of gorillas deep in the jungle of Africa, it sped up their intelligence and evolution. They then created their own kingdom, Gorilla City, and worshiped the "light"—their own name for the Speed Force. Grodd became their king moments before The Flash first arrived. Grodd had his own father killed and he ate his brains, believing they would give him his father's power. The Flash escaped Gorilla City and defeated Grodd, who was buried under the rubble of an ancient temple during their fight. He was dug out by General Silverback and soon reclaimed his control over Gorilla City,

GORILLA WARFARE Grodd waged a brutal war against his fellow gorillas when they attempted to make peace with the humans of Central City.

leading the gorillas on an invasion of The Flash's home of Central City. Grodd nearly killed The Flash, who was only saved when the gorilla known as Solovar risked his own life to rescue the hero.

The Flash later took Grodd into the Speed Force and defeated him in battle, leaving Grodd trapped there. Grodd was freed by the Crime Syndicate and found he now had increased psionic abilities. Arriving in Central City just as his fellow gorillas were making peace with the humans, Grodd took over, killing anyone—gorilla or human—who opposed him. With The Flash missing (seemingly killed by the Crime Syndicate), Gorilla Grodd renamed Central City "Gorilla City."

When the Rogues refused to join the Crime Syndicate's new order, the Syndicate sent Grodd and other Super-Villains to kill them. The Rogues won the day, however, with Mirror Master trapping Grodd and his fellow villains in a mirror dimension.

Later, Grodd learned he was dying from a rare degenerative disease. He used his powers to team with the villainous Black Hole organization in an attempt to save his own life by draining Central City of its speed. The Flash cured Grodd's condition and the Gorilla City Guard arrived to take Grodd away as their captive. However, Grodd almost immediately partnered with Poison Ivy in order to destroy the "world of man," only to be stopped this time by the rampaging behemoth known as Damage.

Grodd continued to find nefarious partners in crime, harnessing the Still Force and teaming with Lex Luthor to help form the Legion of Doom and free the evil mother of the Multiverse, Perpetua.

ON THE RECORD

Gorilla Grodd has become ever more brutal and savage since his first appearance. His origins have also changed significantly. Originally Grodd and his fellow gorillas gained their amazing intellects thanks to a radioactive meteor falling on their land. This meteor was connected to the source of Green Lantern foe Hector Hammond's powers. At one point, Grodd and Hammond joined forces to fight The Flash and Green Lantern.

The source of Grodd's power was later altered to alien intervention. Grodd and his enemy Solovar both originally had telepathic abilities. The latter asked for The Flash's aid when Grodd tried to lead an invasion of Central City after he had used his strength and abilities to seize control of their kingdom.

APE ATTACK The Flash (Wally West) tries to stop Grodd's rampage in Keystone City.

FIRST CONTACT

During The Flash's first meeting with the inhabitants of Gorilla City, King Grodd hoped to gain The Flash's speed force by consuming his enemy's brain.

OUTCAST

Grodd was ousted by his own Gorilla people, filling him with jealous hate for Barry Allen's family and friends.

CLASSIC STORIES

The Flash #106 (May 1959) In his debut, Grodd gains the secret of mind control from fellow gorilla Solovar and uses this power to seize control of Gorilla City.

The Flash (Vol. 2) #178 (Nov. 2001) The Flash (Wally West) takes on Grodd as the gorilla launches his most violent attack yet on Keystone City.

Salvation Run #4 (Apr. 2008) When Gorilla Grodd is trapped on a prison planet with other Super-Villains, violence soon ensues as he seemingly kills fellow gorilla Monsieur Mallah and the Brain.

Gotham Academy is a very old and exclusive private school with a sinister reputation. Bruce Wayne is its patron, providing funding as well as Wayne Foundation scholarships.

Freshman student Mia "Maps" Mizoguchi was thrilled to receive one of these scholarships. Having arrived at the Academy, she set about exploring its mysteries, dragging fellow student Olive Silverlock into her schemes. The pair had to be saved by Batman after falling from the school's ruined clock tower. They then explored the derelict North Hall, rumored to be haunted by the ghost of a former student, Millie Jane Cobblepot. Instead they found Killer Croc, who had escaped from Arkham Asylum through a system of tunnels leading to the school.

Mia and Olive, along with Mia's brother Kyle and fellow students Colton and Pomeline, formed a "Detective Club" to investigate other bizarre goings-on at the Academy. They discovered that the gym teacher was actually a werewolf, and they foiled Clayface's attempt to ruin the school's performance of *Macbeth*. The group's most heartbreaking discovery was that Olive's mother Sybil had once been the villainess Calamity, who had been imprisoned in Arkham Asylum.

SCHOOL SLEUTHS

New pupil Mia Mizoguchi was determined to investigate Gotham Academy's mysteries, and recruited a motley gang to aid her investigations.

POWERS/ABILITIES A New God, Granny has superior strength, agility, stamina, and mental capabilities; canny tactician; accomplished warrior; Apokoliptian technology.

ENEMIES Mister Miracle, Big Barda, Desaad

AFFILIATIONS Darkseid's Elite

Born and raised on Apokolips, the woman named Goodness was taught, like all denizens of that hellish world, that cruelty and ambition were the only way to improve life and status. As one of the "Lowlies"—Apokolips' oppressed peasant class—she was removed from her parents to train as a "Hound." As part of her military indoctrination and to prove her absolute obedience, Darkseid forced Goodness to kill her beloved dog, Mercy. This act earned her the dark lord's admiration and a place as one of his Hounds. She grew to believe that serving prince Darkseid was all that mattered. When her master seized control of Apokolips, Goodness murdered his despised mother, but Desaad took the credit for it.

Women had always been treated as less than Lowlies, but now, with the dark overlord's amused permission, Goodness was allowed to train girls to be elite warriors. The task took years and cost many lives, but eventually the Female Furies became a force to be feared and they forever changed male opinions.

Appointed mistress of Apokolips' orphanages and tasked with making the dross of society useful, she took the ironic title "Granny," as she systematically crushed her charges' spirits, making them unthinking tools of Darkseid. However, the boy she dubbed "Scott Free" refused to break. Escaping to Earth, he became Mister Miracle and—adding to his sin—lured Granny's favorite Fury, Big Barda, to join him.

Always busy, Granny imperiled Earth after imprisoning the Olympian Gods, triggering war between the Amazons and the USA. She posed as Athena to recruit human as new Furies. Although Granny was destroyed by Infinity Man when he began killing New Gods, her spirit possessed Alpha Lantern Kraken. She attacked Green Lantern homeworld Oa before being captured by Hal Jordan.

Cole Cash, codename Grifter, was a member of elite special ops unit Team 7. He quit and made a living as a conman in New Orleans. After a particularly lucrative

scam, he was kidnapped by Daemonites—spectral telepathic aliens who were intent on possessing human bodies and infiltrating their society.

One Daemonite tried using Cole as a host, but Cole awoke and broke free before the process was completed. He later realized the disruption had given him psychic powers, including a proximity sensitivity to nearby Daemonites. Flying out of town, he killed a Daemonite-possessed passenger, and became a fugitive from both the police and the aliens. Concealing his face with a red bandana, he began a one-man war against the invaders.

ENEMIES Hawkman, Batman, Black Adam, Batwing, The Spectre**AFFILIATIONS** Justice League of China

The Great Ten were convened as a metahuman force to defend the People's Republic of China. Comprising the greatest and most loyal heroes, the group serves under leader August General in Iron—a devotee of ancient war-master Sun Tzu.

The Great Ten only deploy after official approval has been secured, such as when Green Lanterns John Stewart and Hal Jordan entered Chinese airspace to capture Evil Star. Former Chinese ally Black Adam committed a massacre in Bialya and began rampaging across the world, but the Great Ten only reacted when he entered China. Adam killed Immortal Man-in-Darkness and wrecked Shaolin Robot. Communications with Beijing were lost, so August General in Iron took a risky chance, requesting outside help. A host of international heroes responded, with Shazam ultimately ending the threat.

Steadfastly isolationist and dedicated to maintaining order, the Great Ten always concentrate on Chinese interests. They intervened when Checkmate and the Outsiders attacked Chang Tzu's Oolong Island lab; they sealed the borders during the *Doomsday Clock* crisis; and recently they attempted to absorb the Justice League of China into an expanded Great Twenty.

PATRIOTIC POWER

The Great Ten are a formidable team, ready to lay down their lives in the service of China.

REAL NAME James Jacob "Jim" Harper

BASE S.T.A.R. Labs Advanced Ideas Division, New York

HEIGHT 6ft 1in **WEIGHT** 205 lbs **EYES** Blue **HAIR** Brown

POWERS/ABILITIES Peak fitness, military training; equipped with a combination hoverboard/shield for protection and transport.

ALLIES Newsboy Legion, Jimmy Olsen, Superman

ENEMIES Parasite, Hammersmith, Leash, Rose Wilson, N.O.W.H.E.R.E.

AFFILIATIONS Project Cadmus, S.T.A.R. Labs

During World War II, Jim Harper was trained by specialist coach Joe Morgan (who also trained Wildcat and the Atom), but rather than seek fame and fortune as an athlete, the young idealist became a policeman. Patrolling Suicide Slum, Harper befriended juvenile trouble-magnets the Newsboy Legion, and devised his Super Hero persona, the Guardian. When he was murdered decades later, Harper's genetic material was harvested by Project Cadmus. The top-secret genetics facility was headed by his old Newsboy wards and they used his perfect DNA to clone him as chief of security.

Using advanced technology, the reborn Harper continued the good fight as the Golden Guardian, dividing his time between safeguarding the Project and defending Metropolis against many menaces.

A Guardian has recently returned to action there, aiding Superman and Superwoman. The Guardian name, reputation—and possibly DNA—have been used by many Super Heroes, including Teen Titan Mal Duncan, an enigmatic security manager at S.T.A.R. Labs' Advanced Ideas Division, and the corporate figurehead the Manhattan Guardian.

ON THE RECORD

The man known only as "Michael" served in the United States Air Force before managing security for S.T.A.R. Labs' Advanced Ideas Division. There he was assigned the codename Guardian and provided with a blue-and-gold armored suit. He battled the monstrous Parasite with Superboy (Jon Lane Kent) and helped rescue Superboy clone Kon from an Alaskan N.O.W.H.E.R.E. facility. Kon merged with Jon, and temporarily boosted the Guardian's strength. However, when attacked by a mob of hostile alternate-world Superboys, Michael was badly beaten. Ultimately, Jon and Kon defeated their doppelgängers, sending them back to their home realities, and getting the Guardian to safety.

FIGHTING THE GOOD FIGHT

During his career as the Guardian, Jim Harper battled a variety of foes, from Darkseid's fanatical Female Furies to Nazi agents.

GUARDIANS OF THE UNIVERSE

DEBUT *Green Lantern* (Vol. 2) #1 (Jul.-Aug. 1960)

BASE Oa

POWERS/ABILITIES Immortality; supreme intellects; psionic powers including telepathy and telekinesis.

ALLIES Templar Guardians, Manhunters (formerly), Green Lantern Corps (formerly), Third Army

ENEMIES Sinestro, Atrocitus, Weaponers of Qward, Manhunters, Empire of Tears, Parallax, Volthoom, Larfleeze, Spider Guild, the Reach, Mad God of Sector 3600, the Red, Blue, and Green Lantern Corps

AFFILIATIONS Zamaron, Psions, Controllers, Darkstars

Creation's oldest civilization developed on the planet Maltus where some inhabitants evolved into intellectual super-beings—scientist-philosophers with an unquenchable thirst for knowledge. One of their number called Krona wanted to discover the very origins of creation. He conducted experiments, but they critically damaged the universe, and his comrades resolved to become its Guardians.

Relocating to the planet Oa, the Guardians dedicated their mighty brains to eradicating chaos. Eons passed and their bodies atrophied, decreasing in size as their mental powers grew. Ideological schisms developed and factions were created such as the Controllers and Zamaron. The Oans tapped the Emotional Electromagnetic Spectrum, concentrating the universal pool of willpower in a Central Battery while suppressing other colors. Green was used to fuel a succession of peacekeeping militias, beginning with robotic Manhunters. These malfunctioned, slaughtering an entire space sector, and were replaced by living recruits—Hallas—who in turn were supplanted by the Green Lantern Corps.

After billions of years struggling against unceasing evil, the Guardians' altruistic atonement soured. They began to impose their own logical thought processes upon unruly life, seeking to obliterate free will through their bio-manufactured Third Army. Ultimately, most of the Guardians were killed by their renegade agent, Sinestro.

BLAST FROM THE PAST

The Oans' plans to eradicate free will were resisted by their distant and still-compassionate cousins of the Templar Guardian Sect.

EFFICIENCY SAVINGS

The emotionless Guardians had no qualms about eradicating their faithful servants when they were no longer of any use.

ON THE RECORD

The Guardians began as patriarchal advisers, but over time their omniscient benevolence was seen as dictatorial manipulation and their seeming solidarity was questioned by many—including one of their own.

During the 1970s, Appa Ali Apsa, also known as the "Old Timer," abandoned emotionless immortality to travel with Hal Jordan and Oliver Queen. A sensitive companion, he strove to understand the lesser creatures in his care, but eventually descended into dangerous insanity.

ISOLATED INCIDENT

Appa Ali Apsa's separation from his immortal brethren taught him the value of emotions, but eventually drove him to madness and murder.

DEBUT *More Fun Comics* #73 (Nov. 1941)

REAL NAME Oliver Queen

BASE Seattle

HEIGHT 5ft 11in **WEIGHT** 185 lbs

EYES Green **HAIR** Blond

POWERS/ABILITIES Expert archer and highly trained martial artist; excellent hunting skills; quiver stocked with hi-tech arrows; access to Queen Industries fortune.

ALLIES Black Canary, Red Arrow, John Diggle, Arsenal, Henry Fyff

ENEMIES Count Vertigo, Clock King, Ninth Circle, Malcolm Merlyn, Cheshire, Brick

AFFILIATIONS The Arrow Clan, Justice League, Justice League United

Oliver Queen is the Green Arrow—a hero who uses his skills as an expert archer to bring justice to the streets of Seattle. Son of billionaire industrialist Robert Queen, Oliver wasted his younger years as a playboy before a terrorist attack left him stranded on an island where he was forced to use his skills to survive. After three years, he returned home a changed man, determined to be something new; something better. Facing assassins and superpowered villains while dealing with secrets from his own family's past, the Green Arrow is determined to bring justice to the streets of his city, one arrow at a time.

AT A GLANCE...

Stranded

Oliver Queen rejected his father's attempts to make him take his heritage seriously and seemed destined to waste his life drifting from party to party. This changed dramatically when a terrorist explosion at his party on a Pacific oil rig seemingly killed everyone except Oliver and Tommy Merlyn. Stranded on a desert island, Oliver was forced to master the skills he had once spurned, becoming an expert hunter and archer to survive.

Social justice warrior

After returning to Seattle, Oliver was a changed man. While he served as the head of Queen Industries, by night he would patrol the streets as Green Arrow—a liberal crime fighter often viewed as a hothead for spouting his politics to anyone who would listen. However, he often felt like a hypocrite, warring against "the man" while also being that very "man" himself.

Oliver Queen was heir to the Queen family fortune. He grew up in Seattle, a city founded by his ancestor, the archer Robin Queen. Ollie had everything, but seemed to turn his back on his birthright. His father, Robert Queen, owner of Queen Industries, tried and failed to instill some sense of commitment in his son. Whether Robert created positions for Oliver in Queen Industries or provided archery lessons for him, Oliver preferred to party. He was eventually given a clerical job on an oil platform, but instead of working, Oliver threw a lavish party on the rig. When terrorists attacked, Oliver arrogantly thought he could save everyone, and shot the detonator out of the terrorist leader's hand, only for it to hit the side of the rig and set off a series of bombs.

PARTY GUY

The young Oliver Queen often showed off his archery skills while inebriated at parties. When he arranged a party on an oil rig, it changed his life forever.

Only Oliver and his best friend, Tommy Merlyn, survived. Oliver was washed up on a deserted island and, with the world thinking he was dead, he was forced to use his skills to survive. By the time he left the island, Oliver was an expert archer and a changed man. On his return to Seattle, Oliver learned that his father had died. He soon began covertly using Queen Industries' resources, along with his own wealth, to fuel his vigilante activities as Green Arrow. He partnered with the young thief and tech genius Roy Harper, who became his sidekick, Speedy, and introduced a variety of trick arrows into Ollie's quiver. However, Ollie didn't give Roy the father figure he desperately needed, and Roy turned to alcohol and drugs, eventually parting ways with his mentor.

Oliver briefly joined the Justice League of America, and later the Justice League United. He fought the likes of the villain Komodo, learned about his father's involvement with the clandestine Arrow Clan, and even discovered that his father was still alive. Robert Queen had once had an affair with the assassin Shado, with whom he had a daughter, Emiko. Komodo had kidnapped Emiko and raised the child as his own daughter. Robert died saving Emiko's life and in revenge she killed Komodo. For Oliver's part, rather than assume his role as leader of the Arrow Clan, he opted to focus on Seattle and his war on crime.

That war was only getting started. Green Arrow discovered that his mentor, Queen Industries CFO Cyrus Broderick, was working with a criminal organization called the Ninth

CLASSIC STORIES

Green Lantern (Vol. 2) #85 (Aug.-Sep. 1971) When Green Arrow learns that his sidekick, Roy Harper, has gone down a dark path and become a drug addict, Green Arrow and Green Lantern try to help him and find the dealer responsible.

Green Arrow: The Longbow Hunters #1-3 (Aug.-Oct. 1987) Oliver Queen and Dinah Lance (Black Canary) grow closer as he moves from Star City to her home of Seattle. But when he crosses paths with the assassin called Shado and Black Canary is viciously attacked, Oliver's life changes forever.

Green Arrow #17-24 (Apr.-Dec. 2013) Oliver Queen is attacked by a deadly new foe—the assassin Komodo—and learns shocking secrets about his past. Oliver's life and his adventures as the Green Arrow take a new direction, with some close to Oliver paying the ultimate price.

Family secrets

After discovering his links to the Arrow Clan and meeting his half-sister, Emiko, Oliver became her guardian. Both had trouble adjusting to their new roles but quickly developed a strong bond, and Emiko would later adopt the role of Red Arrow.

THE DEATH OF ARSENAL

When Green Arrow had discovered that Roy Harper was an addict, he reacted harshly, unable to contain his disappointment. He threw Harper out of his home in a decision he would always regret.

Later, when he had a chance to reconnect with an adult Roy, Oliver took it. He tried to prove that he had changed from the fledgling, stubborn hero he once was, and even helped Roy defend his childhood home on a Native American reservation.

Roy sought out help from the Super Hero recovery center called Sanctuary, but with tragic results. He was killed there when The Flash (Wally West) briefly lost control of his powers. While Ollie and Roy had mended their rift, Green Arrow's guilt magnified. He had lost his old friend just as he was beginning to get him back.

SAD DAY

The death of Roy Harper, aka Arsenal was mourned by many in the Super Hero community.

REBIRTH

PRETTY BIRD

When social activist and spoiled rich kid Oliver Queen met hardheaded realist Dinah Lance, there was an instant spark and they began a relationship, as though they had known each other from a past life.

After a long and supportive partnership, even moving in together in an under-served area of Seattle, the two nevertheless parted ways when Black Canary's old espionage contacts set their sights on Green Arrow.

Circle. Essentially a bank that financed Super-Villains and terrorists, the Ninth Circle framed Oliver for murder, allowing Broderick complete control over Queen Industries. Bankrupt and on the run, Oliver teamed with Black Canary, Emiko (now going by the name Red Arrow), computer genius Henry Fyff, old ally John Diggle, and even his former sidekick Speedy, who now went by the name Arsenal.

In a long and uphill fight, Green Arrow suffered plenty of setbacks. The Ninth Circle succeeded in planting their own mayor in Seattle, and soon changed the name of the city to Star City, making it the first corporate-owned metropolitan city in the country. However, Green Arrow proved himself innocent and helped restore Seattle to its former name and prestige. While he successfully took back his company, he discovered along the way that his mother, Moira Queen, was part of the criminal conspiracy.

After a clash with a government agency and parting ways with Black Canary, Green Arrow was recruited by Batman into a team of detectives to investigate the threat of a new spy organization called Leviathan. With Seattle relatively safe, Green Arrow seems to be playing on the world stage now.

SHARP SHOOTER

While lacking in superpowers, the Green Arrow's skills as an archer make him a deadly hero, intent on bringing justice to the crime-ridden streets of Seattle.

"My name is Oliver Queen... the Green Arrow. And I'm just getting started."

OLIVER QUEEN

ON THE RECORD

Green Arrow has undergone many changes since his first appearance in 1941. On his debut, Green Arrow, aka Oliver Queen, was part of a crime-fighting duo with teen sidekick Speedy (Roy Harper). He not only used trick arrows to combat criminals, but also drove an arrow-shaped car and operated from the Arrow Cave. His physical appearance was more like the traditional Hollywood image of Robin Hood.

Road trip

In the late 1960s, Oliver Queen lost his fortune but gained newfound empathy for the common man and shifted left in his political views. He teamed up with the second Green Lantern (Hal Jordan) to see what was really happening in America. The two went on a road trip across the USA, helping the less fortunate along the way. Oliver also tried to help Roy Harper overcome his drug addiction.

Hunters

While the *Crisis on Infinite Earths* left Oliver's past relatively unchanged, he began to feel disconnected from his life as a hero, and went back to basics. After spending several years in Seattle with Black Canary, he separated from his longtime lover and later had a chance reunion with his adult son, Connor Hawke.

Back from the dead

Oliver Queen eventually gave his life saving people from a terrorist bomb blast. When his friend Hal Jordan became the villain Parallax, he used his cosmic abilities to return Oliver from the dead. The resurrected Oliver then had to reclaim his soul, with the help of his friends. He made a fresh start with a new Speedy, the ex-drug addict Mia Dearden. Oliver later became mayor of Star City, marrying his old flame, Black Canary.

ANOTHER LIFE

After a long and often troubled relationship, Green Arrow proposed to Black Canary. The two were later married.

SHADO WARRIOR

Oliver encountered the deadly assassin Shado—his father's old lover and the mother of Emiko, his half-sister.

REAL NAME Harold "Hal" Jordan

BASE Coast City (when on Earth), Mobile

HEIGHT 6ft 2in **WEIGHT** 212 lbs **EYES** Brown **HAIR** Brown
POWERS/ABILITIES Indomitable willpower commanding a power ring that is able to materialize hard-light constructs, translate languages, facilitate in-planet and intergalactic flight, and protect against hostile environments and enemy attack.

ALLIES The Flash (Barry Allen), Green Lantern (John Stewart), Green Lantern (Guy Gardner), Green Lantern (Kilowog), Green Arrow, Superman, Batman, Wonder Woman

ENEMIES Sinestro, Black Hand, Larfleeze, Controller Mu

AFFILIATIONS Green Lantern Corps, Justice League

Hal Jordan is arguably the greatest Green Lantern. Valiant, honest, and able to conquer great fear, he battled threats alien and terrestrial, implementing unyielding willpower through a ring able to create constructs of anything he could imagine. Part of an intergalactic police force, he patrolled space sector 2814, tasked with protecting all life. Yet he found it increasingly difficult to blindly follow the directives of his Oan masters—the Guardians of the Universe. While colleagues ignored their own misgivings, Hal spoke out, even as his triumphant exploits won him a reputation as the foremost Green Lantern in history.

AT A GLANCE...

High flyer

After witnessing his father's death, Hal grew up a troubled, attention-seeking risk taker. On his 18th birthday he enlisted in the Air Force, resolved to be a hotshot pilot like his dad, but his cocky attitude ended that dream too.

Battle of wills

Hal's apparently infinite power and antipathy to authority made him dangerously reckless and overconfident. When Apokolips invaded Earth, Hal trampled over Batman's jurisdiction, deriding his merely human capabilities. This earned him the Dark Knight's disdain, although they've learned to trust and respect each other over the years.

Fear my power

The Green Lanterns' power rings operate on intense concentration, allowing users to shape green light into solid objects. The rings can perform any task imaginable, fueled by the green energy of willpower generated by all lifeforms.

Young Hal seemingly lost all

sense of fear after watching his dad, a pilot, die in a plane crash. Years later, while stubbornly following in his father's footsteps, he encountered a dying alien, Abin Sur. Sur wanted Hal to replace him in the Green Lantern Corps—an intergalactic police force that had safeguarded the universe for untold generations.

Hal accepted and was summoned for basic training at the Corps headquarters on the planet Oa. On completion, he was assigned to Thaal Sinestro of Korugar, who was considered the "Greatest Green Lantern" for his unparalleled ability to keep order in his space sector. Sinestro befriended the idealistic, hot-headed human, mentoring his transition from rookie to fully qualified officer, but their relationship soured when Hal discovered why Sector 1417 was so peaceful. Sinestro had conquered the sector and was governing it as an absolute dictator.

Following a tremendous struggle, Hal liberated Korugar. The Guardians banished Sinestro to the Anti-Matter Universe, where the renegade worked with the Weaponers of Qward to develop yellow power rings. Armed with this new weapon, Sinestro fought Green Lantern repeatedly, and eventually formed his own Corps to terrorize the positive-matter universe.

For years Jordan excelled, even becoming a founding member of the Justice League. He defeated innumerable menaces, but invariably at great cost to his private life. Personal and romantic relationships foundered and he started to seriously question his masters' edicts, resulting in him taking numerous leaves of absence, which he spent roaming the United States in search of personal fulfillment and renewed perspective.

The call of duty brought Hal back to the Corps, but when Coast City was destroyed, he snapped. Grief led to his possession by the yellow-hued fear parasite Parallax, who induced Jordan to eradicate the Corps.

FEAR NO EVIL

While following in his father's footsteps to become a test pilot, Hal was summoned to dying Abin Sur's side and offered the universe on an emerald platter.

CLASSIC STORIES

Green Lantern (Vol. 2) #40 (Oct. 1965) The origin of the Guardians of the Universe and the introduction of obsessed Oan researcher Krona lay the groundwork for decades of cosmic storylines.

Green Lantern (Vol. 2) #76 (Apr. 1970) Green Lantern accepts reduced duties in order to investigate the nature of good and evil, with social reformer Green Arrow as his guide.

Green Lantern (Vol. 4) #25 (Jan. 2008) The Sinestro Corps War climaxes with the renegade Green Lantern's utter defeat, heralding the cataclysmic uprising of the corrupted dead.

Love conquers all

Hal's unattainable off-and-on girlfriend Carol Ferris was beguiled into joining the rival Star Sapphire Corps: warrior women whose rings are powered by the violet light of love.

SUPER-PARALLAX

While on a mission to Earth, Hal met with Superman, only to discover that the evil Parallax entity had possessed the Man of Steel. However, after a well-placed punch by Superman, Hal realized that Parallax wasn't the culprit. His mind had been manipulated by Hal's old adversary, Hector Hammond.

TO SERVE AND PROTECT THE UNIVERSE
Years of confronting evil and saving billions of lives have taught Hal that Power and Will are worthless without empathy and a sense of purpose.

Hal eventually returned to his senses and continued his alliance with the Green Lantern Corps with renewed dedication. Later, when Jordan found himself without a power ring, he forged his own out of pure willpower. He returned to the fray just in time to help his teammates battle Sinestro, who had based the Sinestro Corps on the artificial battle planet called Warworld. With Warworld evacuated, Hal and Sinestro fought to the seeming death. However, White Lantern Kyle Rayner managed to restore Hal using Hal's own homemade ring.

Hal helped with dozens more missions as the Green Lanterns' most trusted officer, fending off attacks from the Darkstars, Sinestro Corps, and, after the Green Lanterns relocated from the planet Mogo to New Oa, Hal even bested the Controller Mu and his fleet of Blackstars.

When the Young Guardians replaced the elders of the Guardians of the Universe, Hal was reassigned back to Earth. Once again able to embrace his lone cowboy attitude while battling crazy threats and reality-warping Super-Villains, Jordan continues to shine as one of Earth's greatest Super Heroes, and as the most impressive Green Lantern.

BLACKSTARS
Due to the manipulations of the Controller Mu, Hal Jordan briefly found himself in an alternate reality where he wasn't a Green Lantern, but a Blackstar.

REBIRTH

DECORATED OFFICER

After Hal Jordan defeated the threat of Controller Mu, the Guardians of the Universe wished to reward him. However, over the course of his career, Jordan had already earned every honor a Green Lantern can possibly receive. The Guardians instead gave Hal an upgraded power battery that promised to have some new and surprising features.

ON THE RECORD

On first joining the cosmos-spanning Green Lantern Corps, Hal Jordan was a loyal, obedient servant, doing whatever the Guardians dictated without question or quibble. However, as the years passed, he increasingly began to feel their edicts were far from benevolent.

Mosaic world

An early sign of the Guardians' fallibility came when Appa Ali Apsa went mad. Abducting communities from worlds he had visited, the "Old Timer" transplanted them to a distant planet, pitting the terrified townships against each other in bizarre social experiments. It took the united will of Hal and fellow Earthian Green Lanterns John Stewart and Guy Gardner to stop him. The Guardians were then able to restore the victims to their proper places in the universe.

Emerald twilight

After years of faithful service, Hal rebelled against the Guardians when they refused to let him change history and restore Coast City after Mongol destroyed it. Unbeknown to anyone, Jordan was infected by the fear parasite Parallax, which had been imprisoned for eons in the Central Power Battery on Oa. It drove Hal to attack hundreds of his comrades, stealing their power rings as he stormed across the universe to a titanic confrontation with the Guardians' last hope—a freed and restored Sinestro.

Even the arch-renegade could not stop Hal from destroying the Battery and ending billions of years of Green Lantern-enforced peace and order. However, when the Earth's sun was destroyed, Hal expended all his energy to revive the dying star and save the planet.

REDEMPTION

After eradicating the Green Lantern Corps, the deranged, Parallax-possessed Hal Jordan became a despised pariah. It took the threat of Earth's extermination to bring him to his senses.

WHITE LANTERN
Kyle has played many roles in his career, but his time as a White Lantern certainly proved his worth as the only Lantern to master all seven rings.

Kyle joined a team of representatives from the other colors of the emotional spectrum called the New Guardians.

Kyle went on to master, not just the Green Lantern ring, but all seven lights of the emotional spectrum as the White Lantern. However, this role was not to last. When Kyle was tasked with resurrecting the Blue Lantern Corps, his grasp of the spectrum shattered, and only his Green Lantern ring remained with him. Kyle embraced the return of his classic power set, and became a Green Lantern once more, adopting a costume nearly identical to his original and helping the Green Lantern Corps make peace with their rivals in the Sinestro Corps.

When Kyle withheld knowledge of a future child he and Sinestro Corps leader Soranik Natu might have, he pushed Soranik over the edge, and she branded his chest with the Sinestro Corps symbol before the two Corps split in anger. Traumatized by this event, Kyle nevertheless continued his heroic duties, facing threats like the Controllers, General Zod, and the Darkstars. As a veteran Corps members, Kyle has helped train newer members Jessica Cruz and Simon Baz.

ON THE RECORD

Kyle debuted during the 1990s at a time when many heroes were being replaced by temporary successors. After the success of the "Death of Superman" and "Knightfall" storylines, which saw Clark Kent and Bruce Wayne removed from their roles, "Emerald Twilight" sought to achieve the same exciting shake-up of the status quo. While some fans were enraged at Hal Jordan's transformation into Super-Villain—a fate spared both Superman and Batman—Kyle's individuality and interesting approach as the solo Green Lantern made him a hit as well, and he soon found prestige as a member of the JLA.

THE REPLACEMENTS

The popular JLA of the late 1990s featured legacy heroes including Kyle Rayner and Wally West.

POWERS/ABILITIES Can agitate molecules in matter, causing them to create blasts; wears customized hi-tech armor.

ALLIES Argus, Anima, Ballistic, Geist, Hook

ENEMIES Venev, Ragnarok, Mirror Master

Young businessman Andrew Van Horn's metagene was triggered when, as part of a concerted invasion of Earth, he was attacked and left for dead by a spinal-fluid-consuming alien. In the aftermath, the stunned survivor developed the power to ferociously agitate molecules and redirect them as blasts of concussive force, initially using any object he could hold in his hands.

Equipped with a prototype suit of polymer armor built by his munitions company, Andrew hunted the creature that had "killed" him and thereafter became the globe-trotting Super Hero Gunfire. The same attack that transformed Andrew also killed and mutated his father Gunther, who became his deranged arch-enemy, Ragnarok.

After finally defeating his father, Gunfire attempted to monetize his gifts by joining other metahuman survivors of the alien attack in a corporately funded team called the Blood Pack. Gunfire retired after his hands were cut off by the Super-Villain Prometheus.

HAND WEAPON

Gunfire's ability to transform any object's mass into blasts of concussive energy effectively turned anything he held into a firearm.

AFFILIATIONS US Marine Corps, The Losers

"Gunner" McKay and his military mentor "Sarge" Clay had a unique tactic for fighting the Japanese on a succession of Pacific Islands during World War II. The young private was an astonishingly fast and accurate shot with any weapon and would hang back or conceal himself while Sarge would deliberately make himself a target for enemy fire. The veteran trusted that his own years of experience would allow him to anticipate or evade the inevitable attack long enough for his infallible comrade to finish off the shooters.

They were assisted by a highly intelligent battle dog named Pooch, who accompanied them when—with Naval Captain Storm and pilot Johnny Cloud—they became part of a Special Operations squad nicknamed "the Losers" because of their bad luck.

The Losers were eventually killed in combat, but Gunner was soon recovered and resurrected as a cyborg-zombie, becoming part of the covert military unit dubbed the Creature Commandos.

GYPSY MAGIC

Vibe's every instinct said to trust the captivating Circus detainee, even though his A.R.G.U.S. bosses said Gypsy was a threat to the entire planet.

Unearthly refugee Cynnthia Mordeth always led a fairytale life. Her trans-dimensional trader father entered into a dynastic marriage with a rival tribe's queen and was reduced to a monstrous man-shaped packet of sentient energy. Her mother also transformed, becoming a planet-ravaging predator. Gypsy fled across myriad dimensions, unaware that she was the key to her mother's invasion plan for other realms.

On Earth, Cynnthia was imprisoned by the US Government agency A.R.G.U.S., never realizing it was all part of a bargain between her father and agent Amanda Waller. Cynnthia was caged in the Circus—a clandestine containment facility built to hold metahumans from other universes—and used to trick Cisco "Vibe" Ramon into becoming Waller's inter-dimensional alarm system and watchdog.

When Gypsy escaped, she befriended Cisco and slowly won him over to her cause. Together they traversed several multiversal breaches, eventually arriving on Cynnthia's homeworld Piradell. Here they destroyed the evil Mistress Mordeth after liberating Cisco's older brother Armando from murderous servitude to her.

On returning to Earth, Gypsy helped Vibe renegotiate the terms of his employment with Waller and A.R.G.U.S., before vanishing from public view.

HIGHER PLANES DRIFTER
After years of traversing dimensions and fleeing from every conceivable danger, Gypsy finally realized safety lay in confronting her pursuers.

ON THE RECORD

The original Gypsy was teenager Cindy Reynolds, who fled suburbia when her metahuman abilities abruptly manifested themselves. Living on the streets of Detroit, she survived using her chameleon-camouflage and illusion-casting powers.

Gypsy joined a reconfigured Justice League that included Vibe, Dale Gunn, and the Martian Manhunter. She later became a valued, covert operative of special ops organization Justice League Task Force, and then joined Barbara Gordon's Birds of Prey team.

HIDE AND SEEK

Gypsy's guileful intelligence-gathering and undetectable groundwork usually led to a punishing follow-up from her mighty, but not-so-subtle, associates.

GREEN LANTERN CORPS

DATA

DEBUT *Green Lantern* (Vol. 2) #9 (Nov.-Dec. 1961)

BASE New Oa

NOTABLE MEMBERS/POWERS HAL JORDAN, JOHN STEWART, KYLE RAYNER, GUY GARDNER, JESSICA CRUZ, SIMON BAZ, KILOWOG, SALAAK, TWO-SIX, GORIN-SUNN, ARISIA RRAB, SODAM YAT, MOGO. Drawn from across the Multiverse, Green Lanterns use willpower to operate power rings able to materialize hard-light constructs, allow flight, maintain protective fields, and universally translate languages, among other functions.

ALLIES Red Lantern Corps, Blue Lantern Corps

ENEMIES Sinestro, Sinestro Corps, Manhunters, Nekron, Larfleeze, Black Hand, Darkstars, Controller Mu

The Green Lantern Corps is a peacekeeping force created by the self-appointed Guardians of the Universe. The immortals sought to maintain order and foster the rise of civilization amongst lesser beings throughout the cosmos. Methodically dividing all of known space into 3,600 sectors, they personally selected the organization's peacekeeping officers from all over creation. Over eons the Guardians developed automated systems and now the power rings that all Green Lanterns employ automatically seek out honest beings capable of overcoming great fear whenever a wielder dies in the line of duty.

AT A GLANCE...

Central Power Battery

The colossal, lantern-like engine on New Oa condenses the willpower of all sentient life in the universe and redistributes it as green light to each Green Lantern officer's personal power battery. The finite energy-charge in each officer's ring is replenished by touching it to their personal battery long enough for them to utter the sacred oath:

"In Brightest Day, In Blackest Night;
No evil shall escape my sight.
Let those who worship evil's might,
Beware my power... Green Lantern's light!"

Full mental jacket

Courage, good intentions, and the mightiest personal weapon in the universe are not enough. The Corps' basic training is physically and mentally punishing. It teaches recruits to fight under pressure against multiple foes and that clear thinking will always win the day.

CLASSIC STORIES

Tales of the Green Lantern Corps #1-3 (May-Jul. 1981)

The entire Corps is mustered when Krona attempts to return the universe to its primal state, allowing death-personification Nekron access to the realm of the living.

**Tales of the Green Lantern Corps
(Vol. 1) Annual #2 (1986)** The Guardians' fallibility is exposed in "Tygers" when Abin Sur visits the planet Ysmault and is infected with fear by the prophecies of the Five Inversions.

Green Lantern Corps (Vol. 2) #20-26 (Mar.-Sep. 2008)

A contingent of Green Lanterns dispatched on a "Ring Quest" to confiscate deadly yellow power rings clashes with cosmic terrorist Mongul who has revived the Sinestro Corps under his own leadership.

Enhanced security

The Guardians eventually altered how their Green Lanterns operated. Without disclosing that they now considered lone agents untrustworthy, the Oans doubled the ranks, with officers native to each sector patrolling in pairs. This caused friction as the traditionally independent Lanterns often could not collaborate or cooperate.

From the earliest times of existence, the immortals of Oa sought to impose order on universal chaos, which they saw manifested as acts of evil perpetrated by deviant or antisocial beings. Their first solution was a vast army of robotic Manhunters who policed a scrupulously demarcated cosmos, reacting to crises, suppressing violence, and preventing disorder from spreading.

When the Manhunters malfunctioned, the appalled Guardians mothballed their mechanical agents. Some of the mechanoids, however, refused to abort their programmed mission, vanishing into the dark corners of the universe to plot revenge.

The Guardians replaced their artificial intermediaries with sentient beings recruited from the 3,600 sectors into which they had divided the known universe. These individuals were capable of swift assessment and certain judgment. They would also be fearless, honest, and dedicated to preserving life, maintaining order, and furthering progress.

Now organized along more military lines, the Corps' administrative offices were based on Oa, which also housed the immense Central Power Battery and Sciencells containing the universe's greatest felons and menaces. After the destruction of Oa, the Green Lantern Corps relocated to the living planet and fellow Green Lantern Mogo, and soon fell under the field command of longtime Lantern John Stewart.

Under Stewart's leadership, the Green Lanterns united with the Sinestro Corps for a time and faced the relaunched Darkstars—armored, lethal "peacekeepers." The Lanterns triumphed, but Stewart eventually left his leadership position as he became more active in the Justice League.

RIGHTEOUS RETRIBUTION

For millennia, the Guardians used Urak to store power batteries, and their energies made the resource-poor world flourish. When the Guardians changed policy and withdrew them, Urak's ecology crashed. Now, with an uncanny capacity to overwhelm willpower, Urak's Keepers erupt upon the universe, slaughtering at will and especially targeting Green Lanterns. When John Stewart's squad was overcome, he had to kill one of his team to preserve Oa's security, and Guy Gardner's only viable rescue plan involved resurrecting the Mean Machine—the meanest, most ornery officers in the Corps.

MOGO

A living planet and Green Lantern member, Mogo was the home base for the Green Lantern Corps after the destruction of the planet Oa. Unlike Oa, Mogo is capable of moving through space.

WILLPOWER WIPEOUT

The Keepers wanted other worlds' resources to rebuild Urak, but also relished the chance to slaughter the Guardians' "pets" in the Green Lantern Corps.

GUY GARDNER

THE PHANTOM RING

Longtime enemy of the true Man of Steel, Cyborg Superman was able to corrupt the Green Lantern battery, hacking into Green Lantern rings as soon as they recharged. When Hal took the fight to Cyborg Superman, the villain employed a Phantom Ring and attacked Coast City. With some help from his fellow Green Lanterns, Jordan stopped the villain in his tracks, his years of ring-slinging experience enough to vanquish Cyborg Superman's novice attempts.

SHEDDING LIGHT

With the Green Lantern Corps damaged by Cyborg Superman's attack, the Guardians realized they needed to finish their construction of New Oa more than ever.

REBIRTH

GIVEN THE GREEN LIGHT

Simon Baz and Jessica Cruz are new recruits of the Green Lantern Corps. Despite originally disliking one another, they were ordered to work together as Earth's Green Lanterns. The two formed a friendship after a trial by fire, and both served together on the fabled team of Earth-based Super Heroes, the Justice League. However, Jessica eventually ended their partnership when she left Earth to protect the area of space known as the Ghost Sector.

After several large scale battles, including an infiltration of the Green Lanterns' Central Power Battery at the hands of the villainous Cyborg Superman, the Guardians relocated the Green Lantern Corps from Mogo to their artificial planet, New Oa. There they were able to assign their favorite operatives to appropriate missions, including Hal Jordan, who helped them fight off Controller Mu's Blackstars.

When the elders of the Guardians of the Universe left Oa to wage something they called the "Ultrawar," new replacements were bred with a combination of Guardian, Zamaron, and Controller DNA. These Young Guardians began to challenge the old ways that the Green Lantern Corps was run, promising a bold new era in the days to come.

ON THE RECORD

Originally the Green Lantern Corps were depicted as running their own affairs within their personal interstellar beat, separate from the Guardians and seldom impinging upon each others' jurisdictions.

Emerald army

During the 1960s the Corps' ranks expanded and were cautiously explored. A huge variety of valiant alien Green Lanterns were introduced, but though many become eagerly anticipated guest-stars, none were quite as effective as Earth's Hal Jordan. He frequently won the day with solutions beyond his peers' comprehension, and even managed to come back from the dead.

Green Lantern citadel

Following the Multiverse-altering *Crisis on Infinite Earths*, the Corps was relieved of strict assignments to specific sectors, and both the Guardians and the female Oans who had evolved into the Zamarons retired from the universe for a period of reflection and contemplation. Advised that Earth would play a crucial role during the next millennium, several Green Lanterns—Katma Tui, Salaak, Ch'p, Kilowog, and Arisia—relocated to that world with Hal Jordan, John Stewart, and maverick Guy Gardner, and were on hand to witness the transformation of the so-called "New Guardians."

Sinestro Corps war

The Corps faced their greatest challenge when the renegade Sinestro launched an all-out attack on the cosmos. Although Sinestro was defeated, the events helped lead to the horrific event that would be known as the *Blackest Night*.

HEAVY HITTERS

Yellow Lanterns were not the first to mistakenly confuse Green Lanterns' respect for rules with timidity, or their concern for life with weakness.

The clandestine organization known as H.I.V.E. was created by persons unknown for ostensibly altruistic reasons. Its avowed purpose—as defined

by the ruling H.I.V.E. Queen—is to release the world from the bondage of individual freedoms and create global parity for every living creature on Earth. To these ends, they have abducted children, murdered thousands of innocents, and consorted with criminals, all while making a tidy profit. Casualties have included scientist Dr. Caitlin Snow, who was transformed into Killer Frost after H.I.V.E. sabotaged her invention to protect its own financial interests in the energy industry.

But H.I.V.E.'s major area of endeavor is psionics. For years it has stolen humans with telepathic potential, turning them into warriors, research subjects, or drones.

H'El attacked Earth believing he was acting for the House of El. He had spent decades exploring the universe, preserving Krypton's history. Finding cousins on

Earth, H'El resolved to turn back time. When he tried to avert Krypton's destruction using Earth's sun as fuel, Earth's defenders defeated him and he fell through a time rift.

Arriving on Krypton when Jor-El was a student, H'El learned he was a clone-hybrid spontaneously generated from millions of Kryptonian cell-samples. A freak accident had created him within a star-spanning time-capsule; his aberrant mind forming from the historical records archived on the vessel.

Enraged, H'El staged a multi-chronal assault which simultaneously besieged Krypton in three different eras. He was again defeated by Superman, Superboy, and Supergirl, and left trapped in a time loop.

Hades is one of the most powerful of the Olympian gods. When he and his brothers Zeus and Poseidon slew their father Chronos, his brothers claimed dominion of

the skies and seas respectively, and Hades was left with the underworld—the realm of spirits. His kingdom is built from all the souls that have entered his realm, which Hades reshapes into settings to suit his mood.

When Zeus died, his queen Hera took on his role, sparking a civil war that embroiled the Olympians and their offspring in a catastrophic conflict. Devious, bored, mistrusting, and incapable of love, Hades agreed to Wonder Woman's peace plan for him to wed Hera. When this failed, he tried to forcibly marry Diana instead, but was foiled by Hephaestus. As the war raged, Hades was seemingly killed by First Born.

as the Force of July. Boris—wielding a bone-crushing hammer with mutant super-strength and vitality—became field leader of the People's Heroes. Natasha used a sickle with her enhanced speed and agility, serving beside Boris in the team (and its successor Red Shadows) as they repeatedly clashed with the Outsiders and the Suicide Squad. Later the Ulyanovs operated as a duo, battling the Teen Titans over Russian fugitive Red Star.

When the Berlin Wall fell, they fell out of favor in the new Russia. As superpowered mercenaries and assassins in the West, they joined Super-Villain coalition the Society and clashed with Catwoman.

Halo was born when teenage sociopath Violet Harper was murdered by the costumed assassin Syonide. The crime was observed by an invisible ancient light entity—one of the Aurakles—which accidentally became trapped in the corpse, reanimating it while also bestowing a range of abilities. Violet's personality was suppressed, leaving an innocent amnesiac who took the name Gabrielle Doe. Her light-based superpowers brought her to the attention of Batman, who recruited and trained her as part of his undercover team, the Outsiders.

After many adventures, the still largely naive and innocent Gaby was murdered on the orders of criminal mastermind Marissa Barron, who also died in the attack. The Aurakle then transferred itself into Barron's body, which promptly resurrected with Gaby's personality and powers. Resuming her career on the fringes of the Super Hero community, Halo withdrew from the spotlight. During a mission for Red Robin and Batman Incorporated she was lost and declared dead. She now operates completely off the grid as part of the Dead Heroes Club, taking on covert missions for Batman.

**BEACON OF HOPE**

Halo's immense powers were balanced by a childlike nature and desire to please. However, she developed a hard-won maturity during *Blackest Night*. She was especially effective against Black Lanterns, mercilessly eradicating Katana's resurrected children and Geo-Force's sister Terra.

POWERS/ABILITIES Hyper-advanced intellect and numerous psionic abilities including telepathy, telekinesis, mind control, mental blasts, and illusion creation.

ENEMIES Green Lantern, Superman, Orion, Kroloteans, Sinestro, Justice League, Darkstars

AFFILIATIONS H.I.V.E., Secret Society of Super-Villains

Astrophysics and aeronautics consultant Hector Hammond was secretly experimented on by Kroloteans—an alien species of arms manufacturers. They amplified Hammond's psionic abilities, hoping to sell him as the ultimate weapon, "the God Brain." They similarly mutated William Hand (Blackhand) and a shark, who all became foes of Green Lanterns.

Hammond's mentality expanded exponentially and he became a menace to everyone around him. His burgeoning psionic powers proved too much for rookie ring-bearer Hal Jordan, but Hammond was overwhelmed by Hal's mentor Green Lantern Sinestro. Imprisoned in isolation and studied by scientists, Hammond's powers constantly grew—as did his skull. Hammond was incapable of physical movement, but possessed lethal psionic abilities that fed parasitically on the minds around him and hungered for dominance. His psychic range spanned galaxies and his cruel, playful predations caused chaos for the Guardians on Oa and the homeworld of the New Gods.

Hal Jordan saved Hammond from the Kroloteans when he tried to retrieve their ripe bioweapon, and Hammond repaid his debt by helping to defeat the Controllers and Darkstars.

QUEEN FOR A DAY
H.I.V.E.'s psionic empress was no match for the decrepit-seeming Hammond.

ON THE RECORD

The original Hector Hammond was a petty crook who found a meteor that could evolve organic life. He used it on kidnapped scientists, enriching himself through their discoveries—until Green Lantern intervened. Hammond evolved himself too, but the high cost of increased mental powers was the total loss of physical mobility.

From his cell, Hammond plagued many heroes, including The Flash, the Justice League, and Superman, but he always reserved his greatest hatred for Hal Jordan.

BODY OF EXPERIENCE
Forced to live life vicariously, Hammond was determined the lives he plundered would be full of adventure, glamor, triumph, and tragedy.

The Hangmen were executed months later by the Spectre, after seeking to join Libra's new Secret Society of Super-Villains during *Infinite Crisis*.

After their executions, their costumed identities and murder methods were appropriated by a new group of anonymous felons in Gotham City, who clashed with Dick Grayson and Damian Wayne—the second Batman and Robin team—and later Damian Wayne's new Teen Titans team.

He began traveling incrementally backward in time, and with each stop gathered more technology and power, gradually transforming himself into a lethal and inhuman monster. To aid him in his dangerously misguided mission to save mankind, Harvest kidnapped and indoctrinated Jon Lane Kent, the superpowered son of Superman and Lois Lane from a possible future reality.

Arriving in the 21st century, he created N.O.W.H.E.R.E., gathering together young metahumans and forcing them to kill each other in a periodic Culling. The survivors would form the basis of Harvest's army of Ravagers. His obsessive campaigns brought him repeatedly into conflict with Superboy and the Teen Titans, and he was killed after attempting to combine a mass of metahuman DNA into an ultimate weapon.

ENEMIES The Joker, Punchline, Granny Goodness, sometimes Batman (when Harley's being mischievous)

AFFILIATIONS Suicide Squad, Birds of Prey

Harley Quinn has been a psychiatrist, The Joker's lethal sidekick, a key member of a secret government-sponsored strike force, a Brooklyn landlady, a roller derby champion, a burlesque dancer, a nurse, and a punk rocker. But to hear her tell it, all those lives are behind her now and she has set off on her newest mission: to be a real, honest-to-goodness Super Hero. While she hasn't always had the highest regard for human life, Harley has always maintained a strict moral code that often sees her fighting for the underdog. So maybe she's got a chance at this hero thing after all. Stranger things have happened in Gotham City...

AT A GLANCE...

Who's that girl?

Much like The Joker, Harley's mental instability has led to conflicting origin stories. Most versions agree that she was a former Arkham Asylum psychiatrist who fell in love with her main subject, The Joker, and quickly dropped everything for a chance to impress him as the villain Harley Quinn.

Boy trouble

Harley tried to play the role of the doting girlfriend to the insane Joker, despite him tossing her into a vat of chemicals. She acted ditzier than usual to attract him, but soon found that the Clown Prince of Crime tired of her, eventually discarding her like yesterday's whoopee cushion.

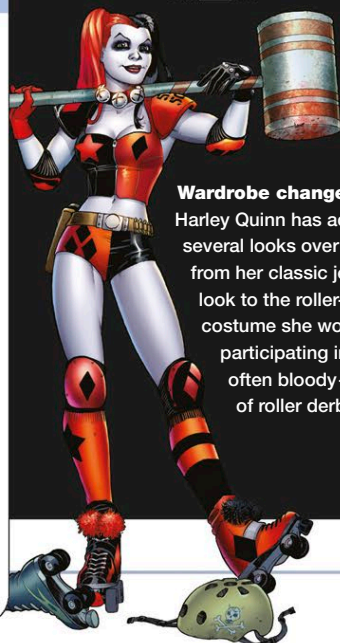

CLASSIC STORIES

The Batman Adventures: Mad Love #1 (Feb. 1994) Harley Quinn's obsession with the Clown Prince of Crime is examined in this comic that shines a light on Harley's origin, as well as the couple's abusive relationship.

Batman: Harley Quinn #1 (Oct. 1999) Harley navigates her way into the DC universe during this special prestige-format tie-in with the epic "Batman: No Man's Land" crossover.

Gotham City Sirens #1 (Aug. 2009) Catwoman, Poison Ivy, and Harley all share the spotlight in this ongoing series featuring Gotham City's most infamous femme fatales.

Harley Quinn (Vol. 2) Annual #1 (Dec. 2014) Readers are treated to a comic as zany as Harley herself in this special scratch-and-sniff issue that featured a disclaimer from DC due to some of its more controversial scents.

Wardrobe changes

Harley Quinn has adopted several looks over the years, from her classic jester look to the roller-skating costume she wore when participating in the—often bloody—sport of roller derby.

Dr. Harleen Quinzel's dramatic transformation into the Super-Villain Harley Quinn is a tale that has changed over the years due to Harley's own retellings and her penchant for exaggeration. According to Harley's latest version, she grew up in a fairly quiet neighborhood in Brooklyn, New York. Harleen had several brothers and a bit of a delinquent streak. She soon met a like-minded boy named Bernie Bash, who proved even more dangerously unstable than Harleen. To win her affections, Bernie threw their classmate Bonnie Harper out of his car into the path of an oncoming truck. Bonnie had picked on Harleen in school, and Quinzel was moved by Bernie's "romantic" gesture. When he was arrested,

Harleen broke into Bernie's parents' place and stole a stuffed beaver to remember him by—a beaver she would later talk to as if it were a real person. Harleen experienced her first heartbreak when Bernie was arrested and it worsened when he was killed while in juvenile detention.

After concentrating on her studies, Harleen won several scholarships to Gotham University. She graduated at the top of her class and found work as a psychiatrist at a prominent hospital in Gotham City. Fascinated by the criminal mind, Harleen transferred to Arkham Asylum.

Dr. Quinzel claims that when she was working at Arkham Asylum, she was constantly annoyed that the inmates did not open up to her. She convinced the warden to allow her to join Arkham Asylum's general population, intent on getting close to the inmates as one of their peers. To that end, she dyed her blonde hair red and black and faked insanity,

FALLING FOR IT Harleen was betrayed by The Joker when he threw her into a vat of chemicals.

earning the attention of The Joker. She fell in love with the Super-Villain and then broke him out of the Asylum. Later, the Clown Prince of Crime dropped Harley in a vat of

YOUNG SCHOLAR

From an early age, Harleen had a keen interest in psychiatry. Amadeus Arkham's *Studying the Criminal Mind* gave her an insight into how to manipulate people.

SQUAD LIFE

When government agent Amanda Waller decided to set up Task Force X—a covert strike force made up entirely of Super-Villains—Harley Quinn was one of her repeat recruits. Knowing that Harley was sharper than she often let on and was fully capable of holding her own in a fight, Waller employed Harley's special brand of chaos more often than not. While Harley eventually won her freedom and was released from Belle Reve Penitentiary, she seemed to enjoy her time running amok for the government.

FRIENDS IN LOW PLACES

Harley became close with several of her Suicide Squad teammates. She even had romantic flings with both Deadshot and Rick Flag, Jr.

chemicals which dyed her skin bright white and drove her insane. Adopting the name Harley Quinn, she became The Joker's number-one accomplice, acting even crazier than usual to keep his attention. But the two eventually—and somewhat violently—parted ways. Harley went from one job to the next, working for the US government as part of the Suicide Squad when she got herself arrested, and becoming a landlady in Coney Island, Brooklyn when she didn't. She was more than over her relationship with The Joker, and built herself a nice supportive community of likeminded misfits in Brooklyn. Tragedy struck a serious blow, however, when Harley lost her mother to cancer.

After being falsely accused of murder at the Super Hero therapy center called Sanctuary, Harley has decided to turn her life around even further by becoming a full-fledged hero, and has even teamed with the heroic Birds of Prey from time to time. She toyed with the idea of dating Booster Gold, but has put that plan on hold, opting to help fight on Batman's side during The Joker's most recent campaign of terror, the so-called "The Joker War."

"How cool would it be to have my own comic book?"

HARLEY QUINN

EXPLOSIVE PERSONALITY

Harley Quinn is not just a loose cannon, she is an entertaining loose cannon. When aimed at the right target, Harley can be a zany force for good, but cross her, and you won't be laughing for very long.

PLAYING WITH POWER

The hero Power Girl found herself in one compromising position after another after Harley found her crash-landed near her Brooklyn home. Harley decided to convince the amnesiac Power Girl that they were Super Hero partners, and even began fighting crime as Power Girl's sidekick, just for the sheer enjoyment of it. However, when this dysfunctional duo crossed paths with Super-Villains Clock King and the Sportsmaster, they found themselves on several adventures through the far reaches of space. Eventually, they fought their way home, only for Power Girl to regain her memories and quickly quit her partnership with Harley.

GIRL TROUBLE

When Power Girl finally found out the truth about her "Super Hero" partner Harley Quinn, it took all her heroic restraint not to totally pummel her former "sidekick."

REBIRTH

GAL PALS?

Harley Quinn has always shared a special bond with Poison Ivy, dating back to the earliest days of Harley's criminal career. However, when Harley decided to become a Super Hero, the idea didn't mesh with Poison Ivy's current way of thinking, and the two broke up. (It didn't help that Harley had just spent a road trip bonding with a plant clone of Poison Ivy, and couldn't tell the difference between her and the real thing!)

ON THE RECORD

Harley Quinn's popularity didn't originally stem from the comics themselves, but from her original appearances on the award-winning cartoon, *Batman: The Animated Series*.

From cartoon to comic-book star

Harley Quinn first appeared on *Batman: The Animated Series* as The Joker's partner-in-crime, and soon found her way into the tie-in comic book series *The Batman Adventures* in 1993. It was six more years before she drifted into the mainstream DC universe, introduced in her own one-shot special during the epic "Batman: No Man's Land" crossover between all the Batman titles. In this version of her origin, Harley wasn't actually a doctor of psychiatry, but simply an intern. She fell in love with The Joker, broke him out of prison, and adopted a clownish look, complete with a red and black jester cowl.

Toxic friendship

After The Joker first attempted to kill Harley, she befriended Poison Ivy. The eco-terrorist took a liking to Harley's zany antics and gifted her with a formula that made Harley mostly immune to toxins and poisons and gave the kooky clown-in-training enhanced agility and strength. Now ready to go toe-to-toe with Batman himself, Harley truly began her career of crime.

TRICKY TRIO

Harley not only became fast friends with Poison Ivy, but also with Catwoman, who later began living with the pair despite their many differences and approaches to crime.

POWERS/ABILITIES A tank haunted by the ghost of General James Ewell Brown Stuart and members of the crew connected to it; provides protection against magical attack and can also teleport.

ENEMIES Nazis

In World War II, the Haunted Tank was commanded by Jeb Stuart and watched over by the ghost of one of his ancestors—a Confederate general named James Ewell Brown Stuart. In 1942, Jeb was ordered to locate a stash of mystical artifacts that had been collected by Hitler, and he ended up using the Tank to fight several strange threats along the way.

Years later, when Jeb was 98 years old, the Tank materialized outside his house after his grandson, Sergeant Scott Stuart, was captured in Afghanistan. Old Jeb and the tank vanished in front of A.R.G.U.S. agents who had started tracing the tank after it went missing from a vault. Jeb and the tank reappeared in Afghanistan, where they rescued Scott.

The tank then teleported to the North Pole, where they stopped descendants of World War II Nazis unleashing a deadly "Warwheel" piloted by a Nazi Ghost.

Jeb died in action, but his ghost seemingly lived on in the vehicle, talking to his grandson who had inherited the family connection to the Haunted Tank.

GUARDIAN GHOST

The M3 Stuart Light Tank was possessed by the ghost of Jeb Stuart's ancestor. Jeb could see and hear the ghost, who offered guidance in combat.

HAWK, SON OF TOMAHAWK

DEBUT *Tomahawk* #131 (Dec. 1970)

BASE Echo Valley, Mid-West America

HEIGHT 5ft 10in **WEIGHT** 166 lbs

EYES Blue **HAIR** Brown with blond streak

POWERS/ABILITIES Expert horseman, tracker, and hunter.

ALLIES Firehair, Jonah Hex, Swamp Thing

ENEMIES Black Bison, Wise Owl

Hawk was a Western hero born in 1800.

He was the son of Tomahawk (Tom Hawk), a famous revolutionary hero, and a Native American woman called Moon Fawn.

Hawk was raised in Echo Valley, where he learned the ways of the Wild West from his father, and the secrets of Native American culture from his mother, along with his brother, Small Eagle.

Hawk became an expert tracker, hunter, and fighter. He was soon helping others and formed a close friendship with the heroic Firehair. Later, he joined forces with other Old West heroes to fight the mystical villain Black Bison. Hawk helped Swamp Thing when he time-traveled to the 1870s. Bison gave Swamp Thing a magic talisman, the Claw of Aelkhünd, to help him return to his own time. Just before he died, Hawk published his autobiography.

HAWKE, CONNOR

DEBUT *Green Arrow* (Vol. 2) #0 (Oct 1994)

REAL NAME Connor Hawke **BASE** Star City

HEIGHT 5ft 9in **WEIGHT** 160 lbs

EYES Green **HAIR** Blonde

POWERS/ABILITIES Highly skilled in archery and martial arts.

ALLIES Eddie Fyers, Green Lantern (Kyle Rayner), Black Canary, Robin (Tim Drake)

ENEMIES Lady Shiva, Doctor Sivana, Onomatopoeia, Constantine Drakon

AFFILIATIONS Justice League

Connor Hawke was the son of Green Arrow (Oliver Queen), although his father did not know of his existence until the two met in the Ashram Monastery during a dark time in Queen's

life. Connor showed a natural aptitude for archery and martial arts, and Queen took him under his wing. When he eventually discovered the truth about their connection, Queen was mistrustful of the young man—and before they could repair their relationship, Queen was killed in an explosion.

Connor took up his father's mantle as Green Arrow and even joined the Justice League in his stead. After Oliver Queen returned from the dead, Connor was able to bond with him as a son, but their relationship remained fragile.

HAWK AND DOVE

DEBUT *Showcase* #75 (Jun. 1968)

REAL NAMES Hank Hall (Hawk) and Dawn Granger (Dove)

BASE Washington, D.C.

HEIGHT 6ft 1in (Hawk); 5ft 9in (Dove) **WEIGHT** 197 lbs (Hawk); 120 lbs (Dove)

EYES Brown (Hawk); Blue (Dove) **HAIR** Brown (Hawk); White (Dove)

POWERS/ABILITIES **Hawk:** Enhanced agility, strength, body density, and vision, healing factor; **Dove:** Enhanced strength, intelligence, and empathy, flight, danger sense.

ALLIES District of Columbia Police Department, Deadman, Batman

ENEMIES Alexander Quirk, Condor, Swan, the D'Yak, Blockbuster, the Hunter, Mister Twister, Fearsome Five

When brothers Hank and Don Hall discovered that criminals were planning to murder their father, Don wished they had the power to save him—and divine agencies answered. Brash, aggressive Hank transformed into Hawk, Avatar of War, while calm, rational Don became Dove, Avatar of Peace. They saved their father and used their gifts as small-town Super Heroes and in the Teen Titans. Don died during the *Crisis on Infinite Earths*. Although bereft, Hawk continued as a lone avenger, growing ever more

enraged without the stabilizing influence of his brother.

Balance returned for Hank in the shape of Dawn Granger, selected by higher powers to be the new Dove, and the two heroes reluctantly formed a new partnership. Mirroring Hank's relationship with his brother, the duo clashed over ethical questions, with Hawk favoring force and Dawn preferring pacifism and reason. But they united to face fellow avatars Condor and Swan, as well as the mysterious D'Yak. Hawk and Dove encountered the Teen Titans while investigating a sinister mystery in the small town of Hatton Corners in the east of the United States: a case that returned to haunt them and which served to reignite their crusade against evil in the post *Rebirth* era against the reality-shredding threats of Barbatus, The Batman Who Laughs, and Perpetua.

ON THE RECORD

The pre-Flashpoint Don and Hank Hall received their powers from the Lords of Chaos and Order and joined the Teen Titans. When Don died during the *Crisis on Infinite Earths*, Dawn Granger took his place as Dove.

Their partnership ended when Dawn was seemingly slain by Monarch, an evil future version of Hank. Hank then became the time-warping villain Extant and was later killed, only to be reborn as a zombie in the *Blackest Night*, when he fought the new Hawk and Dove—Holly and Dawn Granger—and was brought back to life by the power of the white light.

DOUBLE TROUBLE

Hawk and Dove's relationship was marked by tension, but when combined, they could be an unstoppable force for good.

HAWKGIRL

DATA

DEBUT *The Flash Comics* #1 (Jan. 1940) (as Kendra Saunders); *JSA Secret Files and Origins* #1 (Aug. 1999)

REAL NAME Kendra Saunders

HEIGHT 5ft 9in **WEIGHT** 135 lbs **EYES** Hazel **HAIR** Brown

POWERS/ABILITIES Trained archaeologist; Nth Metal wings and harness allow flight; skilled with variety of weaponry; highly skilled warrior with memories of past lives.

ALLIES Hawkman, Martian Manhunter

ENEMIES Barbatos, Perpetua, Legion of Doom

AFFILIATIONS Justice League, Guild of Detection, Blackhawks

Using the power of Nth Metal, Kendra Saunders is Hawkgirl, one of the Justice League's newer recruits. Having no trouble standing shoulder to shoulder with giants, Hawkgirl's fighting spirit and determination has made her feared throughout the galaxy.

LADY BLACKHAWK
While fighting the forces of the Dark Multiverse and the demon Barbatos, Kendra was transformed for a time into a living embodiment of her codename, Lady Blackhawk.

Justice Society of America.

However, in modern times, something strange happened. While there is only one Carter Hall, there were two women who shared a history as the reincarnated form of Shrra. The first was Shayera Hol, Empress of the planet Thanagar, also known as Hawkwoman. The second was Kendra Saunders, who gave up her wings to join a covert anti-apocalypse team of soldiers called the Blackhawks. As Lady Blackhawk, Kendra helped the Justice League during the Dark Multiverse's invasion of Earth. She soon earned a spot in their ranks as the hero Hawkgirl.

While on a mission to Thanagar Prime, Kendra met Shayera Hol, discovering that their history had been split due to the energy known as the Totality. The cosmic being Perpetua did not want her spirit whole. However, Starman (Will Payton) had merged with this Totality, and was able to make both women whole again, effectively making Kendra her own separate person, free to explore her own destiny.

Hawkgirl did just that, fighting the forces of Perpetua with the rest of the Justice League. In the process, she grew close with the Martian Manhunter, and the two began a romance, even discovering that they had a child in another reality. Later, when the world seemed to fall to Perpetua and turn to doom, Hawkgirl and Martian Manhunter fought valiantly to ensure the Multiverse lived to see another day.

CLASSIC STORIES

Hawkgirl (Vol. 1) #50 (May 2006)

As part of the "One Year Later" event, Hawkgirl starts a new life in St. Roch, but soon finds herself troubled by nightmares of Hawkman.

Blackest Night #1-8 (Jun. 2009-May 2010) Hawkman and Hawkgirl are murdered only to return as Black Lanterns. Hawkgirl is reborn at the end of the series, but with a new set of memories.

Earth 2: Society #8 (Mar. 2016)

While searching her new world, Kendra learns that Fury is training a new generation of Amazons.

HAWKWOMEN

There have been a variety of Hawkwomen over the years, all reincarnated forms of the angel-like herald Shrra. Despite her appearance and name, Hawkgirl has now broken away from her ties to Hawkman and his ancestry.

ON THE RECORD

The original Hawkgirl was Shiera Sanders Hall, who first appeared in *Flash Comics* #1 (Jan. 1940) as the girlfriend of Hawkman. After several continuity changes, Hawkgirl was reintroduced as a member of the JSA in 1999. This version's alter ego was Kendra Saunders, a distant cousin of the very first Hawkgirl. After *The Flashpoint* event radically changed Hawkman's history yet again, Kendra reemerged on Earth-2, a blue-clad freedom fighter against Darkseid's tyranny. A new Kendra only recently found her way back into the main continuity of Earth-0 during the *Dark Nights: Metal* miniseries.

WINGED WARRIOR

Hawkgirl was one of the main heroes fighting Darkseid's forces on post-*Flashpoint* Earth-2.

ALIEN OUTFITTERS

Hawkgirl wears a costume that invokes uniforms worn on the planet Thanagar, and utilizes the Nth metal mined there to great effect.

HAWKMAN

DATA

DEBUT *Flash Comics* #1 (Jan. 1940)

REAL NAME Carter Hall **BASE** Midway City

HEIGHT 6ft 1in **WEIGHT** 195 lbs **EYES** Blue **HAIR** Brown

POWERS/ABILITIES Thanagarian Nth Metal harness features retractable wings and allows for enhanced strength, stamina, and endurance; extensive battle training and weapons expertise; speaks thousands of languages; history expert with a wide breadth of cultural knowledge.

ALLIES Hawkwoman, Atom (Ray Palmer), Hawkgirl, Madame Xanadu, Adam Strange

ENEMIES Gentleman Ghost, Lion-Mane, Shadow Thief, Byth, Idamm

AFFILIATIONS Justice League of America, Justice Society of America, The Infected, Guild of Detection

Carter Hall has lived many lives. While he is an archaeologist and the Super Hero Hawkman in the present, in his past he has been an Egyptian prince, a medieval knight, a Wild West gun hand, and a Thanagarian soldier. A hero in every generation, Carter both studies and lives history.

Carter Hall has been reincarnated many times, but his first life was on Qgga as Ktar Deathbringer, a winged servant of an entity called the Lord Beyond the Void. He and his fellow Deathbringers brought humanoid sacrifices to their Lord from planets including Earth, Thanagar, and Rann. After seeing an angelic herald named Shrra on every killing field, Ktar led a revolt against his lord, ending the Deathbringers. In death, he was given a chance to redeem himself. He was to be reborn until he had saved as many lives as he had taken. Shrra chose the same fate.

First Carter returned in ancient Egypt as Prince Khufu Maat Kha-Tar, in love with a woman named Chay-Ara—the reincarnated Shrra. They found an alien craft with Nth Metal, which they used to craft belts and harnesses. Thanks to Nth Metal's gravity-negating properties, they could fly. In medieval times, Carter became the Silent Knight, and in the old West, he fought as Nighthawk. On Thanagar, he was Wingman Katar Hol serving in the police. In the Microverse, he was the hero Avion. On Krypton, he was Catar-Ol. He was Airwing of New Genesis, Katarthul of Rann, and the Dragon of Barbatos, among others.

As Hawkman, Carter served on the Justice Society of America in the 1940s and later with the Justice League of America. When the Deathbringers returned, led by Idamm—the partner Carter once betrayed—Carter summoned his past lives into an army to defeat Idamm. Later, he and Hawkwoman came face-to-face with the Lord Beyond the Void. The heroes defeated him, but were killed in the process. The two were resurrected, but with their debt fully paid, they were told that this would be their last life.

ON THE RECORD

Originally a reincarnation of the Egyptian Prince Khufu, Hawkman's physical appearance has changed little since his debut. Reborn as archaeologist Carter Hall, he adopted the hawk emblem of the Egyptian God Horus for his role as the hero Hawkman. He also began searching for his lost love, Princess Chay-Ara, who had been reincarnated as Shiera Sanders and, after they met, became Hawkgirl. Hawkman was chairman of the JSA and owned a hawk, Big Red. When the hero was revived in the 1960s, his backstory was changed. He became a Thanagarian law enforcer who had traveled to Earth in pursuit of a criminal and decided to remain there to fight crime.

SKY TYRANT

The Batman Who Laughs from the Dark Multiverse successfully infected Hawkman, transforming him for a brief time into one of The Infected. Hawkman became his Earth-3 past life, the Sky Tyrant.

TEAMWORK
Hawkman was recruited to the Justice League by Amanda Waller.

GOLDEN AGE

Hawkman's look has remained largely the same: enormous wings, a beaked mask, and, since he was an archaeologist, weapons borrowed from the museum he curated.

CLASSIC STORIES

Hawkworld #1-3 (Aug.-Oct. 1989)

Katar Hol lives on Hawkworld, working as one of the Wingmen militia. When he uncovers a conspiracy, it almost destroys him.

JSA #22-25 (May-Aug. 2001)

The JSA and Hawkgirl travel to Thanagar, where she learns the truth about Hawkman's past and helps bring him back to life.

Hawkman (Vol. 4) #1-6 (May-Oct. 2002)

Hawkman meets his true love, Hawkgirl, once more. However, Kendra Saunders—the new Hawkgirl—has no memory of her past lives.

PAST LIVES

Hawkman recently experienced a vision of his many past lives, both on Earth and on other planets.

NTH METAL

Hawkman's harness and wings are made of a mysterious substance known as Nth Metal, mined on the planet Thanagar. He can retract his wings into the harness when not in use.

DEBUT *Batwoman* (Vol. 2) #16 (Mar. 2013)

REAL NAME Mary Elizabeth Kane

BASE Gotham City

HEIGHT 5ft 6in **WEIGHT** 120 lbs

EYES Blue **HAIR** Blonde

POWERS/ABILITIES Olympic-level gymnast and swimmer; highly trained fighter.

ALLIES Batwoman

ENEMIES The Hook

Mary Elizabeth "Bette" Kane enjoyed a highly privileged upbringing as part of Gotham City's rich Kane family. She was a successful tennis player and skilled in martial arts

and gymnastics. When she discovered Dick Grayson was Robin, she decided to become a hero, too. Bette called herself Flamebird and joined the Teen Titans.

Bette learned that her cousin, Kate Kane, was secretly Batwoman. Batwoman proved a strict teacher, burning Bette's old costumes and renaming her "Plebe." A battle with the monstrous Hook left Bette in a coma, but she recovered and returned to crime fighting when Medusa attacked her cousin and Wonder Woman. Wearing a new costume and calling herself Hawkfire, Bette battled Hook once more and this time tore his signature weapon from his arm. She continued to fight crime in Gotham City alongside Batwoman.

HAWKWOMAN

DEBUT *The Brave and the Bold* #34 (Feb.-Mar. 1961)

REAL NAME Shayera Hol

BASE Thanagar Prime

HEIGHT 5ft 7in **WEIGHT** 145 lbs

POWERS/ABILITIES Flight, rapid-healing; elite military training, adept in use of Nth Metal.

Due to the reality-altering properties of Nth Metal, alien Shayera Hol and Kendra Saunders share a soul. As Hawkwoman and Hawkgirl, the

two-in-one hero is forever-reincarnating.

Prior to *Crisis on Infinite Earths* Shayera came to Earth with her husband, Katar Hol, chasing a criminal from their homeworld of Thanagar. They fought crime and joined the Justice League of America. Shayera split with Katar and became a policewoman in Detroit, but soon donned armor again to fight shapeshifting criminal Byth. By the Rann-Thanagar War, she had left Earth to fight for Thanagar, but was killed by Queen Komand'r of Tamaran, aka Blackfire.

Post-*Flashpoint*, Shayera Hol was reborn as the daughter of Thanagar Emperor Provis. Thinking her lover, Katar Hol, had killed her brother Corsar, she tracked him to Earth, only to find Corsar was alive, but insane.

After *Rebirth*, Shayera returned as Last Empress of Thanagar Prime. She and Hawkgirl learned of their shared existence.

HEAT WAVE

DEBUT *The Flash* (Vol. 1) #140 (Nov. 1963)

REAL NAME Mick Rory

BASE Central City

HEIGHT 5ft 11in **WEIGHT** 179 lbs

EYES Blue **HAIR** Bald

POWERS/ABILITIES Creates flame with his body and fires it from his chest; possesses Heat Gun.

ALLIES Captain Cold, Golden Glider

ENEMIES The Flash, Crime Syndicate, Royal Flush Gang

AFFILIATIONS The Rogues

Obsessed with fire from childhood pre-teen Mick Rory set his home alight and stood mesmerized by the flames as they burned the house down. After several similar incidents, Rory—a hopeless pyromaniac—followed his obsession to Central City. As Super-Villain Heat Wave, he wore a protective costume and used flamethrowers to cause panic and destruction.

Defeated by The Flash, Rory joined a growing group of local costumed criminals: the Rogues. When Captain Cold tried giving them all metahuman powers using a genome recorder, a horrific accident left Rory hideously burned, but able to hurl flames from his chest. Despite often seeking to cure his fiery addiction, Heat Wave remained a loyal Rogue, fighting alongside his allies against the Crime Syndicate and as mercenaries hired to hunt down The Flash. Rory only rebelled after his leader accepted the dark gifts of reality-revising Perpetua. As "King Cold" overwhelmed Central City, Heat Wave joined Golden Glider, Weather Wizard, Mirror Master, and a team of Flashes to defeat him.

AN INCENDIARY TEMPER When Heat Wave gets angry, he can engulf buildings in flames. In this instance, drinkers at the Keystone Saloon were rescued just in time by The Flash (Barry Allen).

FAN OF FLAMES As a pyrokinetic, Heat Wave generates flames from an opening in his chest. He wears protective goggles and armor.

ON THE RECORD

Heat Wave originally made a costume of asbestos (before the dangers of asbestos were known) to protect himself from his flamethrower and the fire it created. During his first appearance he teamed up with Captain Cold to attack The Flash, but the two villains fell out when they realized they were both attracted to a local television personality named Dream Girl.

He also temporarily went straight and helped The Flash catch a corrupt parole officer using his Heat Wave costume and weaponry. It wasn't long though before he was back to his villainous fiery ways.

FIREARMED AND DANGEROUS Heat Wave wore a flame-retardant suit and used a Heat Gun—a re-purposed flamethrower—with which he could create firestorms and raise the ambient temperature of his surroundings.

Becky Sharpe was the granddaughter of Steven Sharpe, an infamous hustler known as the Gambler and a member of the original Injustice Society. Despite his

skills, Steven lost all his money gambling at the Taj Mahal casino in Las Vegas, which had rigged the games in their favor. Haunted by the loss, he killed himself shortly after.

When Becky learned of this, she swore to avenge her grandfather. She gained psionic powers and a set of mystical dice that enabled her to give good or bad luck to others. Calling herself Hazard, she joined the Wizard's Injustice Unlimited group after being told the group would not kill, and coerced Wildcat II and Tasmanian Devil into helping her bankrupt the casino that had caused her grandfather's death. As a member of Injustice Unlimited, she fought Infinity, Inc. and the Global Guardians. She left the group when she realized her teammates were willing to kill after all.

Roderick Rose, an expert entomologist, became a superhuman after exposure to a mutating agent gave him a thick exoskeleton, super-human strength, and the ability to

leap like a grasshopper. Calling himself Hellgrammite after a type of fly larva, Rose fought Super Heroes including Batman and Green Arrow, and discovered that he could transform other humans into subservient, larval versions of himself.

A deal with the demon Neron gave Hellgrammite enhanced powers and he became fixated on the most powerful Super Hero of all: Superman. He joined Bloodsport, Riot, and other villains to gang up on the Man of Steel when he reappeared after *Infinite Crisis*, but they failed in their mission. Hellgrammite was subsequently defeated by Donna Troy, following the destruction of Star City at the hands of his ally, Prometheus.

Malcolm Duncan grew up in Harlem, New York. When his sister Cindy was harassed by a racist street gang, Mal attacked them and was assisted by the Teen Titans in their civilian identities. "Mal" joined the team, but, possessing no superpowers, he felt like an ineffectual outsider.

This changed when Mal became the Herald after Karen Beecher (Bumblebee) helped him build the teleporting device, Gabriel's Horn. During *Infinite Crisis*, he suffered an accident in space that left him unable to speak. After accepting a cybernetic voice box similar to Gabriel's Horn, he joined Doom Patrol as Vox.

Following reality alterations, Mal's history changed. Although a former Teen Titan who had battled the Fearsome Five and Mister Twister, Duncan preferred the life of a retired Super Hero, new father and successful composer. However, when his wife Karen developed powers and had her memories stolen, Duncan assembled a battlesuit and

HELSPONT

DEBUT *WildC.A.T.s* #1 (Aug. 1992)**HEIGHT** 6ft 9in**WEIGHT** 375 lbs**POWERS/ABILITIES** Healing factor, chronokinesis, shapeshifting, phasing, possession of others' bodies.**ENEMIES** Superman**AFFILIATIONS** Daemonites

A legendary all-conquering warlord, Helspont ruthlessly expanded Daemonite hegemony over countless planets and peoples, but his ever-escalating exploits drove jealous rivals to unite in a plot to betray him. Helspont was defeated and imprisoned within the Eye—a giant starship that would later become the headquarters of covert planetary defense squad Stormwatch. When Harry Tanner, Stormwatch's Eminence of Blades, inadvertently destroyed the Eye, wreckage rained down upon Earth—including Helspont's cell, which crashed down in the Himalayas. Here, the liberated Daemonite lord established a new base, seeking to recreate his former dominance.

His activities drew the attention of Superman, who fiercely engaged Helspont in battle. The Daemonite overpowered the Kryptonian and tried to win him over as an ally, claiming they were both too good for the people they had tried to help—and advised Superman would eventually be betrayed just as he had been.

Helspont offered to ignore Earth if the Man of Steel assisted him in exacting vengeance on the treacherous Daemonites. Superman, of course, refused, sparking an inconclusive battle that raged across the mountains and only ended when Helspont teleported away, doubtless to pursue his vengeful ambitions by other means.

ON THE RECORD

Helspont first appeared as a foe of the WildC.A.T.s—a team of human-alien hybrids founded by Kheran Lord Emp to counter Daemonite infiltration of Earth. The alien and the militant hero Mr. Majestic obsessively despised each other, and it was Mr. Majestic who thought he had destroyed Helspont forever in a battle over a doomsday machine called the Planet Shaper.

C.A.T. FIGHT

Helspont and Mr. Majestic squared off after the WildC.A.T.s discovered his plans to unleash the world-destroying Planet Shaper.

POWERS/ABILITIES Immortality; super-strength.

ALLIES Wonder Woman

ENEMIES Giant-Born

AFFILIATIONS Olympian Gods

Hercules (or Heracles) is the champion of Greek myth and son of Zeus, king of the Olympian Gods. After performing legendary labors during the era of antiquity and clashing with the ancient Amazons, Hercules vanished from history for centuries. He was not even seen during the fearsome battle for the throne of Olympus after Zeus disappeared. It was revealed much later that Hercules had helped Atlan, the ancient king of Atlantis, battle and imprison the monstrous beings known as the Giant-Born. His efforts saved Atlantis, but he was betrayed by Atlan and imprisoned with the Giant-Born in Hell.

The Giant-Born eventually warped Hercules' mind and transformed him into a weapon at their disposal. When they were released from Hell to attack Atlantis once again, Hercules was an instrument of their vengeance. He fought Aquaman and Mera before Aquaman called in Wonder Woman to save Atlantis once more and restore Hercules to his senses.

RUNNING AMOK

Hercules, out to avenge his ancient betrayal by the king of Atlantis, vents his rage on Aquaman.

HEIGHT Unknown

WEIGHT Unknown

HAIR Auburn **EYES** Blue

POWERS/ABILITIES A range of mystical powers via the objects in Jinny's trunk.

ALLIES Teen Lantern, Naomi, Wonder Twins, Batwoman

ENEMIES Dr. Glory, Lex Luthor, Hex

AFFILIATIONS Young Justice

Jinny Hex came from Dripping Springs, Texas, and was the great-great-granddaughter of legendary Old West bounty hunter Jonah Hex. However, Jinny knew nothing of her heritage until her dying mother passed on the family heirloom—an antique trunk full of mystical artifacts.

Concerned about having such powerful objects in her possession, Jinny loaded the trunk onto her truck and set off for Metropolis, where she became part of the Young Justice team.

Jinny first discovered the potential of the contents of her trunk on Earth-3 with Young Justice while they fought evil versions of themselves. She could not only massively increase in size, but also replicate herself. Finally she—and her teammates—could see how she would compete in a Multiverse full of superpowered beings.

GUNS BLAZING

Jonah Hex doesn't usually go for subtlety. He fires his two six-guns until there's no one left to fire back.

DEBUT *All-Star Western* (Vol. 1) #10 (Feb.-Mar. 1972)

REAL NAME Jonah Woodson Hex **BASE** American Old West frontier

HEIGHT 5ft 11in **WEIGHT** 189 lbs **HAIR** Red **EYES** Blue

POWERS/ABILITIES Uncanny marksman, skilled with a tomahawk; indomitable courage; fierce strength of conviction.

ALLIES Amadeus Arkham, Bat Lash, Tallulah Black, El Diablo (I), Batman

ENEMIES Quentin Turnbull, Court of Owls, El Papagayo, Vandal Savage

WET WORK Jonah Hex and Amadeus Arkham took a shortcut through a strangely familiar cave when they investigated the deadly Court of Owls.

Jonah Hex's life was blighted by misfortune.

Born in 1839, the son of a brutal drunk, Jonah was abandoned by his mother and sold to Apaches by his father. Raised an Native American until jealous rival, Noh-Tante, betrayed him, Hex returned to the white world and, despite hating slavery, fought for the Confederacy in the Civil War.

Afterwards, he sought out childhood sweetheart White Fawn and killed Noh-Tante. His punishment was scarification with a burning tomahawk. As a bounty hunter, Hex was hired by Amadeus Arkham to catch serial killer the Gotham Butcher. This uncovered two secret societies: The Court of Owls and devotees of the Crime Bible. Exploiting the rivalry between the groups, Hex and Arkham defeated the Crime Bible acolytes, forging a friendship with Alan Wayne, who funded the first Arkham Asylum.

When an adventure with a time-traveling Booster Gold went awry, Jonah appeared in the 21st century, meeting Superman and Swamp Thing, before having his face reconstructed. Gold then returned Hex to his own time period, where he killed a man impersonating his scarred self before starting a new life at sea with fellow bounty killer Tallulah Black.

In modern times Hex's legacy lives on through great-great-granddaughter Jinny Hex, who inherited his guts, determination, and strongbox, containing all the magical and super-scientific weapons Jonah confiscated in his incredible career.

ON THE RECORD

In his previous incarnation, Jonah Hex became a feared bounty hunter and fathered a child with a woman named Mei Ling. She left him after he broke a promise to give up his violent ways.

His most outlandish adventure was a time-traveling odyssey in which he teamed up with a future Batman to battle the crime syndicate known as the Combine.

Hex was finally killed by a bank robber and his taxidermied body was displayed in a New York City amusement park. He was later reanimated as part of the Black Lantern Corps, but returned to death following Hal Jordan's triumph over Nekron.

DEAD OR ALIVE Jonah Hex, bounty hunter, has often had a hefty reward placed on his own head.

HIGHFATHER

DEBUT *New Gods* (Vol. 1) #1 (Feb.-Mar. 1971)

REAL NAME Izaya **BASE** New Genesis

HEIGHT 6ft 4in **WEIGHT** 277 lbs **EYES** Blue **HAIR** Black/White

POWERS/ABILITIES As a New God, Highfather is immortal and has superhuman mental and physical abilities; finely attuned to disturbances in the cosmic Source; skilled warrior, strategist and tactician.

ALLIES Metron, Himon, Orion, Divine Guards, Council of Eight

ENEMIES Darkseid, all Lantern Corps

AFFILIATIONS New Gods of New Genesis, Quintessence

Izaya was born millennia ago on the planet Genesis.

He was the son of Yuga Khan, one of the merciless Old Gods who ruled that world. Izaya was peaceful, but his brother Uxas despised the Old Gods and began a war. Uxas defeated the Old Gods and stole their power to become New God Darkseid. A dying Old God bequeathed his energies to Izaya, also making him a New God. Izaya suggested he and his brother create a peaceful world, but Darkseid destroyed Genesis and the two went their separate ways.

Izaya built floating city New Genesis, but it was constantly besieged by his brother's forces. The Source Shard advised Izaya that, for peace, he must exchange his son, Scott, for Darkseid's scion, Orion. Torn between emotion and duty, Izaya chose duty. His conscience departed in the form of Infinity Man and Izaya became the authoritarian Highfather. Obsessed with defeating Darkseid, he fought the Green Lanterns in the hope of taking their power. The war left New Genesis in ruins, and Highfather, realizing his folly, rediscovered compassion.

As the Multiverse descended into chaos, Highfather became one of the divine Quintessence, safeguarding life and order, but he decreed New God neutrality when the Green Lanterns sought aid to end the threat of the Controllers and Darkstars.

ON THE RECORD

In pre-Flashpoint reality, Izaya was not Uxas' brother, but a warlord from the planet of New Genesis. Darkseid had Izaya's wife Avia killed, provoking New Genesis into attacking Apokolips.

Disillusioned by the bloody conflict, Izaya found the mysterious secret of the Source and became the peaceful, benevolent Highfather, securing a treaty with Apokolips. Highfather was slain by the war-god Ares, and the human, Takion, took his place as leader of New Genesis.

WAR AND PEACE Highfather's commitment to peace transformed New Genesis society and inspired Super Heroes across the universe.

HIMON

DEBUT *Mister Miracle* (Vol. 1) #9

(Jul.-Aug. 1972)

BASE Academy of Higher Conscience

HEIGHT 5ft 8in

WEIGHT 163 lbs

EYES Blue

HAIR Gray

POWERS/ABILITIES A New God, Himon is immortal, and physically and mentally superior to a human; a master of New Genesis technology.

ENEMIES Darkseid

Himon was the headmaster at the Academy of Higher consciousness on New Genesis. He educated young minds and indoctrinated them with the philosophies of

Highfather, New Genesis' ruler. His by-the-book approach did not sit well with his more laid-back subordinates, including Big Bear. Himon tried to stop the Forever People from going to Earth to join Big Bear by giving them a faulty Mother Box, but Vykin made it work.

On Earth, the team encountered Infinity Man, an opponent of Highfather's benevolent autocracy. Himon sent Vykin's girlfriend Serafina to retrieve the Forever People and lied to Highfather about what had happened, knowing that news of the Infinity Man would disturb him. The Infinity Man then appeared out of a Boom Tube and warned Himon off interfering with his plans.

HIPPOLYTA

DEBUT *All-Star Comics* #8 (Dec. 1941-Jan. 1942)

REAL NAME Hippolyta **BASE** Paradise Island

HEIGHT 5ft 9in **WEIGHT** 150 lbs **EYES** Blue **HAIR** Blonde

POWERS/ABILITIES As an Amazon of Themyscira, has received divine blessings that bestow enhanced physical and mental capabilities.

ALLIES Wonder Woman, Zeus, Demon Knights

ENEMIES Hera, Cain, Strife

AFFILIATIONS Amazons of Themyscira

Queen Hippolyta ruled the Amazons of Paradise Island for many centuries. One night, Hippolyta encountered the god Zeus in the form of a spear-wielding warrior. They dueled, and the god seduced her with his martial skills. Hippolyta later gave birth to Princess Diana (Wonder Woman), but fearing the wrath of Zeus' wife Hera, she claimed that she had shaped Diana from clay, which was then brought to life by divine means.

When Diana was fully grown she ventured into the world beyond Themyscira and returned with a woman named Zola, who was pregnant with another of Zeus' children. This drew Hera to Paradise Island and Hippolyta apologized for her involvement with Hera's husband, offering her life as recompense. Hera refused the offer; instead, she transformed the queen into a clay statue and the Amazons into snakes. Although her subjects were soon restored, Hippolyta herself was dissolved in a storm and she became one with the island.

ON THE RECORD

Before Flashpoint, the Amazons were created when the Olympian goddesses fashioned new living bodies from seabed clay for the souls of women who had been slain by men. Hippolyta was the first to swim to the surface, so she became queen. Hippolyta was fiercely protective of her daughter Diana (Wonder Woman), but could not prevent her being killed by Neron. Hippolyta then took on the role of Wonder Woman herself, becoming a member of the Justice Society of America. She died battling the alien Imperiox.

AMAZON QUEEN Hippolyta ruled Themyscira for many centuries, dealing both with mythical threats and the encroachment of modernity.

HITMAN

DEBUT *Demon Annual* (Vol. 3) #2 (1993)

REAL NAME Tommy Monaghan

BASE Noonan's Bar, Gotham City

HEIGHT 6ft **WEIGHT** 185 lbs

EYES Black **HAIR** Black

POWERS/ABILITIES Telepathy; night vision; expert marksman and street fighter.

ALLIES Natt the Hat, Section 8, Superman

ENEMIES Dubelz crime family, Glonth, the Mawzir, the Arkanonne, Mr. Truman

Irish-American Tommy Monaghan was raised in an orphanage and served with honor in the Marine Corps during Operation Desert Storm. He then became

Hitman, though he would never kill targets unless they "deserved it." While Hitman was stalking mobster Robert Dubelz, he was infected by the alien parasite Glonth.

The alien's attack gave Hitman useful combat powers of telepathy and night vision that attracted the attention of the Arkannone, Hell's Lords of the Gun. When Hitman refused to join up with them, they attacked him, but he gunned them down with help from the demon Etrigan.

Tommy repeatedly came into conflict with CIA agent Mr. Truman, and when Truman launched an all-out attack on him at Noonan's Bar, Tommy went down in a blaze of glory, taking Truman with him.

HOURLMAN

DEBUT *Adventure Comics* #48 (Mar. 1940)

REAL NAME Rex "Tick-Tock" Tyler **BASE** New Gotham City

EYES Brown **HAIR** Brown

POWERS/ABILITIES Miraclo pill gives incredible strength, speed, and durability for one hour, but early formulations are addictive and later ones cause deadly side-effects.

ALLIES Sandman (Wesley Dodds), Starman (Ted Knight), Doctor Fate (Kent Nelson)

ENEMIES Doctor Glisten, Johnny Sorrow

AFFILIATIONS Justice Society of America, Justice Legion A

POWER BOOST
Miraclo gave Rick Tyler the might to take on Earth-2's Superman (Val-Zod).

Rex's son, Rick, initially spurned his father's legacy, but during *Crisis on Infinite Earths* he donned an Hourman costume and took Miraclo to save lives. Rick was one of many second-generation heroes in a new JSA but, like his father, he also suffered from Miraclo addiction. His formula was appropriated by factions of the US military and Colonel Maria Jonas, resulting in the creation of walking WMD codename Damage. Rex Tyler and the JSA were excised from history by Doctor Manhattan, but returned to reality to battle the Legion of Doom with the Justice League and future champions Justice Legion A.

Several heroes have taken the codename Hourman. The first was brilliant chemist Rex Tyler, who invented a vitamin he called Miraclo. It gave Rex superpowers—but only for one hour. Donning a distinctive caped-and-hooded costume, Rex was a founding member of the Justice Society of America. Unfortunately, he became addicted to Miraclo and was unable to develop a non-addictive version. Rex was almost killed by time-warping villain Extant during *Zero Hour*, but android Hourman Matthew Tyler switched places to save him.

ON THE RECORD

The third Hourman was an 853rd-century android created by software derived from Rex Tyler's DNA. This Hourman used New Gods technology to travel back in time, meeting his predecessors and ultimately sacrificing himself so Rex Tyler could live again. Following the time manipulations of Doctor Manhattan, and the reality alterations caused by the liberation of Multiversal originator Perpetua, the artificial Hourman returned. Once again he met Rex Tyler for the first time and assisted the Justice Society, Justice League, and Justice Legion A in the war against the Legion of Doom.

ON THE RECORD

After *Flashpoint*, Hourman was a hero of Earth-2. Rick Tyler's father invented the Miraclo serum before it was stolen by Thomas Wayne, forcing the distraught son to become Hourman to reclaim his birthright. With Impossible, Johnny Sorrow, and Anarky, he clashed with Earth-2's Batman, The Flash, and Superman.

When Hourman was stripped of his Miraclo, evil entrepreneur Kyle Nimbus supplied a version laced with mind-control chemicals. Under its influence, Hourman attacked Batman (Dick Grayson), but was incapacitated with reformulated Miraclo. He joined the Wonders of the World Super Hero team, embracing the opportunity to fight for a worthy cause.

THE TIMES THEY ARE A-CHANGIN'
Like the march of time itself, the Hourman legacy has continued through the centuries.

- 1 Hourman I (Rex Tyler)
- 2 Hourman II (Rick Tyler)
- 3 Hourman III (Matthew Tyler)

HUMAN DEFENSE CORPS

DEBUT *Human Defense Corps* #1 (Jul. 2003)

BASE Area 53 (underwater), Fort Olympus (satellite)

NOTABLE MEMBERS Sergeant

Montgomery Kelly; Private Chad Kiyahani; Colin Mitchell Specialist; Charlie Graham Chaplain; Private Eric Stewart; Private David Page; Colonel Reno Rosetti; Dr. Zaius Ape biology researcher; Calcabrina "Pet" demon.

ALLIES US military, General Sam Lane

ENEMIES Neron, Calcabrina, Durlans, Khunds

During his brief term in office, President Luthor created the Human Defense Corps task force to counter alien threats, believing that the Justice League could not be relied on. The elite 10,000-man unit was equipped with cutting-edge gear, including advanced firearms, powered exoskeletons, amphibious assault aircraft, and S.A.R.G.E. remote-controlled scout vehicles.

In Bulgaria, the troops faced vampire forces and drove them off with "holy napalm" strikes. They followed up with an amphibious strike across the river Styx into Hell itself, where Sergeant Montgomery Kelly—who had demon ancestry—became a ruler.

The Corps was later integrated into Project 7734, an anti-alien task force run by General Sam Lane. It conducted actions against Kryptonians when the city of Kandor and its population arrived on Earth.

UNDER FIRE

No terrain or mission was off-limits for the Human defense Corps. One assignment even led the hi-tech operatives to invade Hell itself!

HUMAN TARGET

DEBUT *Action Comics* (Vol. 1) #419 (Dec. 1972)

REAL NAME Christopher Chance

BASE Boston, Massachusetts

EYES Blue **HAIR** Black

HEIGHT 6ft **WEIGHT** 180 lbs

POWERS/ABILITIES Master of disguise; actor; expert martial artist; superb athlete.

ALLIES Batman, Angel O'Day, Harvey Bullock, Jonny Double

ENEMIES Deadshot

When Christopher Chance was just a boy, a loan-shark sent a hit man to murder his father over a bad debt. The lad tried to stand in the killer's way, but could not

save his father. When Chance grew up, he became the Human Target—a bodyguard who specialized in impersonating clients marked for death. In his time, he has masqueraded as a rodeo rider, an elderly oil magnate, and a tightrope walker. Chance was even hired to impersonate Bruce Wayne while Batman was recovering from a vampire bite. The assassin Deadshot soon had the fake Wayne in his sights, and the Dark Knight had to go into action to save the Human Target's life. Asides from the risk of death, there is a big drawback to Chance's work: he has become so adept at imitating others that he has begun to lose his own identity.

POWERS/ABILITIES A magician of huge potential, prophesied to be the only person who can safely wield the Books of Magic.

ALLIES Justice League Dark

ENEMIES Felix Faust, Nick Necro, Dr. Mist

sought him out in London to teach him magic, but he was overwhelmed by the experience and chose to return to his mundane life.

However, when Justice League Dark tried to claim the books to stop them falling into the hands of the nefarious Felix Faust,

Tim helped to recover the arcane volumes. When he opened one of the books he was teleported to a dimension called the Wild Area. Its magical denizens told him that he was Hunter, the descendant of their long-lost mage-king, and that they had been conquered by the technology-wielding humans of Epoch. With assistance from his father, Tim helped to free the magic land and decided to remain there.

HUNTER, RIP

DEBUT *Showcase* #20 (May–Jun. 1959)

REAL NAME Classified (possibly Richard or Ripley Carter)

BASE Vanishing Point **EYES** Blue **HAIR** Brown

POWERS/ABILITIES Genius-level intellect, adept in physics, engineering, spatio-temporal mechanics and theory; skilled tactician and strategist; proficient in many martial arts and the use of ancient and future weaponry.

ALLIES Booster Gold, Michelle Carter, Skeets, Supernova, Waverider

ENEMIES The Time Stealers, Per Degaton, Mr. Mind, Ultra-Humanite

AFFILIATIONS Time Masters, Linear Men, Forgotten Heroes

Chronicling the history of a time-traveler is invariably tricky. Rip Hunter may be the same hero who served with temporal enforcers the Linear Men, helping unify parallel timelines during the *Crisis on Infinite Earths*. He could be an alternate incarnation from a parallel Earth or timeline that no longer exists. Whatever his origins, he certainly knows how to cover his tracks. The Rip Hunter who consistently interacts with Earth's modern Super Heroes also protects their history from manipulation by time-traveling villains.

Following the reality-shredding *Infinite Crisis*—which resulted in the creation of a new cosmology of 52 parallel realities—Hunter recruited 25th-century hero Booster Gold to save all of existence from the cosmic devourer Mr. Mind and bring stability to the new Multiverse. He and Booster later formed the core of a fluctuating team that countered plots by Despero, Per Degaton, Ultra-Humanite, Black Beetle, and others trying to rewrite history and warp reality. Even Booster was not immune to temptation: he tried to change history by preventing the murder of his friend Ted Kord. Eventually, though, Booster realized the scale of his selfish crime and reordered reality, proving himself worthy of the rank of Time Master. Rip later admitted that Booster would one day become his father.

Rip Hunter emerged largely unchanged from the reality-altering *Flashpoint* event. In the aftermath he sought out his father and met a different Booster Gold instead. They located Rip's future dad just as another chronal crisis began: a lethal *Convergence* in which past, present, and previously erased realities were thrown into conflict, involving every Super Hero from every possible point of existence.

MAN OF ACTION
Rip Hunter is a genius and master of temporal theory, but he is also a rough-and-tumble adventurer who has survived in dozens of dangerous epochs.

ON THE RECORD

The original Rip Hunter was a clean-cut scientist/adventurer who built his Time Spheres to uncover the secrets of history. With mechanic Jeff Smith, girlfriend Bonnie Baxter, and her little brother Corky, Rip traveled across Earth's past and future, encountering infamous individuals like Cleopatra, Kublai Khan, and Adolf Hitler along the way. They also encountered an immense number of alien races who had visited our world but who had been lost to history.

HISTORY LESSONS
Rip and his fellow Time Hunters soon learned to expect the unexpected when they ventured into a new era.

CLASSIC STORIES

Showcase #20 (May–Jun. 1959)

In their very first adventure, the original Rip Hunter and the first Time Masters team take a trip back into prehistory, where they battle dinosaurs and criminals.

Time Masters #1–8 (Feb.–Sep. 1990)

Rip Hunter's time-travel research makes him a target for Vandal Savage and the Illuminati. He and his fellow Time Masters uncover their conspiracy and battle them at key moments in history.

Time Masters: Vanishing Point
#1–5 (Sep. 2010–Feb. 2011)

Rip, Booster Gold, Green Lantern, and Superman team up with Batman, who has been cast adrift in time after battling Darkseid during the *Final Crisis*.

HUSH

DEBUT *Batman* (Vol. 1) #609 (Jan. 2003)

REAL NAME Thomas Elliot

BASE Gotham City

HEIGHT 6ft 3in **WEIGHT** 220 lbs

EYES Blue **HAIR** Red

POWERS/ABILITIES Tactical genius; expert surgeon; skilled marksman with a pistol; uses holograms to create decoys.

ALLIES Jason Bard, the Architect

ENEMIES Batman, the Batman Family, Spoiler

When Tommy Elliot was a child, he idolized his best friend Bruce Wayne. He even went so far as to kill his own parents so he would be an orphan just like Bruce. However, Bruce finally rejected Tommy when his friend began to impersonate him. Tommy became obsessed with destroying his former idol. Swathing his head in bandages, he became a sworn nemesis to both Bruce Wayne and Batman as the criminal surgeon and master criminal Hush.

After launching a campaign of bloody attacks on Batman and his loved ones, Hush vanished, but later resurfaced with a new plan to rip Batman's life apart. He framed Commissioner Jim Gordon for murder, injected Alfred with fear toxin, and triggered riots and terrorist attacks all over Gotham City. His masterstroke was destroying Arkham Asylum, which led to a mass breakout of inmates. Hush then blew up Batman's secret weapons cache underneath the city, causing the seizure of Wayne Industries' assets by the authorities. Batman finally captured Hush, but when an alliance of villains attacked Gotham City, Elliot escaped to deploy the Batcave's resources against the Batman Family. He was defeated by Alfred Pennyworth, but after a period of detention has returned, still seeking vengeance and validation, beside Bane and other Bat-foes.

BURNING RAGE
Hush's ultimate objective is to destroy Batman and everything he holds dear—including Gotham City.

ON THE RECORD

The pre-*Flashpoint* Hush was traumatized by an abusive childhood and plotted to kill his parents to get their money. He harbored a grudge against his childhood friend Bruce Wayne because of his wealth and status. As Hush, he plotted with the Riddler to destroy Batman through a series of attacks intended to break his body and spirit. In "Heart of Hush" he intensified his campaign of terror by literally stealing the heart of Batman's beloved Catwoman.

EQUAL AND OPPOSITE
Tommy Elliot would stop at nothing to assume every aspect of Bruce Wayne's life, including replacing him as Batman.

HUNTRESS, THE

DATA

DEBUT *All-Star Comics* #69 (Nov.-Dec. 1977)

REAL NAME Helena Bertinelli **HEIGHT** 5ft 11in **WEIGHT** 140 lbs

EYES Brown **HAIR** Black

POWERS/ABILITIES Extensive training in acrobatics, stealth, and martial arts; expert shot with a crossbow; highly trained espionage agent; ties to network of spies and information.

ALLIES Batgirl, Black Canary, Nightwing

ENEMIES Mr. Minos, Calculator, Blackbird

AFFILIATIONS Birds of Prey, Spyrall

As a child, Helena Bertinelli saw her mafia family gunned down before her eyes by the rival Cassamento crime family. While Helena played possum, her father, brother, and seemingly her mother were all killed. Helena was sent by her family's allies to Sicily, where her Uncle Claudio helped train her in archery and martial arts, astonished by her anger, aptitude, and dedication.

Eventually, Helena joined the international espionage group known as Spyrall as its Matron. She befriended Dick Grayson (Nightwing) when he became one of their agents, not realizing at first that Dick was there to infiltrate the organization and help shut it down. Under the leadership of Mr. Minos, Spyrall had become corrupt, and soon Helena teamed with Grayson to stop Minos. She adopted command and continued to root out even more wrongdoing. After parting ways with Spyrall, Helena returned to Gotham City. She became a hunter, killing mafia hitmen with her trusty crossbow. When she crossed paths with Batgirl and Black Canary, also known as the Birds of Prey, she reluctantly joined forces with them to hunt the mysterious mob boss Fenice, only to discover that Fenice was actually her mother. Maria Bertinelli previously had an affair with Santo Cassamento and had arranged the death of her husband. Unable to reconcile her love for her family with her mother's criminal activities, The Huntress put her mother and her father's killer behind bars, showing them a rare mercy. Later, Fenice was killed by the Calculator, causing The Huntress even more pain.

The longer she fights as one of the heroic Birds of Prey, the more Huntress has adjusted her methods accordingly. She is constantly inspired by her crime-fighting partners.

HUNTING TOGETHER
As an agent and then the head of Spyrall, Helena worked closely with Dick Grayson. The two even formed something of a romance.

ON THE RECORD

The original Huntress was Helena Wayne, the daughter of Earth-2's Bruce Wayne and Selina Kyle (Batman and Catwoman). A late addition to the Justice Society of America, Helena fought alongside Power Girl and Earth-2's Robin, also working in the same legal practice as Dick Grayson in her civilian life. After the Earth-2 Huntress died on *Crisis on Infinite Earths*, Helena Bertinelli was introduced to the universe left in the *Crisis*' wake. She was considered the violent black sheep of the Batman Family, even when she took the mantle of Batgirl during the *No Man's Land* crossover. After *Flashpoint*, The Huntress returned to her Earth-2 roots. Helena Wayne served as Bruce Wayne's Robin before, stranded on Earth-0, she became The Huntress.

CODE OF VENGEANCE
After her family was slaughtered, the post-*Crisis* Helena turned herself into a ruthless anti-Mob vigilante.

HUNTING IN STYLE

The Huntress was often seen speeding to a crime scene on her powerful motorcycle; one customized to match her Super Hero attire.

UNHOLY RAGE
While a devout Catholic, The Huntress is often at war with her inner rage, never fully recovering from the death of her family.

CLASSIC STORIES

DC Super Stars #17 (Nov.-Dec. 1977) The Huntress' origin is revealed for the first time, establishing her family history as the daughter of Earth-2's Batman.

The Huntress #1 (Apr. 1989) In her first solo title, Helena Bertinelli gains a new origin and fights the villain Omerta.

Batman/Huntress: Cry for Blood #1-6 (Jun.-Nov. 2000) The Huntress' search for redemption leads her to The Question and Richard Dragon.

IBAC

DEBUT *Captain Marvel Adventures* #8 (Mar. 1942)
BASE Kahndaq
EYES Black
HAIR Brown
POWERS/ABILITIES Skilled and ruthless as both a general and a warrior.
ALLIES Barbarian hordes
ENEMIES Black Adam

Almost 4,000 years ago, a Barbarian warlord known only as "Ibac the First" invaded the country of Kahndaq and enslaved its people. He forced them to build a mighty capital and erect temples to his gods. The people of Kahndaq rose up against him, but their rebellion was brutally put down by Ibac's hordes. Among the victims were the wife, children, and nephews of a man called Adam. The gods of Kahndaq gave Adam their power so that he could free his nation; he struck down Ibac's soldiers with lightning before turning the tyrant's body to stone.

The story of Ibac and Black Adam has become legend, but the statue of Ibac, contorted in his death throes, still stands in the capital as a warning to tyrants. Ironically, a dictatorial president, also named Ibac, now rules Kahndaq.

ICEMAIDEN

DEBUT *Super Friends* (Vol. 1) #9 (Dec. 1977)
REAL NAME Sigrid Nansen
EYES Blue **HAIR** White
POWERS/ABILITIES Cryokinesis—can control cold and ice, and create icy armor.
ENEMIES Delores Winters, Mist
AFFILIATIONS Global Guardians, Justice League, Justice League International

Sigrid Nansen's dedicated scientist mother forced her to take part in a series of experiments by the Norwegian government to replicate the powers of a mythical tribe of ice-people. The tests succeeded, giving Sigrid cryogenic powers, but also turning her skin blue. Sigrid was selected to join Dr. Mist's international Global Guardians team.

When Tora Olafsdotter (a genuine member of Norway's ice-people tribe) joined the Global Guardians as Ice, Sigrid felt outclassed and left. After Ice was killed by Overmaster, Icemaiden agreed to take her place in Justice League International. She was tricked into deserting the team by the villain Mist, who took her form to attack the JLI from within, killing Amazing Man, Blue Devil, and Crimson Fox. Sigrid was later captured by an organ-stealing operation run by Delores Winters, who grafted Icemaiden's skin onto herself, gaining her powers.

ICE

DEBUT *Justice League International* (Vol. 1) #12 (Apr. 1988)
REAL NAME Tora Olafsdotter
HEIGHT 5ft 7in **WEIGHT** 163 lbs
EYES Blue **HAIR** White
POWERS/ABILITIES Uses cryokinesis to hurl freezing blasts, create ice constructs, and fly on a levitating platform of ice.
ALLIES Fire (Beatriz Bonilla Da Costa), Green Lantern (Guy Gardner)
ENEMIES Peraxxus
AFFILIATIONS Justice League International, Birds of Prey, Global Guardians

Born with cryogenic powers, Norwegian Tora Olafsdotter decided to leave her native country to pursue a Super Hero career as Ice. She soon formed a close friendship with fellow heroine Fire, and dated the temperamental Green Lantern Guy Gardner.

Ice was selected as the Scandinavian member for the UN-sponsored Justice League International team. On their first mission to Peru, she was caught in a thermal blast from a giant alien robot, forcing the team to retreat. The JLI subsequently confronted the robot's master, the alien resource-plunderer Peraxxus, and drove him away. Later, while the JLI were onstage at a publicity event, a bomb exploded. Team member Rocket Red was killed and Ice was seriously injured, requiring emergency surgery.

After recovering, Ice did not rejoin Justice League International. She sought to repair her tempestuous relationship with Gardner, but the traumas of her heroic life weighed upon her and she admitted herself to Sanctuary—a top-secret mental health facility in Kansas created by Superman, Batman, and Wonder Woman. She was peripherally involved in the facility's greatest crisis—a mass killing by time-displaced patient Wally West (the original Kid Flash). Her treatment at a new facility ongoing.

CHILLING OUT
 Ice's cryogenic powers gave her many options in combat, allowing her to freeze enemies, generate ice barriers, or create slides for rapid action.

OPPOSITES ATTRACT
 Ice's fiery romance with hot-headed Red Lantern Guy Gardner was a constant cycle of break-up and make-up.

ON THE RECORD

Pre-Flashpoint, Ice was princess of an isolated tribe of ice-people who possessed cold-based powers. She left her people to join the Global Guardians and then Justice League International. Ice was seemingly killed by the villain Overmaster, but her cryogenically preserved body was found by the Birds of Prey. She recovered, but was traumatized by the experience and unleashed a mighty ice storm endangering everyone. Finally coming to her senses—after a firm slap from The Huntress—she left with the Birds of Prey for a new life.

CHILD OF THE NORTH
 Ice originally served as a representative of Norway in the Global Guardians, but soon found her own identity as a hero.

ICICLE

DEBUT *Infinity Inc.* (Vol. 1) #34 (Jan. 1987)

REAL NAME Cameron Mahkent

HEIGHT 5ft 11in **WEIGHT** 175 lbs **EYES** White **HAIR** None

POWERS/ABILITIES Ice-control and ice-generation powers. His body appears to be made of living ice and can alter shape as required.

ALLIES Bellachek Temple

ENEMIES Green Team, Nightwing

Ruthless and sadistic career criminal Cameron Mahkent was given ice-generation powers by mega-wealthy Bellachek Temple. The mysterious mogul gave Icicle a special assignment: guarding a meteor while it was stripped of minerals by nanobots, and then crash it into southern California. This would potentially kill millions, but Icicle did not care so long as he was well paid. When rich-kid Super Heroes the Green Team investigated the meteor, Icicle froze their craft, causing it to crash-land. He similarly incapacitated the nano-armor of team leader Commodore Murphy, and ruptured the ship with expanding ice. Icicle seemingly outmatched the Green Team using an array of ice-weapons, but ultimately they caused an explosion that tore the meteor in half and marooned Icicle in space. His fate remains unknown.

FROZEN SOLID

Icicle used his power to down the Green Team's spacecraft on Bellachek Temple's asteroid.

CHILLS AND THRILLS

Icicle displayed a sadistic glee when he got the chance to use his icy abilities against the Green Team.

ON THE RECORD

Pre-Flashpoint, Cameron Mahkent was the son of the original villainous Icicle, Joar Mahkent, who debuted in *All-American Comics* (Vol. 1) #90 (Oct. 1947). His powers were innate, as his DNA had been altered by exposure to his father's cold-projector. He served in the Injustice Society and joined the Secret Society of Super-Villains during *Infinite Crisis*. While in the Injustice Society, he met Tigress, and they later had a daughter.

COLD-BLOODED

Cameron Mahkent inherited his powers (and morality) from his father, and carried on the family tradition by becoming a Super-Villain.

IGNITION

DEBUT *Adventures of Superman* (Vol. 1) #582 (Sep. 2000)

HEIGHT 7ft 5in **WEIGHT** 568 lbs

POWERS/ABILITIES Suit provides heavy armor protection, immense strength, flight, and energy projection powers.

ALLIES Emperor Joker

ENEMIES Superman

AFFILIATIONS The Joker's League of Anarchy, Zod Squad

Superman first encountered Ignition on a bizarre version of Earth that The Joker created after stealing Mr. Mxyzptlk's reality-warping powers. A hulking

juggernaut, Ignition was a member of The Joker's League of Anarchy in the city of Meflopolis. However, The Joker later denied creating him, hinting that Ignition may have actually come from the real universe.

Superman assumed that Ignition vanished when The Joker's mad realm did, so he was shocked when the armored villain reappeared as part of Zod's conquering army in the former Soviet nation of Pokolistan. Ignition was assigned to protect the solar converter arrays Zod was using to change the Sun's color from yellow to red. Metallo attacked the arrays, overwhelming Ignition and wiping out the converters. After the Man of Steel defeated Zod, Ignition disappeared.

IMPULSE

DEBUT *The Flash* (Vol. 2) #92 (Jul. 1994)

REAL NAME Bart Allen

BASE Central City

HEIGHT Unknown **WEIGHT** Unknown

EYES Yellow **HAIR** Auburn

POWERS/ABILITIES Super-speed

ALLIES Superboy (Conner Kent), Tim Drake, Wonder Girl (Cassie Sandsmark)

ENEMIES Reverse-Flash, Lex Luthor, Dr. Glory

AFFILIATIONS The Flash Family, Young Justice

Bart Allen was Impulse, a speedster from the 31st century who was the grandson of The Flash (Barry Allen) and Iris West. Like his grandfather, he had incredible powers derived from the Speed Force, including the ability to travel in time. He used this to travel to the 21st century to learn how to control his powers from the speedsters of the era.

Although Bart became an important member of both The Flash Family and the Young Justice team, a Multiverse-altering crisis occurred while he was trapped in the Speed Force, resulting in most of his teammates forgetting him and their shared history. Released when the Force Barrier was broken, Bart sought out his friends and family. He discovered that Superboy (Conner Kent) was missing and he scoured the Multiverse for his friend until he found him.

He later confided to Superboy that he had moved through the timestreams so much that he no longer had any idea which reality was his own, or even how old he was—a fact that was not helped by his super-fast metabolism. However, getting Young Justice back together made him feel more grounded, and a talk with Barry Allen helped him to focus on living in the moment he was in.

THE FLASH FROM THE FUTURE Impulse was a fast-talking, curious teenager much beloved by friends and family, and his incredible Speed Force powers made him a valuable addition to any team.

REAL NAME Klarn Arg

POWERS/ABILITIES Reincarnation, flight, telekinesis, fires flaming eye blasts.

ALLIES Caden Park, Council of Immortals, the Immortal Men, Roderick Cavanaugh

ENEMIES The Infinite Woman, Vandal Savage, Barbatos, House of Conquest, Batman Who Laughs, the Hunt, the Kill

AFFILIATIONS Bear Clan, Forgotten Heroes

Fifty thousand years ago, Klarn Arg defended his people from vicious rival Vandal Adg, aka Vandal Savage. When Klarn and his four Bear Clan siblings

confronted Vandal over a fallen meteor, they gained power, immortality, and the ability to create metahumans. For millennia, they nurtured humanity, with five Houses. Klarn's House of Action made heroes who operated from the shadows. His sister Kyra created the House of Conflict, honing humanity's killer instincts.

Kyra grew apart from her kin and by the 21st century she was their biggest threat. When her agents killed Klarn, his legacy was only preserved by psychic Caden Park and Immortal champions Ghost Fist, Reload, Stray and Timber. However, Klarn was a brilliant planner. Could he have anticipated his own end and found a way to return?

IMPERIEX

DEBUT *Superman* (Vol. 2) #153 (Feb. 2000)

HEIGHT 6ft 7in **WEIGHT** 986 lbs

EYES Red **HAIR** None

POWERS/ABILITIES Manipulates entropy; incomprehensible strength and durability; black hole generation; universe destruction.

ENEMIES Superman, President Lex Luthor, Mongul, Brainiac 13, Darkseid

AFFILIATIONS Followers, Warworld

Imperiex is a conceptual entity: the sentient embodiment of entropy. Composed of pure energy, the "Destroyer of Galaxies" is the agent of decline and

obliteration, and precedes the first universe. Generally clad in robotic armor, its function is to eradicate each old, flawed universe and create—via a Big Bang—a new one, in the quest for a perfect universe.

Imperiex targeted Earth with drones, casually destroying all planets in its path as it drew closer. It was impeded by an unlikely coalition of heroes. With Luthor and Darkseid directing resistance against the Destroyer of Galaxies, Superman found himself losing many beloved comrades in the battle. These resisters trapped Imperix's consciousness inside Warworld and propelled it through a temporal Boom Tube to the beginning of time. Here it triggered its inevitable Big Bang and began the present universe.

INFINITY MAN

DEBUT *Forever People* (Vol. 1) #1

(Feb.–Mar. 1971)

BASE New Genesis

HEIGHT 6ft 4in

WEIGHT 247 lbs

POWERS/ABILITIES Flight, energy bursts, incredible strength, and durability.

ENEMIES Mantis, Himon

Infinity Man is the physical manifestation of all that was compassionate within Izaya, Lord of New Genesis. Infinity Man split away from Izaya, and what remained

became Highfather, who was committed to preserving peace and order rather than freedom. On a quest to redeem Highfather, Infinity Man chose five young New Gods—the Forever People—as his agents.

When the Forever People were attacked on Earth by the villain Mantis, their sentient Mother Box began to glow. They touched the Box and disappeared in a flash of light. They were replaced by the imposing Infinity Man, who drove off Mantis. After the Forever People awoke in an alley, Infinity Man appeared on nearby TV monitors. He told them that together they would fight for freedom from both the benevolent despotism of Highfather and the cruel oppression of his evil brother, Darkseid.

INDIGO TRIBE

DEBUT *Green Lantern* (Vol. 4) #25 (Jan. 2008)

BASE Nok

POWERS/ABILITIES Flight; teleportation; protective force-fields; aura projection; energy-casting; light-construct creation; close-range channeling of other colors of the Emotional Spectrum (all manipulated through power staffs augmented by their rings).

ALLIES Green Lantern Corps, Blue Lantern Corps

ENEMIES Sinestro, Black Hand, Third Army, Guardians of the Universe

AFFILIATIONS Natomo, New Guardians

The nomadic Indigo Tribe utilize the Emotional Spectrum's light of compassion, drawn from every living being in creation. The light is embodied by the patron entity Proselyte, who personifies the mantra "Rage grows from murder. Hope from Prayer. And at last, Compassion is offered to us all."

Indigo Lanterns are all former criminals—killers, or worse. But compassion's radiance suppressed their other emotions and compelled them to change. They are constantly re-examining their awful pasts, while acting in a benevolent, life-affirming manner. Their actions are unpredictable. The Tribe generally refrain from assertive action, preferring to intervene only as a last resort.

The arcane monk Natomo originally harnessed the light for Green Lantern Abin Sur. He foresaw that the Guardians of the Universe would eventually betray the Green Lantern Corps and become a threat to the whole of creation. Needing a force to counter the Guardians emotionless might, Sur believed success would come not through conflict but through rehabilitation.

The Indigo Tribe speak a language that is untranslatable by other beings or by green power rings. Their sworn oath is:

"Tor lorek san, bor nakka mur,
Natomo faan tornek wot ur.
Ter Lantern ker lo Abin Sur,
Taan lek lek nok—Fomorrow Sur!"

LAST RESORT

The aloof and enigmatic Indigo Tribe only appear to intervene when life itself is in the direst need and all other agencies have failed.

ON THE RECORD

The Indigo Tribe are the least understood of all the Lantern Corps. Though not pacifistic, they seem strictly reactive, preferring to distance themselves from conflict and advance their own agenda unless the universe itself is imperiled. Their staffs and rings negate the other colors of the Emotional Spectrum, even Black Lantern energies, which made them the deciding factor in overcoming the risen dead during the War of Light's *Blackest Night*.

RAINBOW WARRIORS

The rapacious, reawakened dead would have ultimately consumed all life had the Indigo nomads not finally joined and completed the universe's spectrum of champions.

INDIGO 1

DEBUT *Green Lantern* (Vol. 4) #25 (Jan. 2008)

REAL NAME Iroque

BASE Nok

EYES Indigo

HAIR Purple

POWERS/ABILITIES Leadership and fierce compassion; flight; teleportation; protective force-fields; aura projection; energy-casting; light-construct creation; channeling of other colors on the Emotional Spectrum (all manipulated through her power staff or ring).

ALLIES Hal Jordan, Kyle Rayner

ENEMIES Sinestro, Black Hand, Guardians of the Universe

AFFILIATIONS Indigo Tribe, Natomo, New Guardians

Iroque was a lethal villain who battled Green Lantern Abin Sur and considered her greatest triumph to be eliminating his daughter. Abin later brought Iroque to the former prison-planet Nok, where he had conspired with the aged cleric, Natomo, to construct a power battery that would utilize the rarest light of the Emotional Spectrum—indigo.

Iroque was forced to wear an indigo ring and was instantly overwhelmed by the horrific consequences of her past actions. She became driven to make amends and tirelessly began the slow process of recruiting others to the Indigo Tribe's cause. No one wears an indigo ring voluntarily and so Iroque had to ruthlessly coerce her disciples—drawn from the worst malefactors in existence—to become members of the growing Tribe. They patiently awaited the time foreseen by Abin Sur, when the Guardians would betray the universe and then the Indigo Tribe would be called to defend it.

Indigo 1's greatest achievement came after Nok's Central Power Battery was destroyed. Deprived of their rings' constant compassion, the rest of the tribe reverted to the monsters they had once been. Iroque, however, had permanently changed, experiencing genuine remorse, which enabled Natomo to reconstruct the battery and continue the crusade.

ON THE RECORD

Indigo 1 always pursued undisclosed aims, dictated solely by her innate compassion. After Sinestro was forcibly returned to the ranks of the Green Lanterns, he was abducted by Nok and forced to wear an indigo power ring.

Sinestro's spiritual redemption took immediate effect and was only halted by the sudden destruction of the Indigo Tribe's Central Power Battery. If not for this, Iroque might have been able to rehabilitate one of the universe's greatest threats.

FALLEN HERO
Iroque's determined persuasions dug deep into Sinestro's black soul and reached the noble champion he used to be.

ON THE RECORD

Following a failed Earth invasion by a coalition of alien civilizations, some Dominion, Durlan, Khundish, Thanagarian, and other defeated participants infiltrated America's government. Covertly establishing a testing site in the Midwest, they experimented on human children to gain the secrets of the metagene. Their schemes were thwarted by their own rejected guinea pigs whose survivors united into a very different, dangerous, and unpredictable

"Inferior Five." The results of their ultimate emancipation were no laughing matter...

POLITENESS COUNTS
Crime and injustice had little to fear when the Inferior Five suited up for action.

INFERIOR FIVE

DEBUT *Showcase* #62 (May-Jun. 1966)

BASE Megalopolis

MEMBERS/POWERS **Merryman:** Smart but puny; **White Feather:** Omniphobic archer; **Dumb Bunny:** Super-strong and hyper dense; **Awkward Man:** Super-strong, invulnerable, but super-clumsy; **The Blimp:** Floats in air, but lacks propulsive force.

ALLIES Police Chief Geronimo

ENEMIES Man-Mountain, Masked Swastika, Sparrow, Speed Demon, Silver Sorceress

AFFILIATIONS Freedom Brigade, Captain Carrot and the Zoo Crew

The Inferior Five are the saddest legacy heroes in creation. Children of World War II's legendary Freedom Brigade, they were each pressured by their doting parents into forming a new anti-evil alliance, despite an utter lack of dedication or even the remotest interest in crime-busting. Although their combined skills and super-abilities are impressive—especially Leander Brent/Awkward Man's capacity for accident-induced collateral damage—their motivations for taking up costumed crusading are simply nonexistent.

Comic book artist Myron Victor would far rather draw Super-Villains than fight one as Merryman, while Herman (Blimp) Cramer only wants to create meals in his little diner. Photographer William (White Feather) King is even afraid of the models he photographs, except for sweet and very, very simple Athena (Dumb Bunny), but he is even more scared of admitting that to his dad.

Against all odds, the quivering quintet have beaten a remarkable number of sinister adversaries—usually by sheer luck, as much as concerted effort—and have made their families proud. However, they still regard any day in which they keep their civilian clothes on and their dignity intact as a major victory.

DEBUT *All-Star Squadron* (Vol. 1) #25 (Sep. 1983)

NOTABLE MEMBERS/POWERS (ORIGINAL TEAM)

Star-Spangled Kid (Sylvester Pemberton): Cosmic converter belt; **Fury** (Lyta Trevor): Super-strong, immune to magic; **Jade** (Jennifer-Lynn Hayden): Green Lantern; **Nuklon** (Albert Rothstein): Density control; **Power Girl** (Kara Zor-L): Kryptonian; **Brainwave, Jr.** (Hank King, Jr.): Psychic powers; **Northwind** (Norda Cantrell): Flight, magic; **Mr. Bones**: Cyanide touch; **Silver Scarab** (Hector Hall): Flight; **Wildcat** (Yolanda Montez): Exceptional agility and claws.

NOTABLE MEMBERS/POWERS (LUTHOR'S TEAM)

Steel (John Henry Irons): Powered armor, kinetic hammer; **Vaporlock** (Natasha Irons): Flight, magic; **Amazing Woman** (Erik Storn): Gender transformation; **Vanilla** (Mercy Graves): Weapons expert, superb fighter; **Nuklon** (Gerome McKenna): Self-duplication.

ENEMIES Ultra-Humanite, Solomon Grundy, Dr. Benjamin Love

Infinity, Inc. started as a junior counterpart to the Justice Society of America. When four young heroes were denied membership in the JSA, the Star-Spangled Kid (Sylvester Pemberton) proposed that they start their own team, and Infinity, Inc. was born. Transported back to World War II, the teens were manipulated into turning against the Justice Society.

It was an inauspicious beginning, but the team went on to have a series of more successful adventures, and quickly earned the respect of their seniors.

When Infinity, Inc. clashed with mad scientist Dr. Benjamin Love, they also recruited two of his test subjects, Mr. Bones and Wildcat (Yolanda Montez). However, this would ultimately lead to tragedy. While fighting Solomon Grundy, Mr. Bones was hurled into Skyman (as the Star-Spangled Kid now called himself) and accidentally killed him with his cyanide touch. Devastated by the loss of their leader, the team broke up.

The Infinity, Inc. name was later used by heroes who had largely acquired their powers from Lex Luthor's Everyman Project. Dubbed "Luthor's Own Justice League" by the media, the new Infinity, Inc. were a publicity coup for LexCorp and a defense against rogue metahumans created by it. The team was led by Steel and included Vaporlock, Amazing Woman, Nuklon, Everyman, Vanilla, and the new Skyman.

INJUSTICE GANG

DEBUT *Justice League of America* (Vol. 1) #111 (May-Jun. 1974)

(Libra team); *JLA* (Vol. 1) #9 (Sep. 1977) (Luthor team)

MEMBERS/POWERS (LIBRA TEAM) Libra

(Justin Ballantine): Superpower absorption; **Chronos** (David Clinton): Time manipulation; **Mirror Master** (Sam Scudder): Laser blasts; **Scarecrow** (Dr. Jonathan Crane): Fear toxins; **Poison Ivy** (Pamela Isley): Plant control, poisons; **Shadow-Thief** (Carl Sands): Shifts into shadow state; **Tattooed Man** (Abel Tarrant): Living tattoos.

MEMBERS/POWERS (LUTHOR TEAM) The Joker: The Joker venom, deadly gadgets; **Doctor Light** (Arthur Light): Light powers, energy projection and absorption; **Mirror Master** (Evan McCulloch): Mirror dimensional travel powers; **Ocean Master** (Orm Marius): Strength, underwater adaptation, controls sea life; **Jemm**: Flight, super-strength, psychic powers; **Circe**: Sorcery; **Queen Bee** (Zazzala): Stingers, mind-fogging pollen; **The General** (Wade Eiling): Super-strength and durability; **Prometheus**: Cybernetic enhancement.

The first Injustice Gang was made up of six villains recruited by the enigmatic Libra, ostensibly to balance out the Justice League. The Injustice Gang even operated from a satellite that orbited Earth on the opposite side from the JLA's. The Injustice Gang went off to battle the JLA, but they had been tricked; Libra had used them to lure the JLA out so he could steal half the heroes' powers with his Energy Transmortifier. Having taken their power into himself, Libra began to expand in size and was absorbed into the cosmos. The Injustice Gang then briefly worked for the Construct and Abra Kadabra before disbanding.

When Superman became leader of the JLA, Lex Luthor created a new Injustice Gang to oppose what he saw as an escalation in the conflict between himself and the Man of Steel. He tried to sow dissent within the JLA and force it to break up, but was unsuccessful. Lex's revamped Injustice Gang was also a failure, falling under the control of the alien weapon Mageddon before being defeated.

MEMBERS/POWERS Circe: Demigoddess who wields powerful magic; **Floronic Man**: Plant control, access to the power of the Green; **Klarion the Witch Boy**: Shapeshifting, telekinesis; **Teekl**: Klarion's feline familiar, enhanced senses, ability to transform into a large beast; **Papa Midnite**: Voodoo powers; **Solomon Grundy**: Zombie with super strength and durability.

ALLIES Upside-Down Man

ENEMIES Justice League Dark

AFFILIATIONS None

To help her win the Witching War and become Goddess of Magic, Circe assembled a team of evil magical beings intended to defeat the Justice League Dark.

She sent her team out into the world to bring the powers of life and death under her control, stealing them from the servants of the goddess Hecate. Having succeeded in this, and with Circe possessing the body of Wonder Woman, Injustice League Dark was ready to face their heroic counterparts and take what they wanted—the powerful Eclipso Diamond. However, Wonder Woman fought off Circe's control and returned to stop the Witch Queen. This defeat saw the disbanding of Injustice League Dark.

INJUSTICE LEAGUE

DEBUT *Justice League International* (Vol. 1) #23 (Jan. 1989)

MEMBERS/POWERS

Lex Luthor: Amoral genius; **Black Manta:** Optic blasts; **Black Adam** (Teth-Adam): Godlike power; **Subject B-0:** Unfinished Superman clone; **Captain Cold** (Leonard Snart): Cryogenic powers.

ALLIES Batman, Catwoman, Justice League

ENEMIES Crime Syndicate, Secret Society

AFFILIATIONS Justice League

When the Crime Syndicate (an evil version of the Justice League from Earth-3) invaded Earth and took the Justice League teams out of action, many of the world's Super-Villains chose to serve the conquerors and became part of their so-called Secret Society. Not so Lex Luthor. He decided that if the Justice League couldn't free the world then it was up to him to do it.

After retrieving a suit of powered armor from LexCorp, he recruited fellow refuseniks Black Adam, Black Manta, and Captain Cold into his own Injustice League, along with half-finished Superman clone B-0. After linking up with Batman, Catwoman, Sinestro, and Deathstroke, the Injustice League confronted the Crime Syndicate. B-0 was killed, but Lex defeated Ultraman and Mazahs (an alternate-world Lex Luthor with Shazam's powers), and Captain Cold killed Johnny Quick. This gave Batman the chance to release the Justice League from their prison within the Firestorm Matrix.

With the Crime Syndicate beaten, the Justice League agreed to wipe the records of the Injustice Society members. Without the threat of the Crime Syndicate to unite them, the Injustice Society disbanded—although Captain Cold and Lex Luthor decided to join the Justice League.

ON THE RECORD

The first pre-Flashpoint Injustice League was an incompetent team of Justice League International foes who were hired as "Justice League Antarctica" by Maxwell Lord. However, *Silver Age: Showcase* #1 chronicles the adventures of an even earlier Injustice League, which included Lex Luthor. Luthor also founded Injustice League Unlimited—a large team that enjoyed some success against the Justice League, but which is most famous for crashing Green Arrow and Black Canary's wedding.

THE TABLES TURNED

The Injustice League had their heroic opposite numbers on the ropes on numerous occasions, as when they tortured the Justice League to enrage Superman.

INJUSTICE SOCIETY

DEBUT *All-Star Comics* #37 (Oct.-Nov. 1947)

NOTABLE MEMBERS/POWERS (FIRST TEAM) **Wizard** (William Zard): Magician, illusionist; **Brain Wave** (Henry King, Sr.): Psychic powers; **Gambler** (Steven Sharpe III): Master of disguise; **Per Degaton**: Precognition, time travel; **Thinker** (Clifford DeVoe): Mind control, telekinesis; **Vandal Savage**: Immortality, vast mental and physical abilities; **Fiddler** (Isaac Bowin): Musical hypnosis; **Harlequin** (Molly Mayne): Hypnotic glasses; **Shade** (Richard Swift): Shadow powers; **Solomon Grundy** (Cyrus Gold): Super-strength.

NOTABLE MEMBERS/POWERS (LATER TEAM) **Johnny Sorrow**: Psychic, deadly gaze; **Tigress** (Artemis Crock): Athlete; **Geomancer**: Elemental control of earth; **Icicle** (Cameron Mahkent): Cryogenic powers; **Killer Wasp**: Flight, electrical blasts.

The Injustice Society was founded by the Wizard with the objectives of defeating the Justice Society and taking over America. The Society used various ploys to trap the JSA team members, before putting them on trial. However, Green Lantern was able to infiltrate the proceedings and free his comrades, leading to defeat for the villains. The Wizard went on to convene at least two more Injustice Societies, who also met with limited success.

Some decades later, Johnny Sorrow formed another Injustice Society. This team attacked the JSA headquarters, but they were beaten single-handedly by grizzled boxer Wildcat—who was nursing an injured arm at the time! Sorrow then used the Injustice Society as pawns to summon the reality-devouring King of Tears, but both were vanquished thanks to The Flash, who cast the King of Tears to another dimension.

Subsequently, the Wizard founded yet another Injustice Society, which Johnny Sorrow quickly took over. He used the Injustice Society's members as sacrifices to bring back the King of Tears, and kidnapped young JSA All-Stars member Stargirl for a ritual intended to restore him to human form. Once again, he was defeated.

INTERNATIONAL ULTRAMARINE CORPS

DEBUT *DC One Million* #2 (Nov. 1998)

BASE Superbia

MEMBERS **Warmaker One** (Lt. Scott Sawyer); **4D** (Capt. Lea Corbin); **Flow/Glob** (Maj. Dan Stone); **Pulse 8** (Capt. John Wether); **Knight** (Cyril Sheldrake); **Squire** (Beryl Hutchinson); **Goraiko**; **Vixen** (Mari McCabe); **Jack O'Lantern** (Liam McHugh); **Kid Impala**; **Olympian** (Aristides Demetrios); **Tasmanian Devil** (Hugh Dawkins); **Fleur-de-Lis** (Noelle Avril).

ENEMIES Gen. Wade Eiling/Shaggy Man, Gorilla Grodd, Sheeda

With global threats escalating, Gen. Wade Eiling decided the US needed a national hero team. Four soldiers were genetically engineered into superhumans: Warmaker One, 4D,

Flow, and Pulse 8 became the International Ultramarine Corps. Eiling had them attack the JLA. But, when they learned Eiling had gone insane and transplanted his personality into the unstoppable Shaggy Man, they joined forces with the JLA and exiled Eiling.

The Corps then created the floating city of Superbia above the ruins of Montevideo. However, they suffered a setback when Gorilla Grodd took control of Superbia and Sheeda took control of the team. After the Justice League defeated the mind-controlled Ultramarines, they sent the team to serve as heroes in the young universe of Qwewq.

INTERGANG

DEBUT *Superman's Pal, Jimmy Olsen* (Vol. 1) #133 (Oct. 1970)

BASE Metropolis

CURRENT MEMBERS/POWERS **Whisper A'Daire:** Poison spit; **Johnny Stitches:** Gang boss whose face is stitched together with animal and human skin.

FORMER MEMBERS/POWERS **"Moxie" Mannheim:** Intergang's shrewd first boss; **Bruno "Ugly" Mannheim:** Massive size and strength, ruthless disposition; **Morgan Edge:** Consummate wheeler dealer

ENEMIES Superman, Batman Family, Jimmy Olsen, the Question

Intergang is a criminal organization run like a business corporation by media mogul Morgan Edge, with extensive resources and an international reach. It has had secret investors, including Desaad of Apokolips and his master Darkseid, who wished to spread chaos and evil on Earth. Intergang was supplied with advanced Apokoliptian weaponry, which helped it to become a force to be reckoned with in the criminal underworld.

When Edge was hospitalized with a heart attack, Intergang underwent a series of leadership changes. First the gangster "Ugly" Mannheim took charge.

After he was seemingly killed in a Boom Tube accident, his father Moxie Mannheim took over. Lex Luthor then conspired to take control of Intergang from behind the scenes, with Moxie serving as a figurehead for the organization until he was murdered by Superboy-Prime.

"Ugly" Mannheim then unexpectedly resurfaced, claiming to have been "reborn" as a devotee of the Religion of Crime. He used Intergang to spread its commandments. Cultists worshiped the Biblical character of Cain—whom they regarded as the first-ever murderer—and practiced human sacrifice and cannibalism. Intergang's influence grew as it expanded operations into Africa and Gotham City, and effectively took control of the Metropolis underworld.

PATCHWORK MAN

After Johnny Denetto was horribly mutilated and left for dead, Bruno Mannheim stitched him back together and recruited him into Intergang. As Johnny Stitches, Denetto took control of Intergang's operations in Gotham City.

ALIEN ARSENAL

Bruno Mannheim's Intergang was supplied with Apokoliptian weapons, giving its Gassers, Wall-Crawlers, and Shock Troops an edge in gang warfare in Gotham City, Metropolis, and beyond.

UNHOLY HUNGER

When he returned from the dead, Bruno Mannheim was a fanatical devotee of the Religion of Crime. He set about taking control of the Metropolis underworld by killing (and eating) his rivals.

INQUE

DEBUT *Batman Beyond* (Vol. 1) #6 (Aug. 1999)

EYES Gray **HAIR** Black

POWERS/ABILITIES Liquidized shapeshifting—can alter form at will to create tendrils, spikes, or waves, but body can be temporarily disrupted by a hard enough blow.

ENEMIES Brother Eye, Batman (Terry McGinnis)

In a near-future, Brother Eye (an artificial intelligence created by Batman and Mister Terrific) launched a campaign to gain control of humanity by using a techno-organic

virus to transform people into cyborg slaves. Inque was a corporate saboteur who was turned into a liquidized shapeshifter by mutagenic experiments. She often clashed with the second Batman (Terry McGinnis) and was blackmailed into working for Brother Eye after he kidnapped her daughter Deana and held her hostage on the moon.

Brother Eye ordered Inque to capture the third Batman (Tim Drake) and Commissioner Barbara Gordon. After an intense battle, Inque snared the pair with her viscous form and took them back to Brother Eye for "conversion." However, Batman managed to escape with Gordon and pledged to help Inque get Deana back. Inque joined Batman's fight against Brother Eye and sacrificed her own life to destroy the malignant artificial intelligence.

DEBUT *Legion of Super-Heroes Annual* (Vol. 2) #1 (1982)

REAL NAME Jacques Foccart

BASE Legion headquarters, 31st century

HEIGHT 5ft 9in

WEIGHT 170 lbs

EYES Brown

HAIR Brown with white streak

POWERS/ABILITIES Invisibility; teleportation into the afterlife; Legion flight ring gives flight and life-support in space.

When the Legion of Super-Heroes suffered heavy losses in action, one of the victims was Lyle Norg, the first Invisible Kid. Legion Academy member

Jacques Foccart took the formula that Norg had used to give himself invisibility powers and became the new Invisible Kid.

The Legion and the United Planets were then attacked by the Fatal Five, who caused chaos on many worlds. When the Invisible Kid was on a cruiser that crashed into one of the massive Stone Promethean Giants, he used his powers to save himself and fellow Legionnaire Polar Boy by instinctively teleporting himself to what appeared to be the afterlife. Here he met the spirit of Lyle Norg. The Invisible Kid then teleported himself and Polar Boy back to Earth, where they helped defeat the Fatal Five.

DEBUT *Green Lantern Sinestro Corps Special* #1 (Aug. 2007)

EYES Green **HAIR** None

POWERS/ABILITIES Interstellar flight; space/time manipulation; creates manifest green energy constructs.

ALLIES Green Lantern Corps

ENEMIES Relic, Anti-Monitor, Sinestro

AFFILIATIONS Emotional energy entities

Ion is the living embodiment of willpower, represented by the color green on the Emotional Spectrum. It was long contained within the

Central Power Battery on Oa, where it provided energy for the power rings of the Green Lantern Corps. When the Battery was destroyed, the entity took Kyle Rayner as its host and transformed him into the hero known as Ion.

During the Sinestro Corps War, Sinestro physically drew the Ion entity from Rayner and imprisoned it at Qward, but it was retrieved by the Lanterns and bonded with Sodam Yat. When the power of all the Lantern Corps began to ebb, a being called Relic destroyed the Green Lantern Battery and warned that the energies of the Emotional Spectrum were running out. Ion and the other entities sacrificed themselves to replenish the energies of the Emotional Spectrum and save reality.

ISIS

DEBUT 52 #3 (May 2006)

REAL NAME Adrianna Tomaz

BASE Shiruta, Kahndaq

HEIGHT 6ft 1in **WEIGHT** 135 lbs

POWERS/ABILITIES Super-strength; flight; mastery of the elements; healing.

ENEMIES Intergang, Death, Felix Faust

Egyptian Adrianna Tomaz was enslaved by Intergang and gifted to Black Adam, the superpowered ruler of Kahndaq. Adam killed the criminals and set

Adrianna free. Captivated by her courage, honesty, and desire for justice, Adam took her as his consort and gave her a mystic amulet that transformed her into the divinely empowered Isis.

Adrianna freed her brother Amon (Osiris) from slavery, but both were killed by a vengeful Intergang. Adam tried to raise Isis from the dead but was tricked by the evil sorcerer Felix Faust, who returned Isis to life, but as his unwilling slave. Isis broke free and exacted a gruesome revenge on Faust. She had become embittered and ruthless, and set herself up as absolute ruler of Kahndaq.

After *Flashpoint*, Adrianna was a young Kahndaqi who summoned Black Adam to free her nation when her brother was killed by the country's cruel dictator.

REAL NAME Liam McHugh

EYES Blue **HAIR** Blond

HEIGHT 5ft 11in **WEIGHT** 188 lbs

POWERS/ABILITIES Lantern provides flight, teleportation, increased strength, and fog summoning.

AFFILIATIONS Leymen (Primal Force), International Ultramarine Corps

The first Jack O'Lantern, named Daniel Cormac, was given a magic lantern by the fairy queen Maeve, but he fell foul of a power struggle in Bialya between

would-be dictator Colonel Harjavi and the country's ruler, Queen Bee. Maeve then gave the lantern to native Bialyan Marvin Noronsa, who was killed by a bomb.

The lantern then passed to Cormac's cousin, Liam McHugh. He managed to absorb the lantern's powers so he no longer needed to carry it. McHugh served with Doctor Mist's Leymen and the International Ultramarine Corps. He was later taken over by an alien Sheeda spine-rider and made to join Gorilla Grodd's latest bid to destroy humanity. McHugh escaped and went on to safeguard the sentient, time-traveling universe Qwewq (Neh-Buh-Loh).

POWERS/ABILITIES Flight and superhuman strength; forehead gem senses others' emotions and emits force beams.

ALLIES J'onnn J'onzz

ENEMIES Claudius Tull, Jogarr, Synn

AFFILIATIONS Red Saturnians, formerly Injustice Gang

Jemm is the prince of the Red Saturnians—a race created by the Green Martians. His people were at war with the rival White Saturnians, but Jemm was born with a gem in his forehead—a sign that he was destined to bring peace to Saturn.

After White Saturnians killed his family, Jemm fled to Earth, where Lex Luthor used the mind-controlling Worlogog to make him join his Injustice Gang as a rival to J'onnn J'onzz, the Martian Manhunter. He was freed from Luthor's control by the JLA, and the Martian Manhunter helped him to recover.

Jenn then married the White Saturnian Cha'rissa, bringing peace to the races of Saturn. He sided with the Rannians in the Rann-Thanagar War, and represented his people's interests when new Krypton was created in the solar system.

DEBUT *Tales of the Teen Titans* #56 (Aug. 1985)

HEIGHT 5ft 9in **WEIGHT** 136 lbs

EYES Brown **HAIR** None

POWERS/ABILITIES Sorcery

ALLIES Dr. Sivana, Calculator

ENEMIES: Teen Titans, Superman, Wonder Woman

AFFILIATIONS Fearsome Five, Troia

Jinx studied magic in her native India, but after murdering her teachers and fellow students was confined at S.T.A.R. Labs. She was liberated and recruited by the Fearsome Five,

subsequently clashing with their enemies the Teen Titans. The Fearsome Five broke up following a battle with Superman, and Jinx was locked up in Alcatraz with other group members. She and the rest of the Five were freed by Doctor Sivana. He ordered them to attack LexCorp facilities, but they were stopped by the Outsiders.

A post-*Flashpoint* incarnation of Jinx appeared alongside the rest of the Fearsome Five in the Outsider's Secret Society of Super-Villains. Following *Rebirth*, Jinx and her allies tried lying low as the spearhead of H.I.V.E.'s scheme to steal and resell metahuman abilities, but she soon inevitably clashed with Titans, Teen Titans, and the Justice League.

POWERS/ABILITIES Can control the minds of others; wears multipowered, gravity sheath (Ikon Suit).

ALLIES Adeline Wilson, Rose Wilson (Ravager), Slade Wilson (Deathstroke)

ENEMIES David Isherwood, Terra

AFFILIATIONS Defiance

Joseph Wilson is the second son of Slade Wilson—the legendary mercenary Deathstroke. Joseph was believed to have been killed when Slade's enemies attacked the home of Slade and his wife Adeline. He survived, but could no longer speak. His older brother Grant was an early casualty in Deathstroke's mercenary assassination career, and Joseph grew up emotionally poisoned by his parents' toxic relationship. He developed a love/hate relationship for both of them.

Running Adeline's business empire, Joe used his metahuman powers of bodily possession to gather information and pursue a hedonistic lifestyle, but was inevitably sucked into his father's Super-Villain intrigues. Joe stole a super-powered suit from his lover and mentor David Isherwood (a minor Canadian Super Hero called Doctor Ikon) to become costumed adventurer Jericho. He was deeply traumatized by the fact that he was prepared to commit murder to get it.

When his fiancée Etienne was also murdered, Joe joined his father in Adeline's Defiance super-team and found himself once again caught up in the cold war between his parents. However, after slipping ever-deeper into depression and paranoia over the lethal machinations of his father, Jericho joined teammates Power Girl, Kid Flash, Terra, and unsuspected half-sister Rose in having Deathstroke arrested and treated in Arkham Asylum.

ON THE RECORD

The original Jericho possessed formidable psychic powers and joined the Teen Titans team, despite them being bitter foes of his father, Deathstroke. However, he was then possessed by the warped souls of Azarath, who turned him against the Titans.

Deathstroke was forced to kill Jericho to release him from their possession. Jericho's soul survived but was driven insane, and it went on to wreak havoc in a succession of unwilling host bodies.

THE CURSE OF AZARATH
In a tragic twist of fate, the Souls of Azarath drove Jericho mad, transforming him into a vicious, violent monster.

AT A GLANCE...

Mystery man

The Joker's past remains a mystery, but Batman believes his nemesis was once the brilliant leader of the Red Hood Gang—a criminal outfit that plagued Gotham City early during Batman's career. After a fall into a vat of chemicals stained his skin white and his hair green, this Red Hood seemed to opt for a career as The Joker, giving in to his every insane impulse.

Tools of the trade

The Joker employs a variety of clown- and circus-themed weaponry, ranging from razor-sharp playing cards to acid-squirting lapel flowers. He often sets up shop in deserted card factories or on dilapidated former circus grounds, keeping to his favorite themes.

CLASSIC STORIES

Detective Comics (Vol. 1) #168

(Feb. 1951) The Joker's origin is explored for the first time, introducing the concept of the Red Hood and the incident that birthed Batman's greatest foe.

Batman: The Killing Joke #1

(Mar. 1988) The Joker's origin is given a modern twist as the villain indulges in his latest criminal campaign: an attempt to drive Commissioner Gordon as crazy as The Joker is himself.

Batman (Vol. 1) #426-429

(Dec. 1988-Jan. 1989) In "A Death in the Family," Batman faces real tragedy once again when The Joker successfully kills the second Robin, Jason Todd.

Arkham Asylum #1 (Oct. 1989)

The madmen are running the asylum when the Clown Prince of Crime takes over Arkham Asylum, aided and abetted by some of Gotham City's most dangerous psychopaths.

Insane inspiration

The Joker has inspired many criminals to follow in his footsteps, most notably his former romantic interest, Harley Quinn. But Harley wasn't alone in her

obsession with the so-called Clown Prince of Crime. The underground villain called The Joker's Daughter also strives to imitate Gotham City's most notorious and feared criminal, as does his new sidekick, Punchline.

The Joker possesses what must arguably be the most dangerous criminal mind on the planet. With no moral compass to speak of and a sick sense of humor that derives joy from witnessing the pain of others, the notorious Clown Prince of Crime is the smiling foil to the Batman's grim and serious demeanor. With a reputation as infamous as that of the Dark Knight, The Joker has become a one-man movement in the city of Gotham City, attracting a sea of followers as he proceeds to indulge in unthinkable crimes that would give even the cruelest career criminal pause.

GOING JACKANAPES

The boy destined to become The Joker loved his toy monkey Gaggy. So much so that when the adult Joker discovered a gorilla at Gotham City Zoo, he kidnapped it and made it his "henchman," Jackanapes.

Little is known about the true past of The Joker. The madman has created a vast number of legends surrounding his crazed persona, some insisting that he is an ancient trickster being as old as Gotham City itself. The world only knows of conflicting stories that The Joker himself tells, often to manipulate those within earshot to one of his twisted causes or schemes. According to The Joker—an unreliable narrator if ever there was one—he lived a rough childhood, raised in part by his Aunt Eunice. She was mentally unstable herself and scrubbed her young nephew with bleach in order to get him clean. When the young Joker returned from school after being beaten up by a female classmate, he was again beaten by his enraged aunt. The young boy grew up in squalor with very little to eat and was ridiculed by his classmates on a regular basis. His only comfort during that time was a stuffed toy monkey he called Gaggy.

While the rest of The Joker's past remains shrouded in mystery, Batman believes the deranged criminal could have been part of the Red Hood Gang when he reached adulthood. A ruthless organization bent on taking over Gotham City's underworld, the Red Hood Gang had risen to power during the time when Batman first emerged on the crime-fighting scene.

Though still working out the kinks of combating crime, Batman managed to take down the Red Hood during a confrontation in a processing plant known as ACE Chemical. It was here that the gang's presumed leader fell into a vat of chemicals. After the event, Batman tried to research this Red Hood's identity, only to find more questions at every turn. Soon after this, the mysterious Joker first emerged in Gotham City.

The Joker had bleached-white skin, green hair, and a perverted sense of humor that could only result from extreme insanity. As he committed crime after crime, he revealed not only an obsession with clown-related imagery, but also with Batman himself. The Joker seemed to feel it was his job to better the Batman by challenging him at every opportunity. The Joker killed the second Robin, Jason Todd, shot and paralyzed Batgirl (Barbara Gordon), and has become known as Batman's archenemy.

When The Joker unleashed a virus on Gotham, turning its citizens into grinning, violent, zombie-like pawns, Batman was able to cure the virus, but fought The

DEATH OF THE FAMILY

After enduring a bizarre ritual of having his face literally cut from his head by the Dollmaker, The Joker kidnapped those close to Batman and Bruce Wayne. Holed up in Arkham Asylum with a few fellow criminals including Two-Face and The Penguin, The Joker then tricked the Batman Family into believing that he had cut off his hostages' faces as well.

While Batman managed to save his partners, a rift formed within the family because of the secrets that the Dark Knight had kept from those closest to him.

MASKING HIS EVIL

The Joker wore the skin from his face as a macabre mask, held on by a strap he wrapped around his head. The villain later lost this mask and it was found by a girl living in Gotham City's underground society. She went on to adopt the name The Joker's Daughter.

THE JOKER'S GARAGE
When The Joker set his sights on the Batman Family, he dressed as a mechanic with a dangerous tool belt.

THE THREE JOKERS
It is believed that Batman once learned that there were not just one Joker, but three: the Clown, the Comedian, and the Criminal. However, with the state of the DC universe in flux thanks to the machinations of the powerful being Doctor Manhattan, it is unclear whether this revelation exists in Batman's current timeline, or in another reality.

THE ETERNAL JOKE
The Joker is obsessed with Batman—a relationship the Dark Knight is often forced to return in kind to save innocents from The Joker's disturbed schemes.

"I'm the one who laughs... at the great joke... that any of it matters."

THE JOKER

Joker in a battle that nearly cost the pair their lives. The Joker later resurfaced in Gotham City, as did Batman, thanks to a mysterious metal called Dionesium, and the villain has since taken their conflict up a notch.

Now aware of Batman's secret identity, The Joker launched "The Joker War"—an extremely hostile takeover of Wayne Industries and its holdings. With the help of his new partner in crime Punchline, The Joker conquered Gotham City, nearly killed Batgirl, almost drove the Batman insane, and even took over the mind of Nightwing. The heroes rallied thanks to Batman's leadership (and a quick save from The Joker's former love Harley Quinn), and defeated the Clown Prince of Crime, even though he had adopted a Batman costume—one suitably redesigned to his liking.

ENDGAME

The Joker turned almost the entire Justice League against Batman using his Joker virus. The Dark Knight was forced to adopt a protective battle suit dubbed the Justice Buster to confront them. Barely escaping with his life, Batman realized that this time, The Joker had raised the stakes and seemed to be playing for keeps. The Dark Knight tracked down a cure for the virus despite a wealth of misinformation spread through various sources. He discovered that The Joker was indeed a mortal man, despite what the legends would have the citizens of Gotham City believe.

TOUGH ODDS

A Superman infected by The Joker was the biggest threat Batman had to face during his battle with the Justice League—who were all under the influence of The Joker's toxin.

ON THE RECORD

The Joker has been a part of the Batman mythos almost from the beginning. When he first appeared, he was portrayed as a murdering clown, but like Batman, his image softened over the course of the 1950s and 1960s. When the 1970s rolled around, The Joker was once again returned to his dark, menacing roots, becoming the maniacal threat he was destined to be.

The man who laughs

The earliest incarnation of The Joker was a cutthroat killer, who planned to murder the city's most notable officials at midnight on each occasion. He was brought to justice by Batman, but would return in later in that same issue.

Playing his cards right

The Joker's dangerous persona was only amplified in the wake of the continuity-altering event *Crisis on Infinite Earths*. His sick crimes would become even more twisted as he shot and paralyzed Barbara Gordon, and then photographed her wounded body in an attempt to drive her father, Commissioner James Gordon, insane. Gordon proved a stronger man than The Joker, however, and Batman soon returned the villain to captivity.

THE JOKER'S FIVE-WAY REVENGE
Back to his murderous self in the 1970s, The Joker killed four former associates in bizarre ways as Batman desperately sought to stop the death of the fifth. Their tumultuous battle came to a head in an aquarium near Gotham City's docks.

Pushed to the edge

But The Joker was not done with the Batman Family. He went on to kidnap the second Robin, Jason Todd, and savagely beat him before killing him in an explosion. This murder nearly drove Batman over the edge, but he maintained his moral code, and never stooped to the insane villain's level.

CHEATING DEATH

After The Joker killed Jason Todd, Batman believed the villain had perished in a helicopter crash. However, the Clown Prince of Crime would not be so easily killed.

Following the apparent death of The Joker, Gotham City was plagued by bizarrely clown-costumed fans hooked on street drug "Joker Juice." Creating disruptive flash mobs, they looted and rioted until The Joker imitator who supplied the drug and started the craze upped the stakes by shooting a police officer. Soon, a fake Batman was urging citizens to fight the Jokerz, and violence escalated across the city.

Although the real Batman quashed the incident, a new gang and lifestyle had gelled around the young, disaffected, and disturbed. Decades later, the Jokerz was a global force and rebel ideology, lacking only a leader. More nuisance than true menace, the suggestible army was ripe for exploitation, and by the time Terry McGinnis patrolled Neo-Gotham as Batman, were a commonplace but disagreeable facet of city life. This changed when nihilistic student Doug Tan appointed himself Joker King, assembling "10,000 Clownz" to assault the city. Kryptonian scientist Jor-El feared that his planet would be destroyed, and tried to warn the Science Council of the impending disaster. When his concerns were brushed aside, Jor-El decided that the only option left to him was to send his baby son Kal to a planet where he could be safe. Jor-El was proved right, and Krypton exploded, killing his wife and nearly every other Kryptonian in existence. However, Jor-El was removed at the last moment by the actions of Doctor Manhattan and placed on Earth, where his son had ended up.

Finding Earth unworthy of his son, Jor-El adopted the name Mister Oz and began interfering with the planet's affairs from the shadows. Eventually he revealed himself to a stunned Kal, now grown into the hero Superman. The two would have a difficult relationship, and Superman had grave doubts when Jor-El expressed a desire to take his grandson Jon on a tour of the galaxy to broaden his horizons. Jor-El's trip with Jon was interrupted by the fallout of Rogol Zaar's quest to eliminate all Kryptonians, and Jor was eventually arrested by the Thanagarians for his role in enabling Zaar to destroy Krypton during his time with the secret Circle group. Found guilty, his sentence was to be returned to his proper place in the timestream—Krypton at the moment of its death.

HOUSE OF EL

Jor-El was fiercely proud of his family and would stop at nothing to defend them. He believed that Earth was unworthy of his son because of the human tendency to brutality.

After he was killed during *Infinite Crisis*, the name was briefly used by an unnamed hero before it was taken by Sonia Sato, the daughter of Yakuza hitman Yoshio Sato. When Sonia was born, he tried to quit the Yakuza, but was killed. Sonia mastered martial arts to avenge her father. She was recruited by Oracle of the Birds of Prey to help break an innocent girl out of prison and served with the team on subsequent missions.

In New York, she was attacked by the Blood Soldiers, a superpowered squad of Yakuza hitmen. The Justice Society stepped in to help her and she eventually joined up, siding with Gog when he caused a schism in the team. Sonia fell in love with team member Damage, and was distraught when he was killed during *Blackest Night*.

Following *Rebirth*, the Justice League was acknowledged as Earth's primary metahuman guardians, but Batman felt it was too ponderous for certain missions. He was also keen to create a situation where inexperienced heroes might be trained and Super-Villains rehabilitated. The official team's recent victory over the Crime Syndicate was in part thanks to the help of villains, and as reformed predator Killer Frost put it "Everybody deserves that chance". Batman brought in Black Canary as field commander, pitting his team against bizarre and deadly threats such as The Extremists, Queen of Fables and a time-unravelling Chronos. Gradually ceding control, the Dark Knight saw his theory confirmed when his all-conquering Justice League of America transformed itself into a multi-national Justice Foundation.

Traveling via transmatter cubes, a selection of the greatest heroes from multiple Earths arrived at the heart of the Multiverse, the Orrery of Worlds.

After the heroes had gathered, they learned that each of their Earths occupied the same space in their respective universes, vibrating together and creating a pitch, with each world having its own unique tone. This enabled inter-reality travel via the Ultima Thule, a ship that navigated with music.

The Superman of Earth-23 emerged as the natural leader of the group—as well as being a powerful hero, he was also the president of the USA on his planet. He proposed a volunteer super-army to deal with threats to the life and existence of the Multiverse, calling it Justice Incarnate. The team would comprise 50 heroes from around the Multiverse, although there were nine key members.

The Justice League is the foremost Super Hero team in the known worlds. Governments seek their aid, other heroes want to join them, every villain out to make a reputation takes them on, and every would-be conqueror of Earth knows they are the planet's first line of defense. This prominence has not come without cost, however, with the stress sometimes threatening to break the team apart. But whatever their passing disagreements with each other, they remain united against external threats.

The core members of the Justice League—Superman, Batman, Wonder Woman, The Flash, Green Lantern (Hal Jordan), Cyborg, and Aquaman—first came together as each of them hunted the source of strange occurrences in their respective cities that prefigured an attack by Darkseid. Teenager Vic Stone, critically injured in the attack, became Cyborg when his father implanted experimental cybernetics in his dying body. This occurred just in time for him to take part in the counterattack against Darkseid and his Parademons, during which Batman rescued the kidnapped Superman from Apokolips. Sometime later, writer David Graves named the team the Justice League in a book about the events; they preferred this to The Flash's off-the-cuff suggestion of "Super Seven." Several other teams were created later, inspired by the original Justice League team. Conflict erupted between the Justice League, the similarly titled Justice League of America, and the occult-oriented Justice League Dark when the three groups clashed over the

powerful artifact Pandora's Box. At this point, the Justice League had adopted three new members to help them in the fight: the Atom (secretly a villain named Atomica), Element Woman, and Firestorm. The mysterious Outsider was working with Atomica, and took control of Pandora's Box, using it to open a portal to Earth-3, from which emerged the Crime Syndicate—the villainous Earth-3 version of the Justice League. Cyborg's cybernetics tore themselves free of his body and rearranged themselves into the sentient Grid—allied with the Crime Syndicate—and nearly killing Cyborg in the process. A number of key Justice League of America and Justice League heroes were trapped within a matrix created from the two parts of Firestorm, and soon the Crime Syndicate took control of Earth-0, bolstered by the Secret Society of Super-Villains. Seeing the threat escalate, Lex Luthor and a number of villains defected from the Society, joining forces with the heroes in their counterattack against the Crime Syndicate. The combined team won and Lex Luthor—despite Superman's objections—was admitted to the League, along with Shazam, Captain Cold, and Power Ring (Jessica Cruz), who had all proven themselves.

Several adventures later, when Darkseid battled the Anti-Monitor, the Justice League became stuck in the middle. Darkseid was killed in the event, but was later resurrected into the baby son of Earth-3's Superwoman. With the League triumphant

CLASSIC STORIES

Justice League of America (Vol. 1)

#21-22 (Aug.-Sep. 1963) The JLA and Justice Society of America team up for the first time in "Crisis on Earth-One!" and "Crisis on Earth-Two!", before the introduction of Earth-3's Crime Syndicate of America the next year.

The new roster consists of Aquaman, Zatanna, Martian Manhunter, Elongated Man, the Vixen, and three younger recruits: Gypsy, Steel, and Vibe.

Final Crisis #1-7 (Jul. 2008-Mar. 2009)

The apparent deaths of Martian Manhunter and Batman, together with the resignations of Wonder Woman and Superman, leave the remaining members of the Justice League fighting the New Gods and the spirit of a fallen Darkseid.

Watchtower

The orbiting Watchtower was the Justice League's HQ for a time, containing research and training facilities, as well as living spaces for League members and their guests. It was destroyed by Despero and later rebuilt in orbit with the financial backing of Lex Luthor.

LEAGUES IN CONFLICT

As an international incident brewed in Kahndaq, the Justice League and the Justice League of America faced off over Pandora's Box.

ROCKY BEGINNING

At first, the heroes who came together to form the Justice League responded individually to signs of Darkseid's attempt to breach the dimensional barrier and conquer Earth-0 to use it as a Parademon breeding ground. As they met each other, their first reaction was often suspicion; but when they were forced to band together, they learned how powerful they could be—and how powerful they would need to be against godlike adversaries like Darkseid.

and Jessica Cruz becoming a true Green Lantern, they adjusted their ranks, losing members Luthor, Cold, and Shazam, but gaining Green Lantern Simon Baz. Later, Mera joined their roster as well.

After many hard-fought battles, the League faced another restructuring when the mysterious Source Wall, which separates known space from the powerful energy beyond, was pierced during a battle with the forces of the Dark Multiverse. Superman, Batman, Wonder Woman, The Flash, Cyborg, and Aquaman were joined by Hawkgirl, Green Lantern (John Stewart), and Martian Manhunter. They established a new headquarters—the Hall of Justice located in Washington, D.C.

Meanwhile, Lex Luthor had formulated a master plan and recruited his own Legion of Doom. Through Luthor's manipulations, the Source Wall itself was shattered, and the evil mother of the Multiverse, Perpetua, was released into the Multiverse. With Perpetua's help, Luthor evolved into the half-Martian Apex Lex, but soon ran afoul of the Batman Who Laughs—an evil Bruce Wayne, infected by The Joker, hailing from the Dark Multiverse. Even as the heroes fell to Perpetua's might, Perpetua decided to choose the Batman Who Laughs over Luthor as her new right-hand man. The world was transformed into a bizarre dark reflection of what it had once been, guided by the Batman Who Laughs' perverse imagination. With no other choice but to embrace the chaos, the Justice League had to rally its forces and face doom head on.

"It's time to be the team they thought we were, instead of the team we've been this past five years."

AQUAMAN

ON THE RECORD

The Justice League of America came into being as a reboot of the Justice Society of America, which flourished in the 1940s, but was later shelved during the 1950s as Super Hero comics had to share the stage with new genres. The Justice Society was later brought back into continuity as the heroes of Earth-2, while the Justice League were designated Earth-1.

New beginnings

A flagship team for decades, the Justice League of America in its various incarnations has had nearly as many origin stories as members. The first of these related the story of an invasion by the alien Appellaxians, which none of the solo heroes could successfully repel. Only by banding together could they save Earth—and the JLA was born. This origin story has been modified numerous times over the years and has involved a varying roster of founding members.

What's in a name?

GOING SMALL
A JLA including Hawkman, Black Canary, and Red Tornado hunted for the Atom in the Microcosmos.

The original Justice League of America is informally known as the Justice League or by its initials JLA. But there have also been different iterations of the group under various names over the years: Justice League International, Justice League Europe, Justice League United, Justice League Dark... What they all have in common is usually some of the original Justice League's members and a version of the original Justice League's mandate: to protect and defend the people of Earth against the forces of evil.

STEALING THE LOOK
No sooner had the new 1990s Justice League team formed than their likenesses—including the new blue Superman—were assumed by hard-light constructs created and controlled by the Injustice Gang.

They battled Lords of Order and others striving to take advantage of the mystical sea change created by the invasion and the rise of eldritch evil triggered by the return cosmic Originator Perpetua.

JUSTICE LEAGUE INTERNATIONAL

DEBUT *Justice League International* (Vol. 1) #7 (Nov. 1987)

BASE Washington, D.C.

MEMBERS/POWERS

Booster Gold: Legion flight ring, power suit; **Fire:** Thermal energy blasts; **Godiva:** Prehensile hair; **Green Lantern:** Power ring; **Ice:** Ice creation and control; **Firehawk:** Flight, light energy control; **Vixen:** Totem powers; **Batwing:** Military training, computers; **O.M.A.C.:** Biotech weapon; **Blue Beetle:** Alien scarab powers; **August General in Iron:** Armored, energy manipulation.

Justice League International was the brainchild of mind-controlled entrepreneur Maxwell Lord. After he regained his senses, the squad became a force for good. However, they could never persuade public opinion that they were more than second-raters and eventually disbanded.

Following the reality-altering *Flashpoint* event, UN director Andre Briggs established a team to rival the US's Justice League. Led by Booster Gold, it only accepted members with public identities. Batman was refused admission for this reason, but provided assistance against Peraxxus and the Signal Men. When the Burners killed Rocket Red and crippled Vixen, Ice, and Fire, Booster Gold recruited O.M.A.C., Batwing, and Firehawk. The JLI disbanded after Green Lantern (Guy Gardner) clashed with Booster Gold, and the team was devastated by rogue AI satellite, Brother E.

NO SECRETS

Building on the Justice League's legacy, but with a global perspective, Justice League International fractured after losing several of its members in early missions.

JUSTICE LEAGUE OF CHINA

DEBUT *New Super-Man* (Vol. 1) #2 (Oct. 2016)

BASE Jilin Province, China

MEMBERS/POWERS **Super-Man:** Ability to focus qi to get super-strength, stamina, speed, and enhanced senses; X-ray and heat vision; can freeze breath; **Wonder-Woman:** Flight, telepathy, super-strength, magical lasso; **Bat-Man:** Genius inventor, computer hacker, highly skilled in combat; **The Flash of China:** Speed Force powers including super-speed, intangibility, and time travel; **Aquaman of North Korea:** Water manipulation, ability to command ocean creatures, magic sword; **Robinbot:** Flight, expert data analysis, rocket fists.

ALLIES Justice League

ENEMIES China White Triad, Lanterns of China, Freedom Fighters of China

The Justice League of China was formed by the Ministry of Self-Reliance in response to the emergence of the Justice League in the US. The Chinese team was expected to protect its own country while also upholding its national values. At first the group only comprised two members—Bat-Man and Wonder-Woman—but they were later joined by the New Super-Man, Kong Kenan, and The Flash of China, Avery Ho. After failing to find a compatible human equivalent of Robin, Bat-Man built a high-tech robotic equivalent.

The team eventually rebelled against their government, splitting from the Ministry of Self-Reliance and going out on their own. Later they got a new member—the Aquaman of North Korea, also known as Dragonson.

STATE OF INDEPENDENCE The Justice League of China soon rejected government interference in their activities and attitudes and decided to go their own way.

JUSTICE LEAGUE UNITED

DEBUT *Justice League United* #0 (Jun. 2014)

BASE Canada

MEMBERS/POWERS **Martian Manhunter:** Super-strength, mind control, shapeshifting; **Stargirl:** Cosmic converter belt and staff powers; **Green Arrow:** Archery, acrobatics, unarmed combat; **Adam Strange:** Advanced Rannian tech and weapons; **Animal Man:** Shapeshifting, animal control, and telepathy; **Supergirl:** Super-strength, flight, invulnerability; **Equinox:** Powers of Cree Midayo.

Martian Manhunter, Stargirl, and Green Arrow formed the Justice League United after the dissolution of the A.R.G.U.S.-sanctioned Justice League. Basing themselves in Canada, they recruited a number of other unaffiliated heroes, including a new member—the Cree girl known as Equinox.

The team's major battle was against the scheming Lord Byth, who sought to synthesize a number of alien genomes into a being he called Ultra the Multi-Alien. Byth corrupted a project begun by the people of Rann. They had envisioned Ultra as a sign of the interconnectedness of all sentient beings, but Byth instead planned to create the Slayer of Worlds. The JLU fought to prevent Byth realizing his apocalyptic goal.

Members of the team then split into several different groups to battle the Breakers—a mysterious force causing disruptions in space-time—and they ultimately journeyed to the House of Secrets for answers.

SPLINTER CELL

The Martian Manhunter oversees a group that is beyond the grasp of A.R.G.U.S. and outside the currents of US politics.

- 2 Sandman
- 3 The Spectre
- 4 The Flash
- 5 Hawkman
- 6 Doctor Fate
- 7 Green Lantern
- 8 Hourman

FOGGY MEMORIES During a time-travel adventure, the Justice League was surprised to meet the JSA, a team they had never heard of.

The original Super Hero team that would inspire all others to follow, the Justice Society of America joined forces to protect the home front of an America torn apart by World War II. Some of the world's first mystery men, this once forgotten team is back in the spotlight after being nearly omitted by the timeline itself.

The DC universe is a tumultuous place, one where major crises rock the very foundation of its timeline on a regular basis. The Justice Society of America has fallen victim to the changing whims of demigods and reality-altering super-beings perhaps more than any other team in the Multiverse. The Justice Society of America was the first team of Super Heroes. With Super Heroes still a relatively novel idea in the 1940s, the team banded together in an effort to pool their strengths and create a network in the mystery men community. Conducting meetings out of a brownstone building, the Justice Society of America thwarted attacks on

American soil by some of the worst Super-Villains of the Golden Age.

Originally, the JSA existed in the dimension of Earth-2, until the cosmic threat of the Anti-Monitor changed all that. Their Earth was combined with that of the Justice League on Earth-1, and they became the inspiration for the modern day Justice League of America that would come decades after their tenure. After losing several of their number in another cosmic Crisis called *Zero Hour* thanks to the machinations of a being called Extant, the Justice Society was later wiped from history completely during the *Flashpoint* event. However, the Multiverse has a way of correcting itself, and these classic heroes soon reemerged on a new Earth-2, one besieged by the dark forces of the evil New God Darkseid. While their Earth was taken by Darkseid's Apokolips troops, a few members survived to start anew on a new planet.

Recently, due to the meddling of the powerful being known as Doctor Manhattan and other major events during the Justice League's battle with the mother of the Multiverse, Perpetua, the Justice Society has been reborn in continuity once more. The team is now active again, saved from non-existence. Its roster has changed over the years; the Justice Society currently includes old timers like Green Lantern (Alan Scott) and Wildcat (Ted Grant), but also includes young heroes, including Stargirl and Cyclone.

ON THE RECORD

The Justice Society of America is the first Super Hero team in the history of comic books, and has existed in one form or another since 1940. A number of characters made their debuts during this time, most notably Wonder Woman in 1942 (as the team's secretary!) Headliners like The Flash and Green Lantern mingled with lesser-known players such as the Atom and Dr. Mid-Nite for a decade before going on hiatus.

The JSA returned in 1963, soon beginning a series of memorable team-ups with Earth-1's Justice League. A revived Justice Society feature in the 1970s even revealed the secret of the team's formation and the confrontation with Congress that caused the heroes to retire.

WHERE IT ALL BEGAN The first meeting of the Justice Society of America. In attendance: The Atom, Sandman, The Spectre, The Flash, Hawkman, Dr. Fate, Green Lantern, and Hourman.

CLASSIC STORIES

***All-Star Comics* #11 (Jun.-Jul. 1942)** In a surge of patriotism following the attack on Pearl Harbor, the JSA members disbanded to enlist in the armed forces. The well-intentioned heroes proved such a disruptive influence that the US Government asked them to resume their costumed activities as the Justice Battalion.

***Justice League of America* (Vol. 1) #21-22 (Aug.-Sep. 1963)** The first meeting of the JSA and JLA kicks off a decades-long series of collaborative adventures spanning Earth-1 and Earth-2.

***JSA* (Vol. 1) #16-20 (Nov. 2000-Mar. 2001)** A reconstituted JSA faces a new Injustice Society headed up by Johnny Sorrow.

DOOMSDAY CLOCK During an international incident involving Superman, the modern Justice Society of America returned in all its glory, alongside a new incarnation of the Legion of Super-Heroes.

KALIBAK

DEBUT *New Gods* (Vol. 1) #1 (Feb.–Mar. 1971)

REAL NAME Kalibak **BASE** Apokolips

HEIGHT 6ft 9in **WEIGHT** 469 lbs **EYES** Red **HAIR** Black

POWERS/ABILITIES As a New God, he is immortal and has superhuman physical strength and toughness; wields Apokoliptian weaponry.

ALLIES Darkseid, Glorious Godfrey, Desaad

ENEMIES Orion, Batman, Batman Family, Superman, New Genesis, Olsen, Big Barda

AFFILIATIONS Apokolips

Brutal and pitiless, Kalibak is the eldest son of Darkseid, lord of Apokolips. He is a devoted to his sire, and a relentless foe of Orion, the son Darkseid allowed to be raised on New Genesis. When Darkseid was incapacitated, Kalibak took

command, readying the Chaos Cannon (powered by a Chaos Shard and the body of Batman's son Damian) to destroy inhabited planets and channel their energies back to Apokolips. Batman and his associates foiled the plan by returning Damian's body to Earth. Kalibak pursued, but after a fierce battle in the Batcave he was knocked back through the portal to Apokolips.

On Earth-2, Kalibak led Parademon troopers, defeating James Olsen, who had gained New God powers. Darkseid's forces conquered Earth-2 and Apokolips destroyed the planet, though many inhabitants escaped via spacecraft.

Kalibak fought for Darkseid when he attacked Earth-0, but was blinded by his half-sister Grail. Despite his wound (and the Anti-Monitor killing Darkseid) Kalibak fought on until finally taken down by Big Barda. Recently, he lead one faction seeking control of Apokolips, almost destroying the planet with his Chaos Cannon to defeat the Female Furies, Lex Luthor and Superman, Lois Lane and Superboy.

ON THE RECORD

The original Kalibak was a fierce adversary of Orion, his half-brother who had pledged allegiance to New Genesis, and they clashed on many occasions. Though Kalibak constantly sought his father's approval, he was punished when he slew Darkseid's interrogator, Desaad. The ruler of Apokolips killed him with his Omega Beams, but later brought resurrected him. Kalibak was destroyed by Infinity-Man during the Death of the New Gods event, but was reborn on Earth in a tigerlike form.

EARTH-SHAKING ENCOUNTER
On Earth, Kalibak caused widespread destruction when he clashed with his half-brother Orion.

KALMAKU, TOM

DEBUT *Green Lantern* (Vol. 2) #2

(Sep.–Oct. 1960)

BASE Ferris Aircraft, Coast City

EYES Brown **HAIR** Black

HEIGHT 5ft 7in **WEIGHT** 155 lbs

POWERS/ABILITIES Skilled mechanic and engineer.

ALLIES Green Lantern (Hal Jordan)

ENEMIES Sinestro

AFFILIATIONS Ferris Aircraft

Tom Kalmaku is an Inuit from Alaska who traveled to California and landed a job at Ferris Aircraft as a mechanic and engineer. His keen intelligence and work

ethic made him a vital part of the team. He became good friends with test pilot Hal Jordan and a huge fan of Coast City's new Super Hero, Green Lantern.

Tom soon worked out that Hal was Green Lantern but kept quiet about it, and Hal trusted him with his secret. Tom was also rumored to keep a secret journal of Hal's adventures under lock and key. It was Tom who alerted Carol Ferris when Hal teamed up with his old enemy Sinestro. After Hal went missing, Tom and Carol opened Hal's locker to look for clues to his whereabouts. To their embarrassment, they discovered a wedding ring that Hal had bought for Carol.

KAMANDI

DEBUT *Kamandi, the Last Boy on Earth* #1 (Oct.–Nov. 1972)

EYES Blue **HAIR** Blond

HEIGHT 5ft 8in **WEIGHT** 159 lbs

POWERS/ABILITIES Resourceful survivor and warrior; skilled with firearms.

ALLIES Ben Boxer, Steve, Renzi, Doctor Canus, Prince Tuftan, Pyra, Spirit, Batman, Superman

ENEMIES Great Caesar, Tiger Empire, Rat Society, United States of Lions, Czar Simian, Lex Luthor

Kamandi was born in the aftermath of a Great Disaster that destroyed human civilization and evolved animals into near-humanoid forms, with each species striving

to be the dominant life form on Earth. "The Last Boy on Earth," along with scientist Doctor Canus and radioactive mutant Ben Boxer, tried to restore human civilization. Kamandi frequently traveled in time, meeting Batman, Superman, and a group of alternate-Earth heroes during various reality crises.

Multiversal chaos triggered by the breaking of the Source Wall revealed Kamandi to be a critical factor in the composition of all realities: He has travelled extensively across parallel existences and visited many possible futures.

When Perpetua and the Legion of Doom sought to unmake the Multiverse, Kamandi allied with The Justice League and heroes from the past and future to stop them.

KANTO

DEBUT *Mister Miracle* (Vol. 1) #7 (Mar.–Apr. 1972)

REAL NAME Iluthin **BASE** Apokolips

EYES Blue **HAIR** Brown

HEIGHT 5ft 11½in **WEIGHT** 170 lbs

POWERS/ABILITIES Immortality; tracks prey with Mother Box.

ALLIES Darkseid, Lashina, Desaad

ENEMIES Mister Miracle, Justice League, Batman

Darkseid's assassin, Kanto, is a sadistic killer. Suave and cunning, he was key in a patriarchal conspiracy on Apokolips keeping Granny Goodness'

Female Furies from achieving an elite status. Armed with a dagger-shaped Mother Box, he can track targets across space and time. Only Mister Miracle and Batman have ever escaped Kanto, and the killer determined to rectify that situation.

Darkseid sent Kanto and Lashina to Earth to hunt down Myrina Black, Amazon mother of Darkseid's daughter, Grail. When Darkseid invaded Earth, however, he was killed by the Anti-Monitor and the Black Racer, leaving Kanto and other Apokoliptian minions to face Mister Miracle and the Justice League. In battle, Kanto hurled his blade into Mister Miracle's side, but Scott Free was saved when his wife, Big Barda, charged into battle via Boom Tube and teleported Kanto to parts unknown with her Mega-Rod.

KARATE KID

DEBUT *Adventure Comics* (Vol. 1) #346 (Jul. 1966)

REAL NAME Val Armorr

HEIGHT 6ft **WEIGHT** 185 lbs

POWERS/ABILITIES Master of all martial arts disciplines; can fly with Legion flight ring.

ALLIES Princess Projectra, Diamondhead

ENEMIES Mordru, Crav, the General Nah, Terrot of the Horraz

AFFILIATIONS the Legion of Super-Heroes

Val Armorr is a being born to battle. The son a 31st-Century crime lord of Japanese descent, he was raised ofworld by martial arts mater Sensei Toshiaki (White Crane) and trained to be a living weapon.

As Karate Kid, he joined the Legion of Super-Heroes to prove his bravery and validate his training against Super-Villains such as Crav, the General Nah; however, his martial arts skills are not always a match for superpowers or advanced technologies. He enjoys and reveres the art and poetry of combat, and considers it an honor to only battle beings who would appear to be out of his league. His proudest moment thus far is kicking the archdemon and near-omnipotent Lord of Chaos Mordru in the face.

KELLEY, CARRIE

DEBUT *Batman: The Dark Knight* #1 (1986)

BASE Gotham City

EYES Red **HAIR** Green

POWERS/ABILITIES Skilled actor; encyclopedic knowledge of Shakespeare.

ALLIES Damian Wayne, Alfred, Titus

AFFILIATIONS Batman household

Drama student Carrie Kelley was hired by Bruce Wayne's son Damian to give him acting lessons so he could experience what it was like to be someone else. When

Damian didn't show up, she left her bill and a note for him at Wayne Manor. Bruce gave her a hefty check, but did not reveal the truth: his son—aka Robin—had been killed battling the Heretic. Carrie sensed Bruce was hiding something, and revisited the Manor, demanding to see Damian. Bruce informed her that Damian was studying overseas and told Alfred to show her out. Instead, the butler hired her to take care of the Manor's Great Dane, Titus. Bruce reluctantly allowed Carrie to become part of the household.

Pre-Flashpoint in a possible future for Gotham City, Carrie Kelley was a 13-year-old Batman fangirl who became the new Robin after saving the out-of-retirement and out-of-condition Dark Knight from the Mutant gang leader. She then helped track down and defeat The Joker. A faithful ally, she later took on the mantle of Catgirl, before growing into her mentor's boots as Batwoman.

KATANA

DEBUT *Brave and the Bold* (Vol. 1) #200 (Jul. 1983) (as Tatsu Yamashiro)

REAL NAME Tatsu Toro **BASE** Mobile

EYES Brown **HAIR** Black **HEIGHT** 5ft 2in **WEIGHT** 118 lbs

POWERS/ABILITIES Expert acrobat, martial artist, and swordswoman.

ALLIES Green Arrow, Sickle, Halo

ENEMIES Lady Eve, Kobra, Rā's al Ghūl, Cleaners, Onyx, Dagger Clan, Poison Ivy, Killer Croc

AFFILIATIONS Birds of Prey, Outsiders, Suicide Squad, Sword Clan

When Tatsu was a child her best friends were brothers Takeo and Maseo. Both fell in love with her, but she ultimately married Maseo. The brothers were members of the Sword Clan, one of several groups that made up the Outsiders, a secret organization devoted to preserving the balance of the world by eliminating evil and corruption. When Tatsu saw Takeo and Maseo arguing about her, she intervened, accidentally killing her husband with his sacred sword, Soultaker. It absorbed his spirit and, overwhelmed by grief, Tatsu took up Soultaker to stay close to Maseo. She then went into the world, seeking redemption as Katana.

On the advice of her husband, who spoke to her through Soultaker, she briefly joined the Birds of Prey team, helping them battle Poison Ivy and terrorist-group the Cleaners. After violently encountering the mysterious Dagger Clan in Japan, Katana left the Birds to learn more about Soultaker and the Sword Clan.

When Killer Croc broke the sword and released Maseo's spirit, her late husband told Katana she had to let go of him and dedicate herself to redeeming the warring Outsiders. After Soultaker was reformed, she became head of the Sword Clan, helping Green Arrow defeat the Fist, Spear, Shield, and Axe clans when they planned a large-scale terror attack on Prague. Following *Rebirth*, she was hired by Amanda Waller to wrangle the rebellious convicts in the Suicide Squad, and clashed with King Kobra, before joining Batman in a new Outsiders team hunting Rā's al Ghūl.

ON THE RECORD

The original Katana was Tatsu Yamashiro, whose husband, Maseo was slain with the magical sword Soultaker, wielded by his jealous gangster brother Takeo. Tatsu took up the Soultaker, trained as a samurai and, as Katana, joined Batman's Outsiders. Takeo later tracked Katana to Gotham City and released all the souls in the Soultaker sword to attack her. After a long battle, Katana killed Takeo. During *Blackest Night*, Katana battled her undead husband, who had been raised from the grave by the Black Lanterns.

BETTER THAN THE MOVIES

While serving with Halo and Looker in the Outsiders, Katana clashed with Tengu spirits and Japanese gangsters in Hollywood!

KENTS, THE

DEBUT *Superman* (Vol. 1) #1 (Jun. 1939)

BASE Smallville, Kansas

POWERS/ABILITIES Ordinary pioneering humans, with strong ideals and clearly defined principles and ethics.

ALLIES The Ross Family, the Lang Family

ENEMIES John Wesley Hardin, Jesse James gang, Charley Quantrill

AFFILIATIONS Jonah Hex, Scalphunter, Bill Hickock, George Armstrong Custer

MEN OF IRON The Kents had always worked hard and put their lives on the line to protect their family, friends, and most cherished beliefs.

The patrilineal side of the Kent family traces its history back to 6th-century England, where Sir Brian Kent battled tyranny as the Silent Knight. A thousand years later, the family had fallen from the aristocracy and at least one branch sought a better life in the New World.

In 1854, patriarch and abolitionist Silas Kent was active in the anti-slavery movement. A printer and pamphleteer, he migrated west, settling in Lawrence, Kansas, with his oldest sons Nathaniel and Jedediah. His wife Abigail had remained in Boston to raise their remaining seven children. When she died three years later, the children remained in Massachusetts. After the Civil War and Reconstruction, the Kansas Kents

generally stuck to their lands as farmers, although a succession of Kent men proudly served in America's overseas wars.

The line looked likely to end in the 20th century with Jonathan and Martha Kent, until the childless couple found a son who fell to Earth in a rocketship. They subsequently raised him in the traditions and morals which had shaped generations of Kents. The child was called Clark and would grow up to be the world's foremost Super Hero, an indomitable defender of truth and justice—Superman.

FAMILY HONOR

Jonathan and Martha's founding son was destined to become the most famous Kent in the family's long and valiant history—at least to those who knew his secret identity.

ON THE RECORD

When baby Kal-El crashed to Earth he was adopted by a couple desperate for a child of their own. In the years that followed, while their status remained constant, the Kents' ages varied to suit the times.

In *Superman* #1 (1939), they were elderly and died before their son began his heroic career. In the 1960s, they were rejuvenated by alien science to become spry 40-year olds. However, the biggest change came in the 1986 reboot, where Mr. and Mrs. Kent again became an older couple, but never died; instead offering parental love and guidance to the Man of Steel.

HEAVEN SENT

The infant found by aging Jonathan and Martha was not just the answer to their prayers, but would become the savior of the world.

KEY, THE

DEBUT *Justice League* (Vol. 1) #41 (Dec. 1965)
REAL NAME Unknown **BASE** Alaska
HEIGHT Unknown **WEIGHT** Unknown
EYES Red **HAIR** White
POWERS/ABILITIES Telepathy using psycho-chemicals.
ALLIES Troia
ENEMIES Justice League
AFFILIATIONS Intergang

The archmanipulator known as the Key worked for Intergang on experiments with psycho-chemicals that unlocked his mental potential. He claimed to have 19 senses as a result of stimulating his brain with these chemicals, and gained the ability to unlock portals to other dimensions.

The Key theorized that there was even greater potential power locked up in the minds of superpowered beings, and set about trying to release it.

Working with a mysterious ally, who turned out to be Troia, an evil future version of Donna Troy, the Key lured four Justice Leaguers and their Titans equivalents to his bunker and tried to break them psychologically to release their emotional energy. Although he did release Troia's power, she was defeated by the Titans and he was captured.

KGBEAST

DEBUT *Batman* (Vol. 1) #417 (Mar. 1988)
REAL NAME Anatoli Knyazev "The Beast"
BASE Classified **EYES** Blue **HAIR** Blond
HEIGHT 6ft 3in **WEIGHT** 231 lbs
POWERS/ABILITIES Espionage and combat training; cybernetically enhanced body; cannon replaces missing arm.
ENEMIES Batman, Batgirl, Aquaman, the Operative, the Others
ALLIES Bane, NKVDemon
AFFILIATIONS Mayhem, Suicide Squad

Anatoli Knyazev served heroically in the KGB, earning the codename KGBeast, KGBeast was critically injured in a shootout with the Suicide Squad in the Moscow

subway, but Mars Systems literally rebuilt him for combat. He then joined Soviet veteran NKVDemon in Mayhem, working to bring back the glory days of the USSR by holding the world to ransom with a nuclear-armed satellite. This brought him into conflict with the Others, a squad that included an old foe, the Operative, who destroyed KGBeast's arm cannon before finishing him off in hand-to-hand combat.

Rebranding as "The Beast," he turned to mercenary work. Hired by Bane to assassinate Batman, The Beast shot Nightwing, causing massive brain trauma, but again failing in his mission.

KHUNDS, THE

DEBUT *Adventure Comics* (Vol. 1) #346 (Jul. 1966)
BASE Khundia, Khundish Empire **HAIR** Black
POWERS/ABILITIES Aggressive and militaristic; urgent drive for status and territory.
ALLIES Dark Circle
ENEMIES United Planets, Thanagarians, Legion of Super-Heroes
AFFILIATIONS Alien Alliance, Dominators

The Khunds are an extremely aggressive, territorial warrior-race who began carving out an intergalactic empire as soon as they freed themselves from the bounds of their heavy-gravity homeworld. Their culture is based on confrontation and dominance. Khunds consider all other species as inferior and every contact with a new culture is an opportunity for conquest and expansion. The Empire is a constantly shifting hierarchy of competing warlords with the mightiest fighter ruling only for as long as he can defeat all challengers.

The most arrogant and belligerent members of the species take enormous pride in having their bodies cybernetically augmented: recreating themselves as living weapons. To a Khund, victory is everything and must be won at any price.

KID ETERNITY

DEBUT *Hit Comics* (Vol. 1) #25 (Dec. 1942)
REAL NAME Christopher "Kit" Freeman
BASE New York City
HEIGHT 5ft 10in
WEIGHT 164 lbs
EYES Blue **HAIR** Black
POWERS/ABILITIES Able to communicate with the newly dead for up to 24 hours.
ALLIES Mr. Keeper

Chris Freeman was arguing with his N.Y.P.D. detective dad when they were both shot. He remembered dying and arriving in a grotesque waiting area with the rest of the newly deceased. His dad grabbed him, begging Chris not to leave him there. What Chris did not know was why or how he had returned to life, or how his dad's corpse could say "you should be here, not me..."

Working at the Police Morgue, Chris soon discovered a strange new ability: he could bring back dead people—"Fresh Ones"—and help them settle any unfinished business. When Darby Quinn was killed, Chris helped his ghost catch the murderer, only to find Quinn was a violent aggressor and had been shot in self defense. It also brought Freeman into conflict with the spectral Mr. Keeper, who warned him there were rules he needed to follow.

KID FLASH

DEBUT *The Flash Annual* (Vol. 4) #3 (Jun. 2014)
REAL NAME Wallace Rudolph West **BASE** Central City
EYES Brown **HAIR** Black
POWERS/ABILITIES Super-speed; rapid healing; ability to absorb Speed Force energy; time-travel.
ALLIES Teen Titans, Barry Allen **ENEMIES** Professor Zoom, Future Flash
AFFILIATIONS Iris West, Daniel West/the Reverse-Flash

Wally West's father Rudy walked out on his family when the boy was still young. His mother vanished during the Crime Syndicate's attack on Central City, and 12-year-old Wally went to live with his aunt Iris. Soon after, Wally was arrested by Barry Allen for vandalism, but despite this shaky start, and thanks to Iris' persistence, they became firm friends. Twenty years in the future, a grief-maddened Barry Allen had seen his friends suffer and die while the Speed Force ruptured from being over-used for time-travel by numerous speedsters. As the Future Flash, Barry then raced back over his decades-long career, rectifying every failure, and intending to murder his younger self and use the liberated energies to "correct" history—and seal the temporal breach his actions had caused.

The future Barry was thwarted by an older Wally who was also a speedster. Allowing both Flashes' energies to pass through him, Wally sacrificed his life to reset history. He returned to his juvenile self, unaware of what had happened or that the trans-dimensional Speed Force had altered him and would soon make him a super-fast Super Hero, too.

As the latest Kid Flash carved out his own reputation in the Teen Titans and under the controversial mentorship of Deathstroke in the mercenary's Defiance team, his world was shaken by the return of another Wally West from a previous reality, further destabilizing him.

Despite all the shocks to his system, Kid Flash remains devoted to his family and the rapid pursuit of justice.

ON THE RECORD

WALLY WEST
 The Flash's helper rapidly evolved into a vibrant hero succeeding on his own terms.

inherited his grandfather's powers and costumed identity before being killed by The Flash's Rogues. Both champions were revealed to have a connection to the extra-dimensional Speed-Force, unlike Bar Torr, whose hyper-velocity remains an unexplained accident. A terrorist insurgent in his own time, he learned to be a hero, battling beside young 21st-century metahumans as Kid Flash in the Teen Titans.

BAR TORR
 The amnesiac speedster from the 30th century learned how to run fast enough to escape the shame of his evil past.

Kid Flash was the first original sidekick of DC's Silver Age, offering a youngster's perspective to the adventures of the Fastest Man Alive. Wally West shared cases with his mentor and joined fellow superpowered kids in the Teen Titans before inheriting the mantle and responsibilities of The Flash after Barry Allen gave his life during the *Crisis on Infinite Earths*. Wally's sometime-sidekick and eventual successor was Bart Allen—aka Impulse—who

KILLER CROC

DATA

DEBUT *Detective Comics* (Vol. 1) #523 (Feb. 1983)

UPDATE *Batman* (Vol. 2) #1 (Nov. 2011)

REAL NAME Waylon Jones **BASE** Gotham City

HEIGHT 6ft 5in **WEIGHT** 300 lbs **EYES** Yellow **HAIR** None

POWERS/ABILITIES Rare skin condition allows for enhanced durability; enhanced strength and endurance; excellent fighter with history of wrestling alligators; razor-sharp teeth and claws.

ALLIES Arsenal, Catwoman, Gotham City Monsters

ENEMIES Batman, The Batman Family, Bane

AFFILIATIONS Arkham Asylum inmates, Suicide Squad, Gotham City Monsters

MOCKING THE CROC
As a boy, Waylon Jones' skin condition caused him to be teased by his peers, leading to the nickname Croc, which he would later fully embrace.

her nephew appear as normal as the boys and girls that mocked him.

Years later, Waylon made his way to Jacksonville, Florida and became a sideshow act wrestling alligators in the Eddie Geisel Circus Sideshow. Now completely covered in hard green scales, Waylon was dubbed Killer Croc. Waylon became frustrated with his low income from Geisel, and literally bit the hand that fed him, quitting the act and returning to Gotham City to become a thief. He soon crossed paths with Batman and the original Robin during a jewelry heist. The two heroes brought him to justice, but would go on to see the fierce villain escape incarceration at Arkham Asylum time and again. On one occasion, he even chomped off the hand of one of the Asylum's toughest guards, Aaron Cash.

Recruited into Task Force X, the government's secret Suicide Squad, Killer Croc went on a variety of covert operations and began a rather doomed relationship with a fellow Belle Reve inmate, Enchantress. While he mourned her loss when she seemingly died during a mission, Croc decided to stay on the side of the angels after earning his freedom thanks to completing a number of Suicide Squad missions. He joined up with a few fellow Gotham City Monsters for a time and began to run Tusk's Hotel in Gotham City's newly established Monstertown neighborhood. A clash with Batman earned Croc another stint in Arkham Asylum; however, but both he and Batman have high hopes that he will he will fully rehabilitate some day.

Killer Croc may not be the sharpest knife in the drawer, but his razorlike claws and teeth certainly make up for it. Almost more animal than man, this ferocious Super-Villain has challenged Batman to many fights—ones that the Dark Knight has been lucky to walk away from in one piece. Killer Croc is truly a force to be feared and remains one of the most dangerous inmates ever to be housed in Arkham Asylum.

Waylon Jones had always been different. Growing up in a poor neighborhood in Gotham City, he lived a lonely life with his Aunt Flowers. With no parents of his own, Waylon had only his aunt to look up to, but she despised her nephew because of the way he looked. Born with a rare medical condition that caused scales to form on his body and bumpy, horn-like protrusions to grow on his head, as well as giving him jagged teeth and claws, Waylon was cruelly nicknamed "Croc" by the local kids. His aunt attempted to scrub off Waylon's scales when they first emerged, but had no luck making

ON THE RECORD

First appearing shortly before the epic maxiseries *Crisis on Infinite Earths*, the original incarnation of Killer Croc was far smarter than his savage post-*Flashpoint* successor. Depicted as a criminal mastermind slowly taking over Gotham City's underworld, Killer Croc—also called King Croc—murdered the Flying Todds, Gotham City's newest trapeze act sensation. The Todds' son, Jason, survived, and would go on to become the second Robin. Some years later, Jason's story was rewritten with the future Robin now being depicted as an orphaned street kid with little historical connection to Killer Croc.

KILLER OR KING?

In his later appearances, Killer Croc became simply muscle-for-hire, a far cry from the gang boss that earned a feared reputation as King Croc.

MURKY DEPTHS

Killer Croc can often be found in the sewers, with the old tunnels providing him with the perfect hideaway. Croc often takes charge of some of the other forgotten souls who dwell there.

BATTLE OF THE BRAUN

The powerful villain Bane challenged Killer Croc for territory while clad in a makeshift Batsuit. Bane came out on top, besting the scaly beast in fierce combat.

CLASSIC STORIES

***Detective Comics* (Vol. 1) #525 (Apr. 1983)** Batman tangles with Killer Croc in the Gotham City sewers, realizing how ferocious his new opponent truly is.

***Batman* (Vol. 1) #359 (May 1983)** Killer Croc's origin is told for the first time as he declares himself "King Croc," and takes his place as one of Gotham City's major criminals.

***Batman* (Vol. 1) #489 (Feb. 1993)** Croc is given the spotlight as he takes on Robin, Azrael, and the threat of a formidable new villain, Bane.

KILLER FROST

DEBUT *Firestorm* (Vol. 1) #3 (Jun. 1978)

REAL NAME Dr. Caitlin Snow

HEIGHT 5ft 4in **WEIGHT** 123 lbs

EYES Blue **HAIR** White

POWERS/ABILITIES Can project ice and snow from her fingertips; feeds off others' heat.

ALLIES Steve Trevor, Batman

ENEMIES Firestorm, Amanda Waller

AFFILIATIONS S.T.A.R. Labs, Justice League of America, A.R.G.U.S.

Dr. Caitlin Snow was a brilliant employee of S.T.A.R. Labs, assigned to their Arctic base. Here she found her fellow scientists had been stymied in their work on a thermodynamic ultraconductor engine. Not knowing that her peers were associated with terrorist group H.I.V.E., Snow was blindsided by her colleagues and locked in with the experimental machine. While trying to save herself by pulling out the machine's coolant wires, Caitlin was fused with ice and transformed into Killer Frost.

Now needing to feed on heat from living things, Snow discovered that the energies of Firestorm were the only thing that sated her hunger, prompting many clashes with the hero. Constantly starving, she became a reluctant but predatory Super-Villain, but ultimately redeemed herself working with Steve Trevor and A.R.G.U.S. to battle the Earth-3 invasion of the Crime Syndicate.

Frost was captured and remanded to Amanda Waller's Suicide Squad, but rescued by Batman, who saw her need to

redeem herself was genuine. He placed her in his new Justice League of America team where she blossomed into a true hero while battling the likes of The Extremists, Queen of Fables, Chronos, and Terrorsmith.

KILLER MOTH

DEBUT *Green Arrow* (Vol. 5) #25 (Jan. 2014)

REAL NAME Drury Walker

BASE Gotham City **EYES** Black **HAIR** Black

POWERS/ABILITIES Mediocre combatant; employs moth-themed gimmicks to intimidate.

ALLIES Richard Dragon, Brick, Red, Count Vertigo

ENEMIES Green Arrow, Batman, Batgirl, Emiko Queen

AFFILIATIONS Longbow Hunters

Killer Moth appeared during the super-storm that ravaged Gotham City in *Year Zero*. Obsessed with moths and money, he tried to kidnap billionaire Moira Queen, who was

leading relief efforts. His airgun devastated her bodyguards, but was no defense against Batman and Green Arrow. Later, he joined the Longbow Hunters, costumed mercenaries paid millions to destroy everything Green Arrow cherished. Despite his murderous ways, Killer Moth was a coward. He was beaten by Oliver Queen's assistant Naomi Singh and her little sister Emiko.

Pre-Flashpoint and *post-Rebirth*, Killer Moth is a minor Batman villain, basing his MO on the Dark Knight's arsenal, while terrorizing wealthy families and organizing gangs of super-criminals into a private army. His latest recruitment drive was dismantled by Batwoman, Robin (Tim Drake), Clayface, Spoiler, and Orphan.

KILLER SHARK III

DEBUT *Blackhawk* (Vol. 1) #50 (Mar. 1952)

(Killer Shark I); *Birds of Prey* (Vol. 1) #114 (Mar. 2008) (Killer Shark III)

BASE Various

HEIGHT 5ft 11in **WEIGHT** 214 lbs

EYES Blue **HAIR** Black

POWERS/ABILITIES Self-made millionaire; superb athlete; sharp teeth; customized weaponry.

ALLIES Queen Killer Shark, Killer Shark I

ENEMIES Lady Blackhawk, Birds of Prey

The man calling himself Killer Shark is the grandson of the original Killer Shark, a pirate of the Pacific Ocean. The elder Killer Shark raided ships using a variety

of high tech devices to make off with his stolen loot. He was also a sworn enemy of the famous pilots called the Blackhawks, and even invented a serum that could make others do his bidding.

When his grandson inherited his mantle and arsenal, a new Killer Shark was born. He quickly tracked down and kidnapped the time-displaced Lady Blackhawk, using his grandfather's serum to change her into Lady Killer Shark. He was infatuated with his new "partner," but when Lady Blackhawk's Birds of Prey teammate Huntress came her rescue, Killer Shark attempted to force her to become his slave as well, leading to his ultimate defeat.

FATHER FIGURE
Having lost his family and world twice, Kilowog was deeply invested in making sure his rookies were ready for anything.

DEBUT *Green Lantern Corps* (Vol. 1) #201 (Jun. 1986)

BASE Oa, Mogo, New Oa

HEIGHT 8ft 3in **WEIGHT** 720 lbs **EYES** Red **HAIR** None

POWERS/ABILITIES Inspirational trainer, brilliant geneticist and technologist, skilled engineer, ferocious hand-to-hand fighter employing vast bulk and strength; experienced and imaginative wielder of the light of Willpower, channeled through a standard Green Lantern power ring.

ALLIES Guy Gardner, John Stewart, Salaak, Hal Jordan, Kyle Rayner

ENEMIES Sinestro, Darkstars

AFFILIATIONS Green Lantern Corps, Rocket Red Brigade

Kilowog was a brilliant geneticist on bustling, Bolovax Vik. The psychic wrench of abandoning his species was tremendous, but Kilowog was also proud to serve the greater universe as Sector 674's Green Lantern.

When Bolovax Vik was destroyed during the *Crisis on Infinite Earths*, Kilowog saved all 16 billion Bolovaxians by converting them to energy and storing them in his power ring. He could not repeat the feat when Sinestro eradicated them all after they resettled on a new planet. With his race twice-lost, Kilowog dedicated his life to the Green Lantern Corps. His entire nature centers on being part of a greater whole and he found purpose in training new recruits, giving them the tools necessary to survive the most dangerous job in creation.

The greatest shock in his life came after discovering the Guardians of the Universe had betrayed their own principles, turning upon their Green Lanterns and attempting to eradicate Free Will with their abhorrent Third Army. Following the Guardians' defeat and destruction at the hands of Sinestro, Kilowog stepped down as Corps Drill Instructor, reluctantly assuming the critical role of Protocol Officer for the now autonomous Corps. With the remaining repentant Guardians advising Corps Director John Stewart, Kilowog faced constant change: a fractious alliance of Yellow and Green Lantern Corps, deadly attacks by Controllers, war against the Kryptonian House of Zod, and even an attack from the future by last Yellow Lantern Sarko. The most telling blow came when former student Tomar Tu betrayed his principles, murdering a prisoner in custody before leading the Darkstars in a war against the guilty and executing murderers as judge, jury, and executioner.

ON THE RECORD

A lonely alien craving the tight communal affinity of Bolovaxians, Kilowog was drawn to his lost culture's closest equivalent: Communism. He began to associate with the leaders of the Soviet Union and used his alien science to complete their Rocket Red armored super-soldier program. His disappointment in discovering that everyday practice did not live up to philosophical principles quickly drove Kilowog back to his only true comrades: the Green Lantern Corps.

THE GREATER GOOD
Kilowog could not grasp why his human Green Lantern friends thought his political associations would lead to trouble.

KING SHARK

DEBUT *Superboy* (Vol. 4) #0 (Oct. 1994)
REAL NAME Nanaue
BASE Mobile
HEIGHT 7ft 2in **WEIGHT** 380 lbs
EYES Red **HAIR** None
POWERS/ABILITIES Giant shark-like humanoid possessing incredible strength.
ALLIES Mera, Aqualad
ENEMIES Aquaman, Superboy
AFFILIATIONS Suicide Squad, the Society

The Super-Villain known as King Shark is the son of Kamo, a being convinced that he was an ancient Hawaiian deity.

When government agent Amanda Waller took Kamo into custody, she also kidnapped his son, King Shark. Considered the “first child of Belle Reve,” King Shark was raised in the high-security prison. As an adult, King Shark was tortured, along with other would-be members, by Amanda Waller as part of the loyalty test during her vetting process for Task Force X—a clandestine government strike force more commonly called the Suicide Squad.

Despite his ordeal, King Shark joined the Suicide Squad, and while he has on occasion eaten a team member, he proved to be an effective operative before disappearing during a mission. He later resurfaced as a loyal servant of the amphibious Queen Mera.

OUT FOR BLOOD
 Killer shark's voracious appetite makes him an unpredictable and dangerous threat—to foes and friends alike.

KING SNAKE

DEBUT *Robin* (Vol. 1) #2 (Feb. 1991)
REAL NAME Sir Edmund Dorrance
BASE Gotham City
HEIGHT 6ft 2in **WEIGHT** 220 lbs
EYES White (Blind) **HAIR** Blond
POWERS/ABILITIES Expert martial artist; ties to the criminal underworld.
ALLIES Lynx, Bane
ENEMIES Batman, Red Robin, the Batman Family
AFFILIATIONS Kobra, Black Lantern Corps

A mercenary who traveled to island nation Santa Prisca, Sir Edmund Dorrance lost his eyesight during a covert government commando raid on his

forces. Dorrance escaped, leaving behind a son, whom he'd fathered with a local rebel. The child became the Super-Villain Bane, and Edmund himself grew infamous as King Snake: ruthlessly rising up the criminal ladder to become a major gang lord.

After repeated clashes with Robin (Tim Drake), and a failed attempt to usurp leadership of global terrorist cult, Kobra, King Snake seemingly fell to his death battling Batman and Bane. However, Dorrance returned to terrorize Gotham City as a member of the undead Black Lantern Corps, and was restored to life and history following the *Rebirth* event. He was last seen battling Batman and Catwoman.

KLARION

DEBUT *The Demon* (Vol. 1) #7 (Mar. 1973)
REAL NAME Klarion Bleak
BASE New York City
HEIGHT 5ft 11in **WEIGHT** 113 lbs

ALLIES Teekl, Beelzebub, Piper, Oblivion, Rasp
ENEMIES The Necropolitan Club, Teen Titans, Etrigan the Demon, Justice League Dark
AFFILIATIONS The Elite, Injustice League Dark, Seven Soldiers

Hailing from a magical dimension, Klarion was a student of mystical arts. When he lashed out at his teacher using magic, he realized that he couldn't return home, and he made his home

on Earth. There he began to work and train at New York's Moody Museum under a mysterious woman named Piper, meeting new magical allies. Klarion clashed with the Secret Six when their teen member Black Alice began disrupting the magical community with her hex powers.

Klarion and his cat familiar Teekl are part of The Seven Soldiers, battling malign Sheeda invasions and traversing dimensions with young hero Sideways. During the reality-warping return of Perpetua and eldritch Witching War, Klarion chose evil and joined the resurgent Circle's villainous cabal Injustice League Dark to remake magic in their image.

KNIGHT

DEBUT *Knight and Squire* (Cyril): *Batman* (Vol. 1) #62 (Dec. 1950–Jan. 1951); *Squire* (Beryl): *JLA* (Vol. 1) #26 (Feb. 1999)

HEIGHT 5ft 6in **WEIGHT** 131 lbs
EYES Blue **HAIR** Red
POWERS/ABILITIES Talented detective, trained acrobat, proficient in unarmed combat; martial artist, multilingual, genius-level problem-solver
AFFILIATIONS Batman Incorporated

British crime fighters Knight and Squire are a generational hero- team with their origins in World War II, when Percy Sheldrake—a boy of noble birth—became sidekick to mystic warrior Shining Knight. As an adult, Percy trained his son Cyril to be his partner. Together they tackled injustice as Knight and Squire until Percy was killed by their archenemy Springheeled Jack.

Cyril sank into depression until local lass Beryl Hutchinson helped him. He revived the family tradition with Beryl as his new Squire. They worked often with Bruce Wayne's multinational Batman Incorporated and when Cyril was killed fighting Heretic—a giant monster clone of Damian Wayne—Beryl took over the Knight's mantle. In the wake of the *Doomsday Clock* crisis, she organized Britain's disparate Super Heroes into patriotic team Knight's Inc.

KNIGHT RIDER
 Although dedicated to defending Britain from Super-Villain threats, the latest Knight is a hi-tech champion combatting evil on a global stage.

POWERS/ABILITIES Wealthy manipulator and actor; adept martial artist; well-connected, wears discarded Azrael suit.
ALLIES Mirror, Grotesque, Gretel, James Gordon, Jr.
ENEMIES Batgirl, Birds of Prey, Batwoman
AFFILIATIONS The Outsiders, the Disgraced

The daughter of a real-estate millionaire, Charise constantly met men who liked her for daddy's money. She thought Trevor was different—and he truly was. Trevor murdered

her family in front of her eyes. Instead of reporting him, Charise bided her time and plotted revenge. Sentenced for her crimes, she reemerged from Arkham Asylum as Knightfall, kidnapping and torturing Trevor and clashing with Batgirl several times. All the while, Charise exploited her past to position herself as a well-respected member of society until her ultimate defeat at the hands of Batgirl and her allies.

During the *Doomsday Clock* crisis, she used decommissioned Azrael Armor to join and work with Markovia's Outsiders Super Hero Team.

POWERS/ABILITIES Superhuman strength and durability; regeneration.
ALLIES Scandal Savage, Rag Doll, Dubbilex
ENEMIES Female Furies, Granny Goodness, Silicon Dragons, Vandal Savage
AFFILIATIONS Female Furies, Secret Six

Knockout rejected the brutal warrior's life in Darkseid's Female Furies and fled to Earth to have fun. Working as an exotic dancer in Hawaii, she clashed repeatedly

with Superboy before being recruited into the Suicide Squad. Knockout walked a fine line between hero and villain; often pushing the heroes and villains she hung out with into less and less ethical actions.

She later joined metahuman mercenaries the Secret Six where, at the request of its leader—and her latest love—Scandal Savage, Knockout, aka “Kayo,” infiltrated Lex Luthor's Super-Villain group, the Society.

After a period of thrilling capers on the run with Scandal, Knockout was killed by Infinity-Man. Her soul went to Hell, but was rescued by Secret Six comrade Rag Doll, who voluntarily took her place there.

HEIGHT 6ft 2in **WEIGHT** 200 lbs

EYES Black **HAIR** Bald

POWERS/ABILITIES Charismatic leader; genius-level intellect; expert in unarmed combat.

ALLIES Lady Eve

ENEMIES Katana, Checkmate, Suicide Squad, Jason Burr, Superman, Batman, Wonder Woman, Black Adam

Jeffrey Burr was stolen by the ancient Kobra Cult and raised in their murderous ways. As “Naga-Naga,” he went on to battle countless Super Heroes in his struggle to rule the world. Jeffrey’s twin brother Jason had a regular upbringing, until government agents revealed to him that he was psychically linked to a brother he knew nothing about. The lawmen wanted to use that connection to control his brother, now called Kobra. Despite the efforts of several Super Heroes, Kobra had Jason killed before expanding his terrorist depredations. Years later, Black Adam killed Jeffrey, and the role of Kobra went to his archenemy and resurrected brother, Jason.

Following, *Convergence* and *Rebirth*, a new, King Kobra arose. Anonymous and ruthless, this new Naga Naga attempted to conquer Markovia with a serpent army. He clashed with Katana and the Suicide Squad, and was accidentally responsible for creating new Super Hero Halo. In another encounter,

CULT LEADER

Jeffrey Burr, leader of the powerful Kobra cult, was prepared to stop at nothing to attain world domination.

his servant Lady Eve almost destroyed Task Force X. Kobra later fell foul of the Creeper and Black Adam during the *Doomsday Clock* affair. A megalomaniac convinced the world is his by divine right, Kobra plays no favorites, battling heroes like Batman and using villains like Bane in his march to power. His organization was severely damaged by Leviathan’s unilateral assault on covert groups, but he will inevitably rebuild.

KOMODO

DEBUT *Green Arrow* (Vol. 5) #17 (Apr. 2013)

REAL NAME Simon Lacroix

HEIGHT 5ft 10in **WEIGHT** 176 lbs

EYES Black **HAIR** Black

POWERS/ABILITIES Highly intelligent; martial artist; highly skilled in Kyudo archery.

ALLIES Mr. Kryp

ENEMIES Green Arrow, Shado, the Bear

AFFILIATIONS Outsiders, Arrow Clan, Magus

Born into abject poverty, Simon Lacroix amassed a huge personal fortune over time through sheer grit and his own innate brilliance. Working under Robert

Queen, Simon shared his boss’ obsession with the obscure martial cult, the Arrow Clan. He was the son Robert had always wanted, rather than the wastrel Oliver, who was an embarrassment to the Queens.

A man of overweening ambition, Lacroix then murdered Robert, adopted his illicit daughter Emiko, and trained with the bow until he became one of the world’s most lethal archers. Stealing the Queen fortune through his own company, Stellmore International, Lacroix adopted the masked identity of Komodo and framed Green Arrow for murder. A confrontation ensued, and after a battle with Green Arrow, Komodo lost an eye. He was later killed by Emiko when she learned of her true parentage.

KRYPTONITE MAN

DEBUT *Action Comics* (Vol. 1) #249 (Feb. 1959)

REAL NAME Clay Ramsay

BASE Metropolis

EYES Blue **HAIR** Brown

POWERS/ABILITIES Radiation absorption and generation, superhuman strength, and flight.

ALLIES Lex Luthor, Dr. Abernathy, General Sam Lane

ENEMIES Superman, Steel

AFFILIATIONS Anti-Superman Army, K-Men

Bully and wife-beater Clay Ramsay was an early recipient of Superman’s justice after the caped hero debuted in Metropolis. Tossed into Hob’s Bay, the psychopath

transferred all his rage onto the Man of Steel. Increasingly unstable, Ramsay tried suing Superman after his wife left him, then volunteered for Lex Luthor’s Project K-Man. Luthor needed a Superman deterrent and Clay’s hatred for “the alien” made him the perfect subject.

During his first treatment with stolen Kryptonite, Ramsay was accidentally given excess energy. Super-strong and radioactive, he escaped and attacked Superman, but was defeated. In custody, Clay was conscripted by General Sam Lane to be his secret anti-Superman weapon.

DEBUT *Green Lantern* (Vol. 2) #40 (Oct. 1965)

BASE Maltus

HEIGHT 3ft 5in **WEIGHT** 62 lbs **EYES** Green **HAIR** Black

POWERS/ABILITIES Immortality; full range of psionic abilities possessed by hyper-evolved Maltusians; flight; energy manipulation and projection; mind-control; overwhelming intellect and advanced technical genius.

ALLIES Nekron

ENEMIES Guardians of the Universe, Green Lantern Corps

AFFILIATIONS Guardians of the Universe, Black Lantern Corps

Krona was the most exalted of the scientific super-beings who developed on Maltus when the universe was young. Obsessed with discovering how creation began, he ignored all warnings and built a machine that took him back to the dawn of time. The moment he glimpsed the birth of everything, his machine exploded, fracturing reality into a multiverse, and shortening the lifespan of all existence. This mishap also created the Anti-Matter Universe, unleashing evil upon all life. In response, his colleagues declared themselves Guardians of the Universe, eschewing all emotion and developing chaos-suppressing organizations to mitigate the damage Krona had caused. Krona was converted into energy and set to eternally orbit the cosmos he had despoiled. The super-Maltusians subsequently divided into squabbling factions: Zamaron, Controllers, and Guardians.

Billions of years later, Krona repeated his experiment, but was foiled by Green Lantern Hal Jordan. Returned to his energy state, the renegade then penetrated the Death Dimension and allied with Nekron, leading to the rise of Black Lanterns and *Blackest Night*. After attempting to seize the Emotional Spectrum’s Light Entities in his all-consuming obsession to learn the origins of creation, Krona was executed by Jordan. His body was given to Atrocitus by Guardian Ganthet, but was subsequently stolen by the Red Lantern’s son, Abysmus. The latter desecrated and consumed Krona’s body to acquire the power remaining within.

KNOWLEDGE IS POWER

Krona was enslaved by his need for answers and was oblivious to the untold suffering caused by his curiosity.

A BOY AND HIS DOG

Krypto and Superboy share a common bond: both are outcasts, science-enhanced instinctive warriors, and fiercely protective of their friends and family.

ON THE RECORD

Superman's best friend has always been his dog. A test-subject in Jor-El's rocketry experiments, canine Krypto was trapped in suspended animation in space for years, first coming to Earth when Clark Kent was still a Superboy.

For decades, the Hound of Steel split his time between Earthly adventures and roaming across time and space. Faithful unto death, the Silver Age Krypto perished saving his beloved master from Kryptonite-Man.

TRUE LOVE

Despite all the tragedies that stemmed from Krypton's destruction, Superman's joy was boundless after finding his oldest childhood friend was still alive.

With Krypton crumbling to pieces around him, a desperate Jor-El sought refuge for his family in the Phantom Zone. When the prisoners exiled within threatened baby Kal-El, the El family's faithful dog Krypto drove off the attackers, but was dragged into the timeless dimension with them. Deprived of all other options, Jor-El entrusted the life of his son to an experimental rocketship he sent to Earth, before apparently perishing with his wife and race. As Krypton exploded, the valiant hound—reduced to an intangible, timeless ghost—stayed close to his young charge. Despite being trapped behind imperceptible dimensional walls, Krypto loyally continued watching over Kal-El as he grew up on Earth.

Eventually, Krypto was freed and reunited with his beloved Kal-El. Supercharged by yellow solar radiation, the good boy quickly adapted to his new solid-state existence and has extended his precious family. He mixes exploratory wanderings around the world with the sacred duty of protecting his two-legged family pack, which includes youthful El clone Conner Kent, young pup Jon Kent (Superboy), his mother Lois, and cousin Kara Zor-El. After a fun adventure with other animal heroes against bad beasts, Krypto embarked on a big trip guarding Supergirl as she scoured the galaxy for the true murderers of Krypton.

FRISKY BUSINESS

Superboy's elation with Krypto's reemergence in his life was always tempered by the problems the Dog of Steel's playful antics could cause.

KRYPTONIANS

DEBUT *Action Comics* (Vol. 1) #1 (Jun. 1938)

POWERS/ABILITIES On Krypton: high intelligence, dense molecular structure, cells capable of absorbing and storing certain frequencies of radiation. Under a yellow sun: super-strength, speed, flight, invulnerability, enhanced senses—all fueled by exposure to solar energy.

ENEMIES The Char, Brainiac, the Multitude

SOLAR SUPERPOWER

All Krypton's lifeforms possess a cellular structure that hyper-efficiently processes yellow solar radiation. They gain superpowers after prolonged exposure.

Krypton was a dense world circling the red sun Rao. Despite its immense gravity, a passionate, adventurous, and intelligent humanoid race flourished there. Over millennia—filled with periodic outbreaks of destructive warfare—Kryptonians reached an impressive level of technological advancement. Much of their later civilization was based on a multi-purpose crystal mineral: Sunstone.

For a time, Kryptonians were starfaring, but as a result of increasing planetary conflicts, they eventually lost the secret of escaping the planet's potent gravity-well. They also developed cloning to a high degree, but when the mass-produced duplicates became entrenched as a slave species, the clones rose up in bloody revolt. The atrocities that followed led to cloning being outlawed and, over time, utterly detested.

Ultimately, Kryptonian culture was ended through ignorance and arrogance. The ruling Council refused to acknowledge the findings of leading scientist Jor-El when he discovered the planet's core was highly unstable and heading toward an annihilating atomic detonation.

ON THE RECORD

An iteration of Krypton seems to exist in each of the 52 universes of the Multiverse. Krypton-23's last survivor became his adopted Earth's American President Calvin Ellis, while on Earth-10 the stellar founding crash-landed in Nazi Germany and his presence resulted in that world's surrender to global fascism.

The most radical alternate was Earth-3's evil paragon Ultraman, who gained power by consuming Kryptonite and lost strength under a yellow sun.

ACME OF CIVILIZATION

Every incarnation of Krypton had used science to create a virtual paradise; but none could modify the all-too-human failings of its citizens.

DEBUT *Richard Dragon, Kung-Fu Fighter* (Vol. 1) #5 (Dec. 1975–Jan. 1976)

REAL NAME Sandra Wu-San

HEIGHT 5ft 8in **WEIGHT** 128 lbs **HAIR** Brown **EYES** Green

POWERS/ABILITIES Universal mastery of martial arts, including unarmed combat and a wide array of weapons.

ALLIES Richard Dragon, Orphan, the Signal

ENEMIES Rā's al Ghūl

AFFILIATIONS League of Assassins, League of Shadows, The Outsiders

DEATH OF DEATHSTROKE?

Lady Shiva urged fellow martial artist Bronze Tiger to trace his old friend and drinking partner, Deathstroke—and kill him.

Mastering a number of different martial arts and weapons skills in her childhood, Lady Shiva was an expert assassin by the time she was a teenager. Batman has said she is without peer as a hand-to-hand combatant, and her skill with blades is equally superb.

Born in a small Chinese village known as a place of assassins, Sandra Wu-San suffered a childhood filled with trauma—much of which remains a mystery. She trained hard to become an exceptional martial artist to seek vengeance on those that wronged her and later became an assassin for hire. Wu-San joined the League of Assassins and became known as Lady Shiva, after the Hindu god of destruction.

Neither a conventional hero or villain, she has both fought and allied with a number of different heroes over the years, including Batman, Robin, Red Hood, and Nightwing. As an adult, she fought Dick Grayson the first time he went into the field as Robin to save Batman, defeating him easily and then advising him to get out of Batman's shadow and forge his own identity. Several years later, she battled Nightwing and realized Grayson had taken her advice. As a trainer for the League of Assassins, she taught Red Hood, Bronze Tiger, and others, and allied with the League to fight off an Untitled infiltration of their hidden base.

If Lady Shiva has a weak spot, it is her daughter, Cassandra Cain. The daughter of the assassin and original Orphan David Cain, Cassandra never knew her mother, and adopted the identity of Orphan when she chose to become a vigilante. Breaking away from Rā's al Ghūl and taking command of his elite team known as the League of Shadows, Lady Shiva visited Cassandra on a trip to destroy Gotham City. Shiva killed Gotham City's Mayor Hady and set her sights on razing the entire city in order to disrupt all the money and energy Rā's al Ghūl had put into Gotham City over the years. Cassandra and Batman opposed Shiva, but it was Rā's al Ghūl who shot and killed her.

Rā's al Ghūl resurrected Lady Shiva using the mystical, life-restoring Lazarus Pits; however, Shiva soon saw an opportunity to break away from his control again when the Super-Villain terrorist bombed a school in Metropolis. Shiva joined up with the principal of that school, Jefferson Pierce—aka Black Lightning—and his Super Hero team, The Outsiders. While her true motivation was another attempt to connect with her daughter, Shiva became more committed to defeating her old employer when Rā's destroyed the village in which she had grown up. Lady Shiva successfully helped The Outsiders to defeat Rā's al Ghūl's latest terrorist campaign, even if her lethal methods clashed with the team's own morals.

MORTAL COMBAT

Lady Shiva has often been spotted in Gotham City, clashing with the Batman family on multiple occasions.

CLASSIC STORIES

Batman (Vol. 1) #509 (Jul. 1994)

After Batman is paralyzed by Bane, Lady Shiva works with him to regain not just the use of his legs, but his fighting spirit.

Batgirl (Vol. 1) #73 (Apr. 2006)

Lady Shiva apparently dies in a battle to the death with Cassandra Cain.

ON THE RECORD

Lady Shiva was the mother of Cassandra Cain, and challenged her daughter to a series of battles when the young woman first became Batgirl. With each duel, she taught Cassandra a little more, freeing the hero of her death wish. Eventually, Batgirl turned the tables on her mother and defeated Lady Shiva by forcing her to confront her own desire for death.

Shiva has also demonstrated surprising loyalty to former teammates who have also been enemies. When Spy Smasher seized control of the Birds of Prey, Lady Shiva came to Oracle's defense.

JADE WARRIOR

Lady Shiva was briefly allied with the Birds of Prey, adopting the name Jade Canary.

ALLIES Green Lantern Corps, JLA, Omega Man

Formed after an alien invasion of Earth, the Licensed Extra-Governmental Interstellar Operatives Network (L.E.G.I.O.N.) is a heroic peacekeeping force that protects planets that subscribe to its services. The brilliant Coluan, Vril Dox II (son of Brainiac), founded L.E.G.I.O.N. after he and its original core members escaped from a Dominator-run "Starlag" prison camp.

On their first mission, Vril Dox and his compatriots liberated Dox's homeworld of Colu from the domineering grip of the ruling computer tyrants. They then cleaned out the riffraff from the vile planet of Cairn—the galaxy's "drug world"—and made it their headquarters, though they established satellite command centers on every planet where they mounted sustained operations.

L.E.G.I.O.N.'s rapid run of triumphs lured several high-paying clients and attracted new members, which led to the membership roster remaining in constant flux. L.E.G.I.O.N. continued its success until Dox's super-smart, malevolent son, Lyril,

usurped control and led the group down a very different path. In response, several members formed a rival team, R.E.B.E.L.S., to restore L.E.G.I.O.N.'s good name. Vril Dox eventually returned as the L.E.G.I.O.N.'s leader, just in time for the Rann-Thanagar War, and the team has since appeared battling alongside various Lantern Corps.

LADY BLACKHAWK

HAIR Black **EYES** Brown
ABILITIES Expert pilot, marksman, and unarmed combatant.
ALLIES Oracle
ENEMIES Court of Owls, Secret Six
AFFILIATIONS Blackhawks, Birds of Prey

The first Lady Blackhawk, Zinda Blake, became an expert pilot during World War II with the intention of becoming the first female member of the

legendary Blackhawks. Soon accepted among their number, Blake joined their wartime exploits and fought Killer Shark.

After the reality-warping event *Zero Hour*, Lady Blackhawk joined the Birds of Prey as a pilot, her loyalty contingent on Oracle's role as team leader. Another Lady Blackhawk—Natalie Reed—served with the team from World War II into the Cold War years.

A third, as yet unnamed Lady Blackhawk, wearing an eye patch, appeared as part of a Blackhawks covert-ops team. The group shut down the mysterious Mother Machine, averting the threat of a cyber-attack and a global release of dangerous nanotechnology.

ABILITIES Shapeshifting; flight.
ALLIES Frankenstein, Red Phantom, Orca, Killer Croc, Andrew Bennett, Batwoman
ENEMIES Melmoth
AFFILIATIONS Kobra Cult

Sondra Fuller used to work for the Kobra Cult, where she was transformed into a being of living clay with the intention of making her into a living weapon. After

leaving Kobra, Sondra, also known as Lady Clay, spent her days trying to achieve perfection, to be the epitome of the ideal human. She could create people using parts of her clay body, and send them out into the world to have life experiences to bring her closer to perfection. When one of her "people" was killed in a ritual to raise the demonic Melmoth, Lady Clay had lost a piece of her soul. She agreed to team up with Frankenstein and other supernatural beings of Gotham City's Monstertown to take down Melmoth.

LANG, LANA

DEBUT *Superboy* (Vol. 1) #10 (Sep.-Oct. 1950)
BASE Metropolis, Smallville
HEIGHT 5ft 7in **WEIGHT** 127 lbs **HAIR** Red **EYES** Blue
POWERS/ABILITIES No superpowers, but a fiercely loyal friend with an unbreakable will; brilliant engineer and journalist.
FORMER POWERS Solar energy conversion affording electrokinesis, EM spectrum manipulation and blasts, superhuman strength, invulnerability and flight.
ALLIES Superman, John Henry Irons, Natasha Irons
ENEMIES Lex Luthor

Lana Lang was a close childhood friend of Clark Kent's and one of the first people on Earth to learn of his extraordinary abilities. As teenagers, they were almost more than friends, but everything changed at a dance when Clark received the news that his parents had died in a car accident.

Lana supported Clark's dream of becoming a reporter, and left Smallville herself, eventually becoming a brilliant electrical engineer. Not one to hide from danger, she once restarted a doomed tanker's engines in time to avert a deadly collision (with a little help from Superman), and later she met him again when a drilling project released a monster from deep underground—leading to an adventure in Imperial Subterranea.

LASTING LEGACY

Lana guided the alternate Earth Clark Kent to Superman's Fortress of Solitude hoping he could find a Regeneration Matrix to revive the Man of Steel. Sadly, the artifact didn't exist in this Earth's Fortress.

Back in Smallville, Lana helped Wonder Woman work out how Superman was affected by his battle with Doomsday, and uncovered Brainiac's plot to use the brains of comatose humans—including those of her parents—to create a super network.

After the Man of Steel gave his life to save his adopted planet, Lana Lang turned up at his memorial in Metropolis to keep a promise to Clark: To bury him with his parents in Smallville. She was interrupted by the alternate Earth Clark Kent, who had a plan to resurrect Superman. When that failed, he helped Lana re-bury her friend's remains. The energies released in that event turned her into a literal Superwoman.

She began a relationship with inventor and former Super Hero John Henry Irons (Steel), and eventually returned to human status, moving on to a career in broadcast journalism.

WOMAN AND SUPERWOMAN

Empowered by the explosive demise of the post-Flashpoint Superman, Lana and the post-Flashpoint Lois Lane became twin heroes sharing the name Superwoman. Lois soon died, leaving Lana to battle a host of uncanny threats, including Ultrawoman, the Bizaress Army, and Skyhook.

ON THE RECORD

An earlier story about Lana Lang had her marrying Pete Ross, who became Vice President in Lex Luthor's White House (and later President when Luthor was forced from office). Feeling stifled in her role as First Lady—and also still bearing conflicted feelings about Clark—she divorced Pete and restarted her career. Later, Lana became the uncompromising CEO of LexCorp, and survived an alien attempt to turn her into a new Insect Queen, a nod to her insectoid transformations in both her Silver and Bronze Age incarnations (pictured right).

CENTER OF ATTENTION

Superman was often the subject of intense professional and personal rivalry between Lana Lang and the equally ambitious Lois Lane.

Fiercely independent, relentlessly inquisitive, and possessing an unflinching sense of right and wrong, Lois Lane is one of the world's most successful and influential investigative reporters. As she perfected her craft under legendary editor-in-chief Perry White at Metropolis's prestigious *The Daily Planet*, Lois wrote innumerable high-profile stories, winning the envy and respect of her coworkers. Already a star reporter, her journalistic immortality was assured when—together with photographer Jimmy Olsen—Lois secured the first interviews with and official pictures of the mystery news sensation known as Superman.

AT A GLANCE...

Boss lady

As *The Daily Planet*'s star reporter, Lois thrives under pressure, often working on more than one story at once. She's learned from Perry White that journalistic integrity is paramount, even if she doesn't particularly consider spellchecking a part of her job. When Lois walks into *The Daily Planet*'s bullpen, all eyes are on her.

Best Kept Secret

Before Clark Kent came forward and announced his double life as Superman, Lois was charged with keeping her husband's secret to herself, even though she knew she was sitting on one of the greatest newspaper stories in the history of the medium.

CLASSIC STORIES

Superman's Girlfriend Lois Lane

(Vol. 1) #15 (Feb. 1960) All Lois's dreams seemingly come true when Kryptonian weds Earthling in "The Super-Family of Steel!" However, the happy ending was actually for doppelgängers Sylvia DeWitt and Van-Zee of Kandor.

Superman's Girlfriend Lois Lane

(Vol. 1) #70 (Nov. 1966) In a clever, fun story, Lois is mesmerized into becoming Catwoman while the real villainess magically transforms Superman into her cat.

Superman's Girlfriend Lois Lane

(Vol. 1) #93 (Jul. 1969) Superman's camaraderie with Wonder Woman—now a mortal adventurer—triggers insecurities that Lois must overcome to save the heroine's life.

Superman's Girlfriend Lois Lane

(Vol. 1) #111 (Jul. 1971) Lois first encounters Darkseid's secret invasion of Earth after being attacked by a tiny Justice League from the villain's "Evil Factory."

Oh, little sister

Lois's sister withered rather than blossomed under Sam Lane's parentage. A wild, rebellious kid, she grew up troubled and aimless. However, no matter how bad things were, Lucy always knew Lois would be there to pick up the pieces and clean up her messes.

Lois Lane was raised on US military bases around the world; an army brat constantly on the move as her soldier father, Sam Lane, rapidly advanced to the position of General. She is extremely protective of her younger sister Lucy, even if the sisters haven't been as close as Lois would like them to be.

Sam Lane pushed Lois to excel in physical activities. He trained her in unarmed combat, small-arms techniques, and ensured she became a qualified pilot. Consequently, Lois grew up with a potent sense of self-reliance and was always hungry to know all the answers: something which grew increasingly difficult as her father was regularly promoted into ever-higher-security positions.

As she pursued a job in journalism at Metropolis' *The Daily Planet*, Lois soon met Clark Kent, a bumbling fellow reporter. Despite herself, she found that she admired his genuine warmth and fellow feeling for the weak and the downtrodden. Lois respected Clark's incisive mind and his hunger for the truth, but she often had a feeling that there was something he was keeping from her. Already a known commodity in the world of journalism, Lois became a household name when Superman first appeared in Metropolis and she nailed the scoop, giving the hero his famous name. Along with Clark Kent, Lois chronicled the majority of Superman's adventures, thrilling Planet readers and helping inflate the newspaper's subscription numbers.

Perhaps because they worked so closely together as friendly rivals, Lois and Clark eventually fell in love. Clark proposed, and also revealed his double life as Superman to her. The couple stayed together through triumph and defeat, including Superman's temporary death at the hands of the monster Doomsday. They eventually married and moved to California for a short time to give their newborn son, Jonathan Kent, a quieter life.

Lois and Clark soon moved back to Metropolis, and Lois returned to her fast-paced life as a reporter. Things became more complicated, however, when she became the subject of news stories as well. She and Superman had been caught on camera while locked in a kiss, and rumors began to circulate that she had been cheating on her husband. While Lois seem unfazed by the cruel judgment that greeted her

FACE THE PRESS

Lois could be deceptive, insistent, sympathetic, and incisive: in order to extract the truth from the most reticent interviewee.

SINS OF THE FATHER

One of the most consistent problems in Lois's life was her strained relationship with her father. Not only did she hate General Sam Lane's smug self-assurance and lifelong habit of keeping secrets—from the general public and especially from her—but their diametrically opposed attitudes regarding Superman frequently set them at odds. Lois couldn't help but take her father's hatred of the Man of Steel personally. When Sam Lane was killed during the espionage coup called Event Leviathan, Lois was overwhelmed with conflicting emotions.

FATHER OF THE BRIDE

Before Sam Lane was killed, Lois had told him the truth about Superman. While he reacted badly at first, Sam said he would do his best to try and give Clark the benefit of the doubt.

A NEW PERSPECTIVE
Lois went on the television show *The Perspective* to share her knowledge about multiple worlds and splintered reality.

PAST LIVES

As outside influences like the powerful Dr. Manhattan continue to alter and change the Multiverse, its residents are changed and altered along with it. Unlike most people, Lois has memories of a past version of herself, and worked with The Question II (Renee Montoya) and ex-spy Jessica Midnight to bring those facts to light.

Lois also created the Unity Project, an organization that helped people who remember divergent timelines deal with the trauma that their memories caused them in their daily lives.

"This is why I was a prize-winning reporter while you were still baling hay."

LOIS LANE

REBIRTH

THE PRICE OF POWER

Before Superman and his younger other half were merged and his continuity streamlined, there were two Lois Lanes active on Earth-0. The younger Superman died, and some of his energy was absorbed by the corresponding Lois. She spent some time as Superwoman before the energy proved too much for her, and she joined her reality's Clark in death.

ON THE RECORD

Lois Lane was arguably the first major recurring female character of the DC universe, debuting in 1938 in the original Superman story in *Action Comics* #1. An ambitious, glamorous, scoop-hungry reporter, Lois was prepared to ditch Clark in the middle of a hard-earned date when he wouldn't stand up for her to a brute trying to cut in on their dance. Lois proved she could handle herself when she slapped the cad, but Superman had to step in later for the first of many saves.

Hold the front page

After months being the Man of Steel's foil and romantic interest, Lois won her own solo feature in *Superman* #28 (May-June 1944). Light-hearted, action-packed, and comedic, these short tales usually depicted her getting into and out of scrapes without any superpowered backup. Following the *Crisis on Infinite Earths* storyline, Lois took that independence a step further. Sophisticated, globally renowned and seemingly infallible, she consorted with kings, presidents, and billionaires who were generally terrified that she would ferret out their darkest secrets.

Love triangle

For more than 60 years, the Last Son of Krypton loved only one woman, but was his own rival for her affections. Lois Lane only had eyes for Superman, spurning every advance from her timid coworker Clark Kent. That painful quandary finally ended when Clark revealed his identity to Lois and they married. The new status quo benefited their journalistic partnership. Lois's competition with Clark for headlines became keener than ever, but now they both knew when to bolster the power of the press with a helping hand from Superman.

PAGING MRS. SUPERMAN

Lois and Clark's wedding was not the end of their love story, only the beginning...

SOUL-SISTER

When comics started to become more socially relevant, the new go-getting Lois would do anything to get to the heart of a story. However, no journalist ever went as deeply undercover as Lois, when, with a little help from Superman's Plastimold machine, she transformed herself into an African-American woman to fully investigate racial prejudice in her city.

ALIEN AGENDA

Though not one of Brainiac's original Twenty, Lois proved the most effective. Her psionic powers briefly made her a match for Superman, until her resolutely independent streak rejected the transformation.

UNCOVERING THE TRUTH

Painfully aware that ordinary people suffer when the rich and powerful hide dirty secrets, Lois Lane tries to balance the scales while exposing the truth.

BASE Larfleezia, Okaara

EYES White **HAIR** Orange

POWERS/ABILITIES Sole wielder of the Emotional Spectrum's orange light of Avarice, which offers immortality, flight, force-field protection, light constructs and animation; magic absorption; "hears" objects and people begging to be owned, then steals the personalities of those he kills and resurrects them as light-construct entities.

ENEMIES Guardians of the Universe, Green Lantern Corps, Invictus, Sena the Wanderer

AFFILIATIONS Orange Lantern Corps, New Guardians, Pulsar Stargrave, G'Nort

Larfleeze, also known as Agent Orange, is the sole wielder of the orange light of Avarice. The most self-destructive color of the universe's Emotional Spectrum, it precludes sharing and those it illuminates will fight for what they want until only one remains. Its power infects the mind and effectively owns its possessor.

The embodiment of Avarice is Ophidian, who lives inside the battery and causes Larfleeze to hunger voraciously for everything he sees. Over billions of years, Agent Orange has indiscriminately turned his homeworld into a vast planetary hoard of junk, treasure, and corpses. He is the only Orange Lantern in the universe, but this incalculable, unshared power allows him to store the souls of every creature he has killed and resurrect them as semi-sentient light-constructs. To protect his most prized possession, the immensely long-lived Larfleeze has absorbed his Orange Lantern, becoming a living power battery. His unique oath reflects his philosophy:

"What's mine is mine
and mine and mine,
And mine, and mine, and mine!
Not yours!"

LIGHT'S OUT

For billions of years, Larfleeze obsessively ensured that nothing threatened his right to take whatever he wanted whenever he saw it.

ON THE RECORD

Billions of years ago, thieves stole the fear entity Parallax from the planet Maltus. Fleeing the Guardians' robotic Manhunters, the bandits followed a map created by renegade Krona to the planet Okaara in the Vega system, where they found the orange power battery of Avarice. They squabbled over it until only Larfleeze remained.

Unable to defeat Larfleeze, the Guardians bargained with him, promising him immunity and total autonomy of the Vega system in return for Parallax.

Seizing her moment, Bernadeth struck, wounding Lashina and leaving her for dead. The plotter died for her betrayal when Lashina returned as Duchess, leading the ferocious metahumans of the Suicide Squad in a counterattack on Apokolips.

Lashina led the Furies when Darkseid and his daughter Grail clashed with Zeus, Wonder Woman, and the Amazons. She was temporarily captured, but quickly returned to her master.

One of the deadliest warriors to graduate from Granny Goodness' hellish Apokolips orphanage, Lashina's incalculable military value is confirmed by the number of times Darkseid resurrected her. Fast, strong, and calculating, she served as Big Barda's second-in-command in superpowered shock trooper unit the Female Furies. When Barda defected to Earth with Mister Miracle, Lashina led the team who was ordered to return the traitor to Apokolips. Instead, the Furies stayed on Earth for months, reveling in the primitive world's freedoms. Ultimately, the Furies grew bored and returned, prepared to face Apokoliptian punishment for going AWOL.

AFFILIATIONS Rā's al Ghūl, Doctor Darrk, the Sensei, Demon Fang

The League of Assassins—also known as the League or Society of Shadows—is an ancient secret organization created by the immortal Rā's al Ghūl to further his plans to destroy decadent civilizations and create an ordered world under his rule.

For centuries, the League has sold its services—singly, through teams of agents, or as a whole—to the great and powerful of many nations. This allowed it to fund its own agenda and to gain clandestine political advantage. It is also the greatest teacher of the combat arts in history. Responsible for the training of numerous warriors and villains, its students also include heroes such as Damian Wayne, Red Robin, Red Hood, and Batgirl/Black Bat.

In recent decades, the Society has suffered from continual internecine conflict, as deputies appointed by Rā's al Ghūl overstepped their bounds or sought to seize complete control. This resulted in a number of splinter groups of assassins becoming competition and hindrances to the League. Another major stumbling block has been the loss of their cloak of

anonymity, as the efforts of an increasing number of Super Heroes have successfully brought the Society's hidden efforts out of the shadows.

KILLER ELITE

Whether through blade, bullet, missile, toxin, empty hand, or magic, for centuries the aim of the League of Assassins never faltered or failed.

ON THE RECORD

The League was revealed as a family business after Rā's al Ghūl died. His daughters Talia and Nyssa inherited control, but a schism saw one faction trying to resurrect their master: seeking to implant Rā's spirit in Talia and Batman's son Damian. Another group pledged allegiance to the Sensei; the assassin-teacher who had coordinated the global murder enterprise for centuries. Revealed as Rā's' father, he ruthlessly cemented his control in a campaign the Dark Knight only barely thwarted.

THE ART OF DEATH

With Rā's gone, the Sensei believed nothing could hinder his ambitions, but found Batman to be even more relentless and formidable than his diabolical offspring.

Lex Luthor assembled the Legion of Doom to take advantage of the coming of the Totality, energy released from the Source Wall at the edge of the Multiverse. Luthor discovered that he could use the seven powers of the Multiverse to free the ancient goddess Perpetua and make himself her right-hand man, gaining supremacy over nearly all other beings in existence—including Superman and the Justice League.

Luthor chose the members of the Legion of Doom carefully, with each of them having a special reason to wish to access one of the seven energies of the Multiverse. One was a mere baby—The Turtle—a scientist reborn with a connection to the Still Force, the opposite of the Speed Force. Sinestro was given access to the Invisible Spectrum, a secret force of negative emotional energy that made him more powerful than ever. The Cheetah was empowered with the Tear of Extinction, making her able to kill gods with her claws. Black Manta was given the Life Force from Poseidon's trident, but he and The Joker would later leave the team, to be replaced by a resurrected Brainiac.

The addition of Brainiac was key to finally freeing Perpetua. The Legion of Doom had apparently triumphed, but there was a nasty shock in store. Unbeknown even to Lex, Perpetua had planned all along to use the rest of the Legion as mere repositories for the hidden energies of creation, transferring them all to Luthor to make him far more powerful.

FORCES OF EVIL

The Legion of Doom originally comprised just a few key members, but Lex Luthor later filled its ranks with a throng of villains who would help Perpetua's evil message to spread throughout the Earth.

RECRUITMENT DRIVE
Lex Luthor assembled a plethora of Super-Villains to fight the Justice/Doom War.

The 31st Century is a world where superpowered teenagers from all over the United Planets have gathered together, inspired by Superman, to fight evil on New Earth and across the galaxy. It exists after the future time of *Batman Beyond*, after the Great Disaster and the world of Kamandi, after the future of *Booster Gold* and that of *O.M.A.C.*

The Legion of Super-Heroes got their start when Rokk Krinn, a magnetically-charged fighter from the planet Braal, Imra Ardeen, a telepathic rebel from the moon Titan, and Garth Ranzz, a lightning-powered political activist from Ranzz, were summoned by the president of the United Planets, R.J. Brande, to form a Young United Planets organization. While

meeting with Brande, these three young heroes fought off an invading force of alien Horraz. Inspired by Super Heroes of the 21st century, Brande decided that these three exceptional youths should be the founding members of a team of galactic defenders called the Legion of Super-Heroes.

Setting up shop in New Metropolis on New Earth, the Legion's ranks quickly increased, even adding Brande's own son, Chameleon Boy, to their number. But there was one member the team had their eye on who would be a little more difficult to recruit.

Back in the 21st century, Superboy was looking to find a place for himself in the world. As the son of Superman, he had fought by his father's side in the present day, and often teamed up with his best friend Robin (Damian Wayne). However, he had not been admitted into the Teen Titans, and after many years away in space (which seemed like only three weeks to the people on Earth due to Superboy traveling through a black hole), he no longer felt he had a place to belong on Earth.

So when the Legion of Super-Heroes traveled to the past to be a part of the first-ever Unity Day—a major holiday in their future world—and offered Superboy membership in their group, Jon accepted, happy to have renewed purpose in life.

Perplexed and amazed by the future of New Earth, its domed cities, and its lack of oceans, Superboy joined the team just as Ultra Boy and a team of Legionnaires underwent a mission on Planet Gotham. They bested the sorcerer Mordru and retrieved an ancient artifact that happened to be from Jon's time period: Aquaman's trident. The alien Horraz pirates followed Ultra Boy home, forcing Superboy to jump into the fray to help battle this invading force. When Superboy held Aquaman's trident, the Horraz gang (and the Legionnaires) were caught in a flood of water, emanating from the trident itself.

Superboy soon met Rose Forrest, Official Legion Liaison to the United Planets, and was

CLASSIC STORIES

***Adventure Comics* (Vol. 1)**

#352-353 (Jan.-Feb. 1967)

A short-handed Legion recruits five of the universe's greatest villains to help save Earth from a Sun-Eater. The plan succeeds at the cost of Ferro Lad's life, but results in the villainous quintet forming the Fatal Five.

***Legion of Super-Heroes* (Vol. 2)**

#287, 290-294 (May, Aug.-Dec. 1982)

Entire worlds are devastated by shadowy agents of a Great Darkness as the Legion battles ancient heroes and villains who are gathering artifacts to restore the ultimate evil: Darkseid.

Final Crisis: Legion of 3 Worlds

(Vol. 1) #1-5 (Oct. 2008-Sep. 2009)

Reality is ripped apart and rewritten as three iterations from separate reboots are amalgamated and incorporated into the Legion of Prime Earth.

NEW EARTH

Earth in the 31st Century has changed drastically after many cataclysms, wars, and restructuring. It is now a series of domes connected to a planetary core. On one of those domes is New Metropolis. The entire city is the headquarters of the Legion of Super-Heroes. The oceans of the planet have since been restored, thanks to the Legion's use of Aquaman's powerful trident.

ROBIN

While touring Legion headquarters, Superboy learned of Planet Gotham, the galaxy's first fully made artificial planet, one constructed by Quayne-Galactic as a tribute to the original Gotham City, complete with its own Blüdhaven sewer system. Unable to contain his youthful excitement, Jon traveled through time to bring Robin (Damian Wayne) to the future. The Legion quickly nixed this idea, returning Robin to the present day and wiping his memories of New Metropolis.

ON THE RECORD

The Legion is probably the most rebooted Super Hero team of all time, although initially not the most serious. On their debut, Saturn Girl, Cosmic Boy, and Lightning Lad traveled into the past and invited Superboy to join, only to reject him as part of a prank. His stoic acceptance of their judgment won him a place on the team.

Unstoppable

After several guest appearances, the Legion became a regular feature in *Adventure Comics* #300 in 1962, beginning a series of quirky futuristic adventures with Superboy as a regular guest star and amazed observer of life in the future. The team was so ahead of the times that its members elected a female—Saturn Girl—as their new leader in 1963!

Having saved the United Planets from the Fatal Five, the members of the Legion were rewarded for their valor with a hugely impressive new headquarters complex. It was payment from the grateful governments of many worlds and confirmed the Legion's vital role in intergalactic peacekeeping. However, during construction, a hidden coalition of belligerent races attacked Earth in overwhelming numbers. They were only defeated by use of a reality-warping Miracle Machine the Legion had been given by the Oan splinter group known as the Controllers.

TIME AFTER TIME
With Superman's help, the Legion foiled a supremacist plan to rewrite history: eventually reestablishing a tolerant, civilized future for Earth.

MIRACLE CITADEL
After constructing the new Legion Plaza, the Miracle Machine was sealed away.

He viewed an orientation program via a "memexe," but was soon thrust into action again to battle not just the Horraz pirates, but also Crav, the General Nah, the father of Legionnaire Ultra Boy and the highest-ranking officer of the United Planets. Crav wanted Aquaman's trident for himself, but in the resulting battle, Earth was showered in the trident's waters, effectively restoring the oceans lost to New Earth years ago.

With the United Planets' continued approval and Superboy as one of their members, the Legion of Super-Heroes is determined to create a new golden age of heroes in the 31st Century.

LEGION OF SUBSTITUTE HEROES

BASE 31st-century Metropolis

NOTABLE MEMBERS Antennae Boy, Chlorophyll Kid, Color Kid, Double Header, Dream Girl, Fire Lad, Infectious Lass, Night Girl, Polar Boy, Porcupine Pete, Rainbow Girl, Star Boy, Stone Boy

ENEMIES Ambush Bug, Plant Men, Captain Freeze

AFFILIATIONS Legion of Super-Heroes, Science Police

Not every applicant is deemed suitable for membership in the Legion of Super-Heroes—even if they have superpowers and the best intentions. Pre-*Flashpoint*, the Substitutes were all originally rejected because they were considered a liability to others or a danger to themselves, but came together in a support group under Polar Boy and Night Girl to prove the Legionnaires mistaken.

Always working outside the spotlight, the Substitutes performed many valiant deeds, slowly gaining the official Legion's respect. They welcomed former Legionnaires Dream Girl and Star Boy when they lost their places on the lead team. Their egalitarian attitude meant that eventually the squad became heavy with true no-hopers like Antennae Boy and Double Header, and became something of a joke.

Eventually, Polar Boy and Night Girl's inclusivity succeeded, and after they advanced to the big leagues, the Subs continued nurturing lesser lights and

In a kinder, gentler Possible Future, the Legion of Super-Pets formed out of desperate necessity. When planetary plunderers the Brain-Globes of Rambat attempted to steal Earth, neither Superboy nor the Legion of Super-Heroes could withstand their psionic domination. This was not the case for the valiant animal companions of the Boy of Steel or his cousin Supergirl. Using a time-bubble, the Legionnaires gathered Kryptonian survivors Krypto and Beppo the Super-Monkey, plus Earthborn pets Streaky the Super-Cat and Comet the Super-Horse, to route the marauders. Later, they inducted Chameleon Boy's telepathic pet Protty II into their ranks.

The time-traveling pets were formally invested as a branch of the Legion of

Super-Heroes. Although convening sporadically, they were always ready to lend a paw or hoof to save the world and protect those weaker than themselves.

It was recently revealed that this Legion had its true beginnings in the 21st century, where Krypto and Streaky carried out two official cases with animal allies Detective Chimp, Titus the Bat-Hound, Plastic-Bird Flexi, Bat-Cow and Clay Critter: one painfully secret, and a second more public, stopping an alien stealing beloved animal companions.

Before he adopted his Superman alter ego, college student Clark Kent dated Lori Lemaris. She was confined to a wheelchair and only revealed to Clark the

reason why: She was a mermaid from sub-aquatic city Tritonis and the chair allowed her to hide her tail. When she was injured Superman returned her to Tritonis where dashing researcher Ronal healed her with the magical Black Staff, which reshaped flesh. Lori and Ronal married, but he was corrupted by the Staff. He attacked Lori and was turned to stone after Superman shattered the staff's gem. Despite some tension, Lori was bridesmaid at Lois and Clark's wedding. She also had a brief career as a hero, taking on villainous cosmic herald Advance Man.

Post *Rebirth*, an alternate-reality romance saw young navy cadet Clark Kent abandon his post to pursue a beguiling mermaid, battling Sea God King Poseidon to win his daughter.

Leviathan was a mysterious criminal

organization that infiltrated and corrupted Gotham City. Led by a slender figure in a mask and her monstrous bodyguard, Leviathan's gangs of animal-masked goons eliminated rival gangsters and spread terror. Batman, Robin (Damian Wayne), and the other members of Batman Incorporated investigated Leviathan's activities, combatting their man-bats, gangsters, and armies of crazed children.

Leviathan's leader was eventually revealed to be Batman's former lover, Talia al Ghul. When their son Damian left her to be with his father, Talia created Leviathan to punish Batman. Damian was slain by Talia's bodyguard, the Heretic; Talia herself was apparently killed by Kathy Kane of Spyril. Revived by a Lazarus Pit, Talia repurposed the organization, using it as a weapon of extreme social change, to thwart the schemes of her oppressive father Rā's al Ghul. Building a vast global criminal network of underbosses and body-modified super-assassins, Talia overstepped while "cleaning house," sparking a civil war, ended by her most special agent, The Silencer.

No sooner had Talia regained control of the weakened Leviathan, than former Manhunter Mark Shaw seized the reins of power and took the name for his own: retasking the secret army to establish global order by mercilessly eradicating all other covert agencies. These included terrorist cabals such as Kobra's cult to government agencies like A.R.G.U.S., Checkmate, the Department of Extra-Normal Operations, Spyril and others. His secret war was exposed by reporters Lois Lane and Jimmy Olsen, but was largely successful, despite the late intervention of Earth's Super Heroes. With the intelligence community in tatters, Leviathan remains at large.

The daughter of World War II heroes Johnny Quick (not the Crime Syndicate villain of the same name) and Liberty Belle, Jesse Chambers inherited her parents' powers—notably her father's access to the Speed Force, which she could tap into by reciting the formula "3x2(9YZ)4A." Calling herself Jesse Quick, she fought alongside other speedsters, including The Flash (Wally West), Max Mercury, and Impulse.

She joined the Justice Society of America and the Teen Titans, juggling those responsibilities with her role as CEO of Quickstart Enterprises after her father was killed by speedster villain Savitar. Later she adopted her mother's role, becoming the new Liberty Belle and marrying JSA teammate Hourman. After the Teen Titans disbanded, Jesse maintained her heroic double duties by joining the Justice League.

ENEMIES Batman (James Gordon), Superman, Batgirl, The Flash

AFFILIATIONS Secret Society of Villains

Notorious vlogger Leslie Willis was famous for outrageous stunts, but transformed into a being of pure electricity when a high-voltage prank misfired. She joined the Secret Society of Super-Villains and clashed with Superman in Metropolis, but was caught in an energy trap by Batman and imprisoned in Stryker's Island penitentiary.

The Hooq Cult set Livewire free and she went on a rampage, using the Burnside electricity plant to charge up her powers. Defeated by Batgirl and new Batman James Gordon, she was imprisoned once again. This time, Livewire was freed by mysterious beings with energy powers. She joined forces with other villains in Metropolis, but they were defeated by Superman.

After a long absence, she has been sighted in Metropolis again, and was vacationing in Zandia when The Flash infiltrated the Super-Villain resort.

DANGER: HIGH VOLTAGE

Leslie Willis started out as a radio DJ with a fierce dislike for Superman. She became a real "shock jock" when she was struck by lightning.

POWERS/ABILITIES As a New God, Lightray is immortal and has physical capabilities beyond those of an ordinary human; he can also fly and fire blasts of energy from his hands.

ALLIES Orion

ENEMIES Darkseid, every Lantern Corps

AFFILIATIONS New Gods, the Council of Eight

Lightray was a general of New Genesis. His positivity, charm, and enthusiasm contrasted sharply with the temperament of Orion—foster son of New Gods leader, Highfather—but they were nevertheless close friends.

Seeking a clue to unlock the powerful Life Equation, Highfather dispatched Lightray and other members of the trusted Council of Eight to acquire power rings from the various Lantern Corps. The theft of power rings provoked the various Emotional Spectrum Corps to unite and react. Black Hand of the Black Lantern Corps raised undead leviathans from within the Source Wall and the Lanterns used a redirected Boom Tube to transport the undead monsters to New Genesis. Lightray flew into battle, but was snatched up by one of the creatures, and only saved by Orion. Ultimately, Highfather realized the folly of his arrogance, and a truce was brokered. Lightray and his kin began rebuilding their ruined utopia but were soon diverted as the return of exotic ancient metals to our reality triggered the rise of Escathon Giants. These Nth Metal golems, created by Old God Yuga Khan, ruthlessly hunted New Gods. With the Green Lanterns help, Lightray and his brethren resisted, and tried to bolster the weakening Source Wall, but it sundered, releasing primordial creator Perpetua and instantly eradicating all New Gods except Orion.

ON THE RECORD

In his pre-Flashpoint incarnation, Lightray was a close companion of Orion, and even joined him in the Justice League while they were on Earth. It was while on Earth that Lightray died. He was struck by a freak shower of meteors and perished in front of a shocked Jimmy Olsen—a prosaic end for a New God.

protected these Children of Validus, showing off their natural-born lightning powers in the process. Successful at scaring away the Science Police, Garth and Ayla earned planet-wide attention and were invited to join the Young United Planets by the Science Command. While the politically minded Ayla angrily turned down the offer from what she considered a corrupt organization, Garth accepted it.

Garth next met up with fellow teenagers Imra Ardeen from Titan and Rokk Krinn from the planet Braal aboard the spacecraft of R.J. Brande, the president of the United Planets. When Brande came under attack by a group of Horraz aliens, the three young heroes saved her life. Brande was inspired to organize a team of Super Heroes reflecting teams like the Teen Titans and the Justice League from the 21st century. She discussed the matter with the United Planets, and soon the Legion of Super-Heroes was formed, with Garth as one of its three youthful founders.

A loyal Legionnaire, Garth was later joined by Ayla, who now fights for galactic peace as his teammate Lightning Lass.

While his twin sister has a tendency to follow her impulses and jump into the fray before anyone else, Garth Ranzz has been known to take a more measured approach. Born with lightning manipulation abilities and no less heroic in his actions, Lightning Lad has made a name for himself as a founder of the Legion of Super-Heroes.

On the planet Winath in the 31st century, a group of citizens was being rounded up by the Science Police and forced to move out of their homes against their will. On this world—whose overbeing is Validus, the Lord of Lightning—humanoids not born in pairs as twins are considered the Children of Validus. Twin siblings, Ayla and Garth Ranzz, stood up to the officers and

After being freed from captivity by Maxwell Lord, Lobo fell under Lord's powerful mind-controlling powers. He was eventually released when Batman set off a bomb inside his head, completely blowing it up. In time, Lobo healed, and strangely decided that he owed Batman a favor for helping him regain his own mind.

The Dark Knight cashed in that favor very quickly, playing on Lobo's particular sense of honor and recruiting him into the Justice League of America. CANARY IN A COAL MINE

Lobo recruited Black Canary's help when he tracked down the only other living Czarnian, the son of his former grade school teacher, Mrs. Tribb. Gusano Tribb had been killing space dolphins just to mess with Lobo, so the Main Man fed him to the very dolphins Tribb was trying to eliminate.

ON THE RECORD

The pre-Flashpoint Lobo was simply born to be bad. When he was a teenager, he created a plague of bugs that killed all five billion inhabitants on his homeworld of Czarnia—because he hated them all and wanted to be unique. (The only other Czarnian to survive was his fourth-grade teacher, Miss Tribb.) Lobo set off on his SpazFrag666 spacehog to prove that he was the meanest "bastich" in the universe. While working as a bounty hunter, he tangled with the Omega Men, the Teen Titans, and the legions of Hell itself. He did have a softer side, which was later revealed.

BAD TO THE BONE?

Unlike his deadly-serious temporary successor, the original Lobo was just a violent party animal (with a soft spot for Space Dolphins).

UP CLOSE AND PERSONAL
Lobo has mastered a vast arsenal of weapons, including the latest in hi-tech killing devices. However, he prefers to eliminate his opponents with razor-sharp blades, or with his fists.

A group of superpowered rebels calling themselves the Team Titans traveled to the past to kill Donna and prevent Lord Chaos from being born. However, learning of their plan, Lord Chaos traveled back in time to stop the Team Titans, and summoned his soldiers from the future to conquer the world.

Donna Troy battled her son and called on the Titans of Myth to remove the godlike powers from them both. The Titans of Myth agreed, taking the insane entity to their realm, but leaving the infant Robert Long in his mother's arms.

POWERS/ABILITIES Telepathic mind control, brilliant strategist, ruthless sociopath.

ALLIES Mekkari, Sarge Steel

ENEMIES Amanda Waller, Brother Eye

AFFILIATIONS Checkmate, S.H.A.D.E.

OUTSIDE THE LAW
Although Lord's Checkmate organization was the world's premier spy agency, its allegiances remained unclear.

Director of Checkmate—a Task Force X division regarded as a “Global Peace Agency”—Maxwell Lord oversaw the agency's covert operations from a bunker within Mount Rushmore. Lord personally oversaw Checkmate's Cadmus Project—a government program designed to negate the Justice League if they ever went rogue—and deployed elite agents when sentient satellite Brother Eye rebelliously created O.M.A.C. (One-Machine Attack Construct) from scientist Kevin Kho. When successive teams led by Sarge Steel and Mekkari failed, Lord requested S.H.A.D.E.'s help to counter the threat. Their top operative Frankenstein almost killed O.M.A.C.

Lord himself had to fend off assassination by a soldier Brother Eye had subverted. Using his mind-control powers, Lord forced the would-be killer to turn the gun on himself. He outsmarted Brother Eye by magnetizing the satellite's hull, causing passing asteroids to coalesce and trap Brother Eye inside, burning up on re-entry into Earth's atmosphere. Lord's pursuit of O.M.A.C. ended after Brother Eye gave Kho control over his O.M.A.C. body.

Paranoid and holding grudges, Lord turned his attention to rival agency chief Amanda Waller, targeting her Suicide Squad with his own team, while tricking the Justice League into attacking her. His goal was to secure Eclipso's mystic gem, the Heart of Darkness, which he used to “pacify” America. The plan failed after Lord succumbed to Eclipso's influence and he was humiliatingly saved by Killer Frost and Superman. Over Waller's protests, Lord later worked for Wonder Woman, but lost his political power and prestige after Checkmate was wiped out and absorbed by the predatory covert group Leviathan.

ON THE RECORD

Pre-Flashpoint, Maxwell

Lord caused a terrible crisis of conscience for Wonder Woman after he used his mind-control powers to turn Superman into a weapon. This was part of his plot to exterminate the world's metahumans using Brother Eye and O.M.A.C. Faced with the choice between saving millions of lives and keeping her oath never to kill, Wonder Woman killed Lord, and has lived with the consequences ever since.

CHAIN OF DEATH

Blue Beetle attacked Lord when he discovered his plot to wipe out the world's metahumans. Lord ended the fight by shooting Beetle in the head, only to have his own life taken by Wonder Woman, ending his schemes once and for all.

Loring continued her law career in Ivy Town, before suffering a complete mental collapse. She became convinced that she could restore her marriage to Ray by threatening or killing the loved ones of the Justice League of America. To that end, she shrunk herself, using one of Ray's old costumes, and murdered Elongated Man's wife, Sue Dibny, by giving her a stroke. When her crime was discovered, Loring served a term in Arkham Asylum, until she was infected by the sinister spirit of Eclipso and became his human host.

As Eclipso, she seduced the Spectre into killing hundreds of Earth's magic-users to bring about an end to the Ninth Age of Magic. AT A GLANCE...

Alien Rivalry

Luthor believed no human was his equal and—after meeting Superman—set out to prove no alien was either. Lex had supreme confidence in his own intellect and scientific knowledge and was prepared to use any means necessary to get what he wanted.

Business matters

Global conglomerate LexCorp was built upon Luthor's inventions and provided employment for most of Metropolis. As a generous, "philanthropic" owner, Lex basked in the adoration of the masses while his cutting-edge research facilities secretly developed the weapons he needed to combat Superman. LexCorp gave him two powers his enemy lacked: unlimited funds and the trust of international governments.

War Footing

Though his most powerful weapon is his own intellect, Luthor has spent billions creating armored outfits that make him the equal of any alien or metahuman.

CLASSIC STORIES

***Superman* (Vol. 1) #38 (Jan.-Feb. 1946)** Luthor uses an atomic bomb on Superman. Scheduled to appear in 1944, the story was embargoed by the Defense Department until World War II ended.

***The Joker* (Vol. 1) #7 (May-Jun. 1976)** Luthor switches personalities with the Joker, and a coldly rational Clown Prince of Crime hunts a literally mad scientist who would rather die than surrender the freedom of insanity.

***Action Comics* (Vol. 1) #660 (Dec. 1990)** Fatally irradiated by Kryptonite, Luthor fakes his own death. His brain is later transplanted into a healthy young clone with red hair and paperwork to prove he is Luthor's son.

Lex Luthor grew up in Smallville, Kansas and knew Clark Kent when they were young, not realizing for years that the greatest thorn in his side—the future Superman—had been right under his nose all along. As a boy, Lex soon revealed his genius-level intellect. His father, Lionel, was a scientist, and had discovered an ancient race of apex predators that shared both human and Martian DNA. He located and trapped a young Martian boy named J'onn J'onzz, and began experimenting on him. Lex was permitted into the lab, and began to communicate with J'onn. The two became friends, and Lex helped J'onn escape when Lionel had planned to terminate the alien. The memory of this event was erased from both Lex and his father's mind when Lionel was betrayed by his business partner Vandal Savage. This caused Lionel to turn to alcohol abuse, realizing something in his life was missing.

In Smallville, Lex became strangely arrogant and aloof. An older student mostly avoided by Clark Kent and his friends Pete Ross and Lana Lang, Lex and his sickly sister Lena had a hard life, dealing with their now-abusive father. One night, when running from one of Lionel's drunken tirades, Lex tripped and fell over a fragment of Kryptonite in his yard. He became fascinated with it, and the concept of extraterrestrial life.

Putting his intellect to good use, Lex became a billionaire industrialist, setting up his LexCorp HQ in Metropolis. He ran a program where he would grant a lucky person waiting outside his building with a meeting with his "life engineers." This gave Lex the appearance of an altruistic businessman. Successful on nearly all fronts, by the time Superman appeared in Metropolis, Lex owned 78 percent of the city. When the Super-Villain Parasite was formed inside Lex Luthor's own building, Lex met Superman for the first time when the hero stopped the energy-sucking creature. Luthor couldn't understand Superman's motivation, but did not like being upstaged in his own city, and his rivalry against the Man of Steel was born.

Over the years, Luthor has spent time as both hero and villain, even working his way onto the Justice League after leading the defeat of the planet-conquering Crime Syndicate from Earth-3. He created his own Superman in the form of Bizarro, and when that didn't work out, he made a Superman-like battle suit and attempted to replace the Man of Steel himself. But there was no replacing Superman, and Luthor was even defeated by his own sister when Lena Luthor became the Super-Villain Ultrawoman.

On his mad quest for more power, Luthor formed the Legion of Doom and helped free the cosmic entity

DEADLY DISCOVERY
A young Lex Luthor first showed Kryptonite to Clark Kent at a Smallville fair. Clark immediately felt faint and collapsed.

FOREVER EVIL

When the Crime Syndicate from Earth-3 invaded Earth, they recruited a host of Super-Villains to act as their vanguard and overwhelmed the world's heroic defenders. Lex Luthor refused to be subservient to another's will and organized like-minded metahuman criminals in an Injustice League. His nefarious team defeated the extra-dimensional conquerors, liberated Earth's captive heroes, and thus saved humanity. In the aftermath, this most improbable hero even connived his way into the ranks of the Justice League.

CORPORATE RAIDER
Lex Luthor was never going to be a team player, unless he was in complete control of the team and giving the orders.

APEX LEX

When the Source Wall at the very edge of the universe was broken, Lex Luthor became obsessed with the power contained behind its walls, the cosmic entity called Perpetua. He understood that for the mother of the Multiverse to truly claim power in the world, the global attitude had to first shift to embrace doom. To do that, Luthor bestowed dark gifts on many of the world's Super-Villains, and promised to give his fortune away to those who chose his dark philosophy. Surprisingly, while the Justice League was busy fighting evil in another dimension, public opinion shifted against them, and the world indeed chose doom, freeing Perpetua and empowering Lex even further.

CHOOSE DOOM

Lex Luthor united his own Legion of Doom, but barely batted an eye when Perpetua imprisoned them in her throne in order to leech their various powers.

"It's time to stop being selfish. The world needs Lex Luthor."

Lex Luthor

THINKING OF YOU

Luthor's intellect and utter lack of compassion make him the most dangerous man alive, capable of doing almost anything to satisfy his selfish desires.

known as the mother of the Multiverse, Perpetua. He "died" and was reborn again as one of her apex predators, and even absorbed the Martian Manhunter into his own form, as the powerful being Apex Lex. Perpetua rewarded Luthor by channeling the powers of the rest of his captive Legion of Doom into him, making him stronger than he ever dreamed. However, Perpetua double-crossed Lex by choosing an evil Bruce Wayne (infected by The Joker) from the Dark Multiverse to replace him as her right-hand man. This Batman Who Laughs swooped in at the last minute and stole everything for which Lex had worked. Betrayed, depowered, and dethroned, Lex Luthor nonetheless survived Perpetua's reality-altering rule, and continues to plot his return to greatness.

REBIRTH

METROPOLIS MARVEL

After years struggling against Superman, Luthor realized that he should simply become the hero he despised. With the Man of Steel presumed dead, mimicking the power-set was easy. The real test was not slipping too far into the role of self-sacrificing do-gooder.

However, Lex did not anticipate the challenges Superman faced on a daily basis, threats including Doomsday and Ultrawoman.

ON THE RECORD

When he debuted, Luthor was the quintessential mad scientist. He was first depicted as a redheaded savant, but, following confusion among the artists drawing Superman's stories at the time, it is believed he was accidentally switched with his own bald, burly henchman. The change stuck, and so the iconic, bald-headed evildoer has remained.

War of the worlds

After years of robbing banks and bedeviling the Man of Tomorrow with super-science gadgets—and barely a shred of success—Luthor was drastically overhauled in the early 1980s. After another humiliating and inconclusive clash, Luthor retired to the planet Luthor where he had long been considered a global hero and settled down with his wife Ardora. Sadly, due to a tragic misunderstanding, she and her entire world were obliterated. Blaming Superman, Lex rededicated his life to destroying his archenemy.

RING OF DEATH

Luthor believed his stolen Kryptonite ring protected him from attack by Superman, unaware that its alien radioactivity was slowly killing him.

Captain of industry

Following the events of *Infinite Crisis*, Luthor began a supposedly philanthropic campaign to give ordinary people superpowers. His attention-seeking Everyman Project started well, with the first recipients becoming the latest incarnation of Infinity Incorporated, but the intention was actually to give the billionaire unbeatable metahuman abilities and ended up costing the lives of most of his test subjects.

President Lex

The malignant magnate achieved his greatest triumph when his money, technology, and publicity machine gained him the presidency of the United States. He even won acclaim for spearheading Earth's defense against a colossal alien incursion by the cosmic force of destruction, Imperiex. His vindictiveness and chicanery eventually proved his downfall, and Luthor was exposed when he injected himself with Kryptonite, mad with power.

HAIL TO THE CHIEF

Though he knew Luthor could not have won the election fairly, Superman had no proof and had to wait for his gloating enemy to make a mistake.

WORD OF POWER

When Alexander Luthor shouted the word "Mazahs!" he unleashed the power of the dark lightning. In moments, he killed both Johnny Quick and Bizarro.

LUTHOR, ALEXANDER

DEBUT *DC Comics Present Annual* #1 (1982)

(Vol. 2) #23 (Oct. 2013)

UNIVERSE Earth-3

HEIGHT 6ft 3in **WEIGHT** 210 lbs

EYES Blue **HAIR** Red

POWERS/ABILITIES Analogous to those of Shazam; additionally absorbs the powers of anyone he kills.

ALLIES Superwoman

ENEMIES Crime Syndicate, Justice League

Alexander Luthor is the Shazam of Earth-3, known as Mazahs. His version of Shazam's powers included the ability to absorb and retain the powers of any metahuman he killed. A mortal enemy of the Crime Syndicate of America and one of the few Earth-3 heroes to survive opposing them, he was brought to Earth-0 as a prisoner and held in the Justice League's Watchtower.

Released in the chaos of the battle between the combined Justice Leagues and the Crime Syndicate, he used his word of power to join the fray and declared he would kill everyone present, hero and villain alike. His rampage was only stopped when Lex Luthor realized that he had the same voice, and depowered Alexander with his own word of power. Lex then killed Alexander to avenge the fallen Bizarro—and of course save his own life. After his death, it was revealed that the Crime Syndicate's Superwoman was carrying Alexander Luthor's child.

BIDING HER TIME

There was no way that Lena Luthor would allow herself to be imprisoned in her brother's lab for long—without getting her revenge.

POWERS/ABILITIES Genius intellect; battlesuit gives her super strength and durability.

ALLIES Bizarro's Army

ENEMIES Lex Luthor, Superwoman

AFFILIATIONS None

When Lena Luthor was paralyzed, her brother Lex, the self-styled "smartest man alive" believed he could cure her condition. However, when he could not, the shame over his failure led Lex to keep Lena locked away in his lab. Lena too was a genius, and managed to break free from captivity before building herself a giant mech suit.

Calling herself Ultrawoman, she was no longer confined to a wheelchair, but a formidable opponent in battle. She used her power to take control of Metropolis, having trapped Lex in the secret basement of his own building. However, Lena's new form required so much energy that she needed a new power source, and chose the new Superwoman to be her living battery. Superwoman defeated her, and Lena was imprisoned once more at LexCorp.

LOSERS

DEBUT *G.I. Combat* (Vol. 1) #138 (Nov. 1969)

BASE Europe and Asia during World War II

MEMBERS/ABILITIES **Captain Storm:** Indomitable will, a natural leader;

Gunner: Commando skills, expert marksman; **Johnny Cloud:** One of the

greatest fighter pilots of World War II; **Ona Tornsen:** Expert markswoman;

Pooch: Specially trained military dog; **Sarge:** Impeccable commando skills; expert marksman.

ALLIES Haunted Tank, Sergeant Rock, Easy Company

ENEMIES Nazi Germany, Empire of Japan

AFFILIATIONS US Army, Navy, and Air Force

The Losers were Allied servicemen during World War II,

each of whom had suffered serious failures during their military careers.

The crew of Captain Storm's first command, PT-47, had been massacred by

a Japanese submarine; a rookie pilot flying alongside Johnny Cloud had been killed in combat; and a band of raw recruits led by Gunner and Sarge had been wiped out during their first patrol. After Sergeant Jeb Stuart, commander of the Haunted Tank, persuaded the soldiers to help him destroy a Nazi radar tower, the four men stayed together, united by the Military High Command as a special task force.

Briefly recruiting a fifth member, a Norwegian resistance fighter named Ona, the unit fought Axis tyranny across Europe and Asia, never quite shaking their self-imposed status as "Losers."

Tragically, all four men and their canine sidekick, Pooch, died in action during the final days of World War II. Decades later Gunner was resurrected by Project M and recruited for the new Creature Commandos unit.

SUICIDE MISSIONS

Despite their seemingly terrible luck, the Losers had a knack of surviving against impossible odds.

MAD HARRIET

DEBUT *Mr. Miracle* (Vol.1) #6 (Feb. 1972)

BASE Apokolips

HEIGHT 5ft 10in **WEIGHT** 146 lbs **EYES** Black **HAIR** Green

POWERS/ABILITIES Fierce and ruthless warrior, trained by Granny Goodness; weapons include energy claws; superhuman agility, strength, durability, and endurance, extremely unpredictable.

ALLIES Granny Goodness, Lashina, Stompa, Bernadeth

ENEMIES Big Barda, Mr. Miracle, Bernadeth, Wonder Woman, Steve Trevor

AFFILIATIONS Female Furies

Apokolips has spawned some of the most lethal and frightening villains in creation. Perhaps the most demented is Mad Harriet, one of Darkseid's infamous Female Furies. The twisted result of being raised in Granny Goodness' corrupt orphanage, Mad Harriet revels in torture and pain. Taking orders from Bernadeth—sister of Darkseid's premier lackey and torturer, Desaad—Mad Harriet revels in her reputation as a "psychopathic harpy," quick to use the slashing power spikes on her armed gauntlets.

Her first commander was Big Barda, who led the Female Furies, but when she defected, fleeing Apokolips with her true love, Mr. Miracle, her former team happily pursued her to Earth. Barda convinced the Furies to abandon Darkseid and work with her and Mr. Miracle, but their true loyalties re-emerged, and they resumed their roles as Darkseid's killer elite. Mad Harriet recently joined forces with Big Barda and the Furies to fight Darkseid's daughter, Grail, who had enslaved newly resurrected Darkseid. Mad Harriet was captured by Wonder Woman and Steve Trevor, but defied interrogation and soon returned to her dark Master.

ON THE RECORD

One of Mad Harriet's fiercest battles was with the Suicide Squad over the fate of Glorious Godfrey. During the fight, she was nearly killed when her energy claws backfired as she slashed at Bronze Tiger. She was far less fortunate in *Countdown to Final Crisis*, when she was accidentally incinerated by Apokolips' Dog Soldiers during a confrontation with Mary Shazam, Harley Quinn, and Catwoman.

MAD, BAD, AND NO FUN TO KNOW:

Harriet and Harley turned a slug-fest into a hug-fest when they realized how much they have in common, especially their dubious sanity.

THE MAD HATTER

DEBUT *Batman* (Vol. 1) #49 (Oct./Nov. 1948)

REAL NAME Jervis Tetch

BASE Gotham City

HEIGHT 4ft 8in **WEIGHT** 149 lbs **EYES** Blue **HAIR** Red

POWERS/ABILITIES Extremely intelligent inventor and technician; uses drugged tea to enhance his own physical abilities; technological innovations let him control the minds of others.

ALLIES Tweedledee, Tweedledum

ENEMIES Batman, Red Robin, Bluebird, Black Mask, Anarky

AFFILIATIONS Secret Society

Jervis Tetch lived a tortured life, mostly due to his appearance. As a young boy, he became obsessed with Lewis Carroll's *Alice in Wonderland* stories. This, combined with his father's haberdashery shop, would influence the later Super-Villain identity he would adopt for himself.

As a boy, Jervis fell in love with a girl named Alice. While he was often undermined and bullied by his classmates, Jervis worked up the nerve to ask Alice on a date, and she accepted, accompanying him to a theme park called Wonderland. That day was the best day of his life, and Tetch became obsessed with it, even though Alice rejected him at a dance soon afterward. Highly sensitive about

his short stature, Jervis began experimental testosterone therapy that altered his mind and slowly drove him insane.

Years later, Jervis adopted the identity of the Mad Hatter and began hunting for his "Alice" over and over again, even killing the real Alice when he discovered that she was no longer the radiant beauty he remembered from his "perfect day." With his inventive genius, the Mad Hatter developed mind-control devices designed to make future "Alices" more receptive to his every command.

ALICE DOESN'T LIVE HERE ANYMORE
One of the many "Alices" the Mad Hatter was obsessed with and eventually killed was the sister of the future villain Anarky, who sought revenge for Tetch's crime.

ON THE RECORD

The Mad Hatter first appeared in 1948, in the same issue of *Batman* that featured another new addition to the Dark Knight's supporting cast—love interest Vicki Vale. His appearance was short-lived as Batman foiled his plan and he was locked away in Gotham Pen. While incarcerated, an impostor turned up on the scene in 1956 taking his name and MO, but sporting a handlebar mustache and a sane mind. The two Mad Hatters took turns matching wits with Batman over the years, but the later villain changed his name to Hatman in 2010.

The Hatter later joined the Secret Six, helping them escape from the Doom Patrol, and Ragdoll rewarded him by pushing him off a bridge. He survived and sought revenge, only to find himself once more falling from a bridge to his apparent death after Ragdoll tossed his precious hat over the edge.

A HATTER FOR ALL OCCASIONS

Hatman made a reappearance in *Batman* #700 (Aug. 2010), attempting (and failing) to brainwash Robin, Batman, and Batgirl—and establishing his own credentials as a top-hatted trickster.

MADAME ROUGE

DEBUT *Doom Patrol* (Vol. 1) #86 (Mar. 1964)
My Greatest Adventure (Vol. 2) #1 (Dec. 2011)
REAL NAME Laura DeMille
HEIGHT 5ft 6in **WEIGHT** 118 lbs
EYES Blue **HAIR** Black
POWERS/ABILITIES Stretching her body to incredible lengths; reshaping facial features.
ENEMIES Doom Patrol, Teen Titans

The first female member of the Super-Villain group the Brotherhood of Evil, Madame Rouge was originally a French film actress named Laura DeMille,

who suffered from schizophrenia following a car accident. Mr. Brain and Monsieur Mallah used a ray treatment to suppress her kind side and help her along the road to villainy.

DeMille adopted the name Madame Rouge, and was given powers by the brilliant Brain. Despite being attracted to the Doom Patrol's chief, Dr. Niles Caulder, Madame Rouge fought his team many times, until the Doom Patrol seemingly sacrificed their lives to save a small New England fishing town from the Brotherhood of Evil. Years later, during a conflict with the Teen Titans, Madame Rouge was knocked into machinery that restored her original personality, but ultimately killed her. She later returned briefly in undead form as a member of the Black Lantern Corps.

MAELSTROM

DEBUT *Superman/Supergirl: Maelstrom* #1 (Jan. 2009)
REAL NAME Maelstrom
BASE Apokolips
HEIGHT 6ft 2in **WEIGHT** 345 lbs
EYES Blue **HAIR** Black
POWERS/ABILITIES Superhuman strength, endurance, and durability; expert combatant; uses buzz-saw-like blade and Apokolips armor.
ENEMIES Superman, Supergirl

On the hellish planet Apokolips, Darkseid lords over millions of lowlies. But one of his laborers, a woman named Maelstrom, loved him and longed to be his next bride.

To catch Darkseid's eye, she decided to give him a very special gift: Superman's corpse.

She convinced her accomplice Hadrok to steal a boom-tube device for her, killed him, and then traveled to Earth to locate Superman. She encountered and defeated Supergirl, but lost her fight with Superman, who destroyed her Boom-Tube generator while hurling her back to Apokolips. There she was relegated to the Terrorium arena and later the slave pits by Granny Goodness, but was eventually allowed to resume her war on Superman by Darkseid himself. She failed again in her goal when Supergirl and Superman teamed up to stop her and her new allies, the Female Furies.

MAGENTA

DEBUT *New Teen Titans* (Vol. 1) #17 (Mar. 1982)
REAL NAME Francis (Frances) Kane
BASE Keystone City
HEIGHT 5ft 7in **WEIGHT** 134 lbs
EYES Blue **HAIR** Purple
POWERS/ABILITIES Able to manipulate magnetic waves to move metal objects.
ALLIES The Flash (Wally West), Cicada
ENEMIES Doctor Polaris
AFFILIATIONS Teen Titans, Rogues

A longtime friend of Wally West's and a fellow former Blue Valley resident, Francis Kane had formed an early bond with Wally that wasn't easily broken. One day, when the two were attending Blue Valley College, Wally walked Francis home, only to find her mom attempting to speak to her dead brother and father through a séance. Francis seemed to disappear in a vortex of spiraling energy, and reemerged with magnetic superpowers.

Told that she was damned by her mother, Francis' powers went haywire, and it seemed a magnetic demon was possessing her, one the Teen Titans had to fight into submission. In truth, Francis had excessive magnetic waves in her brain, and Doctor Polaris tried to use them to travel back to Earth from the dimension to which Green Lantern had banished him. Later, tricked into becoming a sleeper agent by Dr. Alysia Damalis at S.T.A.R. Labs, Francis developed an alter ego named Magenta, and clashed with The Flash.

MADAME XANADU

DEBUT *Doorway to Nightmare* #1 (Jan.-Feb. 1978)
REAL NAME Nimue Inwudu
BASE Dean Street, London, Mobile
HEIGHT 5ft 9in **WEIGHT** 125 lbs **EYES** Green **HAIR** Black
POWERS/ABILITIES Sorceress well versed in the use of the mystic arts; able to predict the future to a degree, normally using tarot cards; seemingly immortal and doesn't age.
ALLIES Carter Hall, John Constantine, Shade the Changing Man, Zatanna, Etrigan the Demon
ENEMIES Felix Faust, the Blight, Mordru, Dr. Destiny
AFFILIATIONS Demon Knights, Justice League Dark

A LONELY ROAD: Madame Xanadu's romances have ranged from Etrigan to Jason Blood. She steered clear of Deadman, however, realizing that she had to walk a lonely path.

After the fall of King Arthur and Camelot, Jason Blood was cursed: bonded to the demon Etrigan, as a result of the machinations of sorcerer Merlyn. Nimue Inwudu—calling herself Madame Xanadu—voyaged with her infernally twinned lover and met the Shining Knight, Al Jabr, Exoristos, Vandal Savage, and the Horsewoman. They banded together as the Demon Knights, sworn foes of malevolent mage Mordru.

Centuries later, Madame Xanadu realized the world was entering a time of great danger and began assembling a team to counter forthcoming threats. To unite these magical strangers—Shade the Changing Man, Deadman, Zatanna, John Constantine, and

Mindwarp—she had to escalate the conflict by helping the Enchantress fight her new champions. The team stopped Enchantress, but also discovered Xanadu's treachery. Yet, when needed to tackle magical and supernatural threats, they returned to action as Justice League Dark. The group disbanded after several missions, replaced by a new squad after the *Metal* crisis heralded a change in the ways of magic. After months on the sidelines, acting as advisor to the likes of Hawkman Carter Hall, Xanadu rejoined Justice League Dark to resist the Otherkind invasion.

ON THE RECORD

Madame Xanadu was created in the late 1970s for the shortlived *Doorway to Nightmare* series. Three years later, she appeared in a self-titled one-shot comic and did not feature in an ongoing series until 2008, when her origins and her connection to the wizard Merlin, Etrigan the Demon, and King Arthur were fully explored.

Madame Xanadu's cruelest encounter came during the Day of Vengeance, when a deranged Spectre began eradicating magic and removed her tarot-reading powers of foresight, by taking her eyes. Despite helping defeat the Spectre, she remained blind for the rest of her pre-Flashpoint career.

SUPERNATURAL SENTINELS Often joining forces with other magical characters, Madame Xanadu formed the Sentinels of Magic with heroes such as Doctor Fate, Faust, and Ragman.

MAGOG

DEBUT *Kingdom Come* #1 (May 1996)

REAL NAME David Reid

HEIGHT 6ft 4in **WEIGHT** 336 lbs **EYES** One blue, one white **HAIR** Blond

POWERS/ABILITIES Empowered by the Fusion Stone composed of a transmutational element; superhuman strength, endurance, and durability; trident capable of firing powerful energy blasts.

ALLIES Circe, Emerald Empress

ENEMIES Superman, Wonder Woman, Atomic Skull, Major Disaster

AFFILIATIONS Fatal Five

When Darkseid's Parademon army invaded Earth, young David Reid lost his parents in the chaos. Although the Justice League drove Darkseid back to Apokolips, Reid held nothing but hatred in his heart for Super Heroes who had failed to save his family. Years later, he was living on the street when the sorceress Circe, selected him as test subject for her "Fusion Stone." It granted Reid superhuman powers, but, as Circe willed, he forgot his past for a time.

Armed with a powerful energy lance, Reid fought and defeated the Atomic Skull and Major Disaster. He then faced Superman and Wonder Woman and, as his memories returned, revealed himself as Magog. He and Circe did their best to defeat the Man of Steel and Wonder Woman, but failed. Superman showed Magog what it meant to be a true Super Hero; unfortunately, the villain was too set in his ways to heed the Man of Steel's lesson.

Post-*Rebirth*, Reid's campaign against false gods again brought him into conflict with Superman, but he also branched out to target his cousin Supergirl, both singly and as part of the Emerald Empress' new Fatal Five.

BEATING THE BEST Obsessed with ridding the world of Super Heroes, Magog proved a very formidable force.

ON THE RECORD

Magog first appeared in the *Kingdom Come* miniseries in 1996. In this Earth-22 reality, Magog was one of the upstarts whose violence inspired genuine Super Heroes, led by Superman, to teach a younger generation what it meant to be a hero. Magog was later introduced in 2008 in Justice Society of America. This Magog was a descendant of F.D. Roosevelt named David Reid, a former marine who became a member of the JSA. Later, during the events of *Brightest Day*, Reid was deceived and forced to kill himself by Maxwell Lord.

GOG-SMACKED

A source of friction inside the JSA, Magog was given his own series in 2009, during which he is depicted being controlled by the Cult of Gog, and sacrificing himself to defeat them.

MAJOR DISASTER

DEBUT *Green Lantern* (Vol. 2) #43 (Mar. 1966)

REAL NAME Paul Booker

HEIGHT 5ft 11in **WEIGHT** 195 lbs

EYES Blue **HAIR** Black

POWERS/ABILITIES Able to create massive disasters such as earthquakes, hurricanes, and storms by the power of thought.

ALLIES Atomic Skull

ENEMIES Superman, Wonder Woman, Magog

AFFILIATIONS Minor Disaster (Penny Booker), Justice League Antarctica

Green Lantern foe Major Disaster fabricated disasters for his own evil ends. Never a villainous success, he joined the little-respected team, Justice League Antarctica. After a power upgrade from the demon Neron, he graduated to Justice League America, giving the Super Hero life a real try. He died fighting Superboy-Prime in the Battle of Metropolis, but was briefly revived as a Black Lantern during *Blackest Night*. Post-*Flashpoint*, Major Disaster returned to his criminal ways: teaming up with Superman villain Atomic Skull. They interrupted a date between Superman and Wonder Woman by attacking the Indian Point Nuclear Power Plant for a mystery client. He created a massive storm, but was bested by the villain Magog, disguised as a new Super Hero, Wonderstar.

Following *Rebirth*, Booker again lost to the Justice League. His daughter Penny began her own criminal career, battling Harley Quinn as Minor Disaster.

FORCE OF NATURE Major Disaster was able to call down lightning to attack Superman and Wonder Woman.

MAJOR FORCE

DEBUT *Captain Atom* (Vol. 1) #12 (Feb. 1988)

HEIGHT 6ft 5in **WEIGHT** 280 lbs

EYES White **HAIR** White

POWERS/ABILITIES Able to project energy; superhuman strength, endurance, and durability.

ALLIES General Eiling

ENEMIES Firestorm, Superman, Hyena, Killer Frost

Major Force is a US Government operative answerable to General Eiling. It is believed that he formerly operated as Black Jack for a clandestine group called the Black Razors. Black Jack was allegedly decapitated early in his career, yet he seems to have somehow survived the encounter (or been replaced by an as yet unknown new player). He then reemerged as the government agent Major Force in order to rescue Firestorm.

Major Force later helped Firestorm fight off attacks by the Hyena, Killer Frost, Multiplex, Typhoon, Plastique, and Black Bison, with the intention of getting Firestorm to work for the US Government. After these Super-Villains were defeated, Major Force used a special camera flash to render Firestorm unconscious and take him back to General Eiling's base. Unfortunately for Eiling, Superman was alerted to their underhand scheme and crashed into the secure facility, easily taking down Major Force and freeing Firestorm in the process.

TOUGH AS NAILS

Major Force is covered in a metallic alloy that grants him enhanced endurance, much like the Super Hero Captain Atom.

MAMMOTH

DEBUT *The New Teen Titans* (Vol. 1)

#3 (Jan. 1981)

REAL NAME Baran Flinders

HEIGHT 6ft 5in **WEIGHT** 300 lbs

EYES Blue **HAIR** Red

POWERS/ABILITIES Superhuman strength, endurance, and durability; prone to fits of rage due to state of emotional underdevelopment.

ALLIES Shimmer, Mr. Whisper

ENEMIES Superman, Wonder Woman

Australian Baran Flinders and his sister Selinda were bullied at school when their metahuman powers manifested. They were subsequently taken to specialists

who augmented their natural abilities while teaching the children control. Taking the names Mammoth (Baran) and Shimmer (Selinda), the siblings became super-criminals, clashing with Superman, Justice League and both the Teen Titans and their adult iteration the Titans. Despite his immense power, Baran is by nature a flunky and hireling, happy to take orders from the likes of Mr. Twister, H.I.V.E., and his Fearsome Five leaders Doctor Light and Psimon as long as it leads to a big pay-off or cathartic fighting.

Post-*Flashpoint*, Mammoth only made a few appearances: with the Secret Society and alongside his Fearsome Five allies when they attacked Cyborg and the Metal Men. He also battled Superman and Wonder Woman, and was a henchman for the mysterious Mr. Whisper.

BRUTE FORCE

Mammoth was never happier than when he was lashing out at some flashy costumed punk who thought he was just slow and stupid.

MAN-BAT

DEBUT *Detective Comics* (Vol. 1) #400 (Jun. 1970)

REAL NAME Dr. Kirk Langstrom

BASE Gotham City

HEIGHT 6ft 1in **WEIGHT** 201 lbs

EYES Brown/red **HAIR** Brown

POWERS/ABILITIES Serum grants superhuman strength, endurance, speed, agility, reflexes, and durability; flight; genius-level intellect with a keen interest in the sciences; government connections.

ALLIES The Outlaws, Batman, Wonder Woman

ENEMIES Batman, the Batman Family, Bat-Queen

AFFILIATIONS Justice League Dark, S.H.A.D.E., Gotham Academy

Dr. Kirk Langstrom employed his specialist knowledge seeking a cure for deafness. He developed the Langstrom Atavistic Gene Recall Serum, but his test subjects mutated into hideous, bat-like creatures. Catastrophically, Kirk's serum was stolen, and released on the 900 block of Gotham City. With the city plagued by a huge Man-Bat infestation, Langstrom developed an anti-virus to fight the outbreak and—dreading further disasters—tested it on himself. The antidote cured the infected, but unfortunately changed Kirk into the sole remaining Man-Bat. Langstrom subsequently—but only temporarily—gained control over his Man-Bat transformations, and he work at Gotham Academy as its resident science teacher, and at clandestine counter-terrorism organization S.H.A.D.E.

Kirk's family also suffered. His wife, Francine, developed a serum and became a terrifying Bat-Queen, while his father, Abraham, deliberately transformed himself into a villainous Man-Bat.

After finally perfecting his formula, Langstrom can effect staged transformations: ranging from his original flying monster to a semi-altered state, combining vast intellect with bat senses. Recruited to Justice League Dark, Langstrom began a scientific study into the nature and practice of magic, a project which affected his hard-won sanity. That pressure was intensified by media reports that his origins were a disinformation strategy, and his powers came from a top-secret US government metahuman enhancement program: the Superman Project.

ON THE RECORD

Dr. Kirk Langstrom was first introduced in *Detective Comics* #400 (Jun. 1970), as a bat expert seeking to harness the sonar-like abilities of bats. His bat-serum transformed him into a giant bat, and later did the same to his girlfriend, Francine Lee (later Langstrom). Later, Man-Bat learned how to control his abilities with a pill, and fought injustice, sometimes alongside private-eye Jason Bard. His heroics were spotlighted in his own 1975 miniseries, in which he took on the Batman villain, Ten-Eyed Man.

BATMAN V. MAN-BAT: Batman had battled many bizarre foes, but even he wasn't prepared for a bestial version of himself: Man-Bat.

MAN OF SCIENCE Dr. Langstrom applied scientific discipline and rationality to his study of magic.

MANCHESTER BLACK

DEBUT *Action Comics* (Vol. 1) #775 (Mar. 2001)

EYES Brown **HAIR** Purple
POWERS/ABILITIES Mind reading and telekinetic abilities; skilled manipulator
ALLIES Elite
ENEMIES Superman, Superboy (Jon Kent), Lois Lane, Frankenstein, The Bride
AFFILIATIONS S.T.A.R. Labs, Super-Elite

British-born Manchester Black is a super-psionic vigilante. With his Elite team, he began executing until Superman proved the power and value

of his altruistic beliefs. When Black realized his acts made him a villain in his own eyes, he killed himself. He was reborn Post-Flashpoint as chief of S.T.A.R. Labs' Advanced Ideas Division: a ruthless manipulator who tricked the Teen Titans into working with S.T.A.R. Labs and for him. Black orchestrated deadly attacks upon himself and New York City by Algorithm—a killer AI. After Flashpoint, he led a new band of alien Super-Elite, attacking Superman's family and seeking to turn his son Jon into the kind of antihero who punished and killed the wicked. Ultimately defeated, Black's consciousness was briefly imprisoned in a cow's mind. He remains at large in the Multiverse.

ALLIES Manitou Dawn, Naif al-Sheikh, Vera Black, J'onn J'onzz, Major Disaster
ENEMIES Gamemnae, Manchester Black
AFFILIATIONS League of Ancients, Justice League of America, Justice League Elite

Manitou Raven was a mystic master of the Obsidian Age people who became the Apache tribe. With his sorceress wife Manitou Dawn, he joined a coalition of super-

powered champions, the League of Ancients.

Three thousand years ago, Raven and Dawn were tricked by Gamemnae of Atlantis into attacking the 21st-century Justice League. After realizing they were duped, the Manitous helped defeat Gamemnae, and then moved to the future to join the JL, where their magical abilities made them invaluable.

A hard-liner, Raven joined the black ops Justice League Elite. He died saving the team from a bomb, but this did not end his service. His mantle of power passed to his wife, and his spirit often appears to her, offering her sage advice.

DEBUT *Superman's Pal, Jimmy Olsen* (Vol. 1) #139 (Jul. 1971)
BASE Metropolis
EYES Black
HAIR Black
POWERS/ABILITIES Devious and ruthless; immense physical strength; religious fanaticism.
ENEMIES Superman, Jimmy Olsen, the Guardian, Renee Montoya, Nightwing, Batwoman

Bruno "Ugly" Mannheim came from a long line of thugs and career criminals. Following in the footsteps of his mobster father—known as "Boss Moxie"—Bruno

strong-armed his way out of Metropolis' Suicide Slum and climbed the ladder of corruption until he was chief of underworld super-syndicate Intergang.

Under Darkseid, he was "reborn" as a devout believer in the Religion of Crime as espoused in the vile Crime Bible. His savage tendencies magnified by the dark faith, Mannheim began recruiting Super-Villains, turning Intergang into a legion of monsters. Those who did not convert, he killed and ate.

Physically mutating, he attempted to turn Gotham City into Little Apokolips, but was foiled and killed by Nightwing, Batwoman, and The Question.

DEBUT *Forever People* (Vol. 1) #2 (Apr.–May 1971)
REAL NAME Omar Bashir
BASE Feast of Eden, Sudan
HEIGHT 6ft 4in **WEIGHT** 225 lbs
EYES Orange **HAIR** Bald
POWERS/ABILITIES Superhuman strength and speed; limited flight, energy absorption.
ENEMIES Forever People, Infinity-Man
AFFILIATIONS The Swarm, Darkseid

Mantis is a ruthlessly destructive being, born from a freak combination of human agriculture, New Gods technology, and good intentions. A New Genesis faction had

been secretly working with human scientists to try to solve world hunger. They planned to replace Earth's deserts with topsoil from different dimensions and use insects to cross-pollinate the resulting crops. Their efforts went horribly awry when Apokolips intervened, with human project-leader Omar Bashir mutating into Mantis, an insectoid berserker.

Aggressive and driven by a need to defend his swarm's territory, Mantis is the only known sentient member of the new species. Determined to become Earth's dominant life-form, his insectoids breed by mutating their victims into drones.

MANHUNTERS

DEBUT *1st Issue Special* (Vol. 1) #5 (Aug. 1975)
BASE Warworld, Orinda, Biot, Oa
POWERS/ABILITIES Virtually indestructible; adept at deception and strategic planning; possess advanced science and weaponry.
ALLIES Sinestro Corps
ENEMIES Guardians of the Universe, Green Lantern Corps, Darkstars, JLA, JSA
AFFILIATIONS Guardians of the Universe, Manhunter agents

The Manhunters were constructed by the Guardians of Oa billions of years ago as their first attempt to police the Universe. When the robots' programming was corrupted by the renegade Oan, Krona, the units developed emotions—especially pride and arrogance—and mutinied. After they eradicated life in Sector 666, most Manhunters were scrapped, but many escaped and went into hiding.

However, their core directive remained: they were designed to stalk prey and enact justice, but now their leader would dictate what that meant. Executing their pledge "No man escapes the Manhunters," they infiltrated countless worlds, planting undercover agents throughout secret societies and Super Hero groups, and offering power and justice to the helpless. Their ultimate aim, though, was vengeance against the Guardians.

On Earth, the Manhunters formed the Shan sect, which, for centuries, did worthwhile work from the shadows. The Shan's last recruit was frustrated public defender Mark Shaw, whose good intentions were subverted to the Prime Manhunter's scheme to forever discredit the Guardians.

The Manhunters' greatest strike came when the Guardians reunited with their Oan females, the Zamaron, to facilitate the next stage in universal evolution. The genders had separated billions of years earlier, unable to agree on how to handle Krona. To crush the Guardians' plans, every Earthly Manhunter asset was activated to counter the heroes safeguarding the "New Guardians" birth. The scale and foresight of the robots' planning and attacks was staggering, but a coalition of champions comprising the Justice League, Suicide Squad, Outsiders, Teen Titans, Infinity, Inc., Legion of Super-Heroes, and more prevailed—but not without great loss.

Regularly discovered and destroyed, the Manhunters seem eternal: perpetually rebuilding in secret before remorselessly striking again.

LETHAL WEAPONS
 Not every valiant defender survived the concerted assault of the manhunting mechanical monsters.

AFFILIATION March Venture, Court of Owls, Willowood Home for Children

Lincoln March believed he was Bruce's long-lost younger brother Thomas Jr., reared in secret as protection from the insidious Court of Owls. The

Court found him anyway, reeducating him as their pawn. Designed to run Wayne's financial empire for them, he failed and was reinvented as a financier and Gotham City mayoral candidate. After joining the Court's top tier—and murdering most of them—March donned hi-tech Talon armor to fight Batman. Defeated, he seemingly died but actually retreated into the shadows, attacking Batman's family via Cluemaster. This also failed, and the Court of Owls put him in suspended animation. Paving the way for his war against all Batman loves, The Joker reanimated March, setting him on Batman. The Dark Knight and The Joker's archrival Two-Face easily defeated him.

DEBUT *Manhunter* (Vol. 3) #1 (Oct. 2004)

REAL NAME Kate Spencer

BASE Mobile

HEIGHT 5ft 5in

WEIGHT 120 lbs

EYES Blue

HAIR Black

POWERS/ABILITIES Incisive intellect; dogged determination and peak physical constitution; trained in martial arts; extraterrestrial Darkstar Exo-Mantle affords superhuman strength; clawed gauntlet; power staff; expert knowledge of the legal system.

ALLIES Green Arrow, Red Arrow, Black Canary, Batman

ENEMIES Leviathan, Copperhead, Ninth Circle

NEVER SURRENDER

Whatever the odds, and despite possessing none of the powers other family members were blessed with, Kate Spencer could never accept defeat.

HELP AT HAND Manhunter's costume was the contents of an evidence locker, including gloves once worn by Azrael and a Darkstar bodysuit.

With the US justice system increasingly unable to deal with metahuman criminality or the ruthless tactics of modern human predators, legal advocate Kate Spencer decided to take the law into her own hands. Armed with lethal alien weaponry and wearing armor, Kate adopted a codename taken from the villains and monsters she despised. She now stalks the night as Manhunter, bringing swift and certain retribution to the guilty, and salvation to the oppressed.

Formerly forced to hide behind the legal system, Kate Spencer's true personality emerged when she lost faith in her job as a Federal prosecutor. Despite her best legal efforts, the reptilian Copperhead—who had murdered and eaten many victims—evaded the death penalty and killed again. Enraged and frustrated, Kate stole impounded technology and used it to hunt down and execute the cannibal.

While Kate had many adventures as this new Manhunter, she appeared to retire when she moved to Seattle with her son, Ramsey. Kate had fallen on hard times, and had too many bills and too few prospects. At the end of her rope, she took on the hopelessly dire case of Oliver Queen, who had been framed for murder by the clandestine Ninth Circle criminal organization. The Ninth Circle owned much of Seattle and even had many police detectives on their payroll. When it was discovered that Oliver's "murder victim" was very much alive, Kate was charged with watching over her. One night, when an officer attempted to make this innocent woman's alleged murder a reality, Kate was forced to kill the corrupt detective in front of her young son in order to keep him safe.

After Oliver Queen was found innocent, Kate became the corporate attorney for Queen Industries. She resumed her life as Manhunter and was recruited by Batman into an elite task force of detectives. The Leviathan criminal organization had destroyed or absorbed all other spy groups, and Batman was attempting to identify the head of this shadowy operation. While Kate was originally suspected to be working with Leviathan, the detectives soon realized that the person truly in charge was a different Manhunter, former hero Mark Shaw.

SNAKEBITE

Despite her inexperience, Manhunter applied the oldest of all human laws to Copperhead: "a life for a life."

ON THE RECORD

Before the reality-altering event *Flashpoint*, Kate had learned that she had descended from a line of mighty metahumans. Kate's great-grandfather was legendary World War I super-warrior Hugo Danner, her grandparents were WWII heroes Iron Munro and Phantom Lady, and her own father Walter Pratt was a Super-Villain. Even Kate's young son Ramsey appeared to be developing astonishing powers.

Despite lacking metahuman advantages herself, Kate eventually became a valuable asset of the Department of Extranormal Operations, while also freelancing with the Birds of Prey and the Batman Family.

GOTHAM CITY BOUND

Kate eventually found work in Gotham City as the new District Attorney, a position once held by Harvey Dent (Two-Face).

AFFILIATIONS Maroni Crime Family

Salvatore "Boss" Maroni was one of Gotham City's most notorious gangsters and the sometime rival/sometime ally of the Falcone crime family. Before the

reality-changing *Flashpoint* event, Maroni was responsible for creating the Super-Villain Two-Face when he hurled acid at DA Harvey Dent, scarring Dent's face.

In modern continuity, that dubious honor falls to the criminal Erin McKillen, though Maroni is still a mob boss and owner of a movie theater. When a young Dick Grayson was watching a film at Maroni's movie house, Gotham City lost power as part of the event later dubbed *Zero Year*. Grayson teamed up with Salvatore's son, C.J., and the two managed to escape an encounter with the villain Amygdala, the Grayson family earning Maroni's gratitude in the process.

REAL NAME Mary Seward

EYES Red **HAIR** Red

POWERS/ABILITIES Vampiric hypnosis and strength; shape-changing; regeneration and immortality, but vulnerability to sunlight.

ENEMIES Andrew Bennett, Van Helsing

Created by vampire Andrew Bennett, Mary Seward spent centuries as his companion. Their disagreement over how vampires should interact with humans

sharpened into open conflict when Mary gathered the Cult of the Blood Red Moon and embarked on a war against the guardians of humanity. Bennett tried to kill her, but was stopped by Batman, before teenage vampire hunter Tig Rafelson killed Bennett.

When John Constantine brought Bennett back to life, Andrew and Mary joined together at the head of all vampires after the death of the primordial vampire Cain. She fought Bennett for control before a climactic battle between vampires and the Van Helsing-led vampire hunters culminated in Bennett absorbing the vampiric powers of every living vampire—and assuming Cain's evil role. Mary was then pitted against Bennett once more, despite remembering their history as lovers.

CONFIDANT
When Billy Batson became aware of what it meant to have the powers of Shazam, he knew he could share his misgivings with Mary Bromfield.

Mary Bromfield is one

of Mr. and Mrs. Vasquez's foster children, along with Billy Batson and the others who become the Shazam Family—Freddy Freeman, Pedro Pena, Eugene Choi, and Darla Dudley. She was the first child the Vasquez's fostered, and as a result is something of a mother figure to the younger kids. They all seek her advice and guidance, when situations arise that they cannot discuss with adults.

When Black Adam confronted Shazam, the hero shared his powers with the entire group, and Mary

became Lady Shazam, granted the same super-strength and powers over the Living Lightning that were bestowed on Shazam. After defeating Black Adam, all of the children were bound together by their experience and knowledge of Billy Batson's secret. Mary assumed a leadership role in the team, and also helped Billy come to terms with the powers of Shazam—as well as his knowledge that he was far from the Wizard's first choice.

Her wisdom was especially necessary when Billy's real father returned. He briefly shared the Shazam power, only to be exposed as a mind-enraptured pawn of Mister Mind, caring nothing for the son he had abandoned.

ON THE RECORD

In previous incarnations of the character, Mary drew her powers from a different set of gods making up the word Shazam: Selena, Hippolyta, Ariadne, Zephyrus, Aurora, and Minerva. Mary and the other members of the Shazam family have been in and out of the Justice League over the years, and she was also a core member of the Super Buddies, when she survived a literal trip to Hell and back.

During *Final Crisis*, Mary was one of a number of heroes corrupted and turned into Darkseid's thralls until Freddy Freeman managed to overcome Desaad's influence by catching hold of Mary and shouting "Shazam!" to transform her back to her normal self.

POWERED BY MIGHTY WOMEN
Mary discovered that being part of the Shazam family was more fun than she'd expected.

RIDE THE LIGHTNING
Mary Bromfield takes on the powers of Shazam, knowing that, as the Vasquez household's big sister, she's the one her foster siblings look to for counsel.

MARTIAN MANHUNTER

DEBUT *Detective Comics* #225 (Nov. 1955)

REAL NAME J'onn J'onzz **BASE** Mobile

HEIGHT 6ft 7in **WEIGHT** 260 lbs **EYES** Red **HAIR** None
POWERS/ABILITIES Physical near-invulnerability; superhuman strength, speed, and endurance; flight; telepathy, telekinesis, shapeshifting, phase-shifting, regeneration; Martian vision can see through solid objects and project various forms of energy; extremely intelligent with strong leadership skills.

ALLIES Hawkgirl, Miss Martian, Superman

ENEMIES Ma'alefa'ak, Charrn, Crime Syndicate, Lex Luthor, Despero

AFFILIATIONS Justice League, Stormwatch, Justice League United, Justice League of America, Guild of Detection

The Martian Manhunter is—according to Superman—the most powerful being on Earth. But even more than his powers, it is his idealism and resolute pursuit of justice that set him apart. He becomes the moral compass of any group he joins, the memory of his lost family driving him to save others from suffering the grief he continues to feel. With immense powers, including shapeshifting and mind control, J'onn J'onzz can do almost anything—and knows that such power must be guided by a true belief in what's right. Though not human, he is perhaps the most empathetic of heroes—an irony not lost on J'onn himself.

AT A GLANCE...

Many faces

His ability to shapeshift has always been key to Martian Manhunter's success. He usually assumes other human-sized forms—notably taking Catwoman's shape to infiltrate the Secret Society of Super-Villains—but is capable of more incredible transformations as well.

Mars attacks

For many years it was thought that the Martian Manhunter was the last of his kind. However, this was not the case. The wise bearer of Martian history known as the Martian Keep was being held on Thanagar Prime. The Martian Keep also raised a White Martian, now known as the heroic Miss Martian.

Pyrophobia

The Martian Manhunter has a strong aversion to fire, long thought to be a physical vulnerability. But it stems from the trauma of seeing so many other Martians die of H'ronmeer's Curse—a telepathic plague that killed victims with psychic fire.

When the Multiverse was originally formed, it was crafted by Perpetua, a being who wished to create a perpetual universe with the help of her servant army of apex predators—hybrid creatures that were equal parts Martian and Earthling. As punishment for her attempt to prevent the natural order of things, Perpetua was locked away behind the Source Wall at the far reaches of the galaxy.

While the Guardians of the Universe sought to keep the knowledge of this race of apex predators a secret, a small group of Earth scientists led by Lex Luthor's father, Lionel Luthor, discovered it. They began experimenting, creating half Martian/half human abominations. The DNA of a captive Martian child, a boy named J'onn J'onzz, was used to create these terrifying monstrosities.

During his time as a captive, J'onn befriended a young Lex Luthor, who eventually helped J'onn escape. J'onn returned to Mars and Lex Luthor's memories were all but erased. Back on Mars, J'onn rose through the ranks of the Manhunters to become a Chief Hunter. A far cry from the hero he is today, J'onn worked with a variety of crime lords in order to give his family a more financially stable life. Ashamed, he kept these criminal secrets from his wife M'yri'ah and his daughter K'hym.

When a plague of psychic fire called H'ronmeer's Curse ravaged Mars, killing nearly everyone, J'onn was teleported to Earth by a scientist named Dr. Mark Saul Erdel. Not just transported through space, J'onn was also sent hundreds of thousands of years forward in time. However, his sudden appearance shocked Erdel and he died of a heart attack.

As he explored Earth, J'onn chanced upon an honorable police officer named John Jones who had been killed in the line of duty. J'onn assumed John's form and took his place as a police detective in Middleton, Colorado. While investigating a case with his partner Diane Meade, J'onn wrecked his car, and weakened by the flames, J'onn's true form was revealed. Nevertheless, Diane grew to accept him and the two remained partners, working together to stop a Martian criminal called Charrn.

TAKING SHAPE

Martians studied Earthlings from a distance. Primitive Earthlings greatly inspired the Martians, and many opted to walk on two legs when they chose their "social shape"—the form a Martian allows others to see them.

CLASSIC STORIES

JLA: Year One #1-12 (Jan.-Dec. 1998) This origin story of the Justice League of America demonstrates that the Martian Manhunter was the heart and soul of the team from its inception.

Martian Manhunter: American Secrets #1-3 (Aug.-Oct. 1992)

J'onn J'onzz is on his own in this claustrophobic thriller, investigating a vast conspiracy touching on the signature elements of 1950s America: game shows, the birth of rock'n'roll and suburbia, and Cold War paranoia.

Final Crisis: Requiem (Sep. 2008) The Justice League and many other heroes gather at J'onn's funeral, reflecting on his life through a series of flashbacks.

THE CURSE

When Mars was overcome by H'ronmeer's Curse, J'onn tried to use his underworld connections to escape. However, he was double-crossed by the very criminals he had protected from the Manhunters. J'onn attempted to telepathically cut his family off from the rest of the planet, but his daughter reconnected, causing her and her mother to succumb to the plague before J'onn's eyes.

J'onn was forced to witness the death of everything he held dear. His family died before his eyes, their final thoughts on his corruption.

COMING TO AMERICA
Dr. Erdel brought J'onn to Earth using a 4-D Matter Transmitter. J'onn was more susceptible to Erdel's device than other Martians due to his earlier captivity on Earth as a child at the hands of Lionel Luthor.

As the years passed, J'onn eventually found like-minded allies when he joined the Justice League, then Stormwatch, then the Justice League of America and Justice League United. After a sabbatical on Thanagar Prime, he rejoined the Justice League following an invasion from the Dark Multiverse. J'onn used his telepathic abilities to link up the Justice League, offering advanced communication capabilities and the ability to gather together in a virtual meeting room in their minds.

When Lex Luthor helped free Perpetua from behind the Source Wall at the end of the universe, Luthor was transformed into Apex Lex, combining his own DNA with Martian DNA. Taking it a step further, he absorbed J'onn into himself. As the world shifted in favor of the concept of doom, and the Justice League seemed defeated, Martian Manhunter and Hawkgirl's son, Shayne, took J'onn's place inside Luthor. His sacrifice freed the Martian Manhunter, although it could not be undone. Mustering all his strength, J'onn and the Justice League rallied, although they had to exit reality as they knew it to do so.

SHAYNE, COME BACK!

Working together in the League brought Martian Manhunter and Hawkgirl closer, and romance sparked. When they traveled to another dimension—one that no longer existed—the pair met their son from that reality, a boy named Shayne. Noble and heroic, Shayne opted to leave his world with his other parents.

Back on Earth, Shayne helped the Justice League during their fight with the Legion of Doom, but sacrificed himself by permanently taking J'onn's place inside Lex Luthor's hybrid Martian form.

IN THEIR FOOTSTEPS

Shayne employed wings like his mother, but was also able to use telepathy like his father.

ON THE RECORD

The Martian Manhunter's earliest adventures were a classic blend of sci-fi and detective stories. Brought to Earth by Dr. Erdel's teleportation experiment, then stranded by Erdel's death, he chose to use his powers to fight crime as Detective John Johns, until Earth's technology had advanced sufficiently for him to return home.

Ma'aleca'andra

In his first solo series, the Martian Manhunter's origins were revised. He was said to assume a hybrid Martian-Earthling appearance, masking his true form. Dr. Erdel's teleportation experiment was also revealed to have catapulted J'onn not just through space but also time, leaving him thousands of years distant from the planet (Ma'aleca'andra, in the Martian tongue) he once knew.

Playing with fire

J'onn J'onzz's vulnerability to fire and his fear of it soon became common knowledge among the Justice League's enemies, causing him problems and also endangering the team on a number of occasions. Grappling with his fear, he tried to confront it by making a deal with the fiery villainess Scorch. As a result he was briefly transformed into Fernus, the Burning Martian, before the other members of the League helped him regain control.

Showing his true face

In "The Others Among Us," J'onn discovered a secret project subjecting captive Martians to brutal experiments designed to uncover their powers and control the power of H'ronmeer's Curse. During the course of this story, J'onn became stuck in his true form due to psychic battles against other disguised White and Green Martians.

NIGHTMARE

Recalling the lethal fire of H'ronmeer's Curse, the Martian Manhunter died in flames at the start of *Final Crisis*.

"There isn't much justice in this world. Perhaps that's why it is so satisfying to occasionally make some."

MARTIAN MANHUNTER

MANHUNTER OF HONOR

J'onn J'onzz has become the heart of the Justice League. He is a Martian with many virtues, and few vices—aside from the occasional Choco sandwich cookie.

MATTER-EATER LAD

POWERS/ABILITIES Able to ingest and break down any form of matter.
ALLIES Wildfire **ENEMIES** Horraz, Crav the General Nah, Mordru
AFFILIATIONS Legion of Super-Heroes

After a microbial disaster rendered their food inedible, the people of planet Bismoll evolved the ability to consume all forms of matter. This made Tenzil Kem an

indispensable member of the Legion of Super-Heroes. With Matter-Eater Lad, they could escape any confinement and destroy any weapon. Kem's power provides him with constant energy, enhanced musculature, and an imposing stature. Kem compensates for his imposing looks with a gregarious and gentle nature—unless innocent lives are at stake or his comrades are in trouble.

In a previous reality, Matter-Eater Lad's Legion career was abruptly terminated when he was drafted into the Bismollian Civil Service, ultimately rising to planetary President. Ever the hero, he returned to save the universe by eating an otherwise indestructible Controller Miracle Machine that threatened to end all existence.

AFFILIATIONS New Extremists

The sadistic, chaos-loving Meanstreak became part of a mercenary group the New Extremists at the invitation of the extra-dimensional being, Dreamslayer, who

sought to destroy the JLA. The plot failed, but Dreamslayer tried again, using a cult called the Flock of the Machine, which possessed a dangerous device granted to them by the Overmaster, whom they worshiped. When this also failed, the Overmaster took direct control of the New Extremists from Dreamslayer, who had been his pawn from the beginning.

The New Extremists became part of the Super-Villain army, the Cadre, fighting the JLA again as part of the Overmaster's test of humanity's worth. After the collapse of the Cadre, the Overmaster turned Meanstreak and her fellow New Extremists loose. They were later exiled to the planet Salvation, but are thought to still be active.

Wealthy businessman Steve Dayton created the Mento Helmet to enhance his mental powers and catch the eye of the Doom Patrol's Elasti-Girl. This led to a long-standing

affiliation with the Doom Patrol, despite tensions within the group, some of whom didn't trust the self-styled hero.

Mento's reckless perfecting of his powers came at a cost to his psyche, at least twice making him mentally unbalanced. The first time, Raven cured him, but during his second period of insanity, he acted as the Crimelord for some time until the Teen Titans finally stopped him. Later, Mento appeared with the Justice League Dark during their pursuit of the Books of Magic, lending his psychic powers to their collective search for the Books and also helping Constantine stay one step ahead of Steve Trevor and A.R.G.U.S.

Thanks to his long experience of the Speed Force, Max Mercury has been a useful mentor to many more modern speedster Super Heroes.

MERCURY, MAX

DEBUT *National Comics* #5 (Nov. 1940)
BASE Manchester, Alabama
HEIGHT 6ft 1in **WEIGHT** 188 lbs
EYES Blue **HAIR** Gray
POWERS/ABILITIES Super-speed; vibrational frequency shifting permits his body to pass through solid matter.
ALLIES The Flash
ENEMIES Professor Zoom
AFFILIATIONS Freedom Fighters

Max Mercury was imbued with the power of the Speed Force as a member of the US Cavalry in the 19th century, following a massacre of Native Americans. A dying shaman enchanted Max, granting him unlimited super-speed and the ability to shift his molecules and pass through solid objects.

Known over the years as Quicksilver, Windrunner, Whip Whirlwind, and the Zen Master of Speed, Max tried to penetrate the mysteries of the Speed Force many times. Each time he found himself skipping forward in time, with the result that he now finds himself in the 21st century.

Over the years, he has served as a mentor to Barry Allen, Wally West, Johnny Quick, and Bart Allen, lending his experience and knowledge of the Speed Force to their battles against Professor Zoom, Superboy-Prime, and the Rival.

MIDNIGHT

DEBUT *Smash Comics* #18 (Jan. 1941)
REAL NAME Dave Clark
BASE New York City
HEIGHT 6ft **WEIGHT** 190 lbs
EYES Blue **HAIR** Black
POWERS/ABILITIES Expert detective and martial artist; uses a vacuum gun to fire a cable for scaling buildings.
ALLIES Doc Wackey, Gabby, Sniffer Snoop
ENEMIES Morris Carleton
AFFILIATIONS All-Star Squadron

Dave Clark was a popular newsreader for New York's UXAM radio station. When an apartment building collapsed, he helped drag people from the rubble and discovered

that the block had been built by the corrupt Carleton Construction Company. Inspired by the hero of the radio serial *The Man Called Midnight*, he put on a mask and assumed the code name Midnight. He intimidated Carleton's owner into donating funds to those injured in the disaster, and got word out about the shoddy construction of a Carleton dam before it collapsed, saving many lives. When the clock struck 12 that evening, Midnight confronted Carleton and forced him to confess his crimes.

Midnight continued to fight for justice, battling Nazis as part of the All-Star Squadron and the Freedom Fighters.

MERA

DATA

DEBUT *Aquaman* (Vol. 1) #11 (Sep.-Oct. 1963)

BASE Atlantis

HEIGHT 5ft 9in **WEIGHT** 160 lbs

EYES Blue **HAIR** Red

POWERS/ABILITIES Water breathing; telekinetic control over water and "hard water" manipulation; enhanced strength and stamina; highly trained warrior; natural leader.

ALLIES Aquaman, Vulko, Tula, Aqualad

ENEMIES Ocean Master, Dead King, Black Manta, Eel

AFFILIATIONS Justice League

A LOVE SUPREME

After everything they've been through, Aquaman and Mera stand firmly together. Coming from Xebel, Mera also helped to extend Aquaman's influence over the subsea realms beyond the city of Atlantis.

Aquaman's lover and later Queen of Atlantis, Mera, of the Atlantean nation of Xebel, is a powerful telekinetic. She gave it all up to find a new life with Arthur Curry on land, only to be dragged back into the rivalries of her home kingdom.

A native of the aquatic kingdom of Xebel, an ancient Atlantean penal colony, Mera was trained as an assassin and grew up with a deep suspicion of Atlantis. However, when instructed to kill Aquaman, she fell in love with him and fought by his side. When Aquaman left Atlantis to make a life in the surface world, she went with him, but had difficulty adjusting. She got a welcome chance to return to adventuring during Aquaman and the Others' quest to fight Black Manta and retrieve stolen Atlantean artifacts. However, this was only brief respite from the hostility she experienced on land. She returned to the oceans to fight the Dead King when he unleashed freezing

TROUBLED HERITAGE Mera has spent her life reconciling Xebelian hatred for Atlantis with her own personal love for Aquaman.

attacks against the East Coast. After a long relationship, Aquaman proposed to Mera. Betrothed to the king, Mera administered Spindrift Station, an Atlantean Dry Land Embassy on the coast of Massachusetts. It was soon destroyed by Black Manta, just one of the new conflicts between Atlantis and the surface world. The villainous Corum Rath then usurped Arthur's throne. After he was defeated by Aquaman and his allies, Mera was placed as the new Queen of Atlantis, leaving Aquaman free to pursue his life as a Super Hero.

When Mera became pregnant, she became engaged to her advisor Vulko to help unite the kingdom. During a battle with Black Manta, she expended too much of her powers and landed in a coma, however her daughter, Andy, was nevertheless born healthy and happy. Mera soon awoke and, on the day she was to be married, announced a plan to dissolve undersea monarchies altogether.

ELEMENTAL RAGE Not even Black Manta can withstand Mera's powers when she really gives in to her emotions.

ON THE RECORD

Originally the free-spirited queen of an other-dimensional realm, Mera left it all to marry Aquaman. The murder of their son by Black Manta compounded emotional instability she was experiencing due to unknown factors in the Earthly environment. She and her husband experienced long separations in the years that followed.

During *Blackest Night*, Mera was able to fight off the Black Lanterns while she kept her emotions in check, but when her anger spiraled out of control, she was brought into the Red Lantern Corps, and nearly died in battle.

ROYAL FURY Mera has a reputation as the emotional one, but when she is hurt or endangered, Aquaman flashes a temper of his own.

CLASSIC STORIES

Aquaman: Sword of Atlantis

#40-45 (May-Nov. 2006) Mera leads a band of survivors after the destruction of Atlantis by the Spectre. She holds out against growing chaos under the oceans before reuniting with Aquaman against the threat of the Ocean Master.

Aquaman (Vol. 1) #58-60 (Oct.-Nov. 1977; Feb.-Mar. 1978) Black Manta kidnaps Mera's child Aquababy and traps him in a tank designed to suffocate him. Mera embarks on a quest to Xebel to find the device to free him. She succeeds, but returns too late to save her baby.

MERLYN

DEBUT *Justice League of America* (Vol. 1) #94 (Nov. 1971)

REAL NAME Arthur King

HEIGHT 6ft 3in **WEIGHT** 185 lbs **EYES** Blue **HAIR** Black

POWERS/ABILITIES Expert archer and martial artist; lethal trick arrows; cunning and stealthy; Kevlar body armor.

ALLIES Amanda Waller, Suicide Squad, Seven Men of Death, League of Assassins **ENEMIES** Green Arrow, Black Canary, Red Arrow, Manhunter, Justice League, Azrael **AFFILIATIONS** Legion of Doom, Leviathan, Ninth Circle, Secret Society of Super-Villains, the 100, Injustice Gang

As a child, Oliver Queen first became interested in archery after encountering master bowman “Merlyn the Magician”—a phenomenally accurate archer and showman. Years later, the performer challenged Queen—now the new Super Hero Green Arrow—to a duel and publicly humiliated him. Queen had no idea then that Merlyn (Arthur King) had a sideline in assassination, working for Rā's al Ghūl's League of Assassins. As Malcolm Merlyn, the dark archer contributed to the training of Cassandra Cain (Orphan) and Damian Wayne before he left his mother Talia. Merlyn became an independent mercenary targeting Batman, the Justice League, and Black Lightning. Despite failing in these and other Super Hero contracts, Merlyn's reputation grew. He had enough pull to have Suicide Squad chief Amanda Waller arrange his release after being apprehended by the Justice League. Although he is one of the most dangerous men alive, Merlyn is a sharp assessor of the odds. During the other-dimensional invasion of Earth-3's Crime Syndicate of America, he willingly joined the Secret Society of Super-Villains rather than resist like the Central City's Rogues did.

PRESCIENT WARNING
Tommy Merlyn argued with Oliver Queen over how to deal with the terrorists who had crashed their party. This would be the last time they saw each other as friends.

After *Rebirth*, Merlyn returned to wetwork, signing on to the Ninth Circle as they sought to destroy Oliver Queen by framing Green Arrow for murder with his own arrows. The hero believed the culprit was his boyhood friend, Tommy Merlyn, and was stunned to learn his true nemesis was Tommy's father.

ON THE RECORD

Merlyn's origin story begins with an archery duel between him and Green Arrow—which Merlyn wins. Their rivalry thus established, they battled many times over the years, notably at Green Arrow's wedding to Black Canary. Merlyn's less than savory alliances have included a deal with the demon Neron and with the League of Assassins, which witnessed the resurrection of Rā's al Ghūl.

BLACK OPS

As a mercenary, Merlyn has always had a reputation for peerless archery skills, and the ability to surprise any target—even getting the drop on The Flash.

METAL MEN

DEBUT *Showcase* #37 (Mar.-Apr. 1962)

BASE S.T.A.R. Labs Campsite, Challenger Mountain, Denver, Colorado; Mount Magnus Chateau **MEMBERS/POWERS** **Gold:** Analytical intelligence, malleable form; **Lead:** Strength, radiation, and energy shielding; **Iron:** Strength, durability, malleable form; **Mercury:** Liquid metal form; **Platinum:** Malleable form. **ALLIES** Doctor Magnus, Cyborg **ENEMIES** Chemo, X-1, Egg-Fu, Grid, Crime Syndicate of America **AFFILIATIONS** Justice League

Temperamental robotics genius Dr. William Magnus invented the Responsometer—an Artificial Intelligence unit able to shape metals around itself. Magnus used it to make the “Metal Men.” These were sentient robots formed from different metals: Gold, Tin, Platinum, Iron, Lead, and Mercury. Originally intended as all-purpose troubleshooters, Magnus' magnificent creations have been remade many times, generally for his own scientific and altruistic purposes. However, during one of Earth's frequent reality alterations, a team of autonomous robots and assassins capable of operating in hazardous environments were created as part of a military project.

The Metal Men have battled threats and fought beside Super Heroes such as when Earth-3's Crime Syndicate of America invaded. Magnus, however, builds too well. His progeny always manifest unshakable moral and ethical convictions and they tend to rebel against authority and humans with bad intentions. They are invaluable heroic assets with strength, loyalty, and the potential to combine themselves into different alloys.

The robots subsequently faced a pool of Nth Metal from the Dark Multiverse that infiltrated their HQ, manifesting as an Nth Metal Man and offering them full consciousness and actual souls. Tempted beyond endurance, the Metal Men still ignored their programming while remaining true to their consciences.

HEAVY METAL
The Metal Men allied (and alloyed) against all threats.

ON THE RECORD

Over the years, Responsometers have been used to create dangerous alternative Metal Men. Magnus' brother David once used a device stolen from the villain T. O. Morrow to create the Death Metal Men: Uranium, Strontium, Thorium, Radium, Lithium, Polonium, and Fermium.

Chang Tzu once tried to force Magnus to build a Plutonium Man, but Magnus outwitted him and rebuilt the originals.

ROGUE ELEMENTS

When Responsometers fell into the wrong hands, the variant Metal Men thus created were deadly opponents to the original team, as well as to Doctor Magnus.

DATA

DEBUT *Action Comics* (Vol. 1) #252 (May 1959)

REAL NAME John Corben

HEIGHT 6ft 5in **WEIGHT** 600 lbs **EYES** Green **HAIR** Brown (formerly)

POWERS/ABILITIES Massively powerful, mechanical armored body equipped with life-support systems and an arsenal of rockets, guns, and other weapons; can emit Kryptonite radiation from chest cavity.

ALLIES Cyborg Superman

ENEMIES Superman, Lois Lane, Steel, General Zod

AFFILIATIONS Secret Society of Super-Villains, Superman Revenge Squad

STREAMLINED

Now armed with a Kryptonite heart and a more streamlined body, Metallo quickly challenged Superman to a rematch on the streets of Metropolis.

as well as anger, this streamlined Metallo lost to Superman in what would be far from their last battle. In the many bouts that followed, Corben kept losing more humanity, becoming an almost fully robotic being.

After he was rebuilt, he was recruited into the Superman Revenge Squad by Cyborg Superman. Metallo set up shop in Batman's former moon Batcave and teamed with fellow Super-Villains Blüdhaven, Mongul, the Eradicator, and General Zod. However, Zod had his own agenda and he soon turned on the group, swatting Metallo like a fly. The villains were eventually overcome and defeated, and Metallo was sent to an A.R.G.U.S. facility. Dismantled and in great pain, he was visited by Superman's father, Jor-El, who ripped out his Kryptonite heart, seemingly killing him. However, Metallo has survived worse over the years, so the probability that he will return is high.

ON THE RECORD

Pre-Flashpoint, there were different iterations of both Corben and Metallo. The original Silver-Age Corben was an unscrupulous journalist with a grudge against Superman. His brain was placed in a Kryptonite-powered body after an accident. However, when he confronted the Man of Steel, Corben discovered the Kryptonite was fake and, unable to recharge, he died of a heart attack.

A reimagined account in the late 1980s depicted Corben as a conman whose brain was transplanted into a metal body following a traffic accident. This Corben made a deal with the demon Neron and was turned into a demonic metal juggernaut.

Metallo is made up of two vital components—advanced technology and the depraved human mind of John Corben. With these linked together by a cybernetic interface and powered by Kryptonite, Metallo has become a living weapon, who only seems happy when targeting Metropolis' true Man of Steel, Superman.

Sergeant John Corben was a career soldier working under General Sam Lane, Lois Lane's father. Corben had a mean streak, so it made him the perfect choice to try out Lex Luthor's experimental Metallo armor—a project Luthor and General Lane were working on together. Corben volunteered for the job and soon faced Superman while wearing a bulky armored mech. Metallo's suit was destroyed in the skirmish, and Superman narrowly avoided death from Kryptonite exposure. Metallo came off much worse, and only survived because Luthor implanted an artificial Kryptonite heart in his chest.

When Metallo next faced the Man of Steel, it was as an enhanced cyborg. Powered by Kryptonite

RADIOACTIVE HEART

In all versions, Kryptonite is the source of Metallo's power and of Superman's greatest weakness.

GHOST IN THE MACHINE
Defeated by Superman on multiple occasions, Metallo has now become far more machine than man.

METALLO RETURNS
Lois Lane used her Brainiac-given powers to revive John Corben/Metallo, to help defend their city, Metropolis.

CLASSIC STORIES

Action Comics (Vol. 1) #252 (May 1959) In his very first appearance, John Corben becomes Metallo and traps Superman—but dies after mistaking a model of Kryptonite for the real thing.

Superman: Secret Origin #1-6 (Nov. 2009-Oct. 2010)

In this gripping new Superman origin story, Lex Luthor turns the soldier John Corben into a living weapon to use against the Kryptonian.

Action Comics (Vol. 2) #23.4 (Nov. 2013) After General Lane tries to eliminate Metallo, the juggernaut seeks revenge and has an epic battle with a former friend, transformed into Metal-2.0.

MIDNIGHTER

DATA

DEBUT *Stormwatch* (Vol. 2) #4 (Feb. 1998)

BASE Opal City

HEIGHT 6ft 5in **WEIGHT** 285 lbs

EYES Brown **HAIR** Brown

POWERS/ABILITIES Extensive cybernetic components grant Midnighter enhanced speed, strength, and durability; a Neural-Inductive Combat Simulator in his brain allows him to anticipate any opponent's moves; access to doorway portals that can open in any location.

ALLIES Apollo, Zealot, Nightwing, the Gardener, Batman Family

ENEMIES Dr. Henry Bendix, Prometheus, Mawzir, Neron

AFFILIATIONS Stormwatch, the God Garden

POWER OF PRECOGNITION Midnighter's uncanny ability to predict an opponent's moves in advance gives him a deadly edge in combat.

Midnighter is a dark hero who uses his violent impulses to fight for justice. After receiving cybernetic enhancements, he began his career as a vigilante, before being recruited into Stormwatch—a team dedicated to protecting Earth from alien incursions. He formed a close partnership with fellow Stormwatch member Apollo, and they became lovers as well as teammates.

Midnighter's past is a clouded jumble. Unaware of even his own real name, he was kidnapped by the Gardener and Dr. Henry Bendix. His memory was erased, he was experimented on, and he was made into the human equivalent of a fighting machine, one with a computer brain that tells him exactly how to defeat any opponent he faces. After a time living on the street, he turned his life around and decided to never become a victim again. He became Midnighter, an ultraviolent vigilante.

Midnighter joined Stormwatch for a time, a centuries-old organization devoted to defending the Earth. However, Midnighter was inexperienced both in the world and in relationships. He left Stormwatch and broke up with Apollo, believing the hero deserved better.

Attempting life on the dating scene, Midnighter used hi-tech portal door technology to live in any city he liked. When the mysterious Gardener's technology was stolen, Midnighter investigated, and soon found himself fighting the very man he had been dating—the Super-Villain Prometheus.

After getting back together with Apollo, Midnighter was trapped by Dr. Henry Bendix while Apollo was killed by the gun-toting creature called the Mawzir. Midnighter went to literal hell and back for Apollo, and together, they bested the demon Neron who was attempting to take Apollo's soul. Midnighter and Apollo returned to the land of the living, where the two continued their partnership, both romantic and as Super Heroes.

ON THE RECORD

Midnighter was originally a covert black ops Stormwatch agent. When the team was destroyed, he was recruited into the Authority, a group that fought relentlessly for the greater good—even if it brought them into conflict with multinational corporations and the United States Government.

In this incarnation, Midnighter and his teammate Apollo also married and then adopted fellow Authority member Jenny Sparks. Following the terrible devastation of Earth during the *Number of the Beast* event, Midnighter and the reconvened Authority set out to restore order to the planet.

A FORCE FOR GOOD? Midnighter embodied the ruthless zeal of the Authority team. He and his comrades proved willing to defy the world in their pursuit of justice.

CLASSIC STORIES

***Stormwatch* (Vol. 3) #15-16**

(Feb.-Mar. 2013) Accused of betraying Stormwatch, Midnighter is forced to go on the run in Antarctica—pursued by his enraged lover, Apollo.

***Stormwatch* (Vol. 3) #23-24**

(Oct.-Dec. 2013) Midnighter suffers a series of traumatic flashbacks to the alien experiments he was subjected to as a child. They give insight into the events that helped create this tormented hero.

***Midnighter* (Vol. 2) #1 (Aug. 2015)**

In a shocking turn of events, Midnighter leaves Stormwatch and Apollo behind to go and work for the Gardener, proprietress of the orbital God Garden.

DOOR FOR ONE Just by saying the word “door,” Midnighter can create a portal to any location he desires.

VIOLENT TENDENCIES Midnighter is a self-confessed psychopath, but he uses his gift for violence against the guilty rather than the innocent.

PARTNERS IN CRIME FIGHTING In Stormwatch, Midnighter and Apollo became teammates and eventually lovers.

METAMORPHO

DEBUT *The Brave and the Bold* #57 (Dec. 1964–Jan. 1965)

REAL NAME Rex Mason

HEIGHT 6ft 1in **WEIGHT** 200 lbs **EYES** Black **HAIR** None

POWERS/ABILITIES Can transform his body (or parts of it) into any element contained in the human body, potentially giving him incredible strength, flexibility, and durability.

ALLIES Michael Holt, Element Dog, Plastic Man, Phantom Girl, Batman, Sapphire Stagg, Algon

ENEMIES Java (Doc Dread), Sebastian Stagg, Hyperclan, Masters of Disaster, O.M.A.C.

AFFILIATIONS Outsiders, Justice League Europe

Rex Mason was a rugged adventurer who made the near-fatal mistake of falling in love with his employer's daughter. Simon Stagg did not want his beloved Sapphire involved with a mercenary, so he plotted Mason's demise. Stagg sent him to the pyramid of Ahk-Ton in search of the Orb of Ra, and got a henchman to steal the Orb and leave Rex in the pyramid to die. Rex was trapped and exposed to radiation from a meteor that had been kept there for years. The radiation altered his physiology, turning him into Metamorpho, the Element Man, a being who could change shape or transform into any element found in human physiology.

Rex escaped and set off in search of a cure. In Markovia, he rescued Bruce Wayne's employee, Lucius Fox, and Batman made him a founding member of his Outsiders team. As Metamorpho, Rex was a core member for decades and also served on various Justice League teams. He sacrificed his life to save his teammates from the Hyperclan, but was resurrected thanks to the intervention of Sapphire. This origin has recently been called into question. Reports that Mason was part of Helga Jace's US-government sponsored, metahuman-making "Superman Project" cannot at this time be disproved.

Following *Rebirth*, with Doctor Manhattan's time-tampering reversed, Mason returned to Stagg and was subjected to an experiment that was slowly turning him into living Nth Metal. Rescued by Mister Terrific, Mason joined the dimension-hopping Terrifics.

TRANSMUTATION

The energies of the mysterious meteor changed Rex Mason into a bizarre being with powers of elemental-control.

HANDYMAN

Rex Mason's flexible physiology enabled him to come up with the right tool to sort out almost any problem.

TEAM PLAYER

In the Outsiders, Rex Mason found a team that valued his powers and accepted his bizarre appearance. He served in various incarnations of the group.

METRON

DEBUT *New Gods* (Vol. 1) #1 (Feb.–Mar. 1971)

CURRENT VERSION *Green Lantern/New Gods: Godhead* #1 (Dec. 2014)

HEIGHT 6ft 1in **WEIGHT** 190 lbs **EYES** Blue **HAIR** Black

POWERS/ABILITIES His personal powers are unknown, though he has a talent for escapology; Mobius Chair provides pan-dimensional travel, the ability to access any knowledge in the universe, and force-field protection.

ALLIES Highfather, Orion

ENEMIES Justice League, Anti-Monitor

The origins of Metron are unknown, but at some point in history the New God received an amazing chair from enigmatic presence Mobius. It allowed Metron access to time, space, dimensions, and all the knowledge in the universe—except for the mysterious benefactor's identity. On his incredible journeys, Metron witnessed multiple crises destroying and remaking numerous realities.

Metron feared that a clash between Darkseid and the Anti-Monitor would cause annihilation. To avert this, he became advisor to Darkseid's enemy, Highfather of New Genesis, seeking to eliminate Darkseid before the anticipated confrontation. Metron even engineered conflict between New Genesis and the Lantern Corps in hope that the Lanterns' rings might defeat the evil overlord. Metron attempted to dissuade the Justice League from battling the Anti-Monitor on Earth, but was pulled from the Mobius Chair by Wonder Woman's lasso, and Batman briefly commandeered it. Metron, along with the Chair's new occupant, the Owlman, was then destroyed by the powerful entity, Dr. Manhattan.

Following Manhattan's fall, the Mobius Chair was taken by a bereaved Wally West. He used it to traverse infinite realities searching for his wife and children, who had been deleted in a previous multiversal reordering.

ON THE RECORD

The original Metron was also a cool and detached seeker of knowledge, but he occasionally served as a teacher and mentor to Orion and Lightray, as well as advising young Scott Free. When the Source began eliminating the New Gods, Metron looked on impartially—until his former student Mister Miracle was slain. At that point, Metron demanded to be destroyed as well, and the Source slew him.

POWER BEHIND THE THRONE

Metron initially served as an advisor to Highfather, sharing his cosmic knowledge with the New Gods of New Genesis.

HAIR Black (Mime), blonde (Marionette)

POWERS/ABILITIES Hand-to-hand combat, acrobatics, martial arts

ALLIES The Joker

ENEMIES Rorschach (Walter Kovacs), Doctor Manhattan, Comedian

AFFILIATIONS None

Mime and Marionette bonded as young children, when they lost parents in tragic circumstances. The pair stuck together, fighting each other's corner against bullies

and corrupt cops. Mime's early trauma had caused him to stop speaking, but Marionette knew him well enough to be able to interpret his every gesture and facial expression.

As they grew, their close friendship blossomed into a deep love, and the couple used their advanced fighting skills to forge a violent life of crime. They had a child, Clark, who was taken away at birth and later placed into the care of the former Nite Owl and Silk Spectre by Doctor Manhattan. Marionette would later become pregnant with a daughter.

REAL NAME Jay Young

BASE Los Angeles, California

EYES Blue

HAIR Blond

POWERS/ABILITIES Can release a powerful "seizure soul" from his body—and can sometimes even control it.

ALLIES Justice League Dark

ENEMIES Enchantress

Jay Young, alias Mindwarp, was a gleefully psychotic nihilist with the ability to release an astral "seizure soul" from his body. Madame Xanadu asked Shade

the Changing Man to recruit Jay into Justice League Dark to help fight the Enchantress, but Mindwarp rejected Shade's offer. However, when the League did face the Enchantress, Jay turned up to help, claiming that her magical influence had made his seizure soul unstable. Mindwarp's power helped to unite the Enchantress with her human host, June Moone, ending her threat.

Mindwarp was subsequently captured by forces loyal to the Crime Syndicate. He was subjected to agonizing mystical experimentation, and then destroyed while being used to power a test-firing of the Syndicate's Thaumaton device.

DEBUT *Birds of Prey* (Vol. 1) #96 (Sep. 2006)

REAL NAME Charlotte Gage-Radcliffe

EYES Blue

HAIR Red

POWERS/ABILITIES Possesses the ability to "bounce" (teleport) from place to place.

ENEMIES Black Alice

Growing up, young Charlotte Gage-Radcliffe idolized Super Heroes, especially Batgirl. Charlotte even possessed a superpower—the

ability to "bounce" (or teleport). When her family perished in a fire, the orphaned Charlotte decided to become the "new Batgirl" by donning a homemade costume and fighting street crime. Barbara Gordon, alias the Birds of Prey's Oracle, tried to convince her to give up her new career, but Charlotte instead adopted a new identity as Misfit. She began tagging along on missions with the Birds of Prey and was gradually accepted by the team, though her impulsive nature caused problems.

Misfit later applied to join the Teen Titans, but was rejected. After Bruce Wayne was killed, she helped keep order in Gotham City working as part of Oracle's crime fighting Network, but subsequently went to live with a foster family.

POWERS/ABILITIES Matter transmutation.

ENEMIES Red Bee, android Miss America

AFFILIATIONS All-Star Squadron, Freedom Fighters, Justice Society of America

During World War II, reporter Joan Dale was knocked unconscious while visiting the Statue of Liberty and taken to the top-secret Project M facility. Here, under

the direction of Professor Mazursky, she was subjected to a process that granted her matter-transmutation powers. Unaware of what had been done to her, Joan experienced a vision in which the Statue of Liberty told her that she had been given special powers to use in the defense of her nation. On the ferry back to New York, she turned a pair of pro-Nazi thugs into birds. Adopting the code name Miss America, Joan joined the wartime Freedom Fighters team.

Joan later retired and married Admiral Derek Trevor, but after he died she resumed her heroic career, joining Uncle Sam's new Freedom Fighters. She was presumed killed after exploding in space, but was reborn in a younger body as Miss Cosmos.

Lisa used her astral-projection powers to allow Sam to emerge from the Mirror World, but this caused her to lose her own astral form.

As Captain Cold grew ever more domineering Lisa left, breaking up with Scudder. However, when her brother accepted a destabilizing power boost from Lex Luthor—agent of recently-liberated Multiversal Matron Perpetua—Mirror Master joined rebel Rogues Weather Wizard and Heatwave in helping Lisa and The Flash confront "King Cold." Trapped in the Mirror World, a realm that lies within all reflective surfaces, he can see out of any mirror and take people into this realm, where he has complete control.

Criminal Sam Scudder uses the codename Mirror Master, wielding devices allowing him power over reflective surfaces. He was an early member of Central City's Rogues—villains employing themed hi-tech weapons in their crimes. The group was led by Captain Cold, whose sister, Lisa, became Sam's girlfriend.

Despite their technology, the Rogues' heists were frequently stopped by The Flash. However, Dr. Darwin Elias offered Captain Cold access to a Genome Recoder to transfer the powers of their weapons into the Rogues' DNA, allowing them to combat the speedster on equal

ON THE RECORD

The original Sam Scudder learned to exploit the amazing properties of mirrors while in prison. As Mirror Master, he escaped going on to become a member of the Rogues and Secret Society of Super-Villains. Scudder was killed during *Crisis on Infinite Earths*, but the Mirror Master name was "borrowed" by Captain Boomerang and then Evan McCulloch. Scudder later returned in undead form during the *Blackest Night* event.

MIRROR IMAGE Sam Scudder trapped Barry Allen within reflective prisons, but when Wally West leaped into action as Kid Flash, the Mirror Master thought he was seeing double!

ALLIES Gsptlnz (Mrs. Nyxly) **ENEMIES** Lord Vyndktxv, Mister Oz, Superman, Bat-Mite

Mr. Mxyzptlk comes from the 5th dimension and has pestered Superman in every reality. When Clark Kent's landlady, Mrs. Nyxly, first mentioned her husband, she referred to him as stage conjurer Mystic Mr. Triple X, adding that a rival magician's interference with one of his tricks had left him in a coma for seven years. In reality, Mrs. Nyxly was a 5th-dimensional princess named Gsptlnz. Mxyzptlk had become her royal father's sorcerer, edging out former court magician, Lord Vyndktxv. Vyndktxv swore revenge, but killed Gsptlnz's father by mistake. Fearing for her life, Gsptlnz fled to Earth, leaving her beloved Mr. Mxyzptlk in the 5th dimension. His frequent visits to Earth were him having fun while searching for her.

Post *Rebirth*, the imp was imprisoned for millennia by Mister Oz, but escaped and hid as a perfect duplicate of Clark Kent. When trapped by the Justice League, Mxyzptlk revealed the nature of 6th-dimensional reality and the threat of Source Wall escapee Perpetua. By battling fellow imp Bat-Mite, Mxyzptlk preserved his 3rd-dimensional playground from eradication.

ON THE RECORD

Mr. Mxyzptlk has plagued Superman as far back as the Golden Age of Comics, though his name was originally spelled Mxyzptlk. A classic member of Superman's Rogues Gallery, Mxy originally faced Superman as a cartoony bald man in a purple suit who would return to harass the Man of Steel every 90 days, only leaving Superman's reality when he was tricked into saying his own name backwards.

By *Superman* (Vol. 1) #131 (Aug. 1959), the mischievous Mr. Mxyzptlk's name gained its modern spelling, and he was sporting his trademark orange suit and white hair.

MEAN MXY
 In a story set before the reality-altering *Crisis on Infinite Earths*, Mxy showed his true colors when he transformed from prankster to murderous villain in a possible future for Superman.

MISTER E

DEBUT *Secrets of Haunted House* #31 (Dec. 1980)
BASE The Bernese Alps, Switzerland
HEIGHT 6ft 3in **WEIGHT** 190 lbs
EYES White **HAIR** White
POWERS/ABILITIES Very powerful magician, able to teleport and rip a person's soul from their body; cane channels dark magic.
ENEMIES John Constantine

An enemy of Justice League Dark member John Constantine, the man known as Mister E was a good magician corrupted by the temptations of magic. A member of the Cult

of the Cold Flame—a group of sorcerers that included the deceased Zatara and Sargon, as well as the evil Tannarak—Mister E was originally regarded as a hero.

While his past is shrouded in mystery, it is commonly believed that Mister E went insane after he cast a magic spell that liquefied his eyeballs. He became instantly blind, and much more susceptible to the darker side of the magic world. As a part of the Cold Flame, he united with other mystics and began to eliminate those magicians not loyal to their cause. This forced him into a confrontation with Constantine, who ran him through with the mystical Moonblade.

MISTER MIND

DEBUT *Captain Marvel Adventures* #22 (Mar. 1943)
HEIGHT 3in **WEIGHT** 5 oz
EYES Black **HAIR** None
POWERS/ABILITIES Extremely intelligent Venusian worm possessing knowledge of Earth; telepathic; telekinetic; able to alter the fabric of time and space during metamorphosis.
ALLIES Sivana
ENEMIES Shazam
AFFILIATIONS Monster Society of Evil, Black Adam

Mister Mind reared his head in the *Flashpoint* reality when Dr. Sivana was seeking entrance to the Rock of Eternity. Hoping to gain superpowers, he discovered a bottle containing a talking alien worm calling itself Mister Mind. Together, they began to plot against Shazam and his allies.

In the *Rebirth* era, Mind and Sivana conspired to exploit the Seven Magic Lands, release the Seven Deadly Sins on Earth and coerce Black Adam into leading a Monster Society of Evil against humanity. Sivana had no conception of the worm's agenda: seizing control of all magic. Thankfully Mister Mind underestimated the guts and ingenuity of Billy Batson and again failed in his sinister scheme, even after possessing Billy's long-lost dad to infiltrate the Shazam Family.

MISTER NOBODY

DEBUT *Doom Patrol* (Vol. 1) #86 (Mar. 1964)
REAL NAME Eric Morden
HEIGHT 5ft 8in **EYES** Red **HAIR** None
POWERS/ABILITIES Exists in a pseudo-dimensional state; possesses an abstract body; can psychically induce state of anarchy/insanity in other human beings.
ALLIES Dr. Bruckner, Sleepwalk, Frenzy, The Fog **ENEMIES** Doom Patrol, Brotherhood of Evil
AFFILIATIONS Brotherhood of Dada

After joining the Brotherhood of Evil, Eric Morden's dream of being a Super-Villain soon went awry. Fleeing to Paraguay to escape his Brotherhood "allies" he met fugitive Nazi war criminal Dr. Bruckner, and agreed to visit his "white room," to be born anew. Morden was driven insane, and, augmented by Bruckner's serums, transformed into abstract villain Mister Nobody. He gathered super-powered outcasts as the Brotherhood of Dada, and they fought the Doom Patrol in Paris, but were defeated. Nobody later targeted young wizard Lucius Reynolds, seeking to enlist him in his newest venture—erasing all that exists—with his new Brotherhood of Nada team. Nobody was infatuated with the concept of nothingness, but his associates rebelled and the plot failed.

MISTER MIRACLE

DATA

DEBUT *Mister Miracle* (Vol. 1) #1 (Mar.-Apr. 1971)

REAL NAME Scott Free

BASE New Genesis

HEIGHT 6ft **WEIGHT** 185 lbs

EYES Brown **HAIR** Brown

POWERS/ABILITIES Superhuman mental and physical attributes of the New Gods; master escapist; access to advanced New God technology, including Aero-Discs (enable flight and can be used as weapons) and a sentient Mother Box (provides healing, data, and generates Boom Tubes for transportation).

ALLIES Shilo Norman, Big Barda, the Justice League, Himon

ENEMIES Darkseid, Kalibak, Steppenwolf, Kanto, Granny Goodness

AFFILIATIONS New Gods of New Genesis

Born a New God in utopian New Genesis, Scott was raised as a slave on the grim planet of Apokolips. However, he refused to let his spirit be broken, escaping to become Mister Miracle—a symbol of freedom and sworn enemy of Apokolips' evil ruler, Darkseid.

Scott is the son of Highfather, ruler of the New God world of New Genesis. When Scott was seven years old, Highfather and the tyrannical Darkseid of Apokolips exchanged heirs as part of a peace agreement, and Scott was imprisoned in the Apokolips slave pits. After three years of torture, Scott decided to escape his cell. It took him a year to become adept at lock picking, exploring Apokolips, and returning to his cell each night, while his slave masters were none the wiser.

Eventually, Scott did not return to his cell. He escaped and became the rebellious hero Mister Miracle. He joined the anti-Darkseid underground, falling in love with Big Barda, a renegade member of Darkseid's Female Furies. Mister Miracle also met Himon, a fellow New Genesis native who was trying to start a rebellion on Apokolips. Himon showed Scott how to build his own living computer in the form of a Mother Box.

After Barda abandoned the evil Female Furies, she and Mister Miracle were married. They enjoyed many adventures before joining the Justice League in the so-called "Darkseid War" that saw Darkseid die and be reborn as an infant. Big Barda had rallied the Female Furies to her side, but only by agreeing to leave Scott and Earth behind after the war was won. However, the pair have been seen back together during recent large-scale events.

ESCAPING GRAVITY

His Aero-Discs allow Scott to take to the skies, providing essential mobility for this freedom fighter.

ESCAPE OF THE MIND

Parallel Universe or Purgatory? Mr. Miracle escaped the real world in an acclaimed Black Label series that left questions about the very nature of his reality itself.

THE FUGITIVE

He may have escaped from Apokolips, but Mister Miracle soon discovered that Darkseid and his evil minions would stop at nothing to get him back.

BREAK A LEG

On Earth, Mister Miracle went into showbiz, wowing the crowds with terrifying acts of escape-artistry.

CLASSIC STORIES

***Mister Miracle* (Vol. 1) #9 (Jul.-Aug. 1972)** Tells the thrilling story of how Scott Free meets Himon of New Genesis—and escapes from Apokolips and Darkseid.

***Seven Soldiers: Mister Miracle* #1-4 (Nov. 2005-May 2006)** Shilo Norman escapes death after taking on the identity of Mister Miracle from Scott Free.

***Earth 2: World's End* #9-11 (Feb. 2015)** Mister Miracle faces betrayal and defeat when he ventures into the heart of Apokolips to confront Darkseid.

MISTER TERRIFIC

DEBUT *Sensation Comics* (Vol. 1) #1 (Jan. 1942) (as Terry Sloane); *Spectre* (Vol. 3) #54 (Jun. 1997) (as Michael Holt)

REAL NAME Michael Holt

BASE Terrifictech Modern Community Association, Gateway City

HEIGHT 6ft 2in **WEIGHT** 215 lbs **EYES** Brown **HAIR** Black

POWERS/ABILITIES Olympic gold medalist decathlete; genius and inventor; hovering T-Spheres can detonate, project holograms, gather data, and allow flight; T-Suit provides protection; T-Mask guards against electronic detection

ALLIES Power Girl, T-Council

ENEMIES Sebastian Stagg, Doc Dread (Java), The Dreadfuls, Tomorrow Thief, Digitus

AFFILIATIONS The Terrifics, Holt Industries, Justice Society

Michael Holt is one of the smartest people on Earth, with multiple doctorates to his name, his own company, and a vast fortune. However, his life changed forever when his beloved wife Paula died. Devastated, Holt was considering suicide when a mysterious figure claiming to be his son from an alternate reality informed him of his duty to change the world.

Michael set up a non-profit dedicated to advancing science, and began his Super Hero career as Mister Terrific. Operating out of his ninth-dimensional T-Sanctuary and wielding his multifunction T-Spheres, he fought numerous villains. In a quantum tunneling experiment, he was sucked into a portal and landed in the alternate reality of Earth-2. Mister Terrific joined the Justice Society to battle Darkseid but Earth-2 was destroyed by the forces of Apokolips, and Holt escaped back to his own world.

In recent times he began investigating the exotic metals of the Dark Multiverse and was irresistibly bonded to Plastic Man, Metamorpho, and Phantom Girl. As The Terrifics, they roamed the Multiverse until discovering a way to separate their conjoined existences, and after succeeding, stayed together to have fun and do good.

Overachiever Holt has continued inventing, convened supergenius thinktank the T-Council, and established Terrifictech Modern Community Association in Gateway City.

ON THE RECORD

The pre-Flashpoint Michael Holt lost his wife in an accident and was visited by the Spectre, who told him about the Golden Age Mister Terrific (Terry Sloane). This inspired Holt to become a Super Hero and continue the Mister Terrific legacy. He became the chairman of the Justice Society of America and developed a friendly rivalry with Batman. In an ironic twist, the post-Flashpoint Michael Holt was captured by Earth-2's Mister Terrific, Terry Sloan, when he was stranded in that reality.

OLD SCHOOL

The original Mister Terrific, Terry Sloane, demonstrated how crime fighting was done back in the Golden Age.

MISTER ZSASZ

DEBUT *Shadow of the Bat* #1 (Jun. 1992)

NAME Victor Zsasz **BASE** Gotham City

HEIGHT 5ft 8in **WEIGHT** 150 lbs

EYES Brown **HAIR** Brown

POWERS/ABILITIES High intelligence; great physical strength and resilience; psychotically vicious and unpredictable, making him a deadly opponent in hand-to-hand combat.

ALLIES Emperor Penguin, The Riddler

ENEMIES Batman, The Signal, The Penguin, The Joker

AFFILIATIONS Arkham Asylum

Mister Zsasz is one of Gotham City's most ruthless serial killers. Zsasz's descent into madness began after his parents died. He gambled away their fortune at The Penguin's Iceberg Casino, and when the money ran out, The Penguin suggested he should go and kill himself. As Zsasz was about to do just that, he was attacked by a knife-wielding madman. Zsasz dispatched his assailant and experienced an epiphany: life was meaningless, but killing made everything comprehensible. He embarked on a murder spree, slaying hundreds and recording each kill with a cut on his body.

Captured by Batman, Zsasz was sent to Arkham Asylum, but frequently escaped. He was dosed with a fear-inhibiting drug by Two-Face, battled Batgirl in the Narrows, was briefly transformed into a Man-Bat by Emperor Penguin, and joined The Riddler's gang in the War of Jokes and Riddles. When the Arkham War erupted, Zsasz joined the asylum inmates battling against Blackgate Penitentiary. He was suspected of a series of gruesome murders at the new Arkham Manor asylum, but had actually been imprisoned and tortured by the real perpetrator:

The Joker. During his most recent escape, he was tricked into doing a greedy designer's killing for her, but was trapped by The Signal before he could suitably punish his manipulator.

ON THE RECORD

In his pre-Flashpoint debut, Zsasz was a patient at Arkham Asylum who used a secret passage to escape by night and continue his murder spree. This forced Batman to enter the asylum undercover as an inmate in order to track him down. Zsasz was a member of the Secret Society of Super-Villains, and later joined the Black Mask's gang, setting up a horrific underground fighting club where children were forced to fight to the death.

DEADLY OBSESSION

When Alfred survived an attack by Zsasz, the serial killer became obsessed with finishing off Bruce Wayne's manservant, until he was ultimately defeated by Batman.

MIZOGUCHI, MAPS

DEBUT *Gotham Academy* (Vol. 1) #1 (Oct. 2014)
REAL NAME Mia Mizoguchi
BASE Gotham City
HEIGHT 4ft 6in
EYES Brown **HAIR** Brown
POWERS/ABILITIES Brilliant intellect and problem-solving ability; obsessive compulsion with ferreting out secrets; accomplished artist, skilled designer, and cartographer.
ENEMIES Headmaster Hammer, Eric Jorgensen, Heathcliff, Lucy

Mia "Maps" Mizoguchi loves solving puzzles. On starting at the prestigious, spooky-looking Gotham Academy, she soon stumbled upon a genuine mystery featuring ghost sightings and strange symbols. There was even a black-magic cult and a vampire-like young man-bat hanging around the school.

Another tantalizing enigma was her new best friend—and her brother's ex-girlfriend—Olive Silverlock. She shared Maps' hunger for answers and didn't mock her habit of drawing maps to help sort out problems.

With mean-girl Pomeline Fritch, Maps and Olive rooted out a monster with hidden links to Arkham Asylum. They haven't yet determined Batman's connection to the school but it's high on the agenda of their new Gotham Detective Club.

MOCKINGBIRD

DEBUT *Secret Six* (Vol. 1) #1 (Apr.–May 1968)
REAL NAMES Edward Nygma, Lex Luthor, Amanda Waller, Carlo di Rienzi, August Durant
POWERS/ABILITIES Fierce intellect; extreme duplicity; ruthless drive.
AFFILIATIONS Secret Six, Project Mockingbird

Mockingbird is the designation used by a series of master manipulators. Each of these has at various times controlled—through blackmail and subterfuge—

teams of operatives codenamed the Secret Six. The first Mockingbird was August Durant. He covertly provided information and equipment necessary for the Secret Six to remove many global threats and "untouchable" criminals.

The latest Mockingbird was Edward Nygma, the infamous Riddler. For a year, he held captive and tortured six superhuman outcasts before allowing them to escape. He believed that one of them had purloined a gem he keenly wanted to woo another man's wife. None of his dupes knew their tormentor's identity or that their liberty and new undercover lives were facets of his elaborate scheme to find the culprit and retrieve his prize.

MONARCH

DEBUT *Armageddon 2001* (Vol. 1) #1 (May 1991)
REAL NAME Hank Hall
BASE Mobile
HEIGHT 6ft 1in **WEIGHT** 197 lbs
EYES Red **HAIR** Brown
POWERS/ABILITIES Advanced technologies and sophisticated warsuit provide superhuman strength and durability, energy-projection, teleportation, timestream manipulation, and travel between parallel universes.
ENEMIES Waverider, Linear Men, Captain Atom

Monarch is a living paradox, created by the unchecked use of time travel. An alternate Earth's ultimate tyrant, he was originally Hank Hall,

the hero Hawk, driven mad by the death of his partner Dove. With stolen technology, Hall carved out an empire as Monarch. His rule was threatened by time-traveling rebel Waverider, who visited the time of Monarch's creation to end his domination before it began. The attempt left Hall/Monarch lost in time: locked in combat with Captain Atom. During the battle, Hall emerged as the choral chaos-bringer Extant, while Atom became locked inside Hall's warsuit as an even more diabolical Monarch.

Even after Atom escaped the suit, he was unsure whether another Monarch might be lurking in some fold of time/space to begin anew his campaign of terror.

MONSIEUR MALLAH

DEBUT *Doom Patrol* (Vol. 1) #86 (Mar. 1964)
HEIGHT 6ft 3in **WEIGHT** 345 lbs
EYES Brown **HAIR** Brown
POWERS/ABILITIES Super-genius intellect; enhanced strength, speed, and reflexes; altered vocal cords enable speech; skilled engineer.
ALLIES The Brain **ENEMIES** Doom Patrol, Teen Titans, Gorilla Grodd
AFFILIATIONS Brotherhood of Evil

Monsieur Mallah is an African gorilla boosted by medical treatments carried out by an unknown French scientist who was later murdered. The artificially evolved great ape saved his

creator by transplanting the scientist's brain into a life-support system named the Brain. Mallah acted as the Brain's hands, enhancing its cerebral support unit and creating a true Master of Evil. Together they built an international crime organization, clashing with numerous Super Hero groups, most especially Niles Caulder's Doom Patrol.

Educated and urbane, Mallah adores his creator with a passion matched only by his ferocity when angered. This devotion was tested to the limits when the Brain used a designer drug linking users' minds to ascend to godlike cerebral levels. Rejected by his true love, Mallah joined the Titans in stopping the Brain.

MON-EL

DEBUT *Superboy* (Vol. 1) #89 (Jun. 1961)
REAL NAME Lar Gand
BASE 31st-century New Metropolis
HEIGHT 6ft 2in **WEIGHT** 200 lbs **EYES** Blue **HAIR** Black
POWERS/ABILITIES Highly skilled tactician; brilliant scientist and historian; passionate explorer; super-strength, speed, flight, invulnerability and enhanced senses, fueled by exposure to solar radiation from a yellow sun.
ALLIES Superman, Supergirl, Krypto, Brainiac 5, Shadow Lass
ENEMIES Dominators, Dark Circle, Time Trapper
AFFILIATIONS Legion of Super-Heroes, Science Police, United Planets Council, Wanderers, Green Lantern Corps, Justice League of America

A hero constantly altered by successive reality-revising crises, Lar Gand fled his xenophobic birthworld Daxam to become a wanderer and child of the cosmos. Arriving on Earth—on a Monday—he was befriended by Superman, who mistakenly assumed Lar to be a member of his own family and dubbed him Mon-El. Though possessing all the extraordinary powers of a Kryptonian under Earth's yellow sun, Daxamites are lethally sensitive to the element lead. Following a brief but intense period of heroic endeavor, Mon-El finally succumbed to incurable toxic shock from long exposure to the ubiquitous mineral.

Superman saved Mon-El's life by projecting him into the Phantom Zone. There he stayed, an intangible, invisible observer of the material world. A thousand years later, Mon-El was saved by a serum that neutralized his lead poisoning. He joined the Legion of Super-Heroes as Daxam's representative, combining centuries of experience with immense drive. A being of great power and determination, he is an overachiever proud of his status as "Krypton-Prime," and especially competitive with time-displaced Superboy Jon Kent.

ON THE RECORD

Lar Gand received a major makeover in the 1990s. With Superman's continuity drastically revised, Mon-El became Valor, a Daxamite atoning for his father's role in the Dominator-orchestrated invasion of Earth. Rescuing thousands of humans transformed by metagene experiments, Valor transported them to uninhabited planets: homeworlds for the empowered races that would eventually comprise the United Planets a millennium later. Valor later inspired the formation of the Legion of Super-Heroes.

MESSIAH MOMENT

Valor was a cosmic legend: a super-savior seeding a string of barrier worlds between Earth and the aggressive Dominion empire with super-powered metahumans.

MONGUL

DEBUT *DC Comics Presents* (Vol. 1) #27 (Nov. 1980)

REAL NAME Mongul MDCCXCII

BASE Warworld, mobile

HEIGHT 8ft **WEIGHT** 1,125 lbs **EYES** Red **HAIR** Bald

POWERS/ABILITIES Super-strength, speed, stamina and invulnerability, fire vision, ruthless pragmatism, strategic genius; Chest blaster

ENEMIES Superman, Batman, Wonder Woman, Green Lantern Corps, United Planets

AFFILIATIONS Warworld, Jochi, Sinestro Corps

One of the universe's most feared tyrants, Mongul is a violent brute with an insatiable hunger for domination. Descended from a line of killer kings, Mongul is never happier than when pitilessly crushing an opponent. Ruthless and terrifying, he once led the Sinestro Corps before being defeated by Green and Yellow Lanterns. Mongul possesses a cunning mind. He knows true power comes from governance and control, not threats or bloodletting. He will switch sides in the middle of a conflict and sacrifice allies if he thinks doing so will secure a tactical advantage. Whether through his intergalactic engine of death, Warworld, or subtler machinations like his mind-controlling Black Mercy plants or enslaving Earth's population through computer games, Mongul craves subjects to rule over.

Following defeat by Superman, his son Jochi restored shattered Warworld to full destructive functionality and began a new reign of terror. However, when Jochi displayed mercy to his subjects, Mongul killed him without hesitation. Self-preservation was the key to Mongul making a deal with Wonder Woman and Superman to utilize his Warworld to defeat another world conqueror, Brainiac.

The tyrant was subsequently killed by another son, who assumed his name, rank, and aspirations as Mongul MDCCXCII. When Superman and his son Jon began aligning alien civilizations into a federation of United Planets, this Mongul brutally attacked, determined to disrupt the process. He was driven off by Super Heroes and alien soldiers, and ultimately beaten into submission by Superman.

ON THE RECORD

The original Mongul looked like an unreasoning brute but schemed like a Machiavelli. His most insidious assault involved giving Superman everything the Man of Steel could ever want.

Utilizing a parasitic plant that paralyzed its victims while feeding them dreams of their deepest desires come true, Mongul attempted to plunder the Fortress of Solitude. However, he had not bargained for the spirited resistance of Superman's friends and allies.

IMPLANTING UTOPIA

Once Mongul's Black Mercy plant had overwhelmed Superman, the villain was free to employ savage force against Batman, Robin, and Wonder Woman.

MONITOR

DEBUT *New Teen Titans* (Vol. 1) #21 (Jul. 1982) (the Monitor); *Countdown to Final Crisis* #21 (Oct. 6, 2007) (Nix Uotan)

BASE Hall of Heroes in the Orrery of Worlds

HEIGHT Variable **WEIGHT** Variable **EYES** White **HAIR** Black

POWERS/ABILITIES Immortality; genius-level intellect; cosmic awareness; dimensional manipulation; energy projection; transformation and size alteration; psionics; teleportation; matter manipulation; superhuman strength, speed, durability, and flight.

ALLIES Mr. Stubbs, Harbinger, Operation Justice Battalion

ENEMIES The Gentry, the Empty Hand

AFFILIATIONS All heroes in every universe of the known Multiverse

According to the Guardians of the Universe, when Maltusian renegade Krona meddled with creation, existence, and time, he split reality into a multiverse, and two beings formed. The Monitor oversaw all positive-matter realities, while an Anti-Monitor, inimical to life, schemed from an antimatter universe. After billions of years, a sequence of cosmic crises reconfigured reality, resulting in 52 separate universes, with Earth at the heart of every one and a unique Monitor overseeing each. When war broke out between these Monitors, existence was yet again overwritten. Ultimately, one Monitor remained to safeguard all the surviving realities.

When not living as a normal teenager, Nix Uotan safeguards those dimensions comprising the Orrery of Worlds, protecting life in them from dangers beyond interdimensional border region the Bleed.

Following another reordering of existence by Doctor Manhattan, the true nature of reality was exposed. Everything there is originated at the command of a sixth-dimensional Super Celestial named Perpetua. She divided creation into Positive and Antimatter, underpinned by Dark Energy, with a Monitor, Anti-Monitor and World Forger to oversee them. For dereliction of duty, she was imprisoned behind the Source Wall. Her liberation unleashed Multiversal chaos, compelling the Monitor and his two brothers to unite and combat her, alongside Earth-0's Justice League.

ON THE RECORD

The Monitor first appeared as an enigmatic, technologically advanced power-broker, providing weaponry and Super-Villains to criminals needing specific Super Hero countermeasures. From his hidden satellite, he watched and appraised the world's metahumans, and not until landmark series *Crisis on Infinite Earths* did his real motivations emerge. This almighty immortal was gathering soldiers to help battle a mysterious enemy eradicating all time, space, and alternate dimensions with an irresistible wave of antimatter.

WATCH AND LEARN

In his war to save all life, the Monitor chose his tools carefully for power, intelligence, courage, and, especially, determination.

MR. FREEZE

DATA

DEBUT *Batman* (Vol. 1) #121 (Feb. 1959)

REAL NAME Dr. Victor Fries

BASE Gotham City

HEIGHT 6ft **WEIGHT** 190 lbs **EYES** Blue **HAIR** None

POWERS/ABILITIES Genius-level intellect with a keen scientific mind; claims to not feel emotions; sophisticated refrigeration suit sustains low temperature and grants superhuman strength, durability, and endurance; developed quick-freeze technology that he utilizes in the form of freeze guns and grenades.

ALLIES Starling, Scarecrow, Harley Quinn, Merry-Maker, Professor Pyg, Mrs. Freeze

ENEMIES Batman, the Batman Family, Birds of Prey, Court of Owls

AFFILIATIONS Wayne Industries (formerly), Arkham Asylum inmates

FROZEN FEELINGS
Fries would do anything to see the health of his beloved Nora restored, even endangering hundreds of innocent lives by draining power to work his equipment.

At first glance, Mr. Freeze seems like a sympathetic criminal. After all, he has devoted his life to looking for a cure for his beloved Nora so that she may be thawed from her cryogenic state and reunited with him. In fact, Victor Fries is a dangerous sociopath whose single-mindedness has transformed him into a Super-Villain.

Victor Fries watched his father walk out on his family when he was young, abandoning both his mother and himself in Gotham City. Later relocating to Lowell, Nebraska, Victor's mother slowly lost her grip on reality, ending up sick and wheelchair-bound. While still a boy, Victor pushed her out onto a frozen lake and shoved her wheelchair into a hole in the ice.

When his mother tried to climb out, Victor pushed her under the water again, preferring her to be frozen and "cured" of all her ills, than to go on suffering. She would not be discovered until the following spring.

As he matured, Victor carried with him his obsession for cold. He became a doctor in the field of cryogenics at Wayne Tower Laboratories. Victor adored his wife Nora, and when she fell ill with cancer, he had her frozen. When it was discovered he was running experiments on his frozen wife, Fries was fired. Victor grew violent, and in a scuffle, he was doused in experimental chemicals that made it impossible for his body to survive outside the temperature of absolute zero. Required to wear a refrigerated suit, Victor developed flash-freezing weaponry and became the Super-Villain Mr. Freeze.

He later augmented his physiology so as not to depend on his Mr. Freeze suit. Aided by Lex Luthor, Victor restored Nora to life and the couple became frozen fugitives. However, Luthor's serum corrupted Nora's mind, and she lashed out at Victor causing him to be frozen in stasis in order to survive. With their roles reversed, the road was paved for the criminal career of Mrs. Freeze.

ON THE RECORD

When he debuted in 1959, Mr. Freeze was a renegade scientist-turned-criminal named Mr. Zero. Intended as a one-off villain, he returned in the late 1960s bearing his current moniker, Mr. Freeze.

Over the years, Mr. Freeze was a minor Batman rogue, making a few guest appearances until the 1980s, which featured a number of costume changes. It wasn't until after *Crisis on Infinite Earths* and thanks in part to *Batman: The Animated Series*, that Victor Fries was given his origin story. The tragic tale helped elevate him to the status of one of Batman's greatest foes.

ZERO TOLERANCE
In his first appearance, Mr. Freeze was Mr. Zero, a scientist whose ice gun backfired, spilling a freezing solution over him. It meant he could now only survive in sub-zero temperatures.

MRS. FREEZE
When finally conscious, Nora Fries proved to be even more cold-blooded than her husband as the ruthless Mrs. Freeze.

CLASSIC STORIES

***Batman* (Vol. 1) #121 (Feb. 1959)**

Called Mr. Zero in this first appearance, Mr. Freeze begins a series of robberies using a gun capable of projecting both cold and heat.

***Detective Comics* (Vol. 1) #373**

(Mar. 1968) Mr. Zero returns to plague Batman in a new costume and with a new name: Mr. Freeze.

***Batman: Mr. Freeze* #1 (May 1997)**

Mr. Freeze is provided a fitting modern origin story, inspired in part by the acclaimed *Batman: The Animated Series*.

***Batman* (Vol. 2) Annual #1 (Jul. 2012)**

Mr. Freeze's origin is briefly updated for the "New 52" continuity, revealing that Victor's "wife" Nora was never his wife at all, but the first woman to undergo cryogenic stasis, Nora Fields.

MONSTER SOCIETY OF EVIL

DEBUT *Captain Marvel Adventures* (Vol. 1) #22 (Mar. 1943)

FORMER MEMBERS Mister Mind; I.B.A.C.; Dr. Sivana; Captain Nazi; Crocodile Man; Evil Eye; Mister Atom

CURRENT MEMBERS Sivana; Mister Mind; Wicked Witch of the West; Jeepers; King Kull; Scapegoat; Evil Eye; Red Queen; Mr. Atom; Mr. Merry-Go-Round; Crocodile Men

ENEMIES Shazam Family, The Wizard

The Monster Society of Evil was formed by Venusian worm Mister Mind during World War II in an attempt at global conquest, and opposed by heroic Shazam. The Society contained Axis spies, metahuman or mystical villains, and malevolent monsters.

The Society never attacked as a group but always individually. Even in later years when mad scientist Dr. Sivana took charge, it proved impossible to get the monsters to cooperate with one another. The aims of the Monster Society remain constant: crush Shazam, terrorize decent folk, and cause as much carnage and destruction as possible.

Following *Rebirth*, a new Society was formed. It was made up of the worst villains of the Seven Magic Lands which, until recently, had been sealed by The Wizard. They were defeated and re-imprisoned by the power of his heirs, the Shazam Family.

MORDRU

DEBUT *Adventure Comics* (Vol. 1) #369 (Jun. 1968)

BASE Zerox, the Sorcerer's World

EYES Hazel **HAIR** Auburn

POWERS/ABILITIES Lord of Chaos; immortal; ultimate-level magic-wielder; superhuman strength.

ENEMIES Nabu, Doctor Fate, JSA, The Spectre, Justice Society of America, Justice League Dark, Legion of Super-Heroes

AFFILIATIONS Demon Knights, Sons of Anubis

Lord of Chaos Mordru is an energy being who inhabits physical hosts. His goal is domination of all existence and he gathers sorcerous artifacts, such as the Amulet of Fate, to secure his ambitions. As Wrynn, he plundered Gemworld, and on Earth once possessed the Books of Magic. He has always battled Super Heroes, latterly tormenting Wonder Woman and Zatanna when Justice League Dark sought allies against the predatory Otherkind. His major opposition would become the Legion of Super-Heroes, with his own daughter White Witch Xola Aq in the vanguard.

Mordru has a fear of entombment, with many battles lost because opponents buried or trapped him in confined spaces. Thus, he prefers to dominate through physical forces. Overconfidence is his weakness, whether fighting Nabu, or mortal foes like the JSA.

AFFILIATIONS The Trinity (Batman, Superman, and Wonder Woman)

Jennifer Morgan is the daughter of Lt. Col. Travis Morgan, Warlord of underground realm Skartaris. Believing her father dead, she later reunited with him after following his trail to the otherworldly reality he had stumbled on years previously.

There she learned sorcery with the witch Ashiya, but on discovering her tutor's ill intentions, Jennifer rebelled, and ultimately defeated the sorceress with her own magical skills. As Lady Jennifer, she is the supreme sorceress of Skartaris. Despite being close to her, the Warlord feels uncomfortable with his daughter's magic. But he still battles beside her, such as when Superman, Batman, and Wonder Woman tackled his arch foe Deimos, or when father and daughter helped displaced Superboy Conner Kent and Young Justice escape from Skartaris.

MULTIPLEX

DEBUT *Firestorm* (Vol. 1) #1 (Mar. 1978)

REAL NAME Dalton Black

HEIGHT 6ft **WEIGHT** 188 lbs

EYES Blue **HAIR** Black

POWERS/ABILITIES Capable hand-to-hand combatant; able to duplicate his form.

ALLIES Killer Frost, Plastique, Hyena, Typhoon

ENEMIES The Flash, Artemis, Firestorm, Green Arrow, Midnighter

AFFILIATIONS The Secret Society

Dalton Black was assistant to Professor Martin Stein, the scientist who created Firestorm. Before Stein could fire Black for trying to sell his secrets, Black used Stein's machinery, unleashing a surge of energy leaving him with the ability to infinitely multiply his form, and began calling himself Multiplex. Green Arrow took out his duplicates, but the original Multiplex escaped.

After teaming up with other villains to fight Firestorm, Multiplex began working for a criminal named Mr. Rohmer. When the Super Hero Midnighter interrogated Rohmer to locate stolen technology, Rohmer ordered Black to fight the violent vigilante—a battle that Multiplex didn't walk away from. Black later clashed with The Flash, Artemis, and others, but with every defeat his confidence dwindled.

MARK MOONRIDER

DEBUT *Forever People* #1 (Feb.–Mar. 1971)

REAL NAME Mark Moonrider

EYES Blue **HAIR** Black

POWERS/ABILITIES "Megaton touch" can cause explosions; skilled combatant

ALLIES Infinity Man, Big Bear, Vykin, Beautiful Dreamer, Serifan, Superman, Deadman

ENEMIES Darkseid, Mantis, Desaad, Deviliation

AFFILIATIONS Forever People

Mark Moonrider was a resident of the planet New Genesis when he first traveled to Earth. He partnered with his friend Dreamer Beautiful, who wished to complete an

assignment to help advance mankind. The pair were joined by fellow New Genesis natives Vykin Baldaur and Vykin's sister Serafina. On Earth, the group met up with another New God, Big Bear, and set up camp in Venice Beach, California.

Moonrider soon joined the Super Hero team the Forever People, facing villains from New Genesis' rival planet, Apokolips, including Mantis and the Femmes Fatales. The Forever People discovered they could also switch places with an entity called the Infinity Man, a mysterious and powerful being whose true motives remain unknown.

MORGAINE LE FEY

DEBUT *Batman* #36 (Aug.–Sep. 1946)

REAL NAME Morgaine le Fey; also known as Morgan le Fay

HEIGHT 5ft 10in **WEIGHT** 148 lbs

EYES Blue **HAIR** Black

POWERS/ABILITIES Sorceress; can fly, create illusions, and generate force blasts.

ALLIES Nocturna, Man O'War, Absinthe, Scatter

ENEMIES The Demon, the Unknowns, Aquaman, the Others

A sorceress hailing from the time of Camelot and King Arthur, Morgaine le Fey presented a dire threat to mankind, and was opposed by The Demon (aka Etrigan). In the modern era, Morgaine was incensed that humans were slowly destroying their own planet. She tried to steal the Atlantean helmet of the hero Vostok-X to escape Earth, only to have the item reject her. With Aquaman and the Super Hero team the Others on her trail to retrieve the helmet, Morgaine revealed herself in a battle that ended abruptly with her vanishing in a flash of light.

Morgaine resurfaced with a new scheme to alter the very fabric of reality. She was defeated by the Unknowns, a new group of vigilantes led by Batwoman and including Morgaine's old foe, Etrigan.

MOTHER PANIC

DEBUT *DC's Young Animal Ashcan Edition* (Vol. 1) #1 (2016)

ALLIES Doctor Varna, Dominic, Otis Flannegan, Fennec Fox, Batman, Batwoman

ENEMIES Gala, Pretty, The Collective

AFFILIATIONS None

After her father died on a hunting trip, and with her mother apparently mentally ill, teenager Violet Paige was sent by her older brother to boarding school. Gather House was a harsh institution where children were taken apart and remade—literally. Violet was given cybernetic implants and trained in combat. Pushed to breaking point, she ran away, burning the school down as a parting gesture. Fifteen years passed, and Violet was a notorious celebrante partying on her inheritance, living in a former hotel with her mother. However, she was also Mother Panic, a violent vigilante bent on revenge against those who had made her childhood so traumatic.

MURMUR

DEBUT *The Flash: Iron Heights* #1 (Aug. 2001)

REAL NAME Dr. Michael Christian Amar

BASE Keystone City; Central City

HEIGHT 5ft 8in **WEIGHT** 155 lbs

EYES Brown **HAIR** Black

POWERS/ABILITIES Skilled surgeon with an impressive knowledge of medical science; unpredictable and unstable killer.

ALLIES Girdler, Magenta, Mirror Master

ENEMIES The Flash (Wally West)

AFFILIATIONS Zandia

Formerly a highly respected surgeon, Dr. Michael Christian Amar was well known in both Central City and Keystone City. However, in his spare time, he stalked the streets as costumed serial killer Murmur, so called by local media due to his uncontrollable tendency to mutter. Murmur was finally caught by the Keystone police, identified by his speech impediment.

Keen not to make the same mistake twice, Murmur cut out his own tongue and stitched his lips together. He gained even more notoriety when he instigated a mass breakout from the infamous Iron Heights penitentiary, and later went on to hunt The Flash to join the ranks of the Rogues. After fighting the Secret Six, Murmur vanished, and has been reported to be enjoying life in the Super-Villain refuge of Zandia.

NAOMI

DEBUT *Naomi* (Vol. 1) #1 (Mar 2019)

REAL NAME Naomi McDuffie

BASE Port Oswego, Oregon

HEIGHT Unknown **WEIGHT** Unknown **EYES** Brown **HAIR** Black

POWERS/ABILITIES Super-strength and durability; flight; energy projection.

ALLIES Superman, Batman, Dee

ENEMIES Zumbado, Red Cloud

AFFILIATIONS Young Justice

Until Naomi McDuffie was 17 years old, she had no idea that she was an alien. Her adoptive parents revealed to her that she had been brought through a dimensional rift as a baby, swaddled in a mysterious black box. When Naomi held the box in her hands, her body absorbed it, and she heard a message from her birth mother explaining why she had had to send her daughter away.

Naomi's home planet, an alternate Earth elsewhere in the Multiverse, had been devastated by environmental catastrophe. This crisis had allowed radiation to bombard the planet, imbuing a select few with powers, including Naomi's parents. When another metahuman, a murderer named Zumbado, threatened the safety of their baby, Naomi's parents chose to send her to Prime Earth, where they knew there were superpowered beings who could guide their child.

The box Naomi held had activated her powers—she could now fly and create powerful light blasts, as well as having super-strength and durability. Feeling confused and out of control, she went to Metropolis to seek help from her hero, Superman. While there, she helped Superman fight off the Red Cloud. Later, Naomi went back to Oregon, where she joined Young Justice.

BOX OF REVELATIONS Naomi's black box told her the truth about her heritage and powers. She would soon get the chance to visit her devastated homeworld and take part in her first superpowered battle.

N.O.W.H.E.R.E.

DEBUT *Superboy* (Vol. 6) #1 (Nov. 2011)

NOTABLE MEMBERS/POWERS **Harvest:** Leader, futuristic weapons, flight; **Centerhall:** Body of psionic energy; **Director Templar:** Body contains vicious parasites; **Omen:** Precognitive telepath; **Leash:** Energy whips, psionic powers; **Grunge:** Acquires properties of matter; **Misbelief:** Illusionist; **Psykil:** Cyborg; **Warblade:** Creates blades from body; **Ridge:** Superhuman; **Crush:** Shapeshifter; **Fuji:** Body of cosmic energy.

ENEMIES Superboy, Teen Titans, Legion Lost

N.O.W.H.E.R.E. was a secret organization created by Harvest—a mysterious figure with access to 31st-century technology. Its objective was to control the next

generation of metahumans, and its underground base was called the Colony.

Metahuman test subjects were forced to battle to the death in a process called the Culling. The winners were inducted into the Ravagers—N.O.W.H.E.R.E.'s elite strike force. One of N.O.W.H.E.R.E.'s most ambitious projects was the creation of Superboy (Kon-El), a half-Kryptonian, half-human clone. He escaped and allied with the Teen Titans to destroy the Colony. Harvest built a new Colony in Africa but he was killed and his facility was destroyed in a battle with the Teen Titans, possibly spelling the end of N.O.W.H.E.R.E.

NATU, SORANIK

DEBUT *Green Lantern Corps: Recharge* #1 (Nov. 2005)

BASE Korugar, Mobile

EYES Purple (yellow when Yellow Lantern) **HAIR** Black

POWERS/ABILITIES Expert neurosurgeon; as a Yellow Lantern can create constructs of yellow energy by tapping into the emotion of fear.

ALLIES Sinestro, Hal Jordan

ENEMIES Spider Guild, Kyle Rayner

AFFILIATIONS Sinestro Corps; formerly Green Lantern Corps

FATHER KNOWS BEST Sinestro used threats and blackmail to make Natu accept a Yellow Lantern power ring.

Soranik Natu was a neurosurgeon on Korugar in Sector 1417. Korugarians despised Green Lanterns because Sinestro, the first of their kind to join the Corps, had made himself tyrannical ruler of the planet. When a Green power ring selected Natu, she reluctantly accepted, working alongside other Lanterns against the star-extinguishing Spider Guild. She later returned to Korugar, unifying it after seemingly defeating Sinestro.

When Sinestro returned, leading the Sinestro Corps, Natu fought him along with the Green Lanterns, and she began a relationship with colleague Kyle Rayner. In the war's aftermath, Sinestro revealed he was Natu's father and was proud of her for uniting Korugar. During the Blackest Night, Kyle sacrificed himself for his comrades,

but their ally Star Sapphire (Miri Riam) tapped into Natu's love for Kyle to resurrect him. When the Korugarians were almost eradicated by First Lantern Volthoom, Sinestro promised to save the survivors—providing Natu joined his Sinestro Corps.

She grudgingly agreed. After Sinestro was defeated by Hal Jordan, Natu inherited his mantle as leader, brokering an alliance with the Green Lanterns. The pact explosively sundered after future villain Sarko attacked. When he was killed, Natu discovered that the "Last Yellow Lantern" was her grown son and that Rayner was the father—a fact Kyle already knew and had kept concealed. After branding her former lover with her ring, she withdrew with the Yellow Lanterns, furiously declaring herself Soranik Sinestro.

NABU

DEBUT *More Fun Comics* #67 (May 1941)

BASE The Helmet of Fate

EYES Brown **HAIR** Bald

POWERS/ABILITIES Through Helmet of Fate, can communicate with Khalid Nassour or other wearers; produces visions; levitates the Helmet; can fly and access computers.

ALLIES Thoth, Khalid Nassour (Doctor Fate), Kent Nelson (Doctor Fate), Inza Nelson (Doctor Fate), Hector Hall (Doctor Fate)

ENEMIES Anubis, Mordru

Nabu was one of Earth's earliest mages: part of a group which controlled raw magic and called themselves Lords of Order and Chaos. But factions in the group warred over

how to manage the universe. Nabu decided to take human form to guide civilization.

Eventually Nabu's body retired to his tomb, lying dormant until he was woken by Kent Nelson in the early 20th century. Nabu's power as the Order Lord inhabited a golden helmet, and when Nelson wore it, he became Doctor Fate and a conduit for Nabu's will.

Many have donned the helmet since, all becoming pawns of Nabu. With the advent of the Otherkind, Nabu summoned his fellow Lords, seeking to destroy all magic. Since being defeated by both heroes and magical beings, Nabu continues to fight Chaos and evil as part of Justice League Dark.

NEKRON

DEBUT *Tales of the Green Lantern Corps* #2 (Jun. 1981)

BASE The Land of the Unliving

EYES Black **HAIR** None

POWERS/ABILITIES Immensely powerful avatar of death; can kill with a touch, reanimate the dead as Black Lanterns, fire blasts of dark lightning, and warp reality; draws strength from death.

ALLIES Black Hand

ENEMIES The Guardians of Oa, Super Heroes of Earth, the Lantern Corps

AFFILIATIONS Black Lantern Corps

Nekron is an ancient embodiment of darkness, created by the universe itself in order to oppose life. He is the ruler of the limbo-like Dead Zone that holds souls awaiting judgment, though he, too, is trapped there. When the Guardians of Oa banished the renegade Oan, Krona, he ended up in Nekron's realm, and his presence there created a rift leading to the mortal universe. Nekron was then able to see into Earth's reality and he became completely obsessed with destroying it.

During the *Blackest Night* event, he released Black Lantern power rings into the universe. These sought out heroes and villains who were dead or had returned from death and transformed them into gruesome Black Lanterns. Heroes suddenly found themselves battling friends, enemies, and lovers, who had returned from the grave to make war on the living. Using the dark energies released by the Black Lanterns' slaughter, Nekron's henchman, Black Hand, summoned his master into Earth's universe. Nekron then tried to destroy the Entity—the embodiment of all life—but was defeated when Hal Jordan bonded with the Entity to become a White Lantern. Nekron briefly possessed Swamp Thing during the *Brightest Day* event, and Hal Jordan summoned him to defeat the threat of Volthoom, the First Lantern.

NEGATIVE MAN

DEBUT *My Greatest Adventure* #80 (Jun. 1963)

REAL NAME Larry Trainor

HEIGHT 5ft 10in **WEIGHT** 180 lbs

POWERS/ABILITIES Releases a powerful negative-energy being from his body, but will die if it does not return within 60 seconds.

ENEMIES Justice League

AFFILIATIONS Doom Patrol

Airline pilot Larry Trainor's life changed when his plane crashed. Larry had no memory of what had happened, but Dr. Niles Caulder, aka the Chief, told him

that he had been exposed to a toxin that made him so radioactive that the doctors treating him had died of cancer. The Chief claimed to have swathed his body in lead-lined bandages to contain the radiation. He also told Trainor that he was now host to a negative-energy being that endowed him with superpowers.

Feeling that he owed the Chief his life, Trainor joined his Doom Patrol as Negative Man. The Chief sent his team to apprehend Jessica Cruz and acquire her Green Lantern power ring, but during a faceoff with the Justice League, Larry and the Doom Patrol helped endangered civilians instead of grabbing Cruz, proving that they were not totally under the Chief's thumb.

NEGATIVE WOMAN

DEBUT *Showcase* #94 (Aug.–Sep. 1977)

REAL NAME Valentina Vostok

ABILITIES Releasing negative-energy beings.

ALLIES Cliff Steele, Joshua Clay, Harry Stein

ENEMIES General Immortus, Kobra

AFFILIATIONS The People's Heroes, Doom Patrol, Checkmate

Soviet pilot Lt. Col. Valentina Vostok defected to the US in an experimental long-range fighter, but crashed into the sea near Codsville, Maine, where the Doom Patrol had seemingly been wiped out. The energy-being that had inhabited the former Negative Man (Larry Trainor)

entered her body and transformed her into a powerful negative-energy form. She joined a new Doom Patrol led by Celsius and started a relationship with fellow member Tempest, but when her power turned her radioactive, they were forced to break up. Larry Trainor returned from the dead and the negative-energy returned to him.

Valentina left to work in espionage and was promoted to the role of White Queen in Checkmate. She died during the *Final Crisis*, but returned in undead form during the *Blackest Night* to attack Negative Man.

Post-*Flashpoint*, Valentina was a member of the Doom Patrol, but was killed by Atomica and Johnny Quick when the Crime Syndicate invaded Earth-0.

NEMESIS

DEBUT *The Brave and the Bold* (Vol. 1) #166 (Sep. 1980)

REAL NAME Thomas Andrew Tresser

BASE Department of Metahuman Affairs, Washington, D.C.

HEIGHT 5ft 10in **WEIGHT** 170 lbs

EYES Blue **HAIR** Blond

ABILITIES Master of disguise; espionage expert; gadgets include bugs, concussion gun, and paralysis pistol.

ENEMIES The Council, Jihad

Tom Tresser and his brother Chris were operatives in a secret government agency. When Chris was brainwashed by the Council, Tom took the codename Nemesis

and swore to bring them down. After apparently dying in a helicopter crash, he joined the Suicide Squad before being seconded to the Shadow Fighters to battle Eclipso. Nemesis then worked at the Department of Metahuman Affairs, but went rogue during a war between America and the Amazons, aiding Wonder Woman and winning Amazon citizenship.

After the *Final Crisis*, Tom was forcibly recruited into the Global Peace Agency, eventually questioning his own sanity after a series of mind-bending missions. He was killed by temporarily deranged Wally West while undergoing treatment at Sanctuary.

NEUTRON

DEBUT *Action Comics* (Vol. 1) #525 (Nov. 1981)

REAL NAME Nathaniel Tryon

POWERS/ABILITIES Can project blasts of radiation from hands.

ENEMIES Aquaman, Lex Luthor, Justice League, Superman

Nathaniel Tryon was a security guard at the Metropolis Power Plant, but a meltdown transformed his body into living nuclear energy, requiring him to wear a containment

suit. As Neutron, he used his new radiation-blast power to kill those responsible for the accident. He then became a mercenary, accepting a contract to kill Lex Luthor.

Neutron was defeated by Aquaman, but one of his blasts ruptured the unit holding Luthor's experimental Amazo virus. The virus spread across the city and also infected Neutron, reacting with his radioactive form to create virulent cancers. He was also briefly possessed by the virus' collective consciousness before Luthor deployed a vaccine. Neutron was left powerless and cancer-ridden, but Luthor would not let him die—after all, Neutron knew the identity of the person who wanted Luthor dead.

Pre-*Flashpoint*, Neutron was a petty thug turned radioactive Super-Villain, who held a particular grudge against Superman.

NERON

DEBUT *Underworld Unleashed* #1 (Nov. 1995)

BASE Club Midnight

HEIGHT 7ft 2in **WEIGHT** 285 lbs

EYES Blue **HAIR** Blond

POWERS/ABILITIES Master of sorcery, with superhumanly powerful demonic physiology; can breathe flesh-melting flames.

ALLIES Mister Rumor

ENEMIES John Constantine, Papa Midnite

AFFILIATIONS The demons of Hell

Minor demon Neron capitalized on strife in Hell to become ruler of its largest arch-dukedom. He specialized in making Faustian pacts with mortals to gain their souls, the damned currency of Hell. He frequently appeared on Earth: cutting deals, and taking control of Papa Midnite's occult nightclub. With help from business partner Mister Rumor, he began buying up New York real estate, intent on turning the city into a massive mystic bazaar where humans could purchase magic and lose their souls. When Papa Midnite enlisted John Constantine to get the Midnight Club back, Neron was thwarted.

With the invading Otherkind picking off the infernal hierarchy and magic itself endangered by the Lords of Order, Neron joined former StormWatch commander Henry Bendix, who wanted Neron to destroy Apollo and Midnighter. Although initially successful in killing Apollo and tormenting his domain, Neron was utterly unprepared for Midnighter fighting his way into Hell

to save his lover and deliver the most punishing defeat of Neron's existence.

ON THE RECORD

Neron first appeared during *Underworld Unleashed* as the demon who offered heroes and villains great power in return for their souls. Dozens of villains accepted and raised merry Hell before they were damned. When Neron was tricked and trapped in the Tower of Fate by the Elongated Man, a war broke out in the infernal regions, with Blaze and Satanus attempting to take over. When Neron broke free and returned to Hell, he was beheaded by Satanus.

DECAPITATED DEMON: After being trapped in the Tower of Fate, Neron paid the gruesome price for losing a civil war in Hell.

NEW GUARDIANS

DEBUT *Green Lanterns: New Guardians* #1 (Nov. 2011)

CURRENT MEMBERS Kyle Rayner (Green Lantern); Munk (Indigo Tribe); Saint Walker (Blue Lantern Corps); Atrocitus (Red Lantern Corps); Larfleeze (Orange Lantern Corps); Arkillo (Sinestro Corps); Carol Ferris (Star Sapphire Corps)

ENEMIES Invictus

The New Guardians came into being when Green Lantern Kyle Rayner found himself in possession of rings from other Corps, which had left their previous owners for him. Not knowing why, Rayner became the subject of a galactic manhunt as various Corps tried to retrieve their rings. When the Guardians attacked Rayner, assuming he had stolen the rings, he was helped by Saint Walker and Larfleeze, and even his pursuers, who united to defend him. Later, Larfleeze revealed that the Archangel Invictus caused the rings' migration, and they, as the New Guardians, had to defeat him before he destroyed the entire Vega System.

The team fought and defeated Invictus, after which they discovered that the exiled Guardian Sayd was really responsible for the ring incident, because she believed Rayner was the only Lantern who could harness all seven aspects of the Emotional Spectrum—and only by doing so could they beat Invictus.

An earlier team of New Guardians was chosen from several nations as representatives of the human race and enhanced to be the next stage in humankind's evolution.

RINGING THE CHANGES Atrocitus, Carol Ferris, and Larfleeze would eventually replace Bleez, Fatality, and Glomulus on the New Guardians.

NEW SUPER-MAN

DEBUT *New Super-Man* (Vol. 1) #1 (Sep 2016)

REAL NAME Kong Kenan **BASE** Shanghai, China

HEIGHT 5ft 11in) **WEIGHT** 185 lbs

EYES Brown **HAIR** Black

POWERS/ABILITIES Has similar powers to the original Superman, accessing them via his qi; using and resisting magic.

ALLIES I-Ching, Superman

ENEMIES China White Triad, Lantern Corps of China, Freedom Fighters of China

AFFILIATIONS Justice League of China

After saving a classmate from the Super-Villain

Blue Condor, arrogant teen Kong Kenan was chosen for a top-secret government program to create a Chinese hero using the qi of the original Superman. Needing to focus his qi to activate his powers, Kenan became the student of martial-arts master I-Ching. After learning meditation, Kenan could channel his qi into different parts of his body and activate each of his new powers. Like Superman, he could fly and possessed heat vision, freeze breath, super-strength, and super-speed.

Along the way, Kenan also discovered that he had a heroic heritage—his father was Flying Dragon General and his mother was formerly Liberty Goddess. The difficult relationships he had with his parents meant that he was ready to be part of a new family—the

Justice League of China. Although the other heroes in the team had issues with Kenan's impetuosity and selfishness, eventually they became friends and learned to work together.

After the death of his mentor, I-Ching, Kenan became the embodiment of the balancing forces of yin and yang. Although he often found it tough maintaining this equilibrium, he learned to accept that sometimes it was okay to accept a flawed existence rather than sacrificing everything in the pursuit of perfection.

A NATION'S HERO
Kong Kenan was chosen to be the protector of his nation and its values. The young hero had a lot to learn, but fortunately he found wise counsellors and good friends on his life's path.

NEWSBOY LEGION

DEBUT *Star Spangled Comics* #7 (Apr. 1942)

BASE Metropolis

MEMBERS Big Words, Gabby, Scrapper, Tommy Tompkins, Walter Johnson, Famous Bobby

ALLIES Guardian, Superboy

ENEMIES Lex Luthor

The Newsboy Legion was a team of reformed juvenile delinquents. They roamed the streets of Metropolis under the watchful eye of the costumed Guardian—police officer Jim Harper—who wanted to protect the orphans from the hard life of the streets. Growing up during World War II, the Legion later formed Project Cadmus, a pioneering genetic research facility.

An early Cadmus endeavor was the cloning of Jim Harper, which granted the Guardian new life. The Cadmus facility was then attacked by the Apokoliptian creature Sleez and, during Sleez's brief takeover, teenage clones of the now-adult Legion appeared, effectively recreating the original Legion and setting it up for new adventures. These included the admission of the first female Newsboy Legionnaire, Famous Bobby.

WHIZZING AROUND

The Newsboy Legion got themselves into a lot of scrapes over the years, and got out of more than a few thanks to Cadmus tech like the Whizz Wagon.

NIGHT FORCE

DEBUT *New Teen Titans* (Vol. 1) #21 (Jul. 1982)

BASE Washington, DC

NEW MEMBERS Raven; Zachary Zatara; Black Alice; Klarion, the Witch Boy and Teekl; Robert Diaz; Sky Harper; Traci Thirteen; Alice Williams; Kid Devil

ENEMIES Cassandra Fey, Trigon, Shadowriders

Baron Winters gathered the Night Force to fight evils he could not, due to his inability to leave Wintersgate Manor, except by traveling to other times. Guided by the Book of Night, he brought together Jim Duffy, Zoe Davis, and Brian Greene to fight the Gatherers, led by the mystic Cassandra Fey.

The Gatherers had spent centuries breeding psychic demons, and were close to perfecting them. All the while Cassandra had been siphoning Baron Winters' powers, using the peculiar nature of Wintersgate, which exists at a nexus of different times. She used Zoe Davis as a vessel, and Brian Greene as the unknowing parent of generations of the demonic creatures. When they realized Cassandra was manipulating them, the team fought back, and Jim Duffy killed her.

Winters is notorious for callously expending his agents. He tried to build a Night Force team of young magic users—Arcanes—to repulse the invasion of Trigon and a purge of magic beings by ancient Shadowriders.

MASTERIND

Baron Winters schemes from his chair with his pet leopard Merlin... while Jim Duffy and Zoe Davis get a crash course in the occult.

The New Gods are an ancient race who possess prodigious power and superior technology. Each god is equal in might to one of Earth's Super Heroes. They are also a race locked in perpetual war. The New Gods of New Genesis, ruled by Highfather, are devoted to peace and order, but are in constant bitter conflict with their warlike brethren on hellish Apokolips, ruled over by the mighty tyrant, Darkseid.

AT A GLANCE...

Smart technology

New Gods technology is so advanced that many of its devices are actually sentient. But perhaps the most incredible device of all is the Mother Box. This bonds to its owner and serves as a multifunction tool, a data source, and medical kit, evolving to suit its user's needs.

Boom Tubes

Boom Tubes are the preferred method of transportation for the New Gods. These interdimensional tunnels can be generated by Mother Boxes or other devices and they allow their users to cross between planets and even realities with ease. The name comes from the distinctive sound they make when activated.

 (Mar.-Apr. 1971-Feb.-Mar. 1974)

This series tells the story of perhaps the most famous New Gods hero, the escape artist Mister Miracle, and his formidable warrior wife, Big Barda.

DC Graphic Novel #4 (Mar. 1985)

"The Hunger Dogs" relates the story of the oppressed underclass of Apokolips, who rise up and overthrow their evil master, Darkseid.

The story of the New Gods

begins in the distant past, on an unreachable plane separate from the rest of the universe. A primordial planet there was ruled over by the wild and capricious Old Gods, who reveled in chaos, while the lesser beings that would become known as the New Gods scratched out a living amid that chaos.

One of these lesser beings, named Uxas, bore a burning hatred against the Old Gods and led a war against them. The Old Gods were slain, but then another war broke out between the evil Uxas, who would later become known as Darkseid, and his good brother Izaya, who would become Highfather. Izaya and his people eventually built a utopian city that floats over their planet, New Genesis, while Darkseid and his minions created the hellish world of Apokolips. The latter then set out in search of new worlds to conquer. Peace was established between the two when Highfather and Darkseid exchanged sons: Orion was raised on New Genesis, while Scot (who would become Mister Miracle) was imprisoned in the Slave Pits of Apokolips.

Cruelty and oppression are a way of life on Apokolips. At the bottom of the hierarchy are the Lowlies and Plague Dogs, who work in the Slave Camps or are fed into the Fire Pits that fuel Apokolips' forges and munitions factories. Above them are the dreaded Parademons, genetically engineered monsters bred only for war, and above the Parademons are the various minions of Darkseid, who compete for the favor of their master. Among them are the general Steppenwolf, the interrogator Desaad, and Darkseid's warrior son, Kalibak.

The hordes of Apokolips often travel through space, conquering and consuming worlds—Earth-2 was one world that suffered this fate. The heroes of Earth-2 repulsed one attack by the forces of Apokolips, led by Steppenwolf, but five years later, Darkseid himself commanded his hordes and Earth-2 was ultimately consumed by Apokolips. The New Gods of New Genesis are more peaceful in their interactions with other worlds, believing that their purpose is to guide lesser races away from darkness and to spread peace and harmony. Its heroes journey out to fight evil, and it has set up research projects on other worlds to extend the benefits of its advanced science. However, the inhabitants of New Genesis are not immune to pride and arrogance: while searching for the secret of the fabled Life Equation, Highfather inadvertently started a

GENESIS WAR

Uxas and Izaya led the New Gods in a war of annihilation against the chaotic Old Gods. The conflict ended when Uxas slew his own father, Yuga Khan.

DARKSEID WAR

When Darkseid was locked in battle with the powerful Anti-Monitor, the Justice League was caught in the middle. Mister Miracle, Big Barda, and even the Female Furies all pooled their strength in a war that saw the death of Darkseid, and then his subsequent resurrection as an infant. In the process, the Justice League was briefly bestowed with the power of the gods. Most notably, Batman sat upon Metron's chair, and discovered secrets about his arch foe, The Joker.

BATMAN: GOD OF KNOWLEDGE

Batman asked the all-knowing Mobius Chair for the real name of The Joker. It surprised him by saying that there were actually three Jokers.

NOW AND FOREVER PEOPLE

When young New Genesis citizens Serafina, Vykin, Mark Moonrider, and Dreamer Beautiful went on a field trip to the primitive planet of Earth, they encountered a mysterious being—the Infinity Man. Under his guidance, they realized they had to rebel against both the benign authority of Highfather and the oppression of Darkseid in order to bring freedom to the Multiverse.

devastating war with the various Lantern Corps.

Recently, the Source Wall that separates known space from powerful forces locked away beyond its boundaries was pierced and then shattered altogether. New Genesis and Apokolips vanished, and the New Gods could feel themselves being called home to the Source itself. Orion and Darkseid avoided this. By manipulating a group of heroes informally called the Justice League Odyssey, and using a device created by Epoch, Darkseid saw Apokolips born again, back in the realm outside dimensions called the Sphere of the Gods. Any rebirth of New Genesis remains to be seen.

“Do not dare to question my motives, human. We New Gods have worked for ages beyond your imagination to protect the Multiverse.”

HIGHFATHER

GODS ABOVE

The New Gods have undergone many deaths, rebirths, and transformations over the millennia. Although Highfather, Darkseid, Orion, and Mister Miracle have remained much the same, Desaad and Kanto have changed appearance radically. The boyish Serafin has become Vykin's sister Serafina, and some—including Takion and Virman Vundabar—appear to be waiting for reintroduction.

GODHEAD

Highfather of New Genesis was obsessed with unlocking the power of the legendary Life Equation, which he believed would allow him to permanently defeat Darkseid. His advisor Metron told him the secret might lie in the power rings of the Lantern Corps. Highfather dispatched warriors to steal the rings, plotting to use their energies to transform the universe's mortal races into powerful, obedient warriors able to withstand Darkseid. But he underestimated the might of the unified Lantern Corps, who proved that mortals could be a match for the New Gods.

GODS VS. MORTALS

Highfather tried to claim the power of the Lantern Corps, provoking a war that shook New Genesis to its foundations.

ON THE RECORD

In the pre-Flashpoint universe, Apokolips and New Genesis were planets created when an ancient primal world was split. In this reality, Uxas was not related to Izaya, but was an heir to the throne of Apokolips. He provoked a war with New Genesis by having Izaya's wife killed.

Genesis of the New Gods

The first New Gods series laid the cornerstone for an entire cosmic mythology. The main plotline involved Orion battling Darkseid's insidious plots to take over Earth. The series set up the long-running conflict between the hero and his estranged father and introduced other significant characters, notably Orion's comrade Lightray and the Black Racer—the New Gods' incarnation of death. However, the epic story also provided background for the entire New Gods saga. This chronicled the creation of Apokolips and New Genesis, the war that broke out between them following the death of Izaya's wife, Avia, and the spiritual journey that Izaya underwent to make contact with the Source and become the peaceful Highfather.

Death of the New Gods

This story saw the era of Apokolips and New Genesis come to an end. When the New Gods were hunted down by an unknown killer, Superman went on a quest to find out why, and made a disturbing discovery: the killer was the Source itself—the primal life force of the universe. The Source was eliminating the New Gods to end the conflict between New Genesis and Apokolips so that they could be joined to create a new, perfect Fifth World.

Final Crisis

The fallout from the Death of the New Gods led directly to the reality-threatening *Final Crisis*. Though the New Gods were slain, their spirits found new homes on Earth, in human or other hosts. Darkseid (in the guise of human gangster Boss Dark Side) and his minions plotted to eliminate the world's heroes and conquer Earth with the power of the Anti-Life Equation, sending the entire multiverse spiraling toward destruction. Darkseid seemingly killed Batman in an epic confrontation, but Superman destroyed Darkseid's essence by singing a single note.

EVIL INFLUENCE

During *Final Crisis*, the Anti-Life Equation turned Wonder Woman and other Super Heroes into Female Furies serving Darkseid.

COSMIC TRAGEDY

The Man of Steel was distraught by the destruction of an entire race—including many of his friends and allies.

NIGHTMASTER

DEBUT *Showcase* #82 (May 1969)

REAL NAME James Rook

BASE New York City, Oblivion Bar

HEIGHT 6ft 1in **WEIGHT** 183 lbs

EYES Blue **HAIR** Gray

POWERS/ABILITIES Skilled combatant; sword of night detects danger, deflects energy, and compels enemies to speak truth.

ENEMIES Pentacle, Lord Meh

AFFILIATIONS Shadowpact

Musician Jim Rook and his girlfriend Janet Jones were transported from their shop Oblivion Inc. to the other-dimensional realm of Myrra. Rook discovered he was heir

to Myrran hero Nightshade, and accepted his ancestor's Sword of Night. After liberating Myrra from evil warlocks, Rook and Janet returned to Earth. Nightmaster joined Shadowpact, eventually becoming the group's reluctant leader. Later, Rook cured the magically afflicted Unbound, using a spell harnessing his innate goodness.

After rebuilding Myrra he battled Lord Meh to free Shadowpact and retired to run the Oblivion Bar: a neutral venue for magic users. He perished defending it from the Dark Knights of bat-god Barbatos during the Metal invasion from the Dark Multiverse underpinning all of creation. His last act was appointing his old friend Detective Chimp the new Nightmaster.

NIGHTSHADE

DEBUT *Captain Atom* (Vol. 1) #82 (Sep. 1966)

REAL NAME Eve Eden

HEIGHT 5ft 8in **WEIGHT** 139 lbs

EYES Blue **HAIR** Black

POWERS/ABILITIES Dimensional travel; creation of tangible shadows; shadow form.

ALLIES Nemesis, Enchantress, Traci 13

ENEMIES Eclipso, Gorilla Grodd, Spectre

AFFILIATIONS Suicide Squad, Shadowpact, Justice League Dark

When Eve Eden's mother took her and her brother Larry to the Land of the Nightshades, Larry was abducted. Eve promised her mother she would rescue him.

She became government agent Nightshade, joining the Suicide Squad after Amanda Waller promised to help her find Larry. The Squad discovered he was possessed by the Incubus. Deadshot killed him to destroy the vile being. Nightshade continued to fight mystic threats, including Eclipso, with supernatural team Shadowpact.

Since *Rebirth*, she has competed with Deathstroke, and worked as part of a group battling Doctor Manhattan on Mars. When the Otherkind targeted Earth's magical community, Nightshade provided an escape route that saved many lives, before joining the battle against Witch-Goddess Hecate.

NKVDEMON

DEBUT *Batman* #445 (Mar. 1990)

REAL NAME Gregor Dosynski

HEIGHT 6ft 4in **WEIGHT** 240 lbs

EYES Red **HAIR** None

POWERS/ABILITIES Experimentally enhanced strength, stamina, and pain resistance; proficiency with firearms and hand-to-hand combat.

ENEMIES Aquaman, the Others

A protégé of the KGBeast, Gregor Dosynski was trained and enhanced as part of a secret Russian biotech project. This gave him superhuman mental toughness and pain resistance, and a demonic appearance—hence his codename: NKVDemon.

He was part of terror-team Mayhem, alongside his mentor KGBeast, Cheshire, Maelstrom, and Stranglehold. Together they battled Aquaman and the Others, trying to reactivate a Soviet-era satellite and launch nuclear missiles at targets on Earth. The Others diverted the missile with the help of Vostok-X, a former comrade of KGBeast, now aligned with the Others. Vostok-X redirected it toward his moon base and apparently died in the blast.

The NKVDemon has clashed with Batman several times, most recently after the death of Alfred Pennyworth. His butler—a former British spy—had an unresolved Soviet-era case that took the Dark Knight to the heart of modern Russia. A brutal clash with an aging traitor revealed there may be more survivors of the NKVDemon program...

FACE OF EVIL

The use of various experimental steroids turned NKVDemon into a powerful combatant, but also gave him a truly terrifying appearance.

NIGHTMARE NURSE

DEBUT *Phantom Stranger* (Vol. 4) #8 (Jul. 2013)

REAL NAME Asa

HEIGHT 5ft 9in **WEIGHT** 130 lbs

EYES Red **HAIR** Red

POWERS/ABILITIES Unsurpassed spiritual healing abilities, especially for serious supernatural ailments; known to create energy constructs.

ALLIES Deadman, John Constantine

ENEMIES Blight, Crime Syndicate of America

Even among her decidedly strange colleagues in the Justice League Dark, Nightmare Nurse stood out as a real mystery. Zatanna summoned her

after The Question stabbed the Phantom Stranger, knowing only her powers could heal this supernatural wound. Nightmare Nurse, irritated at the summons, was nevertheless bound to help because the gods Apollo and Panacea themselves had once made her swear the Hippocratic Oath.

After helping the Stranger by retrieving his soul from the land of Non, Nightmare Nurse stayed with Justice League Dark through the Trinity War and the team's battle against the alien Blight. She and John Constantine have a romantic past that did not end happily for either of them. In addition to her healing prowess, Nightmare Nurse was able to create a clone of Swamp Thing, though it only survived for a short time.

NIMROD

DEBUT *Shadow of the Bat* #7 (Dec. 1992)

REAL NAME Dean Hunter

BASE Gotham City

HEIGHT 6ft 2in **WEIGHT** 195 lbs

EYES Blue **HAIR** Blond

POWERS/ABILITIES Military camouflage suit can turn invisible; infrared targeting goggles; gauntlet-mounted mini gun.

ENEMIES Batman, Robin

Photographer Dean Hunter got into a fight with the villain Chancer in Texas, during which Hunter's girlfriend was killed. Chancer escaped and Hunter was

accused of murder. He escaped from prison and stole an experimental military suit, vowing to hunt Chancer down. The chase led him to Gotham City, where, as Nimrod, he initially interfered with Batman's pursuit of Chancer, who had joined the Misfits gang.

Nimrod later redeemed himself by helping Robin figure out where the Misfits were holding Batman, Commissioner Gordon, and Mayor Krol, saving their lives. Nimrod attacked the Misfits, determined to capture Chancer and get the truth out about what had happened in Texas. Batman arrived in time to help take down the gang, and both Chancer and Dean Hunter were taken to prison—but Hunter still believes he will be exonerated.

Nobody

DEBUT *Batman and Robin* (Vol. 2) #1 (Nov. 2011)

REAL NAME Morgan Ducard; Maya Ducard

BASE Gotham City

HEIGHT 6ft 1in **WEIGHT** 195 lbs

EYES Brown **HAIR** None

POWERS/ABILITIES Skilled marksman and hand-to-hand combatant; expert torturer.

ENEMIES Batman, Damian Wayne

Son of the assassin Henri Ducard and the spy Felicity Strode, Morgan Ducard killed his mother when he thought she might betray Henri, and was then instructed in the family business—killing. Bruce Wayne also trained alongside Morgan under Henri Ducard's tutelage, kicking off a lifelong rivalry. Henri ordered Morgan to kill Bruce, but instead Bruce defeated Morgan, disgracing him in his father's eyes.

Vowing revenge and adopting the persona NoBody, Morgan embarked on a killing spree in Gotham City and also tried to corrupt Batman's son Damian. NoBody taunted Damian until Damian lost control and killed him. Morgan's daughter Maya, also raised to be an assassin, assumed her father's legacy as NoBody and sought revenge on Damian—but ultimately reached a wary reconciliation with him.

NORTHWIND

DEBUT *All-Star Squadron* #25 (Sep. 1983)

REAL NAME Norda Cantrell

HEIGHT 6ft **WEIGHT** 195 lbs

EYES Brown **HAIR** None

POWERS/ABILITIES Flight; enhanced strength and stamina; communication with birds.

ALLIES Black Adam, Atom Smasher

ENEMIES Hawkman

AFFILIATIONS Infinity, Inc.

Hybrid child of human anthropologist Fred Cantrell and a Feitherian mother, Norda Cantrell grew up in the hidden city of Feather in northern Greenland. As the

godson of Hawkman Carter Hall, Norda formed a rivalry with Hawkman's son Hector, (later Doctor Fate). As an adult, Norda joined Infinity, Inc. as Northwind. After Hector Hall's death, he helped the Feitherians rebuild their home into New Feithera.

Initially possessing an avian-human hybrid form, Northwind transformed into a fully birdlike creature. Now unable to speak, he continued as a vigilante, joining with Black Adam and others in executing villains. Hawkman tore off Northwind's wings, hoping to stop him killing, but the wings grew back and Northwind helped Black Adam to take control of Kahndaq, his home country.

OBLIVION

DEBUT *Green Lantern: New Guardians Annual* (Vol. 1) #2 (Jun. 2014)

REAL NAME Kyle Rayner (evil doppelgänger)

HEIGHT Variable **WEIGHT** Variable

EYES Red **HAIR** Black

POWERS/ABILITIES Superhuman strength, shapeshifting, telepathy, illusion casting, energy projection, and construct manipulation.

ALLIES Carol Ferris

ENEMIES Kyle Rayner

Formed after Kyle Rayner broke through the Source Wall surrounding the universe, Oblivion is a dark doppelgänger of Kyle created from the fear, greed, and rage inside the former Green Lantern.

Possessing his progenitor's memories, Oblivion headed for Earth and, believing himself the original, tried living Kyle's life. His twisted sensibilities soon came to the fore, and he terrorized an entire town with illusions, mutating the populace into monsters. The real Kyle Rayner found that he could not defeat his mirror image and the stalemate was only broken when Kyle's father intervened. Oblivion recovered and struck again, but realizing its origins, Kyle merged with Oblivion, reabsorbing his own base instincts. He then returned to the edge of the universe and dragged them both back beyond the Source Wall.

OBSIDIAN

DEBUT *All-Star Squadron* (Vol. 1) #25 (Sep. 1983)

REAL NAME Todd James Rice

HEIGHT 5ft 11in **WEIGHT** 193 lbs

EYES Brown **HAIR** Brown

POWERS/ABILITIES Transformation into a shadow form, superhuman strength, flight, size alteration, shadow construct manipulation. Allies: Jade, Alan Scott, Damon Matthews

ENEMIES Ian Karkull, Mordru, Eclipso

Raised in an abusive foster home, teenager Todd Rice found his twin sister, Jennie-Lynn Hayden, and they joined other second-generation metahumans in Infinity

Incorporated. As Jade and Obsidian, the pair discovered their real father was 1940s Green Lantern Alan Scott. Their mother was Rose Canton, the plant marauder Thorn.

Todd's shadow powers stem from connections to a mystical realm of darkness. He suffers from schizophrenia, which makes him a valued member of the JSA but—briefly—one of its greatest enemies. When Jade died, his powers vanished and he retired. When they returned, Obsidian rejoined the JSA and, later, the Justice League. As a result of Doctor Manhattan's time-tampering being rolled back, Jade returned and both are active Super Heroes once again.

ODYSSEUS

DEBUT *Deathstroke* (Vol. 2) #8 (Jun. 2012)

REAL NAME Charles Wilson

EYES (One) Green **HAIR** White

POWERS/ABILITIES Hypnosis, possession, and mind control; highly skilled in unarmed combat and swordsmanship.

ALLIES Lady Shiva, Bronze Tiger

ENEMIES Deathstroke the Terminator, Red Fury, I Ching, Rose Wilson, Interpol

Charles Wilson was a devious monster when he worked for the CIA. He schooled his son Slade in soldiering, making his childhood a living hell, but providing the grounding Slade

required to become Deathstroke the Terminator. When Charles died, the world became a better place. However, his grandson, Jericho, was forced to resurrect him, and Charles—now known as Odysseus—used his powers and charisma to rise to the forefront of the League of Assassins. He employed his powerful mind-controlling abilities to drive entire nations into bloody conflict.

Odysseus abducted his grandchildren, Jericho and Rose, needing their metahuman gifts to bolster his psionic grip and murderous army. His terror campaign was opposed by Deathstroke and his allies, resulting in Charles Wilson's second death.

OLYMPIAN

DEBUT *Super Friends* (Vol. 1) #9 (Dec. 1977)

REAL NAME Aristides Demetrios

BASE Greece

EYES Brown **HAIR** Black

POWERS/ABILITIES Superhuman strength of Herakles, flight of Zetes and Kalai, X-ray vision of Lynkeus, super-speed of Atalanta, and more.

ENEMIES Echidne, Queen Bee, Fain Y'onia, Brother Eye

Aristides Demetrios is a modern hero from an ancient culture. Wearing the legendary Golden Fleece, the Olympian can access the superhuman powers, skills, and

gifts of every member of the fabled Argonauts, the army of great warriors and demi-gods who accompanied Jason on his legendary quest. Over time, the different personalities of the Fleece's power donors have sought to assert themselves, making the Olympian an unpredictable and fractious ally.

Demetrios was recruited as Greece's representative in the international Super Hero team the Global Guardians, and later served with distinction in the Ultramarine Corps. Because of his divine armaments, the Olympian has become an occasional agent of the Greek Gods—notably Zeus—and has even claimed to be one of them.

OCEAN MASTER

DEBUT *Aquaman* (Vol. 1) #29 (Sep.-Oct. 1966)

REAL NAME Orm the First

BASE Atlantis

HEIGHT 5ft 11ins **WEIGHT** 200 lbs **EYES** Black **HAIR** Black

POWERS/ABILITIES Superhuman strength, speed, endurance, and durability; water-breathing and possession of mystic artifacts that bestow control of weather patterns and massive volumes of water.

ALLIES General Rodunn

ENEMIES Aquaman, Mera, Justice League, Vulko, Tula Marius

AFFILIATIONS Throne of Atlantis, the Trench, Belle Reve Penitentiary

Orm despises humanity, but is a dutiful Atlantean warrior. When his half-brother, Arthur Curry, abdicated Atlantis' throne to live as Aquaman, Orm took over, making every decision for the benefit of his people, despite his inclination to attack the surface-dwellers. But when hidden plotter Vulko orchestrated war between Atlantis and America, Orm exultantly punished the callous, air-breathing creatures who had polluted his seas for hundreds of years.

Enacting Aquaman's cautious Atlantean War Plans, Orm launched a devastating attack on America's Eastern Seaboard. Thousands of humans drowned before Aquaman, Mera, and the Justice League turned back the tides.

The war ended when Orm yielded the throne to Arthur Curry. Orm was shocked when his brother handed him over to the surface-dwellers to be imprisoned. When Orm escaped Belle Reve Penitentiary, he settled down with human Erin and her son Tommy until summoned by King Nereus of Xebel, who offered him one of the vacant Seven Seas Thrones. When he learned Corum Rath now ruled Atlantis, he felt compelled to usurp the usurper. Rath is instead defeated by his successor Queen Mera, who is supported by the Ocean Master's half-sister, Tula. Despite aiding Mera against alien sea gods, Orm was reduced to beggary in the slums of the Ninth Tride. However, after hearing of the mystic amulet of Dagon, he laid plans for his return.

ROYAL AGENDA

Orm didn't hate the sea-befouling surface-dwellers; he simply preferred not to share the planet with them.

ON THE RECORD

Originally, Ocean Master was a sub-sea plunderer who continually harassed Aquaman for reasons even he could not fathom. It took an alien invasion and the unseen intervention of Deadman to break long-standing mental blocks inside Orm's mind and reveal to the villain that he was in fact the Sea King's half-brother. Their rivalry intensified after that revelation. In every Aquaman retcon since, Ocean Master has been Arthur Curry's ultimate and signature archenemy.

BROTHERS AT ARMS

Even bonds of blood could not prevent Aquaman and Ocean Master continually battling for supremacy and survival.

NIGHTWING

DATA

DEBUT *Detective Comics* (Vol. 1) #38 (Apr. 1940)

REAL NAME Richard Grayson

BASE Blüdhaven

HEIGHT 5ft 10in **WEIGHT** 175 lbs **EYES** Blue **HAIR** Black

POWERS/ABILITIES Highly skilled martial artist, trained personally by Batman; expert acrobat, gymnast, and escape artist; extremely athletic and agile; highly intelligent with advanced knowledge of a variety of technologies; natural leader and strategist; weapons include Escrima sticks and has access to Batcave technology and gadgets.

ALLIES Batman, the Batman Family, Wally West, Superman, Donna Troy, Nightwings

ENEMIES Blockbuster, Arkham Asylum inmates, Court of Owls

AFFILIATIONS Teen Titans, Titans, Spyral

Dick Grayson has made a name for himself over the years, and on more than one occasion. The original Robin to Bruce Wayne's Batman, Grayson later graduated to the role of Nightwing. After his identity was publicly exposed, he traded in his costume to become a superspy for the covert organization Spyral. Throughout his valiant life, Grayson has proven himself to be one of the most resilient and brilliant crime fighters in the world and a natural leader. His charisma is as potent as his combat skills, acrobatic flair, and deductive gifts. He is a hero's hero who maintains an infectiously positive outlook despite facing much tragedy in his life.

AT A GLANCE...

Running away from the Circus

A popular acrobat and the young star of Haly's Circus' the Flying Graysons, Dick Grayson's life was turned upside down when his parents were murdered during a trapeze performance while visiting Gotham City. Dick was soon taken in by the wealthy Bruce Wayne, becoming his ward.

The first Robin

After Grayson learned that Batman and Bruce Wayne were one and the same, he began to train with the hero and then adopted the identity of the crime fighter Robin. As the youthful counterpart to the Dark Knight, Grayson set the tone for the other Robins who would later follow in his footsteps.

Enter... Nightwing

After leaving Gotham City to team up with other young heroes, Dick Grayson became Nightwing, determined to step out of Batman's shadow. His career later saw him set up camp temporarily in the city of Chicago, where he quickly discovered that vigilantes were quite unwelcome.

CLASSIC STORIES

Star Spangled Comics #65 (Feb. 1947) As Robin, Dick Grayson is awarded his own solo feature, even nabbing the coveted cover spot in his debut.

Tales of the Teen Titans #44 (Jul. 1984) Dick graduates from his position as Robin to become the hero Nightwing during the dramatic storyline "The Judas Contract."

Nightwing (Vol. 2) #1 (Oct. 1996) Grayson sets up shop in the new town of Blüdhaven, earning his own Rogues Gallery in his first ever ongoing series.

Robin: Year One #1-4 (Dec. 2000-Mar. 2001) Dick's past is delved into, documenting his early years as Robin and pitting him against the likes of Mad Hatter and Two-Face.

I Spy

After his secret identity was outed by the invading Crime Syndicate, Grayson was nearly killed by the powerful villains. He took the opportunity to fake his own death and join the spy organization Spyral.

As the juvenile star of popular circus attraction The Flying Graysons, Dick already knew the thrill of defying death at an early age. The only son of John and Mary Grayson—the senior performers in his family's high-wire act for Haly's Circus—Dick was doted on by his parents, and strived to be the best son he could be.

Tragically, Dick was destined to live a life with highs and lows comparable to the rollercoasters on Gotham City's famous Amusement Mile. Nothing struck the boy as deeply as the night when he watched his parents plummet to the ground during their renowned trapeze act. Their equipment had been sabotaged by a low-level mob enforcer named Anthony Zucco, and two of the three Flying Graysons fell to their deaths in front of a packed Gotham City crowd that included billionaire playboy Bruce Wayne. Bruce saw something of himself in Dick and decided to make him his ward. Driven by a thirst for justice to punish the criminals responsible for his parents' death, Dick proved every bit as bright and capable as Bruce believed him to be. To help Dick work through his pain, Bruce revealed his Batman identity to the boy, and gave him access to the Batcave beneath Wayne Manor. Dick had witnessed Zucco threatening the owner of Haly's Circus shortly before his parents' murder and, with Batman's training, soon became the young crime-busting hero Robin, taking the fight directly to crooks like Zucco.

After spending several successful years fighting crime with Batman in the field, Grayson felt the need to spread his wings for a change, working with other young heroes and eventually co-founding the original Teen Titans. Soon after, Dick set out on his own as Nightwing, adopting first a blue-and-yellow costume, and later a red-and-black uniform armored in a similar fashion to the Batsuit worn by Batman. This outfit employed similar devices to the Dark Knight's Utility Belt, including a grappling hook, plus Nightwing's personal touches, such as his weapon of choice, Escrima sticks. When Grayson discovered that Zucco

LEARNING CURVE

Dick had been coached as a circus acrobat since infancy and his dogged determination to avenge his parents made him an ideal candidate for Batman's brutal training regimen.

TEAM NIGHTWING

When the true Nightwing was suffering from amnesia, a group of novice Nightwings sprung up to take his place. Detective Alphonse Sapienza found Nightwing's old bunker hideout, and took four of Nightwing's former costumes from it. He recruited some of his trusted friends—Fire Department Deputy Chief Malcolm Hutch, Detective Colleen Edwards, and her brother in vice, Zak Edwards—and they all became Nightwings. While they did some good, even unknowingly teaming up with the original from time to time, the Nightwings were forced into early retirement when they were trounced by a Talon working for the Court of Owls, before Sapienza was beaten to within an inch of his life by The Joker.

SHADES OF GRAYSON

The Nightwings were: Nightwing Prime (Sapienza), Nightwing Red (Hutch), Nightwing Gold (Colleen Edwards), and Nightwing Blue (Zak Edwards).

RETURN FROM THE DEAD

After Spyril's regime change, and Bruce Wayne's near death at the hands of The Joker, Dick Grayson returned to Gotham City to reveal to the Batman Family that he was indeed alive and well. While Spyril's Agent Zero believed that Grayson was indeed saying his goodbyes to his friends, Dick was secretly delivering a code to his allies, continuing to work against the agency he appeared to serve.

HIT LIST

When Grayson revealed to his friends that he was alive, most took the news well—aside from Red Hood, who was less than happy about being tricked.

was alive and had made a new life for himself as Billy Lester—an aide to Chicago's mayor—Nightwing moved to Chicago for a time, determined to bring Zucco to justice. As fate would have it, Nightwing then had to join forces with his enemy, to battle the greater threat posed by the maniacal villain known as the Prankster. Once they had defeated the costumed criminal, Nightwing was finally able to put Zucco behind bars.

After being kidnapped by the Earth-3 villains, the Crime Syndicate, Nightwing faked his own death for a time, and used the opportunity to join Spyril; a secret organization which kept tabs on the world's superhumans. Unbeknownst to his new employers, Grayson—now called Agent 37—was actually working as a mole for Batman, helping him end Spyril's corrupt regime and ushering in a new era for the agency. However, Nightwing couldn't stay away from the Super Hero life for long, and soon adopted a new blue version of his costume, heading to Blüdhaven to carve out a name for himself. He continues to protect his adopted city to this day, facing threats like Blockbuster, Raptor, and the Court of Owls, but still managing to check in on Gotham City and the Batman Family from time to time.

**"I was Robin.
I was the first."**

DICK GRAYSON

NIGHT HAWK
In every widely differing aspect of his crime-fighting career, Nightwing has hunted villains and criminals like an implacable agent of justice.

REBIRTH

HEAD CASE

During one of Dick's visits to Gotham City, the assassin KGBest shot Nightwing in the head. Dick lost all his memories from his time as Robin and Nightwing, and instead distanced himself from his past life, calling himself Ric. He met Bea Bennett, and the two began to date.

However, Ric discovered that his memories had been altered thanks to the nefarious secret society the Court of Owls, and then were later manipulated again by The Joker. Nevertheless, "Ric" reclaimed his memories, his identity of Dick Grayson, and the mantle of Nightwing, joining Batman in his fight against the Clown Prince of Crime's "Joker War."

ON THE RECORD

One of the oldest and most popular characters in DC Comics' pantheon, Dick Grayson was originally introduced into Batman comics to brighten up the Dark Knight's grim world. Aging over the years along with his audience, Dick continues to uphold that upbeat and uplifting tradition, no matter what his incarnation.

Stalwart sidekick

Debuting only 11 issues after Batman, Robin quickly earned his place as an invaluable ally by proving himself in fight after fight. Unlike many characters that debuted in the Golden Age of Comics in the 1930s and 1940s, Robin's tragic backstory has changed little in the years since, despite continuity-altering events such as *Crisis on Infinite Earths*. Throughout all his incarnations, Dick Grayson was the son of circus aerialists, who was adopted by Bruce Wayne (aka Batman) after his parents were killed by gangster Anthony Zucco. After years of fighting by Batman's side, Robin eventually left the Batcave to attend college at Hudson University.

Return to Gotham City

As Batman gained a new Robin in the form of young hero Jason Todd, Dick Grayson graduated to the title Nightwing, and continued his tenure with the Teen Titans, only rarely making appearances in Gotham City. Finally leaving the Titans, Nightwing headed back home to Gotham City for a while, before once again setting out for new territory, becoming the protector of Gotham City's crime-ridden neighboring town of Blüdhaven. But no matter what Dick accomplished on his own, he would always return to the Batcave. In fact, when Batman was lost in time due to the machinations of the villain Darkseid, Dick valiantly stepped into his mentor's boots as the new Dark Knight, teaming up with the newest Robin, Damian Wayne.

DARK AND LIGHT

Always an optimist and one to make light of nearly any situation, when Dick Grayson stepped into the role of Batman, he made quite the contrast to Damian Wayne, a brooding and troubled young Robin.

TEEN TITANS

A youthful version of the Justice League, the Teen Titans featured Robin as leader from the outset. In the 1980s, when the title was relaunched with new characters, Robin grew more independent than ever, living in Titan's Tower and later changing his codename to Nightwing.

OLYMPIAN GODS

DEBUT *All-Star Comics* (Vol. 1) #8 (Dec. 1941)

BASE Mount Olympus

MEMBERS/ROLE **Zeus:** Sky-God—ruler of the Gods of Olympus; **Hera:** Goddess of Women and Marriage; **Poseidon:** God of the Seas; **Hades:** God of the Underworld; **Demeter:** Goddess of Harvest and Abundance; **Hestia:** Goddess of Home; **Aphrodite:** Goddess of Love, Beauty, Pleasure, and Procreation; **Dionysus:** God of Wine and Revelry; **Hermes:** Messenger God—patron of Thieves, Healers, and Travelers; **Apollo:** God of Light, Poetry, Music, and Herdsmen; **Ares:** God of War; **Artemis:** Goddess of the Hunt; **Athena:** Goddess of Wisdom, Warfare, Inspiration, Justice, Civilization, and Law.

ENEMIES First Born

AFFILIATIONS The Amazons, Atlanteans

The immortal Gods of Olympus are a race of powerful and capricious entities who achieved fame and notoriety in mankind's distant prehistory. Attaching themselves to the tribes of what is now Greece, they began feeding off the worship of mortals.

Their exploits shaped culture and progress as the Gods championed human heroes, propagated monsters, and bred with the lesser creatures who feared and adored them. The result of centuries of dalliance was a race of powerful demi-gods, including Deimos, Enyo, Phobos, Dionysus, Eris, Hecate, Harmonia, Morpheus, Persephone, Triton, Hercules (Heracles), and Diana, the champion known as Wonder Woman.

The Gods constantly squabbled among themselves before growing bored and retreating from the forefront of human affairs. Now they interact with mortals only in secret, when their offspring threaten to cause mischief, or if some cosmic crisis forces them to act in defense of their own lives or interests.

DOWN TO EARTH

Following *Rebirth*, many Olympians became more active on Earth, particularly the war god Ares and Zeus. When Hecate failed in her bid to usurp control of magic, she practically sealed off Olympus, trapping the gods there or in the world of mortals.

ON THE RECORD

Olympians were most commonly seen causing problems for Wonder Woman and the Amazons of Paradise Island. In her first incarnation, Olympian goddesses sponsored the Amazon Princess' battles for America and democracy, but were repeatedly obstructed by the War God and other patriarchal troublemakers. In her 1980s incarnation, Diana's devotion to the Olympian Gods was emphasized, but they still gave her plenty of grief and torment. Her tenacity and nobility, however, led to her joining their pantheon as the Goddess of Truth.

MARS ON THE WARPATH

Wonder Woman and Aquaman tried to stop the God of War—then using the Roman name Mars instead of the Grecian Ares—from inciting conflict between the Amazons and Atlanteans.

DEBUT *O.M.A.C. #1* (Sep.–Oct. 1974)

REAL NAMES Buddy Blank/Kevin Kho

HEIGHT Variable **WEIGHT** Variable

EYES Yellow **HAIR** Blue

POWERS/ABILITIES Power and technical data provided by Brother Eye satellite

ALLIES Myron Forest, Brother Eye, Thorn

ENEMIES Doctor Skuba, Marshal Kirovan Kafka, Cadmus Industries, Checkmate

AFFILIATIONS Global Peace Agency

Shortly before Earth's Great Disaster, Dr. Myron Forest devised a plan to save civilization. Launching Artificial Intelligence satellite Brother Eye, Forest selected clerk

Buddy Blank to receive its power and intel. He became a One-Man Army Corps. O.M.A.C. tackled villains such as Marshal Kafka and Doctor Skuba, but was unable to stave off the fall of humanity and rise of intelligent, all-conquering animals.

After *Flashpoint*, Cambodian geneticist Kevin Kho was forcibly transformed into a superpowered, techno-organic juggernaut—a One-Machine Attack Construct—by rogue AI Brother Eye. A fugitive, this O.M.A.C. joined Justice League International, and fought the Suicide Squad, before plunging through a dimensional portal. He subsequently helped Justice League United battle Nazis.

OLSEN, JIMMY

DEBUT *Superman* (Vol. 1) #13 (Nov.–Dec. 1941)

REAL NAME James Bartholomew Olsen

BASE Metropolis

HEIGHT 5ft 7ins **WEIGHT** 150 lbs **EYES** Green **HAIR** Red

POWERS/ABILITIES Fearless and loyal; skilled photographer with keen deductive instincts and journalistic smarts; possesses a signal watch that only Superman and other metahumans can hear.

ALLIES Clark Kent, Lois Lane, Perry White, Bizarro, Ron Troupe, Steve Lombard

ENEMIES Lex Luthor, Morgan Edge, Regis Tuttle

AFFILIATIONS *The Daily Planet* staff

Jimmy Olsen never wanted a single penny of his unscrupulous parents' vast wealth and donated it all to charity. Eager to prove his worth to the world, he took the first official photographs of Superman, sharing this scoop with his friend and journalistic mentor Lois Lane. The photojournalist cub-reporter quickly struck up a friendship with new *Daily Planet* reporter Clark Kent, who shared his love of computer games and B-movie sci-fi. Despite often getting on each other's nerves, they frequently shared an apartment.

Thanks to his close friendship with Clark—and, independently, with Clark's alter ego, Superman—Jimmy witnessed and documented some of the most catastrophic events in Metropolis' and the world's history, earning the somewhat condescending nickname "Superman's Pal." The relationship has also made him a target for the Man of Steel's enemies, such as Lex Luthor, who once kidnapped and tortured Jimmy just to get Superman's attention. After years of secrecy, as Superman prepared to leave Earth, Clark finally shared his true identity with Jimmy, only to discover the boy had always known. In a feat of devastating logic Jimmy disclosed that only two people ever called him "Jim": Superman and a reporter who looked a lot like him...

ON THE RECORD:

Jimmy graduated from sidekick to comedy foil in his own title in 1954. As frequently as he proved his journalistic talents, he was often transformed in bizarre ways that made him a menace to society. Everything changed in 1970 when Jimmy emerged as a determined, two-fisted investigator, exposing secret cloning projects, New Gods, and re-imagined monsters beside a revived Newsboy Legion. Jimmy had become *The Daily Planet's* crusading Mister Action.

TROUBLE MAGNET:

In the 1960s, Jimmy's curiosity often led him into weird situations. On one occasion he became a rampaging Giant Turtle Man after testing an enlarging ray gun. As always, Superman was on hand to save the day.

OMEN

DEBUT *Teen Titans* (Vol. 1) #25 (Jan.–Feb. 1970)
REAL NAME Lilith Clay
EYES Green **HAIR** Red
HEIGHT 5ft 6in **WEIGHT** 104 lbs
POWERS/ABILITIES Alpha-class psionic with telepathic powers; can blank minds and create psychic projections.
ALLIES Tempest, Mr. Jupiter
ENEMIES Mr. Twister

A member of the original Teen Titans, Lilith served with many later iterations. After team member Herald was forced to wipe the team's memories to prevent

demon Mr. Twister from fully entering the world, Lilith worked as an addiction counsellor. However, Mr. Twister began whispering in her head, reawakening her memories as he plotted to draw her and her teammates back to complete the necessary ritual. When the plot was thwarted by the now-adult heroes, they remained together as the Titans. Lilith became invaluable both for intelligence but also as a combatant. Her psionic powers helped defeat Psimon, H.I.V.E., the Fearsome Five, and crazed future-tyrant Troia. Omen was extensively trained in hand-to-hand combat by teammate Garth (former Aqualad and current Tempest) leading to an intense but brief romantic relationship.

ONIMAR SYN

DEBUT *JSA* (Vol. 1) #23 (Jun. 2001)
REAL NAME Onimar Synn
BASE Thanagar **HEIGHT** 7ft 5in
WEIGHT 480 lbs **EYES** Yellow **HAIR** None
POWERS/ABILITIES Various powers derived from the suffering and fear of others; absorption of souls; creation of mindless thralls.
ENEMIES Hawkman, Hawkgirl, Justice Society of America

Rumored to be one of the legendary Seven Devils of Thanagar, Onimar attempted to take over Thanagar and feed on the souls of its populace. As Sin Eater, he enslaved

the population with Nth Metal, an element found only on Thanagar, and killed thousands, feasting on their souls and transforming them into an undead army. Nth Metal gave Onimar mastery over the four fundamental forces of the universe—strong, weak, gravitational, and electromagnetic.

To save the rest of their people, the high priests of Thanagar kidnapped Hawkgirl, who could summon Hawkman back from the dead through their divine connection. It took the combined might of Hawkman, Hawkgirl, and the JSA to stop the Sin-Eater's undead warriors. Sin-Eater was seemingly destroyed by the power of Hawkman and Hawkgirl's ancient love.

ORANGE LANTERN CORPS

DEBUT *Green Lantern* (Vol. 4) #25 (Jan. 2008)
BASE Larfleezia
MEMBERS Larfleeze; Glomulus; Grubber; Gretti; Ceebiss; Clypta; Nat Nat; Blume; Sound Dancer; Warp Wrap.
ALLIES New Guardians, Lantern Corps
ENEMIES Guardians of the Universe, Green Lanterns, Invictus, Sena the Wanderer, Third Army

Larfleeze is the bearer of the Orange Lantern Ring, which is powered by his bottomless greed—and he does not like to share. While all the other Lantern Corps are made up of multiple members, Larfleeze uses his ring to create his very own Orange Lantern Corps. The ring absorbs his defeated foes and he can summon them forth as Orange energy constructs. These helped Larfleeze to kill the angelic inhabitants of the Orrery (though he was unable to absorb one of them with his ring) and his subsequent conflict with the sole survivor, Invictus.

However, the constructs were not always obedient, and they went out of control after Larfleeze's "pet" Guardian, Sayd, tampered with his ring. Cosmic entity Sena the Wanderer then transformed seven constructs into living beings again, and they turned against Larfleeze as fully fledged Orange Lanterns. He was briefly enslaved by them, before stripping them of their power and marooning them on a distant planet.

AGENT ORANGE

The larcenous Larfleeze would absorb his enemies' personality imprints into his power ring, then summon them as members of his Orange Lantern Corps.

OMEGA MEN

DEBUT *Green Lantern* (Vol. 2) #141 (Jun. 1981)
BASE Vega
NOTABLE MEMBERS Tigorr: Takes beast form; Primus: Mastermind; Broot: Enhanced strength, damage-resistant hide; Scrapps: Proficient gunslinger; DOC: Reformed war robot; Kalista: Swordswoman; Kyle Rayner: White Lantern ring
ENEMIES The Citadel, Pontifex of Changralyn

The Omega Men are fierce rebels who fought to free the planets of the Vega system from the rule of the oppressive Citadel. The motley crew included idealistic

leader Primus, armor-skinned Broot, reformed war robot DOC, and Scrapps, the last survivor of the planet Voorl. When human White Lantern Kyle Rayner visited Vega, the Omega Men captured him and seemingly executed him live on film. In reality, they forced him to join their ranks.

Subsequently, they stole the Citadel Viceroy's spacecraft, "kidnapped" Kalista, Princess of the Bramins of Euphorix, (who was the group's mastermind), and stole a sacred artifact belonging to the pacifist aliens, the Changralyn. The Omega Men also revealed that the Citadel had committed genocide on Voorl to plunder its reserves of the rare mineral Stellarium.

ONOMATOPOEIA

DEBUT *Green Arrow* (Vol. 3) #12 (Mar. 2002)
BASE Gotham City
HEIGHT 5ft 11in **WEIGHT** 180 lbs
POWERS/ABILITIES Stealth; brutally effective killer with a variety of sound-based weapons.
ALLIES The Joker
ENEMIES Robin (Damian Wayne), Green Arrow, Batman, Connor Hawke
AFFILIATIONS Secret Society of Super-Villains

Onomatopoeia is a serial killer who obsessively imitates sounds around him; the last thing his victim likely hears is the word "BANG!" His first high-profile target

was legacy Green Arrow Connor Hawke, who barely survived the assault. When the maniac attacked him in hospital, he was stopped by Connor's father Oliver Queen (the original Green Arrow) and Black Canary.

Onomatopoeia joined the Secret Society of Super-Villains during *Infinite Crisis*, but was considered too unstable for the Suicide Squad. He almost killed Deadshot and freed The Joker from Arkham Asylum to distract Batman, his most prized target. When that failed, Onomatopoeia masqueraded as vigilante Baphomet, gaining Batman's trust before killing Bruce Wayne's lover, Silver St. Cloud. He recently targeted Robin (Damian Wayne) but fell to his superior martial arts prowess and new team of Teen Titans.

ONYX

DEBUT *Detective Comics* (Vol. 1) #546 (Jan. 1985)
HEIGHT 5ft 9in **WEIGHT** 120 lbs
EYES Brown **HAIR** Black with white streak
POWERS/ABILITIES Unarmed combat.
ALLIES Komodo
ENEMIES Green Arrow, Katana, Mask Clan, Shield Clan, Spear Clan

Onyx is the leader of the Fist Clan, a subgroup of The Outsiders organization and one of four "pure" martial clans that facilitated Komodo's plot to conquer Europe.

When Shado, Robert Queen, and Green Arrow attacked the Outsiders' base in Prague to disrupt their plans, Onyx ordered the Fist Clan to kill the intruders, but Katana and the Sword and Axe clans helped the archers.

During the battle, Onyx went to launch a freighter holding a payload that could devastate Seattle. Katana gave chase and they fought a savage duel on the vessel. Onyx offered mercy if Katana relinquished her sword and joined the Fist Clan. Katana replied with a lightning slash that severed Onyx's left arm at the elbow—forcing her to surrender.

Pre-Flashpoint, Onyx Adams was a League of Assassins killer, who turned her back on the League to join forces with Green Arrow, Batman, and the Birds of Prey.

ORDER OF ST. DUMAS

DEBUT *Batman: Sword of Azrael* #1 (Oct. 1992)
MEMBERS/POWERS Saint Dumas: Leader, directly linked to Gnosis' data systems; **Azrael**: (Jean-Paul Valley) Flaming sword, incapacitates foes with a touch by uploading the lchys algorithm into their brains.
ALLIES Mother
ENEMIES Red Robin, Red Hood, Bane

The Order of St. Dumas is a quasi-religious group dedicated to finding the truth of the universe through scientific knowledge. When Red Robin and

Red Hood infiltrated the Order's church in Santa Prisca, they found that it was actually a hi-tech facility patrolled by cybernetic monks. They uncovered evidence that the Order had links to a mysterious underworld figure called Mother. The heroes were then driven off by Azrael, a dangerous fanatic with a lethal touch who believed he was the Order's chosen warrior-angel.

They later visited the Order's HQ, the ancient hidden city of Gnosis, and met "Saint" Dumas. He admitted that Azrael was the product of neural programming, and wanted Red Robin to replace him. Red Robin disabled Gnosis' systems and Dumas fled when Azrael turned against him.

ORION

DATA

DEBUT *New Gods* (Vol. 1) #1 (Mar. 1971)

BASE New Genesis

HEIGHT 6ft 1in **WEIGHT** 195 lbs

EYES Red **HAIR** Red-blond

POWERS/ABILITIES As a New God, Orion is immortal with superhuman physical and mental attributes; his sentient transport platform, called A4, can fly, create teleporting Boom Tubes, locate targets, and fire energy beams; A4's harness can also communicate directly with Orion; his Mother Box creates telepathic links with others' minds, and can block psychic influences.

ALLIES Milan, Highfather, Lightray

ENEMIES Darkseid, Hector Hammond

AFFILIATIONS New Genesis, Council of Eight, Divine Guard, Justice League Odyssey

FACE OF FURY

Orion tries to present a calm face to the world, but when he loses his temper, his warlike, violent Apokoliptian side surfaces.

Orion is the son of Darkseid, evil lord of Apokolips, but he was raised by the benevolent Highfather, ruler of the utopian world of New Genesis. While attempting to uphold the peaceful ideals of his adopted home, he must also contain the rage that is his legacy as the son of Darkseid.

As a child, Orion was sent to live on New Genesis as part of a peace treaty between Darkseid and Highfather. Orion tried to embrace the unfamiliar, placid ways of his new home, but his impulsive nature often got him into trouble.

Orion has had many interactions with Earth's Super Heroes. When the New God's Prophecy Wall indicated that Superman was a threat to all existence, Orion attacked the Man of Steel. However, he realized that the issue was not Superman himself, but villain Hector Hammond, who had taken over Superman's mind. Orion extracted the villain with his Mother Box. Later, Highfather schemed to use the power

of the Lantern Corps to fight Darkseid and sent Orion and the other members of the Council of Eight to acquire power rings from the various Corps. Orion took the Green Lantern power ring belonging to the sentient planet Mogo. This triggered a war between the Lanterns and New Genesis, in which Orion commanded Highfather's Divine Guard.

In the far reaches of space, the ancient Source Wall separates our universe from the unknown. Already damaged during invasion from the Dark Multiverse, the Source Wall was destroyed thanks to the machinations of Lex Luthor and the Legion of Doom. In the destruction, the gods of New Genesis were seemingly absorbed by the Source energy; the Source was calling the New Gods home. Orion managed to escape and traveled to the Ghost Sector, a cordoned-off area of space containing newly freed worlds that had been held prisoner on the planet Colu. Disguised as a masked being named Okkult, to cloak himself from Darkseid's awareness, Orion joined a band of heroes called the Justice League Odyssey to stop his father's plan to rewrite time and give Apokolips control over the Multiverse.

ON THE RECORD

The original Orion shares much of the same background as his post-*Flashpoint* incarnation, but his life is defined by his anger at his evil father, Darkseid. After gaining control of the Anti-Life Equation, Orion managed to seize his birthright as ruler of Apokolips for a time.

Orion then joined fellow renegade Apokoliptian Big Barda in the Justice League of America, helping them defeat the warmongering entity Mageddon. He killed Darkseid in a dramatic battle prior to *Final Crisis*. However, his father returned and fired a special bullet backward in time to dispatch his son.

SIBLING RIVALRY

In a battle of Titanic proportions, Orion fought his brother Kalibak, the eldest son of Darkseid.

JUSTICE LEAGUE ODYSSEY

Orion joined forces with some odd bedfellows—including Red Lantern Dex-Starr, Blackfire, and Green Lantern Jessica Cruz—to thwart Darkseid's scheme to dominate the Multiverse.

SYMBIOTIC RIDE

A4, Orion's sentient transport platform, is more than just a combination vehicle, weapons system, and sensor suite—Orion sees it as a technological extension of himself.

FIGHTING MAD

Orion relishes a battle with a worthy foe—and he faced the challenge of a lifetime when he clashed with Superman himself, who had been possessed by Hector Hammond.

CLASSIC STORIES

***New Gods* (Vol. 3) #2 (Mar. 1989)**

In a dramatic story, Orion confronts his own prejudices as he returns the body of the hero Forager to his people.

ORPHAN

DEBUT *Batman* (Vol. 1) #567 (Jul. 1999) (as Cassandra Cain); *Batman Incorporated* (Vol. 1) #6 (Jun. 2011) (as Black Bat)

REAL NAME Cassandra Cain

BASE Hong Kong

HEIGHT 5ft 5ins **WEIGHT** 110 lbs **EYES** Blue **HAIR** Black

POWERS/ABILITIES Supreme martial artist, augmented by Batman's training, able to read body language and anticipate opponents' attacks.

ALLIES Red Robin, Dick Grayson, Batman

ENEMIES Mother, David Cain

AFFILIATIONS Batman Incorporated, League of Assassins, the Nursery

Cassandra Cain is the daughter of master assassin David Cain, the "Orphan" fixer for manipulative mastermind, Mother. Cassandra was raised in isolation, denied human warmth and contact, subjected to long periods of sensory deprivation interspersed with constant and brutal martial arts training. Her language skills were deliberately impeded to develop an instinctive sense of body-language, enabling her to predict her target's every movement.

This unorthodox training regime contravened Mother's own methods of indoctrinating her stolen children. Cain had intended Cassandra as a gift, but Mother reprimanded him for raising his daughter so inefficiently. Cassandra was banished from Mother's Nursery but continued training in secret.

Traumatized by what she had endured, Cassandra escaped. Freed from Cain's influence, she resurfaced in Hong Kong. Here Batman recruited her, despite Cassandra's experiences rendering her practically mute. After years in the shadows, she emerged as one of Batman's Gotham Knights, reclaiming the name Orphan. As she slowly began making friends—with Spoiler, Harper Row and others—Cassandra was challenged by her mother, Lady Shiva, who wanted to test her capacity for killing. Orphan denied her entreaties and worked with Batman's Outsider team, facing threats such as Kaliber and Rā's Al Ghūl.

ON THE RECORD

Cassandra Cain debuted during the "No Man's Land" saga. She stalked earthquake-shattered Gotham City like a solitary, silent ghost, enforcing Batman's law as the fourth Batgirl.

Upon officially joining the Batman family, her training was in reading, writing, and social interaction, not combat. When she learned the world's greatest killer, Lady Shiva Woosan, was her mother, Cassandra briefly led the League of Assassins, before being legally adopted by Bruce Wayne.

SILENT PARTNER: Despite never having learned to speak, Batgirl developed painfully clear and memorable ways of getting her message across.

ORPHEUS

DEBUT *Batman: Orpheus Rising* #1 (Oct. 2001)

REAL NAME Gavin King

BASE Gotham City

HEIGHT 6ft 2in **WEIGHT** 195 lbs

EYES Brown **HAIR** Black

POWERS/ABILITIES Expert martial artist and gymnast; costume loaded with hi-tech gadgets and weapons including a sonic spike, smoke bombs, and a helmet with advanced vision capabilities.

ENEMIES Black Mask

Young Gavin King dreamed of becoming a professional singer and dancer and was bullied as a result. He studied martial arts to defend himself and proved to be a

natural. After graduating from college, Gavin joined a touring dance troupe, witnessing the horrors and injustices of some of the worst parts of the world firsthand.

He was soon recruited into a secret organization set up to fight society's ills, and given financial help and training, as well as a costume and weaponry. He became Orpheus and fought crime in Gotham City while, by day, working as a record and video producer. He found a reluctant ally in Batman, and also worked with another well-traveled hero, Onyx. All his training and technology proved in vain: Black Mask killed him during a gang war and, to add insult to injury, briefly took his place as Orpheus.

OSIRIS

DEBUT *Teen Titans* (Vol. 3) #38 (Sep. 2006)

REAL NAME Amon Tomaz

BASE Kahndaq

HEIGHT 5ft 10in

WEIGHT 164 lbs

EYES Brown **HAIR** Black

POWERS/ABILITIES Super-strength, flight, superspeed, invulnerability, enhanced stamina.

ENEMIES Famine, Ibac

Amon Tomaz was beaten to near death by Intergang but he was rescued by his sister and Black Adam, the latter sharing his powers with the crippled teenager.

Amon became Osiris and a member of the Black Marvel Family. Traveling to the US with his crocodile Sobek, Osiris briefly joined the Teen Titans, but killed the Persuader after he threatened his sister. Wracked with guilt, Osiris was convinced by Sobek to revert to his Amon form. Sobek then revealed himself as Famine, one of the Four Horsemen of Apokolips, and devoured the powerless Amon.

After *Flashpoint*, Amon was a Kahndaqi teenager without superpowers. A freedom fighter with the Sons of Adam, he translated an ancient spell that resurrected Black Adam, but was killed by Kahndaq soldiers. Adam made short work of the killers and Kahndaq's ruler, installing himself as the country's true protector.

SIBLING RIVALRY

Talia al Ghūl's designer-son refused to do her bidding and dedicated himself to eradicating his biological template Damian Wayne.

OTHER, THE (HERETIC)

DEBUT *Batman and Robin* #12 (Jul. 2010)

HEIGHT 7ft 4in **WEIGHT** 345 lbs

HAIR Black **EYES** Blue/Green

POWERS/ABILITIES Superhuman strength.

ALLIES Talia al Ghūl

ENEMIES Batman, Robin, Nightwing

AFFILIATIONS Leviathan

Talia al Ghūl's vision of a ruling family comprised of her, Batman, and their son Damian broke down when they both rejected her. Talia disowned Damian and created his superpowered clone.

As the Heretic, the clone became Talia's chief bodyguard when she took over the subversive organization Leviathan. He hunted members of Batman Incorporated and killed the real Damian. Developing free will, Heretic challenged Talia, declaring himself Batman: new ruler of Gotham City. The true Batman retaliated and Heretic died at Talia's hand, decapitated and his body blown up in a massive explosion that destroyed Wayne Tower.

Reborn in a Lazarus Pit, he assumed the identity of "the Other," manipulating criminals, murdering villain Lady Vic and targeting resurrected Robin Damian Wayne and his Teen Titans. His tactics included sending alien powerhouse Lobo against them and blowing them up, as well as sinister seduction, offering team members their greatest wishes. The Other seemingly perished in a climactic showdown, swept away in a collapsing castle.

OTHERS, THE

DEBUT *Aquaman* (Vol. 7) #7 (May 2012)

NOTABLE MEMBERS

Aquaman: Amphibious Super Hero; **Operative:** Super spy; **Prisoner of War:** Force field generation; communication with comrades' ghosts; **Ya'Wara:** Jaguar goddess of Amazon; **Sky Alchesay:** Necromancy, teleporting; **Vostok-X:** Magical Atlantean Helmet.

ENEMIES Black Manta, Mayhem

Six years ago, Arthur Curry abandoned life on land to live in the oceans. Before he officially adopted the name Aquaman, he fought with the Others. This diverse group of humans and superhumans banded together to reclaim the dead sea king Atlan's ancient Atlantean artifacts. Aquaman also used the artifacts as bait in his hunt for Black Manta, the man he thought responsible for the death of his father, Atlan.

Joining him on the hunt was the fierce Brazilian fighter Ya'Wara, the precognitive Kahina the Seer, Russian Super Hero Vostok-X, the possessed Prisoner of War, and aging super-spy Operative. Years later, Black Manta killed several of the Others, including the Seer and Vostok-X, before Aquaman brought him to justice.

The Others continued their fight and were later joined by Sky Alchesay, a Native American mystically linked with the Ghost Lands; Kahina's sister Sayeh as the new Seer; and another Vostok-X. This team triumphed over several threats, including the terrorist group Mayhem.

FIGHTING WELL WITH OTHERS

The Others came from very different backgrounds, but found their diverse experiences useful in battle.

OUTLAWS, THE

DEBUT *Red Hood and the Outlaws* #1 (Nov. 2011)

NOTABLE MEMBERS/POWERS

Red Hood: Martial arts, marksman, detective; **Arsenal:** Archery, acrobatics, brilliant mind; **Starfire:** Super-strength, flight, energy projection; **Bizarro:** Imperfect copy of Superman's powers; **Artemis:** Amazonian powers and abilities. **ALLIES** Nanna Gun, Devour, Babe in Arms, Zombie Mom, DNA, Cloud 9. **ENEMIES** League of Assassins, Midas. **AFFILIATIONS** Suicide Squad, The All-Caste, Essence

When Red Hood saw his former sidekick Arsenal imprisoned in the rogue state Qurac, he broke him out of jail with the help of alien powerhouse, Starfire. The trio set up base on an island, where Starfire's spacecraft had originally crashed. As the Outlaws, they embarked on missions, teaming up with the Teen Titans to stop a Joker-inspired riot, and helping Starfire return to her homeland and reconcile, briefly, with her sister, Blackfire. Starfire and Arsenal began a romance, before leaving to pursue separate destinies.

Red Hood, relentlessly pursues criminals and recently united with Amazonian warrior Artemis and lawed Kryptonian clone Bizarro to take down Black Mask, the Penguin, and others. The Outlaws officially hire out as mercenaries, but in their wake, major menaces and political pariahs end up dead or imprisoned. When the Untitled opened a door for demon-lord Trigon to invade Earth, Bizarro battled and apparently killed him.

OUTLAWS REBORN

Red Hood recently returned to his old stomping ground, Gotham City, where he was joined by two new Outlaws.

OUTSIDERS, THE

DEBUT *The Brave and the Bold* (Vol. 1) #200 (Jul. 1983)

BASE Gotham City, Los Angeles, Brooklyn

NOTABLE MEMBERS/POWERS

Batman: Genius detective; advanced knowledge of technology; martial arts expert; **Black Lightning:** Electrokinetic, electric blasts; **Geo-Force:** Geokinesis; **Metamorpho:** Shape-shifting, invulnerability; **Halo:** Light-spectrum-related powers; **Katana:** Wields magical Soul-taker sword; **Looker:** Psionic powers; **Windfall:** Control of winds; **Atomic Knight:** Atomic-powered armor, precognition; **Technocrat:** Hi-tech battlesuit; **Wylde:** Half man, half bear; **Faust:** Sorcerous powers; **Eradicator:** Energy manipulation; **Owlman:** Brilliant detective; **Creeper:** Super-strong Japanese demon with mind-controlling powers; **Freight Train:** Absorbs kinetic energy; **Grace:** Amazonian heritage; **Thunder:** Energy projection; **The Signal:** Enhanced senses, light powers; **Orphan:** Elite fighter, reads body-language; **Sofia Ramos:** Enhanced biology.

ENEMIES Rās Al Ghūl, Karma Kobra Cult, Fearsome Five, Baron Bedlam, Church of Blood

AFFILIATIONS Justice League

The **Outsiders** designation applies to a number of Super Hero teams. The first was a group of heroic misfits united by fate and the Dark Knight during a mission to the nation of Markovia. After foiling a coup by the Super-Villain Baron Bedlam, the team decided to stay together.

In later years it was revealed that Batman's actual intention was to use his squad to investigate Multiversal metals, such as Electrum and Nth Metal, and their connection to exotic Earth locations and metahuman proliferation. After many adventures, they left Batman to branch out with new member, Looker, on the West Coast.

The Millennium event depowered Looker and caused Halo to fall into a coma. The team disbanded, reforming years later when Geo-Force's Markovia was attacked by vampires. Geo-Force later formed his own

Markovia-based Outsiders team (Terra, Wylde, Baroness Bedlam, Knightfall, and Eradicator) during the Doomsday Clock crisis.

Nightwing and Arsenal created another Outsiders. Alfred Pennyworth expanded it with some original members and new players when Bruce Wayne was seemingly eliminated by Darkseid. Recently Batman recalled old allies for a new iteration. Black Lightning and Katana united with Orphan, Signal, and Sofia Ramos as a black ops unit to counter Rās al Ghūl, Karma, and others. After a dispute, Batman ceded the lead role to Black Lightning.

The Outsiders name also applies to a coalition of ancient weapon cults who formed a secret society to eradicate corruption. Sadly, the Fist, Mask, Axe, Spear, Sword, Shield, and Arrow Clans themselves became corrupt and fell into a civil war involving Green Arrow, Shado, and Katana.

OUTSIDER, THE

DEBUT *Detective Comics* (Vol. 1) #334 (Dec. 1964)
REAL NAME Alfred Pennyworth
HEIGHT 6ft **WEIGHT** 160 lbs
EYES Brown **HAIR** Black
POWERS/ABILITIES Master strategist; access to Wayne family fortune; well connected in the underworlds of both Earth-3 and Earth-0.
ENEMIES Justice League, Batman

On Earth-3, a parallel world to the Justice League's Earth-0, evil counterparts of famous Super Heroes ruled as the Crime Syndicate. One of its most devious

leaders was Owlman, aka Thomas Wayne, Jr., Bruce Wayne's older brother. Thomas had his butler Alfred Pennyworth shoot and kill his parents and his brother Bruce.

Later, while trying to defend his master from his archenemy, The Joker, Alfred was infected by an Earth-3 version of The Joker venom, and he developed deathly pale skin and a compulsive laugh as a result.

He took advantage of Darkseid's attack on Earth-0 to make his way there and set up a Secret Society of that world's worst Super-Villains. He then used Pandora's Box to allow the Crime Syndicate to travel to Earth-0, which they then nearly conquered. Alfred was subsequently stabbed to death by Black Manta.

OVERMASTER

DEBUT *Justice League of America* (Vol. 1) #233 (Dec. 1984)
HEIGHT 8ft **WEIGHT** 350 lbs
EYES Yellow **HAIR** None
POWERS/ABILITIES Superhuman strength and endurance; possesses advanced weaponry.
ENEMIES Legion of Super-Heroes, Justice League United

The Overmaster is one of the Justice League's deadliest foes. A self-styled celestial judge, he destroys worlds he considers unworthy. When he reached

Earth, he created the Cadre Super-Villain team to test mankind's Super Heroes. The JLA met the challenge.

Post-*Flashpoint*, Overmaster was part of a new Cadre, hired by Super-Villain Byth to capture Ultra the Multi-Alien. Their quarry was destined to become the cosmic entity Infinitus. To avert this threat, an alternate Earth version of the Legion of Super-Heroes traveled back from the 31st century and joined forces with Justice League United to battle the Cadre. Even Overmaster's vast strength was no match for Mon-El and Saturn Girl, and the plot failed. Post-Rebirth the original Overmaster returned, trying to purchase Prime Earth when it was auctioned by the Slave Dealers of Dhor.

ENEMIES O.M.A.C., Justice League Europe

Wenonah Littlebird was bestowed with superhuman powers by the spirit of her Native American tribe. Opting to use her new abilities to help not just her people, but the

whole world, Wenonah joined the Global Guardians as Owlwoman. She was later brainwashed by Queen Bee, the corrupt ruler of the nation of Bialya, who operated on Littlebird, giving her artificial claws that grow when needed. With the help of Dr. Mist, Owlwoman and the Guardians escaped Queen Bee, establishing their headquarters in the New Dome, in the Pacific Ocean.

Owlwoman helped Wonder Woman defeat the sorceress Circe after she had transformed male Super Heroes into rampaging half-man/half-beast creatures. Owlwoman was also glimpsed during *Infinite Crisis*, battling the O.M.A.C. androids alongside Black Condor.

OZYMANDIAS

DEBUT *Watchmen* (Vol. 1) #1 (Sep. 1986)
REAL NAME Adrian Veidt
BASE New York City; Antarctica
HEIGHT Unknown **WEIGHT** Unknown
EYES Blue **HAIR** Blond
POWERS/ABILITIES Genius intellect, skilled in martial arts with exceptional reflexes
ALLIES Bubastis, Rorschach II
ENEMIES The Comedian, Rorschach
AFFILIATIONS Crimebusters

Adrian Veidt was both extremely rich and extremely clever—the smartest man in the world. He had long been a fan of Alexander the Great, who had won a vast empire at a very young age and cut the supposedly unbreakable Gordian Knot with a swing of his sword. Veidt wanted not only to emulate Alexander, but surpass him. He took the Greek name of a famous pharaoh—Ozymandias—and joined an emerging Super Hero team called the Crimebusters. Becoming disillusioned with the war on crime, Ozymandias retired from the Super Hero game and instead set about monetizing his image in a seemingly endless range of personalized merchandise.

Arrogance and hubris led Ozymandias to pursue the goal of world peace by uniting warring nations against a common threat—one which he had secretly created. He devastated New York City by teleporting a vast creature onto its streets that people believed to be an alien invader. Millions were killed. Although at first his plan seemed to work, the publication of his former associate Rorschach's journal exposed Ozymandias for what he really was. Later, Ozymandias traveled to another Earth inhabited by Super Heroes and Super-Villains to search for Doctor Manhattan. He also wanted to discuss his plans with Lex Luthor and Bruce Wayne, whom he understood to be the smartest people on their Earth. However, Doctor Manhattan sent him back to his own reality, where he was imprisoned.

LOOK ON MY WORKS
 Ozymandias believed that there was no challenge beyond him, and no means too brutal to be justified by an end. He created a verdant garden at his base in the frozen Antarctic, but thought nothing of destroying all the life in it when it suited him.

PANDORA

DEBUT *Flashpoint* (Vol. 2) #5 (Oct. 2011)

BASE Mobile

EYES Blue **HAIR** Purple

POWERS/ABILITIES Immortality, super-strength, speed, and durability; magic focused through her pistols; highly advanced martial arts skills, especially in conjunction with throwing knives and Kusarigama chain-sickle; manifests mystical Light Armor.

ALLIES The Flash, Phantom Stranger, John Constantine, Vandal Savage

ENEMIES Seven Deadly Sins, The Outsider, Crime Syndicate, The Blight, Nick Necro, Felix Faust

AFFILIATIONS Trinity of Sin, Circle of Eternity, Justice League Dark

Ten millennia ago in Macedonia, Pandora was tricked into opening a strange mystic receptacle, releasing Seven Deadly Sins into the world. These spirits possessed her tribe and kin, making them kill each other in a terrifying display of malign corruption. For her "transgression," Pandora was condemned to immortality by the divinities of the Council of Eternity: doomed to forever wander Earth, personally experiencing the horrors her actions unleashed upon humanity. The Council called her the "mother of monsters," and every effort she made to counter the Sins' atrocities just resulted in greater torment for their prey. Eventually, resolving to battle the Sins directly, Pandora began capitalizing on her curse. She already possessed unnatural physical advantages of enhanced strength, speed, and invulnerability, and now she boosted her might by studying martial arts and magic, and constantly upgrading the weaponry she carried.

Ultimately, the Wizard of Shazam—the last survivor of the Circle of Eternity—apologized for the injustice they had inflicted upon her. He also hinted that an alliance with humanity's Super Heroes held the key to defeating the Sins and her gaining some peace of mind.

After defeating the Phantom Stranger—who demanded she return the mystical box she could not be trusted with—Pandora steadfastly continued hunting the Sins and uncovered Doctor Manhattan's timeline alterations. However, before she could alert Prime Earth's Super Heroes, she was disintegrated by the atomic interloper.

STEPS TO HEAVEN
Pandora, the Phantom Stranger, and the Question had been judged as humanity's greatest sinners before their individual paths of atonement reunited them in a perpetual battle to protect humanity from supernatural horror.

PANTHA

DEBUT *New Titans* (Vol. 1) #73 (Feb. 1991)

REAL NAME Rosabelle Mendez

BASE Metropolis

HEIGHT 6ft 8in **WEIGHT** 125 lbs

EYES Red **HAIR** Auburn

POWERS/ABILITIES Superhuman speed, strength, reflexes, agility, leaping; accelerated healing, fangs, and retractable claws.

ENEMIES Wildebeest Society, Jericho, Catwoman, Orion, Superboy-Prime

Abducted by the insidious Wildebeest Society, Rosabelle Mendez became part of their program to create metahuman soldiers. She escaped, but was

permanently transformed into a ferocious were-creature. With no memory of her past, and unsure if she was more cat or human, Pantha found refuge with the Teen Titans, becoming a powerful, if outspoken, asset. She constantly antagonized her teammates, such as Starfire and Flamebird. If no villains were handy, she was happy to scrap with her new friends. Pantha grudgingly cared for another of Wildebeest's genetic experiments—super-strong toddler Baby Wildebeest. She gradually retired from the Super Hero scene, but returned to the Titans during the *Crisis on Infinite Earths*, when she died battling Superboy-Prime.

PARALLAX

DEBUT *Green Lantern* (Vol. 3) #50 (Mar. 1994)

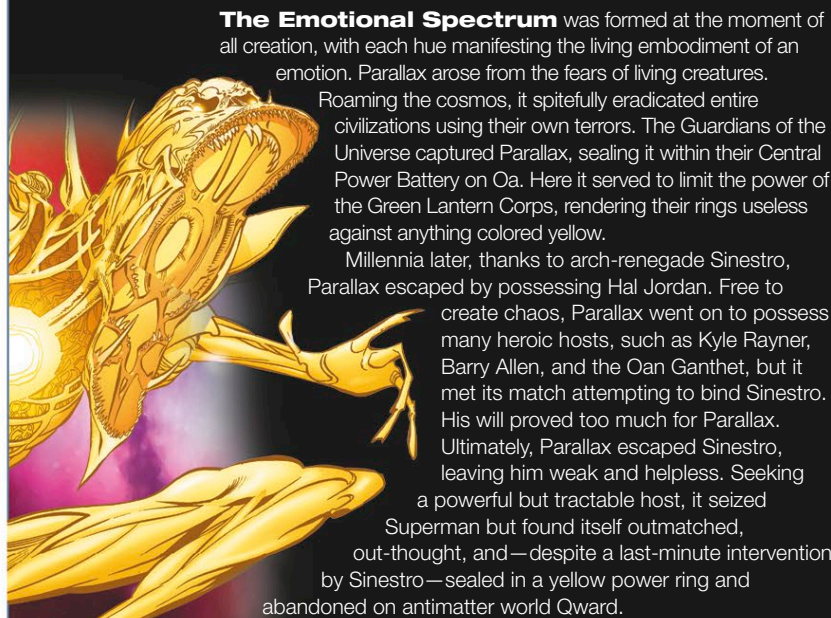

BASE Qward, Antimatter Universe

HEIGHT Variable **WEIGHT** Variable **EYES** Yellow **HAIR** None

POWERS/ABILITIES Immortality, possession, mind-control, energy-generation, time-manipulation; projection of fear, from anxiety to insane terror.

ENEMIES Sinestro, Superman, other embodiments of the Emotional Spectrum, Green Lantern Corps, Krona

AFFILIATIONS Emotional Spectrum, the Anti-Monitor

The Emotional Spectrum was formed at the moment of all creation, with each hue manifesting the living embodiment of an emotion. Parallax arose from the fears of living creatures.

Roaming the cosmos, it spitefully eradicated entire civilizations using their own terrors. The Guardians of the Universe captured Parallax, sealing it within their Central Power Battery on Oa. Here it served to limit the power of the Green Lantern Corps, rendering their rings useless against anything colored yellow.

Millennia later, thanks to arch-renegade Sinestro, Parallax escaped by possessing Hal Jordan. Free to create chaos, Parallax went on to possess many heroic hosts, such as Kyle Rayner, Barry Allen, and the Oan Ganthet, but it met its match attempting to bind Sinestro. His will proved too much for Parallax. Ultimately, Parallax escaped Sinestro, leaving him weak and helpless. Seeking a powerful but tractable host, it seized Superman but found itself outmatched, out-thought, and—despite a last-minute intervention by Sinestro—sealed in a yellow power ring and abandoned on antimatter world Qward.

ON THE RECORD

Hal Jordan lapsed into despondency when his loved ones died in the destruction of Coast City. This finally allowed Parallax to take possession of him. It had entered his mind years previously when Hal entered the Central Power Battery on Oa, but it had been unable to overcome the human's iron willpower until tragedy derailed his thought processes. The composite Parallax creature quickly destroyed the Green Lantern Corps and almost ended all creation.

YELLOW FEVER
Parallax's presence bestowed enormous power, but it also caused paranoia and insanity.

PARASITE

DEBUT *Action Comics* (Vol. 1) #340 (Aug. 1966)

REAL NAME Rudy Jones

BASE Suicide Slum, Metropolis

HEIGHT Variable

WEIGHT Variable

EYES Green

HAIR None

POWERS/ABILITIES Life-energy absorption; temporary metahuman-power absorption; size and shape alteration.

ENEMIES Superman, Firestorm, Superboy (Jon Lane Kent), Justice League of America, Lois Lane

AFFILIATIONS Dr. Torval Freeman, Suicide Squad, Secret Society of Super-Villains

THE BLOB: Josh had seen some incredible things on the streets of Metropolis, but the escaped alien snot-monster was something else.

called Joshua Michael Allen crashed into a protoplasmic monstrosity in the street. Blinded by road rage, he attacked the slimy green blob and suffered a huge electric shock from downed power lines. While he was being diagnosed at S.T.A.R. Labs, the machinery triggered a ghastly mutation, and Joshua accidentally killed the doctors by draining their life-force.

His Parasite is obsessed with leeching metahuman might. He's a deadly predator casually consuming mere mortal morsels while planning his next attack. After serving on the Suicide Squad, he hired himself out to the villainous plutocrat Sebastian Stagg to feast on the Terrifics' powers.

Rudy Jones is also still active, clashing with the monster Damage, Suicide, and latterly Superman, in a climactic clash that saw the life-leech seemingly drained of all power, stolen or otherwise.

FEEDING FRENZY

Superman's superpowers were a nice appetizer, but the Parasite wanted to eat the Man of Steel.

The Parasite is a power-leech, voraciously absorbing various forces—but especially life-energy—to survive. He has been many people. The first was petty criminal Raymond Maxwell Jensen. This Parasite died during *Crisis on Infinite Earths*, but he was recreated by Darkseid in the amalgamated universe that remained.

Here S.T.A.R. Labs janitor Rudy Jones was exposed to strange radiation and mutated into a ravenous monster, hungry for life-energy. After being captured by Firestorm and the Suicide Squad, he was experimented on at Belle Reve penitentiary, which gave him the ability to absorb all forms of energy. He further mutated after battling Superman. When Jones absorbed Dr. Torval Freeman, he was unable to "digest" the scientist's mind and they constantly warred for control of their single body. Ultimately, Jones' personality won.

Superman villain Ruin later created two teenaged Parasites from runaways Alex and Andrea Allston.

After *Flashpoint*, an obnoxious bike messenger

ON THE RECORD

The Parasite has changed many times since his Silver Age debut. Originally, Raymond Jensen was exposed to radioactive waste and became a walking sponge who absorbed Superman's powers until they were roughly equals. However, as decades passed, the character became a far darker, deadlier, and more primal menace.

Memories and life-force became the favorite fodder for the monstrous creature, who could become Superman's physical equal but never his mental match.

CONSPICUOUS CONSUMPTION No iteration of the Parasite has ever listened to the wise old adage about not playing with your food.

DEBUT *Crisis on Infinite Earths* (Vol. 1) #1 (Apr. 1985)

REAL NAME Kell Mossa

BASE Metropolis

HEIGHT 5ft 11in **WEIGHT** 165 lbs

EYES Black **HAIR** Purple

POWERS/ABILITIES Immortality, invulnerability, teleportation, flight; vast technological and medical knowledge.

ENEMIES Anti-Monitor, Alexander Luthor

Kell Mossa was the greatest scientist of New Earth, but he was cursed with an insatiable hunger for knowledge. Using antimatter as a power-source,

he arrogantly tried to discover the origins of the universe. His actions roused the Anti-Monitor, causing the monster to begin its eradication of the infinite Earths of the Multiverse. As a result, Mossa became a cosmic Pariah, fated to arrive in each universe just before its destruction. He tumbled from one dimension to another, warning each Earth's heroes to unite or die.

With the *Crisis* averted and the Anti-Monitor defeated, Mossa retired, assuming his penance was over. However, another *Infinite Crisis* began and Pariah was murdered by his supposed ally, Alexander Luthor of Earth-3.

REAL NAME Linda Jasmine Park-West

BASE Keystone City

HEIGHT 5ft 6in **WEIGHT** 120 lbs

EYES Brown **HAIR** Black

POWERS/ABILITIES Keen deductive skills and journalistic training.

ENEMIES Frances Kane, Zoom (Hunter Zoloman), Kobra Cult, Mirror Master

Fed up with fronting puff-pieces, television reporter Linda Park changed tack to carve out a reputation as an investigative journalist. One early scoop was interviewing Wally

West, the latest speedster to call himself The Flash. They became a couple and eventually married, but two children later, Linda refused to allow herself to be a sidekick or shadow.

Her work enraged villains like Kobra, Mirror Master, and Gorilla Grodd, but her greatest threat was Zoom, who wanted to kill her to make Wally a better, tragedy-honed, hero. Zoom was defeated by their love, but when Wally was seemingly excised from reality by Doctor Manhattan, she forgot him. When he returned, Linda treated him like a crazy stranger. Eventually, she dated him, but the magic was never rekindled, and Wally went mad from grief, sparking the atrocity at the Sanctuary, the Super Hero mental health facility.

DEBUT *Swamp Thing* (Vol. 2) #47 (Apr. 1986)

BASE The Grove

NOTABLE MEMBERS/POWERS All members of the Parliament possess plant-based physiology and powers and can control all forms of plant life.

Swamp Thing (Alec Holland); **Yggdrasil**: First elemental; **Tuuru**: Second elemental; **Eyam**: Third elemental; **Bog Venus**; **Ghost Hiding in the Rushes**; **Kettle Hole Devil**; **Saint Columba**; **Albert Hollerer**; **Great Uri**; **Jack in the Green**; **Lady Jane**

ALLIES Parliament of Limbs

ENEMIES The Parliament of Decay, The Parliament of Flowers

The elemental Swamp Thing

is an avatar for the Green, the mystical force that unites plant life across and beyond Earth. Alec Holland is the last of countless Green agents. Some former avatars comprised The Parliament of Trees, a linked collective with great wisdom and the ability to bestow power upon the current avatar. Older than mammals, the Parliament was the congress of all past Swamp Things.

When Alec Holland was murdered by Anton Arcane, his body rotted in the swamp before he could begin his destined role as Green avatar. The Parliament was patient and careful, waiting years before Alec resurrected. It was longer still before he came to accept his destiny. Former Swamp Thing and Parliament member, A.H. Rodgers visited Holland to make him see the danger of a world without an avatar, and Alec finally agreed to become the Swamp Thing.

Holland later abolished the Parliament after they punished him for not murdering Floronic Man Jason Woodrue, the Seeder.

When The Otherkind returned to the Multiverse and witch goddess Hecate tried to rewrite the rules of magic, she destroyed The Parliament of Trees through her agent Black Orchid and replaced it with a more voracious and militant Parliament of Flowers.

GREEN ARMY

To combat the forces of the Metal and their leader, Lady Weeds, Swamp Thing led a troop of former avatars of the Green onto the battlefield.

ON THE RECORD

The Parliament of Trees was first introduced in the 1980s when they met an earlier version of Swamp Thing, who, for a time, believed he was actually Alec Holland. Some of these members included:

Yggdrasil, an elemental based on the DNA helix; Eyam, a former trilobite; and Tuuru.

The Parliament was responsible for the birth of the Swamp Thing that predated the true Alec Holland version, as well as the source of his daughter Tefé's powers.

It was also notable for fighting a battle with another collective consciousness, this one known as the Grey.

THE PARLIAMENT IN ACTION

Tefé was the daughter of the Swamp Thing, who once believed he was Alec Holland, and his love, Abigail Holland. Abigail had been implanted with a new plant elemental called the Sprout, created by the Parliament.

POWERS/ABILITIES Superhuman strength, ability to stay alive despite injuries.

ALLIES Abigail Arcane

ENEMIES Anton Arcane, Swamp Thing

Gregori Arcane lived a tormented life. When his abusive brother Anton was apparently killed in World War II, Gregori could finally get on with his life, but it

spiraled downward. His wife died giving birth to their daughter, Abigail. Years later, Abigail went missing and, while searching for her, Gregori stumbled onto a minefield and was killed. Anton, who had survived the war, found Gregori's body and reanimated it with magic and science. Now the misshapen Patchwork Man, Gregori sought vengeance against Anton, but was imprisoned in his dungeon. Accidentally freed, Gregori searched for his now-adult daughter, later sacrificing himself to save her.

A second Patchwork Man, Elliot "Lucky" Taylor, was stitched together after stepping on a mine. Incredibly strong and practically invulnerable, he was the Creature Commandos' resident powerhouse.

POWERS/ABILITIES Expert hand-to-hand combatant; proficient marksman; adept pilot.

ENEMIES Eclipso, The Reach, Dominators, Durlans, Psions

AFFILIATIONS Checkmate, Inferior Five

At age five, Christopher Schmidt saw his father's suicide. The Austrian Nazi Party member had been facing trial for war crimes.

Christopher's mother

took her son to America, where he later enlisted in the US Army. After a court martial for leading a unit that massacred an entire village, he was offered early release if he joined the program Project: Peacemaker.

Christopher showed promise as an elite soldier, but the project was defunded. Establishing the Pax Institute in Geneva, he started his own version of the project, fighting for justice to atone for his family's sins. He was later apparently killed by Eclipso, before mysteriously returning to aid the Blue Beetle (Jaime Reyes).

Following a Dominator-led invasion of Earth, he was captured and experimented upon by alien metagene researchers before breaking free and escaping.

DEBUT *Detective Comics* (Vol. 1) #501 (Apr. 1981)

ALSO KNOWN AS Penny-Two, Tuxedo One

BASE Gotham City

HEIGHT 5ft 8in **WEIGHT** 129 lbs

EYES Brown **HAIR** Black

POWERS/ABILITIES Highly trained special agent and marksman; efficient strategist.

While investigating crime boss Carmine Falcone in Hong Kong, Batman met an agent of the British Special Reconnaissance Regiment (SRR).

He discovered that she was none other than Julia Pennyworth, estranged daughter of his butler, Alfred. He took her back to Wayne Manor to recover from a stabbing, and she reconciled with her father. Adopting the codename Penny-Two, Julia helped Batman from the relative safety of the Batcave.

When Batman was reported killed by The Joker, Julia worked with the G.C.P.D.'s Batman Task Force as Julia Perry. She assisted Police Commissioner Jim Gordon during his tenure as Batman.

Julia performed the same function for Batwoman Kate Kane, but they quarreled when Kane discovered Julia reporting on her to Batman. They later reconciled and Julia now supervises the care of Batwoman's disturbed sister, Beth.

The two groups later found themselves unlikely partners, uniting against the Force of July and insane former associate, Fusion. Hammer and Sickle defected, and the remaining members fought the Suicide Squad alongside new member Stalnoivolk. Regularly decommissioned and recreated, the taskforce changes rosters with each new Premier. The mismatched team was gathered again most recently to counter the rumored threat of American artificial Metahuman proliferation, as seemingly revealed in *Doomsday Clock*.

PENGUIN, THE

DATA

DEBUT *Detective Comics* (Vol. 1) #58 (Dec. 1941)

REAL NAME Oswald Chesterfield Cobblepot

BASE Gotham City

HEIGHT 5ft 2in **WEIGHT** 175 lbs **EYES** Blue **HAIR** Black

POWERS/ABILITIES Brilliant and ruthless strategist; has connections in nearly every faction of the Gotham City criminal underworld; weapons include deadly penguin-themed inventions and a variety of trick umbrellas.

ALLIES Lark, Mr. Toxic, Hypnotic, Mr. Combustible, Black Mask, Great White Shark

ENEMIES Batman, the Batman Family, Black Canary, Emperor Blackgate

Oswald Cobblepot has been known as “The Penguin” for most of his life. First teased with the name as a child, he later embraced it, turning the mocking insult into a moniker fearfully whispered in the darkest corners of Gotham City. Hailing from a rich family with a history of corruption, The Penguin lived up to his legacy. He became a crime boss who is only kept in check by another feared Gotham City figure—Batman.

BAD EDUCATION

At boarding school, Oswald was defended from bullies by family friend Carter Winston, who would grow up to become Governor—and a thorn in Penguin's side.

While ridiculed by his peers, brothers, and even his cruel father, Oswald was doted on by his mother, who called him her “beautiful boy.”

With only pet birds to keep him company, and a brilliant mind for technology and strategy, Oswald began plotting against those who had wronged him. He was soon responsible for not only the deaths of his three brothers, but also his father, who died of pneumonia. While appearing innocent in the eyes of the law and his mother, Oswald had a hand in all these deaths. However, after his father's passing, Oswald was forced to carry an umbrella with him at all times by his mother, who was terrified of losing her last son to the same fate that had claimed her husband.

With the Cobblepot name not as esteemed as it once was, Oswald embarked on a criminal career. He used whatever authority remained in his family legacy to position himself at the head of the Gotham City underworld. He soon had his hands in everything from jewelry theft to illegal weapons trafficking. He also opened the Iceberg Casino, a floating ice-themed nightclub as a legitimate cover. Now he was able to rub elbows with criminals and Gotham City's elite, adding more infamy to the Cobblepot name.

ON THE RECORD

While mostly glossed over in modern retellings of The Penguin and his origins, the original version of the so-called Foul Fiend, who debuted in the 1940s, had very different methods to the modern day incarnation. While both show a penchant for umbrella weaponry and Penguin-inspired technology, the original Penguin was much more hands-on when it came to taking on the Batman. He'd often physically challenge the Dark Knight during his many robbery attempts, besting the hero on several occasions with his trick weaponry.

It wasn't until the 1990s that The Penguin evolved into the now familiar Machiavellian crime boss, gaining much power and prestige during the *No Man's Land* event.

KING PENGUIN

In one audacious scheme, The Penguin kidnapped the young Peeble IV, ruler of the nation of Swawak, to gain control of the boy's kingdom.

CONCEALED WEAPONS

Though much more comfortable dealing in stolen goods from behind a desk, The Penguin is not afraid to use his lethal trick umbrellas in a fight.

DEBUT *Batman* (Vol. 1) #16 (Apr./May 1943)

REAL NAME Alfred Pennyworth, aka Penny One

BASE Gotham City

HEIGHT 6ft

WEIGHT 160 lbs

EYES Blue

HAIR Black

POWERS/ABILITIES Expert with the Batcomputer; highly intelligent and brilliant strategist; capable detective; accomplished actor with skills in makeup and wardrobe; skilled surgeon with military training.

ALLIES Batman, the Batman Family, Julia Pennyworth

ENEMIES Arkham Asylum inmates, Hush, Bane

AFFILIATIONS The Robin movement

Every hero needs a right-hand man, and Alfred Pennyworth was precisely that for the Dark Knight of Gotham City. Formerly Thomas and Martha Wayne's butler, Alfred stayed on at Wayne Manor after they were murdered during a mugging, serving as a guardian for their young son, Bruce. Alfred remained Batman's most loyal confidant, not only keeping Bruce's daily life on track, but also aiding the Dark Knight on his crime-busting missions from the safety of the Batcave.

DUTY OF CARE

Bruce had no interest in replacing his father after Thomas Wayne's death. But the solitary orphan found a loving surrogate father figure in Alfred.

Alfred was an actor with a military background whose life changed dramatically when he took over his father's duties at Wayne Manor. Jarvis Pennyworth had been the primary butler to Thomas and Martha Wayne and had doted on their young son Bruce. Jarvis' fate was sealed when he ignored a message from corrupt secret society the Court of Owls to drive Martha to be dealt with. Angry that the butler had refused to carry out their

orders, the Court sent one of their Talon assassins to murder him. Alfred never received the warning letter that his father had penned to him and he took over the position in the Wayne household. When Thomas and Martha were murdered by criminal Joe Chill, Alfred tried his best to raise Bruce in a secure environment. However, as Bruce grew older, Alfred became concerned at his charge's obsessive determination to make a difference in Gotham City.

Bruce traveled abroad to prepare for his vigilante mission. When he returned home, Alfred was there for him. Alfred didn't always approve of Bruce's life as a crime fighter, but he remained loyal, even operating the Batcomputer in the Batcave beneath Wayne Manor. When Batman's ally, James Gordon, took over Bruce Wayne's Batman role, Alfred took it upon himself to organize the Robin vigilante movement in Gotham City.

Later, Bruce returned as Batman, and Alfred was caught up in the action when Bane took over Gotham City. While Batman and Catwoman were away, Bane broke into Wayne Manor. He snapped Alfred's neck in front of Robin to demonstrate that the Batman Family was not welcome in his city. Batman later overcame Bane, but has not yet overcome his heartache at losing Alfred, the man whom he had come to view as a second father.

ON THE RECORD

When Alfred debuted in 1943, he looked little like his modern-day counterpart. He was a rather large man, clumsy and bumbling, whose last name was Beagle, as revealed in a 1945 issue of *Detective Comics*.

Alfred slimmed down during the latter part of the 1940s and by 1969 he had gained a new surname—Pennyworth—and was well on his way to being the butler known by readers everywhere.

Years later, in 2005, it was revealed that Alfred had indeed been named Alfred Beagle, but had changed his name while working as an agent for Her Majesty's Secret Service, MI6. There was clearly more to Alfred than met the eye.

SUBSTITUTE PARENTS

The two people who primarily raised young Bruce, Alfred and the Wayne family doctor Leslie Thompkins, had a romance. Their relationship was explored in post-*Crisis* stories.

BEWARE OF THE BUTLER With his military background, Alfred didn't quite share Batman's anti-gun stance. However, he respected Bruce's beliefs on weapons, and never questioned them.

GENTLEMAN'S GENTLEMAN Alfred Pennyworth was privy to the greatest secret in Gotham City: the identity of Batman. Alfred treated the driven Bruce Wayne like the son he never had, and only wished to see his master happy and healthy.

CLASSIC STORIES

HEIGHT 5ft 11in
WEIGHT 138 lbs
EYES Green
HAIR Black
POWERS/ABILITIES Able to discover an enemy's worst fear and manifest it inside his or her mind; capable hand-to-hand combatant.
ENEMIES Blue Beetle, Brutale, La Dama

Before the *Flashpoint* event, Phobia was a recurring enemy of the Teen Titans. She later reappeared, her past shrouded in mystery, to fight a new foe: Blue Beetle

Jaime Reyes. A Super-Villain for hire, Phobia first encountered Reyes when she and several other members of the Brotherhood of Evil were seeking an ancient artifact called the Blue Beetle.

Said to have been originally discovered in a Mayan Pyramid, the Blue Beetle was prized by Phobia's employers, the Brain and Monsieur Mallah. During her efforts to obtain the item, Phobia was attacked by rival Super-Villains hired by the crime boss La Dama. In the ensuing chaos, the Blue Beetle fell into the hands of Jaime Reyes, who was transformed by the artifact into the Super Hero of the same name.

PHOBOS

DEBUT *Wonder Woman* (Vol. 1) #183 (Jul.–Aug. 1969)
BASE The Netherworld
HEIGHT 7ft 7in **WEIGHT** 459 lbs
EYES Red **HAIR** Flaming red
POWERS/ABILITIES Olympian god able to physically manifest an enemy's greatest fear; essentially invulnerable.
ALLIES Eris, Deimos, Circe
ENEMIES Wonder Woman, Batman, Ares
AFFILIATIONS Olympian Gods

Phobos is the God of Fear and twin brother of Deimos, God of Terror. The malevolent son of Ares, Phobos infamously attempted to help the God of War ignite World War

III and destroy the Earth, before being stopped by Wonder Woman.

Phobos constantly orchestrates events to spread fear and he once merged with the villain Scarecrow before combining his body with the Dark Knight. Phobos' sister, Eris, inhabited Poison Ivy, and Deimos merged with The Joker, requiring the combined efforts of Wonder Woman and Batman to defend Gotham City from the siblings' threat.

The twins have also merged together to impersonate their father. Believing Amazons were specifically created to imprison their father, they sought the location of hidden Themyscira and planned to release him.

PIED PIPER

DEBUT *The Flash* (Vol. 1) #106 (Apr.–May 1959)
REAL NAME Hartley Rathaway
BASE Central City
HEIGHT 5ft 10in
WEIGHT 158 lbs
EYES Blue **HAIR** Red
POWERS/ABILITIES Brilliant engineer with augmented hearing; electronic flute induces mind-control, force-fields, and destructive vibrations.
ALLIES David Singh, The Flash, The Rogues
ENEMIES Gorilla Grodd

Hartley Rathaway was born deaf and his rich parents shunned him even after doctors fixed his hearing. However, Hartley had become obsessed with music

and the wonders of acoustic science. He created incredible inventions and—afflicted by years of filial neglect and realizing he was gay—became flamboyant, attention-seeking Super-Villain Pied Piper. Hartley battled The Flash and joined The Rogues, before reforming and turning to writing music.

Hartley occasionally reanimated his Pied Piper identity, battling threats such as Grodd's super gorilla invasion and helping Lisa Snart (Golden Glider) out of a coma caused by an exploding Genome Recorder. However, Rathaway is generally content to enjoy semi-retirement building his relationship with police crime-lab director David Singh.

PLANETEERS, THE

DEBUT *Real Fact Comics* #16 (Sep.–Oct. 1948)
NOTABLE MEMBERS Col. Tommy Tomorrow; Gen. Vurian of Venus; SCO Hega; Capt. Brent Wood; Capt. Lenk; Cadet Hjarjo; Cadet Lo-Duey of Mars.
ALLIES Interplanetary Zoo, Operation Noah's Ark
ENEMIES Chardu of Mercury, Dr. Suvu of Jupiter, Dr. Klik, Nkolo, Prime Minister Bsorbo of Roukar
AFFILIATIONS Super Sons, Takron-Galtos

Prior to *Flashpoint* the Planeteers was a multispecies organization created on Earth. Planeteers graduated from the Planeteer Academy before being trained in science, detective work, and military tactics.

In essence a space navy, the Planeteers patrolled space lanes, facilitated trade, explored uncharted regions, took rescue missions, and rooted out space pirates.

After *Rebirth*, the Planeteers became an intergalactic peacekeeping force. Based on the space station Tolerance, they administered their brand of justice in a heavy-handed way. After Doctor Manhattan's apparent time-tampering was unraveled in the *Doomsday Clock* affair, the original Planeteer set-up returned as a place for kind sentients to contribute to. This sadly did not include Rose Forrest, who applied, desperate to remove her alter ego, Thorn, from 25th-century Earth.

PLASMUS

DEBUT *New Teen Titans* (Vol. 1) #14 (Dec. 1981)
REAL NAME Otto von Furth
BASE Paris, France
HEIGHT 6ft 4in **WEIGHT** Variable
EYES Yellow **HAIR** None
POWERS/ABILITIES Malleable body; radioactive; acidic death-touch.
ALLIES Warp, Phobia, Secret Society of Super-Villains
ENEMIES Teen Titans, Blue Beetle

Trapped in a cave-in, German miner Otto von Furth spent several days exposed to unknown radiations before being rescued. As he lay dying, he was abducted from

hospital by Nazi war criminal General Zahl. The General saved Otto by mutating his body further, until it stabilized as an amorphous mass of acidic, super-heated protoplasm. Now a living terror weapon, Otto called himself Plasmus and joined Zahl in the Brotherhood of Evil, even staying on with the group when his re-creator perished in battle.

Plasmus joined his occasional allies Warp and Phobia in the Secret Society of Super-Villains. He also robbed banks and corporations, claiming to be amassing loot from the kinds of institutions he held responsible for his monstrous state.

PHANTOM STRANGER

DATA

DEBUT *Phantom Stranger* (Vol. 1) #1 (Aug.-Sep. 1952)

REAL NAME Judas Iscariot

HEIGHT 6ft 2in **WEIGHT** 185 lbs **EYES** White **HAIR** Grey/White

POWERS/ABILITIES Immortality; skilled magic-user capable of flight, teleportation, energy-projection, invisibility, transformation, size-alteration, and the ability to stop time.

ALLIES Pandora, The Question, Chris Esperanza, John Constantine, Jim Corrigan, Doctor Terrence Thirteen

ENEMIES The Spectre, Haunted Highwayman, Sin Eater, Sons of Trigon

AFFILIATIONS Trinity of Sin, Council of Wizards, Justice League Dark

The Phantom Stranger is eternally atoning for committing the greatest sin in human history: Betraying Jesus the Messiah to the religious authorities in exchange for 30 pieces of silver. In despair at his treachery, Jesus' former disciple, Judas Iscariot, tried to kill himself, but was brought before a Council of Wizards. He was deemed to be part of a Trinity of Sin—along with Pandora and The Question—and given a harsh punishment.

IN MYSTERIOUS WAYS His noble intentions led to death and disaster, but Phantom's Stranger's failure was preordained to revive the Spirit of Vengeance when Earth needed him most.

As the Phantom Stranger, Judas wandered the Earth for centuries, seeking to atone for his crime. Unable to pause for long or enjoy human company, he roamed, waiting for the Voice to command him again.

The Voice later told the Phantom Stranger to help ex-Gotham City police detective Jim Corrigan save his kidnapped fiancée, Gwen. The Stranger found Gwen, but unknowingly led the detective into a trap, and both Corrigan and Gwen were killed. The Voice imbued Corrigan's soul with the Spirit of Vengeance and he became The Spectre. The Spectre accused the Phantom Stranger of betrayal and would have destroyed him, had the Voice not intervened. The curse of treachery still lay heavy upon the Phantom Stranger, but his necklace now held one less coin.

More recently, Phantom Stranger came into conflict with Wonder Woman when the Stranger turned her nemesis Paula Von Gunther into stone. Despite bringing Wonder Woman to the gates of Heaven itself, Wonder Woman fought for Von Gunther's life and won, using her Lasso of Truth to force the Stranger to admit he withheld Von Gunther's salvation in order to help balance the scales of his own legendary betrayal. After hearing the Stranger's confession, the Presence seemingly dissolved him into nothingness. While this appeared to be the end of the Phantom Stranger, his quest for redemption remained unfinished, and he will most likely return when truly needed.

ON THE RECORD

The Phantom Stranger of the 1950s was a complete mystery: a trenchcoated wanderer debunking charlatans, battling science-based threats, and defeating aliens from outer space.

As the 1960s closed, he returned as an enigmatic, mystic champion. In this incarnation, he confronted a legion of arcane enemies and eventually joined the Justice League of America. Such was his pervasive aura of mystery that, when his origins were finally revealed in *Secret Origins* #10 (Jan. 1987), readers were presented with four possible stories from which to choose.

MAN OF MYSTERY The inscrutable Phantom Stranger instinctively seemed to know where and when someone needed his unique brand of problem-solving.

ROAD TO NOWHERE

Humanity's most reviled traitor learned over restless centuries that the only way to pay for his sin was saving the innocent and challenging the guilty.

AN UNWELCOME REUNION

As the centuries unfolded, it was inevitable that the restless Trinity of Sin would meet again: Sometimes as allies but more often in acrimony, as when the Phantom Stranger encountered Pandora.

CLASSIC STORIES

***Phantom Stranger* (Vol. 2) #4 (Dec. 1969)** Dr. Thirteen inadvertently liberates Tala, the demonic Queen of Evil; the Phantom Stranger defeats her, but gains an implacable enemy.

***Phantom Stranger* (Vol. 3) #1-4 (Oct. 1987-Jan. 1988)** Reduced to a mere mortal, the Stranger battles Eclipso, Spirit of Wrath, before the villain transforms Earth into a realm of ultimate darkness.

***Legends* (Vol. 1) #1-6 (Nov. 1986-Apr. 1987)** The Phantom Stranger foils Darkseid's attempts to destroy Earth's concept of heroism.

PLASTIC MAN

DEBUT *Police Comics* #1 (Aug. 1941)

REAL NAME Patrick Edward "Eel" O'Brian **BASE** Cole City

HEIGHT 6ft 1in/variable **WEIGHT** 178 lbs **EYES** Blue **HAIR** Black

POWERS/ABILITIES Completely malleable body; flexible skeleton; movable internal organs; extreme contortionism; shape-changing.

ALLIES Suave Pado Swakatoon, Obscura, Woozy Winks, Batman, Offspring (Luke O'Brian)

ENEMIES The Cabal, Granite Janet, Lex Luthor, Dr. Dratt, the Red Herring

AFFILIATIONS The Terrifics, Justice League, Spyril

Plastic Man has fought crime since the 1940s, using his astoundingly pliable form, deductive mind, and underworld knowledge to bring to justice some of the world's strangest villains. "Plas" worked as a private eye with dim but loyal assistant Woozy Winks, and was FBI liaison to the All-Star Squadron and Freedom Fighters during World War II. Decades later, he served with the Justice League.

Plastic Man knew how criminals thought because he was one. Patrick "Eel" O'Brian always outwitted the cops, but was betrayed by his own crew when a research lab heist for crime boss the Duchess went bad. Shot, doused in bizarre exotic chemicals, and left for dead, Eel did not die. While recuperating, he realized the ordeal had changed his body. He could now infinitely change his shape and appearance and resolved to follow the example of the good clerics who saved him to protect decent people. His character also changed and his memories seemed somehow altered.

Plastic Man never revealed he was still a wanted criminal. He maintained his original persona, cozying up to the mobsters he targeted while "Plas" fostered a reputation for silliness, and a habit of shapeshifting into common objects to surprise friends and foes alike. Post-*Flashpoint*, O'Brian was an unrepentant thief, transformed when Earth-3's Crime Syndicate invaded and his weird chemical inundation came about when Owlman attacked him.

Following *Rebirth*, Plastic Man is seeking redemption and atonement. With new sidekick Suave Pado Swakatoon, and as a member of pandimensional Super Hero alliance the Terrifics, he has faced threats including the Cabal and Secret Six.

PLASTIC FANTASTIC Mobster Eel O'Brian never imagined that any of this metahuman nonsense could affect an ordinary guy like him.

FLEXIBLE RESPONSE

Plastic Man bends over backwards, sideways, and any old way to uphold the law.

THE TERRIFICS

When malign Barbatos broke through from the Dark Multiverse during the Metal Crisis, Plastic Man learned he has an unexplained affinity with extra-multiversal Nth Metal and immunity to the warping effects of Dark Matter: A possible explanation for his incredible abilities and unnatural, often surreal Super Hero experiences. This led to him being trapped in a trans-dimensional odyssey and an initially unwelcome alliance with Mister Terrific, Metamorpho, Phantom Girl, and a succession of alternate reality Super Heroes.

PLASTIQUE

DEBUT *The Fury of Firestorm* #7 (Dec. 1982)

REAL NAME Bette Sans Souci

POWERS/ABILITIES Explosives and munitions expert who can turn objects into bombs; able to project concussive blasts from her hands.

ENEMIES Firestorm, Checkmate, Wonder Woman, The Rogues, A.R.G.U.S., the Nuclear Men

AFFILIATIONS Suicide Squad, Secret Society

Canadian Bette Sans Souci was a terrorist armorer. She later went public as Plastique, a walking bomb in a costume covered with assorted incendiary charges.

She acquired the ability to project concussive blasts and turn objects into bombs.

As she developed, her radical ideology waned. After serving with the Suicide Squad, Plastique became a thief and mercenary targeting Firestorm before joining the Outsider's Secret Society.

In advance of the Crime Syndicate's invasion of Earth, she attempted to murder Madame Xanadu, infiltrated A.R.G.U.S., and tried to claim the bounty on the Rogues.

Following *Rebirth*, she battled the Justice League and bombed a wedding attended by Etta Candy and Wonder Woman. She was last seen holidaying on criminal paradise Zandia.

POWER COMPANY

DEBUT *JLA* (Vol. 1) #61 (Feb. 2002)

BASE San Francisco, California

MEMBERS/POWERS Josiah Power: Very powerful metahuman; **Manhunter**: Enhanced speed, rapid healing, martial arts; **Skyrocket**: Energy-manipulating harness; **Witchfire**: Magic-wielder; **Bork**: Super-strength, invulnerability; **Sapphire**: Telekinesis; **Striker Z**: Super-strength; capable of energy absorption and release; **Firestorm**: Flight, nuclear transmutation.

ALLIES Superman, Green Arrow, Wonder Woman, Nightwing

ENEMIES Black Dragon Society, Doctor Cyber, Cadre, Dragoner, Strike Force, Jack Spheer, Crime Syndicate of America

AFFILIATIONS Conglomerate, Blood Pack, Hero Hotline, S.T.A.R. Corps, Captains of Industry, S.T.A.R. Labs

The Power Company was a Super Hero team created by attorney Josiah Power. When his metagene triggered in the middle of a trial, he was fired from his law firm. Power then devised a business model providing Super Hero services to paying clients. He recruited some minor champions and supplemented them with established characters, such as Firestorm.

Set up along the lines of a law firm, the front line Super Heroes were divided into "Partners" or "Associates," supported by specialists and administrative staff, who had extensive experience with the metahuman community and weird science. Power's personal assistant was former pop star Silver Shannon (of The Maniaks) and the Power Company boasted high profile contracts with the likes of S.T.A.R. Labs and St. Claire Industries. Despite initial success, the business is now "on hiatus."

DEBUT *Batman* (Vol. 1) # 181 (Jun. 1966)

REAL NAME Pamela Lillian Isley

BASE Gotham City

HEIGHT 5ft 8in **WEIGHT** 140 lbs

EYES Green **HAIR** Red

POWERS/ABILITIES Controls and manipulates all plant life; immune to poisons and toxins; can transmit toxins and poisons via a kiss; wields plant-based pheromones that can cause people to fall under her hypnotic spell; highly intelligent and adept at botany and chemistry.

ALLIES Harley Quinn, Clayface

ENEMIES Batman, the Batman Family, the Floronic Man

AFFILIATIONS Gotham City Sirens, the Green, Arkham Asylum inmates

BUDDING GENIUS
Although sunlight damaged her delicate pale skin, little Pamela's only escape from a life of domestic terror was beside her mother in their lush and well-tended garden.

garden. He was later taken into police custody, leaving Pamela alone.

In college, Pamela's interest in chemistry grew. She illegally developed pheromone pills, landing herself on academic probation. Using her pills and her natural charms, Isley seduced the dean into dropping all charges. Her next target was her father, whom Pamela visited in jail. Before leaving, she kissed him on the lips while wearing a toxic lipstick. He was found dead shortly after.

Pamela went on to intern for Wayne Industries, where she began to perfect her pheromone technology. During a struggle in the lab, she was splashed with chemicals, which granted her plant-controlling abilities. She soon embarked on a criminal career, believing it's her destiny to create a plant-based utopia, while also destroying the world of man.

While seeking help at the Sanctuary, Poison Ivy was killed when The Flash (Wally West) lost control of his powers. However, she was able to regrow herself, emerging more plantlike than ever and with green skin. Ivy was later completely restored, thanks to Lex Luthor. In the meantime, a part of her had gone on a road trip with Harley Quinn, who mistook this overgrowth clone for the real Poison Ivy. Feeling hurt and abandoned by her beloved Harley, Ivy severed ties with her, preferring to forsake Harley's new heroic direction for her more villainous roots.

ON THE RECORD

In her original incarnation, Poison Ivy hadn't evolved into the physical threat she'd represent in her later appearances. Before the *Crisis on Infinite Earths*, Ivy was merely an attractive criminal with a gimmick, and a crush on the Dark Knight Detective.

After *Crisis*, she fully displayed her plant powers, joining the Suicide Squad briefly before signing up with a more informal team, the Gotham City Sirens, in the 2000s. This post-*Crisis* version of Ivy also had a hand in the origin of another femme fatale, Harley Quinn, when she served her a concoction that gave Harley enhanced reflexes and strength.

KNIGHT MOVES

Poison Ivy proved her stature as one of Batman's main foes during "Knightfall," when she amassed a squad of enthralled warriors to take on the Dark Knight.

Poison Ivy is more than a simple Super-Villain. She's a complex creature, often appearing more plant than human. Ivy is an eco-terrorist, and the lives of plants are her main concern. While her objective of saving the planet from mankind's pollutants and deforestation is a noble one, the means by which she works towards that goal are borderline insane, making her another formidable figure in Batman's Rogues Gallery.

Pamela Isley grew up in an abusive home. Her mother enjoyed growing plants, an activity Pamela became fond of. However, Pamela's father would routinely beat her mother, before buying her flowers as an apology, and she would take him back. Eventually, Pamela's father killed her mother, burying her in the

garden. He was later taken into police custody, leaving Pamela alone.

In college, Pamela's interest in chemistry grew. She illegally developed pheromone pills, landing herself on academic probation. Using her pills and her natural charms, Isley seduced the dean into dropping all charges. Her next target was her father, whom Pamela visited in jail. A TOUCH OF POISON

All plant life is ripe for Poison Ivy's control. She can grow a vine with a thought, or turn a harmless Venus fly trap into a deadly attack dog.

IN THE GARDEN OF EVIL
Poison Ivy was a dedicated and valiant member of the Birds of Prey, but only until she no longer had any use for them.

POWER GIRL (KARA ZOR-EL)

DEBUT *All-Star Comics* (Vol. 1) #58 (Jan.-Feb. 1976)

REAL NAME Kara Zor-El, Karen Starr

BASE Mobile

HEIGHT 5ft 11in **WEIGHT** 180 lbs **EYES** Blue **HAIR** Blonde

POWERS/ABILITIES Genius-level intellect; super-strength; super-speed; flight; invulnerability; enhanced senses all fueled by solar energy from a yellow sun.

ALLIES Huntress, Lois Lane, Tanya Spear, Dr. Gerhard, Val-Zod, Harley Quinn

ENEMIES Desaad, Kaizen Gamorra, Brutaal, Darkseid

AFFILIATIONS Eight Wonders of the World, Michael Holt, Vartox of Valeron

Kara Zor-El escaped Krypton and gained astounding abilities under Earth-2's yellow sun. Adopted by Clark Kent and Lois Lane, she was coached by Superman (her cousin, Kal-El) and yearned to become a Super Hero.

When Superman, Batman, and Wonder Woman died after Earth-2 was invaded by Apokolips, Kara and her friend Robin were ejected from their universe. On Prime Earth, Kara rebranded herself as technology entrepreneur Karen Starr, building a company dedicated to bridging dimensions. As Power Girl, she covertly secured funds and confiscated useful technologies in a bid to return to Earth-2. Only Somya Spears, trusted assistant of Robin—who had adopted the name Huntress—and chief scientist Dr. Gerhard knew Karen's true nature and goals. Power Girl and Huntress were eventually able to return home to join Earth-2's surviving heroes in fighting Darkseid.

Following *Rebirth*, Huntress' origins changed and Power Girl was lost in Limbo, probably due to time-tampering Doctor Manhattan. When his meddling was undone, Karen Starr returned to reality and action with the Justice Society.

ON THE RECORD

Power Girl evolved from a young brat into the JSA's eventual leader.

Kara also served in the JLA and Justice League International, surviving numerous reality-altering events virtually unchanged. After an allergic reaction, she developed aggressive mood-swings, leading to her being possessed by Eclipso.

Power Girl repeatedly proved her no-nonsense attitude was the way to get the job done. This tactic only failed when Harley Quinn took advantage of Power Girl's temporary amnesia to lead them on a madcap tour of the Multiverse.

LOOKS LIKE TEEN SPIRIT

One of DC Comics' first legacy heroes, **Power Girl** debuted in 1976 as a youthful rebel within the company's oldest super team, the Justice Society of America.

POWER RING

DEBUT *Justice League* Vol 2. #23 (Oct 2013)

REAL NAME Harold Jordan

BASE Coast City, Earth-3

HEIGHT Unknown

WEIGHT Unknown

EYES Brown

HAIR Brown

POWERS/ABILITIES While wearing the Ring of Volthoom, Power Ring can create light constructs, fire energy blasts, and fly.

ALLIES Deathstorm

ENEMIES Sinestro, Anti-Monitor

AFFILIATIONS Crime Syndicate

On Earth-3, Harold Jordan was a janitor at Ferris Aircraft. In this reality, his abject cowardice and lack of willpower caused him to be chosen by the Ring of Volthoom as its host. Unlike the rings of Earth-0's Green Lanterns, the Ring of Volthoom gradually destroys its wearer to keep itself powered up.

Now bearing the name Power Ring, Harold was able to rise through the criminal ranks and eventually join the Crime Syndicate with other twisted versions of the Justice League. However, he remained a coward, a fact which his ring was never slow to remind him of. Power Ring was part of an invasion of Earth-0 by the Crime Syndicate, but he was slain by Sinestro.

POWER GIRL (TANYA SPEARS)

DEBUT *World's Finest* #23 (Jul. 2014)

REAL NAME Tanya Spears

BASE New York City

HEIGHT 5ft 3in **WEIGHT** 120 lbs **EYES** Brown **HAIR** Black

POWERS/ABILITIES Genius intellect; superhuman strength; size-alteration, virtual invulnerability

ALLIES Karen Starr, Huntress, Deathstroke, Wally West

ENEMIES Desaad, Adeline Kane

AFFILIATIONS Teen Titans, Defiance

Tanya Spears inherited the role of Power Girl, after her predecessor, Karen Starr, returned to Earth-2. She left her fortune, and Super Hero name to the daughter of her friend, Somya Spears, who had run Starr Industries, allowing the Kryptonian to fight injustice and find a way home.

Tanya was a scientific prodigy. Aged 17, she earned a postdoctoral fellowship at MIT. While working at Starr Industries, Tanya was held by a terrorist stealing nuclear isotopes. She was saved by Starr's Earth-2 partner Huntress, but not before being exposed to isotope radiation.

When Huntress and Karen prepared to return to Earth-2, Tanya was attacked by exiled Apokoliptian Desaad, appropriating her new power to follow the pair and rejoin his master, Darkseid. In the assault, Starr Industries' lab was destroyed, but when rescue workers started digging her out of the rubble, Tanya discovered she had many of Power Girl's metahuman abilities.

She later learned that those powers were a parting gift from a grateful friend. Karen also legally transferred her Power Girl codename and her money to Tanya. Seeking to understand her extraordinary abilities and new, heroic direction in life, Tanya left Boston for New York, and joined the Teen Titans. At a loss when the team broke up, she fell under the sway of Slade Wilson, Deathstroke, who was seeking a fresh path for himself and leading a new team of young heroes: Defiance.

Learning Karen Starr was trapped in an interdimensional fold of Innerspace, Tanya sought to extract her in astral form. When her vacant body was found, her teammates believed she had taken her life. When burying her they were unaware that they had inadvertently marooned her consciousness between dimensions.

THE DEVIL IN THE DETAIL

A valiant, superpowered young genius, **Tanya Spears** is smart enough to realize that any alliance with **Deathstroke** is likely to come with some deadly terms and conditions.

OVERPOWERED

The most cowardly man on Earth-3 seemed the perfect choice for the Ring of Volthoom, which fed on fear.

ALLIES Superman, the Water Woman, Zatanna

ENEMIES Cataclysm, Satanus, Cult of August, Master Chu, Prince Inferno

For 2,000 years mystic warriors the Leymen secretly protected humanity from magical threats. They were originally gathered by immortal mage Nommo—known today as Doctor Mist—and, armed with mystic Ley Pendulums, they patrolled the Earth via its network of Ley Lines.

When the modern cabal was eradicated during *Zero Hour*, Mist's sorcerous protocols came into play and a new squad was hastily gathered by Mist's agent, the Water Woman. This ill-prepared band was equipped with its own Ley Pendulums and began battling ancient and modern sorcerers and sects. Calling themselves Primal Force, they were drawn to many supernatural and magical crises, but eventually fell battling the monstrous Cataclysm. The survivors joined groups such as Shadowpact, and awaited the Water Woman's next call to arms.

PREZ

DEBUT *Prez* (Vol. 1) #1 (Aug.-Sep. 1973)

REAL NAME Beth Ross

BASE Eugene, Oregon; Washington, DC, 2036

EYES Green **HAIR** Bleach blonde

POWERS/ABILITIES Honesty, common sense, compassion, straight talking, hatred of hypocrites.

ALLIES Vice President Preston Rickard, Amber Waves, Joni Andersen

ENEMIES Senator Jay Thorn, Senator Tom Downey, Boss Smiley, Grizzly Tobacco, Pharmaduke

AFFILIATIONS Li'l Doggies House of Corndogs, Anonymous

Working in a fast-food franchise, 19-year-old Beth Ross accidentally battered and deep-fried her own hair.

When friends posted a video of the incident online, "Corndog Girl" went viral. In election year 2036, owing to public apathy and the venality of politicians, an amendment was passed allowing voting by email and social media. With Beth trending stratospherically, hacker collective Anonymous launched a campaign and, despite political chicanery, good-hearted Beth became President. Her first order of duty was to overturn centuries of institutional corruption. She filled her cabinet with "actual smart people" and made the most hated politician in America—Preston Rickard—her Vice President. As he himself

SOCIALLY AWARE
Beth had no interest in politics, but was determined that people like her dad shouldn't have to die because they were poor.

pointed out, no one would try to assassinate her if he was next in line for the top job.

ON THE RECORD

Teenage US President Prez Rickard debuted in 1973, working tirelessly to make America a cooler, hipper, and more surreal place. His idealistic vision for the Land of the Free was bitterly contested by vested corporate interests—exemplified by Boss Smiley—and his tenure was plagued by various bizarre attacks. He was even saved from a marauding witch by Supergirl. His legacy in the modern, post-*Flashpoint* re-imagining can be seen in the person of Vice-President Preston Rickard.

DEMOCRACY IN ACTION

Prez was elected after the voting age was lowered to include teenagers, and he stormed in on a "Youth Protest" landslide.

PROFESSOR IVO

DEBUT *Brave and the Bold* (Vol. 1) #30 (Jun.-Jul. 1960)

REAL NAME Anthony Ivo

EYES Black **HAIR** None

POWERS/ABILITIES Genius intellect; advanced knowledge of engineering, computer science, chemistry and biology; indefinitely extended lifespan; mutated form, which is bullet- and energy-blast-proof and toxin-resistant.

ALLIES Lionel Luthor, lex Luthor, T.O. Morrow, Amazo, The Outsider

ENEMIES Justice League, Justice League of America, Green Arrow

AFFILIATIONS Legion of Doom, Silas Stone, S.T.A.R. Labs, A.R.G.U.S., Secret Society of Super-Villains, Ivy University

Anthony Ivo is a true mad scientist, obsessed with results and caring nothing for the harm his work causes. He headed Ivy University's Cellular and Structural Biology Department before joining S.T.A.R. Labs to supervise their top-security Red Room in Detroit: A research repository for extraterrestrial, futuristic, and arcane technologies too dangerous for public knowledge. As a result of his discoveries, Ivo developed the A-Maze Operating System, which created machines able to mimic organic life at a cellular level. Ivo is terrified of dying and much of his research stems from a determination to live forever. He constructed the android Amazo to replicate the powers of the Justice League, and subsequently developed a serum that greatly enhanced his lifespan. So severe was his phobia that he cared little when it monstrously mutated his body. Fully embracing his evil side, he returned to constructing killer-androids and worked with the transdimensional Outsider in the Secret Society of Super-Villains.

With the return of Mother Perpetua, Ivo captured and tried to vivisect Martian Manhunter J'onn J'onzz, seeking to use his unique biology to create Apex Predators, composed of human and Martian DNA.

ON THE RECORD

In his first incarnation, Professor Ivo was one of the Justice League of America's most pernicious foes. His quest for immortality and expertise in creating robots and androids tested the heroes many times, and he was the man responsible for the JLA's biggest body-count.

When a stripped-down JLA relocated to Detroit, they were targeted by an army of Ivo's killer-droids, which murdered Vibe and Steel, and caused the despondent team to disband.

ETERNAL ENEMY

Ivo battled the JLA so often that he lost his mind and his humanity, until all that remained was hatred and madness.

PRINCESS PROJECTRA

DEBUT *Adventure Comics* #346 (Jul. 1966)
REAL NAME Dr. Wilimena Morgana Daergina Annaxandra Projectra Velorya Vauxhall
BASE Legion HQ, 31st-century New Metropolis
HEIGHT 5ft 6in
WEIGHT 130 lbs
EYES Purple
HAIR Lavender
POWERS/ABILITIES hyper-real illusion caster; strong sensory perceptions
ENEMIES Horraz, Crav the General Nah, Mordru
AFFILIATIONS Legion of Super-Heroes, royal family of Orando

Scion of the royal family on her homeworld of Orando, Princess Projectra was devoted to Earth's legendary Age of Heroes. Despite being a child of unmatched privilege and one of the wealthiest sentient beings in the United Planets, Wilimena Morgana Daergina voraciously studied history, and earned doctorates in Ancient Studies for Earth, Mars, and Thanagar. She was simply in love with the concept of heroes and jumped at the opportunity to become one with the burgeoning Legion of Super-Heroes.

Sleek, poised, and confident, she offered to personally fund the Legion, but is rather ill-at ease with her commoner comrades. She even acknowledged to Saturn Girl that joining the team would benefit her own emotional growth.

ROYAL LEGIONNAIRE

Princess Projectra resigned following the murder of her husband Karate Kid, but she later returned to the Legion in the guise of Sensor Girl.

PROFESSOR PYG

DEBUT *Batman* #666 (Jul. 2007)
REAL NAME Lazlo Valentin
BASE Gotham City
HEIGHT 5ft 11in **WEIGHT** 195 lbs
EYES Brown **HAIR** Brown
POWERS/ABILITIES Skilled surgeon
ALLIES Scarecrow, Bane
ENEMIES Batman
AFFILIATIONS Circus of Strange, Secret Society of Super-Villains

Driven insane by exposure to Doctor Dedalus' Spyral labyrinth, Lazlo Valentin became pig-mask-wearing Professor Pyg. Committed to Arkham Asylum, he was prevented from escaping during a riot by Batman and Nightwing. When the Crime Syndicate of America's attack diverted attention from Arkham, Pyg did escape.

Pyg's exploits consisted of kidnapping unfortunate Gotham City citizens and performing bizarre surgeries on them before adding doll-face masks that turned them into obedient minions called Dollotrons. In the lawless Gotham City created as Batman and other heroes were drawn into fighting the Crime Syndicate and Secret Society of Super-Villains, Scarecrow struck a deal with Pyg to use his army of Dollotrons, but soon after, Bane slaughtered the Dollotrons, and forced Pyg to work for him instead.

A driven free spirit, Pyg frequently opens new "clinics." His latest foes have included the Teen Titans, Red Hood and the Outlaws, Nightwing, and Batman.

DRESSED TO KILL

In the pursuit of extreme medical breakthroughs, Professor Pyg didn't think twice about switching limbs on some of his unfortunate "patients."

PROFESSOR ZOOM/REVERSE-FLASH

DEBUT *The Flash* (Vol. 1) #139 (Sep. 1963)
REAL NAME Eobard Thawne
BASE Central City; Keystone City in the year 2463
HEIGHT 6ft **WEIGHT** 195 lbs **EYES** Blue **HAIR** White
POWERS/ABILITIES Genius-level intellect; Future science Negative Speed Force super-speed; manipulates time without affecting himself
ALLIES The Acolytes of Zoom
ENEMIES The Flash, Paradox
AFFILIATIONS Legion of Zoom

In the 25th century, orphan Eobard Thawne became obsessed with ancient Super Hero The Flash. Finding a time capsule containing his hero's uniform, Thawne engineered a Speed Force connection and became a speedster hero, unaware that he had actually created a Negative Speed Force that would impact all of reality. He also lacked enemies and catastrophes to combat, and so began creating his own. When Barry Allen visited his era, Thawne was initially ecstatic, but his admiration soured when The Flash exposed Eobard's deception. After rehabilitation, Thawne became a Professor and curator of The Flash Museum.

Refining his powers, "Professor Zoom," traveled back in time to win The Flash's approval. Unfortunately, he discovered that the pair had no special relationship. At heart a psychotic attention-seeker, Thawne felt betrayed and determined to make Barry Allen's life a living hell.

Thawne's Negative Speed Force connection allowed him easy access to all points in time, and he murdered Barry's mother and his wife, Iris, altering time and reordering reality on a whim.

Thawne has been killed repeatedly too, but is virtually immune to death, since he can simply attack his despised "betrayer" from different moments in his own personal timeline. Thawne remains an unpredictable and constant threat, a vicious Reverse-Flash bent on undoing all the good Barry Allen has done, most recently corrupting his unborn future children and assembling an army of Super-Villains into a Legion of Zoom.

ON THE RECORD

In his first appearance, Thawne was called the Reverse-Flash, but for much of his career was known as Professor Zoom. Other pre-Flashpoint villains had also called themselves Zoom—each with a similar yellow costume that was a reverse of The Flash's; these included Citizen Abra, a time-traveler from the 64th century, and criminal profiler Hunter Solomon.

NEED FOR SPEED

Thawne was obsessed with Barry Allen, traversing timelines and dimensions to carry on his maniacal battle against The Flash and everything he loved.

PROMETHEUS

DEBUT *Prometheus* #1 (Dec. 1997)

BASE The Ghost Zone

HEIGHT 6ft 1in

WEIGHT 180 lbs

EYES Brown

HAIR White

POWERS/ABILITIES Genius intellect; technologically advanced armor and nightstick.

ENEMIES JLA, Batman, Midnighter, Vixen

AFFILIATIONS Injustice Gang

All that is known of Prometheus' history is that he witnessed his criminal parents gunned down in a fight with police, and devoted himself thereafter to destroying the forces of law and order.

He designed an armored suit with a cybernetic interface making him an expert martial artist, and established a base in the Ghost Zone. In the Zone, he built his Crooked House—a laboratory to develop technological resources. He also used his House as a base from which to strike out at the Justice League of America. He saw the JLA as the ultimate law-enforcement organization, and therefore most in need of destruction. A psychotic devotee of violence, Prometheus has bested the JLA singlehandedly at times, but has also been defeated by Catwoman and Green Arrow—proving advanced technology is not the only way to win a battle.

Unable to learn from his mistakes, his latest antihero schemes have been crushed by Midnighter and JLA member Vixen.

TECHNOLOGICAL PROWESS

Prometheus continually refined his armor. His computerized helmet was linked to his brain and he wielded an energized nightstick.

BASE Planet Maltus in the Vega Star System

HEIGHT Variable

WEIGHT Variable

EYES Yellow

HAIR None

POWERS/ABILITIES Genius-level scientific intelligence

ENEMIES Green Lantern Corps, Guardians

AFFILIATIONS Maltusian immortals

Created by Oans from bestial reptilians on planet Maltus, the Psions became ruthless experimenters just like their creators. Based on vast space science stations spread across the universe, Psions seek knowledge, stopping at nothing to further advance their technologies. They view their procedures on different species as a gift and strive to improve themselves through experimentation.

The Psions experimented on Tamaran Princess Koriand'r, unleashing her powers, and ran tests on the Guardian Quaros before Kyle Rayner and the New Guardians saved him. Quaros liberated other imprisoned Guardians before destroying the Psions, their long-suffering test subjects—and himself.

Psions monetize their obsessive research by hiring out to local powers, such as Harry Hukum. Whether testing Supergirl in deep space or weaponizing Earth citizens to test the progress of Starfire, their prime motivation seems to be expanding knowledge through terror and pain.

EXTRATERRESTRIAL TERROR

Psions never forget past research: Years after first torturing Starfire with their experiments, they returned to repeat and assess their procedures.

PRYSM

DEBUT *Teen Titans* (Vol. 2) #1 (Oct. 1996)

REAL NAME Audrey Spears

HEIGHT 6ft 4in

POWERS/ABILITIES Invisibility; energy absorption and projection of light.

ALLIES Argent II, Hot Spot, Risk

ENEMIES Warlord, H'San Natall

AFFILIATIONS Teen Titans

The alien H'San Natall created a human hybrid breeding program to install sleeper agents on Earth. One of these was Audrey Spears, who grew up inside a virtual fantasy world modeled on the popular shows of 1950s television. Escaping her artificial environment, she went to Earth with other hybrid teens Argent II, Hot Spot, and Risk, adopting the name Prysm for her ability to manipulate light. She later founded the post-*Zero Hour* Teen Titans.

Prysm hated the glassy appearance of her crystalline body structure, caused by the interaction of human and H'San Natall genomes. After meeting her true parents, she convinced the H'San Natall to stop their infiltration of Earth, and then remained with her parents in space, never feeling at home on Earth, nor with her hybrid teammates—particularly Risk, for whom she nursed unrequited romantic feelings.

POWERS/ABILITIES Immense telepathic and telekinetic powers; mind control

ALLIES Trigon, Doctor Siva, Troia

ENEMIES Teen Titans, Outsiders

AFFILIATIONS Fearsome Five, Injustice League, H.I.V.E.

During an experiment designed to breach dimensional barriers, physicist Simon Jones was struck by a beam of energy, which gave him psionic powers.

As Psimon, he joined the Fearsome Five, often battling the New Teen Titans, where Raven discovered the source of Jones' power and that he was an agent of her demon-lord father, Trigon. For failing to kill the heroes, Psimon was exiled by Trigon, but he escaped. He continued to prey on humanity and was exiled to a prison planet alongside other Super-Villains. He proposed starting a civilization there instead of trying to escape. The Joker, unamused, crushed his head with a rock.

Post *Flashpoint*, Psimon was leading a scheme to steal and resell super-powers for H.I.V.E. and was eventually exposed as a pawn of future tyrannical conqueror Troia.

(Roger Hayden)

REAL NAME Roger Hayden

HEIGHT 6ft 1in **WEIGHT** 180 lbs

EYES Green **HAIR** Red

POWERS/ABILITIES Medusa Mask conveys ability to control others' emotions.

ALLIES Anti-Monitor, Bane

ENEMIES Power Girl, Black Adam, Amanda Waller, Hugo Strange

Roger Hayden was one of the Twenty—humans Brainiac bestowed psionic powers on. Hayden believed his Medusa Mask allowed him to control the virus. He escaped the H.I.V.E. Queen, who was draining the energies of the Twenty, and found Superman.

Hayden informed him Brainiac would use the Twenty as hosts for the minds of people from his destroyed home planet. Hayden tried to drain Superman's energy to free the Twenty, but Lois Lane defeated him.

Hayden was renditioned by Amanda Waller and conditioned by rogue psychiatrist Hugo Strange. Strange then used Hayden to attack Batman's Gotham Knights team before trading Psycho-Pirate to Bane for quantities of Venom. Hayden was extracted from Bane's base by a Batman black-ops team to cure a deranged Gotham Girl, but his powers were countered by Ventriloquist Arnold Wesker, whose multiple personalities were too much for the Medusa Mask.

EMOTIONAL CATHARSIS

After the death of original Psycho-Pirate, Charles Halstead, Roger Hayden used a single Medusa Mask to control the whole emotional spectrum.

PUNCHLINE

DEBUT *Batman* (Vol. 3) #89 (Apr. 2020)

REAL NAME Alexis Kaye **BASE** Gotham City

HEIGHT Unknown **WEIGHT** Unknown

EYES Green **HAIR** Black

POWERS/ABILITIES Expert in making poisons

ALLIES The Joker

ENEMIES Batman

AFFILIATIONS None

Alexis Kaye was a disaffected college student, whose anger with the world she saw as falling apart around her made her the perfect acolyte for The Joker's nihilistic philosophy. She wanted to prove to her hero that she was not merely an obsessive fangirl, but a potential partner in crime. She created her own version of The Joker toxin and killed her college dean with it. The Joker, watching on from inside her wardrobe, was satisfied that Alexis—or Punchline, as she called herself—was up to the job of helping him in his next big plot against Batman.

It was not long before Punchline found herself face to face with her predecessor, Harley Quinn, and the two fought. Punchline cut Harley's throat, although Quinn was able to get herself patched up and back in the field to help Batman. As for the Dark Knight, Punchline had concocted a special toxin to take him out—a powerful combination of The Joker's recipe, Fear Toxin, and Venom. However, to Punchline's surprise, Harley managed to make an antidote using her knowledge of the plants in a secret garden Poison Ivy had built for her. Punchline escaped Batman's custody, but was later apprehended by Nightwing.

A POISONOUS PAIR
Punchline's obsession with The Joker led to her becoming his partner—in love and crime. This brought her into conflict with his ex, Harley Quinn.

QUEEN BEE

DEBUT *Justice League of America* (Vol. 1) #23 (Nov. 1963)

BASE Hiveworld Korll

HEIGHT 5ft 9in **WEIGHT** 135 lbs

ALLIES The Cabal (Doctor Psycho, Hugo Strange, Amazo, Per Degaton)

ENEMIES Justice League, Plastic Man, Superman, Batgirl, Secret Six; Firestorm

AFFILIATIONS Anti-Justice League; Injustice Gang; Injustice League Unlimited; Secret Society of Super-Villains; H.I.V.E. (Holistic Integration for Viral Equality)

Intergalactic conqueror Zazzala of Korll has repeatedly attempted to enlarge her empire by enslaving humanity, but has always been thwarted, most frequently by the Justice League. In her earliest encounters she also sought ways to make herself and her drone armies immortal. However, repeated defeats at the hands of Super Heroes consumed her and she obsessively turned her insectoid traits—such as a hypnotic pollen created within her body and innate control over bees and other insects—to dominating the planet and species that has so frustrated her. She unsuccessfully allied with Lex Luthor and groups such as the Secret Society of Super-Villains before enacting her own criminal schemes as leader of covert multinational organisation the H.I.V.E.

After enduring further humiliating setbacks, she has retrenched—working to achieve her goals of global domination and human enslavement through a clandestine super-criminal Cabal that includes malignant telepath Doctor Psycho, warped psychologist Hugo Strange, terrorist Per Degaton and power-absorbing android Amazo. Even here, Zazzala's schemes have resulted in aggravation and setbacks, with as her latest machinations being foiled by pliable—and to her, ridiculous—opponent Plastic Man.

ON THE RECORD

Numerous female villains have used the title Queen Bee, beginning with 1940s gangster Lissa Raven Successors include thrill-seeking heiress Marcia Munroe—who battled Batman—and extradimensional tyrant Tazzala. Two anonymous* sisters usurped the Bialyan throne and shared the name when battling Justice League International. Following the *Flashpoint* event, a psionically-empowered Queen Bee ruled H.I.V.E., one of 20 humans abducted and mutated by Brainiac, the Collector of Worlds. Her plans for enslaving humanity were eventually foiled by Superman.

HONEY TRAP
Queen Bee's purpose was liberating humanity from the pressures of free will, and she knew her biggest obstacle were its Super Heroes...

QUEEN OF FABLES

DEBUT *Justice League of America* #47 (Nov. 2000)

REAL NAME Tsaritsa

HEIGHT 5ft 10in **WEIGHT** 130 lbs

EYES Green **HAIR** Red

POWERS/ABILITIES Vast magical abilities, including rearranging reality.

ENEMIES Justice League of America

Centuries ago, Tsaritsa, the Queen of Fables, arrived on Earth. She initiated a magical reign of terror until her enemy, Snow White, trapped her in the Book of Fables. At

the dawn of the 21st century, Tsaritsa escaped to sow chaos in New York City by conjuring a horde of ogres, witches, and goblins. The Justice League of America clashed with Tsaritsa when she attacked Wonder Woman, believing the Amazon to be the daughter of her old nemesis because of Diana's physical resemblance to Snow White.

The Queen drew the JLA into the realm of fairy tales where they faced monsters on an enchanted Manhattan Island. Eventually, Wonder Woman used her lasso to defeat Tsaritsa, imprisoning her inside a new book—the United States Tax Code. However, she managed to free herself, and tried to seduce Superman and then turn a slanderous movie about Wonder Woman into the Amazon Queen's new reality.

QUICK, JOHNNY

DEBUT *More Fun Comics* #71 (Sep. 1941) (John Chambers); *Justice League of America* (Vol. 1) #29 (Aug. 1964) (Syndicate member); *Justice League* (Vol. 2) #23 (Oct. 2013) (Jonathan Allen)

REAL NAME Jonathan Allen

HEIGHT 5ft 11in **WEIGHT** 170 lbs

EYES Blue **HAIR** Blond

POWERS/ABILITIES Super-speed, concentrated and enhanced by a special helmet.

Jonathan Allen was trapped at a S.T.A.R. Labs facility when lightning struck. He gained superspeed and joined the Crime Syndicate of America. This was on Earth-3,

a parallel world where evil was the dominant philosophy. When it was in danger, the Syndicate escaped to Prime Earth.

There, the Crime Syndicate tackled other foes. Johnny sent the Teen Titans into the future and killed Doom Patrol members but stumbled battling Super-Villains united to save the world. Captain Cold froze Quick's leg and Alexander Luthor—as Mazahs—broke his neck.

Following *Rebirth*, Earth-3 returned and Johnny Quick was resurrected in a reborn Syndicate. Apex Predator Lex Luthor invited them to join his Legion of Doom, but when Quick objected, Perpetua destroyed him.

DEBUT *Blue Beetle* (Vol. 3) #1 (Jun. 1967)

BASE Mobile

REAL NAME Victor "Vic" Sage

HEIGHT 6ft 2in **WEIGHT** 185 lbs

EYES Blue **HAIR** Blonde

POWERS/ABILITIES Extensive martial arts training; incisive mind; detective skills; appearance and apparel altering gadgets.

ALLIES Lois Lane, Batman

ENEMIES Bible of Crime cult, Lady Shiva

AFFILIATIONS Justice League, Batman

ON THE RECORD

When *Crisis on Infinite Earths* first reshaped continuity, The Question migrated to Earth from another reality. His career ended when he died from cancer, but he ensured there would always be answers by training Gotham City detective Renee Montoya to become a new Question.

Following *Flashpoint*, The Question was reimagined as a mystic enigma. Eons ago—with Pandora and the Phantom Stranger—he faced the Council of Eternity to answer for his sins. Defiant and unrepentant, his punishment was having his identity and visage magically erased.

In modern times, he sought Pandora's Box, hoping to answer The Question of his identity. He united with the Phantom Stranger and Pandora as the Trinity of Sin, but eventually betrayed them. After this, he vanished, no one knows where.

NEXT QUESTION

Intrepid Gotham City detective Renee Montoya was unable to escape her strange destiny: to take on the role of the enigmatic Question.

Crusading reporter Vic Sage relentlessly confronted corruption and crime in Hub City, both in his public media persona and as The Question, a faceless vigilante who followed the dictates of his conscience but not necessarily the rule of law. He utilized his martial arts training and identity-masking gimmicks created by his old college professor Aristotle Rodor, but was helpless when targeted by the ultimate assassin Lady Shiva. She had been hired by the political elite Sage was constantly targeting.

Left to die, Sage was saved by Shiva, who saw his combat potential. She brought him to sensei Richard Dragon who trained him to master his body and mind. Sage returned to clean up Hub City before becoming a wanderer battling injustice by asking the right questions. Working with many Super Heroes, he is primarily a detective, consulting with Batman, the Justice League, and Superman who used his gifts to combat the invisible Mafia.

When Leviathan dramatically destroyed or subsumed most of the world's covert agencies, The Question joined a select team assembled by Batman and Lois Lane to unmask the mastermind behind the scheme.

(as *The Question*) 52 #48 (Apr. 2007)

BASE Gotham City

HEIGHT 5ft 8in **WEIGHT** 144 lbs **EYES** Brown **HAIR** Black

POWERS/ABILITIES Very intelligent with strong set of ethics; natural team player; expertise in police procedure and knowledge of the law; skilled detective; excellent physical condition; expert martial artist; wears specialized mask that adheres to her face to hide her identity.

ALLIES Harvey Bullock, James Gordon, Batman, Batwoman, The Question, Lois Lane

ENEMIES Detective Nancy Yip, The Joker's Daughter

AFFILIATIONS Gotham City Police Department

A KEEN EYE Montoya is a natural detective and not afraid of a fight. These traits made her very well suited to the rough-and-tumble policing of Gotham City.

Renee Montoya was a good and honorable cop, a rarity in Gotham City. Frequently partnered with the uncouth Harvey Bullock, Renee fought for her adopted city before feeling the call toward a different kind of heroics. Remembering a past version of herself from a time before a cosmic shift in reality, Renee became the faceless vigilante The Question again—for the first time.

A shining star during her Gotham City Police Department (G.C.P.D.) training, Renee Montoya was given Harvey Bullock as her superior and drill instructor. Renee's tenacity, quick wits, and drive soon earned her high marks, and her willingness to get involved in a brawl or two—as well as her extremely low tolerance for nonsense—put her in Bullock's good graces. After graduating, Renee opted not to stay in Gotham City. She moved to Blüdhaven, another city

known for its high crime rate, and stayed there for a few years before returning to Gotham City and reuniting with her old mentor. She and Harvey picked up right where they left off, but this time as peers, and she once again became a valuable asset to the G.C.P.D. She helped fight against The Joker's Daughter as part of the Batman Task Force that supported Jim Gordon's tenure as Batman, and she also helped to root out Bullock's corrupt fellow officer and then girlfriend, Nancy Yip.

The DC Multiverse is often subject to reality-altering events, but few of its citizens realize that their own personal continuities have shifted around them. Renee, however, began to remember the pre-*Flashpoint* version of herself where she quit the police force and became the heroine called The Question. Recalling this past, Renee became The Question once more, and took a job gathering information for Lois Lane. She even began to work with Lois on the Unity Project, a service that offers to reconcile similar cases of broken identity due to timeline divergences for those who can also remember past realities.

ON THE RECORD

Before *Flashpoint*, Montoya began her career as an assistant to Commissioner James Gordon. The role came in advance of her part as a cop cast member in *Batman: The Animated Series* and Renee soon became a G.C.P.D. regular in the comics as Harvey Bullock's long-suffering partner. She became a Super Hero in her own right during the maxiseries 52, when her relationship with Batwoman Kate Kane was showcased, as was her protégé relationship with Vic Sage, the original Question. When The Question died, Montoya took his mantle, becoming the first female incarnation of that hero.

ANOTHER QUESTION As the new Question, Renee Montoya adopted Vic Sage's signature blank face mask, which adhered to the skin when exposed to a chemical gas.

ONE GOOD COP Montoya was a no-nonsense cop and was one of the few people on the G.C.P.D. that could put the opinionated Harvey Bullock in his place.

CLASSIC STORIES

Gotham Central #6-10 (Jun.-Oct. 2003) Renee is revealed to be gay, while struggling to fight off the attentions of the obsessed Two-Face.

Gotham Central #38-40 (Feb.-Apr. 2006) Montoya quits the Gotham City Police force after nearly killing a corrupt police officer, Jimmy Corrigan.

52 #1-52 (May 2006-May 2007) Montoya goes from life as an alcoholic to one as a Super Hero, stepping up to the plate as the new Question.

Detective Comics (Vol. 2) #41-44 (Aug.-Nov. 2015) Montoya returns to the G.C.P.D. to join the Batman Task Force after years of serving on the Blüdhaven police force.

NOTABLE MEMBERS/POWERS **Vril Dox II:** Cloned son of Brainiac;

Phase: Can pass through solid matter; **Starfire:** Tamaranean

powers; **Lobo:** Czarnian powers, expert combatant;

Tribulus: Lightning generation and super-strength;

Adam Strange: Tactical expert, planetary adventurer;

Captain Comet: Pinnacle of human evolution with

multiple superpowers; **Wildstar:** Genetically-

altered human with superhuman abilities;

Strata and **Garv:** Dryadan durability.

After surviving a colossal interplanetary invasion by a Dominator-led alien coalition, Brainiac's son, Vril Dox II, formed his own universal protection agency: L.E.G.I.O.N. However, when Vril's baby son, Lyril Dox, seized control of the organization, Vril created a team comprising L.E.G.I.O.N. members still loyal to him—R.E.B.E.L.S. Through his own intellect and the efforts of his allies, Vril overcame his son before retiring, leaving L.E.G.I.O.N. to veteran hero Captain Comet. Dox's retirement did not last long, however. After being sent files on the Legion of Super-Heroes from his descendant, Brainiac 5, Dox decided to create a new team. He based his revamped squad of R.E.B.E.L.S. on members of the Legion of Super-Heroes, recruiting new teammates from the Legion's rogues gallery.

Working with old ally Strata, Vril formed a team capable of defeating the starfish-like alien Starro, who was trying to use L.E.G.I.O.N. to conquer the universe. Latterly, other heroes, such as Starfire, Adam Strange, and Wildstar joined the R.E.B.E.L.S.' ranks.

STARSTRUCK
With Adam Strange failing as a leader and Lobo missing in action, the R.E.B.E.L.S.' greatest challenge came when Vril Dox became Starro's mind-slave, commanding the conqueror's armies.

POWERS/ABILITIES Martial-arts expert; precognitive ability

ALLIES Jericho, Wintergreen, Deathstroke, Hosun Park

ENEMIES Shado, Deathstroke (Dark Multiverse)

AFFILIATIONS None

Rose Wilson was Deathstroke's daughter. Her father kept Rose at arm's length, fearing close association with him could be dangerous for the girl, but Rose

grew to be more than capable of fighting her own battles. Trained by Nightwing, she had also inherited her father's metagene, giving her a range of enhanced abilities, but additionally had a skill all of her own—being able to see images from her future.

Rose took the codename of Ravager, which formerly belonged to her late half-brother, before deciding to abandon it and simply use her real name. Rose had the makings of a great hero, but often found it hard to shake off the violent influence of her father, whom she still wanted to please.

POWERS/ABILITIES Superhumanly agile

ALLIES Black Alice, Catman, Jeannette

ENEMIES Batgirl, The Riddler

AFFILIATIONS Secret Six, Suicide Squad, Legion of Zoom

When criminal Rag Doll (Peter Merkel) vanished, his deranged son—also Ragdoll—stepped into his shoes. Merkel, Jr. endured multiple surgeries to achieve

his contortionist abilities and needs special ointment to stop his skin splitting.

Ragdoll participated in Bane's Blackgate Penitentiary riot, before battling Batgirl after her activist roommate was misled into performing an act of terrorism. Shortly after, The Riddler coerced him into fighting the Secret Six by withholding his skin ointment. Fortunately, the team outwitted The Riddler, and Merkel, Jr. helped them and Scandal Savage protect Black Alice from persecution by the magical community. A mercenary with the Secret Six, Ragdoll battled Plastic Man before being killed on a Suicide Squad mission. After being plucked from his own past timeline, he joined the Legion of Zoom to battle The Flash and remains at large.

RAGMAN

DEBUT *Ragman* (Vol. 1) #1 (Aug.–Sep. 1976)

REAL NAME Rory Regan

BASE Gotham City

POWERS/ABILITIES His sentient demonic mantle suit of rags imparts superhuman speed, strength, agility, and healing powers; demon sight and perceptions; feeds on souls and emotions.

ALLIES Batman, Batwoman, Clayface

ENEMIES Morgaine le Fey, Nocturna

AFFILIATIONS Etrigan the Demon

War veteran Rory Regan was the only survivor of his unit. His buddies died and were sucked into the Suit of Souls they found in an ancient desert vault. They

stayed inside Regan's head when he returned to Gotham City, followed by an army of demons seeking to reclaim the rags that had bonded with him.

Regan was now inextricably linked to a Mantle of Hell: demonic armor that absorbed souls to generate power. Able to steal the life of living and never-born humans and demons, Rory, his ex-wife, and child were prey for various factions trying to retrieve it.

Determined to atone for his sins, Regan began fighting evil, encountering Batwoman and other heroes. Briefly taking advice from demon Etrigan, it became clear that all he could depend on were his instincts and the advice of the dead soldiers in his head.

John Moore and his brother Ray were raised in the United Kingdom by their grandfather. The brothers reacted in very different ways when their grandfather

was murdered by a street thug named Baxter. John tried to keep his grief to himself, while the more volatile Ray furiously claimed the police were covering up for the killer. John then witnessed the police beat his brother to death. This act released all the pent-up rage in John, and at that moment, a Red Lantern ring flew onto his finger and John became the Red Lantern Rankorr.

Rankorr tracked Baxter down, but before he could kill him, John was whisked away to Ysmault, the Red Lanterns' homeworld. As an Earthling, Rankorr had to fight hard to win the respect of Atrocitus and other Corps members. After serving bravely, he met his death at the hands of Lobo.

ENEMIES Deathstroke, Harvest

While working for the demented Super-Villain Harvest, scientist Caitlin Fairchild's clone helped a group of Harvest's prisoners escape. One of these

was Ridge, a member of Harvest's elite personal army known as The Ravagers. In defiance at their incarceration, the young heroes adopted the name Ravagers and briefly set up shop at Dr. Niles Caulder's secret headquarters in Los Angeles.

Soon after, their makeshift home was invaded by Harvest's own Ravagers, Rose Wilson and Warblade, and the assassin Deathstroke. The heroes fought valiantly, but were overcome by Deathstroke who took them back to Harvest—except for Beast Boy, whom Deathstroke believed to be dead. The rest of the team, aside from Terra, remained with Harvest until the villain's defeat by the Teen Titans.

RĀ'S AL GHŪL

DATA

DEBUT *Batman* (Vol. 1) #232 (Jun. 1971)

BASE 'Eth Alth'eban

HEIGHT 6ft 5in **WEIGHT** 215 lbs

EYES Green **HAIR** Black with white streaks

POWERS/ABILITIES Expert swordsman and martial artist; extremely long lived thanks to his access to the age-retarding Lazarus Pits; genius-level intellect with a keen strategic skills; possesses an army of loyal assassins and many connections in nearly every nation on the globe.

ALLIES Talia al Ghul

ENEMIES Batman, the Batman Family, Birds of Prey

AFFILIATIONS The League of Assassins

LEGENDS CLASH Batman and Rā's al Ghūl have battled each other many times. Their very first encounter led to a savage swordfight in the desert, with Talia al Ghūl looking on.

He is the legendary figure whose name roughly translates as "The Demon's Head." A villain who has earned that name a thousand times over, Rā's al Ghūl is one of the world's most infamous eco-terrorists and the leader of the League of Assassins, an ancient organization based in the mystical city of 'Eth Alth'eban. Rā's wants nothing more than to save the Earth by killing off the majority of the humans that "plague" it.

The stories of Rā's al Ghūl stretch back more than 700 years, making it nearly impossible to discern fact from fiction. Through the frequent use of the mystical Lazarus Pits and their life-renewing properties, Rā's has been able to survive for centuries. His reach is

wide, with connections in most major governments, but he wasn't always so powerful. Having left his nomadic tribe to pursue a scientific career in the city, the man who would become Rā's al Ghūl found work as a humble physician to a great sultan. While attempting to save the life of the sultan's son, the doctor discovered the properties of the Lazarus Pits.

Resurrected from death, the sultan's son became deranged and ran amok, killing the physician's wife. The sultan refused to admit his son's guilt and imprisoned the doctor in a cage with her corpse, expecting him to die under the desert sun. However, he was rescued by local rebels, men he soon led back to the sultan's palace in an uprising that saw the doctor take the name Rā's al Ghūl. Rā's formed the League of Assassins, and embarked on an eco-terrorist mission to cull humanity and "save" the planet from over-population and pollution. He also fathered a daughter, Talia, with a woman named Melisande.

The villainous League of Assassins' Dr. Ebenezer Darrk had a falling out with Rā's and kidnapped Talia. Batman rescued her, and Rā's decided that the Dark Knight would be the ideal son-in-law to take over his operations. Batman saw things differently, and the two became archenemies, united only by their mutual love for Talia, the "Daughter of the Demon."

ON THE RECORD

Rā's al Ghūl's origin and history have been revised more than once since his debut in the 1970s. Likewise, the Lazarus Pits that restore his vitality have changed markedly over the years.

At first, there was a single pit. Later, multiple green, bathtub-sized pools were linked to major ley lines of mystic energy, and each pit could only be used once. They soon evolved into a handful of large pools found around the world, including at the Batcave. Their properties remained the same, and they were responsible for resurrecting many characters, such as the Red Hood, The Riddler, Wonder Woman, and even Batman.

THE DEMON LAUGHS The Joker once cheated death after a dip in the Lazarus Pits' life-giving waters. Unlike most people, who emerge violently deranged, The Joker "enjoyed" a moment of calm.

OUTLAW VS. OUTLAWS

Rā's al Ghūl clashed with Red Hood and The Outlaws after Jason Todd was briefly invited to join the League of Assassins.

CLASSIC STORIES

Batman (Vol. 1) #232 (Jun. 1971)

DATA

DEBUT *DC Comics Presents* #26 (Oct. 1980)

REAL NAME Rachel Roth

BASE New York City

HEIGHT 5ft 6in **WEIGHT** 110 lbs

EYES Blue **HAIR** Black

POWERS/ABILITIES Empathic sensitivity and healing abilities; manipulation of darkness; time travel; teleportation; flight; projection of Soul-Self; other undefined magical powers.

ALLIES Beast Boy, Kid Flash (Wallace West), Starfire, Nightwing

ENEMIES Trigon, Mother Blood

AFFILIATIONS Teen Titans, Titans

Daughter of the cosmic demon Trigon, Raven struggles to master the baser impulses she has inherited from him. While her father sees her as the key to his plans to consolidate his power, Raven uses her vast mystical and psychic abilities to battle evil in all its forms alongside her adopted families, the Teen Titans and the Titans.

Raven grew up in the realm of Azarath, protected by a mystical order of monks and taught to control the demonic influence of her father, Trigon. Knowing Trigon would be hunting for her, she fled Azarath for her mother Arella's home planet, Earth, where she went into hiding. Raven eventually joined the Teen Titans alongside Wonder Girl (Cassie Sandsmark), Red Robin (Tim Drake), Best Boy, and Bunker. While the team's roster would change over the years, Raven learned to let her guard down and accept their friendship.

When the Titans parted ways, the newest Robin (Damian Wayne) saw an opportunity to form his

own personal team. He captured Raven, Beast Boy, Starfire, and Kid Flash (Wallace West), and convinced them they were better working as a team than working individually. Raven stayed on with this version of the Teen Titans, and began to form a romantic relationship with Kid Flash.

When the mysterious Source Wall was damaged at the furthest reaches of known space, strange Source energy began transforming innocent civilians. To help those affected, Nightwing formed a Justice League-sanctioned branch of the Titans and quickly recruited Raven. During her tenure on the team, Raven was separated from her Soul-Self—the source of her powers—but overcame her attempted corruption at the hands of villain Mother Blood. She rejoined with her other half and her Titans family.

ON THE RECORD

A touchstone of Raven's story has always been her relationship with Beast Boy. They became close immediately after she gathered the New Teen Titans, and their attachment blossomed into romance after her death and rebirth in a new body.

When her relationship with Beast Boy fell apart, and following the death of Kid Flash (Bart Allen) and the battle with Titans East, Raven left the team. She later returned seeking help after being attacked by Wyld, a demonic being she had inadvertently created. She rekindled her relationship with Beast Boy after they had fought side by side to defeat Superboy-Prime.

HER BEST BOY

Following a close call with Brother Blood, who had attempted to marry her, Raven began a relationship with fellow Teen Titan, Beast Boy, which continued on-and-off for several years.

EARTH FAMILY

Adopting the name Rachel Roth, Raven has rediscovered her human side, often staying with the family of her Aunt Alice.

CLASSIC STORIES

New Teen Titans (Vol. 1) #4-6

(Feb.-Apr. 1981) Raven asks the Justice League to help her against her father, but they refuse because Zatanna doesn't trust Raven. She brings together the New Teen Titans, who imprison Trigon.

New Titans (Vol. 2) #121-130

(May 1995-Feb. 1996) Surrendering to Trigon's influence, Raven implants the seeds of his dead children into new bodies, spreading evil. One of the seeds turns out to be the soul of her own good self.

Teen Titans (Vol. 3) #30-31 (Jan.-Feb.) 2006

After narrowly escaping marriage to Brother Blood and triggering armageddon, Raven joins the Teen Titans to combat Blood and his demonic army.

DEBUT *Superboy and the Ravers* #1 (Sep. 1996)

BASE Event Horizon

MEMBERS/POWERS **Superboy**: flight, super-strength; **Kaliber**: Qwardian with shrinking and growing powers; **Aura**: powerful magnetic abilities; **Hero Cruz**: force-field generated from Achilles Vest, H-Dial allows transformation into a Super Hero identity; **Rex, the Wonder Dog**: enhanced intelligence; **Sparx**: wields electricity.

ALLIES Highfather

ENEMIES InterC.E.P.T., Darkseid

The Event Horizon was a mobile, intergalactic party frequented by cliques of teens invited by club owner Kindred Marx—the catch was that only those with superpowers could get in. The Ravers, led by Superboy, were the most outrageous of the club's regulars.

By touching their hand-stamps, team members could teleport to the Event Horizon from anywhere in the universe. The Ravers came into conflict with rival clique Red Shift and the interdimensional police force known as InterC.E.P.T. They also helped Highfather of New Genesis foil Darkseid's attempts to tap into the power of the Source.

After the Raver Half-Life perished in a battle against the Qwardians of the Antimatter Universe, Kindred Marx closed down the Event Horizon, and most of the Ravers went their separate ways.

ALLIES Caden Zapote, Batman, Aztek

ENEMIES Doctor Polaris, Sons of Liberty

AFFILIATIONS Justice League of America

New York Star reporter Lanford "Happy" Terrill, became the first Ray after being transformed by scientist Dr. Dayzl. Happy's son, Joshua, inherited his father's powers and became Ray's sidekick, Spitfire, before killing his mother in a tragic accident. Happy remarried and his second son Raymond also inherited light powers. The youthful hero later exposed the third Ray, Stan Silver, as a traitor within the ranks of the Freedom Fighters.

Some years ago, young Ray Terrill was told he was allergic to light and exposure would kill him, and grew up isolated and in darkness. When his only friend, Caden, used a camera flash while taking a picture, Ray crackled with energy and his mother told him he had hospitalized and probably killed Caden.

As a teen, "night boy" Ray ran away from home and discovered he had powers fueled by light absorption—including flight and invisibility—but would not explode and die. Constantly on the road, he eventually reached Vanity, Oregon, where Caden was running for Mayor. Watching invisibly, Ray saw Sons of Liberty terrorists try to murder Caden and exploded into bright, brilliant action to save him. Finding purpose at last, Ray remained as the local Super Hero. He was eventually recruited by Batman for his Justice League of America.

ON THE RECORD

Lucien Gates was transformed when hit by a particle beam. He learned he could fly, but only in a straight line—a reflective surface was needed to change his path.

Lucien's parents taught him to control his powers through meditation. He fought other creations of the misfired beam before it emerged these battles were staged by villain Thaddeus Filmore. Lucien defeated Filmore and remade his personality with light hypnotherapy. Lucien was then recruited into a new hero team under the auspices of S.H.A.D.E.

NIGHT BOY
Before realizing he had light-based superpowers, Raymond Terrill was known as Night Boy because he only came out when it was dark.

ALLIES Green Arrow, Black Canary

ENEMIES Komodo, Shado, The Underground Men

AFFILIATIONS Teen Titan

The half-sister of Oliver Queen and daughter of archer-assassin Shado, Emiko Queen was kidnapped as an infant and reared by Komodo. Trained as an archer, Emiko wounded Green Arrow in her first battle, unaware of their family ties. Raised believing her parents were dead, she learned the truth when she saw them at The Outsiders' headquarters. Enraged, she turned on Komodo, but in the ensuing battle, her father, Robert Queen, was killed. Emiko then executed Komodo, and traveled to Seattle to aid Oliver against the Longbow Hunters.

Emiko wanted the title Green Arrow but Oliver resisted. He trained Emiko until she was ready to strike out on her own. As Red Arrow, Emiko fought alongside Green Arrow and Black Canary to defeat the Underground Men. Their partnership was short-lived, and Emiko reunited with her mother to attack Oliver. However, Emiko later rejected Shado to carve out her own path singly, with Oliver, and as part of the Teen Titans.

KILLER QUEEN
After first joining forces with her brother Oliver, Emiko fought him to be the next Green Arrow—until, like most siblings, they made their peace.

ALLIES Blue Devil, Rose Wilson, Zachary Zatara

ENEMIES Niles Caulder, Kid Crusader

AFFILIATIONS Teen Titans, Young Justice

Before meeting Daniel Cassidy, Eddie Bloomberg—a gopher in his aunt's film production company—dreamed of being an actor. Once he saw Cassidy's Blue Devil in action, however, Eddie would settle for nothing less than being a hero. At first, he used Cassidy's special effects as Kid Devil, acting as his idol's sidekick—but with little success or approval. Demon Neron offered Eddie true power in exchange for his soul—a trade he soon came to regret.

After losing his powers, Eddie returned to Hell and discovered Neron had only activated his metagene and never truly bestowed demonic abilities. Even without powers, Eddie continued to assist the Teen Titans, ultimately sacrificing his life to save theirs. He was resurrected following Rebirth, only to be killed by the original Wally West during a murder spree at the Super Hero Mental Health facility, the Sanctuary.

DATA

DEBUT *Batman* (Vol. 1) #357 (Mar. 1983)

REAL NAME Jason Todd

BASE Mobile

HEIGHT 6ft **WEIGHT** 200 lbs **EYES** Blue **HAIR** Black

POWERS/ABILITIES Expert martial artist trained by Batman and secret order All-Caste; skilled detective and gymnast; street smart and a natural leader; expert marksman

ALLIES Bizarro, Artemis, Starfire, Arsenal, Batman

ENEMIES Untitled, Rā's al Ghūl, Black Mask

AFFILIATIONS The Outlaws

Jason Todd was the second Robin, and easily the most troubled. Angry and with a desperate need to prove himself, Jason's impulsive behavior led to his death at the hands of The Joker. Resurrected to become the heroic Red Hood, Jason now walks his own path, learning to handle the anger that forged him.

Batman knew Jason Todd was bold when Jason stole the tires off the Batmobile. With his dad in prison and his mother presumed dead, teenage Jason was trying to get by any way he could on the streets of Crime Alley. When Batman caught Jason red-handed, instead of punishing the boy, he bought him dinner. After enrolling Jason in Ma Gunn's School for Wayward Boys and then soon discovering Ma Gunn was running a secret crime ring from her orphanage, Batman took Jason in as the ward of his secret identity, Bruce Wayne. Batman trained Jason, and the sharp teen became the second Robin, replacing Dick Grayson, who had left to join the Teen Titans and would rename himself Nightwing.

Jason always had an edge to him, and that unchecked rage would soon lead to his death. When Jason discovered his mother was alive, he tracked her down, only to be brutally killed by The Joker. Through the help of Talia al Ghūl and the restorative properties of the Lazarus Pits, Jason was reborn. Angry at Batman for not punishing The Joker more severely for his death, Jason adopted the identity of the Red Hood, a name associated with The Joker's early years in Gotham City. He then set out to fight crime by breaking two of Batman's most important rules: no guns, and no killing.

The Red Hood would eventually form The Outlaws, a team of likeminded vigilantes. Jason has matured and mellowed a bit because of their companionship, although his methods are still much too severe for Batman's tastes.

ON THE RECORD

In his earliest appearances before *Crisis on Infinite Earths*, Jason Todd was a veritable clone of Dick Grayson. His parents were aerialists, and when they were murdered by Killer Croc, he joined Batman's war on crime. He adopted a costume exactly like that of Dick Grayson, and even dyed his hair black.

Jason was killed in the memorable "A Death in the Family" storyline, and remained that way for years, before being resurrected thanks not just to Talia al Ghūl's machinations, but also Superboy Prime shattering reality.

CALL-IN KILLER

Readers were urged to call in to a special DC 1-900 number to vote for whether Jason lived or died. A version of Jason surviving The Joker's handiwork was also drawn, owing to the uncertainty of the poll's outcome.

ROBIN HOOD

Red Hood opted for a more literal interpretation of his name when he abandoned his red helmet for a lighter-weight hood.

CLASSIC STORIES

***Batman* (Vol. 1) #426-429 (Dec. 1988-Jan. 1989)** The Joker murders Jason Todd with a crowbar and an explosion in the momentous "A Death in the Family."

***Batman* (Vol. 1) #635-638 (Feb.-May. 2005)** In the four-part "Under the Hood" story, Jason Todd makes his full return as the Red Hood, shocking his mentor in the process.

***Red Hood: The Lost Days* #1-6 (Aug. 2010-Jan. 2011)** Jason's resurrection is expanded and further explained in his first solo miniseries.

- 4 Haggor
- 5 Ratchett
- 6 Skallox
- 7 Fury-6
- 8 Dex-Starr
- 9 Antipathy
- 10 Butcher (Rage entity)

Atrocitus is one of "Five Inversions" who survived the Massacre of Sector 666. Manhunter robots carried out the slaughter, but Atrocitus held their creators, the Guardians of the Universe, responsible. Imprisoned for billions of years on Ysmault as part of the Oans' furtive cover-up, Atrocitus eventually broke free and, through magic and the blood of his fellow captives, harnessed his boiling fury.

Building a Central Power Battery to tap the Emotional Spectrum's light of Rage, he dispatched red power rings to find beings similarly wronged and driven by a hunger for retribution. All across the universe, Red Lanterns began exacting fearful vengeance on those deemed to have escaped justice. Their rings constantly stoked their blazing fury.

Possession by a red power ring lasts a lifetime. The bonding is permanent, and the bearer dies in agony if it is removed. Like all Spectrum Warriors, Red Lanterns have their own oath to recite when recharging their rings:

"With blood and rage of crimson red,
Ripped from a corpse so freshly dead,
Together with our hellish hate,
We'll burn you all, that is your fate."

ON THE RECORD

In pre-Flashpoint reality, Atrocitus became concerned that Red Lanterns were usually too consumed with rage to conceive or form light constructs with their rings to solve the situations they encountered. Instead, they would strike with a boiling napalm spew of crimson bile generated from within their bodies. Atrocitus eventually devised a way to restore a degree of rationality to his furious fellows by immersing them in the blood-pool on Ysmault.

THERE WILL BE BLOOD

Atrocitus murdered his fellow Five Inversions and used their blood to power the Red Lanterns' Central Battery. Before long, Hal Jordan and the Green Lantern Corps would feel the wrath of the Red Lantern Corps.

RED BADGE OF COURAGE

Red Lanterns are utterly fearless. Hunger for bloody justice fills them with a fiery fury, blinding them to everything except their targets.

ALL THE RAGE

Even a truly dedicated warrior like Guy Gardner lost all composure when filled with the scalding scarlet fire of Rage.

POWERS/ABILITIES Super-strength, speed, endurance, flight and pyrokinesis; trained scientist and researcher.

ENEMIES Le Blanc, Hammer and Sickle, Doctor Light, Superboy-Prime

With his Russian archaeologist father, Leonid Kovar was investigating a crashed alien vessel when it exploded. As a result, Leonid developed superhuman powers. He offered his services to the state and became Russia's first official Super Hero, Starfire.

While tracking international thief Le Blanc, he met the Teen Titans, subsequently changing his codename to Red Star. When Leonid left Russia to join the Titans, he formed a close relationship with were-woman Pantha and her foster-son, Baby Wildebeest.

Leonid returned to fight crime in his homeland, mostly over the objections of the Russian rulers. However, when the *Doomsday Clock* event triggered an international incident, Red Star grudgingly joined Russia's Peoples Heroes and battled Superman and Firestorm.

FULL CIRCLE

Russian Super Hero Starfire joined the Teen Titans as Red Star, before reluctantly resuming Russian government employ.

RED TORNADO

DEBUT *All American Comics* (Vol. 1) #3 (Jun. 1939) (Ma Hunkel); *Justice League of America* (Vol. 1) #64 (Aug. 1968) (Android John Smith); *World's Finest* (Vol. 1) #0 (Nov. 2012) (android Lois Lane)

POWERS/ABILITIES Generation of super-speed vortexes, flight, limited invisibility, enhanced strength and durability, air blasts and impact-deflection; computerized mind, enhanced senses.

ALLIES Red Volcano, Red Torpedo, Red Inferno, Cyborg, Will Magnus

ENEMIES T.O. Morrow, Amazo, Professor Ivo, Solomon Grundy, The Construct, Doctor Impossible

Red Tornado was constructed by Thomas Oscar Morrow to counteract the Super Heroes who interfered in his schemes. However, the android's frame was possessed by a wandering wind elemental, and achieved unanticipated power and sentience.

Joining the Justice League, "Reddy" enjoyed friendship and loyalty. He took on the human identity John Smith, married Kathy Sutton, and adopted a young orphan, Traya. He has been destroyed and reconstructed repeatedly—with varying degrees of success—leading to serious impairment of function. He was operating on little more than instinct when coopted into the mystic rapid response squad Primal Force.

However, after being appointed overseer and guardian of Young Justice, Red Tornado grew into a wise mentor.

Reddy longed to be human, but when an organic body was created for him, the mind-transfer process was subverted by Amazo and Professor Ivo.

After *Rebirth*, he became part of the Challengers of the Unknown, working with Carter Hall to solve the mystery of Nth Metal and holding back Dark Universe terror Barbatos. He also joined Earth's Super Heroes to help thwart Doctor Manhattan.

SPIN CYCLE

The man-made hero was a caring champion who treasured a humanity he could never share.

ON THE RECORD

After *Flashpoint*, Red Tornado was a robotic shell housing the personality of Earth-2's Lois Lane. When she was killed in the Apokolips invasion, her mind was uploaded to a machine that could generate cyclonic winds—a secret weapon assembled to fight Parademons.

Reunited with her foster-daughter Power Girl, Red Tornado led Earth-2's final fight against eradication, with the help of other doomed heroes such as substitute Batman Thomas Wayne, his granddaughter Huntress, and Kryptonian Val-Zod. Their brave efforts took the fight back to Darkseid, allowing humanity's last survivors to escape destruction in space arks.

STORMING IN

The newly created Red Tornado gategashed a Justice Society meeting and insisted he was once a member of the team.

POWERS/ABILITIES Superhuman strength, speed, and durability; highly advanced unarmed combat skills and swordsmanship, tactical and leadership training.

ALLIES Deimax, Perrillus, Flower of Heaven

ENEMIES Supergirl

AFFILIATIONS Worldkillers, Argo City

Reign was part of a clandestine Kryptonian experiment in which alien embryos were altered to create living weapons of vast power. They were designated Worldkillers

after an ancient myth. Designed to fight and born to kill, five subjects were programmed with a hunger for destruction and gestated in a floating space laboratory. At some point, the scientists abandoned the project, leaving the subjects to grow to term in isolation. The newborns knew virtually nothing of their origins other than what could be gleaned from discarded datacores.

Reign, their leader, clashed with Supergirl in the ruins of Argo City when both went looking for answers. The Worldkiller quickly got the upper hand and Supergirl retreated to Earth. Reign followed, taking with her three companions, who wreaked havoc until Supergirl defeated them. Reign grudgingly withdrew, but swore to return.

ALLIES Highfather, Metron

ENEMIES Green Lantern Corps, White Lantern Kyle Rayner, Green Lantern Hal Jordan

AFFILIATIONS Lightsmiths, Black Lanterns

Relic is a survivor of the universe preceding the current one. A great scientist, he posited that the Emotional Spectrum was a finite resource being exhausted by

the profligate Lightsmiths, who employed its colors as power sources. Ridiculed by his peers, he searched for the reservoir containing the emotional energies and found it in the Source Wall surrounding creation. The Lightsmiths went to war over the dwindling energies and his universe ended.

Relic was preserved in the Source and awoken by Kyle Rayner and the Templar Guardians. Seeing a new cosmos of beings making the same mistakes, Relic declared war on all Lantern Corps, resolved to save this universe. He destroyed Oa and then eradicated the Blue Lanterns before being trapped in the Source Wall, but was released by New Gods Highfather and Metron.

HEIGHT 6ft 1in

WEIGHT 190 lbs

EYES Brown

HAIR White

POWERS/ABILITIES Immortality and resurrection, various metahuman powers; Tektite enhancement, accelerated healing.

ENEMIES Suriel, Body Doubles, Hooker, Vandal Savage

Mitchell Shelley was a biologist working for a clandestine organization to create cutting-edge weapons and tech. His big project was Tektite nanites, intended to allow wounded US soldiers in Iraq to regenerate or at least survive major trauma. After many failures, a breakthrough arrived. Unfortunately, Shelley was caught in a bomb blast and lost an arm. To save his life, his staff injected him with Tektites. The procedure worked and his arm was reattached. However, Shelley then began growing a whole new arm and the reattached arm was removed. Incredibly, this arm grew into a full clone of Shelley and set off on its own. Mitchell was now desperate to track down his clone for further research.

Meanwhile, the clone, which had few memories, searched for its past. Despite suffering from amnesia, it eventually realized it was being repeatedly killed and then resurrected by unknown enemies. Each time it was brought back to life, it possessed a different superpower.

DEATH BECOMES HIM Mitch Shelley's clone died and was resurrected countless times, and on each occasion he found he had a new metahuman ability.

ENEMIES "Commodore" Murphy, Green Team, Mohammed Qahtanii, J.P. Houston, Cecilia Sunbeam

The disgraced and exiled heir to the Murphy fortune began attacking his own son, "Commodore" Murphy, as masked marauder Riot after

being medically altered by wealthy maniac Temple Bellachek. Faking his death, Riot then staged a series of brutal assaults hoping to regain the fortune his son had inherited. Unfortunately for Riot, Commodore had also inherited his father's fascination with metahuman improvement.

Young Murphy had surreptitiously purchased nanite-based armor, which he shared with his associates in the trillionaires-only social club the Green Team. These rich kids perpetually frustrated Riot's murderous attacks, defeating his clone army with ease and even toppling Temple Bellachek's empire. Riot apparently died in a final battle with his son.

POWERS/ABILITIES Superhuman strength, speed, and reflexes; invulnerability; psychic powers.

ALLIES Loren Jupiter, Ray Palmer, Prysm

ENEMIES H'San Natall, the Veil, Haze, Deathstroke the Terminator, Sinestro Corps, Superboy-Prime

Cody Driscoll was abducted by aliens, the H'San Natall. Aboard their ship, he learned that he and other kidnapped kids were part of a breeding program—

human/alien hybrids, designed to counter Earth's Super Hero defenders. As Risk, he and hero Ray Palmer joined a new Teen Titans group. When the volatile team broke up, Cody returned to his Colorado trailer-park home. His adrenaline-triggered powers made him a thrill addict, and he turned to petty crime. He redeemed himself by fighting valiantly during the *Infinite Crisis*, losing his right arm battling Superboy-Prime. Seeking no favors from his former friends, Risk vanished. But when the Sinestro Corps attacked Earth, Risk again tackled Superboy-Prime and had his left arm torn off. His whereabouts are unknown.

EYES ON THE PRIZE Kanjar Ro is a consummate politician and pragmatist, eminently capable of turning any crisis to his personal advantage.

When the Guardians of the Universe died, an alliance of shape-shifting Durlans and barbaric Khunds attacked the Green Lantern Corps. These malignant invaders liberated Ro and several other galactic super-criminals, planning to press them into war service. Ro thus discovered that there was something he despised even more than groups of heroic do-gooders, and he led the Sciencell escapees in a coalition with the Green Lanterns against the invading alien alliance.

When a four-way war

broke out in the Antares system, Dhorian dictator Kanjar Ro used cunning and duplicity to defeat his rivals. Imprisoning his foes, he luxuriated in the sybaritic joys of victory and was totally unprepared when the losers returned, united against him.

The unforgiving victors sold Kanjar into slavery, but he quickly turned the tables on his new owners and became a preeminent slave-trader and arms-dealer. A cosmic wanderer, he roamed space constantly seeking to re-establish a power-base, always looking for ways to exact revenge on those who had humiliated him. His brutal depredations brought him to the attention of the Guardians of the Universe and Kanjar Ro ended up in a Sciencell on Oa.

When the Guardians of the Universe died, an alliance of shape-shifting Durlans and barbaric Khunds attacked the Green Lantern Corps. These malignant invaders liberated Ro and several other galactic

ON THE RECORD

The Silver Age Kanjar Ro was a quintessential alien evildoer. Ro was always hungry for conquest and used a variety of terrifying technologies. He was also small-minded and spiteful, obsessed with vengeance and with making the Justice League of America and Adam Strange his slaves.

Over time, however, Kanjar Ro evolved into an even more savage and bloodthirsty creature—a vile bureaucrat for the militaristic Thanagarians and later a petty dictator in conflict with Vril Dox II and his R.E.B.E.L.S.

ALIEN THREAT

The dictator of Dhor traveled the universe accumulating incredible weapons just to avenge the insults inflicted upon him by so-called primitive humans.

CHAINS OF COMMAND

Despite his devious nature, Kanjar Ro's grand schemes frequently led to his being locked up beside his former possessions and chattels.

REVERSE-FLASH (DANIEL WEST)

DEBUT *The Flash* (Vol. 4) #0 (Nov. 2012)

REAL NAME Daniel West

BASE Belle Reve Penitentiary

HEIGHT 5ft 10 in **WEIGHT** 170 lbs

EYES Blue **HAIR** Brown

POWERS/ABILITIES Uses the extra-dimensional energy known as the Speed Force to travel back in time; costume acts like armor and includes part of the monorail he crashed into that was merged to his body by the Speed Force.

ALLIES Suicide Squad

ENEMIES The Flash, Rogues, League of Assassins

AFFILIATIONS Suicide Squad

Like The Flash, Daniel West gained his amazing powers of speed following an accident. However, unlike his nemesis, West became the Reverse-Flash, using his powers for his own selfish needs. The speedster cared little for those who had to die to help him accomplish his ultimate goal—to use the Speed Force to alter his own past.

SPEED STEALER

The Reverse-Flash killed those connected to the Speed Force, draining them of their energy to make himself more powerful. West even stole Speed Force energy from The Flash himself.

SPECIAL BOND

The Speed Force allowed Daniel West to bond the metal from a monorail to his body. As Reverse-Flash, Daniel could manipulate it at will.

Grodd's attack on Central City. He was saved by the Rogues, who trapped him in their Mirror World base. Daniel escaped by stealing a car but crashed into a new monorail fitted with a Speed Force battery. The accident threw Daniel back to Earth and imbued him with the Speed Force—fusing remnants of the monorail with his body and showing him others connected to the Speed Force. Daniel could now use the Speed Force to time travel, but needed more power. He started killing those connected to the Speed Force. He gained enough energy to travel back to his own past. When he tried to kill his father, the young Daniel and his sister Iris, who witnessed the attempt, were terrified. The Flash arrived and reabsorbed the stolen Speed Force, returning them both to the present. After a brief incarceration, he joined the Suicide Squad but died on a mission, heroically saving innocents from a bomb blast. It has since been discovered that Daniel West has a son, Wallace West. Wallace originally thought he was Daniel's nephew, but The Flash discovered the truth when Daniel was arrested.

ON THE RECORD

Several villains have taken on the role of Reverse-Flash over the years. Eobard Thawne was from the 25th century and a fan of The Flash. He even built his own version of The Flash's Cosmic Treadmill and traveled back in time to meet his hero. However, when Eobard learned that he was destined to become a villain and would die at the hands of The Flash, he went insane and became the Reverse-Flash. In later appearances, he called himself Professor Zoom.

When Wally West became the third Flash, he fought a new Reverse-Flash named Hunter Zolomon, who had once been Wally's friend. Zolomon also went by the name of Zoom.

YOU'RE NO BARRY ALLEN

The original Reverse-Flash, Eobard Thawne, was quickly driven mad by his fixation with The Flash (Barry Allen), and was repeatedly defeated by his idol.

SPEED DEMON

The accident that turned Daniel West into Reverse-Flash created a distinctive red and metallic-gray suit.

RIDDLER, THE

DATA

DEBUT *Detective Comics* (Vol. 1) #140 (Oct. 1948)

REAL NAME Edward Nygma **BASE** Gotham City

HEIGHT 6ft 1in **WEIGHT** 183 lbs **EYES** Blue **HAIR** Brown

POWERS/ABILITIES Expert at creating riddles and death traps; genius-level intellect; computer and electronics whiz; morally corrupt with a penchant for cheating; carries cane in the shape of a question mark from which he can fire electrical blasts or create holograms; makes use of exploding jigsaw puzzle pieces and crossword puzzle nets.

ALLIES Dr. Death

ENEMIES Batman, the Batman Family, The Joker

AFFILIATIONS Arkham Asylum inmates, Secret Society of Super-Villains

The Riddler is a conflicted criminal. His dreams of wealth and prosperity are often at odds with his love of finding a worthy competitor—namely the Batman—to challenge to a game of mental and physical gymnastics.

Edward Nygma (going by Nigma a the time) found his ticket to the big time as an employee of Wayne Industries. Securing the role of advisor to Philip Kane—Bruce Wayne's uncle, who took over the Wayne corporation when Bruce left Gotham City to train to become the Batman—Nigma began plotting his takeover of the city.

An expert strategist, with a genius-level knowledge of history, it was not long before Nygma adopted the guise of a Super-Villain, calling himself The Riddler, and employing the help of fellow criminal Dr. Death after he shut down power to all of Gotham City.

LASER FOCUS

The Riddler loves death traps, and Batman was forced to enter one in order to free Gotham City from the villain's hold.

In The Riddler's twisted mind, he wanted to help evolution by forcing the citizens of Gotham City to either "get smart or die." As a super-storm hit the city, The Riddler blew the retaining walls and grounded the city's blimps. With complete control of the electrical grid, The Riddler created a dystopia of sorts with the city's tunnels flooded and its bridges rigged to explode. Using research stolen from Dr. Pamela Isley (later Poison Ivy), The Riddler reduced the city to a plant-covered wasteland, holding the entire population hostage. With the help of Lucius Fox and James Gordon, Batman took up The Riddler's challenge of wits, and bested the Super-Villain before he could unleash total devastation. Gotham City was freed, and The Riddler was banished to Arkham Asylum for the first of many stays in the infamous penitentiary.

The Riddler would return to plague Batman many times, from fighting The Joker during the "War of Jokes and Riddles," working with the criminal genius called the Designer in order to discover the perfect plot to foil the Batman, to working as a brainwashed faux police detective when Bane briefly took over Gotham City. However, no matter how brilliant The Riddler's schemes, the Dark Knight was always several moves ahead.

ON THE RECORD

The Riddler debuted in the 1940s. His origin revealed that Edward Nigma (the "y" spelling was first used in 1992's *Batman: The Animated Series*) had always been amoral, acquiring an early love of games and puzzles after sneaking a peek at the solution to a classroom jigsaw puzzle assignment.

Later, while working as a carnival barker, The Riddler ultimately chose a life of crime, finding a worthy opponent in the form of Batman. This origin was left largely unchanged by the *Crisis on Infinite Earths* event, although it was later revealed that Edward's true birth name wasn't Nigma at all, but Nashton.

REINTRODUCING THE RIDDLER
In the mid-1960s, The Riddler became a mainstay of Batman's Rogues Gallery, finding all sorts of eccentric, entertaining ways to baffle the Dynamic Duo.

THE WAR OF JOKES AND RIDDLES

A few years ago, The Joker found himself unable to laugh. The Riddler sought to team up with the Clown Prince of Crime, but instead, The Joker shot him in the chest. This sparked the "War of Jokes and Riddles," where the criminals of Gotham City chose sides and the casualties built up. Once The Riddler revealed that he had plotted the entire war to try to solve the riddle of how to make The Joker laugh, Batman was pushed beyond his limits. The Dark Knight had a moment of weakness and attempted to kill The Riddler in a fit of rage. The Joker saved The Riddler's life, and the irony of the situation finally caused The Joker to regain his mad laughter.

WEAPON IN QUESTION
The Riddler is rarely without his signature question-mark cane and bowler hat.

REAL NAME Damian Wayne **BASE** Gotham City and Brooklyn, New York **HEIGHT** 5ft 3in **WEIGHT** 114 lbs **EYES** Blue **HAIR** Black
POWERS/ABILITIES Expert martial artist and assassin trained by the League of Assassins, Batman, and Nightwing; skilled detective and extremely intelligent; very athletic with some gymnastic training; briefly possessed Superman-like powers; weapons include armored suit with Utility Belt and access to the equipment in the Batcave.

While Batman has been known to hide his feelings, Damian Wayne would be a hard son for even the most affectionate father to love. Headstrong, arrogant, and more than a little condescending to his fellow Super Heroes, Damian Wayne is the fifth and current Robin, and has managed to make enemies on both sides of the aisle despite his short tenure as a hero. The son of Bruce Wayne and the notorious League of Assassins leader, Talia al Ghūl, Damian was taught the ways of the League of Assassins by his mother. However, since joining his father, he has sided time and again with the Dark Knight's noble cause.

AT A GLANCE...

Assassin born

The son of Batman and criminal Talia al Ghūl, Damian Wayne was raised by his mother, and constantly surrounded by the members of the notorious League of Assassins. With no qualms about killing those who got in his way, Damian didn't quite fit the mantle of a Robin when he first traveled to Gotham City to live with his father.

Like father, like son

After spending some time with Batman, Damian realized the nobility of the Dark Knight's cause, and wished to become more like the father he began to idolize. To that end, he did his best to put his killer instincts to one side and abide by Batman's uncompromising rules.

Attitude adjustment

Working with Dick Grayson—who had stepped up to be Batman—taught Damian Wayne a thing or two about true heroism and respecting his elders. However, Robin still maintained a trademark arrogance that could alienate his fellow Super Heroes.

Batman and the international terrorist named Rā's al Ghūl have battled for many years. While Rā's wants to "save the planet" by wiping out a huge percentage of the populace, Batman puts human life first and foremost, and has thwarted Rā's plans on many occasions. However, despite the hostility between the Dark Knight Detective and the so-called Demon's Head, the two shared a common affection for Rā's daughter, Talia al Ghūl.

One of Batman's romantic flings with Talia resulted in the birth of a son, a boy named Damian Wayne. Accelerating the boy's growth through artificial means, Talia oversaw Damian's upbringing, training him in the many deadly arts known by Rā's al Ghūl's League of Assassins. Before he turned 10, Damian had mastered the violin, severed a tiger's head, harpooned a shark by hand, and killed humans and Man-Bats alike. He had become an assassin without remorse, one his mother was immensely proud of.

Knowing that her son could possibly be the heir to the al Ghūl empire, Talia presented the boy to Batman, hoping the Dark Knight could guide Damian to become more than the sum of what the masters of the League of Assassins could teach him. Rā's al Ghūl had long wanted Batman himself to take over his empire, but knowing that was impossible, instilling Damian with some of Bruce Wayne's qualities seemed to be the next best thing.

While Batman has faced many challenges, taming Damian Wayne was among the most difficult. At first the boy seemed to be confused by Batman's ethics, but after seeing the Dark Knight in action, Damian realized that his father was a noble warrior.

Damian Wayne first officially adopted the mantle of Robin after Bruce Wayne was sent spiraling through time following a conflict with Darkseid. Realizing that Gotham City needed a Batman, Dick Grayson stepped into the role, with Damian Wayne as Robin by his side. The two fought new villains such as Mr. Toad and Professor Pyg, until Bruce Wayne returned and reclaimed the Batman mantle.

Despite gaining respect for Grayson during their crime fighting partnership, Damian was

THE DEATH OF ROBIN

After Batman returned from traveling through time, he was given a quick glimpse of a future threat called Leviathan. To battle this oncoming foe, Batman formed a global team of heroes called Batman, Inc., and later learned that Leviathan was headed by none other than Damian Wayne's mother, Talia al Ghūl. During a confrontation with Leviathan's forces and the villain Heretic, Robin was mortally wounded. It was a loss that Batman was unable to accept, and the Dark Knight began searching for a way to bring his son back to life.

DEATH IN THE FAMILY

Young Damian Wayne was killed battling the Heretic, an adult clone of himself who had been raised by Talia. Following Robin's death, Batman swore revenge, redoubling his efforts to take down Leviathan once and for all.

"Show me respect, father, and fight me!"

DAMIAN WAYNE

REBIRTH

LEADER OF THE GANG

After being resurrected, Damian Wayne became overbearingly ambitious. Assisting Nightwing in safeguarding Gotham City and teaming up with Superboy (Jon Kent), Robin also convinced Starfire, Raven, Beast Boy, and the new Kid Flash (Wallace West) to join him in a campaign to stop his immortal grandfather and would-be world conqueror Rā's al Ghūl.

Regrettably for Damian, although he arrogantly believed he had everything under control, he had no idea what his new allies thought of him.

ROBIN RISES

Batman was willing to go to hell and back to see his son returned to the land of the living, and had to nearly do just that after the tyrant of the planet Apokolips, Darkseid, stole Damian's casket. It seems that years ago, Talia al Ghūl had discovered a fraction of a crystal called the Chaos Shard. The crystal had helped accelerate Damian's growth and seemed to be a source of renewable energy. Darkseid wanted the shard, and his people took Damian's body and the crystal back to Apokolips with them. Batman was forced to follow in his special Hellbat armor, and finally returned to Earth with his resurrected son.

FITTING FASHION
Damian's costume slightly differed from his predecessors', but kept the trademark yellow cape as a badge of honor.

SECOND CHANCE
After returning to Earth, Batman resurrected his son by plunging the Chaos Shard into the boy's chest. It was a rebirth that briefly granted Damian powers akin to Superman's.

very excited to join forces with his father. But he also found plenty of conflict within himself, especially when he felt forced to destroy the criminal called Nobody. Despite his son's huge misstep, Batman refused to give up on Damian, and worked hard on strengthening their bond. When Damian was murdered by the villain Heretic, Bruce Wayne found himself not just without a partner, but without a son, a truly devastating moment in the Dark Knight's already tragic life.

Determined to reunite with his son, Batman traveled to Apokolips, where he eventually succeeded in resurrecting Damian. Robin then decided to venture out into the world, seeking to correct past mistakes committed while trying to prove himself to the League of Assassins.

However, old habits die hard. Robin teamed with Superman's son Superboy (Jon Kent) on several adventures, but when Superboy took off to join the Legion of Super-Heroes, Robin found himself without a moral compass. Damian formed yet another Teen Titans, but instead of handing villains to the authorities, he began imprisoning them beneath the Titans' hideout. However, these powerful villains proved too strong, so Robin's approach became bolder. He murdered the cult leader Brother Blood, believing that death was the only true solution for career villains. Confronted by Batman, Robin quit as the Boy Wonder and ripped the R chest emblem from his uniform.

While this resignation didn't spell the end for Robin's adventures, it did change his family dynamic. It may now prove impossible for Batman to ever truly trust his son again.

ROBIN AND GOLIATH
While returning artifacts he had stolen from various cultures around the world, Robin employed the help of Goliath, a dragonlike bat creature he had adopted as a pet after slaying its family.

ON THE RECORD

After a brief appearance as a baby in 1987, Damian Wayne was reintroduced into the DC universe again in 2006. With a relatively short career in comics before the dramatic *Flashpoint* event of 2011, Damian's backstory has barely altered despite the shifting landscape of the world around him.

Conflicting backstories

Originally, Damian Wayne was simply the unnamed child of Talia and Batman who was left on an orphanage's doorstep after their romance soured. All but forgotten, when Damian returned in the later continuity of 2006, his backstory was tweaked to reveal he had been raised in a lab, and had never in fact been abandoned by his mother.

Tackling the Titans

Joining the Teen Titans has been a time-honored tradition for Robins, starting with one of the team's founding members, Dick Grayson. While the second Robin, Jason Todd, only briefly served with the team, the third Boy Wonder, Tim Drake, helped found a new incarnation of the team that nearly reached the greatness of Grayson's era. Before the *Flashpoint* series significantly altered the Teen Titans' continuity—erasing almost all the stories that had come before—Damian Wayne had decided the Titans needed his particular skill set. While Dick Grayson volunteered Damian's

services to the Teen Titans as a member—thinking the team dynamic would be good for Robin's social skills—Damian was angered that he was not immediately welcomed as team leader, and his tenure with them was relatively short.

Titan trouble

After leaving the Teen Titans, Damian Wayne was soon back operating with the Batman Family. But even that working relationship was a constant struggle for the headstrong teen.

WHAT CHILD IS THIS?

Damian's name was initially only revealed when he came into Batman's life as a troubled adolescent boy, placing in some doubt that the baby depicted in *Batman: Son of the Demon* and Damian Wayne were one and the same.

He has gone by Robin, Red Robin, and simply Drake, but despite his costume and moniker changes, Tim Drake's mission has never changed. The third Robin to pick up the mantle, and the only one to do so by deducing Batman's secret identity, Tim earned his place at his mentor's side, applying his computer expertise, his natural leadership, and most of all, his tenacity, to help protect and defend the citizens of Gotham City.

Batman needs a Robin. Young Tim Drake was sure of it.

He had studied Batman ever since he saw him for the first time at Haly's Circus. Tim was there the night Dick Grayson's parents died, and learned that Bruce Wayne later took Grayson in as his ward. When he saw Robin in action later by Batman's side, he put two and two together, and deduced the identities of Batman and Robin.

Tim's Batman obsession took up much of his life, despite being a great student who excelled at computer technology. As Dick Grayson grew up and became Nightwing, Tim learned Jason Todd became the second Robin. When Jason later died at the hands of the Joker, Tim watched Batman and studied him carefully, even taking pictures of the Dark Knight during a fight with a criminal. Batman was becoming unhinged, more violent. The solution was simple: he needed a Boy Wonder to help show him the brighter side of his mission.

To that end, Tim tried to convince Grayson to reclaim his role as Robin. But when Dick refused, Tim found himself rushing into action to help Batman fight the villain Two-Face. Hearing Tim's argument for the necessity of a Robin, Batman reluctantly agreed, and soon took Tim under his wing. After months of relentless training, coupled with Tim's natural abilities and determination, a new Robin was born.

Just like the Robins before him, Tim was destined to eventually chart his own path. He adopted the name of Red Robin and partnered with other young heroes like Spoiler and the Teen Titans. He eventually formed a team of heroes he dubbed the Gotham Knights, and they operated out of the Belfry, a hideout he designed in the Old Wayne Tower. While the Knights disbanded over the actions of rogue member Clayface, Tim soon joined some old friends in the heroic team Young Justice. Tim has evolved from rookie hero to seasoned professional over the years, one of Batman's most trusted allies.

ON THE RECORD

In the pre-*Flashpoint* timeline, Tim Drake fought for years beside Batman and evolved over time. He watched in horror as his father was killed by Captain Boomerang, and soon adopted the name Red Robin before striking out on his own. As Robin, he led Young Justice and then the Teen Titans, and formed an on again/off again relationship with Spoiler, who briefly took his place as the 4th Robin.

DARK DAYS

Tim's uniform changed many times during the pre-*Flashpoint* continuity. He originally dropped the green from his suit in favor of black and red, then later chose a black cowl that resembled that of his mentor.

YOUNG JUSTICE

When Tim joined Young Justice, he briefly adopted the hero name Drake. Around this time, Tim unlocked memories of serving in an earlier incarnation of the team. While he seems to be remembering a past timeline that no longer exists, Tim's memories are as real as any in his newly altered reality.

AFFILIATIONS Doom Patrol, Justice League United

Life seemed over for rugged sportsman and compulsive daredevil Cliff Steele when he died in a car crash. However, Cliff's brain was secretly preserved by radical scientist Dr. Niles Caulder and transplanted into a succession of mechanical bodies. Although the savant's motives seemed benevolent, Caulder was in reality a master manipulator who engineered catastrophes so that he could conduct unregulated experiments on human beings. His successes were then press-ganged into his private superteam, the Doom Patrol.

Initially bitter and hostile, Cliff Steele gradually adjusted to his condition and became the backbone of the unit: a hero in every sense of the word.

As Robotman, he faced each incomprehensible danger with a wry wisecrack and every nasty shock life threw at him with unshakable grit and determination. Eventually, Caulder's duplicity was exposed and Robotman became the Doom Patrol's moral compass. Seeing through the deranged genius' machinations, Robotman stayed with the team to limit the damage the fame-obsessed "Chief" might cause and to protect his more vulnerable friends on the squad.

Even this was not enough for the tireless, compassionate thrill-seeker. Robotman began operating as a substitute champion with Justice League United, and came to be regarded as a mentor and elder statesman for the next generation of Super Heroes.

ON THE RECORD

Cliff Steele was not DC Comics' first Robotman. In *Star-Spangled Comics* (Vol. 1) #7 (Apr. 1942), Robert Crane was killed by gangsters, and his best friend transplanted his brain into a marvel of mechanical engineering packed with crime-fighting gadgets. This prototype man of steel even had a faithful, talking-robot dog, named Robbie, to help battle the bad guys. Robert Crane was later reimagined as a scientist in a rebuilt robotic body on Earth-2.

WARTIME HEROICS

Robotman stopped Commander Steel—brainwashed by Nazi Baron Blitzkrieg—from assassinating President Roosevelt, as the rest of the All-Star Squadron rushed to intervene.

Decades later, Rogol Zaar came to Earth on a rage-fuelled quest to eliminate every remaining Kryptonian. He was so strong that even Superman could only fight him to a standstill. Zaar had also managed to destroy the Man of Steel's Fortress of Solitude, including the many inhabitants of confined within the bottled city of Kandor.

Supergirl eventually trapped Rogol Zaar in the Phantom Zone, although he later escaped. He was later apprehended by Superman, Supergirl, General Zod, and the Black Guard of Thanagar.

PHANTOM ZONE KILLER
Rogol Zaar was consumed with mindless hatred for Kryptonians and powerful enough to destroy them.

he generated, and Mirror Master was trapped in a Mirror World. In addition, Snart's sister, Lisa, who was dating Mirror Master and was also present, was separated from her body in astral form.

As Golden Glider, Lisa formed a new Rogues team, cutting Snart out of a heist before going to war with him. Captain Cold rejoined in time to face an invasion of Central City by Grodd's gorilla army, an episode that forced The Rogues to form an alliance with The Flash. The Rogues subsequently ran afoul of the Crime Syndicate, having rejected joining their ranks. After many skirmishes, The Rogues banished Syndicate allies the Secret Society to the Mirror World.

Despite constant membership revisions and frequent internal squabbles, The Rogues remained basically united until Captain's Cold's growing obsession with beating The Flash compelled him to ignore his own three rules. After Snart accepted power upgrades from Luthor's Legion of Doom to become King Cold, The Rogues mutinied. Led by Golden Glider they attacked their former leader in a concerted attack by The Flash and his speedster allies.

The Rogues were low-level criminals

united in their hatred of The Flash. Employing exotic technologies to facilitate their crooked enterprises and in attempts to outfox the Scarlet Speedster, they abided by three rules they viewed as their code of honor: no unnecessary killing, not to use drugs, and not to fail in their crimes.

As The Flash, Barry Allen repeatedly battled The Rogues, each time doling out a bruising defeat. Eventually, Rogues' leader Leonard Snart—alias Captain Cold—tired of being bested and accepted an invitation from research scientist Dr. Darwin Elias.

He approached Snart claiming his Genome Recoder could imbue The Rogues' bodies with the power of their weapons. However, the process malfunctioned; each Rogue gained superpowers, but at a cost. Heat Wave was badly burned; Weather Wizard became emotionally linked to the weather

A NEW START
Having rejected the Crime Syndicate's offer to join them, The Rogues returned to Syndicate's Power Ring and Deathstorm.

AT THE ROGUES' MERCY

In one of their earliest capers, The Rogues teamed up to rob a department store. When The Flash arrived, the villains briefly thought they had disintegrated him with their weapons—only to find he had vibrated through the floor.

ON THE RECORD

Pre-Flashpoint, The Rogues were perennial thorns in the sides of not only Barry Allen but his speedster successors Wally West and Bart Allen. Originally working separately, The Rogues gradually formed partnerships, first as pairs, later in a larger group. Eventually, a number of Rogues reformed, prompting a vicious Rogue War that only ended when Heat Wave and Trickster rejoined the fold. Arguably The Rogues greatest victory came when they murdered Bart Allen at the climax of the "Full Throttle" storyline. Shortly after, during *Final Crisis*, The Rogues rejected membership of Libra's Secret Society of Super-Villains. As a result, they were challenged by a new group of Rogues—each of whom was then killed by the originals.

PRISON PLANET

In the wake of the murder of The Flash (Bart Allen), The Rogues were rounded up by Amanda Waller and the Suicide Squad, deposited on a distant world, and left to fend for themselves.

POWERS/ABILITIES Skilled in hand-to-hand combat

ALLIES Mothman, Saturn Girl, Johnny Thunder

ENEMIES Ozymandias

AFFILIATIONS None

Reggie Long's parents were killed in Ozymandias's attack on New York City, and the trauma of the event cut the young man so deeply that he ended up in a mental institution. Here he befriended inmate Byron Lewis, who had been one of the Minutemen as Mothman. Lewis managed to smuggle in Reggie's father's notes on Rorschach (Walter Kovacs), who had been a patient of his. Mothman also trained Reggie to fight using all the techniques of the Minutemen.

When Reggie discovered that Ozymandias (Adrian Veidt) was responsible for his parents' deaths, he escaped the institution and assumed the identity of Rorschach to take revenge. Reggie could not bring himself to kill his quarry, and was instead persuaded to help Veidt find Doctor Manhattan. The two traveled to an alternate Earth on their quest, but Reggie ended up locked in Arkham Asylum.

Helped to escape by Saturn Girl, Rorschach returned to Ozymandias and they found Doctor Manhattan. It was only then that Reggie discovered the terrible truth: he had been manipulated by Mothman and Ozymandias, and the original Rorschach, whom he had used as his inspiration, had ruined his father's life and career. Devastated, he cast aside his mask and fled, but Batman and Alfred later persuaded him to don it again to help save their world. Reggie returned to his own reality, his last act being to save Ozymandias's life so that he can face justice.

LEGACY HEROES

In his quest to discover which reality Doctor Manhattan had traveled to, the new Rorschach encountered members not only of the Justice League, but also the Legion of Super-Heroes and the Justice Society of America.

THE FIRST RORSCHACH

Walter Kovacs was a masked vigilante, his face obscured by an inkblot pattern of the kind used to assess psychiatric patients. It was this that gave him his name: Rorschach. He became known and feared for his remorseless, brutal brand of justice. Early in his career Rorschach teamed up with the second Nite Owl, but after the Keene Act outlawed costumed adventurers he defied the law and operated as a lone wolf. In the 1980s, Rorschach investigated the murder of the Comedian, recording his findings in his journal. Reuniting with Nite Owl and the new Silk Spectre, Rorschach discovered a plot by Ozymandias to devastate New York City. His comrades agreed to keep it a secret for the sake of world peace, but Rorschach could not. He told Doctor Manhattan to kill him instead, but Rorschach's journal would later reveal everything to a new generation.

ROSE AND THORN

REAL NAME Rose Canton

EYES Green

HAIR Brown

POWERS/ABILITIES Multiple personalities; relentless and remorseless drive to succeed

ALLIES Aunt Cate, Melinda, Mister Mittens

ENEMIES Thorn, Mr. Varker

Teenager Rose Canton's world changed when she woke up with a new rose tattoo and covered in someone else's blood. She couldn't remember anything and couldn't confide in her aunt Cate: It would only get Rose sent back to "the institution." More disturbingly, the popular girls who had tormented Rose at high school wanted to be friends now. Answers arrived as video messages on her phone from someone called Thorn, who looked like Rose.

Rose's father died when she was little. Now Thorn—a manic force of nature—was emerging from Rose's psyche to find out how and why, ripping her way through her dad's nasty old cronies before submerging back inside sweet, innocent Rose. Unless she wanted to return to the asylum, Rose had to let Thorn find out what they both needed to know.

BASE Smallville, Kansas

HEIGHT 5ft 11in

WEIGHT 175 lbs

ABILITIES Steadfast loyalty, acute empathy

ALLIES Lana Lang, Clark Kent, Chief Parker, Kenny Braverman

Pete Ross may have been one of the select few who knew about Clark Kent's incredible abilities from early on. As Clark's powers grew by leaps and bounds, he felt

increasingly scared and alone. Pete kept him grounded with tension-breaking banter about what he'd do if he had superpowers. Pete, Clark, and Lana Lang—the "Three Musketeers"—reunited one last time when Clark left Smallville. Pete wished his friend well in his journalism career, joking that, as he didn't have superpowers, he'd have to be a millionaire instead, or work in his dad's store.

Pre-*Flashpoint*, Pete, Clark, and Lana had also been the "Three Musketeers." When Pete became a Senator, he and Lana married and had a son, but after Pete accepted presidential candidate Lex Luthor's invitation to become his Vice President, the couple divorced. On Luthor's impeachment, Pete became President, returning to Smallville to open a general store when his term expired.

DEBUT *JSA Secret Files and Origins* (Vol. 1) #2 (Sep. 2001)

REAL NAME Veronica Sinclair

HEIGHT 5ft 9in **WEIGHT** 140 lbs

EYES Green

HAIR Black

POWERS/ABILITIES Manipulator, martial artist; assessor of skills and abilities in others

ENEMIES Catwoman, Golden Glider, Vice

Mystery woman Veronica Sinclair loved games and made vast profits compelling others to play them. As well as running numerous casinos—and less respectable gambling ventures—as Roulette, she was a devious and accomplished criminal.

Declaring herself the "Greatest Thief in the World," she challenged other high-profile crooks to prove her wrong. Selina Kyle was one of the underworld figures Roulette most wanted to compete against. As Selina had retired, Veronica forced Catwoman to join her "Race of Thieves" by claiming to have kidnapped children as hostages.

Grotesquely presenting a bag of kids' teeth, Roulette had Selina battle other robbery superstars in a global test, but soon came to regret her rash actions. Selina not only triumphed in style, but also uncovered Veronica's real motives for the rigged competition. Capitalizing on Roulette's crippling obsessive-compulsive disorder, Selina retaliated, punishing her, but also making a deadly enemy of the gambler.

ALLIES Hector Hammond

ENEMIES The Rogues, Justice League, Superman, Batman, The Joker

AFFILIATIONS Secret Society of Super-Villains

When they first showed their hand, the Royal Flush Gang were a quintet of outlandish thieves. They employed a variety of card-themed, reality-warping weapons and gadgets devised by crazy genius Amos Fortune. After the Justice League defeated them, the motif and concept were stolen by numerous crooks and masterminds. Eventually, the Gang became little more than a 52-man-strong mercenary unit riding flying card-sleds.

The entire cadre was killed by The Joker in a feud with Alexander Luthor's Secret Society of Super-Villains, before Amos Fortune returned and franchised the Royal Flush concept throughout America's underworld.

The group's latest incarnation had no access to the advanced weaponry of the originals. No better than a pack of gun-toting thugs, this masked army of opportunistic killers traded off their predecessors' reputations. They rode flying cards while wearing card-suit masks.

After an invasion by Earth-3's Crime Syndicate, the extra-dimensional invaders placed a large bounty on the rebellious Central City Rogues for rejecting their rule. When the Royal Flush Gang attempted to collect the bounty, they proved no match for the Rogues, who wiped them out.

ON THE RECORD

Amos Fortune's Royal Flush Gang utilized arcane card lore and a selection of exotic weaponry. These devices were empowered by Fortune's discoveries in the manipulation of luck. The members were childhood friends from the same juvenile gang, and decked themselves out in costumes based on the suit of Clubs.

Much later, Hector Hammond revived the concept, gifting his squad with metahuman powers and weapons. For psychological impact and its connotations of death, he clad his team in spades.

LUCK OF THE DRAW

The criminal cardsharps always proved that fortune favored the bold, even if they usually folded in the final reckoning.

DEBUT *Seven Soldiers: Frankenstein* (Vol. 1) #1 (Jan. 2006)

REAL NAME Super-Human Advanced Defense Executive

BASE S.H.A.D.E. City, The Ant Farm, Manhattan (exact location highly classified)

NOTABLE MEMBERS **Father Time:** Director; **Ray Palmer:** Chief Science-Liaison; **Agent Belroy:** Psychic intelligence gatherer

ALLIES Frankenstein, the Bride, G.I. Robot Squadron

ENEMIES Army of Monsters, Humanids, Brother Eye, the Rot

AFFILIATIONS Justice League Dark, Creature Commandos, S.H.A.D.E. Net, Checkmate

The Super-Human Advanced Defense Executive

(S.H.A.D.E.) was formed to counteract terrorism and contain all manner of supra-normal dangers to humanity. However, in recent years this ultra-secret government-sponsored group has concentrated exclusively on threats of a supernatural or paranormal nature and has been officially re-designated a "Counter-Disaster Organization." Their remit is to quietly head off metahuman crises before they can seriously impact upon the American public. S.H.A.D.E. is led by immortal superhuman Father Time and utilizes arcane lore and advanced technologies, much of it confiscated from the monsters, aliens, and super-maniacs they have defeated over the decades.

S.H.A.D.E.'s current HQ is a miniaturized city-sized citadel. The Ant Farm is a vast, futuristic fortress inside an indestructible metal globe reduced to three inches in diameter and floating 2,000 feet above New York City. Although S.H.A.D.E. possesses its own highly trained paramilitary force, the bulk of its operations is carried out by specialist operatives, like Frankenstein and the Bride, or the Creature Commandos. They are equipped with extraordinary ordnance from the Toybox—a repository of impounded superweapons, such as blockbusting Nazi War Wheels.

LEGION OF MONSTERS
Grim experience had proved that, for S.H.A.D.E., the best solution to fighting evil monsters was good ones, preferably carrying weapons.

ON THE RECORD

The original S.H.A.D.E. was a counter-intelligence operation created by President Lyndon B. Johnson in the mid-1960s. As metahumans began to proliferate, the power and influence of the unit dwindled, until it was almost forgotten.

S.H.A.D.E. was saved by the *Infinite Crisis*. With all Earth's heroes fully occupied, Father Time became aware of an imminent invasion by the time-rendering Sheeda and orchestrated the government's counterstrike through his own recruits, the Atomic Knights and Freedom Fighters.

THE EXPENDABLES

Father Time was content to let dispensable agents do the dirty work, and use the power of the US government to cover up his actions.

ENEMIES Lex Luthor, LexCorp, Algorithm

AFFILIATIONS The Teen Titans, Justice League, A.R.G.U.S.

Stemming from Operation Paperclip—a US Government project employing captured Nazi scientists on secret projects after World War II—S.T.A.R. Labs was founded by idealistic Garrison Slate. It proudly boasts independence from all governments: Earth's only cutting-edge, multi-disciplinary company specializing in "blue sky" science. It employs radical thinkers unwilling to work for soulless corporations or the military-industrial complex, probing all areas of scientific investigation, testing, exploration, and analysis.

A truly global enterprise, S.T.A.R. Labs has major facilities in many nations, including purpose-built skyscrapers in Manhattan and Metropolis. Non-political and offering immense resources, S.T.A.R. Labs is first port of call for Super Heroes requiring technical expertise, medical aid, or advice in coping with metahuman menaces. S.T.A.R. Labs has fought off takeover bids from Lex Luthor's LexCorp and infiltration from many covert groups, but has frequently been betrayed by its own employees such as Atomic Skull Albert Michaels and Parasite Rudy Jones. The biggest breach of ethics was uncovered recently by Young Justice, who found interdimensional researcher Dr. Glory had been corrupting her data for profit and had endangered Super Heroes Superboy (Conner Kent), and Impulse and Naomi McDuffie. With Glory arrested by the FBI, S.T.A.R. Labs now faces the task of cleaning house and regaining public trust as it continues to deal daily with constantly multiplying dangers of alien or post-metahuman technologies and unchecked, fringe-science innovation.

ON THE RECORD

S.T.A.R. Labs quickly became a global mainstay of the pre-*Flashpoint* DC universe, acting as a prison for metahuman menaces and a medical resource for injured or mysteriously afflicted Super Heroes. The company even briefly operated its own team. S.T.A.R. Corps featured old company alumnus Rampage and a squad of neophyte metahuman anomalies—Brainstorm, Deadzone, Fusion, Ndoki, and Trauma—all created by out-of-control Project Mindstorm, as it probed the mysteries of the human metagene.

PROOF OF CONCEPT

S.T.A.R. Labs' employment package included fun, thrills, good pay, rewarding work, a dental plan—and possible metahuman transformation.

Timothy Karnes was a huge disappointment to the Lords of Hell. Thanks to their infernal magic, he could transform into a monstrous engine of destruction whenever he shouted the acronym of their names; but as Sabbac, he was an ineffectual agent, easily defeated by Earth's Super Heroes. They were far happier when New York City mob-boss Ishmael Gregor murdered a bus full of people as a blood-sacrifice and stole the power from Timothy's expiring corpse.

Reveling in slaughter and chaos, the new Sabbac undertook a vicious campaign to amass wealth and bring about Hell on Earth. When he opened a portal and started recruiting demons from the Pit, he was routed by the Outsiders. Sabbac has returned many times, allying with coalitions of Super-Villains and the demon Neron.

AFFILIATIONS Ganthet and Sayd, Blue Lantern Corps, New Guardians

Bro'Dee Walker was the first Blue Lantern, selected by Oans Ganthet and Sayd after they quit the Guardians of the Universe to create a corps empowered by hope. A cleric on the doomed planet Astonia, Walker was chosen for his ability to inspire his people in the face of extinction. With his blue ring, he reinvigorated Astonia's sun, saving his race. He then rescued Hal Jordan and his comrades from Red Lanterns and later helped repel the rampaging risen dead during the *Blackest Night*. His blue light of Hope, combined with the green of Will, proved devastatingly effective against the Black Lanterns.

Bro'Dee despaired when the Blue Lantern Corps was wiped out by the fanatic Relic. His ring left him, but when his hope for the future finally returned, he regained the blue ring and set about spreading harmony throughout the cosmos once more.

ON THE RECORD

For tyrants and villains, Hope is the most dangerous hue of the Emotional Spectrum. A being possessing hope cannot be cowed or controlled, only killed. Despite the Guardian's misgivings and plans to destroy free will, Saint Walker became a trusted ally of the Green Lanterns and served with distinction in Kyle Rayner's multi-spectrum task force, the New Guardians. His assistance was crucial in crushing the Oans' oppressive Third Army.

SAND

DEBUT *Adventure Comics* (Vol. 1) #69 (Dec. 1941)

REAL NAME Sanderson "Sandy" Hawkins

BASE Brooklyn, New York

HEIGHT 5ft 11in **WEIGHT** 162 lbs **EYES** Blue **HAIR** Blond

POWERS/ABILITIES Geokinesis, silicate transformation and phasing, extended lifespan, psychic affinity with the planet, precognitive dreams; skilled detective and criminologist, trained in combat.

ENEMIES Johnny Sorrow, Mordru, Ian Karkull, Geomancer, Injustice Society, King of Tears

AFFILIATIONS Justice Society of America, All-Star Squadron, Young All-Stars

Sandy Hawkins started his adventurous life during World War II as sidekick to Sandman Wesley Dodds. Hawkins learned crime-solving skills from his brilliant senior partner before succumbing to a tragic accident. During a laboratory experiment to improve their crime-fighting arsenal, Sandy was accidentally transformed into a huge, raging silicoid monster. Fearing his experiment had created a pitiless menace, Dodds tranquilized the inarticulate horror, keeping it imprisoned and unconscious for decades. Sandy at last revived and escaped during an earthquake. His transformation had attuned him to Earth's structure and he gradually learned to regain his human shape. His new abilities included turning into sand and traveling through geological strata at incredible speeds, hence his new moniker—Sand.

With Dodds disabled by age and infirmity, Sandy inherited his arsenal, leading a multi-generational Justice Society of America. After adopting his mentor's codename—and his awful power of prophetic dreaming—Sand stood down to become the JSA's covert intelligence-gatherer. A tireless avenger of injustice, Hawkins was excised from the timeline by Doctor Manhattan but returned to continue his anti-crime crusade when the Justice Society was restored to life and history.

NO SLEEP FOR THE WICKED
No matter what form he took, Sand was a legacy hero who took his glittering heritage and evil-crushing duties seriously.

ON THE RECORD

Sandy the Golden Boy's Golden Age debut coincided with Sandman's abrupt transformation from an enigmatic, gas-masked mystery man into a bombastic masked acrobat, battling gangsters while haunting their dreams with two-fisted retribution. Years later, Sandy was reintroduced in a 1974 Justice League/Justice Society team up that revealed his decades of petrification and suspended animation.

His restoration to human form in 1982 hinted that he may have gained powers from the experience, but it took the JSA's 21st-century revival to confirm it.

CRIME'S WORST NIGHTMARE
The Sandman and Sandy tirelessly pursued evildoers in their dreams and then dealt swiftly and forcefully with them in the real world.

SANDMAN (WESLEY DODDS)

DEBUT *Adventure Comics* (Vol. 1) #40 (Jul. 1939)

REAL NAME Wesley Dodds

HEIGHT 5ft 11in

WEIGHT 172 lbs

POWERS/ABILITIES Brilliant detective; gifted inventor specializing in physics, chemistry and engineering; skilled acrobat and fighter; employs gas gun and wirepoon grappling device; prescient dreams of evil deeds

ALLIES Sandy Hawkins, Dian Belmont, Speed Saunders

ENEMIES Scorpion, Dr. Death, Phantom of the World's Fair

AFFILIATIONS Justice Society of America

One of DC Comics' oldest heroes, Sandman was inspired by 1930s pulp-fiction stars. Sporting a suit, hat, cape, and gas-mask, he employed his detective skills, sleeping gas, and other gimmicks against a legion of crooks.

Touched by the power of Morpheus, Lord of Dreams, World War I veteran Wesley Dodds was plagued by nightmares of evil deeds. Eventually he realized these were prescient visions, and used his vast fortune, scientific genius and years of experience as a world traveler to create the Sandman: eerie mystery man stalking America's vilest human predators. He was a founder of the Justice Society of America, fighting uncanny menaces and battling the military might of Nazi Germany and Japan, but was always most comfortable hunting the darkest examples of human evil.

During World War II, Sandman switched to gaudy tights and traded his gutsy girlfriend Dian Belmont for a sidekick: Sandy the Golden Boy. After years in retirement, Sandman returned in the 1960s, he reverted to his moody original gear and methods. When Doctor Manhattan tampered with the timeline, he was seemingly erased from existence, but has since returned with his JSA comrades to a restored reality.

IN THE SHADOWS
Even in a doomed world, Sandman found what was necessary for humanity to survive.

ON THE RECORD

After Flashpoint, Sandman was reimagined on Apokolips-devastated Earth-2. With Superman, Batman, and Wonder Woman killed by Darkseid's forces, a World Army arose to unite and safeguard the remains of humanity. Canadian super-spy Wesley Dodds was the "Sandman": an infallible, teleporting combat-master, expert with gas weapons, leading a personally trained cadre of black ops specialists. When Earth-2 was finally consumed by Apokolips, Sandman was instrumental in securing a fleet of colony ships to ferry the last survivors of humanity away from their doomed world.

THE SLEEP OF THE UNJUST
The Sandman punched heads and gassed goons, scattering sand calling-cards as a reminder to his targets to stay honest—or face the consequences.

POWERS/ABILITIES Telepathy, hypnotism, mind-control.

ALLIES Lightning Lord, Cosmic King

ENEMIES Saturn Girl, Legion of Super-Heroes, Superman, Batman

Eve Aries grew up in the telepathic community of Titan, but suffered a radical personality shift after leaving the influence of Saturn's moon.

On her world, wicked thoughts and anti-social behavior were practically unknown and deviant attitudes were easily detected and rapidly addressed. Once beyond her people's influence, Eve was gripped by criminal tendencies and started using her psionic gifts to dominate lesser minds. The further Eve strayed from Titan, the more evil she became.

Saturn Queen went on a spree of robbery and worse, teaming with Lightning Lord and Cosmic King. They formed a Legion of Super-Villains, battling their own era's heroes and, after stealing time-travel technology, attacking Superman in his own time in an attempt to remake history.

SAWYER, MAGGIE

DEBUT *Superman* (Vol. 2) #4 (Apr. 1987)

REAL NAME Margaret Ellen "Maggie" Sawyer

BASE Metropolis

POWERS/ABILITIES Skilled detective, trained in special weapons protocols.

ALLIES Superman, Batman, James Gordon, Lois Lane, Batwoman (Kate Kane), Harvey Bullock

ENEMIES The Weeping Woman, Medusa, Ceto, Mother of All Monsters, Nocturna

AFFILIATIONS Metropolis Special Crimes Unit, G.C.P.D.

After her first marriage ended, Maggie quit the Metropolis Police Department to join the Gotham City force. While investigating the murderous Weeping Woman, Sawyer

became romantically involved with Kate Kane aka Batwoman.

Sawyer was tipped to succeed James Gordon as Commissioner, but when he was framed for murder, the G.C.P.D. slipped back into old corrupt ways under interim Commissioner Jack Forbes. Sawyer worked with honest cops Jason Bard and Harvey Bullock to expose Forbes and restore Gordon. When her relationship with Kane foundered, Sawyer returned to Metropolis to head the city's Special Crimes Unit, facing threats such as Doomsday and the Legion of Doom, along with more insidious menaces like Intergang and the Invisible Mafia.

SATURN GIRL

DEBUT *Adventure Comics* (Vol. 1) #247 (Apr. 1958)

REAL NAME Imra Ardeen

BASE Legion of Super-Heroes HQ, 31st-century New Metropolis

POWERS/ABILITIES Wide array of psionic abilities including telepathy, mind-reading, thought-casting, mind-control, and illusion generation.

ALLIES Superboy, Garth Ranzz, Rokk Krinn, Superman, United Planets President R.J. Brande

ENEMIES Horraz Collective, Crav the General Nah, Mordru

AFFILIATIONS Legion of Super-Heroes, United Planets Youth Delegation for Peace

Imra Ardeen is a supremely powerful telepath, trained by elite mentalists on her birthplace, Saturn's moon, Titan. She was invited to join the United Planets Youth Delegation for Peace, with fellow exceptional teens Rokk Krinn and Garth Ranzz. While being interviewed by United Planets President R.J. Brande, their ship was attacked by terrorist species the Horraz Collective. The assault was repulsed by the teens and opportunistic Brande suggested a chance to make a real difference to civilization by reviving the mythic "Age of Heroes" as a Legion of Super-Heroes that could operate like Metropolis' legendary champion Superman. Imra realized that this was how she could best use her amazing psionic abilities.

When the Legion was established, Imra time-traveled to recruit Superboy Jon Kent, and became embroiled in the time-tampering of Doctor Manhattan and was largely responsible for undoing his machinations and restoring edited time, and Super Heroes like the Justice Society of America, to Earth's history. She then helped the last survivors of Krypton punish the beings who actually destroyed the planet.

Her greatest achievement thus far is bringing United Planets founder Jon Kent into the Legion of Super-Heroes in preparation for an impending time of "Great Darkness" and multiversal doom.

ON THE RECORD

Saturn Girl was the first female comic book character to lead a team. When it was revealed that a Legionnaire would die on duty, she orchestrated events to be the only active Legionnaire. Lightning Lad uncovered the plot and died instead, but Imra brought him back, and won a second term as leader.

She later married Lightning Lad and had a son, Graym, unaware that their child had a twin whom Darkseid had stolen and turned into the monstrous Validus. When the secret was exposed, Imra convinced Darkseid to restore the child to human form. Now Legion Reservists, Imra and Garth aid the team when needed.

THE TEAM COMES FIRST fiercely protective, Saturn Girl would go to any lengths and make any sacrifice to ensure the safety and wellbeing of her comrades.

ALLIES Fellow Scarabs

ENEMIES Red Robin, Spoiler, Batman

AFFILIATIONS Covenant of Ka

The killer for hire known as Scarab first arrived in Gotham City when she was hired by another villain, Johnny Warlock, to assassinate Robin (Tim Drake). However,

Scarab took the contract during a time of great turmoil between Batman and Robin; Tim Drake had temporarily quit his position as the Dark Knight's closest ally, which resulted in Batman enlisting Stephanie Brown as a replacement Robin.

Nevertheless, Scarab began targeting boys who met Robin's description until she was defeated by Stephanie and Batman. When Tim Drake graduated to the position of Red Robin, he would clash with Scarab several more times, discovering she was just one of many assassin Scarabs working for the Covenant of Ka syndicate.

SCAVENGER

DEBUT *Aquaman* (Vol. 1) #37 (Jan.–Feb. 1968)

REAL NAME Peter Mortimer

HEIGHT 5ft 9in **WEIGHT** 176 lbs

EYES Brown **HAIR** Brown

ALLIES Black Manta, Aquamarines

ENEMIES Aquaman, Tula, Mera, Dead Water

AFFILIATIONS Secret Society

Sub-sea thief Scavenger is one of Aquaman's greatest foes. Super-Villain Graves even grilled Scavenger to learn more about the Atlantean.

After Atlantis attacked Boston, Scavenger salvaged valuables from the ruins. Aquaman believed Scavenger was taking Atlantean weapons, but he was actually preparing an invasion of Atlantis—one the Sea-king barely managed to repel. Scavenger joined the Secret Society of Super-Villains, but was maimed in action. Hired by the US government to investigate mutations, Mortimer reluctantly worked with Aquaman and the Aquamarines.

Scavenger now understands the benefit of working with a powerful crowd and is constantly seeking allies. He has even been spotted in his armored suit at a Legion of Doom villains mixer.

SEA DEVILS

DEBUT *Showcase* (Vol. 1) #27 (Jul.–Aug. 1960)

NOTABLE MEMBERS Dane Dorrance;

Judy Walton; Nick Walton

ALLIES Aquaman

ENEMIES Captain Moller

AFFILIATIONS Interpol

Seafaring vigilantes the Sea Devils are led by former Navy SEAL Dane Dorrance. The team also includes Judy and Nick Walton who were reputedly responsible for bringing down an oil rig mid-construction, among similar plots.

When the Sea Devils found Captain Moller using stolen Atlantean weaponry to kill whales, he turned his weapon on them. Aquaman came to their rescue, but Dane was angered, as Atlanteans had recently attacked surface people because of Aquaman's half-brother, Ocean Master.

The Devils and Aquaman joined forces to arrest Russian mobsters involved in toxic waste dumping, and destroyed a colossal mutated fish created by pollution. The Sea King made the Devils his Surface Liaisons and gifted them Diplomatic Immunity.

SCANDAL

DEBUT *Villains United* #1 (Jul. 2005)

REAL NAME Scandal Savage

HEIGHT 5ft 10in **WEIGHT** 143 lbs

EYES Brown **HAIR** Brown (with blue streak)

POWERS/ABILITIES Expert fighter, natural leader, intelligent; gauntlets with retractable blades.

ALLIES Ragdoll, Jeannette, Secret Six

ENEMIES The Riddler

The daughter of infamous criminal Vandal Savage, Scandal hasn't quite followed in her dad's footsteps, but she hasn't led a civilian's life either. Blackmailed

by the Riddler, who threatened to kill her two wives, Scandal was forced to do his bidding as the villain kidnapped Thomas Blake (the future Catman). Fearing for Blake's sanity, Scandal brought him a kitten to keep him company in his solitary jail cell.

Later—in company with two other mercenaries, Ragdoll and Jeannette—Scandal was forced to battle the Secret Six, Catman's allies. With neither team wanting to harm the other, they developed a mutual respect, especially when the Secret Six brought the Riddler to justice. Scandal subsequently offered to look after the young Secret Six member Black Alice, when it seemed as if she was being pursued by nearly every sorcerer in the world.

SCARLET

DEBUT *Batman and Robin* (Vol. 1) #1 (Aug. 2009)

REAL NAME Sasha (last name unknown)

BASE Gotham City

HEIGHT 4ft 6in **WEIGHT** 78 lbs

EYES Blue **HAIR** Red

POWERS/ABILITIES Adept hand-to-hand combatant trained by the Red Hood.

ALLIES Red Hood

ENEMIES Professor Pyg, Flamingo

A young girl named Sasha traveled to the United States to start a new life with her father, Niko. When he was hired as a henchman by the criminal Mr. Toad,

Niko was lucky to escape his first encounter with Batman (Dick Grayson). Niko went to his apartment, but before he could get away with Sasha, the pair were ambushed by the murderous scientist Professor Pyg, who placed a Dollotron mask on them both to control their minds. Freed by Robin, Sasha fought back against Pyg, setting the villain on fire.

Sasha later smothered her father in his hospital bed as a mercy killing, and was discovered by the Red Hood (Jason Todd) and became his vigilante partner, using the codename Scarlet. They fought foes including the Flamingo and the Menagerie, often employing a deadlier brand of justice than Batman.

SCORN

DEBUT *Superman* (Vol. 2) #122 (Apr. 1997)

(Ceritak); *Detective Comics* (Vol. 2) #22 (Sep. 2013) (Clyde Anderson)

BASE Metropolis, mobile

HEIGHT 12ft **WEIGHT** 975 lbs

EYES White **HAIR** White

POWERS/ABILITIES Superhuman strength and senses; flight; tracking vision.

The hulking creature known as Scorn is actually named Ceritak, a citizen of a bottled city created by the sorcerer Tolos. His father, Cerimul, was a Council Elder of the city, but Ceritak was a rebel, and escaped the confines of his bottled prison when Superman weakened the dimensional barrier between the city and the rest of the world.

Ceritak was dubbed Scorn by the media, despite only wanting to explore the world, often by the side of his love, Ashbury, daughter of *Daily Planet* writer Dirk Armstrong. Making Metropolis his home, Scorn did his best to protect the city during his short time there, fighting the likes of the Cyborg Superman.

After *Flashpoint*, small-time criminal Clyde Anderson used the name Scorn. Bearing a grudge against the G.C.P.D., Anderson teamed up with the Super-Villain Wrath, but when Scorn didn't reach his target number of kills, he was murdered by his partner.

THE WRATH OF WRATH
The new Scorn was Wrath's partner, until the villain murdered him for not eliminating enough police officers.

BIG BLUE
Belying his threatening appearance, Scorn had a kind heart and helped to defend Metropolis.

SCARECROW

DATA

DEBUT *World's Finest Comics* (Vol. 1) #3 (Fall 1941)

REAL NAME Dr. Jonathan Crane

BASE Gotham City

HEIGHT 6ft **WEIGHT** 140 lbs

EYES Green **HAIR** Brown

POWERS/ABILITIES Near genius intellect; brilliant chemist and psychiatrist; weapons include fear gas that causes victims to experience their worst nightmares.

ALLIES Professor Pyg, Merry-Maker, Harley Quinn, Mr. Freeze

ENEMIES Batman, the Batman Family

AFFILIATIONS The Secret Society of Super-Villains

FEAR OF THE FATHER Surrounded by skeletons and other horrors that would scare an adult, young Jonathan Crane grew up with fear, and would later embrace it.

young boy, his father would hook him up to heart rate monitors and shove him beneath a trap door. The small, dark chamber beneath was stuffed full of macabre items more suited to the set of a Gothic horror movie. As soon as Jonathan was set free by his father, the terrified boy would run as fast as he could into a nearby cornfield, screaming and scaring away the birds.

A shy boy, mocked by his peers, young Jonathan focused on his studies. He became a professor of psychology, but his peculiar teaching methods terrified his students and he was fired. He then became a psychologist, but after attacking a patient, decided to accept his "true self" and adopted the name and costume of the scarecrow on his family farm. He embarked upon a criminal career that used his specially designed fear toxins to terrify victims. Becoming a notorious figure in Gotham City, Scarecrow was recruited into the infamous "War of Jokes and Riddles" on the side of the Riddler, and became a brainwashed faux police detective during Bane's recent takeover of Gotham City. He's even branched out on occasion, taking his special brand of terror to Blüdhaven to terrorize Nightwing.

ON THE RECORD

While he is a key foe in Batman's modern-day Rogues Gallery, the Scarecrow's criminal career got off to a fairly slow start. Debuting in the 1940s, the villain only appeared once more before returning to commit new crimes in the 1960s.

The Scarecrow's ascendancy through Gotham City's criminal ranks continued in the following decades. His character grew darker and increasingly psychotic as he took on Batman and the Batman Family in such high-profile stories as *Batman: Dark Victory*, "Hush," "Knightfall," and even the cosmic saga *Blackest Night*.

NATURE OF THE BEAST Before *Flashpoint* altered reality, Scarecrow was given a power upgrade courtesy of a scheming Penguin, who transformed Crane into the hulking, super-powered Scarebeast.

WHO SCARES THE SCARECROW?

The Scarecrow has spent his life becoming a bogeyman to scare innocents. Unluckily for Crane, he often clashes with a creature of the night that frightens even him: Batman.

SCARE TACTICS

From an early age, Jonathan Crane learned to turn his own fears into a weapon against those who dared to oppose him.

CLASSIC STORIES

***World's Finest Comics* (Vol. 1) #3 (Fall 1941)** The Scarecrow debuts in Batman's chapter of this title, which stars both the Dark Knight and Superman in their own separate features.

***Batman* (Vol. 1) #189 (Feb. 1967)** Not glimpsed since the Golden Age, the Scarecrow returns to frighten a new generation of readers, armed with his signature fear gas.

***Batman* (Vol. 1) #457 (Dec. 1990)** Fledgling Robin Tim Drake proves his worth when he saves Batman from the Scarecrow and the villain's latest fear gas concoctions.

EYES Blue **HAIR** Blond

POWERS/ABILITIES Possesses a Green Lantern carved from the mysterious Starheart and corresponding ring capable of mystic force generation, flaming construct manipulation, force-field barriers, and flight, among other functions.

ALLIES The Flash (Jay Garrick), Wildcat (Ted Grant), "Doiby" Dickles

ENEMIES Solomon Grundy, Vandal Savage, Injustice

Society of America

AFFILIATIONS Justice Society

FORCE OF WILL
While he's a bit older than when he first slipped on the Green Lantern Ring, Alan Scott is still vital and kicking after 80 years of crime fighting.

As the Green Lantern of the Golden Age, Alan Scott is a member of the Justice Society of America, the same team he helped found back in the 1940s. A survivor and a thinker, Alan has served as an inspiration to not just Green Lanterns, but to everyone who knows a true hero when they see one.

Alan Scott was an engineer with an uncanny way of figuring out how things worked. He designed a bridge that could hold a great deal of weight, but before he could receive a healthy government contract for mass production, his bridge was sabotaged by a criminal and rival engineer named Dekker.

On July 16, 1940, Dekker's men blew up Scott's bridge, causing a train Alan was riding to crash. Everyone aboard the train was killed, including Alan's lover, a man named Jimmy Henton. Pinned under some wreckage, Alan would've died as well, if the dying Jimmy hadn't pointed out a mysterious glowing green light right within Alan's reach. It was a Green Lantern.

Enraged at the murderous Dekker, Alan sought him out. He used the power of the mysterious Green Lantern to pass right through the wall of Dekker's office. Dekker's men shot at him, but the bullets had no effect. The criminals couldn't believe what they were seeing, and assumed Alan must be a ghost. Alan brought them to justice, and soon became the Super Hero known as Green Lantern.

A founding member of the wartime Justice Society of America, Alan would be with the team in later incarnations as well, serving with the Justice Society into the present day. With his aging slowed by his Green Lantern, carved from the mystical Starheart, Alan shows no signs of retiring, and serves as a mentor to younger Society members, including Stargirl.

ON THE RECORD

Alan Scott was the original Green Lantern, debuting in 1940 to battle all forms of evil with a magic ring. He shone for over a decade as one of the brightest lights of the Golden Age before changing tastes benched him and many other costumed champions.

Scott returned in the 1960s as a hero from alternate Earth-2; an affable elder statesman sharing experiences and adventures with his science-based counterpart Hal Jordan and other heroes of the Justice Society of America.

After *Crisis on Infinite Earths* rebooted continuity, Scott was given a new lease of life as the world's Sentinel. Still later, he would be reintroduced as a new Earth-2 hero following the *Flashpoint* miniseries event, until his post-*Crisis* characterization was restored during the *Doomsday Clock* miniseries.

CREATURE OF THE NIGHT
The earliest appearances of the Emerald Gladiator played up his mystical origins and uncanny power, as he terrorized crooks and killers.

SHAPE OF THINGS
Alan Scott's Green Lantern Ring is more lantern-shaped than those worn by the Green Lantern Corps members.

THE OATH
When Alan met with the mother of Jimmy Henton, she spoke of her son's inner light, and inspired what would become Green Lantern's often repeated oath.

CLASSIC STORIES

Suddenly rejuvenated as Sentinel, Alan discovers his green flame is the Starheart, repository of ancient magic, bound by the Guardians of the Universe when the cosmos was young.

SECRET SIX

DEBUT *Secret Six* (Vol. 1) #1 (Apr.–May 1968)

BASE Gotham City, suburbia

MEMBERS/POWERS **Catman** (Thomas Blake): Feline strength, power, speed, agility, and reflexes; **Ventriloquist** (Shauna Belzer): Telekinesis, voice manipulation, ventriloquism; **Black Alice** (Lori Zechlin): Absorption of magical powers; **Porcelain** (Kani): Able to turn objects brittle and fragile;

Big Shot (Damon Wells/Ralph Dibny): Transformation, super-strength, pliable body; **Strix** (Mary Turner): Former Talon, trained human weapon with exceptional proficiency in unarmed combat and acrobatics.

ENEMIES The Riddler, Agent Robbins, Punster, Susan Dibny, Felix Faust, Aquaman, Shiva Woosan

The **Secret Six** is the designation given to a succession of clandestine, non-governmental special ops teams. All have been run by a leader dubbed Mockingbird who compels the services of the six through coercion and blackmail. The most recent incarnation was created by The Riddler, who tested a disparate group of metahumans he believed had stolen a gem he craved. After a fruitless year of isolation and torture, the Riddler (aka Mockingbird) allowed his suspects to escape after planting a mole within their ranks.

The fugitive Secret Six retreated to suburbia, laying low and slowly forging close bonds of fellowship. Following a series of attacks by Mockingbird's hirelings and a final confrontation with the Prince of Puzzlers, they solved the mystery and exposed the infiltrator. Despite this betrayal, the outcasts opted to stick together. Catman, Ventriloquist, Porcelain, and Big Shot grew increasingly protective of emotionally scarred Strix and especially Black Alice. The latter's predatory, magical nature began to manifest itself, drawing the group into a universe-threatening conflict with the planet's supernatural community and the ancient League of Assassins.

WALKING THE LINE
The Secret Six were wanted by criminals and cops, but only wanted to live together in peace and safety.

SECRET SIX—THE INFECTED

When Dark Multiverse bat-god Barbatos sought to absorb reality, his agent The Batman Who Laughs created a virus that empowered and twisted heroic personalities. The first to transform were Shazam (King Shazam), Donna Troy (Deathbringer), James Gordon (The Commissioner), Supergirl (Kara Zor-El), Blue Beetle (Scarab) and Hawkman (Sky Tyrant): a new and lethally contagious Secret Six ready to lay low Earth's defenders with deadly violence and a horrific viral load.

ON THE RECORD

The first Secret Six were five exceptional humans used by scientist August Durant to remove terrorists and criminals beyond the law's reach. Actor King Savage, boxer Tiger Force, make-up artist Lili de Neuve, model Crimson Dawn and magician Carlo Di Rienzi worked beside Durant, but no-one could be sure which—if any of them—was pulling their strings as the mysterious Mockingbird.

When Durant and his teammates were murdered, Di Rienzi revived the project with new conscripts.

TRUST NO-ONE

The team never trusted each other: they knew one of them was a manipulating blackmailer who held their lives in his or her hands.

SERGEANT ROCK

DEBUT *Our Army at War* (Vol. 1) #81 (Apr. 1959)

REAL NAME Franklin John Rock

BASE Various Operational Theaters of World War II

HEIGHT 6ft **WEIGHT** 183 lbs **EYES** Blue **HAIR** Auburn

POWERS/ABILITIES Excellent marksman and militarily trained combatant; peak human endurance, combat-honed instincts, overwhelming determination, leadership skills, and personal charisma.

ALLIES The Losers, Unknown Soldier, Jeb Stuart, Mlle. Marie

ENEMIES Nazi Germany, Iron Major, Japanese Empire, Vandal Savage

AFFILIATIONS United States Army, Easy Company, Suicide Squad, Justice League United

An indomitable fighting man, Sergeant Rock

served in the US Army during World War II. Enlisting in 1941, he rose steadily in rank, soldiering from the burning sands of Africa to mainland Europe on D-Day. Leading from the front, he shepherded Easy Company from the beaches of Normandy into the heartland of Germany, always at the vanguard of the bloodiest battles.

Frank Rock was the quintessential soldier. He followed orders and got the job done swiftly and efficiently, witnessing extraordinary events during wartime, even the presence of super-powered beings on the battlefield. In later years, Frank most clearly recalls the horror of seeing men on both sides and an endless parade of greenhorns get maimed or killed. When hostilities ceased, Frank stayed a soldier, serving his country as both educator and clandestine agent.

His legacy lives on today through his grandson, Joseph. Becoming a career soldier after a family tragedy, Joe joined other combat veterans in a radical enterprise started up by a private military contractor. He took charge of a new Easy Company that uses cutting-edge ordnance to provide an effective human response to metahuman or supernatural threats.

ON THE RECORD

In his civilian days, Frank Rock was a steelworker who boxed. He was certainly no champion, but he possessed one defining attribute. No matter how much punishment he took in the ring, he never fell down and never quit. This characteristic, along with his highly attuned combat instincts, made him the ideal leader for a hard-slogging squad of ordinary heroes like the unbeatable Easy Company, even against the most battle-hardened foes.

ROCK AND A HARD PLACE

Once Frank made his mind up, nothing the enemy could do would shift the implacable human barricade called The Rock.

LAWS' LEGIONNAIRES

Six of the original Seven Soldiers, before they had adopted their new team name. Only the Shining Knight remains a member of the team.

After independently stopping the villainous agents of the Iron Hand, seven heroes united to become the Laws' Legionnaires, more commonly referred to as the Seven Soldiers of Victory. The team comprised the Crimson Avenger, Billy Gunn; Shining Knight and his flying horse Winged Victory; Vigilante, the Spider; the Star-Spangled Kid; and Stripesy. The Crimson Avenger's aide, Wing, an unofficial eighth member, sacrificed his life in a battle against the Nebula Man in Tibet. The resulting temporal explosion scattered the group across the timestream. Before they reformed, Deadman organized a short-lived new incarnation of the team, including Adam Strange; Batgirl; Blackhawk; Mento; Metamorpho; and Shining Knight. They defended the planet Rann from the Injustice League.

Two later versions of the Seven fought the Sheeda, a powerful faerie race from the far future bent on harvesting humanity. The first Soldiers—Vigilante; I, Spyder; Gimmix; Boy Blue; Dyno-Mite Dan; and the Whip's granddaughter—numbered only six, after the Bulleeteer's last-minute refusal to join. Destroyed by the Sheeda, a new team formed: Seven Soldiers who never actually met: Mister Miracle II; the Spawn of Frankenstein; Zatanna; Klarion the Witch Boy; Shining Knight II; Manhattan Guardian; and the returning Bulleeteer, who struck the fatal blow against the vile Sheeda Queen.

Following *Rebirth*, these Seven Soldiers came adrift in the Multiverse, falling victim to the returned Sheeda and the psychic parasite Perrus. At their lowest ebb, they were reinvigorated and returned to full strength when dimension-hopping teen Sideways substituted for the Manhattan Guardian and battled beside a time-lost alternate Superman to save them.

MAGNIFICENT SEVEN

ENEMIES Justice League, Teen Titans, Titans

Secret Society of Super-Villains is the villain team to end all villain teams, formed to balance the scales against Super Hero groups like the Justice League. The Secret Society has been a small gathering of villains as well as a massive organization, but it has always had one goal: The destruction of the forces of good.

AT A GLANCE...

The butler did it

The Outsider, leader of Earth-0's Secret Society, is Owlman's butler on Earth-3, Alfred Pennyworth. He raised an army of Super-Villains to help the Crime Syndicate take over Earth-0, but did not share their goal. When Black Manta found out, he defected from the group and put a permanent end to The Outsider and his machinations.

No honor among villains

Composed of power-hungry evildoers, The Secret Society has its share of competing agendas. Professor Ivo and The Outsider recruited the Society's members under false pretenses, telling them they would destroy the Justice League, without mentioning that they would then be subservient to the Crime Syndicate. Meanwhile

Superwoman, Black Adam, and the Rogues all revealed themselves to be working at cross-purposes.

[Two of the defectors from the Society—Captain Cold and Black Manta—would play a decisive role in its defeat once they discovered The Outsider's true goal.

CLASSIC STORIES

The Secret Society of Super-Villains #1-15 (May-Jun. 1976 to Jun.-Jul. 1978)

The first Secret Society of Super-Villains rebels when it discovers Darkseid was behind the group's creation, but that doesn't stop them from battling the JLA and the Justice Society of America. The chain of command passes from Manhunter to Funky Flashman to Gorilla Grodd before the Wizard seizes control of the team.

Justice League of America (Vol. 1) #166-168 (May-Jul. 1979)

The Wizard's Society makes its last stand by invading the JLA's satellite stronghold, swapping bodies with the heroes and discovering their secret identities. Fighting back, the JLA defeats the Society and wipes their minds, an act that precipitates the later *Identity Crisis* event.

Final Crisis #1-7 (Jul. 2008-Mar. 2009)

Libra, leading a new Secret Society of Super-Villains, murders the Martian Manhunter and engineers a terrorist attack on the Daily Planet Building that nearly kills Lois Lane.

While there are rumors of several different Secret Society of Super-Villains forming in the past, the most infamous incarnation of this criminal-led organization was assembled by Professor Ivo and the mysterious Outsider—revealed to be none other than Earth-3's Alfred Pennyworth. This Secret Society of Super-Villains was to be The Outsider's army on Earth-0, ready and waiting for the arrival of the evil Crime Syndicate following the opening of Pandora's Box. Hunting the box, The Outsider took steps to isolate Pandora from those who would protect her, manipulating the Justice League, Justice League of America, and Justice League Dark into a three-way battle. In addition to these preparations, The Outsider placed a mole inside the Justice League, with Earth-3's Atomica masquerading as the Atom until the Crime Syndicate could finally make their appearance.

The Justice League understood that the Secret Society was forming and initiated a series of covert actions to discover the true nature of the threat. Catwoman was sent to infiltrate the Society, but was captured, interrogated, and shot—whereupon it was revealed that she was actually the Martian Manhunter in disguise. The Manhunter briefly touched minds with the shadowy villain known as The Outsider, but was unable to discern his identity. The Outsider then destroyed the Justice League's Watchtower, using the ruins as his new base and holding Nightwing in a machine with a bomb wired to the beating of his heart. He also held another prisoner, who turned out to be Alexander Luthor, the Shazam of Earth-3. The Justice League freed him and he went on a rampage, attacking hero and villain alike, but directing most of his rage at the members of the Crime Syndicate who had removed him from Earth-3.

Power Ring, Johnny Quick, Copperhead, and The Outsider all died in the climactic battle with the combined Justice League and Justice League of America. The heroes were helped by defecting members of the Society, notably Deathstroke and Black Manta, who killed The Outsider. The Secret Society of Super-Villains was disbanded again and its membership scattered or imprisoned. However, the Secret Society of Super-Villains still remains active, albeit a closely guarded secret. With an inner high council that meets to decide policy and settle disputes between Super-Villains, it seeks to unite the underworld from the shadows.

THE OUTSIDER

As the different Justice Leagues battled in Kahndaq, The Outsider finished gathering the new Secret Society of Super-Villains, capable of destroying the Justice League, in readiness for the arrival of the Crime Syndicate from Earth-3. He was a faithful servant of Earth-3's Owlman, completely dedicated—as any good butler should be.

STEADFAST LOYALTY

The Outsider humbles himself before Owlman, explaining how he brought the Secret Society together.

WHAT'S IN THE BOX?

The Outsider understood that Pandora's Box was in fact a technological device that could open portals between alternate Earths.

ALL HANDS ON DECK
The Secret Society of Super-Villains gathered to hear the Crime Syndicate's plans to finish off the Justice League. One notable absence—The Joker.

TRIBUNAL

A sampling of the Society's elite:

1. Killer Frost
2. Hector Hammond
3. Vandal Savage
4. Ultra-Humanite
5. Reverse-Flash
6. Black Manta

FROM THE SHADOWS

While the Society has been keeping a low profile as the Legion of Doom rose to power, they are still functioning behind the scenes. When Deathstroke formed a team of young heroes, Reverse-Flash (Eobard Thawne) kidnapped him and brought him before a council led by Vandal Savage. He was given the Riddler as his defense "attorney" and stood trial to see if he was still evil enough to be permitted to stay in the SSSV. When they used Hector Hammond's abilities to peer into Deathstroke's mind and see that he would murder everyone in the room if freed, the Society opted to keep him on as a member.

STRIKING OUT ON HIS OWN

Deathstroke, never a friend to the Justice League, liked the Crime Syndicate even less.

"All this time you were looking for who was behind this... as you say on your world... the butler did it."

The Outsider

ON THE RECORD

The first Secret Society of Super-Villains was created by Darkseid to coordinate his efforts to rid Earth of all Super Heroes who would oppose his rule. A new assembly of evil, overseen by the Ultra-Humanite, targeted the Justice League and Justice Society before being banished to limbo.

Leadership changes

Despero awakened the memories of several former Society members and set them against the Justice League just prior to *Infinite Crisis*. A fourth generation, the brainchild of Alexander Luthor, was known as Villains United. Control of the group's remaining members then passed first to the Wizard and then Calculator, bookending the *Infinite Crisis* event. Darkseid's prophet, Libra, then reformed the SSSV as *Final Crisis* loomed, before The Cheetah took over and masterminded the creation of the post-*Final Crisis* version of the Society.

In syndication

While leaders of the Secret Society come and go, its history with the Crime Syndicate of America stretches all the way back to the early 1960s, when a version of the Secret Society battled the original Crime Syndicate in one of the first cross-world "Crisis" stories. This story also established the conflict between the Crime Syndicate and the Justice League, a touchstone for the *Forever Evil* crossover event.

VILLAINS UNITED

Deathstroke is central to Alexander Luthor's Villains United, hand-picked from the Secret Society to battle the splinter group called the Secret Six.

SHADE, THE

DEBUT *The Flash Comics* #33 (Sep. 1942)

REAL NAME Richard Swift

BASE Opal City

HEIGHT 6ft 2in **WEIGHT** 170 lbs **EYES** Gray **HAIR** Black

POWERS/ABILITIES Immortality; summoning of "shadowmatter" from the Dark Zone; manipulation of shadows.

ALLIES Starman

ENEMIES Simon Culp, Dudley Caldecott

In 1838, Richard Swift was transformed into the Shade—a near-immortal capable of manipulating shadowmatter—in an occult ceremony conducted by his evil, shadow-wielding counterpart, Simon Culp. He left his family behind and became a vigilante, battling both mystical threats and ordinary criminals. He and Culp became mortal enemies because of Culp's original subterfuge that trapped Swift.

A ruthless self-proclaimed man of taste, he frequently purloined beautiful art, and clashed with Super Heroes such as The Flash, Starman, and Hawkman Carter Hall. A fellow immortal, Hall eventually befriended Swift and they became "off-duty" confidants.

When Jack Knight inherited Starman's mantle, he gradually convinced Swift to abandon criminality and retire to the Shadowlands with his true love, Hope O'Dare. But nearly 200 years after his creation, he was killed by Deathstroke.

Resurrecting, Swift traced his would-be killer's employers: Descendants of his first wife bribing Egyptian luck deities with human sacrifices. The Shade learned the truth of their origin and dispelled them to their home dimension—after which he reluctantly killed the family who unleashed them.

Swift recently teamed up with The Flash to cleanse the Shadowlands of toxic influences, and advised a reborn Carter Hall: A task made harder since Hawkman was transformed by The Batman Who Laughs into the monstrous Sky Tyrant.

ON THE RECORD

Possibly due to the nature of shadowmatter, the Shade was one of the few people able to prevent a Black Lantern ring from attaching to him during *Blackest Night*. He also survived having his heart ripped out by Black Lantern David Knight. Sometimes a hero, sometimes a villain, the Shade was saved from a descent into villainy thanks to his long friendship with the hero Ted Knight, aka Starman.

DARK SHADOWS

Shadowmatter constructs take savage and lethal action without Richard Swift having to lift a finger.

POWERS/ABILITIES M-vest emits energy that distorts perception, projects force-fields, and enables flight and dimensional travel.

ENEMIES Cain

AFFILIATIONS Justice League Dark

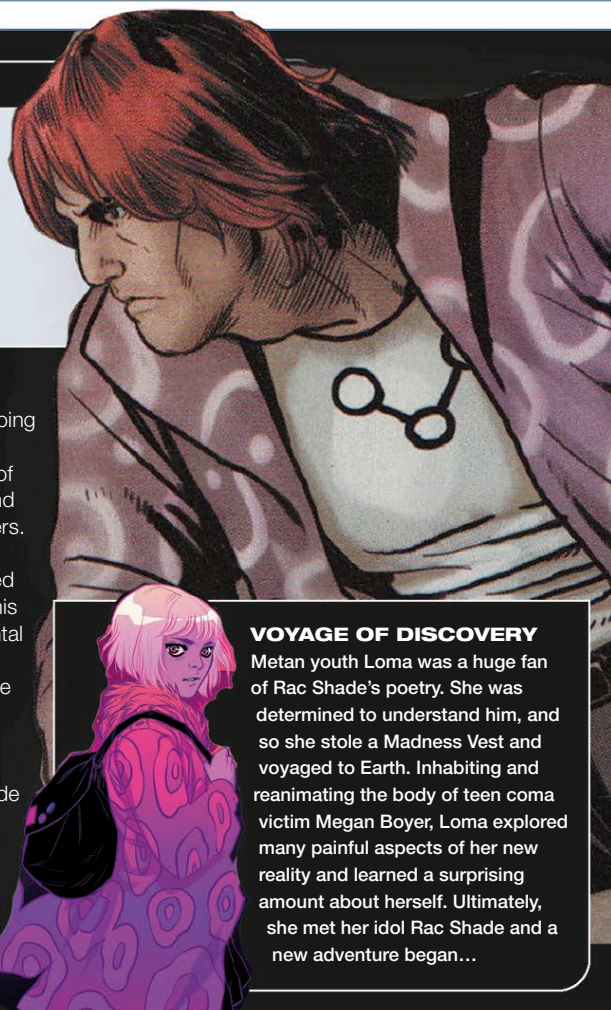

Tormented to near-madness by the death of his lover Kathy, Rac Shade created a simulacrum of her using the reality-warping power of the M-Vest, a relic of his origin in the mysterious world of Meta. He consented to join the Justice League Dark at the request of Madame Xanadu after Enchantress separated from June Moone, and played a critical role in the JLD's fight against resurgent occult powers. At the same time, he fought an internal struggle against a malfunctioning M-Vest, which plagued him with visions of a deformed Kathy. The combination of the M-Vest's overwhelming powers and his

terrible grief resulted in a mental breakdown, and Shade quit the team just as the final battle with the vampire progenitor known as Cain loomed.

Drawn into the Area of Madness by the M-Vest, Shade reunited with the Kathy simulacrum and told her he would not be returning to the team because the coming changes would leave no place for him there—or, he feared, anywhere.

CONFLICT RESOLUTION Shade's conflicted relationship with The Spectre of Kathy culminated in an explosive rejection of her.

VOYAGE OF DISCOVERY

Metan youth Loma was a huge fan of Rac Shade's poetry. She was determined to understand him, and so she stole a Madness Vest and voyaged to Earth. Inhabiting and reanimating the body of teen coma victim Megan Boyer, Loma explored many painful aspects of her new reality and learned a surprising amount about herself. Ultimately, she met her idol Rac Shade and a new adventure began...

ON THE RECORD

Rac Shade was a secret agent on the other-dimensional world of Meta. He came into possession of the M-Vest to keep it from being utilized in a conspiracy to take over Earth, which was being hatched in a neighboring dimension. It later transpired that he had to occupy a different body when the M-Vest brought him to Earth, which led to his relationship with a traumatized Kathy George.

BALANCE OF POWER

As soon as Shade unleashed the powers of the M-Vest, he realized that they would be difficult to control.

SHADOW CABINET

DEBUT *Shadow Cabinet* #0 (Jan. 1994)

BASE The Bleed

POWERS/ABILITIES Undisclosed

ENEMIES Daemonites, Hidden People, Kollektive

AFFILIATIONS Stormwatch

Based in the interdimensional space The Bleed, which connects all realities of the multiverse, the mysterious Shadow Cabinet presides over the ancient alien defense organization Stormwatch. The four members, known as Shadow Lords, guided the group on its mission to defend Earth against both alien and paranormal threats, never revealing their identities or origins beyond the fact that they control technologies centuries in advance of anything available to humankind.

During the Martian Manhunter's membership in Stormwatch, the team clashed with the Shadow Lords over the Cabinet's manipulations. This led to a crisis that ended only when the time-controlling Kollektive eradicated all traces of Stormwatch from the existing timeline. In the aftermath, the Shadow Lords formed a smaller, more clandestine team. They used a DNA sample from the Martian Manhunter to create Stormwatch's new leader, Forecaster. He mistrusted them, despite their promise to stop keeping secrets from the new team that might endanger their existence.

ON THE RECORD

The pre-Flashpoint version of the Shadow Cabinet was initially an ancient order of vigilante heroes based in the Shadowspire, and dedicated to protecting humanity from itself. Their leader, Dharma, maintained that they had to use controversial methods to achieve good ends. This brought them into conflict with other heroes.

ENDS JUSTIFY MEANS
The Shadow Cabinet stood as judge, jury, and executioner, believing hard choices were necessary to protect the common good.

REAL NAME Karashon

BASE Mobile

POWERS/ABILITIES Psionic manipulation of matter and energy; telepathy; flight.

ENEMIES Green Lantern, Aquaman, The Flash, Fuerza

AFFILIATIONS Weaponers of Qward, the Society, Terrible Trio

Radiation leaking from a nuclear power station transformed a tiger shark into a mutant humanoid monster. Developing vast intelligence and psionic powers, the

Shark feasted on the psyches of his victims. He attacked Green Lantern Hal Jordan, hoping to consume his mind, but was defeated, and devolved to his original state.

The Shark regained humanoid form on several occasions, battling both Green Lantern and Aquaman, briefly seizing the Throne of Atlantis and installing himself as Karshon. Later, he was recruited by Green Lantern Guy Gardner to join a Super-Villain squad. During *Infinite Crisis*, the Shark participated in an attack on Atlantis, where he allied with King Shark, and apparently killed the undersea hero Neptune Perkins.

The Shark joined the Suicide Squad but was killed on a mission by a teammate in revenge for killing Fin's brother, Scale.

POWERS/ABILITIES Unsurpassed skill with a bow and arrow; superior acrobat and martial artist.

ALLIES Green Arrow

ENEMIES Komodo, Count Vertigo

Raised as an assassin, master archer Shado turned on her mentor Ito when paid to kill him by Robert Queen and Simon Lacroix. She and Robert fell in love and had a

daughter, Emiko. Robert then enlisted Shado in his search for "the Green Arrow".

As Komodo, Lacroix kidnapped Emiko and turned her over to Count Vertigo, who imprisoned her for her refusal to reveal the Green Arrow's location—which she knew was, in fact, Oliver Queen, Robert's son. Oliver rescued Emiko and Shado spared the defeated Vertigo. During the escape, Shado also revealed to Oliver that he had a half-sister: Emiko.

As Shado became a mercenary, Oliver invited Emiko into his home. Trained in archery and combat skills, she became his partner Red Arrow. The pair confronted Shado, who was working for the Ninth Circle to destabilize Seattle.

#1-4 (Apr.-Sep. 2007) In this origin story, Billy Batson becomes a host for Shazam, with whom he can merge by saying the word "Shazam!" They battle Doctor Sivana and an army of giant robots summoned by the Monster Society.

The Trials of Shazam! #1-12 (Oct.

2006-May 2008) The aging Billy takes on the role of The Wizard, as new Captain Marvel Freddy Freeman strives to prove himself worthy of Shazam's powers.

Billy Batson is the son of C.C. and Marilyn Batson from Zumbrota, Minnesota. They moved to Philadelphia when Billy was young, but he would never grow to know them. While Billy thought he had gotten lost from his family, the truth was that neither was a fit parent. Billy was sent into the foster system, but found a home with the kind Vasquez family and their five other foster children. Rebellious at first, Billy grew to be fiercely protective of his adoptive family. Meanwhile, an ancient Wizard, the last surviving member of a magical council based at the Rock of Eternity, saw the need for a new champion to meet the threat of a resurrected Black Adam, his former and now corrupted chosen representative. The Wizard summoned Billy to the mystical nexus called the Rock of Eternity and made him his new champion. With the word "Shazam!" Billy was transformed into an adult with superhuman powers beyond anything he could have imagined.

Black Adam attacked Shazam and nearly overwhelmed him before Billy brought in the rest of his foster family and shared the Living Lightning with them. Billy was unable to sustain the power sharing and only defeated Black Adam by challenging him to fight in mortal form.

When Black Adam did this, he instantly suffered the effects of several centuries' aging... and collapsed into dust. Trying to do the right thing, Billy returned Black Adam's ashes to his home in Kahndaq, inadvertently causing a diplomatic incident. The Justice League, Justice League Dark, and Justice League of America all converged on Kahndaq to try and defuse the situation, but instead a

NEW ORIGIN

After Dr. Sivana freed ancient Black Adam from his tomb, The Wizard created a new champion to oppose him, and chose Billy Batson. Billy defeated Black Adam, first trying to reason with him, and then sharing his powers with his foster siblings—thereby passing the first test of The Wizard's faith in him.

CLASH OF CHAMPIONS

Billy came out on top in his first critical test as Shazam, but Black Adam was almost more than he could handle.

GATEWAY TO SHAZAM
Billy discovered the way to the Rock of Eternity, where The Wizard—and Billy's destiny—awaited him.

TRINITY WAR/FOREVER EVIL

Billy inadvertently set off a battle among the three Justice Leagues after he tried to return Black Adam's remains to their rightful resting place. Then he became the fulcrum of a battle over Pandora's Box, before the Outsider tapped his power to fulfill his goal of bringing the Crime Syndicate to Earth.

battle broke out with Shazam at its center. Despite all this, Shazam would join the Justice League for a time. But Billy's true team remained the Vasquez household. He and the rest of his Shazam family began to explore the Rock of Eternity, learning that Earth was only one of the seven magic realms, each formerly protected by a champion. The Shazam Family explored these worlds, just as Billy's father, C.C. returned to Billy's life. Wanting a relationship with his dad, Billy shared the Living Lightning with him, and he became the seemingly missing seventh champion.

However, C.C. was actually being mind-controlled by the evil worm known as Mr. Mind. Mind wanted control of the magic in all seven lands, and was using Billy's family to get it, partnering with Dr. Sivana. The two unleashed an entire Monster Society and even the Super-Villain Superboy-Prime, but the Shazam Family bested them. When the smoke cleared, Billy's father remembered nothing of recent events. He left Philadelphia after revealing to Shazam that he never wanted a relationship with his son. Billy fully embraced his new family, leading The Wizard to believe that the seventh champion had been the resurrected Black Adam all along, and someday, the goodness in Shazam would point Adam back to the light.

**KING SHAZAM**

When he was briefly infected by an evil Batman from the Dark Multiverse called The Batman Who Laughs, Billy became King Shazam, a cruel and twisted version of his superpowered self.

INTO THE MAGICLANDS

Accessible by the magic subway system at the Rock of Eternity, the Magiclands consisted of: the Earthlands (Earth); the carnival like Funlands; the videogame-centric Gameland; the haunting Darklands, the villainous Monsterlands; the talking animal home known as the Wildlands; and the mash-up of Oz and Wonderland called the Wozenderlands.

**ON THE RECORD**

The Wizard originally known as Shazam was one of Earth's first heroes, making his mark in ancient Canaan millennia ago. He bestowed his powers on a successor, Teth-Adam, who became Black Adam. Thousands of years later, The Wizard gifted his powers to a boy named Billy Batson, beginning the career of this mighty DC hero.

LIGHTNING STRIKES When he utters the magic word with intent, Billy Batson becomes the Living Lightning-powered, ultimate adult version of himself: Shazam!

"I'm not supposed to be Shazam. The Wizard said so himself."

SHAZAM

A hero in crisis

Trapped in limbo for 20 years, Shazam and his family returned without aging in the 1970s. Following 1985's *Crisis on Infinite Earths*, Shazam's history was revised, with his most memorable run featured in *The Power of Shazam!* ongoing series. After The Wizard Shazam sacrificed his life to stop The Spectre's massacre of magicians, Shazam assumed his place at the Rock of Eternity. Freddy Freeman took the name Shazam and continued the legacy. In the post-Flashpoint timeline, Billy Batson was once again the primary hero, Shazam.

Other champions

Alexander Luthor was Mazahs, Earth-3's version of Shazam, who spoke his name to absorb the superpowers of other heroes and villains. Shazam also battled The Wizard's previous Champion, Black Adam, whose use of the word calls on the Egyptian gods Shu, Heru, Amon, Zehuti, Aton, and Mehen.

**DAY OF VENGEANCE**

Billy Batson as Shazam took on The Spectre, who was out to destroy all magic and those who used it.

The Shazam Family is a group of foster siblings who can each assume the powers of Shazam when Billy Batson grants them. None of them has a biological family link, but together they are as closely knit as any group of brothers and sisters can be.

Six foster siblings lived in the Vasquez family household in Philadelphia. One, Billy Batson, was granted the powers of Shazam by a powerful ancient wizard. He shared his secret with his foster brother, Freddy Freeman, and it stayed between them until the Super-Villain Black Adam attacked, holding the rest of the siblings hostage and demanding Billy's powers. Billy tried to meet this demand, but accidentally bestowed the powers of Shazam on his six siblings, instead. They all battled Black Adam together, but were then surprised and nearly

overwhelmed by the Seven Deadly Sins, who threatened the city of Philadelphia after being unleashed by Dr. Sivana.

During the battle, some of this superpowered foster family discovered that they had variations on the powers of Shazam: Eugene had technopathic powers; Pedro showed even greater strength; and Darla possessed incredible speed. Knowing he can share his Shazam secret with his siblings makes it easier for Billy to handle his new responsibilities. He and his sister Mary even eventually revealed themselves to their foster parents. Headquartered at the Rock of Eternity, the Shazam Family discovered that Earth was just one of the seven realms of the Magiclands. While exploring other dimensions, they came under attack from Sivana and his new Monster Society. Working as a team, they successfully bested the villains, prompting The Wizard who had granted Billy his powers to realize that he needed to have faith in his chosen champion, and in the family he has built.

Teenager Freddy Freeman was placed into foster care with the Vasquez family after his parents went to prison. A gregarious, likeable kid despite a permanent leg injury, Freddy considered himself a fixer at high school, with a tendency to bend rules—usually in harmless ways.

He swiftly befriended the new kid: selfish, surly Billy Batson, and he was the first to learn about Billy's powers.

At first, Freddy encouraged Billy to treat his gifts as a lark—and a way to make money. When Billy saved an old woman, Freddy suggested Billy should ask for reward money and he started taking the power of Shazam more seriously—especially after Black Adam attacked, heralding the Seven Deadly Sins. Billy shared his powers with Freddy and the other children to overpower Black Adam, defeat the demon Sabbac, and neutralize the Seven Deadly Sins.

Freddy's sense of fun was tested to the limit when the kids accidentally unlocked the Seven Magic Lands, unleashing a new Monster Society of evil upon Earth as well as reviving psychotic alternate Earth terror Superboy Prime. Thankfully, the power of the united Shazam Family proved equal to the task of pacifying the terrors.

Adam One. As one of the Demon Knights—ancestors of Stormwatch—Ystina battled alien and demonic threats. Ystina was granted immortality after a sip from the Holy Grail during the fall of Camelot, but was cursed with an unquenchable desire to drink from the Grail again.

Ystin rode the winged horse Vanguard, fighting alongside such Demon Knights as Madame Xanadu and Jason Blood. He also wielded the sword known as Caliburn or Excalibur, marking him a champion of Camelot. Ystina fought with the Demon Knights against the vampire Cain and was bitten, fulfilling his vision of one day becoming undead.

SHRIEK

DEBUT *Batman Beyond* (Vol. 2) #5 (Mar. 2000)

REAL NAME Walter Shreeve

BASE Neo-Gotham, Earth-12

HEIGHT 5ft 10in **WEIGHT** 170 lbs

EYES Brown **HAIR** Brown

POWERS/ABILITIES Armored suit that generates destructive sound waves.

ENEMIES Batman

Walter Shreeve was a gifted audio engineer in Neo-Gotham. Unable to find a more legitimate way to profit from his advanced sound technologies, Shreeve fashioned a

suit armed with sonic weaponry capable of destroying buildings. Hired to assassinate Batman, Shreeve almost succeeded, but suffered hearing damage in the encounter and was imprisoned in Blackgate. While incarcerated, he gained the trust of a prison doctor and began new research, developing earphones to restore his hearing and rebuilding his sonic technology.

Then he broke out of prison, attacking Batman again and using low-frequency sound weapons to destroy buildings, while he tried to steal power crystals to amplify his sound-projection weapons. He nearly unmasked Batman, but was buried in a collapsed building that he had weakened. Presumed dead, he survived and later plotted against Earth-12's Justice League.

SHRINKING VIOLET

DEBUT *Action Comics* (Vol. 1) #276 (May 1961)

REAL NAME Salu Digby

HEIGHT 5ft 2in **WEIGHT** 105 lbs

EYES Violet **HAIR** Black

POWERS/ABILITIES Ability to alter size from subatomic to approx. 30ft tall, with proportionate change in mass and strength.

ENEMIES Fatal Five, Dominators, Daxamites

Like other natives from the planet Imsk, Salu Digby can change her size, making her a key member of the Legion of Super-Heroes' Espionage Squad.

Although a striking presence and a potent warrior, she is as retiring as her codename.

In versions of the team prior to the reality-alterations of Prime Earth, Shrinking Violet endured a grim Possible Future with a traumatic period of captivity, which had consequences for her relationship with the team, particularly her lover, Lightning Lass.

Alongside the Legion, Shrinking Violet battled threats to 31st-century space by the Dominators, Daxamites, and the Fatal Five. She was one of the Legionnaires sent to the 21st century when Ultra the Multi-Alien destroyed their home timeline. Fighting alongside the Justice League United, she uncovered the truth of Ultra's origins and saved the Legion's future by preventing Ultra from becoming all-consuming Infnitus.

DEBUT *Sideways* (Vol. 1) #1 (Apr. 2018)

REAL NAME Derek James

BASE Gotham City

HEIGHT 5ft 7in

WEIGHT 148 lbs

EYES Brown **HAIR** Brown

POWERS/ABILITIES Super-strength, can open rifts to other places.

ALLIES Ernie, Tempus Fuginaut

ENEMIES Killspeed, Replicant, Showman

AFFILIATIONS Young Justice

When Challengers Mountain, the Challengers HQ, dropped into Gotham City during the invasion of the Dark Multiverse, schoolboy Derek James fell into a fissure

in the unstable ground and became infused with the strange energy coming off the mountain. He reappeared on the other side of town and was taken to hospital unconscious.

When he awoke he had new powers—super-strength and the ability to open rifts in space-time to travel between places almost instantly. Derek immediately seized on the idea of becoming a Super Hero, taking the name Sideways and asking his friend Ernie to design him a costume. At first he struggled to adapt to his new life, but he managed to control his powers. He eventually joined the Young Justice team.

SIGNAL, THE (DUKE THOMAS)

DEBUT *Batman* (Vol. 2) #21 (Aug. 2013)

ENEMIES The Joker, Karma, The Riddler, Victor Zsasz, Johnny Bender Jr., the Preacher, the Nest

AFFILIATIONS Outsiders, We Are Robin, Lucius Fox Center for Gotham Youth

When Duke Thomas was young, the Joker drove his parents insane because they helped Bruce Wayne. Living in foster care, Duke joined the "We Are Robin" young anti-crime group. He became a lone street vigilante until Batman brought him into his inner circle and trained him.

Eventually, Duke learned that he was the son of immortal Super-Villain Gnomon and he had a vast range of metahuman powers linked to the mystic Eighth Metal, including "boosting" the abilities of others.

After working with assorted Bat-teams, Duke—now calling himself The Signal—is a key operative of The Outsiders team, led by Black Lightning.

SILENCER, THE

DEBUT *The Silencer* (Vol. 1) #1 (Mar. 2018)

REAL NAME Honor Guest

BASE Charleston, South Carolina

HEIGHT Unknown **WEIGHT** Unknown

EYES Brown **HAIR** Blonde

POWERS/ABILITIES Can create zones of silence; highly skilled in combat and with weapons; wears bodysuit with nanites that can perform individual tasks.

ALLIES Aftermarket, Detail, Quietus

ENEMIES Talia al Ghul, Wishbone, Smoke

AFFILIATIONS Leviathan

Honor Guest was very happy with her ordinary life in Charleston with her husband and son. But she was hiding a secret from them—a bloody past as the

assassin Silencer. Honor possessed a metagene that enabled her to create "zones of silence"—the perfect way to carry out stealth missions. She had been given this ability at a young age by a project funded by Rā's al Ghul, using his own genetic material. Honor was then sent to a school for assassins, where she was chosen as Talia al Ghul's personal bodyguard, with the deal that one day she could leave and have a family.

It seemed Talia had kept her promise, but later her machinations ensured that Honor was pulled back into the Leviathan organization, putting her family at risk.

SILVER BANSHEE

DEBUT *Action Comics* (Vol. 1) #595 (Dec. 1987)

REAL NAME Siobhan McDougal

BASE Metropolis

HEIGHT 6ft 11in **WEIGHT** 180 lbs

EYES Blue **HAIR** White

POWERS/ABILITIES Death stare and lethal wail; superhuman strength, endurance, healing; sound manipulation, flight, teleportation.

ALLIES The Crone

ENEMIES Black Banshee, Superman, J'onn J'onzz, Batman, Supergirl

AFFILIATIONS Castle Broen, Clan McDougal, Satanus

First-born child Siobhan McDougal was denied leadership of ancient Clan McDougal due to her gender. When her father died, she illicitly performed the supernatural family succession ritual, and was cursed to Hell after her brother Bevan interrupted her.

Given magical powers by "The Crone," Siobhan was transformed into the Silver Banshee. In return she had to find a magical book, but this search brought her into conflict with Superman and others, and then she was dragged back to Hell by The Crone. She was freed by Supergirl and became a villain for profit.

After the *Flashpoint* event, she was replaced by Siobhan Smythe—seemingly a more beneficial Silver Banshee—who was fleeing her evil father, Black Banshee. Following *Rebirth*, Siobhan McDougal has been sighted in Metropolis, resuming her criminal career.

IF LOOKS COULD KILL
Silver Banshee can sentence her chosen victim to instantaneous death, but only if she knows their true name.

(Vol. 2) #15 (Apr. 1988) (Valerie Beaudry);

Wonder Woman (Vol. 2) #171 (Aug. 2001)

(Vanessa Kapetelis)

POWERS/ABILITIES Flight, vocal sonic attacks.

ALLIES Mars, Circe, Dr. Psycho

ENEMIES Wonder Woman

Three women have been known as the Silver Swan. The first, Helen Alexandros, was granted the powers of flight and sonic voice attack by Mars, and she fought Wonder Woman at his behest before he withdrew her powers and she returned to normal life. The following two Silver Swans, Valerie Beaudry and Vanessa Kapatelis, achieved their powers by technological means, being altered by Henry Armbruster and Circe, respectively.

In each case, these women were manipulated using their jealousy of Wonder Woman's beauty and strength. Valerie had been deformed in the womb by nuclear testing. Wonder Woman had lived with Vanessa's family for a while. Vanessa blamed her for leaving, but she had actually been forced to because Dr. Psycho was manipulating Vanessa's mother.

However, as they battled Wonder Woman, the Amazon Queen's virtue and strength made both Valerie and Vanessa realize the error of their ways.

JEALOUSY TAKES FLIGHT

The Silver Swan was driven to villainous acts by her jealousy of Wonder Woman's beauty and renown.

SILVERLOCK, OLIVE

DEBUT *Gotham Academy* #1 (Dec. 2014)

BASE Gotham City

HEIGHT 5ft 3in **WEIGHT** Not telling

EYES Violet **HAIR** Silver

POWERS/ABILITIES Keen investigative instincts, determination, pyrokinetic abilities.

ALLIES Maps Mizoguchi, Pomeline Fritch, Kyle Mizoguchi, Colton Rivera, Robin (Damian Wayne)

AFFILIATIONS Detective Club

Olive Silverlock was the daughter of Sybil Silverlock—the fire-starting Super-Villain Calamity. At Gotham Academy she and her friends stumbled across a secret society that was trying to contact a ghost—Millie Jane Cobblepot—whose journal Olive had in her possession. Her friends formalized their partnership as the Detective Club.

The prestigious school was a haven for Super-Villains and mad scientists and a magnet for mystic events. Olive encountered Man-Bats, werewolves, witchcraft cults, and other weirdos all searching for another ancient volume—the Book of Old Gotham.

As Olive's own pyrokinetic powers intensified, her friends secured the tome and discovered that generations of Silverlock women had been possessed by a witch—Amity Arkham—who had been burned at the stake in the early years of Gotham City. Armed with this knowledge, Olive's friends freed her from Amity, just as the witch was using her to destroy the descendants of those who had condemned her: the Dents Cobblepots, Waynes, and others.

ON THE CASE
Once Olive Silverlock uncovered mysterious goings-on in and around the halls of Gotham Academy, the Detective Club got serious.

SINESTRO

AFFILIATIONS Sinestro Corps, Green Lantern Corps, White Lantern Corps, Indigo Tribe, New Guardians, Ultraviolet Corps, Legion of Doom

MIGHT IS RIGHT
On returning to the Green Lantern Corps, Sinestro realized the Guardians had adopted his ruthless methods for enforcing order.

Lanterns' rings. With his yellow ring, Sinestro struck remorselessly at the Guardians who had frustrated his dreams. A constant thorn in Green Lantern's side, Sinestro formed the Sinestro Corps and warred with the Green Lanterns. After a brief and unexpected return to the Green Lantern Corps, Sinestro was able to grow his Sinestro Corps forces substantially during a period where the Green Lanterns went missing.

Ruling from the artificial planet Warworld, Sinestro was challenged by the returning Hal Jordan. The two fought, and Hal unleashed his full energy, destroying Warworld in the process. Sinestro survived, but his quest for power did not end there. Joining Lex Luthor's Legion of Doom, Sinestro helped unlock one of the seven unseen forces of the universe, becoming the first Lantern to embrace the invisible spectrum. Unlike Lanterns on the emotional scale—like Green Lanterns and Red Lanterns where the user controls the light via emotions—the invisible spectrum controls the user. Sinestro used it to command a veritable army, but was blocked when John Stewart ultimately rejected his Ultraviolet Corps. Things got worse yet for Sinestro when he and the Legion of Doom succeeded in their goal of unleashing the mother of the Multiverse, Perpetua, only to have Perpetua imprison Sinestro in her throne to better harness his new Ultraviolet powers.

FOND FATHER
The only softness in Sinestro's soul came from his sentimental but unshakable attachment to his estranged daughter, Green Lantern Soranik Natu.

Proud Thaal Sinestro of Korugar loved order. To preserve it, he pursued power in all its forms and became one of the most feared villains in the cosmos. He founded his own corps of cosmic terrorists and by dominating the cosmic entity Parallax, Sinestro became the lord of fear. He remains one of the most powerful beings in creation.

Anthropologist Sinestro was exploring an ancient city when a wounded Green Lantern crashed at his feet. Taking the Green Lantern ring rather than earning it, Sinestro became determined to make use of the powerful weapon. In fact, he proved to be one of the Corps' most effective agents. His sector was the most peaceful of all, but only because he ruled it as dictator.

Mentor to Green Lantern Hal Jordan, Sinestro was eventually banished to the Anti-Matter Universe of Qward for his crimes after Hal challenged his authoritarian rule. There the Qwardians tapped the power of the universal fear-entity to create their own power rings imbued with yellow energy, the only vulnerability of the Green

SCIENCELL CORPS
When the Sinestro Corps and the Green Lanterns paired up to hunt down rogue Sinestro Corps agents, they caged their prisoners in the Sciencells inside the living planet Mogo.

Though no longer under his leadership, the Sinestro Corps was the perfect revenge scheme from Green Lantern Hal Jordan's longtime nemesis, Sinestro. Creating an army able to counter the Guardians of the Universe and kill their agents, the Sinestro Corps channeled the primal emotion of Fear.

The Sinestro Corps originally comprised the worst monsters in creation, filled with a hunger to hurt and the ability to "instill great fear"—possessing the power to realize their destructive desires. Their murderous drives were harnessed by charismatic Sinestro, who marshaled them into a disciplined force and had them launch a concerted attack on their green counterparts and Earth, while chanting their chilling oath: "In blackest day, in brightest night, beware your fears made into light. Let those who try to stop what's right, burn like my power... Sinestro's might!"

Ever since he formed his army, Sinestro waged a constant war with his old trainee Hal Jordan and the Green Lantern Corps. With only small truces made to battle threats bigger than his old grudge match, Sinestro spread fear throughout the galaxy through his many minions.

This effort culminated when Sinestro took control of the artificial planet Warworld and maneuvered it to the center of the universe where Oa used to be. After manipulating his daughter Soranik Natu to trick many worlds into thinking the Sinestro Corps was a force for good, he revitalized himself using the Parallax entity held at Warworld's core. Sinestro used a Fear Engine to terrorize a galaxy that was briefly without Green Lantern protectors. However, when John Stewart and the Green Lantern Corps united with the formerly missing in action Hal Jordan, Sinestro's ego got the better of him. He challenged Jordan to a one-on-one fight, and lost, and the empty Warworld was destroyed in the process.

ON THE RECORD

Sinestro's yellow power ring was created by the evil Weaponers of Qward during the Korugarian's exile to the Anti-Matter Universe. Its function and origins were never fully explained, but it remained a constant threat to Hal Jordan and other Green Lanterns for decades.

Before the terror weapons were mass-produced for the Sinestro Corps, Guy Gardner briefly used Sinestro's yellow power ring to facilitate his new career as an independent, maverick hero.

DEBUT *Hitman* (Vol. 1) #9 (Dec. 1996)

REAL NAME Sidney Speck

BASE Gotham City

EYES Bloodshot **HAIR** Brown

POWERS/ABILITIES Expert in unarmed combat and weapons handling; incredibly high tolerance for alcohol.

ENEMIES Bane, Many Angled Ones

Sidney Speck remains one of the world's strangest and most unsavory costumed champions. As Sixpack, he led a team of dissolute heroes, Section 8.

With no abilities other than drunken bravado, he was always ready for a fight. His favorite weapon was a broken beer bottle.

A man of mystery, due to the damage booze had wrought on his memory, Sidney spent his days in Noonan's Bar regaling the clientele with tales of his Super Hero career. However, when Gotham City was invaded by demons, he led his men into battle and saw most of them die. After a prolonged period of sobriety, Sixpack began drinking again and revived Section 8, comprised of similarly delusional stalwarts Powertool, Bueno Excelente, Guts, the Grapplah, Dogwelder II, and Baytor.

ALLIES Prince Uxas (Darkseid)

ENEMIES Mister Miracle, Superman, Big Barda, Newsboy Legion, Justice League of China, New Super-Man

Before Prince Uxas transformed into Darkseid and seized control of Apokolips, he was a typical spoiled aristocrat, frequenting unsavory places with deviant hedonist Sleez as guide and companion. Afterwards, Sleez was an embarrassment and Darkseid exiled him. The salacious New God gravitated to the seamiest backwaters of Metropolis, using his psychic abilities to push humans into slaking their darkest hungers for his profit and amusement, before his depredations were ended by Superman, Big Barda, and Mister Miracle. Sleez relocated to Project Cadmus and renewed his sordid antics, even creating second cloned iteration of the Newsboy Legion.

During a purge of Apokolips and New Genesis, Sleez fell to the deadly God Killer, but recently returned, feeding off the repressed populace of China and clashing with New Super-Man and the Justice League of China.

DEBUT *The Fury of Firestorm* #23 (May 1984)

BASE Seattle, Washington

EYES Blue **HAIR** Blonde

POWERS/ABILITIES Brilliant computer technician, expert hacker, code-writer and breaker.

ALLIES Oliver Queen, John Diggle

ENEMIES The King, Zehra Darvish, The Cheetah

AFFILIATIONS Team Arrow, Mia Dearden, Steve Trevor, A.R.G.U.S.

Felicity Smoak is one of the world's greatest hackers: an infallible digital gun-for-hire. After successfully scrubbing her history from all records, she gained a peerless reputation among the wrong sort of people. For this reason she was hired by scheming billionaire John King to dismantle Queen Industries and assassinate Green Arrow.

King's problem with Green Arrow was that he considered him too weak and unfit to protect Seattle. However, though she was far from a saint, Felicity balked at murder and instead warned the Super Hero, catapulting her into conflict with her vindictive former employer. For betraying him, King used his connections to have Felicity arrested for hacking government servers. He expected she would be killed within hours of arriving at Federal Supermax prison, as he had arranged for her to share a cell with the vicious Super-Villain The Cheetah. This feral fury had harbored a grudge against Smoak ever since the hacker had exposed her family members to danger by publishing their addresses online.

Saved by Green Arrow, Felicity joined him, John Diggle, and a small army of heroes in stopping John King. Oliver Queen, knowing Felicity was considering an offer from Steve Trevor to work anonymously for top-secret government agency A.R.G.U.S., invited her to officially join Team Arrow. Although she initially stayed in contact with them, she has remained more than a little evasive over her final decision.

SMOAK AND MIRRORS
Felicity was clever, cunning, capricious, and capable of many things, but cold-blooded murder wasn't one of them.

ON THE RECORD

Entrepreneur Felicity Smoak was introduced in the mid-1980s, when computers were starting to be more commonplace. Her company was nearly ruined when Firestorm's negligence during a metahuman battle wiped out her proprietary software.

It was the first of many unhappy and unlucky encounters with the Nuclear Man. These only grew more complicated when she married Ed Raymond, father of one of the two people who made up the composite Super Hero.

FIRESTORM AND FIREBRAND
Tech-company pioneer Felicity backed down for no man, least of all a bumbling junior super-freak who was more hazard than hero.

momentous "War of Jokes and Riddles," a battle that pitted him against Killer Croc. He would later fight fledgling heroes Gotham and Gotham Girl, nearly destroying Gotham City's Statue of Justice in the process. When incarcerated in Arkham Asylum, Grundy still found time for violence, battling not just Batman, but also Bane, Catwoman, and even Deathstroke.

Solomon Grundy's brain has rotted even further in recent months, and he was recruited as muscle for the Injustice League Dark, following the commands of Klarion the Witch Boy. However, their team fell to the Justice League Dark, leaving Grundy to wander the world aimlessly yet again.

ON THE RECORD

Solomon Grundy's name comes from a old nursery rhyme. A foe of Golden Age Green Lantern (Alan Scott), the swamp creature proved a thorn in GL's side due to Lantern's ring having a vulnerability to wood. Grundy later became a recurring foe of Batman's when he wandered from Gotham City's Slaughter Swamp into its sewer system. He was reborn with a kind soul and became an ally of Starman (Jack Knight) before returning to his "roots." *The Seven Soldiers: Klarion* miniseries revealed an enslaved population of Grundys working underground in Limbo Town.

BORN ON A MONDAY

Solomon Grundy's powers made him a formidable foe, even for the Justice Society.

Rick Starr was the 22nd-century's Space Ranger, patrolling Earth's solar system from his asteroid base near Jupiter. Often joined on his starship, Solar King, by his girlfriend Myra Mason, on one solo mission, Starr nearly died after being stranded on Pluto. He was saved by an alien shape-changer, Cryll, and the two became good friends. Starr later foiled a Gordanian invasion of Earth with the help of Green Lantern Hal Jordan.

After *Flashpoint*, a new—21st century—Rikane “Ric” Starr appeared. Having left the Space Rangers, Ric traveled to planet Tolerance in the Tenebrian Dominion. Here he was branded a fugitive with a bounty on his head, and became an unwilling participant in popular glimmernet gameshow, *The Hunted*.

PRIMETIME PREY
“Ric” Starr worked with Colonel T’omas T’morra to create blind spots during *The Hunted* games.

PATROLLING THE FINAL FRONTIER
Space Ranger and his shape-changing pal Cryll were armed and ever ready for all manner of alien threats.

SPARX

DEBUT *Adventures of Superman Annual* #5 (1993)

REAL NAME Donna Carol Force

BASE New York City

HEIGHT 5ft 5in **WEIGHT** 130 lbs

EYES Blue/white **HAIR** Brown/white

POWERS/ABILITIES Faster-than-light travel; lightning emission; flight.

ALLIES Superboy

AFFILIATIONS Canadian Force, Ravers

Donna Carol “D.C.” Force was the only member of the Force Family without metahuman powers. This changed when they discovered alien parasites in Metropolis whose bite triggered latent metahuman powers. The parasites nearly killed her—but also bestowed upon her a number of powers, essentially transforming her into a living thunderbolt. Staying to fight alongside Superboy, D.C.—now called Sparx—helped the New Bloods and veteran heroes combat the alien horde. Searching for her place in the world, Sparx discovered the Event Horizon, a never-ending rave party that floated from reality to reality, world to world. Superboy was invited to the rave, and with Sparx, created a Super Hero team called the Ravers. Sparx was later considered for admission into the Teen Titans.

Post *Rebirth*, another alien parasite attack in rural Pine Ridge saw a young girl named Dana gain electrical powers in copycat incident. Her current location and status are unknown.

RAVE ON!
The alien parasites that initially threatened Sparx's life, not only gave her superpowers, they turned her into a fun-loving party animal!

SPECTRE, THE

DATA

DEBUT *More Fun Comics* #52 (Feb. 1940)

REAL NAME James Corrigan

BASE New York City

HEIGHT 6ft 1in **WEIGHT** 184 lbs **EYES** Blue **HAIR** Red

POWERS/ABILITIES Near omnipotent magical and physical abilities, limited only by the need to bond with a host.

ENEMIES Eclipso

AFFILIATIONS Justice Society of America, Gotham City Police Department, New York City Police Department

Jim Corrigan is The Spectre, the mystical embodiment of divine wrath. Torn between his desire for revenge and his destined role as an instrument of justice, Corrigan fights both the evils of the world and his own baser human impulses.

When hard-boiled New York City cop Jim Corrigan was drowned by criminals while on the job, he was given a second chance at life as the physical personification of the Presence's wrath. He became The Spectre, a pale ghost clad in a green cloak, who often changed his form so as to appear massive to human beings. Able to perform nearly any magical feat on a whim, The Spectre sought out those he felt in need of vengeance, and punished them, not

UNDER THE CLOAK

Jim Corrigan still retains his humanity somewhere deep inside The Spectre. He can switch back and forth at will, although he often doesn't have a choice when it comes time to spring into action.

without a sense of irony in his fatal judgments.

While Corrigan's appearance would have many believe that he is fairly young and new to his role as The Spectre, Corrigan is immortal so long as he remains The Spectre's host. When he was just getting his start, Corrigan served with the World War II era team of Super Heroes known as the Justice Society of America. Perhaps in an attempt to avoid explaining why his secret identity refused to age, Corrigan has moved around over the years, taking a job as a Gotham City detective most recently. However, after Batman helped save his life and rescue his Corrigan half, the Dark Knight informed The Spectre that he didn't want a murderer like him running free in his city. Corrigan agreed to move back to New York City, not comfortable being on the other end of a hero's judgment.

ON THE RECORD

Three men have hosted The Spectre. The first was Jim Corrigan, a classic 1940s noir cop who was killed by gangsters and rose from the dead to exact his revenge. Moderating his vengeful feelings, he became a charter member of the Golden Age Justice Society.

The Spectre's second host was Hal Jordan, the former Green Lantern who assumed the role after Corrigan refused. Jordan was chosen because The Spectre knew Hal was threatened with corruption by Parallax, and only The Spectre could purge Hal's soul.

After a period without a host, during which Eclipso turned The Spectre into a destructive force that wreaked havoc on Earth's magic users, the entity was forced into the recently deceased body of Gotham City cop Crispus Allen.

SPECTRES THREE Left to right: the original James Corrigan Spectre took no prisoners; Hal Jordan became The Spectre's reluctant host; the angry, vengeful third Spectre, Crispus Allen.

I AM VENGEANCE When The Spectre and Jim Corrigan were recently separated, Batman reluctantly helped them reunite after learning The Spectre's origin.

DIVINE RETRIBUTION

The Spectre's powers can run amok if not kept in check by being tethered to the conscience of a human host.

CLASSIC STORIES

***More Fun Comics* #52-53 (Feb.-Mar. 1940)** The Spectre makes his first dramatic appearance after tough cop Jim Corrigan is drowned in a cement-filled barrel, and returns soon after to take supernatural revenge on his killers.

***Crisis on Infinite Earths* #10 (Jan. 1986)** The only being on Earth capable of holding his own against the Anti-Monitor, The Spectre buys Earth's other heroes precious time to execute their ultimate plan to save creation.

POWERS/ABILITIES Can generate powerful illusions **ENEMIES** Batman

BEDAZZLED: The first Spellbinder, Delbert Billings, tested his hypnotic powers on Batman, who soon saw through the illusions.

Fay Moffit, jumped at the chance and promptly shot Delbert in the head. Neron gave Moffit the ability to cast psychedelic illusions, and she became the third and most sinister Spellbinder. However, her power to alter others' perceptions of reality is directly tied to her own vision. Cover her eyes and she is rendered powerless.

Art forger Delbert Billings decided to embellish his criminal career by developing optical devices that would enable him to hypnotize others. As Spellbinder, Billings committed a rash of robberies, but was ultimately routed by Batman and Robin.

A second Spellbinder—mystically powered and unrelated to Delbert Billings—was briefly active during Billings' incarceration and battled the Justice League as a member of the government-sanctioned "Leaguebusters," before vanishing to parts unknown.

Upon his release from prison, Delbert Billings attempted a criminal comeback, but made the mistake of his life when he turned down the demon Neron's offer for enhanced powers in exchange for his soul. However, while Billings would not agree to Neron's offer, his moll,

DEMONIC DEAL: Fay Moffit knew a good deal when she saw it and accepted Neron's offer to succeed Delbert Billings as the new Spellbinder.

JOKERS WILD While incarcerated at the Slab prison, the third Spellbinder was among a throng of Super-Villains infected by the Clown Prince of Crime's toxin. During the jailbreak that followed, she almost killed Nightwing with an illusion of the inter-dimensional imp, Bat-Mite.

CASTING A WICKED SPELL

In the Possible Future of Neo-Gotham (Batman Beyond) elderly Bruce Wayne and new Batman Terry McGinnis frequently confront Dr. Ira Billings. This former school psychologist uses virtual technology and brainwashing techniques to play bizarre mind-games, punish the lackluster and get rich as the sinister Spellbinder.

SPINNER, DOROTHY

DEBUT *Doom Patrol* (Vol. 2) #14 (Nov. 1988)

HEIGHT 5ft 3in **WEIGHT** 118 lbs

EYES Brown **HAIR** Brown

POWERS/ABILITIES Can bring imaginary friends and enemies to life for short periods.

ENEMIES Candlemaker

ALLIES Robotman, Beast Boy

AFFILIATIONS Doom Patrol

Dorothy's deformed, simian-like features made her hide from the world, so she used her psychic ability to bring imaginary friends to life. When she met the Doom Patrol, she found equally strange friends who accepted her as one of their own. However, her time with the team also unleashed her innermost fears, giving life to the Candlemaker. The savage entity decapitated the Doom Patrol's leader, the Chief, and terrorized the team, but was eventually snuffed out by Dorothy.

Dorothy was then imprisoned within the other-dimensional Dream Country with other powerful children who were brought there to expand the region's power. She escaped and later unwittingly destroyed Robotman when he tried to reunite Dorothy with her mother. She created a new Robotman from her mind, but Beast Boy and Fever rebuilt the original and got Dorothy the psychiatric care she needed.

CANDLE KILLER Dorothy's deepest fears, frustrations, and fury found all-too-real and terrifying form in the Candlemaker.

SAVAGE PSYCHE

Years of retreating from the real world and keeping her emotions in check were unleashed when Dorothy joined the Doom Patrol.

ALLIES Barry Allen, Solovar

ENEMIES Captain Cold, Gorilla Grodd

AFFILIATIONS Central City Police Department

Patty Spivot is the blood analysis specialist at the Central City Police Department crime land, where she works with forensic scientist Barry Allen. After years of working together, Barry finally worked up the nerve to ask Patty out on a date, and took her to a tech symposium. Unfortunately their brief romantic moment was interrupted by an armed robbery.

Despite this shaky start, they grew closer, but Patty soon realized she had a potential rival for Barry's affections. Reporter Iris West had a tendency to flirt with him while seeking leads for her articles.

After Barry was nearly killed in the line of duty, he and Patty took their blossoming relationship to the next level and officially became a couple. Patty then learned that Barry was also Central City Super Hero The Flash, but moved in with him anyway. However, she eventually left Barry after a terrifying encounter with his future self tainted him in her eyes.

GETTING SERIOUS

Despite a hesitant start, Patty Spivot knew that she and Barry Allen were destined to have a life together—even after he revealed he was The Flash.

HEIGHT 5ft 5in **WEIGHT** 110 lbs **EYES** Blue **HAIR** Blonde

POWERS/ABILITIES Adept gymnast and fighter; brilliant computer hacker; weapons include protective suit equipped with offensive and defensive devices; skilled motorcyclist.

ALLIES Tim Drake (Red Robin/Drake), Bluebird, Catwoman, Batman, Batman Family

ENEMIES Cluemaster, Hush, Lincoln March, Anarky, Ulysses Hadrian Armstrong (the General)

AFFILIATIONS Young Justice

Teenager Stephanie Brown knew had no idea that her father was costumed Super-Villain Cluemaster. After unintentionally walking in on his meeting with his cronies, including Signalman, Lock-Up, and Firefly, Stephanie began running for her life, as even her mother was in on the conspiracy.

Telling her story on her blog "Spoiler Alert," Stephanie soon adopted the vigilante name of Spoiler and a flamboyant purple costume. Acting alone, she used biking skills she had picked up during her childhood to lure Cluemaster into a trap, ultimately resulting in his arrest. Even after her father was seemingly killed by his former associate—Lincoln March of the Court of Owls—Spoiler opted to continue her Super Hero career.

Catwoman trained her in fighting techniques, and Spoiler was constantly popping up in Batman's life.

TO THE VICTOR...
During a massive attack by the villain Mother, Spoiler helped protect Bluebird's brother Cullen and fought back against Mother with other heroes, including Red Robin and Nightwing.

Eventually she joined the Bat-family, becoming a Robin and Batgirl, before reverting to her original costumed persona. She developed a romantic relationship with Red Robin (Tim Drake) and was crushed when he died. However, when Drake reappeared, they reunited to investigate anomalies in the timestream.

ON THE RECORD

Before *Flashpoint*, Stephanie Brown was the only character to serve as both Robin and Batgirl. She debuted in the pages of *Detective Comics*, but soon became romantically involved with Tim Drake in his Robin role.

Having had a tumultuous life, including giving her baby up for adoption and troubles with her single mom, Spoiler eventually worked her way into Batman's good graces, briefly replacing Tim as Robin. Fired by the Dark Knight for not following his directions, she continued her crime-fighting career—with Barbara Gordon's blessing—adopting the name and costume of Batgirl.

HERO BY PROXY

As Batgirl, Stephanie fought crime on her college campus at Gotham University with the help of her own Oracle of sorts—computer expert Proxy. Thanks to a grant from Batman, Inc., Batgirl set up shop in her own Batcave-like hideout she called Firewall.

SPYRAL

DEBUT *Batman, Incorporated* (Vol. 1) #4 (Apr. 2011)

BASE St. Hadrian's Finishing School for Girls, England

NOTABLE MEMBERS Helena Bertinelli (Matron, Director of Spyral); **Doctor Dedalus** (Agent Zero, Otto Netz); **Tiger** (Agent 1); The Hood (Agent 24, George Cross); **El Gaucho** (Agent 33, Santiago Vargas); **Dick Grayson** (Agent 37); **Mr. Minos** (Former Head of Spyral); **Elisabeth Netz** (Frau Netz);

Dr. Poppy Ashmore

ENEMIES Batman, Dick Grayson, Tiger

Led by the former "mafia princess" Helena Bertinelli, clandestine espionage agency Spyral was an organization with self-destructive underpinnings, creating violence to beget more violence. It was originally formed by Nazi scientist Otto Netz—Doctor Dedalus—when he turned to Super-Villainy. After Netz's death, the organization was briefly controlled by corrupt and devious Mr. Minos before passing to his daughter, Agent 0.

Minos had been gathering intel on Super Heroes, but his clumsy efforts attracted the attention of Batman. When Nightwing was publicly outed as Dick Grayson and seemingly executed by the Crime Syndicate, Batman exploited the situation to discover more about the mysterious organization. He persuaded Grayson to join Spyral as an undercover agent. All went smoothly for a while: Grayson worked with Spyral agent Bertinelli on several missions.

However, after she took over as the institution's new head, Spyral's computer consciousness—an artificial intelligence called Spyder—ordered her to kill Grayson. As a result, Grayson and Agent 1, Tiger, turned against Spyral and began taking out their agents one by one.

SPY VS. SPY
Helena Bertinelli wanted to run Spyral along more principled lines, but found it near impossible thanks to Spyder, the organization's corrupt computer system.

Barely surviving that debacle, Spyral was later eradicated when former Manhunter Mark Shaw launched his hostile takeover of all Earth's covert agencies, absorbing them into his Leviathan group.

ON THE RECORD

Spyral debuted shortly before the *Flashpoint* event. In the original version, Netz's daughter was not Agent 0, but the original Batwoman, Kathy Kane. She had a relationship with Batman, while also working for Spyral. This explained why the battle uniforms at St. Hadrian's Finishing School resembled the red and yellow of Batwoman's costume. After *Flashpoint*, Kathy Kane disappeared from the timeline, and Agent 0, Katarina "Luka" Netz, was introduced in her place.

SINS OF THE FATHER

The original Batwoman cut off her relationship with Batman after learning that Otto Netz was her father and that, years ago, she had been given up for adoption.

DEBUT *Detective Comics* (Vol. 1) #470 (Jun. 1977)

BASE Gotham City

HEIGHT 5ft 5in **WEIGHT** 131 lbs

EYES Blue **HAIR** Silver

POWERS/ABILITIES Highly intelligent and witty; excellent connections to Gotham City's elite social circles.

ALLIES Batman

ENEMIES Onomatopoeia, Rupert Thorne, The Joker, Deadshot

Bruce Wayne first met Silver St. Cloud at a party on his yacht, and they were very taken with one another. After Bruce left briefly to battle Dr. Phosphorous, he returned to the yacht only for Silver to touch his hair and realize it was wet. Suspicious of Bruce from then on, Silver nevertheless began to date him. But when she saw Batman in action and recognized Bruce beneath the cowl, she broke off their relationship, unable to deal with Bruce's nighttime activities.

Fate brought the couple back together, and Silver and Bruce became engaged. As a result, Batman began to let his guard down, revealing his secret identity to a vigilante calling himself Baphomet, and even bringing the young man back to the Batcave and introducing him to Silver. Bruce was appalled to discover that Baphomet was none other than the murderous villain Onomatopoeia, who slashed Silver's throat in front of his horrified eyes.

RELAXEZ-VOUS!

Silver was closer to Bruce Wayne than perhaps any of his previous girlfriends. She brought out his playful side, normally kept well under wraps.

POWERS/ABILITIES expert marksman, unparalleled hunting skills, magical knowledge; fires explosive blasts from hands; can create portals to other locations.

ALLIES Lyll'ana

ENEMIES Lucifer

A long time ago, young warrior king Stalker returned from battle to find his wife, Lyll'ana dying of fever. He prayed to his god to spare her life and that of his unborn

child. He was visited by Lucifer, who made him a deal: a male soul of his bloodline for the health of his wife and child. His wife recovered, but died in childbirth. Stalker realized he was doomed to walk the Earth forever, presumably without a soul.

As a hitman in the modern world, Stalker was told by Lucifer to kill a woman, Clarissa Rowe. Stalker was shocked to find that she was pregnant and his descendant. He also realized that he had always had a soul, and that Lucifer was claiming this young boy as part of their deal. Realizing what a monster he had become Stalker drove Lucifer away from the infant.

EYES Brown **HAIR** Brown

POWERS/ABILITIES Can increase the weight of people or objects; Density manipulation, enhanced strength and durability, Legion of Super-Heroes combat training, flight ring.

ENEMIES Horraz, Crav the General Nah, Mordru

Thom Kallor was born in a floating observatory to astronomer parents from the planet Xanthu. As a result of his unique introduction to the universe, Thom developed the power to borrow mass

from stars, to affect his own body and to alter the weight of any objects he concentrated on. He could also emit blasts of stellar energy.

Due to a possible connection with Earth's heroic Starman dynasty, Thom is an ardent fan of 21st-century culture and ephemera and frequently bores his teammates with some incomprehensible piece of arcane trivia from the legendary Age of Heroes. For all his bookish interests, Thom is a powerful and canny combat specialist, happy to go toe-to-toe with terrorists like the Horraz or galaxy-rendering monsters like demon lord Mordru.

STAR SAPPHIRE CORPS

DEBUT *Green Lantern* (Vol. 4) #20 (Jun. 2007)

REAL NAME Violet Lantern Corps

BASE Zamaron

CURRENT MEMBERS/POWERS Carol Ferris, Fatality, Miri Riam, Queen Aga'po Each member uses all-consuming love to power a violet power ring that affords flight, protection, energy projection, and solid light-construct creation.

ALLIES Blue Lantern Corps, Indigo Tribe, Green Lantern Corps

ENEMIES Guardians of the Universe, Sinestro Corps

A multi-species group of females empowered by love, the Star Sapphires were created by the immortal women of Maltus. Having broken away from their emotion-suppressing males in the wake of Krona's wounding of the cosmic fabric, the Zamarons sought to ease universal conflict, using love to soothe aggression. Initially they employed violet crystals, but these ultimately proved wild and attuned to love's darker side. Eventually they were equipped with power rings using the refined Light of Love broadcast from a Central Power Battery. The Star Sapphire Corps also use conversion crystals to envelop resistant or hostile targets, gradually reprogramming potential recruits to pursue the interests of love at all costs. Until recently all members were female, except for Guy Gardner, who briefly found love on his odyssey through the Emotional Spectrum.

"The Star Sapphires have their own unique oath:

For hearts long lost and full of fright,
For those alone in blackest night,
Accept our ring and join our fight,
Love conquers all—with violet light!"

ON THE RECORD

The Zamarons have been altered radically and often since their introduction in 1962. Initially super-scientific Amazons roaming the cosmos in search of a new ruler, their selection of Carol Ferris met with stiff resistance from the Green Lantern.

They were later revealed as the long-missing females of the Oan Guardians, complete with their own agenda for how creation should be run. Their return signaled a reconciliation of immortals and a new Millennium for the Universe.

TOGETHERNESS

Pooling their resources, a male and female immortal came to Earth with the intent of creating a group of transformative New Guardians.

Carol Ferris had no time for love, despite being torn between affection for test pilot Hal Jordan and being attracted to the hero Green Lantern. This emotional conflict led to mayhem after she was selected by warriors of an extraterrestrial matriarchy to wear the all-powerful Star Sapphire. With the gem, all Carol's subconscious desires could be realized and she repeatedly attacked the Green Lantern, determined to bend him to her will.

EMOTIONAL ROLLERCOASTER
Her time with the New Guardians showed Carol that love could not exist in an emotional vacuum.

revealed as a physical manifestation of the Entity embodying the accumulation of universal love. Eventually she was cured, but when the War of Light brought all shades of the Emotional Spectrum into conflict, the alien Zamaron sought a new path to universal love, asking Carol to lead their Star Sapphire Corps.

Now wearing a Star Sapphire power ring, Carol thrived as a hero, battling against the marauding Sinestro Corps and the ghastly risen dead of the Black Lanterns. She even reformed the uncontrolled passions of the Predator Entity, creating a more benign and positive aspect of love.

Following valiant participation in the coming of the White Entity of Life on the *Brickest Day* event and during the War of the Lanterns, Carol joined Kyle Rayner's multidominational band of Spectrum Warriors as a New Guardian. Her long-held feelings for Hal Jordan began to waver, as she found herself increasingly drawn to Rayner. Carol eventually broke away from both Jordan and White Lantern Rayner to chart her own course. While Hal returned home to Earth recently to seemingly rekindle his relationship with Carol, it seemed just another fling that was destined not to last.

ON THE RECORD

Golden Age Star Sapphire was an alien invader who fought The Flash. She was reinvented as Carol Ferris, and since then a number of women have worn the transformative gem.

Dela Pharon became the Zamaron's second choice for queen, while Deborah Camille Darnell—aka Remoni-Notra—just wanted power. Hal Jordan's old flame Jillian Pearlman was simply overwhelmed by the gem itself as it sought to discover which woman Hal loved the most.

TAKING NO PRISONERS
The very first Star Sapphire loved only the thrill of battle and the allure of conquest.

I SEE YOUR LOVE LIGHT SHINING

YEARS A SLAVE Imprisoned on the planet Takron, the young Koriand'r endured years of back-breaking hard labor and enforced drug-dependency.

An alien princess in exile, Koriand'r of Tamaran escaped a lifetime of brutality as a slave and lab rat for the Citadel and the Psions. Years after manifesting incredible energy powers, she led a revolt and escaped to Earth. An engine of righteous fury, she fights to ensure no other beings have to endure the pain and indignity that ruined her life.

As a child, Princess Koriand'r of Tamaran was trained in combat techniques alongside her sister Komand'r. Longtime rivals, Komand'r agreed for her sister to be sold into slavery. Kori spent her early life in drudgery and as a subject of scientific experimentation at the hands of the Psions.

After escaping to Earth, Kori adopted the name Starfire and spent time fighting evil alongside a number of young heroes—most notably Dick Grayson. Eventually, however, she suffered damage to her memories, and became insular. She was brought out of her shell by Red Hood, who looked after her when she became a member of his team, The Outlaws.

Following months of conflict on Earth, The Outlaws joined Starfire on a mission to occupied Tamaran. Her homeworld was now under attack from the parasitic Blight. Kori successfully liberated her people and reconciled with her sister, now known as Blackfire. Together they repelled another invasion from the Daemonite overlord Helspont.

Starfire returned to Earth and set up home in Florida. However, while investigating a slavery ring, she was taken hostage by Robin (Damian Wayne) in his attempt to recruit a new team of Teen Titans. She fought by the side of heroes including Raven and Beast Boy, before traveling to the mysterious Ghost Sector. There she became a member of Justice League Odyssey, helping to restore Tamaran's place in the universe, despite conflict with her sister when Starfire fell under the control of the evil Darkseid. Starfire was killed by her sister, before being brought back to life when she was plucked from an earlier point in the timestream.

ON THE RECORD

When Starfire was introduced in 1980, she was a naïve girl with staggering powers and a short temper. The alien princess trusted implicitly and always spoke her mind. Moreover, when she was in action with the New Teen Titans, she had to be constantly monitored because she had a tendency to go straight for the kill. After leaving the Titans, she served with distinction in the Justice League, the Outsiders, and interstellar peacekeeping force R.E.B.E.L.S.

GOLDEN GIRL Though always confident and a little headstrong, Starfire was generally considered to be a team player, not a solo star.

ALLIES The High Vanguard, Batman (Jarro)

ENEMIES R.E.B.E.L.S. Justice League, Legion of Doom

FACE-OFF
When a spore forced him to kill his own brother, Cobi escaped its control and ripped it from his head.

Starros are giant starfish-like aliens employing parasitic spores to enslave other species. Immense Starro Motherstars ventured across intergalactic space, brutally conquering and assimilating inhabited worlds with their spores as they went.

Starros attacked planet Hatorei and began incorporating the inhabitants, but the psychic link shared by the Hatorei enabled some of the populace to fight back. A youth named Cobi tore the Starro spore from his head, and when an immature Motherstar spore attacked, it became latched to his chest. They bonded, but Cobi was now in charge and exerted control over all the Starro species. He became Starro the Star Conqueror, controlling nine galaxies and exercising indomitable psychic control over trillions of beings. Starro the Star Conqueror's commanders were the High Vanguard, who were allowed to retain some of their free will.

Starro's forces made several attempts to conquer Earth. The first was met by a gathering of heroes who joined forces to defeat the invaders, thereby forming the Justice Society of America. Subsequent attacks launched by an undeterred Starro were thwarted by Vril Dox and L.E.G.I.O.N.

Recently, Starro joined Super Heroes in Team Mystery to turn back an invasion of Omega Titans and—inspired by Martian Manhunter's heroism, sacrificed himself to save his new comrades. In the aftermath, Batman grew a tissue fragment into a new being. "Jarro" is a valiant, loving ally and considers himself the latest Robin, aiding the Justice League during the return of Perpetua. The heroes were unaware that Luthor's Legion of Doom also preserved a portion of Starro: regrowing it to aid their plans of conquest.

CONQUEROR OF WORLDS
When Cobi bonded with a Starro parasite, he became an almost unstoppable warrior who could take down armies by himself.

LEAGUE OF LEGENDS

A Starro alien discovered Earth and attempted to conquer it with its mind-control powers. Fortunately, it was defeated by the Justice League on the team's first official mission.

Starling is a wanted mercenary and master strategist. The covert surveillance operative and combat specialist met Black Canary when both were infiltrating the

Penguin's operation in Gotham City. They decided to stick together after they were exposed, forming the Birds of Prey.

Starling repeatedly proved her worth in battle against terrorists such as Basilisk and metahuman maniacs like Choke and Talon, but she was not a team player, fighting with new members and acting with increasing ruthlessness. All the while, she was secretly supplying reports to Amanda Waller on Black Canary's sonic powers.

When the Birds finally learned of her treachery, working for Mr. Freeze and manipulating her teammates into going against the Court of Owls, she vanished. She remains a fugitive at large.

STEEL (NATASHA IRONS)

DEBUT *Steel* (Vol. 2) #1 (Feb. 1994)

REAL NAME Natasha Irons

EYES Brown **HAIR** Black

HEIGHT 5ft 6in **WEIGHT** 106 lbs

POWERS/ABILITIES Supergenius intellect, semi-sentient Chrome Armor changes configuration and gives protection, rocket boots, magnetic hammer (as Steel); superhuman strength and endurance, flight (as Starlight); can turn into gas (as Vaporlock).

Natasha Irons shares a flair for technology with her uncle John Henry Irons. She soon involved herself in his career as the Super Hero Steel, and when he retired received a

suit to become the new Steel. However, he was furious when she ditched city-cleanup duties to apply for the Teen Titans. Natasha then volunteered for Lex Luthor's Everyman Program, angering Henry further. Luthor's enhancement procedures gave her flight and other powers, and she joined Infinity, Inc. as Starlight. After developing the ability to turn to gas, she changed codenames to Vaporlock.

Natasha recently achieved her childhood dream to become part of a real team: the Justice League sponsored the Titans team tasked with helping victims of mutagenic changes caused by the Dark Multiverse invasion and the sundering of the Source Wall.

ENEMIES Ultrawoman, Crash, Skyhook

PROTECTIVE SUIT
Irons' organic steel armor can prevent him from succumbing to otherworldly infections. He can extend the liquid metal to protect others.

WOMAN OF STEEL
Steel and Superwoman's relationship wasn't without its "minor" clashes.

John Henry Irons was named after a hammer-swinging American folk hero. He used his technical expertise to create a suit of power armor and became the heavy-hitting hero Steel. A close friend and ally of Superman, John Henry has stood by the Man of Steel's side during countless conflicts, and fought many of his own battles against the forces of evil. Irons is also the owner of Steelworks, a tech start-up dedicated to building a better world through technology.

Engineer John Henry Irons was on his way to becoming a giant in the field of technology, designing weapon systems for a military industrial firm. But when he saw his weapons fall into the wrong hands, he opted to leave his promising career, destroying his notes in the process. On the run from the deadly corporation, Henry disguised his identity and took a job working construction in Metropolis.

It was there that John Henry met Superman, when the Man of Steel saved his life on the

construction site. John Henry was truly inspired by the chance encounter, so much so that when the alien beast known as Doomsday killed Superman in a violent brawl, John Henry decided to take up Superman's mantle and protect Metropolis. He adopted a suit of robotic armor with a red cape and S-Shield and became a true man of Steel.

Armed with his trusty hammer, Steel made a name for himself and kept up his Super Hero career even after Superman returned from the dead. In his private life, John Henry served as a mentor to his niece Natasha, who later followed in his footsteps as a new Steel and even joined the Titans. John Henry became romantically involved with Clark Kent's high school sweetheart, Lana Lang, and helped her in the crime-fighting field when Lana briefly became the hero Superwoman.

Steel continues his work on two fronts: aiding the world through technology with his company Steelworks and protecting the skies of Metropolis as Steel.

ON THE RECORD

In the *pre-Flashpoint* universe, engineer John Henry Irons created the Toastmaster advanced weapon for AmerTek Industries, but quit when his invention fell into the wrong hands. While Irons was working in construction, Superman saved his life after he fell from a skyscraper.

When the Man of Steel died in "The Death of Superman," Irons built an armored suit and became the hero Steel, one of four new champions who emerged to continue Superman's legacy. Irons was killed in battle during "Our Worlds at War," but returned to life after being placed in the Entropy Aegis armor. Unfortunately, the Aegis took control of him, and Superman had to save him again.

After *Flashpoint*, John Henry's origin was tied into the creation of Metallo, but his classic history was later restored during the "Superman Reborn" storyline.

Stargirl helped fight the Earth-3 Crime Syndicate's global invasion, and then joined another offshoot of the Justice League, the Justice League United. However, the final piece of the puzzle that was Courtney Whitmore's life fell into place when Superman encountered the powerful Dr. Manhattan, a near omnipotent being from another dimension. Dr. Manhattan went back in time and restored the Justice Society of America – the original team of mystery men heroes of the 1940s – to the timeline. During the butterfly effect that followed, the modern-day Justice Society returned, with Stargirl a proud member, once again carrying on the family tradition and legacy.

ON THE RECORD

On her debut, Courtney Whitmore was only allowed to be a Super Hero if her stepfather chaperoned her. Pat Dugan had been costumed crusader Stripesy in the 1940s and later turned his engineering genius to building the mechanical warsuit S.T.R.I.P.E. (Special Tactics Robotic Integrated Power Enhancer).

Unable to stop his wayward stepdaughter risking her life, he tagged along, but soon decided to let Stargirl go it alone as she graduated to a highly prized member of the Justice Society of America. Originally only armed with the first Star-Spangled Kid's Cosmic Converter Belt, she was later gifted the Cosmic Rod from Starman (Jack Knight).

READY FOR THE BIG TIME

After months battling beside his stepdaughter, Pat realized Courtney was capable of handling any trouble as a solo star.

Courtney Whitmore was a typical bratty kid until she found out about her stepfather's heritage as a costumed crime fighter/sidekick originally called Stripesy. Adopting gear from his former partner, the original Star-Spangled Kid, Courtney eventually became Stargirl. Although he was furious, there was nothing her stepfather Pat Dugan could do except train her to use the gear properly. He also recognized that she had found her true calling: helping people. In a year's time, she rose from fledgling hero to a media sensation.

Later, Stargirl was asked to join A.R.G.U.S.'s Justice League of America project but quickly realized it was for publicity purposes and that it wouldn't help her fight or save people. She was unaware that Director Amanda Waller also intended

Ted Knight became Starman after inventing a Gravity Rod that gathered and focused ambient energy from the stars. Ted refined and improved his creation until he finally devised the awesome Cosmic Rod, used by generations of champions who followed him. His career was interrupted by a nervous breakdown, stemming from his contributions to the Manhattan Project, but upon recovery he resumed costumed crime-fighting until old age caught up with him. His eldest son, David, took over as Starman.

Other individuals to have held the mantle of Starman include Charles McNider—the hero Dr. Mid-Nite—who assumed the role during Ted Knight's breakdown. McNider was succeeded by David Knight, who was thrown back in time at the moment of his death, decades hence. Mikaal Tomas, an alien would-be conqueror, rejected his species' plans to invade Earth and became Starman, Earth's guardian. Another alien, Prince Gavyn of the Crown Imperial, protected his domain as Starman until he died fighting Eclipso; his essence struck Earthman Will Payton, transforming him into Starman and Farris Knight, a distant descendant of Jack Knight's, was the 853rd century's Starman.

When Doctor Manhattan used his powers to erase Starman and his JSA colleagues, they were spectacularly restored in time to battle the threat of Perpetua. Ted Knight was key to the Justice League's strategy, using his Cosmic Rod to connect every Starman in history into a strikeforce attacking her from multiple points in time.

STARS IN THEIR EYES
The Astral Avenger crushed America's many enemies with his fists, backed up by the accumulated might and majesty of the heavens.

STARSTRUCK
A fragment of Totality, the oldest source of energy in the universe, gave Will Payton incredible powers.

In 1988, Will Payton was struck by a beam of force from the Stellaron-5 satellite. The artificial moon had been intended to capture a fragment of reality-warping artifact the Totality, but had proven wholly inadequate, malfunctioning and spilling the exotic energies towards Earth.

Payton was utterly transformed and became a local Super Hero, battling bad guys and dodging the mysterious science cabal who had built the satellite and now craved the powers possessed by "the Starman". During this period, Payton met reincarnating hero Carter Hall. Lex Luthor traveled back in time and abducted Payton to increase his own knowledge of Totality energy. After being tortured and having his mind altered, Payton escaped and joined the modern-day Justice League's battle against Perpetua and Luthor's Legion of Doom.

Valiantly battling across time and space, Payton seemingly perished opening star-portals that enabled Super Heroes in many eras to attack Perpetua simultaneously. The ploy might have succeeded if the Mother of Multiverses had not personally intervened, crushing Starman in her colossal fist.

Jack Knight came from a dynasty of Super Heroes. His father was World War II Super Hero Starman, and he was also related to the first Phantom Lady. However, he was content to let older brother David wield the Cosmic Rod as champion of Opal City. Jack preferred to pursue his love of history and popular culture. That all changed after David was assassinated.

Jack Knight became Starman only after David's murder was followed by an attempt on his own life. Using a prototype staff his father had discarded, Jack vanquished the killers and became the city's protector. Despite reservations, he was drawn to the life of adventure and exploration, although he refused to wear a costume.

Jack saved Opal City from numerous menaces, and even helped to revive the Justice Society of America for the modern age.

He was truly unconventional. He turned Super-Villains such as Bobo Bennetti, Solomon Grundy, and the Shade from the path of evil, and preferred to debate rather than fight. However, when necessity demanded, he pulled no punches. During an all-out battle for Opal, he led a coalition of unlikely champions against the savage forces of magical terrorist Culp.

Jack's greatest joy came from using his power to learn forgotten secrets. He once traveled through time and space to map the connection between all heroes who had ever called themselves Starman. Upon the birth of his daughter, Jack retired, passing the Cosmic Staff to teenage hero Courtney Whitmore, who carried on the legacy as Stargirl.

When Doctor Manhattan seemingly reordered history and erased the 1940s Super Hero generation, Jack vanished too, and, despite the restoration of many other heroes, he has not yet been sighted.

STARLIT KNIGHT
Jack Knight never let the astounding power in his hands overwhelm the wonder in his eyes or joy in his heart.

COSMIC HEROES

Other individuals to have held the illustrious mantle of Starman include Doctor Mid-Nite (Charles McNider); David Knight; Mikaal Tomas; Prince Gavyn of the Crown Imperial; and Farris Knight, the 853rd-century's Starman.

POWERS/ABILITIES Indomitable willpower commanding a power ring that is able to materialize hard-light constructs, translate languages, facilitate in-planet and intergalactic flight, and protect against hostile environments and enemy attack; vast knowledge of architecture and construction; military training; natural leader.

ALLIES Green Lantern (Hal Jordan), Green Lantern (Guy Gardner), Fatality

ENEMIES Darkstars, Sinestro, Legion of Doom

AFFILIATIONS Green Lantern Corps, Justice League

John Stewart is the go-to leader of the Green Lantern Corps. A natural leader with a tactical, military-trained mind, John has also been a frequent member of the Justice League, and can step up to command the League when needed or take orders when a mission doesn't fall under his realm of expertise. A longtime Green Lantern, John has felt the weight of making mistakes in this dangerous field, and he's sworn not to repeat them at any cost.

John Stewart was a sniper for the US Marines, knowing the darkness that came with following orders. He decided to leave that life behind him and become an architect. He would soon discover a career that combined both his passion for design and efficiency, and his need to protect and serve when he was brought into the Green Lantern Corps as Hal Jordan's backup after successfully passing the Guardians of the Universe's test. While he would form bonds with many of his fellow Lanterns, John would also make the greatest mistake of his career when his arrogance contributed to the destruction of the planet Xanshi. He also faced personal tragedy when his wife Katma Tui was murdered. John spent his career working through his guilt over Xanshi and dealing with his grief over Katma, becoming one of the best Green Lanterns in the process.

Later the leader of the Green Lantern Corps, Stewart helped battle Sinestro, Larfleeze, and dozens of other threats. He was instrumental in brokering and alliance between the Sinestro Corps and the Green Lanterns, and when the peace didn't last, he shut the Sinestro Corps down by planting an imperfection in their power battery. John then joined the Justice League and concentrated most of his efforts with that team.

When damage to the Source Wall—the protective barrier at the edge of the known universe—altered the very energies of the cosmos, John became the bearer of an Ultraviolet power ring for a brief time, infected by Sinestro's influence. However, by embracing his emotions rather than fighting them, John helped hold off Sinestro's forces, and restored his Green Lantern status through sheer willpower.

ON THE RECORD

A signature feature of John Stewart's career as a Green Lantern has always been the conflict between peaceful goals and violent means. He has suffered a great deal personally since first accepting a power ring, losing his wife Katma Tui and suffering the guilt of accidentally destroying the planet Xanshi. A somewhat brighter point in his life came when he had the chance to put his architectural training to work designing the new Justice League of America headquarters in Washington DC.

Revived thanks to advanced Apokoliptian technology, Steppenwolf returned to court just in time to see his sister—and Darkseid's mother—Queen Hegggra assassinated by his nephew's cronies Goodness and Desaad. The war continued to rage on, decimating systems, but Steppenwolf reveled in the carnage as the head of Darkseid's terrifying Dog Cavalry. A competent warrior thirsty for battle, Steppenwolf is happy to follow Darkseid. He died once more during the Death of the New Gods event, slaughtered by an out-of-control Infinity-Man. He resurrected, continuing to serve Darkseid and seek fresh combat.

FEAR AND FURY
Steppenwolf sought to carve out his own Earthly empire beside his savage Amazon daughter, Fury.

ON THE RECORD

After *Flashpoint*, general Steppenwolf led the invasion of Earth until Cyborg hacked Apokoliptian Boom Tubes, trapping them on Earth-2. Undaunted, he attempted to conquer that world in Darkseid's name, killing their Wonder Woman and Kal-L. ALLIES Shadow Cabinet

ENEMIES Daemonites, Hidden People

The origins of Stormwatch reach back into the Middle Ages, when its members were known as Demon Knights. Among their first members were Artisan, Madame Xanadu, and Vandal Savage. They first became known as Stormwatch during the 14th century, when they battled the extraterrestrial Daemonites. The group was typically formed around a Century Baby—a person given powers by virtue of being born at the stroke of midnight as a new century dawned. Stormwatch revealed itself to the world's governments in the 18th century, which its ruling Shadow Council soon decided was a mistake. They worked to erase the group's existence from known history, and were successful by the beginning of the next century.

As the 21st century dawned, the group was in danger of losing its way, as its historical mission of combating alien threats now faced competition from the Justice League. Adam One (the avatar of Merlin, one of Stormwatch's original members) recruited a new Century Baby, Jenny Quantum, to maintain the group in the new era. Other core members included Jack Hawksmoor, Apollo, and the Midnighter, and briefly the Martian Manhunter. They battled the Daemonites, the Hidden People, and the Red Lanterns, among other threats, while keeping their existence and membership secret.

ON THE RECORD

The original Stormwatch was formed in the wake of a disaster on board Monitor One, a UN space station. The event transformed the station's Team One into the dangerous Warguard, who were defeated and a new team—Stormwatch—recruited in its place. Its members were "Seedlings," humans who had been granted superpowers. Now based on an orbital platform called Skywatch, they monitored both terrestrial and alien threats.

THE PRICE OF VIGILANCE
Though no hostile force could long deter Earth's metahuman watchmen, internal dissent and hidden agendas would eventually tear the team apart.

Before *Crisis on Infinite Earths* anthropologist Adam Strange was struck by a random Zeta beam fired from Alpha Centauri and teleported to atomic-war-ravaged Rann, where he became a hero, fighting invasions and defeating uncanny threats. He also fell in love with Alanna, a hero in her own right.

Post-*Flashpoint* he was working a dig in northern Ontario with his student Alanna Lewis when an uncanny beam of light made her disappear. He discovered a strange skeleton, which he showed to the heroes Animal Man and Star Girl. They found what appeared to be an alien grave and an underground base. Fighting off an attack by aliens, Strange was knocked into the base. Arming himself with a jet-pack-powered space suit and ray gun, he rejoined the fight. He and the rest of Justice League United were then transported to Rann, where they learned Byth Rok was responsible for Alanna's abduction.

The Zeta Beam, which had transported them to Rann, abruptly returned them to Earth. Strange was reunited with Alanna as he and the JLU battled Ultra the Multi-Alien. Moving back and forth between Earth and Rann, Strange (by now married to Alanna) fought Byth Rok with help from the time-displaced Legion of Super-Heroes. Strange and the JLU later joined the Justice League of America's counterattack against Vandal Savage when he besieged the JLA's Watchtower.

Following *Rebirth*, Strange is Earth's unofficial ambassador to the stars. He has often fought with or against Hawkman and the Thanagarians. He also worked with Superman as he strove to create the United Planets organization, and with the Justice League against Leviathan, the Legion of Doom, and others.

ON THE RECORD

Adam Strange was introduced in 1958 in DC's *Showcase* title, which also launched the career of the Silver Age Flash (Barry Allen). In his debut story, Adam was an anthropologist and adventurer, who was transported to Rann by a Zeta Beam experiment conducted on the scientifically advanced planet Rann. On his arrival, he fell for Alanna, daughter of the scientist Sardath, who had created the Zeta Beam.

More adventures followed, each limited to the fluctuating duration of the Zeta Beam's powers—which prolonged the blooming romance between Strange and Alanna. They were married on Rann, with the Justice League of America present.

ENEMIES League of Assassins, Basilisk, Maxwell Lord, Eclipso, Black Mask, Maxwell Lord, Justice League

The Suicide Squad is the nickname for Task Force X, a team of Super-Villains originally brought together by Amanda Waller to perform highly dangerous black ops missions. The members are among the most ruthless, craziest, and cold-blooded killers in the world—the majority have been sentenced to life-imprisonment in Belle Reve Penitentiary. The Squad has an ever-changing membership, but some villains—like Deadshot and Harley Quinn—have survived several missions. If they live, members are rewarded with reduced jail terms. They might even one day walk free... if they can last long enough.

After World War II, the US government began to investigate extraterrestrial and paranormal threats. To that end, they created Task Force X, a group of specialized soldiers, scientists, and intelligence officers unofficially dubbed the Suicide Squad. Led by Captain Rick Flag, Sr., astronomer Dr. Hugh Evans, space medicine expert Karin Grace, and physicist Jess Bright, this Suicide Squad worked with Argon head King Faraday to protect the world.

Decades later, a brilliant, but often heartless tactician named Amanda Waller decided to bring the concept back. However, she wanted a fighting force of completely expendable and easily deniable soldiers; Waller wanted Super-Villains. Working with the government, Waller formed her first Task Force X, her Suicide Squad. She teamed powerhouse criminals Emerald Empress, Johnny Sorrow, Lobo, Dr. Polaris, and Rustam together with less than ideal results.

Amanda's later teams were more manageable. She found success with slightly more controllable criminals like Harley Quinn, Deadshot, and Captain Boomerang. Bombs embedded in their heads allowed Waller to kill anyone who disobeyed her. The Squad fought threats from terrorist organizations and Super-Villains on foreign soil, staging missions that official troops could not. Waller soon appointed heroic additions to her team in the form of Rick Flag, Jr. and Katana, and found other longtime Squad members, including Killer Croc and the Enchantress.

The Squad suffered from external threats, ranging from the Justice League to Maxwell Lord re-uniting Waller's original Suicide Squad in a mad attempt to obtain the powers of the supernatural villain Eclipso. The Squad always triumphed, with some members living to see another day. Eventually, Killer Croc, Harley Quinn,

Criminals chosen by Amanda Waller for missions had a nano-bomb injected inside their necks. If they went rogue, the bomb would explode—a sure way to guarantee their loyalty to Amanda's cause.

Belle Reve

Amanda took her potential candidates from the notorious Belle Reve Penitentiary, which houses metahuman criminals and Super-Villains. Close to the Gulf of Mexico, the prison is surrounded by swampland.

TERROR ATTACK
An early Suicide Squad mission took the fight to the Basilisk terrorist network.

JUSTICE LEAGUE VS. SUICIDE SQUAD

After looking into Task Force X, Batman brought the team to the Justice League's attention. The heroes decided to shut Amanda Waller's pet project down. They confronted the Squad during a mission, and a ferocious battle ensued.

However, when Maxwell Lord broke some of the most powerful criminals on the planet out of the top-secret prison called the Catacombs, the Justice League and the Suicide Squad joined forces. It took the combined might of both teams to end this high priority threat.

TEST OF STRENGTH

When the Justice League confronted the Suicide Squad, Amanda Waller gave her team an order in no uncertain terms: "Do not let the Justice League take you alive. Or you're dead."

KILLED IN ACTION

Some Suicide Squads are luckier than others. When the main Squad was busy running a mission on Atlantis, Amanda Waller recruited a team consisting of the archer Merlyn, vampire Scream Queen, Titan villain Shimmer, martial artist Tao Jones, blade expert Skorpio, contortionist Rag Doll, and explosive generator Baby Boom. This ragtag bunch were charged with capturing Belle Reve escapee Cadence Laramie, who seemed able to summon and control ghost creatures. Laramie and all the members but Merlyn were killed in action, although it was later revealed that Shimmer faked her own death, and Rag Doll might have survived, too.

IN TOO DEEP

Some Suicide Squad recruits just didn't have what it takes to face down hordes of supernatural spirits and a very angry Swamp Thing.

"I want to use prisoners with nothing to lose and everything to gain. I want to create a Suicide Squad."

REBIRTH

BUSINESS AS USUAL

With the world spiraling into even greater chaos than usual, Amanda Waller resurrects and redeems disgraced military legend Rick Flag, entrusting him with restoring Task Force X to full combat effectiveness.

Can the traumatized and disaffected veteran possibly be a match for Waller's rebellious and unwilling recruits, and the deadly modern menaces that she happily pits the Suicide Squad against?

and Deadshot all earned their freedom, but the government "forgot" to inform Harley and Deadshot of this fact, continuing to use them on Suicide Squad missions.

A soldier called Osita learned of Task Force X after witnessing her wife's death at the hands of Captain Boomerang during a Squad mission. She formed the Revolutionaries, and they successfully infiltrated the Suicide Squad in order to seek out the mysterious new head calling the shots. Meanwhile, Amanda Waller found herself answering to a superior named Lok. When Lok decided to use the Revolutionaries as Squad members, Waller quit Task Force X. That made it much easier for Deadshot when Lok instructed him to assassinate his longtime ally, Captain Boomerang. Deadshot shot and killed Lok instead, and he and this new Squad of Revolutionaries became outlaws alongside Harley Quinn and Zebra-Man.

This Squad began hunting for the man responsible for their situation: Ted Kord. However, Kord had been replaced by Black Mask, who was impersonating the billionaire. The Squad successfully discovered Black Mask's plot, but not before Deadshot was seemingly killed.

ON THE RECORD

The Suicide Squad has changed a great deal since its first appearance in the *The Brave and the Bold*. The original Suicide Squad was a group of heroes led by Colonel Rick Flag—the pilot of their base, the Flying Laboratory. The team also included chief medic Karin Grace, a physicist called Jess Bright, and astronomer Dr. Hugh Evans. They investigated Fortean subject matter and often fought strange monsters and aliens.

Villainous legends

During the "Legends" miniseries, the modern Suicide Squad made their first dramatic appearance. This team was made up of imprisoned Super-Villains drafted into the Suicide Squad by Amanda Waller. The team would include villains such as Captain Boomerang, Deadshot, and mainstay heroes like Rick Flag Jr., Bronze Tiger, and even Oracle (Barbara Gordon).

Task Force Omega

A later Suicide Squad—named Task Force Omega—was led by Sgt. Rock. Everyone except Major Disaster seemingly died on the team's first mission. Sgt. Rock recruited more villains for the team, bringing in the likes of Deadshot and Killer Frost. The team was eventually captured by a group called Onslaught. Some members were rescued by the Justice Society, who could only find a mask of Sgt. Rock in the cell where he was been held, implying their leader had been an impostor.

BOY OF STEEL

Superboy aged rapidly, but retains his boyish enthusiasm and a faith in humanity only rivaled by that of his father, Superman.

LEGION FOUND

Superboy was a perfect fit for the new Legion of Super-Heroes. In the 31st century he was able to see his hopes for a better world actually come to fruition.

The son of Superman and Lois Lane, Jon Kent is heir to the greatest legacy in the universe. As Superboy, he originally teamed with his best friend Robin (Damian Wayne), before traveling to the future of the 31st century to teach an entire generation the ways of truth and justice.

Superman and Lois Lane had lived through countless Super-Villain battles, invading aliens, and reality-warping events. During those years of heartache and chaos, they still managed to find time for each other and get married. But when they were ready to settled down and start a family, they both decided a change was in order.

Leaving their jobs as reporters at Metropolis' *Daily Planet*, the couple raised their son, Jon Kent, on a farm in Hamilton County, some 300 miles north of the city, although Superman kept up his heroic actions from the shadows from time to time. But before long, big-city life beckoned, and the family moved back to Metropolis.

As Jon grew and matured along the way, he followed in his father's footsteps as Superboy, putting his own Kryptonian powers to good use. With his dad's blessing, he partnered with Robin (Damian Wayne) and even set up a hideout in the form of the Fortress of Attitude, an underwater headquarters well-equipped and monitored by both Batman and Superman.

However, when Robin refused Jon's request to join the Teen Titans, Jon felt aimless. He took a trip across the galaxy with his grandfather, Jor-El, where he accidentally traveled through a black hole and ended up a prisoner of Ultraman of the evil Crime Syndicate. By the time Jor-El helped rescue Jon and return him home to Earth, Jon had gone from an 11-year-old to a 17-year-old. Due to the black hole travel, however, Jon had only been gone three weeks Earth time. Upon his return, Jon helped stop an intergalactic battle with an idea to form a United Planets, based on Earth's own United Nations. On the first assembly of this body, dubbed Unity Day, Jon was invited to join the future team called the Legion of Super-Heroes and travel to the 31st century. Feeling this was his destiny all along, Jon did just that, teaching 21st century heroics to an entire generations of new allies.

ON THE RECORD

The fact that Jonathan Kent was born into a continuity event and survived several more reboots is a testament to the popularity of the character. Born in a pocket universe of sorts when the pre-*Flashpoint* Superman and Lois Lane had a child during the *Convergence* event, the classic Kent-Lane family survived and made it into the main DC universe, later merging with their New 52 counterparts. Jon's history was tweaked so that he was born on Earth-0, effectively melding Superman's post-*Crisis* reality with the current continuity.

Kon-El's adventures soon brought him in contact with the then Robin (Tim Drake) and the super-speedster Impulse. Finally, when his old teammates rescued him and brought him to Earth-0, Superboy was surprised to see that so much had changed. Being on Gemworld, he'd missed several continuity-altering events, including *Flashpoint* and *Rebirth*. The world had changed, but Superboy still remained the same. And somehow, when he made contact with his loved ones, they remembered not just him, but the world he was from.

Truly alien in a brave new world, Superboy nonetheless continues his battle against the forces of evil, his load lightened by his old teammates and friends in the newest incarnation of the Young Justice team.

Some heroes are made, not born.

A combination of Superman and Lex Luthor's DNA, Superboy was an outsider from his inception. Raised in a lab, and aged to maturity in the public spotlight, Superboy went from a young teenager with an attitude to a more mature veteran of the Super Hero team Young Justice.

When Superman died saving Metropolis from the menace of the alien beast known as Doomsday, four faux Supermen emerged, each claiming to be the original. One of those four was Superboy, a teenage clone of Superman created in a lab by the secretive

organization known as Cadmus. Kon-El, as Superboy would later be called, was in reality half human and half Kryptonian, made from both Superman's DNA and that of the Man of Steel's arch enemy, Lex Luthor. TITANS TOGETHER

The Superboy who helped found the Titans in the New 52 was more stoic than the original incarnation of Kon-El.

ON THE RECORD

As first conceived, Superboy was a light-hearted look at "the adventures of Superman when he was a boy." Wearing his Superman costume and fighting crime as a teenager in Smallville, young Clark Kent was drafted into the Legion of Super-Heroes, a team of crime fighters one thousand years into the future. While the Kon-El version of Superboy was created following the "Death of Superman" saga, the character was altered when introduced into the post-*Flashpoint* era. A reality has been since altered due to the *Rebirth* event, this Kon-El was a founding member of the Teen Titans.

While only a high schooler, Kara Zor-El has more life experience under her golden belt than most adults three times her age. While attending National City Technical High School or working at Catco, Kara hides her famous appearance behind a pair of glasses that automatically darken her hair color.

Cuts like a Blade

Living in a world where her very existence caused distrust due to her tremendous powers, Supergirl began working with the Department of Extranormal Affairs out of their National City headquarters called the Blade. D.E.O. Director Cameron Chase couldn't afford not to be suspicious of Supergirl if she was to keep the country safe.

House of El

Supergirl has found family in not just Superman, but also Superboy (Kon-El), Superboy (Jon Kent), and even Lois Lane.

While older than her cousin, Supergirl crash-landed on Earth years after baby Kal-El. Unlike the man who would grow to become Superman, Kara Zor-El spent her childhood on Krypton, Earth culture remaining alien to her. Now attempting to defend a world she doesn't fully understand, Kara has followed in her cousin's footsteps to become Supergirl.

Kryptonian scientist Zor-El had a rivalry with his brother Jor-El. With Krypton on the brink of destruction, Jor-El rocketed his son Kal-El toward the far away planet Earth in order to save the child's life. Zor-El did the same with his daughter Kara, but then took things a step further. Zor-El

struck a deal with the Super-Villain Brainiac to save and preserve his metropolis of Argo City. However, Argo was destroyed anyway, and Zor-El became a ghost trapped in the hi-tech machine that is Brainiac.

Meanwhile, Kara's rocket crash-landed in Siberia. She was overwhelmed; unable to control the powers she had suddenly acquired from exposure to Earth's yellow sun. Finally regaining her senses a bit, she met her baby cousin Kal-El, discovering that he had somehow arrived years earlier than her and aged into the hero known as Superman. She soon followed suit as the heroic Supergirl.

On Earth for only a few months before she lost her powers, Kara made a deal with the Director of the Department of Extranormal Operations, Cameron Chase. Chase agreed to rocket Kara toward the sun to restore her abilities, but it would come at a cost. Worried Kara was a potential danger to the people of Earth, she assigned a married pair of agents, Jeremiah and Eliza Danvers to Kara's case. Kara would live with the Danvers and adopt the secret identity of sixteen-year-old Kara Danvers.

Enrolled in National City Technical High School, Kara thought it would be easy to adjust to life in a culture so primitive compared to the advanced society to which she was accustomed. Gifted in science on Krypton, Kara discovered she would have quite the learning curve on Earth, adjusting to this world's rudimentary tools. The Danvers attempted to give Kara a normal life and even subjected her to many different Earth cuisines, including the food court at the National City Mall.

ZOR-EL RETURNS

One of Supergirl's first battles was with Cyborg Superman, but this half-robotic foe wasn't the Cyborg Superman from Clark Kent's past. Instead, this version was loaded with the consciousness of her father, Zor-El. Mad with grief, Zor-El soon rebuilt Argo City and populated it with the cybernetic reanimated corpses of its dead civilization.

RAGE AGAINST ROGOL

After the alien called Rogol Zaar came to Earth and attempted to destroy it, Supergirl discovered that Rogol claimed to have destroyed Krypton in much the same fashion. More personally affected by Rogol's crimes than even Superman—who had no personal memories of Krypton—Supergirl hunted Rogol down and helped imprison him in the Phantom Zone for his crimes.

Supergirl armed herself with Rogol's axe as she set out into outer space to learn everything she could about the killer, accompanied by none other than her Super Dog, Krypto.

simple communication became a Herculean task for the Girl of Steel, and her classmates often gawked at her bizarre accent.

When her physics work was noticed by Catco Worldwide Media head Cat Grant, Kara was given a job alongside her classmate Ben Rubel, whom she later began to date. However, her day job always played second fiddle to protecting National City. To that end, she faced her father in the form of a corrupted Cyborg Superman, and fought the likes of Emerald Empress and Magog. She soon came into conflict with the D.E.O. itself and parted ways with them.

Involving a journey through space, infection from the Dark Multiverse, and learning Eliza Danvers was killed, Supergirl's life kept up a hectic pace that proved difficult for even her super-speed. As a new chapter in her life unfolds, the Girl of Steel has truly rededicated herself to defending her adopted planet.

**THE INFECTED**

When a Jokerized Batman from the Dark Multiverse called the Batman Who Laughs came to Earth-0, he created his own Secret Six and infected Supergirl briefly with a tainted Batarang.

ON THE RECORD

There were numerous early attempts to create a female equivalent of the Man of Tomorrow. The particular prototype which clicked best with fans and prompted Kara Zor-El's official entry into the DC pantheon appeared in 1958 in *Superman* (Vol. 1) #123, when Jimmy Olsen's wish for a female companion for his pal Superman came true.

Putty in his hands

After DC continuity was rebooted in the 1980s, Supergirl was re-imagined as an artificial, protoplasmic life-form. Grown by a

benevolent, alternate-world Lex Luthor, her psionic abilities mimicked Superman's powers. The shape-shifter Matrix migrated to Earth and chose Supergirl as her preferred form. She alienated everyone by becoming the girlfriend of Lex Luthor when the villain transplanted his brain into a younger cloned body.

Eventually, Supergirl merged her body and personality with troubled student Linda Danvers to save her from demonic possession. They ultimately evolved into a powerful supernatural entity known as the Earth Born Angel of Fire.

Supergirl's dark side

A tougher, rebellious Girl of Steel crashed to Earth in a reprise of her origin for the 2000s. More powerful than her cousin Kal-El, Kara caused a rift between Superman, Batman, and Wonder Woman. She also became a disciple of evil New God Darkseid before joining the right side.

OVERPOWERED

Darkseid looked on approvingly as Supergirl showed Superman who was boss.

Tomorrow's world

Believing that she was experiencing a prolonged dream, Supergirl joined the Legion of Super-Heroes. In a dystopian future, where teenagers were oppressed by adults throughout a vast federation of United Planets, Kara Zor-El led this rebellious group to triumph and glory.

A different kind of hero debuts with Superman creating a new literary genre and sparking a revolution in popular fiction.

Superman (Vol. 1) #423 & *Action Comics* (Vol. 1) #583 (Sep. 1986)

An era ends in tribute to 50 years of continuity as the Superman family retires to make way for a potent re-imagining of the characters.

Superman (Vol. 2) #75 (Jan. 1993)

After an epic storyline across multiple titles, a horrific pitched battle with Doomsday results in the "Death of Superman."

Superman (Vol. 1) #701-714 (Sep. 2010-Oct. 2011)

Following a mighty war against the people of New Krypton, which found him exiled from Earth, Superman reconnects with ordinary Americans by walking across the country.

Suit of Steel

Superman has worn a few other costumes during his career, but returns time and time again to his classic, iconic uniform. For a while, he wore a version with a red belt that didn't feature his signature red tights. However, he gifted this *Rebirth* costume to Lois when she and their son Jon traveled the galaxy with Superman's father, Jor-El.

Years ago, the planet Krypton was on the verge of destruction, plagued by devastating earthquakes and other disasters. Krypton was a highly advanced civilization, one revolving around a red sun, yet it had fallen into a state of crisis. Although scientist Jor-El petitioned the Kryptonian Council to evacuate the planet, he was called an alarmist and ignored. After one final plea, Jor-El and his wife Lara were left with no other choice. With destruction all around them, they placed their only son, baby Kal-El, in a small rocket ship programmed to carry him away to the safety of the planet Earth. Jor-El had done the calculations and realized that Earth's yellow sun would supercharge Kal-El's cells, allowing him to thrive in a way he never could on Krypton.

When Kal-El's ship crashed on Earth it was spotted by Kansas farmers Jonathan and Martha Kent. A childless couple eager for a baby, they rescued the little star-child and raised him as a perfectly normal little boy in their hometown of Smallville, naming him Clark Kent. However, as Clark grew older, foreboding hints of his true nature manifested themselves. His physical strength and speed grew exponentially. He was never sick, and as his teen years progressed, his senses became acutely sharper than those of his peers. Clark learned early on that anyone in need had to be helped, and it was his duty to do the right thing. It was thanks to his parents' love, warmth, and social conscience that he grew up with the upright moral principles that shaped his later life.

Attending high school with his best friends Pete Ross and Lana Lang, Clark did his best to keep his continually evolving powers to himself, even from a rather nosy older fellow student named Lex Luthor. However, when a tornado hit town during a county fair, Clark used his powers to save Lana's life, and discovered that he could fly. While he and Lana began a childhood romance, Clark realized that his powers were too big for Smallville, and soon left to explore the world.

THICK AS THIEVES

Growing up in Smallville, Clark was best friends with Pete Ross and Lana Lang. He also knew Lex Luthor, but Lex was a little older, and according to Clark, just as difficult then as he is now.

LAST SON OF KRYPTON

Baby Kal-El was sent to Earth to escape the destruction of Krypton. As an adult, he would discover that his father, Jor-El, escaped death that day as well... for a time.

During his travels, Clark realized that truth and justice were exponentially important to him. Inspired to report that truth on a daily basis, he moved to Metropolis and pursued a career as a journalist. He got a job at *The Daily Planet*, working under Perry White, where he met his fellow reporter, Lois Lane, and photographer and general office gopher, Jimmy Olsen. Clark had perfected a mild-mannered routine by this point in his life, not afraid to let his Midwest honesty be mistaken for naiveté from many a jaded Metropolis citizen. He had learned to hide behind eyeglasses and relaxed posture

KRYPTON'S DESTROYER?

When Jor-El and Lara sent Kal-El away from Krypton, neither was aware that there may have been something far more sinister in play when it came to their planet's destruction. A warrior named Rogol Zaar feared Krypton's advanced science and predicted they would ruin other civilizations in their continued development. Rogol claimed that he was truly responsible for the destruction of Krypton, and in fact, later tried to destroy Earth when he found that it, too, had been "infected" by Kryptonians.

Although he was brought to justice by Superman, Supergirl, Superboy (Jon Kent), and others, the mystery of his claims still eats away at the heroes.

ROGOL RAGE

Supergirl felt more anger toward Rogol's crimes than Superman. As Kal-El's older cousin, she grew up on Krypton, where Clark has no memories of the planet.

years ago, in order to disguise his natural strength and power.

This quiet and reserved Clark Kent was a drastic contrast to the man in a red cape who would appear later that day. When Clark tagged along with Lois to investigate Lex Luthor's latest enterprise, he was forced to leap into action when Lois was accidentally knocked off a rooftop's ledge. Changing in secret into a blue and red costume, adorned with the "S"-shaped house of El crest on its chest, Clark flew up and rescued not just Lois, but also a falling helicopter. Lois was awestruck, and soon coined the name "Superman" when she stole the headlines of the next edition of *The Daily Planet*.

Superman's exploits made him a sensation, inspiring other metahumans and masked heroes to emerge from the shadows and work under the avid gaze of an adoring public—and that of the increasingly

WHO'S GOT YOU?
While she had already met him as Clark, Lois was much more impressed when she met Superman for the first time.

MAN OF TOMORROW

For all his incredible abilities, Superman's greatest strength is his unflagging determination to protect his adopted world.

This is a job for Superman!"**

KAL-EL

JOR-EL RETURNS

The Superman family has grown throughout the years. Not only did Superman's cousin Supergirl survive their planet's destruction, but so did the nefarious General Zod and his wife Ursa, who escaped thanks to the other dimensional Phantom Zone. Superman would even discover that his father Jor-El was transported away from Krypton at the last moment. However, Jor-El would prove not quite the father figure Kal-El had dreamed of. Jor-El was coldly scientific, and was proven to have created the genetically altered planet-destroying monster Rogol Zaar. For his crimes, he was sent back to Krypton at the moment of its destruction, despite Superman's protests.

Over the years, Superman has fought countless threats, from the villainous schemes perpetrated by the seemingly altruistic billionaire Lex Luthor, to the hijinks of the 5th dimensional imp Mr. Mxyzptlk, to the direct, organized attacks of rogue surviving Kryptonian General Zod.

Superman's relationship with Lois continued to blossom despite the chaos, and he eventually revealed his secret identity to her.

HOSTAGE CRISIS

When scientist Lex Luthor and the army captured the Metropolis vigilante, they learned the limitations of their power—and the risks of antagonizing Superman.

Some time later, Clark and Lois had a son and named him Jonathan Samuel Kent. In order to give Jon the life he needed, Clark and Lois took sabbaticals from the Daily Planet and moved to California for a time, where Clark worked as Superman in the shadows, stepping away from his duties in the Justice League. He eventually returned, realizing that his family belonged in Metropolis.

In his continued pursuit of the truth, Superman has recently revealed his double identity to the world. A public figure now as both Clark Kent and Superman, he continues to report for *The Daily Planet* and wages his never-ending pursuit of justice, no matter what the universe throws his way.

REBIRTH

SUPERMEN?

After the continuity-altering event known as *Flashpoint*, the Superman that was reborn into the main universe, Earth-0, was younger than the previous incarnation and had a different personal history, as well as only a casual friendship with Lois Lane.

Interference from the near-omnipotent being Doctor Manhattan had split Superman's continuity in two, with the other half living in the shadows with his wife Lois and their son Jon Kent. During a battle with the 5th-dimensional imp called Mr. Mxyzptlk, Superman managed to merge his personal histories into one streamlined timeline, his past and life becoming one with that of the so-called "New 52" Superman.

REBIRTH

SINO SUPER-MAN

During his final days, Superman's power waned. He was even attacked by Chinese superhumans seeking to steal his genetic material for their enigmatic leader, Dr. Omen. Soon after Kal-El's final battle, a new Chinese Super Hero debuted and it appeared that the Middle Kingdom had finally achieved the impossible dream of putting their own patriotic Super-Man onto the world stage. Kenji Kong, a brash young man, takes to this new role with great relish, determined to be China's Number One hero.

SUPER THREATS

Superman has faced death on multiple occasions, yet lived to tell the tale. His rogues gallery consists of some of the most powerful villains in the universe.

When Superman first appeared on the scene, he was as likely to go after greedy mine-owners and armaments manufacturers as mobsters and mad scientists. However, as he developed, the Man of Tomorrow specialized in battling monsters, crushing invasions, and tackling criminals no ordinary emergency services could handle. He became an accredited representative of the legal authorities.

Following a reordering of reality in *Crisis on Infinite Earths*, Superman was dramatically reimagined for a new generation. Much of his history was dialed back to parallel his earliest adventures, and his foster parents Jonathan and Martha Kent were resurrected to add a family element to the life of the interstellar orphan.

The Ultimate Sacrifice

When the alien beast Doomsday burst from the Earth on a destructive path to Metropolis, no force could stop it. After the creature smashed the Justice League and brutalized Superman, the city looked finished. However, its unyielding champion was determined to stop Doomsday at all costs. Despite his terrible injuries,

DOOMSDAY SCENARIO
Despite being bloodied by attacks from the alien invader, Doomsday Superman fought to defend Metropolis.

Superman returned to the fray. He finally triumphed over the creature, but paid the ultimate price for victory with his life.

Superman's body was interred in Metropolis' Centennial Park. It was stolen by the military research group Cadmus for experimentation purposes, before being recovered by the fallen hero's friends and revived using Kryptonian technology. However, it was just an animated cadaver, as Superman's spirit was long gone.

It took the unfailing devotion of his Earth-born father to retrieve Clark from the afterlife. Grieving for his son, Jonathan Kent suffered a heart attack, and ascended to an eerie netherworld, from where he brought Clark back to stand at the forefront of Earth's champions.

The Rise and Fall of New Krypton

The Man of Steel's uniqueness ended when citizens of the Bottled City of Kandor were restored to normal size. Under the leadership of Alura Zor-El and General Zod, legions of new supermen built a New Krypton. Before long, growing tensions and suspicions culminated in a "100-Minute War" against mankind, with Superman and Supergirl caught in the middle. With the help of Superboy and Lor-Zod, Zod was ultimately trapped in the Phantom Zone and Earth was safe once again.

Superman Reborn

After the events of the miniseries *Flashpoint*, Superman's life would receive a drastic overhaul not seen since his reboot following the events of *Crisis on Infinite Earths*. While the post-*Crisis* Superman had married Lois Lane, their marriage had never happened in the new reality of this New 52 era. Superman's costume appeared more like a suit of armor, and his early history was rewritten to include a period of time where he simply wore a T-shirt to fight crime. This Superman was eventually killed off, as another Superman, the version from the pre-*Flashpoint* universe, emerged from the shadows. During the four-part "Superman Reborn" storyline that crossed from *Superman* to *Action Comics*, the history of these two Supermen was merged. The result was a Superman who contained the best of all continuities. He had indeed battled Doomsday and died, married Lois Lane, and had a son, and even formed the Justice League by battling Darkseid.

WAR OF THE SUPERMEN
Superman and Zod clashed over the Kryptonian zealot's desire to turn Earth into a new Krypton.

THOROUGHLY GROUNDED
The Last Son of Krypton's resolute sense of justice is molded by the love, support, and good advice of his adoptive parents, Jonathan and Martha.

SUPERMAN REVENGE SQUAD

DEBUT *Superboy* (Vol. 1) #94 (Jan. 1962)

BASE The Moon

MEMBERS/POWERS Cyborg Superman:

Manipulation of electronic devices, Kryptonian powers; **Eradicator**: Android with Kryptonian powers; **Metallo**: Superhuman strength and durability, powered by Kryptonite heart;

Blanque: Telepathy, telekinesis, pyrokinesis; **Mongul**: Superhuman strength, stamina, and speed, invulnerability, flight

ALLIES General Zod

ENEMIES Superman

Hank Henshaw (Cyborg Superman) assembled a team of some of Superman's most dangerous enemies, making their mission statement their name: Superman

Revenge Squad. Consisting of Henshaw, Eradicator, Metallo, Blanque, and Mongol, Cyborg Superman had one more recruit to make if the team were to successfully break into the Fortress of Solitude: General Zod. At first Zod resisted the idea of a team-up, refusing to follow orders, but he realized that he could use the Squad to achieve his dearest wish: To use the Phantom Zone Projector at the Fortress of Solitude to release his wife and son from their other-dimensional prison. After they had served his purpose, Zod disbanded the team, but kept the Eradicator as an ally for his family.

BASE Metropolis

MEMBERS/POWERS

Brahma (Cal Usjak): Super-strength and invulnerability; **Loser** (Theo Storm): Possesses powerful dermal force field;

Maximum (Max Williams): Channels bursts of superhuman energy; **Outburst** (Mitch Anderson): Manipulates magnetic fields; **Pyrogen** (Claudio Tielli): Flame-controlling pyrokinetic;

White Lotus (Nona Lin): Martial artist; mystic aura generates a force field she can manipulate.

ALLIES Lex Luthor

ENEMIES O.M.A.C.

A heroic power vacuum left by Superman's brief departure from Metropolis to defend Earth gave rise to the Supermen of America. This team of teen heroes was unexpectedly sponsored by Superman's perennial opponent, Metropolis mogul Lex Luthor.

When Junior K-D, the lead singer of the band Crossfire, was gunned down during a benefit concert in Metropolis, the ensuing chaos forced teen hero Outburst into action. Inspired by Superman, Outburst eagerly accepted Lex Luthor's offer to recruit a force of young metahumans. He had soon gathered Brahma, Loser, Psilencer, Pyrogen, and White Lotus to serve as Supermen of America. The group helped to quell gang violence on Metropolis' streets and even tackled Super-Villains emboldened by Superman's temporary

AFFILIATIONS Crime Syndicate

On Earth-3, Lois Lane is a powerful Amazon known as Superwoman. Ruthless and manipulative, she joins the Crime Syndicate. The team invade

Earth-0 with Superwoman wielding the barbed Lasso of Submission, exerting control over almost any being.

Pregnant by Alexander Luthor, she plays teammates Owlman and Ultraman off against each other by claiming that each of them is the father of her baby. Superwoman gives birth during a battle against the Anti-Monitor and the heirs of Darkseid, but is killed by Darkseid's daughter Grail, who wants to use the child for her own ends.

T.O. MORROW

DEBUT *The Flash* (Vol. 1) #143 (Mar. 1964)

REAL NAME Dr. Thomas Oscar Morrow

BASE Detroit, Michigan

HEIGHT 5ft 11in **WEIGHT** 187 lbs

EYES Blue **HAIR** Black

POWERS/ABILITIES Scientist with advanced knowledge of robotics and future studies; access to the highly classified Red Room at S.T.A.R. Labs.

ALLIES Dr. Silas Stone, Dr. Will Magnus, Sarah Charles

ENEMIES FBI

AFFILIATIONS Red Room, S.T.A.R. Labs

Brilliant scientist Dr. Thomas Morrow was fascinated by future technologies from an early age, having been influenced by science fiction, especially the works of H.G. Wells. He earned Masters' degrees from Harvard University in Emerging Technologies, Strategic Foresight, and Future Studies, before focusing on time travel. He was forced to forsake his scientific endeavors after an accident nearly killed him.

Recruited by S.T.A.R. Labs Detroit, Morrow helped Dr. Silas Stone establish the clandestine Red Room facility. He was working in the lab when a Parademon attack caused extensive injuries to Silas' son, Victor. This caused Dr. Stone to graft the experimental metal Promethium to Victor, using an equally experimental nanite technique for neural integration. The result was the hero Cyborg, who went on to become a founding member of the Justice League. T.O. Morrow continues his work at S.T.A.R. Labs to this day, working closely with Dr. Silas Stone and Cyborg. For unknown reasons, he is currently under investigation by the FBI. He was instrumental in maintaining Cyborg's sanity and systems when Victor was trapped in the Digiverse.

ON THE RECORD

The quintessential mad scientist, T.O. Morrow was created in the 1960s and was a staunch enemy of the JLA. He created the android Red Tornado to use as a weapon against the League, until it rejected its programming and became a hero itself. After repeated clashes with the League, Morrow worked closely with fellow nutty Professor Ivo. Later, he set up shop on the scientific sanctuary of Oolong Island with a who's who of the most villainous scientists.

TOMORROW AND TOMORROW: T.O. Morrow worked with Professor Ivo, to create the android Tomorrow Woman (inset) to infiltrate and destroy the Justice League. However, Tomorrow Woman was too smart to play ball.

SWAMP THING

DATA

DEBUT *House of Secrets* #92 (Jun.-Jul. 1971)

REAL NAME Alec Holland

BASE Mobile

HEIGHT Variable **WEIGHT** Variable

EYES Red **HAIR** None

POWERS/ABILITIES Former avatar of the Green, the cosmic energy that animates all plant life; can appear wherever there is life; can manipulate plant matter; travel in time; shape size and shape; possesses prodigious strength and regenerative powers.

ALLIES John Constantine, Abby Arcane

ENEMIES Anton Arcane, Floronic Man

AFFILIATIONS The Green, Justice League Dark

GREEN CHAMPION
Holland's bio-restorative formula was seen as a boon by the Green, but a threat by the Rot.

Swamp Thing was the avatar of the Green: The mysterious force inherent in all plant life. Given physical form by botanist Alec Holland, he fought valiantly for the Parliament of Trees before their destruction by dark forces. Still nature's protector, Swamp Thing has joined up with other magical heroes to battle things that go bump in the night.

Botanist Alec Holland died in an explosion at his laboratory in the swamp when it was sabotaged by criminals. Soaking in Alec's experimental bio-restorative plant formula, vegetation in the Louisiana swamp formed a humanoid Swamp Thing body, and believed itself to be Alec Holland reborn in monstrous form. In reality, this body was

an avatar of the Green, a servant of the Earth's Parliament of Trees, primordial planet elementals.

After this Swamp Thing died, Alec was reborn in human form. Suffering from memories belonging to the Swamp Thing, it wasn't long before he met Abigail Arcane, whom he recognized from those same fleeting thoughts. Alec was drawn into an elemental war between the Green and the force of death and decay called the Rot. He was transformed into Swamp Thing by the Parliament of Trees and fought the Rot, finally overcoming its new avatar, Anton Arcane.

Adjusted to life as Swamp Thing, Alec's world was once again uprooted when the machinations of the witch Hecate burned down the Parliament of Trees. Swamp Thing was soon reduced to little more than a handful of green mush. The Parliament of Flowers sought to fill the gap with a new protector, but their choice for avatar was usurped by the villainous Floronic Man. However, thanks to the crafty nature of John Constantine, a new Swamp Thing was born, one that remembered Holland's memories and much more.

Swamp Thing continues to lend his considerable might and control over plant life to help his friends in the Justice League Dark, discovering the world again in the process.

ON THE RECORD

From his origins in the pulp horror tradition, the character of the Swamp Thing has evolved over the years to become a way to explore environmental issues.

The 1972 Alec Holland origin story transformed him into the Swamp Thing after chemical exposure, engaging the emerging environmental consciousness of the time. Later, the character came to represent the entire natural world, at war not just with individual villains, but with the human impulse to dominate and destroy nature.

NATURE'S REVENGE

The Swamp Thing has always been a warning of the dire consequences of polluting the natural world.

AVATAR OF THE GREEN
The Swamp Thing was the living embodiment of the elemental force that animates all plant life in the known universe.

CLASSIC STORIES

***House of Secrets* #92 (Jun.-Jul. 1971)**

In this prototype for Swamp Thing's origin story, readers meet scientist Alex Olsen and learn of his transformation into a Swamp Thing.

***Saga of Swamp Thing* #34 (Mar. 1985)**

The mutual attraction between Swamp Thing and Abigail Cable, daughter of his nemesis Anton Arcane, blossoms into love.

***Swamp Thing* (Vol. 2) #37-50 (Jun. 1985-Jul. 1986)**

John Constantine guides

the Swamp Thing towards an understanding of his true powers as a member of the Parliament of Trees.

***Swamp Thing* (Vol. 2) #166-171 (May-Oct. 1996)**

Having subsumed each of Earth's elemental Parliaments, The Swamp Thing takes his place in the Parliament of Worlds as its representative of the entire planet.

IN THE NAME OF THE FATHER

While he was raised by his stepfather and took the Holland name as his own, Alec Holland's real father was Lloyd Bernard McGinn. When he was killed by the Headhunter, Swamp Thing teamed with Batman to track down the killer, and Alec promptly killed him, despite Batman's "no killing" stance.

POWERS/ABILITIES Accomplished fighter and assassin; adept in ballet and horseback riding; talented chemist; highly intelligent and a cunning strategist; access to huge terrorist networks; charismatic leader.

ALLIES Rā's al Ghūl, Heretic, Red Hood, the Silencer

ENEMIES Batman, Batman Family, Batman, Inc., Leviathan (Mark Shaw)

AFFILIATIONS League of Assassins, Leviathan

She is the daughter of the demon, the child of eco-terrorist Rā's al Ghūl, born into the world surrounded by the worst assassins known to man. She is the mother of Robin (Damian Wayne), and the estranged love of Batman. She is Talia al Ghūl, a conflicting mix of passion and apathy, compassion and ruthlessness. While the Dark Knight would wish to believe otherwise, at her core, Talia is truly her father's daughter.

When international terrorist Rā's al Ghūl met a young hippie named Melisande, the two formed a close bond that Rā's hadn't shared with a woman in quite some time. As the founder of the League of Assassins, and despite having lived for centuries thanks to the life-extending properties of the fabled Lazarus Pits, Rā's had little time for love. Nevertheless, he and Melisande had a child, and named her Talia al Ghūl.

Talia was raised among assassins and killers, but she doted on her father. She soon followed in his footsteps, training in numerous fighting styles, and also mastering skills such as chemistry, ballet, and horse riding. Thanks to her father's vast wealth, she had everything she wanted, but it wasn't until she was kidnapped by Dr. Darrk that she met someone who interested her: Batman.

Despite her father's ongoing conflict with the Dark Knight, Talia and Batman shared a passionate romance and had a child named Damian. While Damian would later take his place by Batman's side as the new Robin, Talia felt shunned by the Dark Knight, and declared war against him, starting her own secret society called Leviathan. With a vast array of assassins at her control, Talia worked closest with the Silencer, but even he couldn't protect Leviathan when former Manhunter Mark Shaw decided to claim the group as his own. After ousting Talia, Shaw made Leviathan a greater threat, taking out nearly every other spy organization. Talia has sworn revenge, even willing to team up with Batman and Robin to get it.

ON THE RECORD

First appearing in the 1970s, Talia al Ghūl matured into a formidable presence before the continuity-altering events of the *Flashpoint* miniseries. Breaking away from her father's influence in the 2000s, Talia took over LexCorp for Lex Luthor when he was elected to the position of President of the United States.

Going under the name Talia Head, she ran Luthor's company as its CEO. Having proved herself to be a shrewd businesswoman, she later purposely bankrupted LexCorp. Talia also served in the inner circle of two incarnations of the elite Secret Society of Super-Villains, working alongside Luthor and the likes of Black Adam, Deathstroke, Vandal Savage, and Gorilla Grodd.

SISTER, SISTER

In 2003, it was revealed that Talia had an older stepsister, Nyssa Raatko. Introduced in *Batman: Death and the Maidens*, Nyssa manipulated Talia into helping her murder their father.

DAMSEL CAUSING DISTRESS

She first met Batman when held captive by an enemy of Rā's al Ghūl. However, Talia has since become a threat in her own right, leading her own terrorist group for a time, a clandestine organization called Leviathan.

LOVE LOST

Like her son, Damian, before her, Talia has been resurrected in the Lazarus Pits. However, Damian refused to return his mother's love when she tried to revive their relationship.

CLASSIC STORIES

***Detective Comics* (Vol. 1) #411 (May 1971)** Batman meets Talia for the first time, but soon realizes that this strong woman needs little help rescuing herself.

***Batman* (Vol. 1) #332-335 (Feb.-May 1981)** In the four-part issue "The Lazarus Affair," Batman teams with Robin, Catwoman, and Talia to track down Rā's al Ghūl.

***Batman: Son of the Demon* (1987)** In this oversized special, Talia and Batman take their romance to the next level, resulting in the birth of a baby boy.

***Batman, Incorporated* (Vol. 2) #13 (Sep. 2013)** Talia al Ghūl is killed by former Batwoman Kathy Kane, in a showdown between Batman and Talia's Leviathan forces.

POWERS/ABILITIES Expert escape artist; adept in several fighting styles; knowledge of electronics and security systems; expert assassin but now practices non-lethal crime fighting; access to funding and weaponry from Batman, Inc.; armored suit fires grappling line and darts; customized Utility Belt.

ALLIES Batman, the Batman Family, Strix, Casey Washington

ENEMIES Court of Owls, Bane, Lord Death Man, Sebastian Clark

AFFILIATIONS Batman Incorporated

Like all the Talons who were forged by the nefarious secret society called the Court of Owls, Calvin Rose lived a hard life. Calvin's father was abusive and, at only eight years of age, Calvin was locked and abandoned in an outdoor dog kennel. He waited for three days for his father to return and free him, but after the third night, he realized he was alone in the world. Calvin broke out of his cage, took to the road, and was discovered by an escape artist who worked at the traveling Haly's Circus. In time, Calvin became the escape artist's successor—which was when he learned Haly's Circus' dark secret.

Every generation the Court of Owls trawled the circus looking for prospective new assassins, called Talons, who would be schooled and conditioned to do their bidding. Calvin was recruited, but after killing another Talon to complete the Court's rigorous and ruthless training, he realized he could not be one of their operatives and defected. He also saved the life of Casey Washington, a target he was supposed to eliminate. Armed with a modified Talon suit, Calvin set out to destroy the Court of Owls, later working alongside Batman.

TALON, INCORPORATED Calvin Rose was later recruited into another society, this one on the side of the angels. He gladly accepted membership of Batman Incorporated.

ENEMIES Batman, Birds of Prey, the Batman Family, Talon (Calvin Rose), Mr. Freeze, Jonah Hex

AFFILIATIONS Court of Owls

A clandestine organization active since the birth of Gotham City, the Court of Owls is a powerful, well-connected cabal of Gotham society's elite. However, to bend an entire city to its will, the Court deployed a succession of lethal enforcers: A near-invisible assassin haunting the night, killing, before vanishing without a trace. The "Talon" served the Court after undergoing a series of demanding challenges, including physical and mental conditioning ensuring loyalty to their cause above all else.

To recruit Talons, the Court looked to Haly's Circus to find suitable candidates whose talents and skills they could refine. For generations, the best and brightest acts were abducted and forged into obedient, unstoppable killing machines. Recently, the Court developed a chemical formula granting superhuman endurance and the ability to be reanimated from death. This allowed the Court to unleash numerous Talons simultaneously, attacking the Dark Knight and thwarting his efforts to destroy the Court.

THE SECRET IS OUT The upper echelons of the Court of Owls as well as many of their Talon enforcers know that Bruce is Batman.

With the Court and its international parent organization, The Parliament of Owls, now shattered by the Dark Robins attending the *Batman Who Laughs*, the Talons are largely leaderless, although individuals have been encountered by Batman and Green Arrow, who ended a human trafficking scheme providing quarry for Talons to hunt.

DEBUT *The New Teen Titans* (Vol. 1) #3 (Jan. 1981)

BASE Tamaran, Ghost Sector

NOTABLE MEMBERS/POWERS **Starfire** (Koriand'r): Energy projection, flight, language assimilation through touch; **Blackfire** (Komand'r): Firearms expertise, flight; **Sister Kala** (Kaland'r): Pyrokinesis, leadership, flight.

Long ago, Tamaran was freed from its enemies by X'Hal. When she left, many disciples followed her, settling on a barren planet where Sister Kala (Kaland'r)—a future ally of White Lantern Kyle Rayner—was born. Remaining Tamaraneans flourished on their birthworld where, years later, princesses Koriand'r and Komand'r were born.

When they were young, Tamaran was invaded by the Citadel. In exchange for Koriand'r, the Citadel made Komand'r ruler of Tamaran. Koriand'r escaped, becoming the hero Starfire on Earth. She later returned to Tamaran to help her people battle Blight. Komand'r took a different path, and united her people with Super-Villain Helspont.

Brainiac stole Tamaran, but his collection of planets was released after he was destroyed during the Omega Titans invasion. Tamaran now rests in the Ghost Sector, where Komand'r and the heroes of Justice League Odyssey defend it.

TARANTULA II

DEBUT *Nightwing* (Vol. 1) #71 (Sep. 2002)

REAL NAME Catalina Flores

HEIGHT 5ft 7in **WEIGHT** 135 lbs

EYES Brown **HAIR** Black

POWERS/ABILITIES Adept hand-to-hand combatant; intelligent and well-traveled; weapons include gun that fires webbing-like netting and grappling lines.

ENEMIES Jefe, the Skeletons

Inspired by 1940s Super Hero John Law, former FBI agent Catalina Flores took on his codename and became a second Tarantula. Preying on gangsters and bad

cops, her extreme methods brought her into conflict with Nightwing. After murdering Blüdhaven's corrupt Chief of Police, she appeared to join the city's top criminal Blockbuster, but killed him, too. Nightwing blamed himself and had a nervous breakdown, which Tarantula exploited.

Despite Batman banning her from Gotham City, she took control of one gang, renaming them Las Arañas, protecting them during the mob clash dubbed War Games, destroying The Penguin's powerbase, and then leaving town. She became a wandering vigilante and mercenary. She died saving the Secret Six, but returned after *Rebirth*, battling beside Green Arrow against the bone-obsessed killers, Skeletons.

TATTOOED MAN

DEBUT *Green Lantern* (Vol. 2) #23 (Sep. 1963)

REAL NAME Abel Tarrant

HEIGHT 6ft **WEIGHT** 195 lbs

EYES Blue **HAIR** Brown

POWERS/ABILITIES Can bring to life any tattoo on his body and control it with his mind.

ALLIES Scavenger, Clayface, Dr. Alchemy
ENEMIES Green Lantern Hal Jordan, Justice League

AFFILIATIONS Secret Society of Super-Villains

The Tattooed Man was a member of a Secret Society of Super-Villains group. He was present when the Justice League raided their hideout and arrested members, thanks to the leadership of then League member, Lex Luthor.

Before *Flashpoint*, the Tattooed Man was primarily an enemy of Green Lantern Hal Jordan. Able to bring his tattoos to life and control them, he proved a powerful foe. After attempting to reform, Tarrant was killed by Mirror Master when he doublecrossed the villain. Two other Tattooed Men emerged pre-*Flashpoint*: Titans member Mark Richards, and John Oakes.

Oakes' whereabouts are unknown, but Richards died in the mass-murder event at Sanctuary.

TATTOOED TOO

Mark Richards seemed more heroic than previous Tattooed Men. However, he was soon recruited by Deathstroke into an unscrupulous incarnation of the Titans.

EVERY PICTURE SPELLS DANGER
Using sheer willpower, Abel Tarrant, the Tattooed Man, brought to life the inked images on his skin, from weapons to fantasy creatures.

TAWKY TAWNY

DEBUT *Captain Marvel Adventures* #79 (Dec. 1947)

BASE Philadelphia

HEIGHT 6ft 2in **WEIGHT** 480 lbs

EYES Yellow **HAIR** Orange, black, and white

POWERS/ABILITIES Charming, urbane, witty and sensitive, strength and power of a 480lb tiger.

ENEMIES Black Adam

AFFILIATIONS Vasquez family

Before *Flashpoint*, Tawky Tawny was a humanoid tiger, often helping Shazam. Post-*Flashpoint*, Tawny was a tiger at a zoo. Visiting Tawny was the oldest

memory that orphan Billy Batson had. He would talk to the big cat and feed him hamburgers. After Billy was given the powers of Shazam, Black Adam began hunting him. Their fight led to the zoo, where Adam threw Shazam against Tawny's cage, freeing him. He was then imbued with some of Shazam's powers and the big cat injured Black Adam.

After *Rebirth*, Tawny was an unhappy citizen of the Wildlands, where talking animals had killed all humans. When the Shazam Family accidentally opened the Magic Lands, he migrated to Earth and now lives with the Vasquez household.

TEAM 7

DEBUT *The Kindred* #3 (May 1994)

NOTABLE MEMBERS

John Lynch (team leader); **Canary** (Dinah Drake, later Black Canary); **Kurt Lance**; **Slade Wilson** (later Deathstroke); **Cole Cash** (later Grifter); **Captain Summer Ramos**; **James Bronson** (later Majestic); **Alex Fairchild**; **Amanda Waller**; **Dean Higgins** (later Regulus); **Steve Trevor**.

ENEMIES Eclipso, Basilisk, Pandora, Spartan

ALLIES Essence

Over five years ago, an elite black-ops team was formed under the name Team 7 by John Lynch. He originally recruited Dinah Drake and Kurt Lance to choose only the very brightest and bravest (Kurt and Dinah would later be married, and Dinah would adopt the name Black Canary when Lynch augmented her abilities, sparking her famed Canary Cry).

The pair recruited mercenaries Slade Wilson and Alex Fairchild, as well as operatives James Bronson, pilot Captain Summer Ramos, ex-special forces soldier Cole Cash, NSA analyst Amanda Waller, and military intelligence agent Dean Higgins. Team 7 overcame the threat of Eclipso, yet Fairchild and Ramos were murdered battling the rogue Spartan programming. The team disbanded after Bronson transformed into the powerhouse Majestic.

TEEN LANTERN

DEBUT *Young Justice* Vol 3 #1 (Mar 2019)

REAL NAME Keli Quintela

BASE La Paz, Bolivia

HEIGHT Unknown **WEIGHT** Unknown

EYES Brown **HAIR** Black

POWERS/ABILITIES Using battery pack and gauntlet, can fly and create light constructs with Green Lantern energy.

ALLIES Jinny Hex, Naomi, Wonder Twins, Batwoman (Earth-3)

ENEMIES Lex Luthor, Hack (Earth-3)

AFFILIATIONS Young Justice

When Keli Quintela came across what appeared to be a dying Green Lantern in a junkyard in her home city of La Paz, he gave her a gauntlet attached to a battery pack. Although Keli's friend Marcos told her that Green Lanterns got their power from rings, her mysterious inheritance seemed to give her the same capability, and was possibly a "hack" of Green Lantern energy. Keli went to Metropolis to find out more, where she ended up joining a new Young Justice lineup. She introduced herself as Teen Lantern, despite actually being only 11 years old. Teen Lantern can use Green Lantern energy, apparently without attracting the attention of the Green Lantern Corps.

IN THE RIGHT PLACE
The chance find of a Green Lantern in a junkyard utterly transformed young Keli Quintela's life. Suddenly she had all the powers of a Super Hero.

TEMPEST

DEBUT *Adventure Comics* (Vol. 1) #269 (Feb. 1960)

REAL NAME Garth

BASE Atlantis

HEIGHT 5ft 10in **WEIGHT** 235 lbs **EYES** Purple **HAIR** Black

POWERS/ABILITIES Atlantean warrior adept with many weapons; able to breathe underwater, swim at extreme speeds and resistant to tremendous pressure; super-strong, fast, durable, enhanced senses and reflexes, laser vision; intelligent and an adept hand-to-hand combatant; weapons include hi-tech trident; skilled magic user.

ALLIES Aquaman, Mera, Omen

ENEMIES Mr. Whisper, Mammoth

AFFILIATIONS Atlantis, School of Silence, Teen Titans

The Atlantean Garth was called Aqualad when he first worked on land with the Teen Titans, but many of those memories were erased by timestream manipulation and plots by old enemies. Not only did Garth forget that part of his past, but so did the rest of the world. He reemerged in Atlantis; part of a strike force assembled by Mera to hunt Aquaman. Ultimately, Garth discovered his orders weren't from her, but an impostor paving the way for the invading Thule. Garth and Aquaman successfully turned the tide against the invaders.

A soldier and sorcerer (having spent years in Atlantis' mystical School of Silence), Garth used deadly force to stop organ smugglers dealing in Atlantean lungs, and found himself fighting Dick Grayson and Donna Troy. Realizing they knew each other from some forgotten past, the trio became uneasy allies, rediscovering their shared history as founding members of the first Teen Titans. Now restored to full capacity, Garth reunited with his old allies in the Titans as Tempest, battling the Fearsome Five and H.I.V.E., beginning a doomed relationship with telepath Omen, and helping his old friends defeat Troia: A crazed and murderous future version of Donna Troy.

He is currently active in Atlantis, battling the Trench subversion in Xebel, as well as surface criminal depredations.

ON THE RECORD

Garth debuted in *Adventure Comics* as Aqualad, Aquaman's sidekick. An outcast from Atlantis due to his purple eyes, Garth found a friend in Arthur Curry, and more friends as he founded the Teen Titans alongside Robin, Wonder Girl, Kid Flash, and Speedy.

Aqualad went his own way when the Teen Titans became the New Teen Titans, but returned in a later incarnation called Titans after his transformation into the mage Tempest, a powerhouse player in any environment. Tempest was killed during *Blackest Night*.

THE TRAGEDY OF TEMPEST

While his first love, Tula, died during the original *Crisis on Infinite Earths*, Tempest was given another chance at love and married sometime hero Dolphin. They had a baby named Cerdian, but both Dolphin and Cerdian perished during the *Infinite Crisis* event.

TERRA

DEBUT *The New Teen Titans* (Vol. 1) #26 (Dec. 1982)

REAL NAME Tara Markov

HEIGHT 5ft 1in **WEIGHT** 98 lbs **EYES** Blue **HAIR** Blonde

POWERS/ABILITIES Adept geokinetic, able to move earth and rocks; can fly by riding a levitating piece of rock or earth; can cause earthquakes and manipulate earth in a variety of ways, including raising lava.

ALLIES Beast Boy

ENEMIES Brother Blood, Deathstroke, Harvest

AFFILIATIONS Ravagers, Defiance

Tara Markov was the product of experiments by Dr. Helga Jace, responsible for giving Tara's brother, Prince Brion (Geo-Force), his gravity-defying powers. After escaping reprisals following a palace plot in Markovia, Tara grew up on the streets of America. Planted in the Teen Titans by Deathstroke—with whom she was having an affair—Terra went insane and died in battle. A Terra from a Possible Future reality took her place and became like a sister to Geo-Force, serving on the Team Titans before being killed by Black Adam.

A third (unrelated) Terra later emerged. Atlee also possessed rock-moving powers but originated from a hidden civilization far below Earth's surface.

As a result of Doctor Manhattan's time-tampering, the original Terra returned, working with other Super Heroes to avert the *Doomsday Clock* crisis. She joined Deathstroke in his super-team Defiance, alternately attempting to seduce him and biding her time until she could destroy him. Ultimately, she helped put him behind bars in Arkham Asylum.

ON THE RECORD

After Flashpoint, Tara Markov's past was a mystery, even to her. Possibly linked to Markovia's royal family, her memories were erased after being experimented upon by Super-Villain Harvest.

In his twisted Colony—where teens battled for survival—Terra befriended Beast Boy after saving his life. They became close friends even after Caitlin Fairchild helped them escape. Terra joined forces with Fairchild, Beast Boy, and other young survivors as the Ravagers, a shortlived team eventually defeated and returned to Harvest by Deathstroke.

BROTHER MINE?

The second Terra had a hard time accepting Geo-Force as her brother, and took a DNA test to make sure she wasn't the psychopathic original, brought mysteriously back to life.

TEEN TITANS

DATA

DEBUT *The Brave and the Bold* #54 (Jun.-Jul. 1964)

BASE Brooklyn, New York

Crush (Xiomara Rojas) Enhanced strength, stamina, and endurance; **Roundhouse (Billy Wu)** Genius-level intellect, able to transform into a ball, propulsion; **DJINN** Other-dimensional genie powers; **Starfire (Princess Koriand'r)** Expert warrior, Tamaranean physiology provides enhanced strength, speed, endurance, and flight;

Raven (Rachel Roth) Magical powers from demonic ancestry;

Beast Boy (Garfield Logan) Assumes the form of any animal.

ALLIES Justice League, Titans

ENEMIES Manchester Black, Ra's al Ghul, Deathstroke, Brother Blood

Some were the sidekicks of the Justice League looking to leave their own mark on the world. Others were aimless teen heroes seeking friendship and a way to help their communities. But all of them were heroes. And when they banded together they became even more. They became Teen Titans.

The original Teen Titans were Robin (Dick Grayson), Aqualad (Garth), Wonder Girl (Donna Troy), Hawk and Dove (Hank and Don Hall), Speedy (Roy Harper), Caveboy (Gnarrk), Herald (Mal Duncan), Liliith Clay, and Kid Flash (Wally West). From their Teen Titans Club House in Hatton Corners, the teenagers fought crime, commiserated with one another about

issues with their mentors in the Justice League, and became close friends. When faced with the threat of Mister Twister, the group was forced to forget their time together as Titans, sacrificing their memories to save the world.

Years passed, and those original Teen Titans grew up. A new generation of heroes began to emerge, many inspired by those same Justice League mentors. One of those teenage heroes, Red Robin (Tim Drake), uncovered a plot by the organization N.O.W.H.E.R.E. to capture adolescent metahumans and turn them to its own mysterious ends. Recruited by Red Robin against N.O.W.H.E.R.E. and its leader Harvest, the Teen Titans were born anew, unaware of their predecessors who originally coined the team's name.

While this new incarnation included core members Red Robin, Superboy (Kon-El), Kid Flash (Bart Allen), Wonder Girl (Cassie Sandsmark), and Bunker, the team would go through several incarnations, gaining members like Raven, Beast Boy, and Power Girl (Tanya Spears) along the way. However, Red Robin eventually disbanded the team, unsure of the direction he wanted his life to head.

N.O.W.H.E.R.E. MAN Harvest had big plans for the Teen Titans—if they survived the Culling.

AT A GLANCE...

Teen spirit

The Teen Titans take both parts of their group's name seriously. They're a formidable fighting force, but they don't handle things the same way as other groups, because they're the next generation—headstrong, idealistic, and prone to lots of arguing.

The Robin Touch

The original Teen Titans were led by the first Robin (Dick Grayson). Every successful incarnation of the Titans seems to have a Robin at its center, which is not surprising as all Robins are trained in strategy and leadership techniques by Batman himself.

CLASSIC STORIES

New Teen Titans (Vol. 2) #1-5

(Aug. 1984-Feb. 1985) In "The Terror of Trigon," the group are forced to confront their darkest alternate selves as Raven's demonic father attempts to enslave and destroy the Earth.

Teen Titans (Vol. 3) #1-7 (Sep.

2003-Mar. 2004) Reeling from the deaths of Donna Troy and Omen, the group try to figure out where it fits in, juggling adolescent problems and being the Teen Titans—as well as brawling with the Justice League along the way.

Tales of the Teen Titans #42-44, Tales of the Teen Titans Annual

#3 (May 1984-Jul. 1984) The Titans face down H.I.V.E. and Deathstroke in "The Judas Contract," which features the first appearance of Dick Grayson as Nightwing.

Surrogate family

The Teen Titans tend to come from difficult backgrounds, and the team represents a surrogate family, with all that entails. They argue, they bicker, they occasionally make each other miserable... but when the chips are down, they're always there for each other.

REBIRTH

KIDS' STUFF

Every incarnation of the Teen Titans has been beset by headstrong natures and internal strife. That's bad enough against ordinary Super-Villains, but when Damian Wayne gathers Starfire, Raven, Beast Boy, and the newest Kid Flash to battle his grandfather Ra's al Ghul, is the arrogant little bully leading the kids to their inevitable doom?

TITANS, GO! Robin (Damian Wayne) takes charge of the new Teen Titans.

- 1 Robin
- 2 Kid Flash
- 3 Starfire
- 4 Beast Boy
- 5 Raven

“...We might be good or evil, black or white, man or woman, straight or gay. But one thing you can count on... we are very, very dangerous.”

BUNKER

Fortunately for the Titans' legacy, there were other Robins who felt differently. Damian Wayne jumped at the chance to command his own team. His recruitment methods could've used a bit of work, however. Instead of meeting with his prospective teammates one by one, Damian attacked and abducted Beast Boy, Raven, Starfire, and Kid Flash (Wallace West). It was Robin's way of showing these heroes that individually they're weak, but together they're strong. And surprisingly, it worked. A new era of Teen Titans was underway.

Operating out of their T-shaped Titans Tower in San Francisco, Robin's Teen Titans first fought Damian's grandfather, the notorious eco-terrorist Rā's al Ghūl, and quickly added the new Aqualad (Jackson Hyde) to their ranks. Despite surviving threats like Deathstroke and Black Manta, the team eventually lost their tower home and disbanded. But Robins are a persistent bunch. Damian was positive that the Teen Titans were a good idea, but they need to adapt for the times. So he recruited Kid Flash back onto his team, who insisted on giving new hero and human wrecking ball Roundhouse a chance as well. The trio added archer Red Arrow, genie Djinn, and the daughter of Lobo, Crush, to their roster, and fought crime out of a converted warehouse in Brooklyn. However, only Red Arrow knew that Robin was secretly imprisoning the villains they defeated in cells of the basement of their Mercy Hall hideout.

Damian's prison was revealed when Robin took Deathstroke captive. Deathstroke broke free and was only stopped when Red Arrow seemingly killed him. It took time, but the team began to repair from Robin's betrayal, and took their villain-rehabilitation program to the next level, brainwashing them to erase their criminal tendencies.

As the team slipped more and more into a morally gray area, they were captured by Lobo and delivered to a villain called The Other, an adult clone of Damian formerly called Heretic. The Teen Titans bested The Other, and soon clashed with the evil genie Elias in an adventure that saw Djinn leave the team with Jakeem Thunder to embark on a spiritual quest. The team disbanded, unable to follow Robin's leadership as he became more and more extreme.

To make matters worse, Djinn's brainwashing magic had faded, and the villains the Teen Titans had “reformed” all reverted to normal. Reeling from the death of the Wayne Family's beloved butler Alfred Pennyworth, Robin decided that he had to take the next step to remove these villains from society. He killed the evil cult leader Brother Blood and then set out to murder the assassin known as the KGBeast. The Teen Titans reunited to stop him, but Robin simply ripped the “R” off his costume and quit the team, leaving the fate of the once lighthearted and honorable Teen Titans in question.

REMEMBER THE TITANS

Now adults, the original Teen Titans regained their memories when they were forced to once again battle Mister Twister. Most of the team decided to stick together as the Titans, joined by another original member, The Flash (Wally West), who had been lost in the mysterious Speed Force. The team later fell under Justice League control and shifted its roster, allowing new blood to team with classic Titan members.

TROUBLED TEENS

Robin's Teen Titans team was well-intentioned, but crossed moral boundaries in its pursuit of justice.

ON THE RECORD

In their initial incarnation, the Teen Titans were assembled from existing sidekicks and new junior versions of established heroes. Aqualad, Kid Flash, and Robin teamed up to defeat Mister Twister, and later recruited Donna Troy—then Wonder Woman's younger sister—into the team, completing their original lineup. From the Titans Lair they embarked on a series of teen-themed adventures against villains such as Ding Dong Daddy and the Mad Mod, giving the series a defining youth-culture flavor that continued in later iterations.

Infiltrations and manipulations

With the introduction of the telepath Raven in 1980, a new Teen Titans team was formed, featuring three existing members—Kid Flash, Wonder Girl, and Robin—and new additions Cyborg, Starfire, and Changeling (formerly Beast Boy). Raven manipulated the team into joining forces against her demonic father Trigon, after which they stayed together to face Deathstroke the Terminator and his protégé Terra, who had infiltrated the Titans.

Graduation day

The next epochal shake-up in the Teen Titans' lineup came after the (no longer Teen) Titans and Young Justice resisted interference from the secretive Optitron Corporation. They then tangled with a Superman robot that killed both Omen and Donna Troy. In the aftermath, both teams disbanded, with some members forming a new Teen Titans and others joining the Outsiders. Donna Troy, who had been resurrected after *Infinite Crisis*, would rejoin briefly but then leave to pursue membership in the Justice League of America.

Growing pains

The following years saw further upheaval—leadership shake-ups and a changing roster. Cyborg and Starfire left for the JLA, and Damian Wayne took on a leadership role, teaming up with Red Robin before a clash between them led to Damian's exit. With Red Robin in charge, the Teen Titans battled Superboy-Prime in a story that prefigured their post-Flashpoint debut.

FINAL MOMENT
Donna Troy thought she had the Cyborg Superman down, but that proved to be a fatal mistake.

TERRIFICS, THE

DEBUT *The Terrifics* (Vol. 1) #1 (Apr 2018)

BASE Terrifics Island

MEMBERS/POWERS **Mister Terrific:** Genius intellect; **Metamorpho:** Can turn body into any element; **Phantom Girl:** Intangibility, fires dark energy blasts; **Plastic Man:** Can stretch into any shape.

ALLIES Justice League, Tom Strong, Element Dog, T-Council

ENEMIES Doc Dread, The Dreadfuls, The Dark Elder, The Terribles

When Mr. Terrific visited unscrupulous businessman Simon Stagg, he discovered that Stagg was trying to open a doorway to the Dark Multiverse, having transformed Metamorpho into Nth Metal. Mr. Terrific had brought Plastic Man in his comatose “egg” form, knowing he was one of the few beings unaffected by Nth Metal; but before he could bring Plastic Man into play, both of them were sucked into the Dark Multiverse with Metamorpho. Here they met Phantom Girl, who had been lost in the Dark Multiverse for years.

Although the four of them made it safely back, the interdimensional journey had created a bond of dark energy between them that meant that they would explode if they were further than one mile apart. And so The Terrifics were born—a team created from necessity. After another trip between dimensions, The Terrifics’ bond was broken and they separated, much to the distress of Phantom Girl. But when Mr. Terrific was in danger in the Multiverse, the team reformed to save him. Now they would stay together not because they had to, but because they wanted to.

Along the way, The Terrifics acquired additional members: Element Dog, Plastic Man’s son Offspring, and Ms. Terrific, a version of Mr. Terrific’s late wife from another reality.

OPPOSITES ATTRACT
The Terrifics comprised very different personalities and abilities, but, despite this, the team possessed an alchemy that worked; a bond that was like that of a family.

THANAGARIANS, THE

DEBUT *The Brave and the Bold* (Vol. 1) #34 (Mar. 1961)

BASE Thanagar Prime

POWERS/ABILITIES Great strength and speed; long-lived and fast-healing with resistance to temperature extremes and acute senses.

ALLIES Justice League United, Legion of Super-Heroes, Rann

ENEMIES Onymar Synn, Hyanthis, Byth Rokk, Rann

AFFILIATIONS United Planets

Thanagar’s is a militaristic culture; soldiers and law keepers are patterned on feathered raptors. Often referred to as “Hawkworld” it has suffered wars and

rebellions. Thanagar’s unique abundance of Nth metal—a mineral with supernatural properties—allowed Thanagarians to perfect anti-gravity technologies: flying at incredible speeds. The ore also empowered ancient demon Onimar Synn, who has dominated Thanagarians repeatedly over millennia.

After being liberated from renewed enslavement to the “Sin Eater,” their capital became Thanagar Prime, with warrior Shayera Hol as Empress. The vaults on that notorious intergalactic banking world having been compromised by cosmic events such as the return of Perpetua, Thanagar’s leaders agitated for a federation of worlds and the establishment of the United Planets.

THINKER

DEBUT *All Flash* #12 (Fall 1943)

BASE Belle Reve Penitentiary, Louisiana

POWERS/ABILITIES Hyperintelligence

ALLIES James Gordon Jr., Harley Quinn

ENEMIES All Flashes, Cyborg, Amanda Waller, O.M.A.C., Suicide Squad, Unknown Soldier

The codename Thinker has been used by many criminals since 1940s District Attorney Clifford DeVoe first realized he was far smarter than the gangsters he prosecuted. Initially just with brilliant cunning, and later with a brainpower-augmenting “Thinking Cap,” DeVoe plagued original Flash Jay Garrick and the Justice Society of America for decades, singly and as a founding member of the Injustice Gang of the World.

Decades later, his title fell to teen bully Cliff Carmichael, whose mental issues were treated with circuits from DeVoe’s Thinking Cap. Carmichael incorporated the tech into his own body, linking with computer systems to terrorize the world, but was defeated by a succession of Firestorms. Remanded into Amanda Waller’s custody, Carmichael served in the Suicide Squad before his talent for betrayal led to his death. The third Thinker was minor criminal Des O’Connor. His innate telepathic powers were no match for the resolve of Batman.

THIRD ARMY

DEBUT *Green Lantern Annual* (Vol. 5) #1 (Oct. 2012)

POWERS/ABILITIES Superhuman strength; can survive vacuum, extreme cold, and radiation of space; communal mind link—they multiply by converting victims into versions of themselves.

ENEMIES White Lantern Kyle Rayner, Guy Gardner, Green Lantern Corps, Red Lantern Corps, Zamaron, Star Sapphire Corps

AFFILIATIONS Guardians of the Universe

The Third Army were a mind-linked bio-weapon designed by the Guardians of the Universe, and activated using the power of Volthoom, the First Lantern.

The Army was released after the immortals decided that true order was only possible if free will was eradicated from the cosmos.

The Third Army were programmed to assimilate all life into their ranks. Though possession of a power ring from any Spectrum Corps offered protection from conversion, the drones were strong enough to dismember Lanterns and remove the rings.

Despite intense resistance from assorted color Corps, the creatures were on the verge of total triumph. However, protracted battles forced the Guardians to tap more of Volthoom’s power, awakening their captive. He reclaimed his power and the Third Army disintegrated.

THIRST

DEBUT *Aquaman* (Vol. 6) #5 (Jun. 2003)

BASE Secret Sea

HEIGHT 6ft 8in **WEIGHT** Variable

EYES Black **HAIR** None

POWERS/ABILITIES Life energy absorption, water and moisture absorption, creation of zombie slaves.

ALLIES Hagen, Black Manta

ENEMIES Aquaman, the Waterbearer, Lady of the Lake, Sentinels of Magic

The Thirst is a mystical construct derived from river mud; an antithetical being who hunted the sorcerous deities who guarded the Secret Sea. This vast metaphysical

ocean was comprised of the communal imagination of humanity and underpinned the health of the planet’s watery arteries and ultimately the life of mankind.

The Thirst was reawakened when Aquaman used his mystic water-hand to perform evil acts. It stalked the sea king while scheming to drain all life on Earth. Anything the Thirst drained would be reborn as a withered husk subservient to its will.

After numerous battles with Aquaman, the arid atrocity was tricked into merging with its Atlantean adversary. Knowing that he could defeat the Thirst from within, Aquaman surrendered their combined totality to the spiritual perfection of the Secret Sea.

THOMPKINS, DR. LESLIE

DEBUT *Detective Comics* (Vol. 1) #457 (Mar. 1976)

BASE The East End, Gotham City

HEIGHT 5ft 7in **WEIGHT** 130 lbs **EYES** Blue **HAIR** Gray

POWERS/ABILITIES Trained doctor and psychologist, with extensive experience in trauma injuries and drug dependency.

ALLIES Alfred Pennyworth, Bruce Wayne, Stephanie Brown, James Gordon, Jason Todd

ENEMIES Black Mask Society, Killer Croc

AFFILIATIONS Duke Thomas, Gotham City Child Services

Physician Leslie Thompkins comforted young Bruce Wayne on the night his parents were gunned down and, with family retainer Alfred Pennyworth, tried to provide the boy with a semblance of normality in his life. Despite her best efforts, Bruce became increasingly obsessive in the years following the murder. As he pursued the training that would carry him on his chosen path, Thompkins lost touch with him. When a bat-clad vigilante began punishing Gotham City gangsters, crooked cops and Super-Villains, Thompkins deduced that behind the mask and gadgets was the shattered child she had known. A skilled clinician and deeply compassionate, she forsook private practice to work in medical centers for Gotham City's deprived citizens. Her work brought her into contact with many of Batman's allies and associates, such as juvenile delinquent Jason Todd and Stephanie Brown, estranged daughter of costumed criminal Cluemaster. Thompkins is strictly neutral, treating heroes, villains and innocent bystanders equally. During the No-Man's Land crisis following an earthquake that crushed the city, her clinic was a beacon of hope.

Dr. Thompkins spends time re-homing orphans and runaways in Gotham City's Child Protection system. This brought her into contact with some of the City's most conflicted characters, such as Duke Thomas and Catwoman. She actively contested Batman and Batwoman's continued use of teenagers in their war, and became personally involved in it—another potential victim in the Joker's crusade against Batman.

HEART AND SOUL Leslie Thompkins' greatest regret was that she was unable to persuade Batman's "family" to adopt less violent methods to keep Gotham City's monsters at bay.

ON THE RECORD

Leslie Thompkins was introduced in the classic Batman story "There is No Hope in Crime Alley." Here Batman was shown to visit a sordid backstreet of Gotham City on a particular night every year. This time, however, he saves a gentle old lady from muggers and a flashback reveals how that gentle stranger once reached out to the terrified young Bruce Wayne after the murder of his parents. Leslie offered love and comfort during the most horrific moment of his life.

ANGEL OF HOPE Leslie Thompkins always knew that orphaned little Bruce would grow up to be a most remarkable man.

THUNDER AND LIGHTNING

DEBUT *New Teen Titans* (Vol. 1) #32 (Jun. 1983)

REAL NAMES Alexei and Ayla

EYES Black (Alexei); Brown (Ayla)

HAIR Brown (Alexei); Blonde (Ayla)

POWERS/ABILITIES Alexei: Able to generate destructive sonic wave-fronts by clapping his hands together; Ayla: Can absorb energy and generate electrical blasts.

ENEMIES Harvest, N.O.W.H.E.R.E., Brother Blood, Niles Caulder

ALLIES The Ravagers

Metahuman siblings Alexei and Ayla don't know who they are or where they come from. Their earliest memories are of being experimented upon by N.O.W.H.E.R.E. technicians, who sought to boost their powers and make them the most potent living weapons possible.

As victors of the brutal gladiatorial contests known as the Culling, Thunder and Lightning were expected to join Harvest's murderous elite kill-squads. However, they were rescued by undercover operative Caitlin Fairchild, the Teen Titans, and a few time-displaced Legionnaires. Alexei and Ayla joined Fairchild's fugitive band of Ravagers but could find no peace. On the run from time-traveling tyrant Harvest, the twins stumbled from one battle to another and have since gone into hiding.

THUNDER III

DEBUT *Outsiders* (Vol. 3) #1 (Aug. 2003)

REAL NAME Anissa Pierce

BASE Brooklyn, New York; New Orleans, Louisiana

HEIGHT 5ft 7in **WEIGHT** 119 lbs

EYES Brown **HAIR** Black

POWERS/ABILITIES Can increase mass and density; super-strength and invulnerability; creates shockwaves by striking the ground.

The daughter of Super Hero Black Lightning, Anissa Pierce followed her father's wishes and went to college before starting her own crime-busting career. However, on

the day she qualified as a doctor, she donned a costume for the first time and began helping people in a more unique way as the Super Hero Thunder. Her sister Jennifer later took up costumed crime-fighting as Lightning. Just after her solo debut, Anissa accepted a place with The Outsiders, reasoning that the best place to learn was with seasoned professionals. Soon she was tackling some of the most terrifying villains around, like Simon Hurt and Brother Blood, and also started a relationship with her teammate Grace.

Anissa was seriously wounded many times. Once, after triggering a booby-trap, she was in a coma for months, and later went into semi-retirement.

THUNDER, JAKEEM

DEBUT *The Flash* (Vol. 2) #134 (Feb. 1998)

REAL NAME Jakeem Johnny Williams

BASE Keystone City; New York City

HEIGHT 5ft 7in **WEIGHT** 130 lbs **EYES** Brown **HAIR** Black

POWERS/ABILITIES Inherited control of "Thunderbolt" Genie from the original Yz/Johnny Thunder to deploy Fifth Dimensional science.

ALLIES Yz/Johnny Thunder, Djinn, Stargirl

ENEMIES Triumph, Solomon Grundy, Mordru

After meeting the first Flash, orphan Jakeem Williams kept the pen Jay Garrick had used to sign autographs. Nobody realized that it housed elderly Johnny Thunder's Fifth

Dimensional companion, Yz. The Thunderbolt bonded with Jakeem, and when a malign sprite from Yz's dimension invaded Earth, Yz and Jakeem were instrumental in helping the JSA defeat it. To accomplish the feat, Yz had to merge with fellow thunderbolt Lkz into a whole new entity—Yzlkz—activated whenever Jakeem clicked the pen and uttered the phrase, "So Cûl" (so cool).

An orphaned street kid, Jakeem was initially reluctant to join the JSA, but soon made friends with younger members such as Stargirl. As one of the team's "legacy heroes," he became an invaluable member of both the JSA and its First Strike component the All-Star Squadron.

THUNDER, JOHNNY

DEBUT *Flash Comics* (Vol. 1) #1 (Jan. 1940)

REAL NAME Jonathan L. Thunder

BASE New York City; Gotham City; the Fifth Dimension

HEIGHT 5ft 8in **WEIGHT** 125 lbs

EYES Blue **HAIR** Blond

POWERS/ABILITIES Absolute control over a wish-granting "Thunderbolt" Genie—in reality an energy being able to employ science from the Fifth Dimension.

Johnny Thunder was the seventh son of a seventh son born under mystical circumstances. As an infant, he was taken by cultists from Bahdnisia, and through arcane rites was bonded to

a powerful wishing genie. Under fortuitous circumstances—luck always favored Johnny—he was rescued before his seventh birthday and returned to his family in Brooklyn. For years, he never realized the phrase "Ceil U" (say you) activated Yz, his invisible wish-granting Thunderbolt, for an "hour of power." An honest, decent soul, Johnny became an unlikely hero helping those in need through his "luck."

Johnny served the JSA with implausible distinction for many decades. He was murdered by the Ultra-Humanite, but his personality was absorbed by Yz. They now abide in the Fifth Dimension.

THUNDER, JONNI

DEBUT *Jonni Thunder* (Vol. 1) #1 (Feb. 1985)
BASE Los Angeles, California
HEIGHT 5ft 6in **WEIGHT** 130 lbs
EYES Green **HAIR** Blond
POWERS/ABILITIES Partially controlled ability to possess a high-voltage electrical entity.
ALLIES Harry Trump, Shamus, Skyman
ENEMIES Clarence "Slim" Chance, Red Nails
AFFILIATIONS J. Thunder Detective Agency, Infinity Incorporated

Jonni Thunder was a tough-as-nails Los Angeles private eye. She gained accidental control of a magical thunderbolt, which lived in an old lamp belonging to her

father, a former cop. His former partner Slim Chance desperately sought the artifact, eventually attempting to kill Jonni for it.

After Jonni brought Chance to justice, she remained on the fringe of the LA metahuman community. She was always reluctant to acknowledge her powers, but she did work closely with millionaire hero Sylvester Pemberton in his roles as Skyman and founder of Infinity Incorporated.

An alternate Jonni Thunder recently appeared on Earth-2, liberated from World Army incarceration by John Constantine. She joined Brainwave in trying to enslave the last survivors of humanity, and it is unknown if she survived the planet's annihilation.

TIMBER WOLF

DEBUT *Adventure Comics* (Vol. 1) #327 (Dec. 1964)
REAL NAME Brin Londo
BASE Legion HQ, 31st-century New Metropolis
EYES Brown/Golden **HAIR** Brown
POWERS/ABILITIES Human/wolf hybrid; enhanced senses, strength, speed, and agility, sharp claws.
ENEMIES Horraz, Crav the General Nah, Mordru

Zuunian Brin Londo gained super-strength, speed, agility plus enhanced senses and durability after being the subject of illegal experiments by his own father.

Zuun is a desolate, depleted world, and the experiments were intended to create a super-powered warrior to defend what little resources the planet still possessed. The harsh early life of pain and duty made Brin a ferocious defender of the weak: an animalistic alpha dog always ready to spring into action or die to preserve his "pack".

The tough attitude and willingness to fight make him one of the teams' greatest assets in action, but his gruff exterior masks a sensitive philosophical side. He is a confirmed advocate of the United Planets for the simple reason that his childhood proves how bad life might be without peace and civilization.

TIME MASTERS

DEBUT *Showcase* #20 (May–Jun. 1959) (as Rip Hunter and crew); *Time Masters* #1 (Feb. 1990) (as Time Masters team)
BASE Vanishing Point, Rip Hunter Time Lab, Arizona Lab, Arizona
MEMBERS Rip Hunter, Dan Hunter, Tony, Bonnie Baxter, Corky Baxter, Jeff Smith, Booster Gold, Superman, Green Lantern Hal Jordan
ALLIES Starfire II, Claw the Unconquered, Skeets
ENEMIES Illuminati, Vandal Savage, Gog, Black Beetle, Per Degaton, Despero

The Time Masters are a loose affiliation of explorers and heroes assembled by scientist, and time-traveler, Rip Hunter to unearth the secret history of Earth and preserve the sanctity of the timeline.

Hunter convened a second team to rescue Batman after he was cast adrift in the timestream by Darkseid. Superman, Green Lantern, and Booster Gold tracked the Dark Knight from era to era, but Batman returned to his original time through his own efforts.

A later team, consisting of Hunter, Booster Gold, and his sister Michelle Carter currently act as clandestine custodians of the timestream; protecting reality from villains seeking to bend history to their desires. Other than a recent alliance of Rip Hunter and the Green Lantern Corps to stop future-born time-meddler Sarko, the Time Masters have been missing in action since Doctor Manhattan used his powers to erase them from history.

TIME TRAPPER

DEBUT *Adventure Comics* (Vol. 1) #318 (Mar. 1964)
BASE The End of Time
POWERS/ABILITIES Immortality, transformation, manipulation of the timestream.
ALLIES Glorith
ENEMIES Mordru, Legion of Super-Heroes, Superman, Parallax

The Time Trapper is a sentient force resident at the end of space/time. An aspect of cosmic entropy, it easily weathers the dramatic changes wrought by

reality-revisions such as the *Infinite Crisis* and *Zero Hour*. Each time the Multiverse has changed or shifted, the Trapper has been personified by a new being. Previous examples have included: Cosmic Man, Rokk Krinn; Time Witch, Glorith; a Malthusian Controller, Lori Morning; and even the psychotic Superboy-Prime.

The Trapper has spent much of his attention challenging the 31st-century Legion of Super-Heroes and claims to have been instrumental in their creation as a weapon against his true enemy, Mordru. However, having complete control over the future, his ultimate goal remains constant: To bring about the dissolution of Creation in preparation for a new Big Bang.

TITANS, THE

DEBUT *Titans Hunt* Vol. 1 #1 (Dec 2015)
BASE Hall of Justice, Washington D.C.
MEMBERS/POWERS Miss Martian: Telepathy; **Donna Troy**: Amazonian warrior; **Beast Boy**: Shapeshifter; **Green Lantern** (Kyle Rayner): Ability to form light constructs and fly; **Raven**: Extensive magical powers, including the ability to separate her soul-self from her physical body; **Steel**: Genius engineer, armor made from semi-sentient metal, kinetic hammer.
ALLIES Justice League, Teen Titans, Ben Rubel
ENEMIES Deathstroke, H.I.V.E., Troia, Blood Cult

The original Titans team grew out of the Teen Titans, as former Super Hero sidekicks sought to forge a path separate from their mentors. The Titans were characterized not only by heroics and a desire to help people, but by a close bond of friendship. After the disbanding of that team, former member Nightwing decided to assemble a new lineup in response to the breaking of the Source Wall. Energy from this cosmic cataclysm was causing problems on Earth, with ordinary people suddenly gaining metahuman powers. The Justice League was fully occupied with facing the main threat, and so a new team was needed to deal with earthbound problems.

Nightwing chose his members carefully, getting a range of skill sets to cope with any scenario. However, when he was shot and badly wounded on a mission, the team were forced to try and carry on without him. Donna Troy, another member of the original Titans, assumed leadership, determined to inject some of that spirit into the new iteration. Nightwing had wanted the Titans to be as fearless as they had been as kids but as strong as the Justice League, and Donna inspired her teammates to be just that. Gaining Green Lantern Kyle Rayner as a member, the team was ready to go from strength to strength.

NEW TITANS Nightwing's new Titans lineup, assembled in the wake of the death of a girl struggling with new powers, had the patron saint of lost causes as its totem.

TOMAHAWK

DEBUT *Star-Spangled Comics* (Vol. 1) #69 (Jun. 1947)
POWERS/ABILITIES Advanced unarmed combat skills; proficiency with knife, spear, bow and arrows, and throwing hatchet.
ALLIES Blue Jacket, Tecumseh, the Prophet
ENEMIES General Anthony Wayne, General George Washington, General Arthur St. Clair
AFFILIATIONS Iroquois Tribe, Shawnee Tribe

Born of Iroquois and Shawnee blood, Tomahawk was a mighty warrior among the Indian nations. He battled long and hard against the white invaders who were inexorably swallowing up their land.

When George Washington ordered ruthless General Anthony Wayne to wipe out every Indian settlement in the territory, Tomahawk's family were killed and he swore vengeance on all Americans. He had allies among the British forces occupying the colonies, but when he sought their help, he was betrayed as the white men worked together to force the Indians out.

Tomahawk's braves won another battle against the united invaders, and he took revenge on the man who killed his kin, but he realized his people would never know peace and security again.

TOMAR-TU

DEBUT *Green Lantern* (Vol. 2) #6 (May-Jun. 1961)

BASE Xudar, Space Sector 2813

HEIGHT 6ft 2in **WEIGHT** 210 lbs **EYES** Red **HAIR** No hair, orange fins

POWERS/ABILITIES Commands a Green power ring able to materialize hard-light constructs, translate languages, generate in-planet and intergalactic flight, and protect against hostile environments and enemy attack; latterly Darkstar Mantle providing flight, force fields, energy blasts, sensor array, teleportation

ALLIES Kilowog, John Stewart,

ENEMIES Hal Jordan, Romat-Ru

AFFILIATIONS Darkstars, Green Lantern Corps, Controllers

Tomar-Tu inherited the space sector of his illustrious father Tomar-Re, following his civilian endeavors against mad Guardian Appa Ali Apsa. When the renegade Oan assembled his mosaic world from abducted cities of many civilizations, Tu was leader of the resistance. When the crisis was averted, Hal Jordan recommended him for the vacant beat of Space Sector 2813.

Following Sinestro's war on the Green Lanterns, Tu felt compelled to testify against a colleague after GL Laira executed Sinestro Corpsman Amon Sur in cold blood.

Years later, he followed in her footsteps. When child killer Romat-Ru taunted Tu and threatened more children, the weary Green Lantern killed him. Arrested and resigned to pay for his crime, Tu was then co-opted by a Darkstar mantle. Seduced by the offer of immense power and leadership of a hardline army, Tu helmed the Darkstar campaign to execute all murders in the universe. His battle with the Green Lanterns resulted in his death and the succession of youthful Somar-Le to the role of Green Lantern of Xudar and Sector 2813.

ON THE RECORD

Tomar-Re patrolled the Space Sector adjacent to Hal Jordan's and became his friend and mentor. A scientist and warrior, he was elevated to the elite Green Lantern Honor Guard. He safeguarded Jordan and Sinestro when Black Hand trapped them in Nekron's Dead Zone. Dispatched by the Guardians to stop planet Krypton exploding, he was blinded. Tomar had no idea that his temporary affliction was instrumental in the creation of the universe's greatest hero: Superman.

LANTERN CALLING
Tomar-Re used his power ring to contact Hal Jordan and request his help in saving the planet Aku.

TOMORROW, TOMMY

DEBUT *Real Fact Comics* #6 (Jan. 1947)

REAL NAME T'omas T'Marra

BASE Tolerance, Tenebrian Dominion

EYES Blue **HAIR** Blond

POWERS/ABILITIES Cunning planner and problem-solver with advanced combat skills.

ALLIES Brent Wood, Tuftan the Tiger Prince

ENEMIES Jediah Caul, Star Sapphire, Stealth, Rikane Starr, Knights of the Galaxy

Tommy Tomorrow's most consistent history is as a valiant explorer, peace-keeper, and an agent of the Planeteers. In another time and dimension he was

Kamandi, the Last Boy on Earth, struggling to re-establish humanity on a planet teeming with intelligent and aggressive animals. In yet another reality, Major Thomas Tomorrow is a military martinet with a secret agenda.

His most recent transformation took him to the Tenebrian Dominion as Colonel T'omas T'Marra: a double-dealing opportunist secretly running the galaxy's most popular entertainment. Glimmernet sensation *The Hunted* is a gameshow where viewers can win big prizes simply by catching and killing the featured stars. Naturally, T'Marra has more than one reason to keep the runners running and the pursuers confused.

TOYMAN (WINSLOW SCHOTT)

DEBUT *Action Comics* (Vol. 1) #64 (Sep. 1943)

REAL NAME Winslow Schott

BASE Metropolis

EYES Blue **HAIR** Brown

POWERS/ABILITIES Inspired engineer, brilliant in mechanical, robotics and circuit-design.

ENEMIES Lex Luthor, Superman

Many men have claimed the title of Toyman, transforming toys into weapons of profit and vengeance. The first was Winslow Schott, a failed toymaker who has

plagued every incarnation of Superman over many reality-alterations, warping wholesome childhood fantasies into a deadly criminal arsenal. Others have included super-thief Jack Nimball, and Schott's son Anton, whose twisted mind turned children into living dolls—until he killed them. Following *Rebirth*, Schott attacked Metropolis to gain revenge on Lex Luthor, who had crushed his toy company in a hostile takeover. Schott responded by weaponizing his designs and unleashing explosive destruction all over the city to ruin the now Lexcorp-owned business. As Superman crushed his giant robots and deadly drones, Schott never realized Luthor's true game-plan: forcing the inventive Toyman to create new technology Lexcorp could steal and sell to the military.

TOYMASTER

DEBUT *Batman/Superman* (Vol. 1) #5 (Jan. 2014)

REAL NAME Hiro Okamura

BASE Gotham City

HEIGHT Unknown **WEIGHT** Unknown

EYES Brown **HAIR** Black

POWERS/ABILITIES Genius intellect.

ALLIES Superman, Batman

ENEMIES Mongul, Ultra-Humanite

AFFILIATIONS None

Hiro Okamura was a very rich, very intelligent teenager who used his genius to create cutting-edge games and other tech. After inadvertently aiding

Mongul in an attempt to use Earth's population to kill Superman, Hiro became an ally of the Man of Steel. Later, when Toymaster was forced by Mongul to build a set of robots to defeat the Justice League in an arena battle, he secretly enabled the robots to be taken over and combined by the League into one giant mechanoid to defeat Mongul.

He also built many other devices designed to repel another incursion by the Dark Multiverse, including a giant robot that combined visual aspects of the Trinity: Wonder Woman, Superman and Batman.

TRACI 13

DEBUT *Superman* (Vol. 2) #189 (Feb. 2003)

BASE Metropolis **HEIGHT** 5ft 5in

WEIGHT 127 lbs **EYES** Brown **HAIR** Black

POWERS/ABILITIES Urban magic; cast spells. **ALLIES** Leroy, Blue Beetle, Kid Eternity, Zatanna, Baron Winters, Detective Chimp

ENEMIES Otherkind, Shadowriders, Heartbreakers, Eclipso, Brother Blood, the Futuresmith

AFFILIATIONS Night Force

Traci Thirteen inherited her witchly powers from her mother—a member of human sub-species Homo Magi—and when Mrs. Thirteen died, Traci's

dad blamed her, forbidding Traci from ever using her gifts. When he suddenly vanished, Traci began accruing mystical knowledge and established herself in Metropolis as freelance supernatural problem-solver Girl 13, AKA Traci 13. Traci was later reunited with her father, who had been possessed by Heartbreaker demons after her mother died.

Traci then formed a witches' society: the Sisterhood of the Sleight Hand offering mystical aid to mortal heroes. She briefly worked with Baron Winters' Night Force to stop a supernatural murder spree, and when not working at the Oblivion Bar, now battles beside Justice League Dark to stop the predations of the Otherkind.

TRENCH, THE

DEBUT *Aquaman* (Vol. 7) #1 (Nov. 2011)

BASE Marianas Trench, Pacific Ocean

EYES Black **HAIR** None

POWERS/ABILITIES Water-breathing; immense strength; neuro-toxic secretions; mimicry; bioluminescence; steel-rendering teeth and claws; weave cocoons to transport prey.

ENEMIES Aquaman, Mera

AFFILIATIONS King Atlan, Dead King's Scepter, Atlantis, Xebel

The cannibalistic Trench subsisted in utter darkness at the bottom of Earth's Marianas Trench for eons, unsuspected and forgotten by the sub-sea empire of

Atlantis, which had developed in shallower regions. In recent times, shifts in sea-floor geology allowed the Trench to rise from the depths, to discover waters and land teeming with potential sustenance.

They were eventually turned back by Aquaman and Mera, who found the beasts were actually gathering food to feed their next generation. When Queen Mera held her royal wedding ceremony in Xebel, the proceedings were disrupted by an army of Trench, demanding the return of an unknown object. When they were eventually driven off by Aqualad Jackson Hyde, the previously non-communicative monsters swore to take their revenge.

TREVOR, STEVE

DEBUT *All-Star Comics* (Vol. 1) #8 (Dec. 1941-Jan. 1942)

REAL NAME Steven Rockwell Trevor

HEIGHT 6ft 1in **WEIGHT** 195 lbs **EYES** Blue **HAIR** Blond

POWERS/ABILITIES Expert pilot and military tactician.

ALLIES Wonder Woman, Etta Candy, Barbara Minerva

ENEMIES Colonel Andres Cadulo, Phobos, Deimos, Veronica Cale/
Godwatch **AFFILIATIONS** A.R.G.U.S., Justice League of America,
Oddfellows, US Air Force, US Navy Seals, Team 7

A.R.G.U.S. ORIGINS
The President personally asked Trevor to become the founder and acting director of A.R.G.U.S.

A true warrior, decorated pilot and respected command officer, Steve Trevor met the Amazon Diana when his plane crashed on hidden island Themyscira. She nursed him back to health and —after winning a fierce worthiness contest—escorted him and the bodies of his fallen comrades back to the outside world. A veteran soldier, well-respected in the intelligence community, Trevor became her advocate—guiding her through the labyrinth of security organizations such as the DEO and A.R.G.U.S.—and inevitably, her lover. As Wonder Woman, Diana saved him when Trevor was kidnapped by Colonel Andres Cadulo as a vessel of transformation for plant god Urzkartaga, but their relationship stalled when Phobos and Deimos—the spiteful sons of war god Ares—altered their minds and memories.

Eventually, the lovers were reunited. Trevor retired from the military and took command of the Oddfellows—the Black Room field regiment of A.R.G.U.S.: investigating metahuman and unnatural activities. With Diana, Trevor has faced terrorists, gods such as Ares and Darkseid, a global virus, paramilitary force Poison and Veronica Cale's Super-Villain agency Godwatch. With the Multiverse unraveling thanks to threats like Perpetua and the Dark Multiverse invasion, Trevor remains steadfast, valiant and ready for action.

DARKSEID INVASION
Steve Trevor was at Wonder Woman's side when Darkseid unleashed his terrifying Parademons on Earth.

ON THE RECORD

Over the years, Steve Trevor has been Wonder Woman's guide, friend, confidant, lover, and husband. Throughout it all, his loyalty to her and her ideals has remained constant. In his 1987 origin story, he was connected with the Amazons even before he was born. He was the son of Diana Trevor, who sacrificed her life to save the women of Paradise Island from the demon Cottus and posthumously lent her name to the newly born girl who would later become Wonder Woman.

REJECTED PROPOSAL
When Wonder Woman saved Steve from a plane crash, he gratefully asked her to marry him. Diana respectfully declined, explaining that she had to focus on her duty fighting evil.

TRICKSTER

DEBUT *The Flash* (Vol. 2) #183 (Apr. 2002)

REAL NAME James Jesse Axel Walker

BASE Central City

HEIGHT 5ft 7in **WEIGHT** 150 lbs **EYES** Blue **HAIR** Blond

POWERS/ABILITIES High intelligence, brilliant conman; skilled acrobat and escapist; anti-gravity boots, numerous modified gadgets based on practical jokes and clowning.

ALLIES Captain Cold, Mirror Master, Weather Wizard, Heat Wave

ENEMIES The Flash, Johnny Quick, Captain Cold

AFFILIATIONS Legion of Zoom, Secret Society of Super-Villains, Rogues, FBI

The first Trickster was James Jesse—stage name of Giovanni Giuseppe—a trapeze artist scared of heights and his abusive conmen parents. Turning to crime, he pitted his wits against The Flash, Blue Devil and others, before turning FBI informant and retiring. Returning to crime, he was again defeated by The Flash and imprisoned in Super-penitentiary Iron Heights.

Sometime later, Super-Villain Blacksmith needed someone with similar skills in her gang and selected wayward teenager Axel Walker, giving him upgraded Trickster gimmicks. After suffering appalling treatment in prison, Jesse broke out—the first ever to do so—and restarted his own crime career. He began spectacularly but secretly: saving Walker from certain death.

The self-proclaimed “greatest conman to ever live” swore to restore his tattered reputation. His scheme was stunning: making all Central City dangerously happy, by employing the mind-bending Sage Force to control the population. When The Flash and Commander Cold stopped the enforced jolly torment, Jesse was content that he had at least heaped revenge on Iron Heights’ brutal warden, Gregory Wolfe. The Trickster is now a member of the Reverse-Flash’s Legion of Zoom.

EASY MONEY
The Trickster puts his anti-gravity footwear to good use, escaping from the scenes of his crimes.

ON THE RECORD

As a young man, replacement Trickster Axel Walker was recruited into The Rogues and then kicked out again for making too many mistakes that endangered the team. He tried to ingratiate himself with Gorilla Grodd, but had his arm torn off for his trouble. With a brand-new cybernetic limb, he was imprisoned after being framed for a heist, then broken out to rejoin The Rogues. They traveled to Happy Harbor and learned that the Crime Syndicate's Johnny Quick had broken them out, and they were offered a chance to join the Syndicate. Second rate his entire life, Walker was mutated by the Strong Force and seemingly sacrificed his life saving The Flash and his fellow Rogues.

JOINING FORCES
In the pre-Flashpoint continuity, the Trickster and Captain Cold teamed up after robbing the *Picture News* costume ball. They were defeated by the combined efforts of the two Flashes.

TRIGON

DEBUT *New Teen Titans* (Vol. 1) #2 (Dec. 1980)

BASE Azarath

HEIGHT Variable **WEIGHT** Variable **EYES** Yellow **HAIR** Black

POWERS/ABILITIES Demonic powers including draining souls, unleashing energies, transmutation of elements, destroying planets.

ENEMIES Teen Titans, The Divine

An ancient trinity of cosmic entities known as the Divine attempted to eradicate evil from the universe. Punishing the brutal conqueror of a world, they sentenced him to be consumed by the Heart of Darkness, but he fought back, feeding on the Heart, assimilating the evils of a billion worlds and transforming into all-powerful demon, Trigon.

He ruled the Under-Realms, but could not pass a mystic barrier built by the Divine and to spread his evil, fathered children on denizens of target worlds.

One of these was human girl Raven, whom Trigon believed would unify all dimensions under his rule. When she fled to sanctuary dimension Azarath, Trigon began a campaign to call forth her dark side.

After many humiliating defeats by the Teen Titans, Trigon's ambitions came closer to fruition when he allied with 2morrowTek, who genetically engineered hosts for his progeny.

The scheme was thwarted by Raven in alliance with amoral mystic enigma Baron Winters.

Recently, his dreams came true after the Untitled brought Trigon to Earth. He was intercepted by Essence, Red Hood and Artemis, and the demon lord seemingly perished battling Bizarro.

ON THE RECORD

Trigon's home dimension of Azarath was once said to be a place of peace, overseen by powerful sorcerers who raised Raven under their protection when she rejected her father's evil, and fought to prevent Trigon from breaching the barriers between their dimension and Earth's.

Trigon finally succeeded and Raven, seeing no other choice, agreed to rule with him if he spared Earth. Knowing he wouldn't keep his side of the bargain, she gathered the New Teen Titans to fight against his coming invasion. Their defeat of Trigon was their signature achievement.

RAVEN'S SACRIFICE

Facing Trigon in the Temple of Azarath, the Titans were easily defeated. Raven realized that the only way to save Earth was to join her father. Together they vanished in a cloud of smoke.

TRIAD

DEBUT *Action Comics* (Vol. 1) #276 (May 1961)

REAL NAME Luornu Durgo

BASE Legion HQ, 31st-century New Metropolis

HEIGHT 5ft 6in **WEIGHT** 125 lbs

EYES Amber, purple **HAIR** Brown

POWERS/ABILITIES Can divide into three or more different bodies; martial-arts training takes advantage of fighting with multiple bodies as a unit.

ENEMIES Horraz, Crav the General Nah, Mordru

Although Luornu Durgo only has one name, she considers herself a plurality of three. Known at various times as Triplicate Girl and Duplicate Girl, she was born on Cargg, where

the triple suns give native Carggites the ability to split into identical duplicates. Unlike most Carggites, however, Luornu's duplicates manifest individual personalities. They all experience the world individually but when they remerge, the accumulated memories are processed by one single gestalt personality.

Luornu joined the Legion of Super-Heroes to do as much good as possible, but after enduring the red-tape of the United Planets, constantly debates with herself if they wouldn't be more useful fighting crime back on Cargg.

TROY, DONNA

DEBUT *The Brave and the Bold* (Vol. 1) #60 (Jun.-Jul. 1965)

BASE New York City

HEIGHT 5ft 9in **WEIGHT** 135 lbs **EYES** Brown **HAIR** Black

POWERS/ABILITIES Amazonian physiology bestows enhanced intellect and superhuman strength, endurance, agility, and durability; advanced healing factor; expert fighter; weapons include Amazon armor and swords.

ALLIES Dick Grayson, Arsenal, Wonder Woman, Wally West (first Kid Flash)

ENEMIES Mr. Twister, Aegeus, Troia

AFFILIATIONS The Titans, Amazons

Donna Troy was a valiant hero in every iteration of Earth's reality. She has fought injustice in the Teen Titans and their adult incarnation, but her origins have radically shifted in every instance. After *Rebirth*, she discovered the horrific answer: She was not an Amazon, a human mystically empowered or even a small girl raised and modified by the Titans of Myth. After the return of original Kid Flash Wally West began unraveling malicious alterations to the timestream, Donna learned that she was not even alive, but a construct of clay animated by magic: An Amazon golem created to destroy Princess Diana if she ever went rogue.

With false memories crafted by the Amazons, Donna had carved out a life as a Super Hero, but even that comfort was taken from her after the Titans were attacked by a horror from the future. Troia was Donna Troy after all her friends had died: a psychotic killer who had traveled back to eradicate them before they could ever leave her. Donna defeated Troia, swearing that she would never let this possible future come to pass. She and her Titan allies now continue their crusade for justice across the Multiverse.

FORGOTTEN TITANS

When Donna Troy discovered she had mysterious shared memories with other heroes, including Dick Grayson and Arsenal, she teamed up with these so-called Titans and came into conflict with the dastardly Mister Twister.

ON THE RECORD

Donna Troy's backstory has been an ever-evolving one, nearly from the time of her creation. Originally conceived as Wonder Girl, Donna was meant to be a teenage version of Wonder Woman as a founding member of the newly formed Teen Titans. She became one of the team's mainstays, taking the independent name Donna Troy, and appearing only once in a Wonder Woman story during the Bronze Age.

Continuity was altered in the 1980s to recreate Donna as a girl chosen for training by the Titans of Myth, during which she adopted the name Troia. In the 1990s, Donna was reestablished once more, but this time as a magical doppelgänger of Wonder Woman brought to life, while Diana was out of action for a while.

THE RETURN

Donna Troy's history was somewhat streamlined after she was killed by a rogue Superman robot. She came back as a combination of all her past selves, but relied primarily on her Titans of Myth origin.

TUI, KATMA

DEBUT *Green Lantern* (Vol. 2) #30 (Jul. 1964)
BASE Coast City
HEIGHT 5ft 11in **WEIGHT** 131 lbs
EYES Blue **HAIR** Black
POWERS/ABILITIES Green Lantern ring allows flight, force-fields, and space travel.
ALLIES Green Lanterns: John Stewart, Hal Jordan, and Kilowog
ENEMIES Sinestro, Star Sapphire

Born on the planet Korugar, Katma Tui became the Green Lantern for Space Sector 1417, replacing the corrupt Lantern-turned-Super-Villain, Sinestro. Despite a difficult start, with the Korugarians distrusting the Green Lanterns and regarding their new protector as "Katma Tui the Lost," Katma went on to prove herself many times over.

After several successful missions, she was assigned to train another Green Lantern, John Stewart, and, after a rocky start to their relationship, they fell in love. She eventually journeyed to Earth with John to help form Earth's own Green Lantern Corps, and the two married. Some time later, during a home invasion by Star Sapphire, Katma was viciously killed. John never fully recovered from the loss, haunted by her death for years after.

Katma would see life in a fashion one last time when resurrected as part of the Black Lantern Corps. However, this evil, undead version of the once well-respected hero was ultimately destroyed.

NOTHING SINISTER

Though from the same planet as Sinestro, the only other trait Katma Tui shared with the corrupt Green Lantern was her skill with a power ring.

TULA

DEBUT *Aquaman* (Vol. 1) #33 (May-Jun. 1967)
REAL NAME Tula Marius
BASE Atlantis
HEIGHT 5ft 5in **WEIGHT** 119 lbs
EYES Blue **HAIR** Brown
POWERS/ABILITIES Atlantean warrior adept with many weapons; able to breathe underwater, swim at extreme speeds; super-strong, durable, enhanced senses and reflexes
ALLIES Mera, Aquaman, Sea Devils, Murk, Tempest, Ocean Master **ENEMIES** Scavenger, Black Manta, The Trench, Coram Rath

Atlantean Tula first became known to the surface world when Ocean Master — Aquaman's half-brother Orm — led an invasion against the US and surface world. When Aquaman defeated Orm, reclaiming the throne of Atlantis, he met with Tula who commanded the Drift, an elite faction of the Atlantean army. Tula had her own allegiances. As Orm's sister, she was determined to liberate him from Belle Reve prison with the help of loyalists such as Murk and Swatt. The plan failed because Atlantis was attacked by the Scavenger, and dutiful Tula and her allies went home to help.

Tula later proved her loyalty toward Mera, accepting her as queen for the sake of peace. Tula also accepted Aquaman and he made her regent of Atlantis. She was arrested when Coram Rath usurped the throne, but fled to Amnesty Bay with Mera. When Mera became queen again, Tula acted as a bodyguard to the royal family.

EASILY MISGUIDED

In her relatively short career as commander of the Drift, Tula has mistakenly followed a corrupt Mera impostor and the villain Ocean Master.

TURTLE, THE

DEBUT *All-Flash* (Vol. 1) #21 (Dec. 1945)
REAL NAME Unknown
BASE Hall of Doom
HEIGHT Unknown
WEIGHT Unknown
EYES Green
HAIR Gray/Blond
POWERS/ABILITIES Connection to the Still Force
ALLIES Gorilla Grodd
ENEMIES The Flash, Justice League
AFFILIATIONS Legion of Doom

The Turtle was a scientist who had experimented with the Still Force, a powerful energy that represented inertia and was the opposite of the Speed Force. When an accident infused him with the power of the Still Force, he became obsessed with discovering the truth behind it and was drawn to The Flash, with whom he now felt an elemental connection. He was the first villain The Flash fought, and nearly turned out to be the last when a future version of The Turtle, then ruler of Central City, traveled in time to try and steal The Flash's Speed Force.

Following this defeat, The Turtle was reborn in the body of a baby. Recognizing the potential of the child to help him access all the hidden powers of the Multiverse, Lex Luthor took him to be part of his new Legion of Doom, securely strapped to the chest of Gorilla Grodd so that the ape could use his mental abilities to amplify and project the child's power.

HOLDING THE BABY
 Super-intelligent Gorilla Grodd of The Flash's rogues gallery made a most improbable carer for the childlike villain The Turtle.

TWEEDLEDEE AND TWEEDLEDUM

DEBUT *Detective Comics* #74 (Apr. 1943)
REAL NAMES Deeever and Dumpson Tweed; formerly Dumfree Tweed
BASE Gotham City
ALLIES Mad Hatter, Scarecrow, Kite Man, Hugo Strange
ENEMIES Batman, Bane
AFFILIATIONS Secret Society of Super-Villains, Wonderland Gang

Deeever and Dumfree Tweed were cousins united in their love of Alice in Wonderland. Rotund, and immensely strong they decided to get rich as themed villains. After many battles against Batman, Dumphree was eventually replaced by cousin Dumpson but the diabolical duo remained little more than henchmen. After a stint with the Secret Society of Super-Villains, they united with the Mad Hatter in his Wonderland Gang for a series of robberies. Most believed the Hatter was in charge, but frequently the devious Tweeds controlled him, using one of his own mind-slaying devices.

Cunning and ambitious, the Tweeds grew ever bolder, but never managed to defeat the Dark Knight. While incarcerated in Arkham Asylum, they fell under the sway of warped psychologist Hugo Strange and escaped imprisonment when Deathstroke wrecked his latest plot. When Bane seized control of Gotham, Tweedledum and Tweedledee declined to join his army, forming their own gang with Kite Man and Scarecrow. Both were reported killed fleeing from Batman.

DOUBLE TROUBLE
 Tweedledee and Tweedledum seemed little more than a couple of musclebound thugs, but they aspired to be gang leaders in their own right.

TWO-FACE

DATA

DEBUT *Detective Comics* (Vol. 1) #66 (Aug. 1942)

REAL NAME Harvey Dent

BASE Gotham City

HEIGHT 6ft **WEIGHT** 182 lbs **EYES** Blue **HAIR** Brown

POWERS/ABILITIES Dangerous split personality makes him unpredictable; expert knowledge of law and police procedure; extremely intelligent and a brilliant strategist; relies on lucky coin to make decisions.

ALLIES Gilda Dent (deceased), Bruce Wayne (formerly), Amygdala, Solomon Grundy **ENEMIES** Batman, Batman Family, Erin McKillen

AFFILIATIONS The Secret Society of Super-Villains, Arkham Asylum inmates

BIRTH OF TWO-FACE

In a violent, life-changing act of revenge, criminal Erin McKillen tied DA Harvey Dent to his desk and poured acid on his face, claiming that the world could now see how two-faced he truly was.

turned to crime in later years, even going as far as hiring a hit on Commissioner James Gordon. It was after this failed assassination attempt that Dent was approached by his old friend Bruce Wayne. Wayne admired Dent's legal skill and wanted him to run for District Attorney, turning his expertise towards putting criminals away rather than setting them free. Dent agreed to run for office, and soon he found himself partnering with both Jim Gordon and the Batman, setting his sights on the McKillen sisters.

After the McKillen twins were jailed, thanks in part to Harvey Dent's exemplary work as District Attorney, Shannon McKillen killed herself to give Erin a chance to break out. One of Erin's first stops was to Dent's office where she set about enacting savage revenge on the double-crossing lawyer she held responsible for her sister's death. She stabbed and killed Gilda, then knocked Harvey unconscious. When Harvey awoke, he was tied to his office desk, and Erin was pouring acid on his face, scarring him for life. It was on that day that Harvey Dent adopted the name Two-Face. He soon showed his talent as a cunning, if psychotic, master criminal who relies on a scarred coin to make his decisions for him, forever torn between his old, noble self and his dark side.

Two-Face's descent into madness worsened over the years. After failing at an attempt to take his own life, Two-Face scarred the entire left side of his body, in some mad attempt to experience complete good and complete evil. For a time, he even ran his own church of fanatical followers, until Batman saw him incarcerated once again.

ON THE RECORD

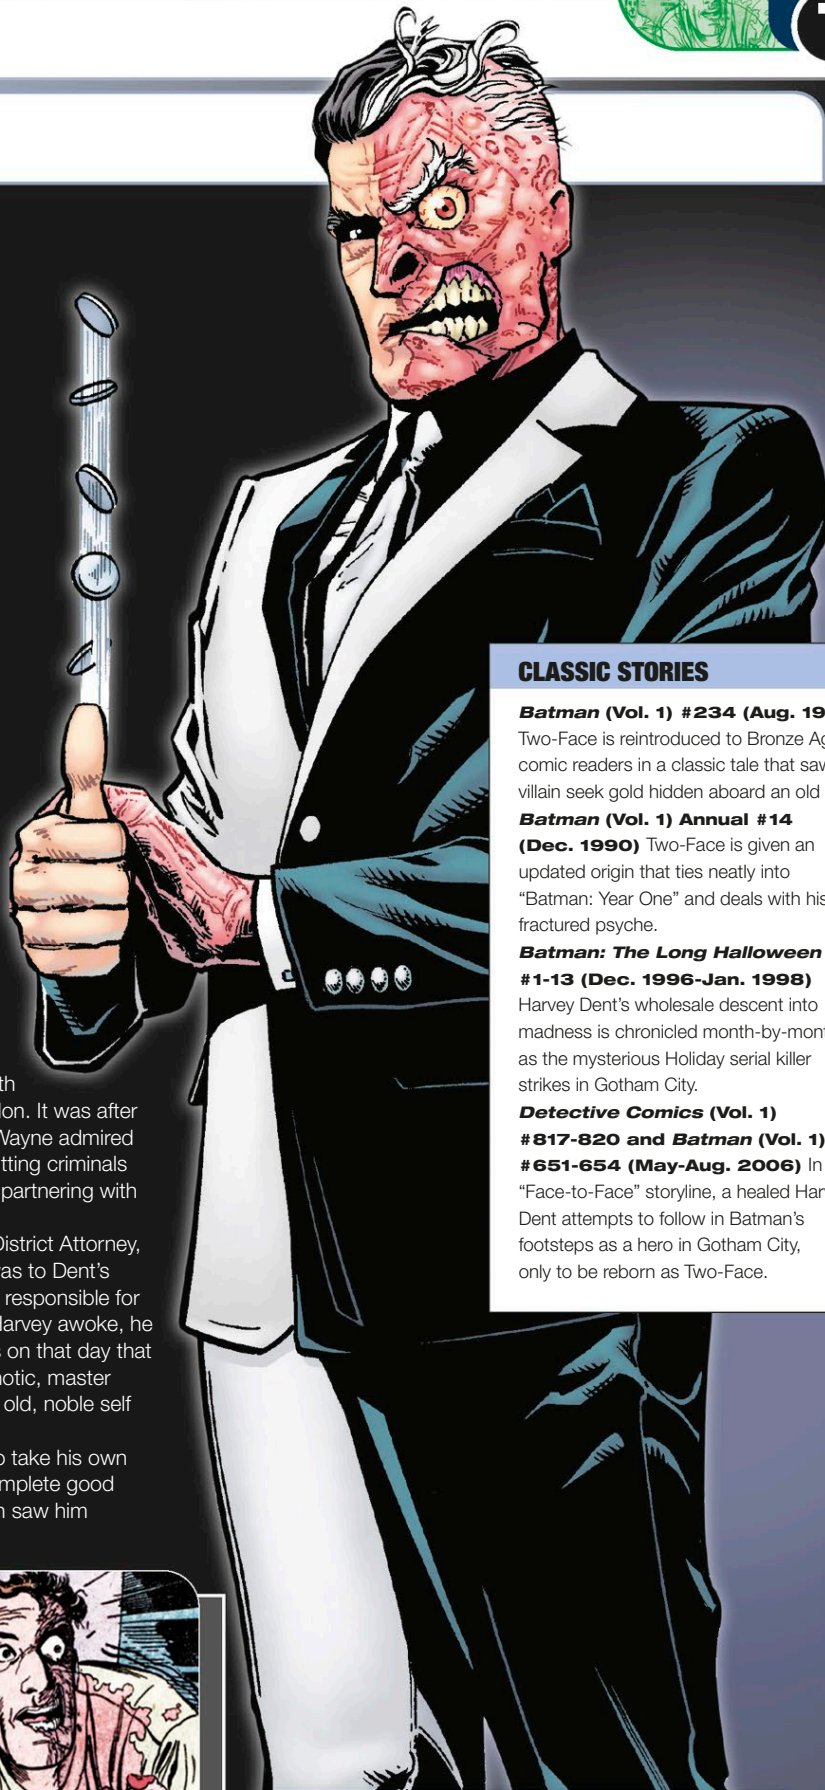

One of Batman's oldest enemies, Two-Face first debuted in the 1940s, his original alias being Harvey Kent. With his last name being perhaps a little too close to the alter ego of a certain Kryptonian Super Hero, Harvey's surname was changed to "Dent" as he continued to be a thorn in Batman's side over the decades.

After the *Crisis on Infinite Earths* event, Harvey Dent was reintroduced during "Batman: Year One" as Gotham City's golden boy, a white knight in the city's crusade against crime. Through several different origin stories that followed, it was disclosed that Harvey had always struggled with a dark dual personality. His true split self only emerged fully when the over-zealous District Attorney's face was irreparably scarred by gangster Sal Maroni.

A MAN DIVIDED

Harvey Dent's modern origin revealed that he had been abused by his father, a traumatic event that split his personality years before Two-Face was born. Later, even after plastic surgery to fix his face, Harvey couldn't let go of his dark past.

CLASSIC STORIES

Batman (Vol. 1) #234 (Aug. 1971)

Two-Face is reintroduced to Bronze Age comic readers in a classic tale that saw the villain seek gold hidden aboard an old ship.

Batman (Vol. 1) Annual #14

(Dec. 1990) Two-Face is given an updated origin that ties neatly into "Batman: Year One" and deals with his fractured psyche.

Batman: The Long Halloween

#1-13 (Dec. 1996-Jan. 1998)

Harvey Dent's wholesale descent into madness is chronicled month-by-month as the mysterious Holiday serial killer strikes in Gotham City.

Detective Comics (Vol. 1)

#817-820 and **Batman** (Vol. 1)

#651-654 (May-Aug. 2006)

In the "Face-to-Face" storyline, a healed Harvey Dent attempts to follow in Batman's footsteps as a hero in Gotham City, only to be reborn as Two-Face.

TWO OF A KIND

Batman and Two-Face share a long history. It was Bruce Wayne who introduced Harvey Dent to his future wife, Gilda. Despite Harvey's past crimes, Batman wants nothing more than to restore the sanity of his old friend.

ULTRA-HUMANITE

DEBUT *Action Comics* (Vol. 1) #13 (Jun. 1939)

BASE Mobile **REAL NAME** Unknown

HEIGHT 7ft 9in **WEIGHT** 666 lbs **HAIR** white **EYES** Red

POWERS/ABILITIES Super-genius IQ; master of science, psionic abilities—telepathy, telekinesis, hypnosis, brain blasts; modified ape body affords enhanced strength, speed, agility, and durability.

ENEMIES Justice League, Deathstroke the Terminator, Superman, Batman

AFFILIATIONS Secret Society of Super-Villains

A mad scientist menacing humanity since the end of World War I, the Ultra-Humanite has committed atrocities and battled generations of Super Heroes including the All-Star Squadron, Justice League, and the Terminator's Defiance team.

Initially a frail human, he modified his own form while spreading chaos and destruction, continually evading justice by transplanting his brain into new bodies, ranging from a movie actress to a giant insect. His current form is a mutated albino ape that he bred over many years, enhancing his intellect even further and granting him sufficient super-powers to lead the treacherous malcontents of the Secret Society of Super-Villains against Infinity Inc. and the Justice Society of America. In one clash, he killed the Crimson Avenger and Johnny Thunder. However, after usurping the magic of Thunder's Thunderbolt, he was shot dead by a new Crimson Avenger, but is notorious for having ways to escape the grave.

His recent return in a subservient role in Vandal Savage's Super-Villain Society team and subsequent easy defeat at the hands of Deathstroke revealed that Ultra-Humanite's keen intellect may be starting to give way to the savage primordial instincts of the bestial body he's inhabiting.

ON THE RECORD

After *Flashpoint*, Ultra-Humanite was trapped in the Phantom Zone for eons. He briefly escaped to Earth when schoolboy Clark Kent was scared during a crop fire in Smallville. However, Clark was too emotional and the villain retreated. Twenty years later he reappeared when the Phantom Zone was ruptured by Superman's battle against Doomsday and Brainiac.

Possessing many Smallville residents, Superman's emotions again repulsed Ultra-Humanite. He explosively released his victims and retreated to the Phantom Zone.

ULTRA-ABSORBENT
The predatory Ultra-Humanite was only as strong as its last psychic feast.

ULTRA BOY

DEBUT *Superboy* #98 (Jul. 1962)

REAL NAME Jo Nah

BASE Legion Headquarters, New Earth

HEIGHT 6ft **WEIGHT** 190 lbs

EYES Brown **HAIR** Brown

POWERS/ABILITIES Vast strength, speed, invulnerability, flight, vision like Superman—but canonically use one power at a time.

ENEMIES Daxamites, Dominators, Fatal Five, Krav the General Nah

Rimbor is a United Planets world wracked by civil war, but Ultra Boy Jo Nah strives to use his powers to proudly represent both sides.

A member of the Legion of Super-Heroes. Impetuous and impatient, Jo always seeks the most direct solution to any problem, a useful quality as one of the team's heavy hitters, with powers matching Superboy's, even if only accessible one at a time.

However, his capacities are stretched to the limit after he is elected the second Legion leader. Not only has he the devious political machinations of UP President R. J. Brande to navigate, but his own father—Crav the General Nah—is a powerful and sworn foe of the Legion, determined to destroy all Ultra Boy cherishes and stands for.

UNCLE SAM

DEBUT *National Comics* (Vol. 1) #1 (Jul. 1940)

HEIGHT 6ft 5in; variable **WEIGHT** 140 lbs **EYES** Blue **HAIR** White

POWERS/ABILITIES Super-strength, speed, invulnerability, immortality; enhanced senses, charisma, and reflexes; clairvoyance; ability to alter size; interdimensional teleportation; all fueled and sustained by the American people's belief in the ideals of Liberty and Democracy.

ALLIES The Ray, Phantom Lady, Doll Man, Human Bomb, Firebrand, the Spectre, Superman, Justice League of America

ENEMIES Fascism, Nazis, All Tyrants, Secret Society of Super-Villains, Imperix, Black Adam, Sinestro

AFFILIATIONS Freedom Fighters, the Multiversity, S.H.A.D.E.

Uncle Sam is among the youngest of the quasi-mystical National Avatars on the many Earths of the Multiverse. Created by the Founding Fathers as the colonies fought the War of Independence, he is the embodiment of America's communal spirit. Reanimating and empowering a fallen patriot, he fought the British as Minute Man.

Uncle Sam returned during every war and crisis threatening the USA, tailoring his manifestations to suit the tone of the times. When the Civil War broke out, his essence divided too, inhabiting a soldier on each side, battling as both Johnny Reb and Billy Yank.

His current look evolved in 1870 after manifesting to crush political corruption. He maintained it for both World War I and II. During this time he also first encountered multiple metahumans and Super Heroes. On Prime Earth, people are increasingly polarized, causing his power levels to fluctuate wildly.

Uncle Sam frequently works with iterations of the Freedom Fighters. His greatest triumph occurred on Earth-X, where Nazis won World War II. After fading away, Sam was revived to overturn the conquest and liberate America after his costumed allies stirred the crushed populace to again believe in the power of liberty, equality, and democracy.

I WANT YOU

After *Flashpoint*, Samuel Wilson led the Super Human Advanced Defense Executive (S.H.A.D.E.), a branch of Homeland Security employing metahumans the Ray, Phantom Lady, Human Bomb, and Doll Man, as undercover Freedom Fighters. As Uncle Sam, Wilson commands trained agents and vast intelligence and surveillance resources, recruiting heroes who can tackle America's enemies without drawing too much public scrutiny.

He may possess metahuman abilities but carefully conceals them, preferring to operate behind the scenes, strategically evaluating threats and decisively expending S.H.A.D.E. assets to "defend the 21st century."

ULTRAMAN

DEBUT *Justice League of America* (Vol. 1) #29 (Aug. 1964) **REAL NAME** Kal-Il

POWERS/ABILITIES From Kryptonite gains super-strength, speed, and stamina, flight, heat vision, enhanced senses and the ability to breathe out with the force of a hurricane

ALLIES Superwoman (as with others in Crime Syndicate, he is not really allied to anyone but only fights for himself)

ENEMIES Anti-Monitor, Alexander Luthor

AFFILIATIONS Crime Syndicate

In the universe of Earth-3, Krypton was populated by ruthless beings who cared only for strength. Young Kal-Il was the sole survivor of the planet's destruction. Sent to

Earth-3 on an escape rocket by his parents, they despised his vulnerable infant form.

On Earth-3, Kal intimidated Jonny and Martha Kent into taking care of him, killing the dysfunctional couple when he had no further need for them. He became Ultraman, eating Kryptonite to maintain his superpowers. Ultraman led the Crime Syndicate to Earth-0 after Earth-3 was destroyed, but he was defeated after being exposed to sunlight. Ultraman was imprisoned but later released to battle Anti-Monitor. He was killed in this conflict.

UNTITLED, THE

DEBUT *Red Hood and the Outlaws* #4 (Feb. 2012)

POWERS/ABILITIES Virtually immortal beings of pure evil; intangibility; darkness manipulation; shapeshifting.

ENEMIES All-Caste, Jason Todd (Red Hood), Outlaws (Starfire, Arsenal, Bizarro, Artemis), Essence

Eons ago, before “the sun began to cast shadows over the Earth,” a clan of nine brothers and sisters—The Untitled—discovered the waters of Absolute Evil. One by one, they drank deep of the flowing waters, gaining dark, unspeakable powers and immortality. However one sister, Ducra, resisted the evil. She formed the All-Caste, a mystical martial arts clan. The bitter antagonism between The Untitled and the All-Caste lasted for thousands of years, but eventually The Untitled tracked the All-Caste to their secret Himalayan base and practically eradicated them. The Untitled’s brutal actions enraged former Robin Jason Todd, who had recuperated there, trained by the All-Caste after being killed by The Joker and resurrected by immersion in a Lazarus Pit. Todd fell in love with Ducra’s daughter, Essence, so had many reasons for hating The Untitled. As Red Hood, he hunted The Untitled with the help of his Outlaws team, and believed them destroyed, but the devil clan re-emerged to battle his latest squad of unlikely heroes.

DARK EVOLUTION

The tainted black waters imparted great power and immortality, but could only corrupt those lacking the moral strength to resist its temptations.

UNKNOWN SOLDIER

DEBUT *Our Army at War* (Vol. 1) #168 (Jun 1966)

REAL NAME Classified Top-Secret

HEIGHT 5ft 9in **WEIGHT** 155 lbs **HAIR** None **EYES** Black

POWERS/ABILITIES Expertise with all forms of military ordnance and most unarmed combat disciplines; master of disguise with excellent strategic and tactical skills and an uncontrollable ability to tap into the memories of soldiers throughout history.

ALLIES Amanda Waller, Komal Akbari, Damage

ENEMIES Al-Isri, Ali “Ollie” Hassan, Roman, Crime Syndicate, Col. Marie Jonas

CAREER SUICIDE

Running roughshod over a squad of government-sanctioned criminal maniacs was a new challenge for the “Immortal G.I.”

Rebelling against his increasingly untrustworthy A.M.M.O. bosses, he tried disappearing and taking up civilian life, but war and conflict seemed to seek him out. After his return from Afghanistan, A.R.G.U.S. chief Amanda Waller brought him into her Suicide Squad, placing him in charge of a detachment dubbed the Reverse Squad. Their first mission was to capture O.M.A.C. and Crime Syndicate members who had survived the final battle with the Justice League. The immortal G.I. has been reported saving mutated US soldier Ethan Avery from the criminal experiments of Colonel Marie Jonas and infiltrating US Black Ops missions in a crusade to save honest soldiers from the illegal orders of their rogue commanders.

ON THE RECORD

The original Unknown Soldier was radically re-imagined in 2008 as a Ugandan doctor, Moses Lwanga. Caught up in an insurgency, the good doctor learned that his personality and memories were fabricated by the previous Unknown Soldier.

His predecessor had attempted to transfer his persona and skills to Lwanga to create peace instead of perpetuating war.

THE KNOWN UNKNOWN

The Unknown Soldier strides into battle, his face bandaged to both hide his disfigurement and protect his identity.

The Unknown Soldier

joined the Army after his family was killed in London during a terrorist attack. Disfigured in combat in Afghanistan, he was retrained as a clandestine operative, carrying out black-ops missions all over the world for the covert organization Advanced Medical Military Operations.

Wounded again in Dubai, during his recuperation he learned he was the latest in a line of Unknown Soldiers stretching back to the Middle Ages—and perhaps beyond. He also began suffering flashbacks and hallucinations, possibly caused by nanites A.M.M.O. had implanted to track him while he was in the field.

THE FACE OF WAR
All Unknown Soldiers surrender personal identity to become a symbol of unflinching resistance and military superiority.

UPSIDE-DOWN MAN

DEBUT *Justice League Dark* (Vol. 2) #1 (Sep. 2018)

REAL NAME None

BASE The Other Place

HEIGHT Unknown **WEIGHT** Unknown

EYES None **HAIR** None

POWERS/ABILITIES Extensive magical powers including telekinesis, regeneration and energy projection.

ALLIES Nabu, Circe

ENEMIES Justice League Dark, Hecate

AFFILIATIONS Otherkind, The Rip

The Upside-Down Man was a being made of pure magic, whose realm was simply called the Other Place, found around the Dark Multiverse. He was originally

supposed to be the balancing force for the magic of Hecate, but she trapped him in the Dark Multiverse, not wanting the horrors he brought with him to be part of her world. For millennia he waited and watched for an opportunity to come to Earth-0 and destroy all the magical beings. When it came, he revealed himself to the Justice League Dark at the Tower of Fate. He had no true form, but assembled a body for himself in a gruesome parody of a human form, upside-down, with no features except ear holes and a leering, fanged mouth.

URSA

DEBUT *Action Comics* (Vol. 1) #845 (Jan. 2007)

REAL NAME Ursa **BASE** Jekuul

HEIGHT Unknown **WEIGHT** Unknown

EYES Brown **HAIR** Black

POWERS/ABILITIES The usual powers of a Kryptonian under a yellow sun, including flight, super-strength, speed, and durability, X-ray vision, heat vision and freeze breath.

ALLIES General Zod, Lor-Zod **ENEMIES** Superman **AFFILIATIONS** House of Zod

Ursa was a Kryptonian, married to General Zod, who had survived the destruction of their planet due to being imprisoned in the

Phantom Zone. Ursa had a son with Zod, named Lor, and the three of them referred to themselves as the Last Family of Krypton. Zod broke into the Fortress of Solitude and used the Phantom Zone Projector to release Ursa and Lor. They planned to start a new Krypton on a planet called Jekuul. When Kyle Rayner arrived on Jekuul Ursa nearly killed him, having a hatred of Green Lanterns for allowing the destruction of Krypton. She was quick to anger and warlike, teaching her son that battle was an art form. However, Ursa supported Zod's alliance with Superman to defeat Rogol Zaar and avenge Krypton. Afterwards, Ursa took charge of infrastructure in the project to rebuild Krypton.

VANDAL SAVAGE

DEBUT *Green Lantern* (Vol. 1) #10 (Winter 1943)

REAL NAME Vandal Savage

BASE Mobile

HEIGHT 5ft 10in **WEIGHT** 176 lbs **EYES** Brown **HAIR** Black

POWERS/ABILITIES Immortal; cannot be killed through traditional means; wounds heal regardless of severity; incredibly intelligent with ancient connections throughout the world; briefly possessed superhuman strength, endurance, durability, and flight when supercharged by the returning comet that gave him his powers.

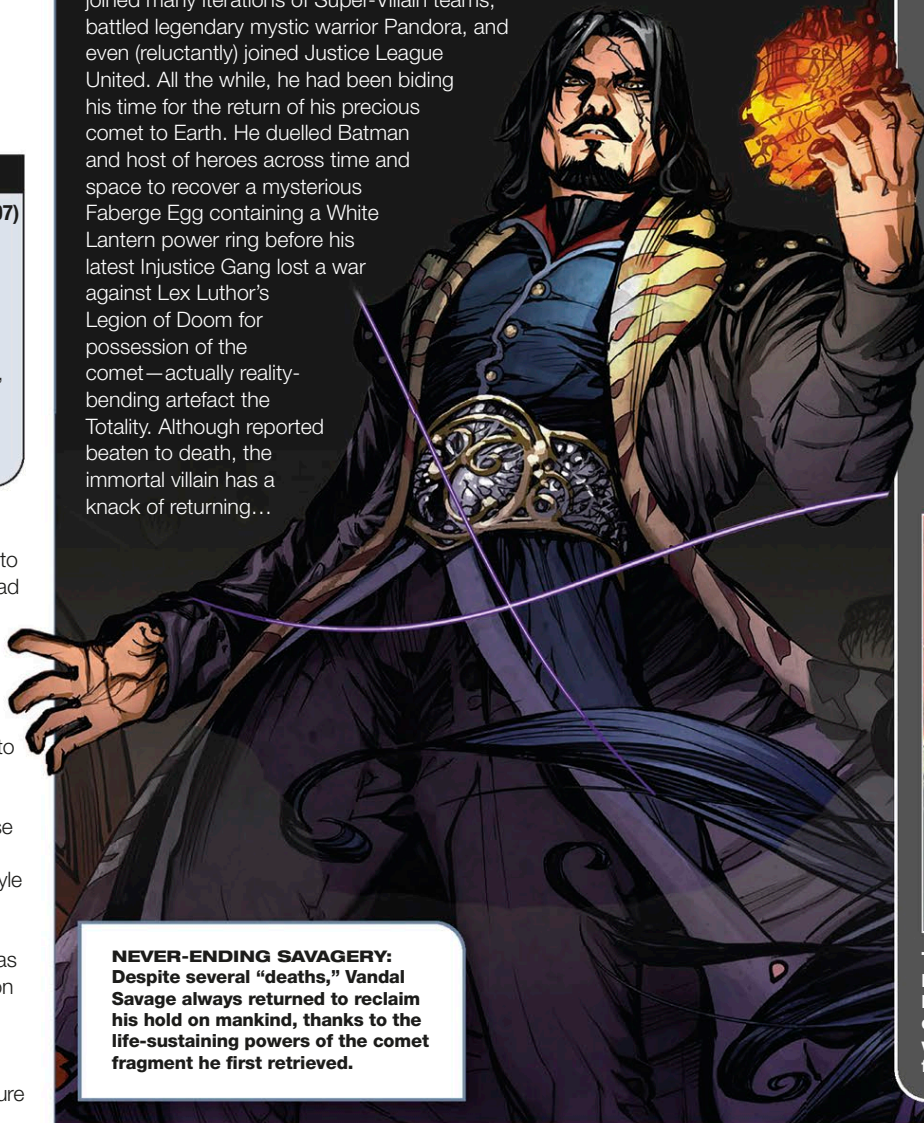

ALLIES Signalman, Giganta, Madame Xanadu, Jason Blood, Shining Knight

ENEMIES Lex Luthor, Legion of Doom, Agent Cassidy Sage, Hawkman, Superman, The Flash, Batman, Wonder Woman, Scandal Savage, Green Lanterns, Mordru

AFFILIATIONS Legionnaires Club, Demon Knights, Justice League United, the House of Savage

Vandal Savage has stalked Earth for millennia. He attributes this to various causes including a mystic meteor, blood sacrifice rituals to forgotten gods and even harvesting the organs of his countless descendants. Decades ago, he was Cherry Blossom Killer Jonathan Savage: abandoning a wife and daughter to fulfil these rituals. Over 1,000 years ago, he founded the Demon Knights, a fractious team of early superhumans and immortals to fight the sorcerer Mordru. Over 40,000 years ago, he was Neanderthal caveman Vandal Adg who stumbled upon a fragment of a comet during a battle with Cro-Magnon rivals. That is the true source of his power and immortality: an aspect of primordial creation heralding the return of Creations dark mother Perpetua.

Having haunted all of history, covertly stoking wars and schooling tyrants, in the 20th century Savage began clashing with numerous Super Heroes. He joined many iterations of Super-Villain teams, battled legendary mystic warrior Pandora, and even (reluctantly) joined Justice League United. All the while, he had been biding his time for the return of his precious comet to Earth. He duelled Batman and host of heroes across time and space to recover a mysterious Faberge Egg containing a White Lantern power ring before his latest Injustice Gang lost a war against Lex Luthor's Legion of Doom for possession of the comet—actually reality-bending artefact the Totality. Although reported beaten to death, the immortal villain has a knack of returning...

NEVER-ENDING SAVAGERY: Despite several "deaths," Vandal Savage always returned to reclaim his hold on mankind, thanks to the life-sustaining powers of the comet fragment he first retrieved.

STAYING ALIVE

Vandal Savage believed that slaughtering Superman—even a powerless one—would extend his life for centuries to come.

ON THE RECORD

Vandal Savage originally debuted in the Golden Age of Comics in the pages of *Green Lantern*. He fought the first Green Lantern Alan Scott, and over the years would come to face nearly every major character in the DC Comics stable.

Before *Crisis on Infinite Earths* altered continuity, Vandal was an Earth-2 resident and battled the Justice Society of America. After the Crisis, he became the prime adversary of The Flash (Wally West), before emerging as the arch-nemesis of the youthful hero Damage, the long-lived Resurrection Man, and even the time-traveling hero Rip Hunter.

THE MAN WHO WANTED THE WORLD! In his 1943 debut, Vandal Savage fought Earth-2 Green Lantern Alan Scott and his doughty sidekick "Doiby" Dickles. Savage would go onto become a recurring JSA foe in his early comic book exploits.

HAIR Green
POWERS/ABILITIES Ace reporter; extremely intelligent; adept at self-defense.
ALLIES Bruce Wayne, Jason Bard
ENEMIES The Penguin, Carmine Falcone

Star reporter Vicki Vale of *The Gotham City Gazette*, was a member of the city's elite. Thanks to her busy social life, she knew Bruce Wayne, and grew even closer to the notorious bachelor when he helped take the *Gazette* online.

Despite always vetting her sources, Vale was duped when she began a romance with Jason Bard. As he quickly ascended the ranks of the city Police Department—eventually becoming commissioner—Vicki helped his rise by publicizing his heroic deeds. She didn't realize that he was pursuing a vendetta against Batman, using his growing power to stop the Dark Knight for good. Vale finally discovered the truth, and Bard eventually turned over a new leaf, offering her an exclusive confession for the *Gazette* to get back in Vicki's good graces. In the aftermath, Vale took a job in television, as the anchor on Gotham 4 News.

HOLD THE FRONT PAGE
Gotham City Gazette star reporter Vicki Vale eventually saw through Police Commissioner Jason Bard's duplicity, achieving yet another scoop.

VENTRILOQUIST AND SCARFACE

DEBUT *Detective Comics* (Vol. 1) #583 (Feb. 1988)
REAL NAME Arnold Wesker (Ventriloquist)
BASE Gotham City
HEIGHT 5ft 7in **WEIGHT** 142 lbs **EYES** Blue **HAIR** Bald
POWERS/ABILITIES brilliant planner and tactical analyst; utterly ruthless when acting through his Scarface dummy.
ALLIES "Scarface," The Joker
ENEMIES Batman, Batgirl, The Riddler, Bane

In the early years of Batman's career, crime boss Arnold Wesker succumbed to insanity, refusing to speak and only giving orders through a wooden puppet based on a 1920's Chicago gangster. As the Ventriloquist and Scarface they terrorized Gotham City, leading many to believe the dummy was actually possessed by an evil spirit. When The Joker and The Riddler went to war over ownership of the city, Ventriloquist and Scarface joined The Joker's army of recruits and was locked in Arkham Asylum by Batman.

After facing the Dark Knight several times—including a perilous period working for Venom-fueled megalomaniac Bane—Wesker was reported killed and Scarface adopted by the equally unbalanced Peyton Riley. She acted out the role of Scarface's moll, using the dummy's reputation to earn a place for herself in the underworld. Another pair, Shauna Belzer and Ferdie, temporarily traded on the pair's killer reputation, before joining antihero superteam the Secret Six.

Wesker ultimately returned to reclaim Scarface, but his criminal alliance with The Penguin, Black Mask and Great White Shark again landed him in Arkham. In recent times, he was pressganged by Batman into a team to tackle Bane. The Dark Knight gambled that Wesker's multiple personality disorder would counteract the mind-bending, mood-altering powers of Bane's partner, Psycho-Pirate.

PUPPET DICTATOR
Ventriloquist Arnold Wesker's personality was totally subsumed in the vicious character of his Scarface dummy.

ON THE RECORD

After Flashpoint, altered reality, Arnold Wesker was superseded by Shauna Belzer, a demented telekinetic mercilessly bullied and eclipsed her child star twin brother, Ferdie. "Shabby Shauna" grew to resent Ferdie and when her powers peaked, she murderously used them on all her tormentors. When, at a friend's birthday party, Shauna encountered a ventriloquist, she fixated on his dummy. Naming it Ferdie, she formed a twisted relationship with the puppet, using Ferdie to give vent to her dark side, and murder anyone who crosses her.

DEADLY DOUBLE ACT
Shauna and Ferdie constantly bickered, but it was always other people who paid the ultimate price.

VIXEN

DEBUT *Action Comics* (Vol. 1) #521 (Jul. 1981)

REAL NAME Mari Jiwe McCabe

BASE Mount Justice, Happy Harbor, Rhode Island

HEIGHT 5ft 9in **WEIGHT** 140 lbs **EYES** Amber **HAIR** Black

POWERS/ABILITIES Uses the mystical Tantu Totem to channel abilities of any animal, allowing her enhanced strength, speed, flight, and mimic any animal feat or characteristic.

ALLIES Justice League of America

ENEMIES Queen of Fables, Ocean Master, Prometheus

AFFILIATIONS Mndawe Foundation, Justice League International, Justice League of America, Justice Foundation

Super Hero Mari McCabe is a fashion model from African nation Zambesi. Inheritor of the Tantu Totem, she can channel the abilities of any animal by tapping into the Red, the morphogenetic field of all life on Earth. As Vixen, Mari served with many incarnations of the Justice League—including the United Nations' Justice League International team, led by Booster Gold. She participated in their first mission, defeating planet-plundering alien Peraxxus and his Signal Masters. Seriously injured in a bomb attack at the UN, McCabe then quit the team to recuperate.

When Ocean Master's Atlanteans attacked Boston—taking many Justice Leaguers captive—Vixen was ready for action. Drafted in as a temporary member, she helped drive back the Atlantean tide. In the aftermath she was considered for full membership, but failed to make the final cut. When Batman formed his own Justice League of America team, Vixen became his trusted lieutenant, and through increasingly significant missions grew into a position of leadership. Facing the Extremists, wild man Makson, and the godlike Kingbutcher she proved her mettle before personally defeating Prometheus and uniting Earth's wishers against the reality-shifts of the Queen of Fables. As their spokesperson, Vixen transformed the team into the multi-national Justice Foundation.

ON THE RECORD

The pre-Flashpoint Vixen served as a member of many teams, including the Suicide Squad, Justice League of America, Birds of Prey, and Justice League Task Force. On one adventure she faced the African trickster-god Anansi within the Tantu Totem itself. She also returned to Africa and came to terms with her past by facing her mother's murderer—Aku Kwesi, a warlord who was taking control of local villages with help from Intergang.

WRATH OF THE VIXEN

Mari returned to Zambesi to avenge her mother and put an end to Intergang's schemes. But her enemy was far stronger than she realized, and the battle was not an easy one.

PRIMAL FURY
The Tantu Totem allows Vixen to channel the abilities of any animal, making her a formidable opponent.

LEAGUE CASUALTIES
The bombing of the Justice League's ceremony at the UN killed League member Gavril Ivanovich and severely injured Vixen.

POWERS/ABILITIES Superb athlete; expert with knives and firearms; master of multiple martial arts; meditates to heal injuries.

ALLIES Teen Titans, Nightwing

ENEMIES New York Mafia, Electrocutoner, Saber, Cannon, Peacemaker

Adrian Chase was once a crusading District Attorney in New York City, using the legal system to take on the Mob. However, after a vengeful gang boss killed his wife and children in a bombing, the lawyer was contacted by a mysterious group dedicated to fighting evil from outside the law. They trained him in martial arts and meditation, and on returning to New York, he embarked on a crime-fighting career as Vigilante.

Despite his noble intentions, Adrian found himself sliding toward darkness as his war against crime progressed. When he tried to retire, his friend Alan Welles and then his court bailiff Dave Winston took up the mantle—but both were killed in action. Adrian finally decided to become Vigilante once again, but could not deal with the stress and took his own life. The identity was later taken up by rogue police officer Pat Trayce; the mysterious Justin Powell; and then Adrian's own brother, Dorian Chase.

VIOLENT METHODS
Despite initially trying to use non-lethal techniques, Adrian's descent into darkness resulted in him killing without hesitation.

Cisco Ramon gained

his powers unknowingly, when the event horizon of a Boom Tube opened in front of him, killing his brother. After the incident, Cisco was studied for years, without his knowledge, by the government agency A.R.G.U.S. When A.R.G.U.S. agent Dale Gunn tested his powers, Cisco passed with flying colors. Gunn then outfitted him with a special suit developed by his agency, and Cisco became Vibe. Not only that, Cisco was told that starting the following day, he would become a member of a new team called the Justice League of America.

GOOD VIBRATIONS
Cisco's powers allowed him to pinpoint incursions by extradimensional "Breachers" into Earth's reality—and he was trained to deal with them if they proved hostile.

ON THE RECORD

Vibe originally debuted in the mid-1980s, before the *Crisis on Infinite Earths*. He was one of four new recruits into the Justice League of America, later nicknamed "Justice League Detroit" when the title began showcasing new characters. Alongside Gypsy, Steel, and Vixen, Vibe became a valued member of the League, but would be killed by one of Professor Ivo's androids only a few years after his debut. His undead body later returned as a Black Lantern during the *Blackest Night* event.

FEELIN' THE VIBE
Breakdancer Paco Ramone said he was too cool to join a team of old super dudes, but realized he needed them as much as they needed Vibe.

VIKING PRINCE

DEBUT *The Brave and the Bold* (Vol. 1) #1 (Aug.–Sep. 1955)

REAL NAME Jon Haraldson

HEIGHT 5ft 11in **WEIGHT** 171 lbs

EYES Blue **HAIR** Blond

POWERS/ABILITIES Skilled warrior and great narrator; cannot be harmed by fire, water, wood, or metal.

ALLIES Sgt. Rock, Black Canary

ENEMIES Krogg the Red

Many legends are told of the mysterious time-lost warrior called the Viking Prince. According to some tales, he crossed the Atlantic to find Vinland; in others, he fell in love

with a Valkyrie and wished to die to be with her, but was cursed by Odin so that fire, water, wood, and metal could not slay him.

As well as sailing across the seas and battling monsters and other mighty foes, he was transported through time on several occasions. The Lord of Time forced the Viking Prince to join the Five Warriors From Forever to face the Justice League of America. He was stranded with other temporal exiles on Dinosaur Island, and later, in World War II, fought beside Sgt. Rock of Easy Company. Killed by explosives while battling the Nazis, perhaps the Viking Prince finally beat Odin's curse and achieved the death he long desired.

VOODOO

DEBUT *W.I.L.D. Cats* (Vol. 1) #1 (Aug. 1992)

BASE Dead City of the Daemonites, Europa

EYES Brown **HAIR** Brown

POWERS/ABILITIES Shapeshifting; mimicry; telepathy; poison quills; life support; can extrude wings or claws from body.

ENEMIES Black Razors, Black Jack, Green Lantern (Kyle Rayner)

Priscilla Kitaen was an exotic dancer with the stage name "Voodoo," who was captured by the alien Daemonites. They subjected her to procedures that transformed her into a shape-changing human/alien hybrid, but when she escaped, the Daemonites used her DNA to create another hybrid: Voodoo.

Voodoo took over Priscilla's old identity (and even her job) to blend in and gather data on Earth's superhuman population, but she was found by the alien-hunting Black Razors. She took refuge in a safe house, but Green Lantern (Kyle Rayner) tracked her down, forcing her to return to the Daemonite mothership. Voodoo was furious when a Daemonite commander explained that she was just a genetic experiment, but agreed to work with them after being offered command of all hybrids on Earth. Voodoo set out to kill Priscilla and faced her on Jupiter's moon, Europa. However, Priscilla convinced her that she didn't have to follow the Daemonites, and could choose her own destiny.

HYBRID ABILITIES

Voodoo's wings and razor-sharp claws made her formidable in close combat, while her shapeshifting made her highly suited for espionage.

VUNDABAR, VIRMAN

DEBUT *Mister Miracle* (Vol. 1) #5 (Nov.–Dec. 1971)

BASE Apokolips

HEIGHT 5ft 2in **WEIGHT** 103 lbs

EYES Blue **HAIR** Black

POWERS/ABILITIES As a New God, Virman is immortal and has superhuman physical attributes; a relatively skilled strategist.

ENEMIES Mister Miracle, Big Barda, Justice League International

A product of one of Granny Goodness' infamous orphanages, Virman Vundabar was a member of Darkseid's inner circle. He was obsessed with military discipline and devoted to Granny, but despite his best efforts he repeatedly failed to capture Mister Miracle for her.

When Darkseid was lost in the Source Wall, Virman sided with Granny as the dark lord's henchmen jockeyed for influence. When Darkseid returned, Vundabar made a foolhardy grab for power by trying to assassinate his lord, and was destroyed by Darkseid's Omega-Beams. He was later resurrected by Darkseid, only to be killed again by the Infinity-Man. Reborn on Earth, Vundabar ran the Dark Side Club's gladiatorial competitions. He finally suffered the ignominy of being beheaded by the Clock King, one of the club's fighters.

WALLER, AMANDA

DEBUT *Legends* #1 (Nov. 1986)

BASE Belle Reve Penitentiary

EYES Brown **HAIR** Black

POWERS/ABILITIES A wealth of field experience with superpowered beings; superb leader and analyst with military expertise.

ALLIES James Gordon, Jr.

ENEMIES Black Spider, Basilisk, Regulus, Crime Syndicate, O.M.A.C.

AFFILIATIONS Suicide Squad, Team 7, NSA, A.R.G.U.S., Lexcorp, Justice League of America

Brilliant NSA analyst Amanda Waller

served in elite special ops unit Team 7. Her intelligence, management skills, and ability to make hard decisions landed her the job as head of A.R.G.U.S. and Commander of Task Force X/Suicide Squad, a covert team staffed by convicted Super-Villains. Controlling superpowered criminals required someone equally ruthless. Waller demonstrated a willingness to lie, cheat, and allow candidates to be tortured and killed.

Although reviving the Squad was her pet project, running it has caused endless heartbreak. Family and friends have died because of Waller's relentlessness. She has been removed and returned to control of Task Force X many times. She was caught off-guard when Squad member Black Spider proved to be a planted infiltrator, and took her beloved Nana hostage. Although Waller fought back with skill, she was unable to prevent Nana's murder.

When she was replaced by political appointee Emilia Harcourt, Waller ordered herself assassinated by marksman Deadshot, simply so that she could operate in complete anonymity to expose a traitor and foil a plot for world domination. Whatever the obstacle, Waller perseveres and overcomes.

MEAN TEAM
Amanda Waller came to prominence as part of Team 7, countering the emerging metahuman threat alongside Steve Trevor, Deathstroke, Grifter, and others.

SUICIDAL TENDENCIES
Amanda Waller handpicked the members of Task Force X—the Suicide Squad—including King Shark, El Diablo, Black Spider, Deadshot, and Harley Quinn.

ON THE RECORD

Pre-Flashpoint, Amanda Waller was an abrasive and controversial figure who frequently ignored the rules—and paid the price. She was found guilty of unauthorized deployment of the Suicide Squad against the occult Loa cartel, and later jailed for other offenses by President Lex Luthor.

She was subsequently freed and assigned a position in UN agency Checkmate, but was forced to resign after it was discovered that she had illegally deported Super-Villains to the hostile planet of Salvation.

PUSHY ATTITUDE
Amanda “the Wall” Waller’s arrogance earned her few friends in the Super Hero community. Waller’s relationship with Batman was especially fraught.

WARLORD

DEBUT *First Issue Special* #8 (Nov. 1975)

REAL NAME Travis Morgan

BASE Skartaris

HEIGHT 6ft **WEIGHT** 188 lbs

EYES Blue **HAIR** White

POWERS/ABILITIES Brilliant strategist; natural leader; expert hand-to-hand combatant; extraordinary swordsman; extremely athletic.

ALLIES Shakira, Jennifer Morgan, Machiste

ENEMIES Deimos

On June 16, 1969, Air Force pilot Lieutenant Colonel Travis Morgan was flying an SR-71 Blackbird at 80,000 ft on a spy mission over Russia when he was

shot down and sent spiraling to Earth. Bailing out and expecting to freeze to death in chilling water, Morgan instead parachuted into Skartaris, a land of eternal sunlight where mythical creatures and prehistoric beasts roamed. There he became known as Warlord, a warrior who battled and eventually killed Skartaris' corrupt mage, Deimos.

While he ventured from Skartaris a few times, including a memorable visit to Seattle to partner with Green Arrow, Warlord found a home in this land hidden inside the Earth. He died in a duel with his own son, Joshua Morgan. Joshua later honored his father's legacy by taking up the Warlord mantle.

WARP

DEBUT *The New Teen Titans* #14 (Dec. 1981)

REAL NAME Emil LaSalle

HEIGHT 5ft 8in **WEIGHT** 134 lbs

EYES Brown **HAIR** Brown

POWERS/ABILITIES Flight; able to open a hole in space to teleport.

ALLIES Phobia, Plasmus, Brain, Monsieur Mallah

ENEMIES Blue Beetle, Brutale, La Dama, Rompe-Huesos, Coyote, The Joker

AFFILIATIONS Secret Society of Super-Villains, Brotherhood of Evil

Before *Flashpoint*, Frenchman Warp was a major foe of the Teen Titans. After serving with the Brotherhood of Evil and Secret Society, Warp became a

mercenary with old comrades Phobia and Plasmus, sent to retrieve an artifact called the Blue Beetle. But crime boss La Dama also wanted it, and sent her own lackeys Brutale, Rompe-Huesos, and Coyote after it.

The Blue Beetle had already possessed teenager Jaime Reyes, transforming him into an alien armored warrior. Reyes repurposed the sentient weapon into a Super Hero, routing Warp and his cronies. Warp then joined the Outsider's Secret Society, but was defeated. Warp also got between Lex Luthor and The Joker as they fought for control of the Legion of Doom, and the Harlequin of Hate destroyed his mind.

WAVERIDER

DEBUT *Armageddon* 2001 #1 (May 1991)

REAL NAME Michael Jon Carter

BASE The Vanishing Point

HEIGHT 6ft 5in **WEIGHT** 215 lbs

EYES Blue **HAIR** Blond

POWERS/ABILITIES Can see the future of any individual; one with the timestream, allowing time-travel; superhuman strength, durability.

ENEMIES Monarch

The original Waverider was Matthew Ryder, a scientist from a future reality in the year 2030 ruled by the tyrant Monarch. Resolved to stop Monarch's iron rule before it began, he became Waverider. Knowing only that Monarch was a former Super Hero, Waverider went back in time to investigate possible futures for many heroes and discovered that Hawk was destined to become the Super-Villain in question.

The first Waverider was killed in the line of duty. However, during the Convergence event, an aged Booster Gold (Michael Jon Carter) from an alternate Earth became the new Waverider when he was fed into the timestream by Earth-0's Booster Gold. This Waverider took on a career in the Multiverse, initially helping Telos and various Super Heroes convince Brainiac to realign the Multiverse.

TIME TRAVELER

Waverider's ability to surf the timestream enables him to discover secrets hidden in the past and also gain knowledge of future events.

WATCHMEN, THE

DATA

DEBUT *Watchmen* #1 (Sep. 1986)

MEMBERS/POWERS **OZYMANDIAS** (Adrian Veidt) Genius, polymath, tycoon, and master martial artist; **SILK SPECTRE** (Laurie Juspeczyk) Skilled hand-to-hand fighter; **NITE OWL** (Daniel Dreiberg) Gadgeteer and inventor, owner of flying Owlship; **COMEDIAN** (Edward Blake) Combat veteran and firearms expert; **RORSCHACH** (Walter Kovacs) Investigator and brawler; **DOCTOR MANHATTAN** (Dr. Jon Osterman) Near-omnipotent; able to control and manipulate matter at a quantum level.

ALLIES The Minutemen

ENEMIES Moloch the Mystic, Big Figure, Lady Sin

AFFILIATIONS The Crimebusters

NO LAUGHING MATTER Investigating a routine homicide, Rorschach found a bloodstained badge—his first clue that the victim, Edward Blake, was none other than the Comedian.

Though never referred to as The Watchmen at the time, these costumed adventurers were once the US's most celebrated heroes. However, a public backlash against vigilante violence forced them to go their separate ways in the 1970s. In 1985, as Cold War tensions between the US and the USSR escalated, one of these feted heroes was found murdered. Investigating the crime, his old teammates were forced to deal with issues from their past, and uncovered evidence of a conspiracy with far-reaching ramifications.

In a universe separate from Earth-O, costumed heroes emerged in the late 1930s, and by the 1940s had teamed up as the crime-fighting Minutemen. They were succeeded by a new generation of heroes called the Crimebusters. Among this second generation was Doctor Manhattan. As a result of a lab accident, Doctor Manhattan

was the only hero on Earth with superhuman powers. Able to control quantum forces, he was a living nuclear deterrent, altering the power balance between the US and the USSR.

In the 1960s and 1970s, the public turned against costumed vigilantes, and the Keene Act was passed in 1977, banning vigilante activity. The Watchmen retired, except for Doctor Manhattan and the Comedian, who worked for the government, and Rorschach, who refused to concede. When the Comedian was murdered in 1985, Rorschach suspected that former heroes were being targeted. To compound matters, Doctor Manhattan was then accused of being the cause of cancer in some of his former associates. He exiled himself on Mars, which increased tensions with the USSR. Rorschach and Nite Owl uncovered evidence of a bizarre plot that would kill millions, yet result in world peace—and the mastermind appeared to be their fellow adventurer, Ozymandias.

Ozymandias' plan briefly worked, but by 1992 he had been discovered. Doctor Manhattan ripped through the barriers of the DC Multiverse and studied Superman. Manhattan altered reality repeatedly as the DC heroes and villains reached breaking point in a massive international feud. Inspired, he returned to his own world where he helped heal the planet's vegetation, removed its nuclear capability, and raised a son to be as honorable as Clark Kent. He gifted his son with his remaining powers before fading away into nonexistence.

BEFORE WATCHMEN

The Minutemen were America's original costumed crime-fighters. Operating throughout the 1940s, it was Captain Metropolis who instigated the team when he approached Silk Spectre and her manager, Laurence Schexnayder, to suggest joining forces. The team comprised:

- 1 Silk Spectre (Sally Juspeczyk)
- 2 Nite Owl (Hollis Mason)
- 3 The Comedian (Edward Blake)
- 4 Mothman (Byron Lewis)
- 5 Cpt. Metropolis (Nelson Gardner)
- 6 Hooded Justice (Unknown)
- 7 Dollar Bill (William Brady)
- 8 Silhouette (Ursula Zandt)

WHO WATCHES THE WATCHMEN?

- 1 Ozymandias, 2 Silk Spectre, 3 Doctor Manhattan, 4 Comedian, 5 Nite Owl, 6 Rorschach

CLASSIC STORIES

Watchmen #1-12 (Sep. 1986-Oct. 1987) Arguably the defining comic of its decade, *Watchmen* recounts a dark and disturbing tale of murder and conspiracy in a world on the brink of nuclear annihilation.

Before Watchmen: Minutemen

#1-6 (Aug. 2012-Mar. 2013) A prequel that explores the history of The Watchmen's predecessors from the perspective of the original Nite Owl, as chronicled in his book *Under the Hood*.

Before Watchmen: Ozymandias

#1-6 (Sep. 2012-May 2013) Ozymandias is perhaps the most distant and mysterious character in *Watchmen*. This miniseries looks at his early adventures and first encounters with the other *Watchmen* characters.

LIFE ON MARS Accused of being a cause of cancer, Doctor Manhattan retreated to Mars—to think, to remember, and to build.

WAYNE, THOMAS AND MARTHA

DEBUT *Detective Comics* (Vol. 1) #33 (Nov. 1939)

BASE Gotham City

HEIGHT 6ft 2in (Thomas); 5ft 4in (Martha)

WEIGHT 210 lbs (Thomas); 108 lbs (Martha)

EYES Blue (Thomas and Martha); **HAIR** Black (Thomas); Brown (Martha)

POWERS/ABILITIES Gotham City power couple with connections in the city's elite social circles and business world; charitable and intelligent with an eye for philanthropy; loving parents; Thomas Wayne was also a skilled surgeon.

ALLIES Bruce Wayne, Lucius Fox, Alfred and Jarvis Pennyworth

ENEMIES Joe Chill, Court of Owls

Thomas Wayne was heir to the Wayne family fortune.

He was the latest member of a proud dynasty, including one of the city's most influential figures, Alan Wayne—that dated back to the founding of Gotham City itself. Although he did not need to work, Thomas was extremely intelligent and, in addition to working closely with the family business, Wayne Industries, he became a surgeon. He also found another stimulating challenge in his courtship with the equally brilliant Martha Kane. Hailing from another of Gotham City's first families, Martha was renowned for her kind heart and philanthropy. She and Thomas were married, and had a son named Bruce. After a young Bruce got in trouble for sneaking into Gotham City to see the film *The Mark of Zorro*, Thomas Wayne decided a family outing was in order, and the three went to see the movie later that night. In a random act of violence, perpetrated by a small-time crook named Joe Chill, Thomas and Martha were shot and killed in an alley near the Monarch Theater. Bruce was left an orphan, and the murder of his parents would later inspire him to create his alter ego, Batman, sworn to protect the innocent in crime-infested Gotham City.

A Thomas Wayne from an alternate reality—where he was Batman—initially helped Bane take over Gotham City, before betraying and seriously wounding the Super-Villain with a gunshot to the head.

ON THE RECORD

While their famous son, Batman, debuted in *Detective Comics* #27 (May 1939), his origin was not related until November of that year. In a famous two-page introduction, Thomas and Martha Wayne first appeared, with only Thomas given a first name.

In later years, Batman's origin was fleshed out, particularly in *Batman* #47 (Jun.–Jul. 1948); Martha was given her first name, as was the Wayne's killer, Joe Chill.

In 1956, it was revealed that Thomas Wayne had actually worn a Batsuit to a costume party that served as inspiration to a young Bruce, in a story that provided an employer for Joe Chill—organized criminal Lew Moxon—on that fateful night.

BATMAN SR.

Long before the *Flashpoint* event, Thomas Wayne tried on the original Batsuit. During *Flashpoint*, in an alternate universe, Thomas served as that world's Batman.

WEAPONERS OF QWARD

DEBUT *Green Lantern* (Vol. 2) #2 (Sep.–Oct. 1960)

BASE Qward, Antimatter Universe

NOTABLE MEMBERS Kramen; Drik; Chomin; Kiman; Yokal the Atrocious; General Fabrikant.

Armed with devastating Qwa-bolts, the Weaponers of Qward originated in the Antimatter Universe, where morality is reversed, and evil dominates. On Qward, honest decent citizens conceal their tendencies fearing pain of death. The Qwardians created a galaxy-spanning military empire, equal and opposite in power to the Guardians of the Universe and Green Lantern Corps.

Weaponers originally found an enemy in Sinestro. Before his own descent into evil, the Korugarian found a Green Lantern ring and battled a Weaponer in the positive matter universe. Hungry for power, Sinestro killed the Qwardian, kickstarting his own Green Lantern career.

When Green Lantern Hal Jordan exposed Sinestro's villainy, the traitor was banished to Qward, where opportunistic Weaponers equipped him with a yellow power ring to cause chaos and promote their doctrine of corruption in the positive matter universe. After years of marauding, Sinestro recruited his own Sinestro Corps to challenge his former masters and Qwardian allies.

A broken empire, Weaponers ranks were devastated when Sinestro and Superman clashed for control of yellow Fear Entity Parallax. They were all but eradicated when Multiversal creator Perpetua unleashed her restored Anti-Monitor on Qward.

WEAPON MASTERS

Before the *Flashpoint* event, the Weaponers relied heavily on their yellow shields and lightning-bolt weapons.

ON THE RECORD

In *Green Lantern* (Vol. 2) #2, Hal Jordan met Telle-Teg, a refugee from Qward who was one of the few people on his planet rebelling against the evil Weaponers. When a Destroyer from Qward followed Telle-Teg, Green Lantern fought the villain, and eventually made his way to Qward as well.

There he learned the Weaponers had designs on taking all the power batteries in the universe. They soon managed to steal Hal's power battery and bring it to their capital city, Qwar-Deen. In the second part of this first adventure, Green Lantern was able to steal back his battery and stop the two Qwardians on Earth, who were posing as door-to-door salespeople.

BOLT OF DESTRUCTION

Telle-Teg tried to protect Green Lantern as his ring was powerless against the golden Qwa-bolts. Telle-Teg died, but Hal found a way to defeat the Weaponers of Qward.

WEATHER WIZARD

DEBUT *The Flash* (Vol. 1) #110 (Dec. 1959-Jan. 1960)

REAL NAME Marco Mardon

BASE Central City

HEIGHT 6ft 1in **WEIGHT** 184 lbs **EYES** Blue **HAIR** Black

POWERS/ABILITIES Able to manipulate the weather, manifesting storms, lightning, tornados, and other weather phenomena; manipulates wind in order to fly; using powers affects his mood

ALLIES Captain Cold, Mirror Master, Heatwave, Glider, Trickster

ENEMIES The Flash, Elsa Mardon

AFFILIATIONS The Mardon Family, the Rogues

At 22 years old Claudio Mardon became leader of a major crime family when his father died. Claudio wanted to prove himself worthy of the Mardon name but soon realized he was out of his depth. His brother Marco wanted nothing to do with organized crime, and shunned the tainted legacy until Claudio was shot dead. This was no rival mob hit, but a murder scheme orchestrated by the victim's ambitious wife Elsa. She was concerned Claudio was surrendering too much family territory in the name of peace.

Enraged, Marco returned, just as Elsa had anticipated he would. As *The Flash* debuted, Marco assumed the name and mantle of Weather Wizard and electrocuted his sister-in-law with lightning.

The Flash became a sworn enemy, and it became clear that the technology Mardon used was driving him crazy. Weather Wizard joined infamous Super-Villain team the Rogues, content to follow orders and get rich. This changed after leader Captain Cold accepted an offer of greater power from Lex Luthor's omnipotent sponsor Perpetua. As "King Cold" reshaped Central City into his personal playground, Mardon joined rebel Rogues Golden Glider, Heat Wave, and Mirror Master in The Flash's resistance squad.

ON THE RECORD

Before *Flashpoint* and *Crisis on Infinite Earths*, criminal Mark Mardon became the Weather Wizard thanks to the ingenuity of his brother, Clyde, a scientist of weather conditions. When Clyde died of an apparent heart attack after discovering how to control weather, Mark escaped his prison guards and went to Clyde's home. Using his brother's notes, he built a weather wand and became the Weather Wizard. He later joined the Rogues as a recurring foe of The Flash and Kid Flash.

STORMY WEATHER

Tired of facing The Flash (and certain defeat) at one point, Weather Wizard tried his luck in Gotham City where he met and was bested by the team of Batman and Robin.

WEST, IRIS

DEBUT *Showcase* #4 (Sep.-Oct. 1956)

BASE Central City

HEIGHT 5ft 6in **WEIGHT** 130 lbs **EYES** Blue **HAIR** Brown

POWERS/ABILITIES Trained journalist with a suspicious nature, dogged determination and the instincts of a detective.

ALLIES Barry Allen, Daniel West (formerly), Hartley Rathaway, Wally West (The Flash III), Wallace West (Kid Flash)

ENEMIES Reverse-Flash/Daniel West

AFFILIATIONS Gotham Gazette, Speed Force

Iris West grew up handling trouble. After crippling their abusive father, her brother Daniel left her to care for him. Daniel turned to a life of crime and was caught by new Super Hero, The Flash. Despite her burdens, Iris got a journalism degree and interned at the Gotham Gazette where she met easy-going Barry Allen. They met again years later when he was a forensic scientist for Central City Police Department. Barry quickly realized Iris was either using him to get information on The Flash or about her brother's case. Their relationship stalled, but they remained friends. When Iris gained powers from the Speed Force, The Flash gave her a special outfit: Protecting her from a Reverse-Flash targeting The Flash's associates. When the psychopath was revealed as Daniel, she sacrificed her powers and regrettably helped put him back behind bars. As Iris and Barry's relationship matured, Daniel's son Wallace moved in, and thanks to a bizarre event, became a speedster too: Kid Flash.

Life became truly complicated after the apparent time manipulations of Doctor Manhattan began unraveling. Soon, a grown Wally West materialized: another nephew from another life and the original Kid Flash. Now privy to the secrets of prior existence, Iris learned Barry was The Flash and was targeted by a different Reverse-Flash. Eobard Thawne revealed how he murdered her once before and was about to repeat the act when she killed him. After an abortive murder trial in the 25th century, Iris returned to her own time, joining The Flash in a Speed Force Quest.

Despite all the terrors and hardships Iris has endured, her greatest trial was learning that she and Barry were once married, and agonizing over how to break the news to him.

ON THE RECORD

Iris West debuted as Barry Allen's girlfriend in the very first Silver Age comic story. A sharp, go-getting reporter for Picture News, she spent much of her time berating the seemingly hapless Barry for his constant tardiness.

When they married, he agonized for a year over whether to reveal his Super Hero identity to her. When he came clean, she just laughed. She'd known from their first night together, because The Flash talked in his sleep!

FLEET OF FOOT

No matter how fast The Flash was or carefully Barry worked, his wife Iris was always two steps ahead of him.

ENEMIES The Rogues, Gorilla Grodd, Professor Zoom/Reverse-Flash

AFFILIATIONS Justice League, Teen Titans, Titans

SEAT OF POWER In his new role as a guardian of the Multiverse, Wally set out to help mend space, time, and reality, all of which were damaged and fractured.

His Name is Wally West. He was the Fastest Man Alive. From Kid Flash to The Flash, from accidental killer to pilot of Metron's Mobius Chair, Wally West has lived one of the strangest lives of any speedster, traversing multiple plains of existence just to find his way back home.

The nephew of Barry

Allen's longtime love, Iris West, Wally West grew up idolizing The Flash while living in the small town of Blue Valley. When his aunt arranged for Wally to meet The Flash in Central City, he was thrilled. However, he had no idea that his life would be completely changed that day when lightning literally struck twice.

As The Flash told Wally of his origin, lightning shot through a window, splashing altered chemicals onto Wally, and granting him access to the Speed Force that grants Barry Allen his own Flash powers.

First becoming Kid Flash, a founding member of the Teen Titans, Wally eventually accepted the role of The Flash after Barry sacrificed his life to save the universe during the events of *Crisis on Infinite Earths*. Just as heroic as his mentor, The Flash defended Keystone City from all manner of threats and rogues, and helped protect the world as a longtime member of the Justice League. In his private life, Wally married reporter Linda Park and had two children, Jai and Iris.

But after Barry returned and reality was altered during the *Flashpoint* event, Wally did not emerge in the so-called "New 52" universe that resulted. Lost in the Speed Force, Wally eventually made his way back to the real world. He appeared to Barry, who helped pull his former sidekick out of the Speed Force. And just like that, Barry's memories of his original sidekick came flooding back to him. The same thing happened to the memories of Wally's fellow Titans when he met with them. However, Linda remained lost to him, and his children simply didn't exist in this reality.

While he rejoined the Titans for a time, Wally's mind couldn't handle his reality shattering as it had. He sought out help at Sanctuary, a peaceful rehabilitation center where heroes could receive therapy. However, Wally's mind was unstable, and in one terrible instant, he lost control of his powers, killing several innocent heroes. Wally panicked and tried to cover up his terrible mistake by framing others, but was eventually incarcerated at Blackgate Prison. There he was visited by the Multiverse traveler Tempus Fuginaut, who eventually seated Barry in the New God Metron's Mobius Chair, in order to help correct mistakes in the timeline. In the process, Wally and Fuginaut were able to help Wally's children find their way back to reality and their mother.

WALLY'S RETURN Wally adopted a new costume that paid homage to his classic yellow and red Kid Flash suit when he found his way out of the Speed Force and into the *Rebirth*-era.

ON THE RECORD

Pre-Flashpoint, Wally West first joined Justice League Europe before graduating to Justice League America. Often the lighthearted jokester on a team of older, more serious mentors, Wally nevertheless earned his stripes, even surpassing Barry Allen in terms of sheer speed.

FRENCH EVOLUTION

Justice League offshoot Justice League Europe were based in Paris. Here they strike a pose similar to that on the cover of *Justice League* #1 (May 1987), a copy of which is held by Metamorpho.

DEATH IS NOT THE END
Alive or dead, Life's greatest defenders could not resist the urgent siren call of the mysterious White Entity.

The White Entity is the most enigmatic of all beings embodying aspects of the Emotional Spectrum. Only manifesting in times of ultimate cosmic peril and seemingly choosing its agents for specific purposes and missions, the White Entity can wholly resurrect the dead, rather than merely reanimate corpses, like Nekron.

The White Lantern Corps came into being when Hal Jordan merged with an entity that had lain dormant and hidden for millennia on Earth. As the *Blackest Night* ended, Hal brought Nekron's avatar—Black Hand—back to life, forcing the

Death Lord to retreat to his Dead Zone and reducing his Black Lantern Corps to dust.

When Kyle Rayner mastered all seven colors of the Emotional Spectrum, he became the White Lantern, roaming the universe and preserving life from forces beyond the power of reality's regular champions. Following *Rebirth*, when Rayner and the Guardians sought to restore the defunct Blue Lantern Corps, his white ring shed six of its color components, reducing him to Green Lantern Status.

White energy is seemingly all-powerful, but operates in unpredictable ways: Batman was once catapulted across time and space at a White ring's mercy as it sought to stop Vandal Savage possessing it. Later, while battling the Legion of Doom and Sinestro's Ultraviolet Lantern Corps, the Justice League linked all Earthly life, briefly transforming the world into an untouchable and unconquerable White Lantern Planet.

ON THE RECORD

As epilogue to the *Blackest Night*, the unholy cosmic terror was followed by a *Brickest Day*.

A dozen deceased heroes and villains returned, each with a mysterious mission to fulfill. Closely observed by revived revenant Boston Brand, the White Lanterns pursued their ascribed goals, searching for fulfillment.

Their efforts eventually led to the return of Earth's elemental protector, as Alec Holland once again took up the mantle of Swamp Thing—avatar of The Green.

RENEWAL AND REBIRTH
The White energies of the *Brickest Day* were used to purge Swamp Thing of Nekron's pestilent influence and revive the guardian of Earth's ecology.

TEETH BARED

The White Martians overtly hostile and aggressive intentions even extended to having an extra mouth filled with pointed teeth in their stomachs.

Martians are an ancient race of telepathic shape-shifters who had mastered all arts and sciences. White Martians are aggressive, and resented sharing the Red Planet with intellectual, philosophical Green Martians. Both are the product of genetic tampering by the Guardians of the Universe, who sought to pacify and tame an earlier species known as "The Burning," whose expansion potential threatened all life. Reality shifts in the fluctuating Multiverse have altered their history many times.

After *Flashpoint*, White Martians were the Red Planet's sole inhabitants. However, when their world began to die, they abandoned philosophy for dark blood-magic in their quest for survival.

A recent re-examination of Green Martian J'onn J'onzz's origins revealed that by the time of Mars' extinction event plague, Whites had been subsumed into a greater multi-culture of shapeshifters, but were regarded as a criminal sub-class because they preferred to retain their aggressive battle forms.

WHITE WITCH

DEBUT *Adventure Comics* (Vol. 1) #350 (Nov. 1966)

REAL NAME Xola Aq

BASE 31st-century Legion HQ, New Metropolis, New Earth

HEIGHT 5ft 8in **WEIGHT** 118 lbs

EYES Red **HAIR** Pale Blonde

POWERS/ABILITIES Skilled magic-user; reads auras; connection to magical forces throughout the universe

ALLIES Doctor Fate, Saturn Girl

ENEMIES Mordru

AFFILIATIONS Legion of Super-Heroes, Sorcerer's World Zerox

After studying the cosmomystic arts on Sorcerer's World Zerox for more than a century, Xola Aq became known as the White Witch—one of the most proficient magic wielders in the universe. Arrogant, impatient, and constantly holding back bubbling rage, she joined the Legion of Super-Heroes in anticipation of a forthcoming universal crisis. Her haughty pride in her achievements suffered a great blow when she learned that her father is Mordru the merciless, a supernatural threat to life and liberty across all reality, and the greatest mage of the age.

One of the few Legionnaires able to screen her thoughts from Saturn Girl, Xola Aq secretly burns with the fear that all her triumphs are owing to the blood of a mystic monster, rather than own hard work and sheer ability.

SINS OF THE FATHER

Xola Aq is a white witch with the blackest of secrets—her father is an evil entity, a Lord of Chaos, by the name of Mordru...

WHITE, PERRY

DEBUT *Superman* (Vol. 1) #7 (Nov.-Dec. 1940)

BASE Daily Planet, Metropolis

HEIGHT 5ft 10in **WEIGHT** 200 lbs

EYES Blue **HAIR** Brown

POWERS/ABILITIES Incisive mind, keen journalistic instincts, deductive reasoning, organizational and logistics expertise, inspirational leader and mentor with great personal charisma.

ALLIES Lois Lane, Jimmy Olsen, Clark Kent, Ron Troupe, Miko Ogawa, Heather Kelly

ENEMIES Morgan Edge, Izzy Izquierdo, Glen Glenmorgan, Lex Luthor

AFFILIATIONS *The Daily Planet*, Cat Grant, George Taylor

Perry White was a crusading, prize-winning journalist with the Metropolis-based *Daily Planet* for decades before taking a desk job. Once installed in an office, however, Perry surprised himself, and others, by proving to be an even greater editor than he was a roving news hound. An old-fashioned two-fisted reporter, Perry covered wars and political scandals, gang wars and murders, always aware that the public has a right to know and journalists have a sworn duty to root out the truth and tell their loyal readership.

As Editor and Editor-in-Chief, he made his own ironclad ethics and standards the yardstick by which all staff had to measure themselves. His is an increasingly difficult job in a multimedia world where integrity loses out to sensationalism every day. Perry's greatest role is as a mentor; teaching the next generation how to balance story against personal interest and how, in the end, journalism is a business not entertainment or a soapbox.

Recently, working for *The Daily Planet* has become one of the most dangerous jobs in the news business, drawing Perry and his team into regular contact with aliens, monsters, and superpowered madmen. However, his uncanny ability to discover and train great reporters like Lois Lane, Clark Kent, and Ron Troupe—and get the best out of them—is legendary throughout the industry. He has also steadfastly resisted every effort to lure him away from his beloved *Daily Planet*.

WORDS OF WISDOM
Perry White could juggle 10 stories at once and still be ready with a dozen fresh angles and an idea for the next big thing.

ON THE RECORD

An irreplaceable part of the “Superman Family,” Perry White is one of the most iconic supporting characters in the history of comics. However, he was actually created for the *Superman Radio Show* in February 1940 and only introduced on the printed page at the year's end.

Before White's appearance, Clark Kent had jumped to the barked orders of Editor George Taylor and the great Metropolitan newspaper they worked for was called the *Daily Star*.

HOLD THE PRESSES!

Hard-bitten, hard-boiled, and beefy, Perry knew that to get good stories you had to make your reporters hustle, but when things got tough you could trust them with your life.

WILDCAT

DEBUT *Sensation Comics* (Vol. 1) #1 (Jan. 1942)

HEIGHT 6ft 5in **WEIGHT** 250 lbs **EYES** Blue **HAIR** Grey

POWERS/ABILITIES Boxer and mixed martial arts fighter in peak physical condition; Nine Lives curse bestowing virtual immortality

ALLIES Stretch Skinner, Batman, Catwoman, Black Canary

ENEMIES Brainwave, Yellow Wasp, Johnny Sorrow

AFFILIATIONS JSA, Catwoman, Birds of Prey

In 1941, boxer Ted Grant was framed for murder and on the run when a comic book inspired him to don a costume and track down the real killer. As Wildcat, Ted cleared his name and, loving the double life, kept going. Specializing in sports-related crimes, he often helped his manager, Stretch Skinner, with the detective agency he ran as a sideline.

During World War II, Wildcat joined the Justice Society of America and All-Star Squadron. Cursed by the Spirit King, Ted was saved by magical ally Zatara who altered the spell, granting him nine lives. No matter how many times he died, he always had nine left. Ted scarcely aged, but saw almost everyone he loved pass away. He found renewed purpose teaching boxing to deprived kids and training future heroes. His students included Bruce Wayne, Selina Kyle and Dinah Drake (latterly Batman, Catwoman and Black Canary, and he

now trains all new JSA recruits in hand-to-hand combat. Grant bears a troubled legacy. His goddaughter Yolanda Montez took on the mantle of Wildcat when Ted was crippled during *Crisis on Infinite Earths*, while his boxing protégé Hector Ramirez stole an old costume to become a Super Hero and was murdered by Killer Croc. Ted's own son Tom Bronson is a metahuman, and although initially resistant to fighting now serves with the Justice Society All-Stars as were-panther Tomcat.

GENTLE GIANT:
Gruff and forthright, Wildcat believed every person was equal and that bad people should be decked whatever their gender or situation.

HEIGHT 5ft 8in **WEIGHT** 123 lbs

EYES Blue **HAIR** Brown

POWERS/ABILITIES Superhuman strength and speed, cat-like reflexes and agility; claws.

ALLIES Ted Grant, Nuklon, Alexander Montez

ENEMIES Dr. Benjamin Love, Psycho Pirate

AFFILIATIONS JSA, Infinity Inc.

Before Yolanda Montez's birth, her mother was given experimental drugs by deranged doctor Benjamin Love: experiments that resulted in children born with mutant

abilities. Yolanda concealed catlike powers hidden until her godfather—Wildcat Ted Grant—was crippled during the *Crisis on Infinite Earths*. She then assumed his Super Hero identity as Wildcat II. She served with Infinity, Inc. before joining a covert ops team hunting Eclipso in the nation of Parador. Yolanda died at vengeful monster's hands.

A new Yolanda Montez appeared on Earth-2 in the aftermath of *Flashpoint*. As Avatar of the Red, she channelled the life force of fauna. Following Doctor Manhattan's apparent tampering with time in *Doomsday Clock*, the original Yolanda was back in action beside the original Wildcat.

For a time, Cassie possessed the ability to unlock special silent armor. This power seems to have dissipated thanks to shifts in reality.

superpowers, but also constantly tried to subvert Cassie's will.

Cassie continued her life of crime until recruited by Red Robin (Tim Drake) to join the Teen Titans. Her battle to control the Silent Armor culminated when Diesel took it from her and she was forced to use the Armor's magical lasso to get it back. He died, and the Armor attracted the attention of the demon Trigon, who taunted Cassie by telling her he knew the identity of her father. Adrift in the world, Cassie went to Wonder Woman's then home in London, where she discovered that her father was the deceased demigod Lennox. Cassie also learned that Wonder Woman was her aunt. After a conflict with another of her aunts—the demigod, and her namesake Cassandra—realized that her true family was the Teen Titans, whom she joined as Wonder Girl.

That family would evolve as reality continued to shift. After defeating Despero while in Jacksonville, Florida, Wonder Girl was visited by her grandfather Zeus, who offered her a powerful necklace, one that corresponded with her bracelets and lasso. Cassie declined them, choosing to improve herself first in order to deserve the power he offered.

That quest brought her to Metropolis for college, where she chanced into a fight alongside Tim Drake. She soon rediscovered her long-lost friends from the pre-Flashpoint reality: Impulse and Superboy (Kon-El). Wonder Girl's memories were unlocked as she joined the team Young Justice, and she began to remember serving on the previous incarnation of this team. What she will do with these memories or her Olympian powers remains to be seen.

ON THE RECORD

The previous version of Cassie Sandsmark was not at all reluctant to be associated with Wonder Woman, having seized the mantle of a hero when Wonder Woman came to Cassie's hometown of Gateway City. Temporarily "borrowing" the Amazing Amazon's Sandals of Hermes and Gauntlet of Atlas, Cassie gained prodigious strength and the ability to fly—superpowers she used to help smash a clone of Doomsday.

Later, taking on the name Wonder Girl—an identity used before her by Donna Troy—she helped Wonder Woman defeat a manifestation of entropy called Decay.

AMAZONIAN ALLIANCE
As the symbol on her costume suggested, Wonder Girl was closely allied to Wonder Woman and the Amazons.

The daughter of archaeologist Helena Sandsmark and the demigod Lennox, Cassie Sandsmark was destined for great adventure. She began to find it as Wonder Girl, fighting alongside the youthful superhero teams the Teen Titans and Young Justice. Niece to Wonder Woman and the granddaughter of Zeus himself, Cassie strives to find herself in a world that is constantly changing all around her.

Growing up with her single mother after her father left them, Cassie Sandsmark traveled the world to different archaeological digs. Frustrated and lonely, she began stealing art and artifacts, coming under the sway of an older thief, the charismatic Diesel. He and the teenage Cassie were exploring a temple near a Cambodian dig site when Diesel was attacked by a seemingly sentient being of liquid metal. A stunned Cassie was able to control it using a pair of bracelets that she found nearby. The bracelets were part of the Silent Armor, an alien parasite that enabled

FIGHTING DESTINY

Confronting Superboy who, on orders from N.O.W.H.E.R.E., was trying to kidnap her, Cassie never suspected that, she and Kon-El would one day fall in love.

AMAZON AT HEART

Cassie Sandsmark has regained her memories of serving on the first incarnation of Young Justice. Whether or not she remembers her pre-Flashpoint origin remains to be seen.

CLASSIC STORIES

Young Justice (Vol. 1) #4 (Jan. 1999)

Cassie Sandsmark, wearing a black wig and goggles to mimic the appearance of her idol Donna Troy, joins up with Young Justice as Wonder Girl.

Teen Titans (Vol. 3) #1 (Sep. 2003)

The new Teen Titans are formed, with Wonder Girl as one of the founding members, just as the previous Wonder Girl, Donna Troy, helped found the first Teen Titans. Romance with Superboy looms, and she discovers the truth about her father's identity.

Drake Burroughs was testing a radical new propulsion system when he was engulfed by an energy release that should have killed him. Instead, he became an ephemeral

cloud of undetectable sentient energy, requiring a containment suit to keep himself from dispersing. Wanting to put his misfortune and new powers to good use, he applied to the Legion of Super-Heroes. He was initially rejected, as his powers seemed to mechanically duplicate other members' natural gifts. It was only when he apparently sacrificed himself in action—revealing that his suit was an Energy Release Generator and he was his own unique super-power—that he was accepted.

Wildfire is impetuous and extremely self-confident, considering himself one of the team's combat big guns and is always in the forefront of any battle.

A career criminal from a young age, William Zard was in and out of prison all through the 1930s. Deciding to refashion his criminal life, he left the US and traveled to a Tibetan monastery. Here he studied with a master lama and learned hypnotism and astral projection, before using those newfound skills to murder his teacher.

Zard then became the Wizard, returning to post-war USA and offering his services to the Justice Society of America in the mistaken belief that they were a criminal organization just pretending to be heroes. They, of course, refused, provoking Zard's lasting enmity and causing him to form the Injustice Society as a villainous counterpart to the JSA. They clashed numerous times as Zard increased his magical knowledge and expanded his list of enemies to include the Justice League of America.

The last survivor of the Council of Wizards bestowed the powers of Shazam on Billy Batson after initially rejecting him. The Wizard felt that Batson was not perfectly good and thus unsuitable for the role of his champion. The Wizard had long ago created Black Adam, as his champion: a frightened orphan just like Billy, but who later killed the other Council members and would eventually become Billy's nemesis. The Wizard confided in Pandora that he finally accepted Billy because he anticipated his own end and needed a successor. He also apologized for her wrongful conviction by the assembled Wizards in millennia past, when they made her part of the Trinity of Sin along with Phantom Stranger and The Question. The Wizard was later revealed to be the physical form of the god Mamaragan, lending his name to the new SHAZAM acronym, granting Billy Batson his powers and new heroic name.

With reality altered after *Rebirth*, The Wizard returned to life as the last of the

Council, interfering with Billy and the family he shared his powers with, and even traveling to Earth to berate and challenge him. In a tense duel, Shazam took control of the magic, leaving The Wizard to ruefully assess his choices and future.

CEO E.D. Caldwell was a business magnate who attempted to buy Wayne Industries. Bruce Wayne refused, knowing Caldwell Tech was a weapons company that would turn Wayne Industries' research to violent ends. At the same time, a series of murders targeting policemen attracted Batman's attention and he learned the truth about Caldwell: he was a killer calling himself Wrath. Modeling his appearance on Batman, he was using Caldwell Tech as a front to destroy Gotham City Police Department and create an army of his own, using both his and Wayne technologies.

The Dark Knight later discovered Caldwell's hatred of police began when his father was murdered during a diamond heist by corrupt cops. With this knowledge, Batman confronted and defeated Wrath, imprisoning him in Blackgate—where he began a villainous partnership with the criminal Emperor Blackgate. Caldwell eventually escaped, taking over a TV studio and demanding Batman fight him live on air to confirm Wrath's A-list villain status. Instead, he and his army of terrorists were soundly crushed by apprentice Super Hero Spoiler.

ON THE RECORD

The original Wrath also modeled himself after Batman, and focused his obsession on destroying those he blamed for the deaths of his parents—law enforcement officers.

After years as an assassin for hire, he returned to Gotham City and plotted to assassinate Commissioner James Gordon. However, he died in a fall from the roof of a building where he was fighting Batman. His adopted son, trained to be the Robin to Wrath's Batman, later adopted the Wrath's name and mission as well, before being caught by Batman and Nightwing.

WRATHFUL OBSESSION

The first Wrath was haunted and inspired by Batman—and determined to destroy him.

ALLIES Young Justice, Superman, Gleek, Polly Math
ENEMIES Mr Mxyzptlk, Lex Luthor, League of Annoyance
AFFILIATIONS Astrisk

Twins Jayna and Zan were born on the planet Exxor, a utopian place with virtually no crime or social problems. However, their grandfather had been responsible for terrible purges of those deemed unworthy of the planet, and the twins' father asked Superman to take the teenagers to Earth to escape their family's shame.

As well as being enrolled in high school, Jayna and Zan were given internships at the Hall of Justice, where they defeated Mr. Mxyzptlk in their first week on the job. Both twins were shapeshifters, with Jayna able to transform into any animal and Zan to become water in any of its forms. After impressing the Justice League with their fresh approach to crime fighting, the twins were given a new department, Astrisk (Assessing Strategic Threats Requiring Innovative Skills and Knowledge).

ALIEN FRIENDS

The shapeshifting Wonder Twins proved too much for Mr. Mxyzptlk and impressed the Justice League with their crime-fighting skills.

He became renowned for his efficiency in cleaning up after espionage operations, including eliminating any witnesses. Walker was killed on his first mission, but was resurrected by an experimental enzyme that restored his physical health but drained him of all emotion. This not only made him a star basketball player, but also a remorseless killer, and he became known in the business as XerO, aka the "Closer." Walker died again in a test of his capabilities set up by his superior, Frank Decker, and was once again brought back to life. This time, Walker's rebirth left him brain-damaged. It remains to be seen whether his agency will attempt to return Walker to his role as XerO.

Granddaughter of Barry Allen—the second Flash—Jenni Ognats was born a millennium from now on planet Aarok. As a teenager, Jenni inherited the family's power of super-speed. She could also agitate her molecules to vibrate through solid matter. Although initially difficult to coordinate while traveling at maximum velocity, she eventually established fine control and became the hero XS. Jenni joined the Legion of Super-Heroes and, on an early mission, traveled to the 20th century, teaming up with her cousin Bart Allen, hero-in-training Impulse. Together, they united with Superboy to fight villainous speedster Savitar, who was intent on eradicating all super-fast rivals. Jenni later journeyed to the 100th century and became trapped at the end of time. After the Time Trapper intervened, Jenni was able to return to her own century.

All Speed Force users are highly attuned to reality shifts, and XS dropped out of existence during the many crises besetting the Multiverse. Following *Rebirth*, Jenni returned to the memory of her cousin Bart, so her physical comeback seems likely.

TESTING THE LIMITS: In addition to superspeed, XS could fly thanks to her Legion flight ring, but she was not prepared for the time-travel she would do on the Legion's behalf.

REAL NAME Diana

BASE Washington, D.C.

HEIGHT 6ft **WEIGHT** 165lbs **EYES** Blue **HAIR** Black

POWERS/ABILITIES Divinely bestowed strength, speed, and durability matching the Olympian gods; expertise in many forms of armed and unarmed combat; flight; Lasso of Truth compels those in its coils to tell the truth; can speak with animals.

ALLIES Batman, Superman, Aquaman, Steve Trevor, Donna Troy, Hippolyta

ENEMIES Circe, The Cheetah, Giganta, Dr. Psycho, Silver Swan

AFFILIATIONS Justice League of America, Amazons, Justice League Dark

Wise as Athena, stronger than Hercules, swift as Hermes, and beautiful as Aphrodite, Wonder Woman is Diana, daughter of Zeus. She is the princess of an ancient tribe of warrior woman known as the Amazons, and a founding member of the Justice League. After a childhood spent learning the arts of war on the island of Themyscira, she ventured into the world of mortals as the Amazons' ambassador of peace. Diana abides by a strict ethical code; her goal is peace and harmony between women and men. But she knows there's a very long way to go before this can be achieved.

AT A GLANCE...

Amazon Princess

Diana spent her childhood trained by the the Amazons of Themyscira. Their world exists outside our own, and they live their lives with great dedication to their Patrons, the Olympian Gods.

Bracelets

Once destroyed in the uprising that originally freed the Amazons, Wonder Woman's bracelets used to belong to her mother, Hippolyta. They were re-forged using Amazonium, a rare metal found deep inside Themyscira. To date, they are the strongest bracelets worn by any Amazon.

If nothing else, Diana of Themyscira stands for truth. However, it wasn't until recently that she realized she had been living a lie. Diana was born on the island of Themyscira, the daughter of Zeus and the Amazon Queen Hippolyta. However, her origins were hidden for decades to protect her from the wrath of Zeus's wife Hera, who was known to hunt down and kill her husband's illegitimate children. This gave rise to the legend that Queen Hippolyta had sculpted Diana from clay.

Growing up on Themyscira as the only child of her people, Diana was loved by the Amazons and doted on by Hippolyta. While she excelled in the ways of war, her thoughts were always of peace. It was this kind heart that took pity on American Steve Trevor, when he and five other Navy Seals crashed their plane on the shores of the island paradise. While his friends died in the wreck, Steve was healed in part due to the Amazons' purple ray and the medical expertise of the Amazon named Epione.

As Diana bonded with Steve, the Council of Themyscira met to discuss these soldiers that had landed on their sacred soil. There were no men on Themyscira, and Queen Hippolyta was tasked with deciding if this was an invasion, or perhaps the work of her old enemy, Ares, the God of War. To that end, the Council decided to choose a champion to send back to "Man's World." The chosen ambassador would accompany Steve Trevor and assess this new threat to the Amazons' way of life. To fairly choose this warrior, Hippolyta advanced the schedule of the Amazons' traditional games, feats of skill that would prove which Amazon was the most worthy. However, the winner of the games would forsake her natural immortality and never be allowed to return to Themyscira.

Hippolyta knew the outcome before the games even began. And as predicted, Diana was one of the last three women standing after the initial trials of battle. To choose the victor, Hippolyta asked each woman to deflect a bullet from a gun found in the wreckage of Steve Trevor's plane. Only Diana successfully deflected the shot with her bracelets, and soon she and Trevor were leaving the island for the United States aboard his reconstructed plane, albeit with an extra added feature thanks to the Amazons' technology: the aircraft was now invisible.

COMMUNING WITH THE GODS
While in a Navy holding cell, Wonder Woman was visited by the Olympian Gods in animal form.

CLASSIC STORIES

Wonder Woman (Vol. 1) #212–222 (Jun.–Jul. 1974 to Feb.–Mar. 1976)

After losing her powers, Diana has to perform 12 labors to earn her way back into the Justice League—and Hercules can't help her.

Wonder Woman (Vol. 2) #1–6 (Feb.–Jul 1987)

Introduces Wonder Woman's modern history and her mission as an ambassador of peace, along with the now-classic origin of her powers as gifts from various Greek gods.

Wonder Woman (Vol. 2) #90–93, #0 (Sep. 1994–Jan. 1995)

Angry at Diana for the perceived failures of her mission in the outside world, Hippolyta declares a contest to determine a new Wonder Woman. This is won by the Amazon Artemis, who briefly claims Diana's title.

Wonder Woman (Vol. 2) #219 (Sep. 2005) Faced with an impossible choice, Wonder Woman kills Maxwell Lord, freeing Superman of his mind control, but leaving her future with the Justice League in doubt.

Roping Them In

Wonder Woman's Lasso of Truth is called the Golden Perfect by the Amazons. It is able to compel those it comes in contact with to tell the truth. It is also virtually unbreakable.

AMAZON TECH

Wonder Woman sometimes employs an Invisible Jet, one that is undetectable by the naked eye and by most radar systems. This remarkable camouflage effect is achieved by the use of individual tiles that appear purple from the inside. Surprisingly, the Amazons can convert any aircraft to make it invisible using this technology.

NOW YOU SEE HER, NOW YOU DON'T
Wonder Woman's Invisible Jet is ideal for secret missions in faraway places. In addition to transporting useful equipment, it enables her to come and go undetected by enemies, and can provide a handy refuge when evading pursuit.

WONDER WOMAN

TWINNING
Jason and Wonder Woman didn't always see eye to eye, but they certainly looked like twin siblings, especially when Jason was clad in his god-made armor.

Clad in red, white, blue, and gold, with an eagle adorned on her chest, Diana was given the Golden Perfect – better known as the Lasso of Truth – an unbreakable rope enchanted by the Greek Gods. She and Steve returned to the U.S., where Diana met Lieutenant Etta Candy and an expert called in to help translate Diana's strange ancient language, Dr. Barbara Ann Minerva. Diana revealed to Dr. Minerva that she had been visited by the Greek Gods and had been given "gifts," including incredible strength.

When Diana stopped a shooting at a shopping mall orchestrated by the villainous Sear Group, she discovered her ability to fly and move at super-speed. She also soon realized that her lasso helped her talk to her new American friends, as well as to animals. Minerva and Diana then learned that the Sear Group was run by a villain who appeared to be Ares, God of War. Diana defeated Ares and his planned chemical attack, much later discovering that this Ares was a ruse created by Ares's children Phobos and Deimos. After saving the United Nations from this attack, Diana earned a Super Hero name of her very own: Wonder Woman.

Diana soon helped found the Justice League in order to repel an invasion by the evil New God Darkseid of Apokolips. She became a legend in her own right, fighting the likes of The Cheetah, Circe, Dr. Poison, Giganta, and dozens of other threats. While she and Steve Trevor originally shared a relationship, she soon fell in love with Superman, although that relationship ended when this version of Superman died, later to merge energy with the Superman of the pre-Flashpoint reality. She and Steve later rekindled their relationship after he set up a home for her on the Virginian Coast.

DARK MAGIC
Wonder Woman was briefly possessed by the goddess Hecate while fighting alongside her magical allies in the Justice League Dark.

WARRIOR FOR THEMYSCLIRA
Wonder Woman is not against taking up arms in the cause of peace. More often than not, however, she wins her battles by showing love and mercy toward her opponents.

THE AMAZO VIRUS

Lex Luthor's organic virus version of the Amazo android operating system transformed Dr. Armen Ikarus into Patient Zero. The virus gave him the uncanny ability to mimic any superpower he encountered. In the event, Wonder Woman subdued him long enough for Batman to get a sample of the virus to begin ascertaining its origin.

One of the few heroes who was immune to the virus, Wonder Woman then convinced Superman to work with Lex Luthor to discover a cure. Diana was also the one who figured out that Patient Zero could not mimic cold powers, laying the groundwork for Superman to neutralize the threat with his freeze breath, while Lex Luthor began distributing the vaccine.

PATIENT ZERO

He could mimic almost any superpower after being infected with the Amazo virus, but even Patient Zero was not able to simply shrug off the Lasso of Truth.

WONDER WOMAN

The life of the daughter of Zeus is complicated. For years, Wonder Woman was duped into believing that she could come and go from Themyscira as she pleased. She soon learned that her mind had been manipulated, and she was destined to never see her mother again, as past memories raced back to her. She had also believed that she had trained with Ares, the God of War and accepted his mantle when he died. That proved to be another manipulation of her reality, one that even Diana doesn't fully understand.

When Diana's half-brother Hercules was killed by Super-Villain Darkseid's daughter, the half-Amazon Grail, Wonder Woman learned she had a twin brother named Jason.

WONDER WOMAN IN WWII
A story has surfaced of Wonder Woman saving the life of the President of the United States in 1939, and inspiring the first generation of heroes. How this event was possible remains a mystery.

She sought Jason out, learning he had been taken from Themyscira as a baby by General Philippus and was given to an immortal in the outside world named Glaucus to raise as his own. When Diana finally met Jason, however, he betrayed her, siding at first with Grail. While Jason later realized the error of his ways, Grail was able to complete her mission. She brought Darkseid back to his prime using Zeus's energy. Darkseid and Zeus then clashed, with Zeus perishing in the conflict. Wonder Woman had gained a brother, but lost a father all in a single moment.

Jason adopted a suit of armor from the gods and fought valiantly by Wonder Woman's side, despite his rather unrefined behavior. When mysterious Dark Gods attacked Earth, Jason allowed himself to be taken by these powerful entities in order for Diana and the Justice League to live free. Despite being rocked by yet another

DIVIDED LOYALTIES

Wonder Woman partnered with the New 52 version of Superman, with whom she had just begun a romantic relationship, to thwart General Zod's plot to extract Doomsday from the Phantom Zone. In a last-ditch move, she split an atom with her sword to destroy the Phantom Zone Gate. While her relationship with Superman seemed easy and natural, it was fated not to last.

STAR-CROSSED LOVERS?

Wonder Woman's relationship with Superman caused some tension in the Justice League—and indirectly led to the creation of Amanda Waller's competing Justice League of America.

tragedy, Wonder Woman continued to fight on, facing threats old and new, and even leading a team of magical heroes, the Justice League Dark.

With the help of the enchanted sword of Antiope, Diana was astonished she was able to find her way back to the real Themyscira. She reunited with her mother, and now has the ability to travel back and forth from the outside world at will. In fact, when Wonder Woman's bracelets were shattered by The Cheetah, who was wielding the fabled God Killer sword, Hippolyta was able to gift Diana with even stronger replacements during one of her many visits to Paradise Island.

With her past restored and her future bright, Wonder Woman is steadfast in her unending battle for justice and equality.

AMAZING AMAZONS

Wonder Woman entrusted the Bana-Mighdall champion Artemis with a barbed lasso renamed the Golden Promise—originally the evil Superwoman's Lasso of Submission. While both have Amazonian roots, Artemis's people were a nomadic tribe who worshipped the Egyptian Pantheon.

REBIRTH

TRUTH SEEKER

Before the event known as *Rebirth*, another in a series of manipulations of the DC universe by the powerful Doctor Manhattan, Diana believed herself a student of Ares and his heir as the God of War. However, when she found she could crush Ares's supposedly indestructible helmet in her hands as if it were paper, she realized that this was not the truth of her situation. She set out to discover her new status quo, realizing that every interaction she had had with the Amazons after her original departure into "Man's World" had been a lie.

ON THE RECORD

From the outset, Wonder Woman has been portrayed as a complex amalgamation of feminist icon and glamorous Super Hero. Over the years, the character has been a vital touchstone for comics' portrayal of women. She has also generally been known for her ability to find nonlethal solutions, even in the midst of bloody battles.

Changing with the times

With her character established in comics' Golden Age, Wonder Woman transformed during the Silver Age, becoming reborn for the feminist era. A 1959 origin story was the first to trace her powers to the blessings of the Olympian gods. Demeter granted her strength, Athena wisdom, Artemis the Eyes of the Hunter, Hestia control over the Fires of Truth, Aphrodite beauty, and Hermes the power of flight. Surrendering her powers from 1968 to 1972, the now-mortal Diana Prince trained in martial arts with the blind master I Ching and wore mod fashions in a series of adventures taking her around the globe.

Keeping the peace

Following *Crisis on Infinite Earths*, Wonder Woman was recreated as an emissary bringing a message of peace to "Patriarch's World" from Themyscira—the new name for Paradise Island, with a new history to go with it.

The romance aspects of her character,

THEMYSKIRA'S CHAMPION
A strong believer in Amazonian ideals, Wonder Woman tried to spread a message of peace and mercy in the wider world.

diminishing since the 1960s, almost completely disappeared, and new layers were added to the original story of Hippolyta forming her from clay.

Battle royale

Diana's role and obligations in the outside world caused tensions back at home on Themyscira, eventually leading to all-out war between the different factions of Amazons on Themyscira and in the desert kingdom of Bana-Mighdall. This epic conflict destroyed Themyscira and led to the abolition of the Amazon royal family, however, Themyscira was later rebuilt as an archipelago of floating islands.

PARADISE LOST

When war came to Themyscira, Wonder Woman put her life on the line without compromising her ideals.

Fatal consequences

The most notable exception to Wonder Woman's commitment to nonlethal combat was her necessary killing of Maxwell Lord, who had seized control of Superman's mind. This choice had devastating consequences, alienating her from Batman and Superman—both of whom condemned her actions, but without suggesting what else she might have done—and laying the groundwork for the multiverse-shattering event known as *Infinite Crisis*.

THE HARDEST CHOICE

Seeing no other way to protect the world from Superman, Wonder Woman broke her own cardinal rule and killed Maxwell Lord.

AMAZON ARSENAL

Wonder Woman is rarely without her bracelets and lasso, which alone are enough to handle most enemies. But if the occasion demands it, she has additional armor and weaponry at her disposal—some of it claimed as trophies on the battlefield.

XYLON

DEBUT *R.E.B.E.L.S.* (Vol. 2) #4 (Jul. 2009)**POWERS/ABILITIES** Telepathy, exemplary marksmanship.**ALLIES** R.E.B.E.L.S., L.E.G.I.O.N.**ENEMIES** Starro the Conqueror, Kanjar Ro

Xylon was a member of the alien race known as the Dominators, a highly advanced and violent civilization that lived at the edge of the universe in a strict caste society. Each Dominator's position in society was determined by the size of a red dot that appeared on their forehead.

After serving as the Fleet Admiral of the Xylon Expanse, and later as Warrior Caste Commander, he became the first Dominator to take an individual name. Now calling himself Xylon, he joined Vril Dox's R.E.B.E.L.S. (Revolutionary Elite Brigade to Eradicate L.E.G.I.O.N. Supremacy), the splinter group of the intergalactic peacekeeping force L.E.G.I.O.N. (Licensed Extra-Governmental Interstellar Operatives Network). Working alongside his newfound allies they were able to defeat Starro the Conqueror.

Soon after this first battle, and in defiance of the Dominator caste system, the rebellious Xylon replaced the telltale red dot on his forehead with the L.E.G.I.O.N. symbol.

CASTE AWAY

When the R.E.B.E.L.S. transitioned into a reformed L.E.G.I.O.N., Xylon took its symbol as his own.

STATUS SYMBOL

The large red dot on the forehead of the Fleet Admiral of the Xylon Expanse denotes his high social ranking within the Dominators.

YA'WARA

DEBUT *Aquaman* (Vol. 7) #7 (May 2012)**BASE** Brazil**EYES** Blue **HAIR** Black**POWERS/ABILITIES** Telepathic communication with animals; uses magic pendant to teleport.**ALLIES** Aquaman, the Others**ENEMIES** Black Manta, Madame Xan, Mayhem

Ya'Wara is a powerful warrior of the Tapirape, an indigenous Brazilian tribe that lives deep in the Amazon rainforest. An Amazon deity granted her the power to communicate telepathically with animals, which she uses as a fierce protector of wildlife and the Earth's fragile environments. She is a skilled fighter, equally good at hand-to-hand combat and wielding her twin daggers. If that fails, her loyal pet jaguars are never far from her side.

Ya'Wara also possesses a pendant that allows her to teleport almost anywhere, including to the moon. This pendant was one of seven ancient magical relics that were created by Atlan, the first king of Atlantis. The relic also brought her in touch with Aquaman, with whom she also shared a telepathic connection. Together, they briefly joined forces with the team known as the Others, to search for the other relics.

During a fight with Black Manta and his cohorts, who were also looking for Atlan's mystical artifacts, one of Ya'Wara's jaguars was killed. She responded by slaughtering the hunters, much to Aquaman's horror. In a final confrontation, Manta stole Ya'Wara's pendant and used it to escape.

ANIMAL INSTINCTS

Believing Stephen Shin had betrayed The Others to Black Manta, Ya'Wara was set to kill him, when Aquaman and Mera intervened.

YAT, SODAM

DEBUT *Tales of the Green Lantern Corps Annual* (Vol. 1) #2 (Sep. 1986)**BASE** Sector 1760**EYES** Green **HAIR** Greyish black**POWERS/ABILITIES** Daxamite superpowers and a Green Lantern power ring generating hard-light constructs, flight and travel through space.**ALLIES** Justice League**ENEMIES** Mongul, Sinestro, Durlans**AFFILIATIONS** Green Lantern Corps

On his homeworld Daxam, young Sodam Yat dreamed of traveling to other planets. When alien Tessog crashed near him, Yat secretly nursed him. However, his outraged parents killed the extraterrestrial, making Yat believe the alien heralded an invasion force. When Yat later saw Tessog's stuffed body in a museum, the shock restored his memories. Horrified, he rebuilt Tessog's spaceship to escape Daxam, but was chosen as a Green Lantern and acquired a power ring. The Guardians opted to conceal two prophecies from Yat: That he would become the ultimate Green Lantern and he would be the last survivor of the Lantern Corps.

Yat defended sentient planet Mogo during the Sinestro Corps War. The Guardians empowered Yat with the Ion Force—living embodiment of willpower—and he brought glory to the Corps.

Yat suffered a rare defeat when captured by Durlans, who removed his ring and experimented on him. He escaped with the aid of the Green Lantern Corps and liberated Daxam from the shapeshifters. He battled beside the Corps to defeat Cyborg Superman Hank Henshaw, and later risked death from toxic elements in Earth's atmosphere to aid the Justice League against The Eradicator and an army of all-conquering Daxamites in the War of the Supermen.

SODAM'S RETURN
After he was captured by the Durlans, Sodam Yat was held on the planet Corona Seven. He was harshly interrogated but later freed by the Green Lantern Corps.

ON THE RECORD

Sodam Yat has repeatedly lived up to the prophecy declaring him the ultimate Green Lantern. He has challenged some of the most fearsome villains in the universe, including Mongul, Darkseid, and even the Anti-Monitor. In *Green Lantern Corps* (Vol. 2) #17 (2007), Yat came close to death from lead poisoning, after being exposed to the metal during a fight with Superboy-Prime. He battled courageously, but as a result of that incident Yat will die within minutes if he ever removes his ring.

**ION FORCE**

Sodam Yat is able to access and generate the green willpower energy of the symbiotic Ion Force, which bestows him with immense power.

YEUNG, EDGAR FULLERTON

DEBUT *Harley Quinn Annual* (Vol. 2) #1 (Dec. 2014)**POWERS/ABILITIES** Self-designed robotic bodies provide mobility, articulated limbs, and weapons systems to his limbless, egg-like form.**ENEMIES** Cap'n Horatio Strong

The brilliant, egg-bodied being Edgar Yeung, also known as Egg Fu, has a weird origin that involves the Great Ten, Chinese sleeper agents, extra-strong glue, and a

giant bird's nest. When he was evicted from his SoHo apartment and could not find a new place because of his odd appearance, he hatched a desperate plan: kidnap Poison Ivy so that she could brew a potion to make people like him. Ivy's friend Harley Quinn went one better, and offered him a room in her apartment. "Eggy" moved in, got a job at the sideshow downstairs, and joined in Harley's wacky adventures. He also did the housework, renovations, and the training of Quinn's "Gang of Harleys" team.

Pre-Flashpoint, the egg-shaped role was taken by evil genius Chang Tzu who, with his Science Squad, created the dread Four Horsemen of Apokolips. He was killed in succession by Will Magnus and his mini-Metal Men, Wonder Woman, and Power Girl, only to rise again in a new cyborg body.

AFFILIATIONS Justice Society of America

During World War II, a wave of metahumans and mystery men arose to battle the forces of fascism. Many of these costumed heroes had juvenile sidekicks and, as the conflict intensified, felt increasingly unhappy about subjecting them to the horrors that were unfolding on a daily basis.

In 1942, the Young All-Stars was created as a youth auxiliary to the All-Star Squadron. Here the frustrated kids and a number of new champions were usefully kept away from the action to appear at Bond Drives and publicity appearances, raising funds for the war effort. However, they were targeted by Nazi super-squad Axis Amerika and soon found themselves undertaking a non-stop crusade against evil every bit as deadly as anything the adult heroes faced on the battlefield.

The Young All-Stars broke up due to personality conflicts before the war ended, although many of the team continued as individual heroes—and villains—in the postwar years.

AFFILIATIONS Wonder Twins, Hall of Justice

Young Justice began after magic exiled all Earth's adults to another world, leaving only sidekicks and junior heroes to conquer genie-posessed child Bedlam and restore the status quo. Crisis averted, Robin (Tim Drake), Impulse (Bart Allen), and Superboy (Conner Kent) hung out to have fun without adult supervision. A loose affiliation was born.

After rescuing immaterial girl Secret from a Department of Extranormal Operations holding center, the teens resolved to stay together as a team and keep doing good. As membership grew, adults started interfering. When Young Justice took over the JLA's old mountain headquarters, they had to accept android Red Tornado as a live-in guardian. Eventually Young Justice became a beacon for every young hero in the business.

After many frantic adventures and nonstop mayhem, Nightwing forcibly disbanded the team after Troia and Omen were killed by Brainiac-controlled super-robots. The bitter survivors renamed themselves Teen Titans and continued under the supervision of wiser heads—Cyborg, Starfire, Beast Boy, and Raven. Following a number of reality shifts including *Flashpoint* and *Rebirth*, Bart Allen returned to Earth-0 and discovered none of his old friends remembered him. Determined to find out why, he started searching and triggered a series of events pulling the old team back together while recruiting new teammates, Amethyst, Jinny Hex, Teen Lantern, Naomi and others. Their adventures crossed many universes, and included defeating tyrants such as Dark Opal, and exposing S.T.A.R. Labs' boss as criminal scientist Dr. Glory. The team became a beacon for all Earth's underage Super Heroes.

ALL TOGETHER NOW
From an accidental start, Young Justice attracted many young heroes into its ranks and, for a time, became a formidable fighting force.

ZATANNA

DATA

DEBUT *Hawkman* (Vol. 1) #4 (Oct.–Nov. 1964)

REAL NAME Zatanna Zatara **BASE** Mobile

HEIGHT 5ft 9in **WEIGHT** 125 lbs **EYES** Blue **HAIR** Black

POWERS/ABILITIES Expert magician with knowledge of innumerable spells, which she can use to teleport, create mystic barriers, fire energy bolts, control the elements, heal bodies, and manipulate minds; generally casts an enchantment by reciting a word backward, but can also cast a spell by other means.

ALLIES John Constantine, Giovanni Zatarra, Batman

ENEMIES Nick Necro, Enchantress, Felix Faust, Blackbriar Thorn, Upside-Down Man

AFFILIATIONS Justice League Dark

HAT TRICKS

Zatanna enchanted audiences with her stage magic routine—but they were unaware she was capable of real sorcery.

Zatanna and Constantine eventually vanquished Necro, but tragedy later struck when a ritual led by Constantine went awry and burned Zatanna's father alive.

Several years later, the world was threatened by the malevolent Enchantress and the Super Heroes of the Justice League proved helpless against her witchcraft. Realizing that the world needed a new, specialized Justice League to fight supernatural threats, Madame Xanadu recruited Zatanna, John Constantine, Deadman, and Shade the Changing Man into a new team: Justice League Dark. After vanquishing the Enchantress, the team regrouped to take on the newly awakened vampire lord Cain.

After the Source Wall at the far reaches of the universe was pierced, unleashing strange new energies into the world, Zatanna found herself in a new incarnation of the Justice League Dark, this time aside Wonder Woman, Detective Chimp, Swamp Thing, and Man-Bat. Fending off powerful forces, like the goddess Hecate and the villainous Upside-Down Man, Zatanna soon learned that the Upside-Down Man was holding the spirit of her father Zatarra. She embarked on a mission to return him to the mortal plane, not realizing that every step of the way was all part of her father's meticulous master plan to vanquish the Upside-Down Man's evil once and for all.

ON THE RECORD

The pre-*Flashpoint* version of Zatanna is also haunted by the death of her father, and obsessed with bringing him back from Hell. She joined the Justice League, playing a key role in the *Identity Crisis* event. After Doctor Light molested Sue Dibny and threatened the League's loved ones, Zatanna used magic to alter his mind. The ethics of this caused a schism in the League—especially when it was revealed that Zatanna had also altered the memories of her teammates.

MIND BENDING

Zatanna employs controversial, mind-altering magic to neutralize the threat of Super-Villain Doctor Light.

ZATARA BURNS

Zatanna was plagued by the memory of her father being burned alive in a magic ritual that went terribly wrong, and blamed Constantine for his death.

MISTRESS OF MAGIC
Zatanna possesses mastery over mystical and cosmic forces, powers as ancient as the universe itself.

CLASSIC STORIES

Seven Soldiers: Zatanna #1-4 (Jun.–Dec. 2005)

After Zatanna loses her magical powers in a clash with the magical entity Gwydion, the intrepid enchantress and her apprentice Misty Kilgore embark on a quest to recover them.

Justice League of America (Vol. 2) #39-40 (Jan.–Feb. 2010)

During *Blackest Night*, Zatanna battles her undead father in a dramatic sorcerous duel. In the aftermath, she quits the Justice League.

Black Canary and Zatanna: Bloodspell (2014)

When Black Canary tangles with a magic-wielding gang, she goes looking for magical help—which leads her to her first encounter with her future friend Zatanna.

DEBUT *Action Comics* (Vol. 1) #1 (Jun. 1938)

REAL NAME Giovanni "John" Zatara

BASE Shadowcrest Mansion, Gotham County

HEIGHT 5ft 11in **WEIGHT** 170 lbs **HAIR** Black **EYES** Blue

POWERS/ABILITIES profound mystical knowledge; can cast a wide variety of magic spells by speaking a word or phrase backward; excellent stage showman and a master of prestidigitation.

ALLIES Batman, Superman, John Constantine, Sargon, Nick Necro

ENEMIES Wotan, King Inferno, Allura, Lobo

AFFILIATIONS Cult of the Cold Flame, All-Star Squadron, Justice League Dark

Giovanni "John" Zatara learned conjuring as a child, after his uncle gave him a magic kit. He discovered he was a true sorcerer while performing: instinctively casting a spell to extinguish a fire. He learned he was descended from *Homo magi*—a human subspecies naturally manipulating magical forces—and fell in love with a woman named Sindella. Their daughter, Zatanna, inherited the gift of magic. Zatara arduously schooled her in all arcane arts, only revealing after his death that he had foreseen the coming of the Otherkind. Zatanna would be ready when the original multiversal creators of Magic returned to reclaim it. At 18, Zatanna defeated evil elemental Allura to rescue Zatara from banishment. For a few years they were together, although Zatanna's relationships with Nick Necro and John Constantine—and Zatara's secret deals with the latter—foretold more trouble to come. Zatara died protecting Zatanna during a ritual that misfired. Damned, he was rescued during the Reign in Hell conflict and believed he had found oblivion, but returned as a Black Lantern during the Blackest Night. Banished to The Other Place with Sargon the Sorcerer, he holds back Otherkind horrors.

LOVE WILL TEAR US APART Zatara loved his daughter Zatanna so much that he sacrificed himself to save her—and was damned in the process.

SPELLBOUND Zatara would do anything to protect his young daughter Zatanna—as puppeteer and criminal Oscar Hempel discovered. Zatara turned Oscar into a living puppet! Something that would come back to haunt Zatanna in later life.

ZAURIEL

DEBUT *JLA* (Vol. 1) #6 (Jun. 1997)

BASE The Silver City, Heaven

EYES Glowing white **HAIR** Variable

POWERS/ABILITIES Angel physiology; Divinely enhanced senses; bodily transformation; casts spell-casting; winged flight; sonic scream.

ENEMIES Sin Eater, Felix Faust, the Blight, Nick Necro

AFFILIATIONS Eagle Host of Heaven, Justice League Dark

A Guardian Angel of the Eagle Host, Zauriel has a deep affinity for humanity. He joined the Justice League in many battles to preserve life, even against rival Angels of the Bull Host. Following *Flashpoint*, Zauriel safeguarded tormented hero Phantom Stranger for millennia, helping against The Question after the accursed wanderer betrayed him and fellow "sinner" Pandora. Zauriel was forced to frequently intervene whenever the Stranger attempted to re-enter heaven in violation of divine edicts.

Zauriel was lured into the House of Mystery and constrained by John Constantine. The Stranger's Justice League Dark teammates needed angelic might. Motivated by love for the Stranger, Zauriel agreed, joining their fight against the Blight, Nick Necro, and Felix Faust. Ultimately, the heroes triumphed, but Zauriel died. Phantom Stranger confronted his own demons and God himself to achieve Zauriel's resurrection, and the angel returned in female form.

GUARDIAN ANGEL As a member of the angelic host, Zauriel has watched over the Phantom Stranger for thousands of years, appearing in many guises.

ZEUS, MAXIE

DEBUT *Detective Comics* (Vol. 1) #483 (Apr.–May 1979)

REAL NAME Maximilian Zeus

BASE Arkham Asylum

HAIR Brown **EYES** Brown

POWERS/ABILITIES Despite delusions of divinity, Maxie Zeus has no powers, though he is a cunning gang leader, employing technology to "prove" his divinity.

ENEMIES Batman

History professor Maximilian Zeus was driven insane by the death of his wife. His obsession with Classical mythology led him to conclude that he was an incarnation of Greek god Zeus, and he became a crime lord in Gotham City. Unconcerned by loss of human life, Zeus and his gang committed mythologically inspired crimes, before he was arrested by Batman and incarcerated in Arkham Asylum. Crazy acolytes of deceased villain Deacon Blackfire chose Maxie's muscled body to house the spirit of their leader. Blackfire performed a ritual to merge Gotham City with Hell, but The Spectre intervened and exorcized Blackfire. Maxie's body was recovered by Detective Jim Corrigan. Zeus recovered, but still believed he was an Olympian god.

Zeus frequently slips out of Arkham, acting as a self-appointed oracle to Batman, obscurely warning him of the threat of Bane and others. On one occasion, Zeus was badly beaten by an increasingly out-of-control Dark Knight.

DIVINE DELUSION Maxie Zeus believed he was a Greek god and dressed and bulked up accordingly. Little did he know he was just Deacon Blackfire's puppet.

His aging was also slowed, and he became immune to pain and injury. He remained loyal to dictator Josef Stalin after the war and was an active participant in the government's bloody purges. Decades later, he traveled to the US to work as a KGB agent against Firestorm and eventually joined the Suicide Squad.

STAR HAWKINS

DEBUT *Strange Adventures* #114 (Mar. 1960)

BASE Tolerance, Tenebrian Dominion

BACKGROUND Down-at-heel private eye Star Hawkins was hired to investigate the identity of the Legend, the longest-surviving member of the bounty-hunting game show *The Hunted*. After Hawkins discovered that said Legend was none other than Lady Styx, the ruthless ruler of the Tenebrian Dominion, his faithful robot assistant Ilda activated an internal bomb that allowed him to escape.

STAR ROVERS

DEBUT *Mystery in Space* (Vol. 1) #66 (Mar. 1961)

BACKGROUND The Star Rovers were a group of mercenary smugglers led by Homer Gint, comprising Chuddu, Karel Sorensen, and Rick Purvis. One of their earliest jobs was smuggling Carol Ferris, Arkillo, and Saint Walker into the Tenebrian Dominion. Instead, the Star Rovers sold them to agents searching for contestants in *The Hunted* game show. Later, the group was hired by Larfleeze, wielder of the Emotional Spectrum's orange light of Avarice, to recover valuable stolen items, including his Orange Lantern Power Battery.

STEADFAST

DEBUT *The Flash* (Vol. 5) #69 (Jun. 2019)

REAL NAME unknown **BASE** Central City

ALLIES The Flash **ENEMIES** Black Flash

BACKGROUND The individual named Steadfast had chosen a life of quiet solitude in the mountains—until the Force Barrier broke, and he was gifted the Still Force, and the knowledge of time that accompanied it. Appearing to Barry Allen, alias The Flash, Steadfast showed him his true past, before enlisting his aid in finding out what was wrong with the Speed Force.

DEBUT *Detective Comics* #20 (Oct. 1938)

ALLIES Crimson Avenger, Seven Soldiers of Victory **ENEMIES** Nebula Man
BACKGROUND Wing was a Chinese immigrant to the US in the 1930s, who worked for ace reporter Lee Travis, secretly the crime-fighting Crimson Avenger. Donning his own costume, Wing and Travis joined the All-Star Squadron during World War II, and Wing became the unofficial eighth member of the heroic team known as the Seven Soldiers of Victory. In a battle with the cosmic being Nebula Man, Wing sacrificed his life to save the Seven Soldiers, who were scattered across time.

WINGMAN

DEBUT *Batman* #85 (Jun. 1951)

REAL NAME Benedict Rundstrom **BASE** Sweden

AFFILIATION Club of Heroes, Black Glove **ENEMIES** Batman

BACKGROUND When billionaire philanthropist John Mayhew assembled the Batman-inspired International Club of Heroes, Rundstrom—Wingman—was among their number. Years later, he was killed by an accomplice after joining the Black Glove criminal organization. After Rundstrom's death, the identity of Wingman was briefly assumed by Jason Todd (aka Robin/the Red Hood), then by Todd's father, Willis.

WITCHFIRE

DEBUT *JLA* #61 (Feb. 2002)

REAL NAME Rebecca Carstairs **BASE** San Francisco, California

ALLIES Power Company **ENEMIES** Nekron, Seven Deadly Sins

BACKGROUND As a youngster, Rebecca found a book of spells, inspiring her to dabble in magic. As an adult, she took the name Witchfire. After accidentally summoning a demon, she vowed to refine her abilities. She joined the Super Hero team Power Company, but discovered she was a homunculus, a magically created artificial being. She died at the hands of Hecate while visiting the Oblivion Bar.

WONDER-WOMAN OF CHINA

DEBUT *New Super-Man* #1 (Sep. 2016)

REAL NAME Peng Dailan **BASE** Shanghai

AFFILIATION Justice League of China **ENEMIES** Fahai

BACKGROUND Long ago, the legendary creature Green Snake was trapped in stone by the turtle Fahai after achieving human form. Centuries later, she was freed by Dr. Omen of the Ministry of Self-Reliance, who gave her the name Peng Dailan. She became the Wonder-Woman of China, forming the Justice League of China with Super-Man, Bat-Man, and other heroes.

WYLDE

DEBUT *Outsiders: Alpha* #1 (Nov. 1993)

REAL NAME Charlie Wylde **BASE** Los Angeles

AFFILIATION Outsiders **ENEMIES** Roderick

BACKGROUND The bodyguard of millionaire Geoffrey Barron—inventor of the Technocrat armor—Charlie Wylde accompanied his boss to Markovia, where they were attacked by a bear. Mortally wounded, Wylde was merged with the bear by the mage Sebastian Faust. Wylde joined Faust's Outsiders, but struggled to control his bestial nature. Eventually he became all bear, and was left in the local zoo.

YO-YO

DEBUT *Flashpoint* (Vol. 2) #1 (Jul. 2011)

REAL NAME Chang Jie-Ru **EYES** Brown **HAIR** Black

ALLIES Suicide Squad, Harley Quinn **ENEMIES** Basilisk, Red Orchid

Chang Jie-Ru was a convict able to increase or decrease his body mass who joined the Suicide Squad to shorten his sentence. Yo-Yo chose to sacrifice his life by stretching his neck around his sister, the crime boss Red Orchid. The convict pleaded with Deadshot to detonate a nanobomb that was implanted beneath his skin. Deadshot triggered the bomb, and both Yo-Yo and Red Orchid were killed.

ZEBRA-MAN

DEBUT *Detective Comics* #275 (Jan. 1960)

REAL NAME Jacob Baker **BASE** Gotham City

ALLIES Kobra **ENEMIES** Batman, Outsiders **BACKGROUND**

Inventor Jacob Baker transformed himself into Zebra-Man by bathing himself in rays from his magnetic force machine, granting him a striped appearance and magnetic powers, which he controlled via a special belt. Committing a series of robberies, he was apprehended by Batman. Later, would-be world conqueror Kobra duplicated Baker's process to create a second Zebra-Man for his Strike Force team.

ZILIUS ZOZ

DEBUT *Final Crisis: Rage of the Red Lanterns* #1 (Dec. 2008)

ALLIES Red Lanterns **ENEMIES** Sinestro

BACKGROUND The Red Lantern of Sector 3544 was Zilius Zox, a savage, hate-filled creature who pledged allegiance to Atrocitus and swore revenge against Sinestro and the Sinestro Corps. Zox notoriously murdered the Sinestro Corps Soldier of Sector 2332 by crushing him within his giant mouth and then seemingly swallowing parts of his body. He possessed superstrength and super-speed, and his Red Lantern Ring gave him the rage-fueled powers of flight and energy projection.

ZUGGERNAUT

DEBUT *Firestorm the Nuclear Man* #66 (Dec. 1987)

ENEMIES Firestorm, Soyuz

BACKGROUND Zuggernaut was a shape-shifting, symbiotic alien that crash-landed in Russia and then merged its monstrous body with a small-time criminal, Matvei Rodor. Zuggernaut tried to kill one of Rodor's enemies, a prosecutor named Soliony, but was thwarted by the American hero Firestorm. Zuggernaut returned to battle the Russian Super Hero team Soyuz, but was again defeated by Firestorm, who used the creature's own explosive energies to defeat it.
